VOL. VIII No. 33

WHITTLIN'

BY DOLPH MOTEN

Jay Sherrill, the proud father of a new baby girl, has been wondering who got this cigar-giving business started after there is a new birth in the family.

And being as financially conservative probably as the next fellow, he wonders why the man who got the idea started doesn't get it stopped.

Jay was, of course, joking when he made mention of his wonderings. But we know how he feels, having had two joyous occasions in our family which were worthy of the cigar passing-out idea.

We will admit, though, that it didn't take nearly as many cigars the second time as it did the first.

Seems as though we got along pretty good with the first box or so, but after that we started wondering as Sherrill has been.

Because they have the ability to laugh at themselves, people are better able to withstand hardships.

That proved to be true with the highway department during last week's snowstorm which posed quite a problem for the state men as they worked around the clock in keeping the snow and ice off the highways as much as possible and strived to keep all roads open at all times.

On one occasion we heard about, they worked to help a man driving a pickup and pulling a horse trailer, with a horse inside, to keep going in spite of all the snow.

Finally, the man's pickup broke down and would go no farther. He had an ace in the hole, though, as the story goes, or more accurately, he had a horse in the trailer. When the pickup stopped and would go no more, he crawled out, unloaded his horse, and waving goodbye to his helpers, rode off into the cold.

Another story had to do with the highway department crewman who worked long and hard to free a man in a big car from a snowdrift.

After the car was freed, the highway man, already tired, even before he started with that hard chore, was wet and cold.

Previous to this time, reports were out, of course, that motorists should stay off the highway unless there was an emergency.

"What kind of emergency was this?" the man in the big car was asked.

"Emergency?" he replied, "Oh, there's no emergency, I just came out to see what you all were doing!"

That ability to laugh at themselves is what keeps some wet, cold and tired people from fighting people in big cars which have been stuck in the snow!

We had good intentions this week of conducting a poll about how people felt about Saturday's school bond issue and writing a story in connection with the poll.

And we did conduct one, partially, but we decided it was turning out much too routine. We weren't finding enough opposition to the election and not enough different reasons for it to make an especially interesting story.

The answers turned out to be too much the same.

See for yourself:

Allen Cumpton: "I'm in favor of it."

I. W. Quikkel: "Yes, I'm in favor of it. We have to have school facilities even if we do hate to pay for them sometimes."

J. E. Sherrill: "I'm in favor of it."

Boyd Gilreath: "I'm for it. We need it. School is backbone of your community. If you don't have a good school, you don't have anything."

Possibly we didn't talk to enough people or at least to the right people to get the negative side of the story.

Still, we feel, as we wrote here last week, that the people who will vote against the bond issue are in the minority.

Incidentally, people who desire more information in regard to the election than they find in this newspaper, may have it just for the asking. There

(Continued on Page 2)

School Bond Election Saturday

AFTER SNOW --

Area Back To Normal

Following last week's snowstorm which began Monday morning and continued through Tuesday bringing approximately a foot of snow with it, things in this area had returned to near-normal by Saturday.

The snow caused almost the entire week of school to be dismissed here. School was dismissed at 2 Monday afternoon. Beginning again Thursday morning, classes were dis-

missed at 1:30 because of high winds, blowing snow and increased cold. There was no school Tuesday, Wednesday or Friday.

Classes returned to their normal schedule this week.

The storm brought an increased workload on members of state highway department here. In an effort to keep all roads in the county free from ice and snow and to keep traffic moving, the crew worked around the clock from Monday until Thursday night at 2 a.m. (Friday morning).

"All highways in the county were open or we wouldn't have quit then," Lloyd Killough, foreman of the maintenance crew, says.

Members of the crew started taking the work in shifts by Tuesday.

The department received extra help from Lubbock, Levelland and Morton. Snow wasn't as heavy and the work was less demanding at the places from which the extra manpower came here to help.

One regular mail supply was missed here Tuesday night because of the storm, Postmaster Gene Ezell says.

School Superintendent Warren Morton says that the three missed days of school last week will have to be made up in the Spring.

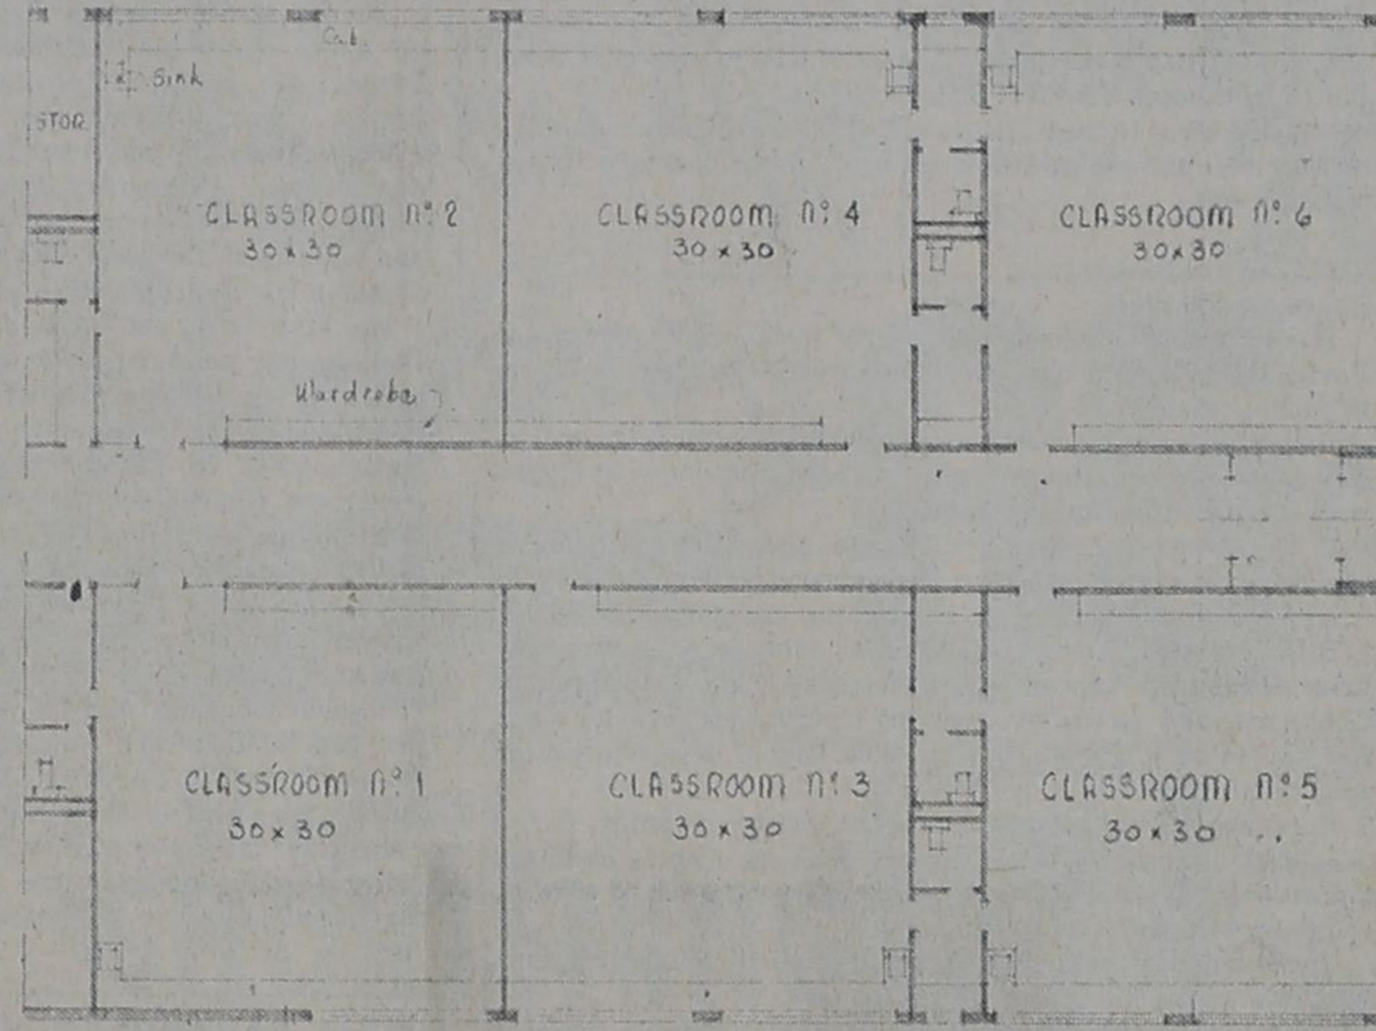

The snow was of the wet variety and brought smiles to faces of area farmers. This was the first real moisture received here during 1964.

Considered a bad feature of the snow was the fact that high winds caused it to drift to a great extent. This hampered travel on East-West roads, making them completely impassable until they could be freed of the snow by county or state equipment.

★ ★ ★

ONE WAY TRAFFIC, PLEASE—Drifts of snow last week were heaviest on East-West roads. This uninviting scene was of the road which runs East of FM Road 1731 four miles south of Bovina after the road had been cleared of a portion of its snow allowing motorists to try it if they were brave enough. This was typical of East-West roads in the area following the heavily-blown snow of Monday and Tuesday of last week.

PROPOSED CLASSROOMS—Shown here is the blueprint for the additional classrooms which are proposed to be constructed on grade school section of present school building. One of the six 30X30 classrooms is slated to be used as a grade school library. This is a portion of the additions and improvements which voters will decide on in Saturday's \$200,000 school bond election.

TO \$100 PER MONTH --

Council Raises Mayor's Salary

The mayor's post in City of Bovina government became a more attractive position from a financial standpoint at a regular meeting of the city council Friday.

Salary for the post was increased from \$25 to \$100 per month.

Previously, all members of the council, including the mayor, had been paid at the \$25 per month rate.

Growth of the community and the increased demands on the

mayor's time were given as the reasons for the pay increase.

In other business at the meeting which was postponed from Tuesday to Friday because of the bad weather, it was decided to wait until after the April 7

city council election to continue planning for new municipal building.

Four of the six members of the council have terms which end at time of that election. The election was called for by the council and Hodge Rigdon was named election judge.

(Continued on Page 2)

No One In City Race Yet

Four positions on the six-member city council become open at end of March.

No candidates for the positions had filed as of this week, Mrs. Mary Ruth Martin, city secretary, reports.

Terms of Mayor Boyd Gilreath and Councilmen A. L. Glasscock, A. R. McCutchan and J. E. Sherrill expire.

These men have not indicated whether they will be candidates to succeed themselves. They have each served one two-year term in their present positions.

Deadline for filing as a candidate is March 7 -- 30 days prior to the election.

Names of candidates may be filed by petition or a candidate may file his own name.

Charles Station Robbed

Charles Oil Co. Service Station on Highway 60 was burglarized Monday night.

A total of \$89 was taken from inside the building, according to Harry J. Charles, owner of the firm.

The entire amount of money was returned to Charles Tuesday through quick action by the sheriff's department.

Entrance to the building was made by ringing a window on the east side, Charles says.

Weather by Willie

Very favorable for more moisture by this weekend. --Willie

Voters Consider \$200,000 Issue

A school bond election in the amount of \$200,000 will be voted on by patrons of Bovina Independent School District Saturday.

If the election carries, the funds will be used to construct seven additional classrooms, including a grade school library, make improvements to existing facilities, and purchase equipment for science and homemaking departments.

Also included in the plan is an elementary physical education room.

Two of the classrooms will be constructed on the high school end of the present building with five rooms and the library slated for the grade school portion.

Polls will be in school building and will be open from 8 a.m. until 7 p.m. A. B. Wilkinson will serve as election judge. He will be assisted by Hodge Rigdon, Mrs. Pat Kunselman and possibly others.

All property owners in the school district who have a paid poll tax or are otherwise qualified may vote in the election.

The need for the additions and improvements was pointed out late last year following a survey made by representatives of Texas Education Agency. The survey took into account the school's present enrollment and the expected growth through 1970.

A raise in taxes will be necessary to pay for the increased bonds.

However, the increase is expected to be less than 10 per cent.

Voters will be marking their ballots on two propositions. The first is FOR or AGAINST maintenance tax which sets the maximum ad valorem tax at \$1.50. The present tax is \$1.05 and

★ ★ ★

STUDY BALLOT—Jim Ware and Mrs. Pearl Dodson, school district tax assessor-collector, look over the ballot which will be used in the school bond election Saturday. The ballot contains two propositions, both of which must carry for the election to carry. A sample ballot appears in this issue of The Blade.

FOR MARCH 19 --

Chamber Directors Planning Banquet

Plans for Fourth Annual banquet of Bovina Chamber of Commerce and Agriculture were made at a meeting of the board of directors Thursday afternoon.

The date of Thursday, March 19, has been confirmed, Jack McCracken, manager-secretary of the chamber, announces. Speaker will be Clint Formby, Hereford railroadman, Don Stone,

minister of the Church of Christ here, will be master of ceremonies.

Committees appointed in regard to the banquet include publicity, Dolph Moten, McCracken and Stone; ticket sales, Mario Trevino and Jim Russell; welcoming out-of-town guests, Bob Estes and McCracken; decorations, Lady Armstrong; menu, Gene Ezell, J. E. Sherrill

and Bedford Caldwell; plaques, Warren Morton.

The directors decided in favor of cooperating with Bovina Woman's Study Club in having local church schedules printed and made available at public places in the community.

Next meeting of the directors is slated for tomorrow (Thursday) at noon at El Cortez Cafe.

Present plans of the school board call for the funds to be spent for the following:

- Seven classrooms and elementary library, \$125,000;
- Elementary activity room, \$36,000;
- Improvements to gym and

(Continued on Page 2)

Petition Two As Trustee Candidates

Two men have been filed by petition as candidates for positions on board of trustees of Bovina Independent School District.

They are Travis Dyer and Durward Bell, both farmers. Two vacancies on the board will occur when the terms of Jack Clayton and J. D. Kirkpatrick expire at the end of March.

Clayton and Kirkpatrick have not announced for re-election. They have each served two three-year terms on the board. Clayton is the present president of the board and Kirkpatrick is a former president.

Candidates may have their names petitioned on the ballot or may file their own names with Grady Sorley, board secretary, or Warren Morton, school superintendent.

A petition may have a minimum of five signatures of qualified voters.

Deadline for filing for the April 4 election is March 4.

Burglars Break In Bonds Oil

Bonds Oil Co., which is getting the reputation of being the most burglarized place in Bovina, was broken into again Saturday night.

This was the second time in less than two months for the business to be burglarized.

The burglars broke open the soft drink machine and took the change from it. Also, 15 cartons of cigarettes were stolen.

Four tires were also possibly stolen, Tom Bonds, owner of the business, says. Whether or not the tires were stolen will be determined after taking inventory, he says.

Entrance to the building, which is located on Highway 60, was made by breaking a window in a shop room.

Damage to the soft drink machine was estimated at \$50.

The firm's soft drink machine was last broken into the latter part of December.

Letter to The Editor

Dear Editor,
 I see we're having a \$200,000 bond election Saturday to build new facilities for our school. Our present school board is asking the people of the district to vote a \$200,000 indebtedness on themselves when they, the school board, can't keep teachers for the building we now have.

My present beef is the loss of our coaches.

In my opinion by losing our coaches we lost two as good as teachers as Bovina has ever had. We also lost two as good as coaches as a B school can get. I ask the people to check the record of these men since they have been at Bovina.

Having a daughter on the

basketball team I try to make all the games, and very few times have I seen more than one board member at any of these games. I wonder where they got their information that these men were doing such a bad job of coaching. Sure these men probably had faults but the next men we get will have faults, too.

My daughter in college told me that having Mr. Kennedy for a teacher her senior year has helped her very much in college.

Another reason why I hate to see these men go is because of the way they looked after our children when they were on school trips. This is something that I as a parent appreciate.

These men are also good church and community men and set good examples for our children. I for one hate to see these men leave our school, and I am sure this is the feeling of a large majority of our school children and the people of the district.

Since I don't have material wealth to give my children I want them to get a good education. This is why I am concerned about having good teachers.

I am sure that if next year's coaches don't win every game the school board will hear complaining from the same old bellyachers.

Yours truly,
 Jack Patterson

Reflections From The Blade

SIX YEARS AGO
 February 12, 1958

A meeting for discussion of Bovina's proposed paving project will be tomorrow night in the school, according to Aubrey Brock.

A total of \$638.07 was contributed to the local March of Dimes Fund during January, according to Roy M. Crawford, local chairman of the MOD in the Bovina area.

Another business will open its doors on Main Street, Bovina in the near future, according to Mrs. Florence Curry, a co-owner of the fabric sewing material shop.

Exact date of the opening for The Bovina Yardstick is not known at present because of a delay in receiving supplies for the business, Mrs. Curry says.

An organizational meeting for a new den for Bovina Cub Scouts will be held Tuesday, February 18, in the Legion Hall, announces Cubmaster Bob Wilson.

The Sands Motel on Highway 60 has changed owners. Announcement of the switch was made this week. New owners are Roy Williams and Jack Williams of Clovis, who purchased the 10 unit motel from Ray Suddarth.

Mr. and Mrs. Hubert Ellison of Bovina are the new managers of the motel and are making their home in the quarters for the management.

THREE YEARS AGO
 February 15, 1961

Some 75 people attended a general membership meeting of Bovina Chamber of Commerce and Agriculture Thursday night in school cafeteria.

Dan True, popular weatherman with KFDA-TV in Amarillo, was guest speaker. His talk was preceded by reports of chairman of committees in the chamber.

J. D. Kirkpatrick and Jack Clayton, school board members whose terms expire this year, have announced for re-election.

An FHA housing project is all but a certainty for Bovina. Bill Christian, Roswell, N.M., real estate man and housing area developer, announced at Thursday night's Chamber of Commerce and agriculture meeting that FHA approval for loans for houses in a new addition on south side of town is expected in next few days.

In a special school board session Friday morning, board members decided to locate two government surplus buildings recently purchased by the school on city-owned land on west North Street, near city water pump.

Three more hats were tossed in city commissioner campaign ring this week.

Names of present commissioner, Bedford Caldwell, owner of Bovina Implement Co., and Johnie Horn, a farmer, were filed by petition.

A. R. McCutchan, co-owner of Bovina Glass Works, was filed as a candidate in race by petition Tuesday.

IT'S A LIVING -- by Al Johns

"I'D LIKE TO CLARIFY A STATEMENT I MADE IN MY LAST NIGHT'S BROADCAST."

NEWSLETTER From U. S. Senator RALPH W. YARBOROUGH

Dear Fellow Texan:
 The current controversy with Panama is complicating our foreign relations with all Latin America, and indeed with all countries:

Let's review a little of the background. In 1902, the present Republic of Panama was a part of the Republic of Columbia. We sought to buy rights for a canal across the isthmus, but Columbia turned us down. So in 1902, Panama revolted from Columbia and our warships kept Columbian troops from landing in Panama. Thus Panama's independence was obtained with the help of the American Navy while Theodore Roosevelt was President.

Then in 1903, we signed a treaty with Panama by which we obtained rights in perpetuity to a 10-mile wide strip of land across the 50-mile wide isthmus, and we built the Panama Canal from 1904 to 1914. Panama reserved what is called titular sovereignty.

We built the canal at a cost of \$380 million and the lives of 4,000 American citizens from yellow fever and other causes. We paid the Republic of Panama certain money. In recent years, Panama has demanded more money, so in 1959 we entered into another treaty with Panama and made concessions. We reaffirmed the titular sovereignty over the Canal Zone that remained with the government of Panama, and we raised the payments to Panama from about \$400,000 a year to about \$1,900,000 a year.

We also have set up a commission to improve U. S. - Panamanian relations. We agreed to pay the Panamanians who work in the Zone higher wages. We built a thousand new housing units for Panamanian employees, and opened more job opportunities to Panamanians. And in September of 1960, President Eisenhower authorized the flying of the Panama flag in one section of the Zone. In 1962, President Kennedy ordered that the Panama flag could be flown wherever the U. S. flag was flown. Now the government of Panama is demanding in effect that we pull out and let them have that territory back.

Twelve thousand ships a year go through the canal. Thirty per cent of them are American ships, but 70 per cent of the goods shipped in all those 12,000 ships are American-owned goods. We owe an obligation to all the shippers, we owe an obligation to the world to keep the canal open. Panama's charges and demands are beyond reason; we will not be slandered out of our obligation to keep this waterway open.

---Ralph W. Yarborough

UNTIL SATURDAY NIGHT -- Snow Postpones Basketball Defeats

Snow postponed basketball games of Bovina Mustangs and Fillies which were scheduled for Tuesday night of last week and prolonged the defeat of the locals by the Hart ball clubs.

The games were made up here Saturday night. The Longhorns downed the Mustangs, 55-35, while the Hart girls took the

measure of injury-hampered Fillies, 35-27.

Judy Strawn and Gwen Christian paced the Fillies' scoring with 13 and 12 points respectively. Sandra Patterson had two.

Roman Ramirez was high for the Ponies with 10. Gene Pruitt looped in nine, David Anderson had six, Jerry Roach four, Scotty Rundell three, Dennis Johnston two and Dean Mayhew one.

The teams played at Nazareth Tuesday night.

The season schedule is concluded here Friday night as Lazbuddie furnishes the opposition. First game starts at 6:30.

Voters --

(Continued from Page 1)

sewer system, \$10,000;

--Science and homemaking equipment, \$5,000;

--Architect's fees, \$12,000;

--Yet to be decided, but possibly to be used for vocational education facilities, \$12,000;

This will be the first school bond election since the present school building was constructed in 1954-'55.

Most community leaders feel that the people will vote in favor of the bond issue. There has been no organized opposition to it.

There was a light response to absentee voting which was done at the school tax office. Deadline for absentee voting was Tuesday.

Junior Teams Lose Games At Farwell

Bovina Junior High basketball teams each dropped their last regular season basketball games Monday night at Farwell. Farwell won the boys' tilt, 35-21. Galen Hromas was high point man for Bovina with 10.

In the girls' contest, Bovina came out on the short end of a 26-20 count though the score was close throughout most of the game.

Elaine Minyen led the maroon and white scorers with 14.

This wound up the season for Coach Carroll Powell's cagers except for the junior high district tournament which is slated to be held in Williford Gym here February 20-21-22.

Council --

(Continued from Page 1)

The council voted to pay the expense of Water Superintendent Paul Holcomb to attend a water and sewer short course at Texas A&M University during March.

A speed zone ordinance, making speed limits inside the city limits official as they are presently posted, was passed by the council.

Present at the session were Mayor Boyd Gilreath and Councilmen A. L. Glasscock, Jim Russell, H. J. Charles and J. E. Sherrill. Councilman A. R. McCutchan was absent.

T COUNTY MEETING --

Demos Make Election Plans

Details of forthcoming Democratic primary election were attended to by members of Parmer County Demo Executive Committee Thursday morning in Friona.

Candidates in the election were charged five per cent of one year's salary for the office each is seeking. Total income from this source comes to more than \$1500, Nelson Welch, county chairman, explained. That sum will be used to conduct the first and second primaries.

The committee "drew lots" for the placing of names on the ballots in contested races in the county. Mrs. Leon Moss will be listed ahead of Hugh Moseley in their race for county tax assessor-collector. Tom Lewellen will be listed in front of Forrest Osborn in Friona commissioner precinct race and Dolph Moten will be listed in front of Welch in his bid for the county chairmanship.

Bill Carthel of Black was named Democratic chairman in his community replacing Clyde Hays, who recently moved to Friona.

In other business, the county committee set the time of precinct conventions at 3 p.m. on the day of the first primary, Saturday, May 2. This is subject to be changed by the precinct chairman in his precinct. The county convention was set for Saturday, May 9, at 3 p.m. at court house in Farwell.

Precinct chairman in the county are No. 1, Black, Carthel; No. 2, Friona, O. J. Beene; No. 3, Bovina, Moten; No. 4, Farwell, John Arm-

strong; No. 5, Lazbuddie, Wyle Bullock; No. 6, Oklahoma Lane, Wendol Christian; No. 7, Rhea, Raymond Schueler; and No. 8, Lakeview, Otho Whitefield.

Attending the meeting were Welch, Beene, Moten and Christian.

Gerald Harden Receives CPA Certificate

Gerald Harden of Houston received his Certified Public Accountant certificate recently after taking tests in Galveston.

Harden, who is a graduate of the University of Texas, is a former resident of Bovina. He is currently employed with Peat Marwick Mitchell and Company in Houston.

Harden and his wife, the former Lexy Stevenson, have one daughter, Jenny. They make their home in Houston.

NEW TEXAS NATIONAL PARK SOUGHT

Texas' Senior U.S. Senator Ralph Yarborough and Secretary of the Interior Stewart Udall confer in the Cabinet member's office on the Senator's bill to create a 77,000-acre National Park in the Guadalupe Mountain range in Hudspeth and Culberson counties. The location is in the Trans-Pecos area of Texas. It is 55 miles from the Carlsbad Caverns and 110 miles from El Paso, a gateway to Mexico. "Secretary Udall was very helpful in my long effort to win passage of the Padre Island National Seashore Recreational Area which became law when President Kennedy (shown in the background) signed it on September 28, 1962," Senator Yarborough said, "and he is also supporting the Guadalupe Park bill."

PARMER COUNTY'S FINEST

Of Interest To THE WOMEN

MR. AND MRS. ROCKY HANCE

Isham, Hance Exchange Vows

Arlene Isham, daughter of Mr. and Mrs. Jack Clayton of Bovina, and Rocky Hance, son of J. D. Hance of Clovis and Mrs. R. L. Barber of Bovina, exchanged nuptial vows Sunday in an afternoon ceremony at Church of Christ in Lubbock.

Virgle Trout officiated at the double ring ceremony. Jackie Blakard of Clovis served as Matron of Honor. She was attired in a blue suit and wore a corsage of champagne carnations. Mac Barter of Clovis attended as Best Man.

Shower Fetes Bride Elect

Miss Anna Gaines, bride elect of O. W. Adams, was honored with a bridal shower Monday afternoon in the home of Mrs. E. R. Hutto.

Corsages made of kitchen gadgets, tied with red and white ribbon, were presented to the honoree, her mother, Mrs. A. E. Gaines, and Mrs. Pierseson Adams.

Mrs. Ovid Lawlis presided at the brides book. The entrance table was graced with a bud vase containing red roses.

Mrs. Bobby Englant played background piano selections.

The serving table carried out the brides chosen colors of red and white and a Valentine theme was used. The table was laid with a white net skirt trimmed with red hearts and centered with an arrangement of white stock, red carnations and wedding bells in a crystal bowl. Red engraved napkins and silver and crystal appointments completed the table. Refreshments of cake decorated with red hearts, fruit punch, nuts and candy hearts were served to guests by Mrs. Leslie McCain and Mrs. Bobby Englant.

Approximately 30 guests called at the come and go courtesy.

Hosting the occasion were Mrs. A. L. Glasscock, Mrs. Johnie Horn, Mrs. Leslie McCain, Mrs. Ovid Lawlis, Mrs. Bobby Englant, Mrs. R. N. Willford, Mrs. J. D. Stevens, Mrs. T. C. Wiseman, Mrs. Connie O'Brien, Mrs. Lee Suddeth, Mrs. Hodge Rigdon, Mrs. Charles Hawkins, Mrs. Henry Minter and Mrs. E. R. Hutto.

Valentine Theme For Bridge Club

Mrs. A. M. Wilson entertained members of Thursday Afternoon Bridge Club recently at her home.

Mrs. Vernon Willard won high, Mrs. Dolph Moten, low, Mrs. Johnnie Horn, slam prize and Mrs. Don Sides, traveling prize.

The refreshment table carried out a Valentine theme. It was laid with a red cloth and featured valentine napkins, coasters and red candles in silver candlesticks. Cheese roll served from a walnut cheese board, chips, dips, relishes, banana bread and whipped butter, cherry angel cake, coffee, tea and soft drinks were served to guests.

Attending were Mrs. Don Sides, Mrs. Johnie Horn, Mrs. Jimmie Ware, Mrs. Jimmy Charles, Mrs. Bedford Caldwell, Mrs. Dolph Moten, Mrs. Vernon Willard and the hostess.

Shower Fetes Mrs. Holcomb

Mrs. Peggy Holcomb was honored with a pink and blue shower Thursday afternoon in fellowship hall of First Baptist Church.

The honoree was presented with a corsage fashioned of infant socks.

The refreshment table was laid with a white cloth and featured a pink and blue artificial floral arrangement. Silver and crystal appointments graced the table. Refreshments of cake, spiced tea and coffee were served to guests by Mrs. Weldon Moody.

Several guests called at the come and go courtesy hosted by members of Mary-Martha Sunday School Class of First Baptist Church.

Club To Have Guest Day

Miss Heidi Jonasdottir, local exchange student from Iceland, and Miss Nergis Yazgan, exchange student from Turkey, who lives in Friona, will be guest speakers at Bovina Woman's Study Club Thursday afternoon at their special guest program at club house.

Guests are invited to hear the exchange students tell of their native lands. Meeting time is three p.m.

Members of program committee will host the meeting.

MR. AND MRS. CONLEY WOLTMON

Nelson, Woltmon Exchange Nuptial Vows Sunday

Linda Kay Nelson, daughter of Mr. and Mrs. Benard Nelson of Farwell, became the bride of Conley (Butch) Woltmon, son of Mr. and Mrs. Jack Woltmon of Bovina in an afternoon ceremony Sunday, February 2, at First Baptist Church in Farwell.

Rev. J. L. Bass read the double ring ceremony. The couple exchanged vows before a simulated altar and a white satin kneeling bench. Centering the altar was an arrangement of gladioli banked on either side by white tapers in black wrought iron candelabras.

Heart Sunday Planned

February 23 will be Heart Sunday in Bovina.

Members of Rainbow for Girls chapter here will go door-to-door collecting contributions to National Heart Fund.

A total of \$32.72 was contributed to the fund Saturday through Bovina Recreation Hall as the day's receipts at that business were given to the fund.

To California

Mr. and Mrs. Art Mast and Carol left Thursday to visit his mother, Mrs. C. B. Mast of Escondido, Calif.

Lynn Looney Has Surgery

Miss Lynn Looney, daughter of Mr. and Mrs. Howard Looney, underwent surgery on her knee recently at Methodist Hospital in Lubbock. She was released last week and is reported to be improving.

CITY DENIM - Cross-stretch cotton denim takes on smart stripes in this blazer jacket and slim skirt ensemble designed for easy wear and easy care. By Koret of California, the outfit comes in favorite denim colors of navy, light blue, and wheat.

Blade Sawdust

By Sue Moten

Last week while we were learning about goat-a-que we had the chance to look at a cook book and household hint book that belongs to Jo Looney. This jewel was printed in 1905 and the author is Mrs. Francis Carruthers. The cooking information dealt with the use of ranges that had warming ovens, water storage and urged the use of coal or wood.

However, the parts of the book we most enjoyed were household and health hints.

We share some of these with you:

"Stimulant for the Hair. One of the best stimulants to promote the growth of hair, when there is danger of baldness, and to hasten growth, is as follows: One pint alcohol, castor oil enough to take up the alcohol, two ounces spirits ammonia, one quarter ounce oil origanum, one quarter ounce tincture cantharides. Shake well together before using. Apply about four times a week."

I don't know whether this remedy grew hair or not but it sounds messy enough to do something.

In pertaining to the kitchen floors the following was suggested, "Let the floor be of hard wood, and covered with a good oil-cloth if you can afford it."

The dissertation on Going To Bed was quite good. "Not every person knows when to go to bed, nor when to get up. In the country, hours are necessarily early. The great charm is the early summer morning. To enjoy this, we must see the sun rise, and be up early enough to do this, one should be in bed by nine o'clock at night."

Most farmers and their wives would find this rather hard to do nowadays. This really sounds like something written by Cotton John, since he advocates the best part of the Golden Spread day is early, early morning. We have always disagreed with this.

"A wife or husband should speak respectfully of each other, and should be mentioned as Mr. -- or Mrs. --." Feel sure that if Dolph referred to me as Mrs. Moten we would wonder who he was talking about.

One of the gems we enjoyed most concerned left handed people since the spouse of the house is left handed. "If you have ever eaten next to a left-handed person at a crowded table, you need not be told of the philosophy of the rule that everyone should, at least, eat righthanded."

Mrs. Charles DAR Winner

Mrs. Sue Charles, mother of two youngsters, and a full-time student at Eastern New Mexico University, has been selected as the New Mexico Winner in the contest of the National Society, Daughter's of the American Revolution, to find its most outstanding junior member.

The winner was recently announced by Mrs. Harold B. Elmendorf, New Mexico State Regent of the DAR from Mesilla Park and Mrs. Floren Thompson, Jr., State Chairman of the Junior Membership Committee.

Each of the 13 chapters of the DAR in New Mexico were asked to endorse a junior member to participate in the competition. Criteria used in selecting the winner included not only participation in DAR activities, but in participating in community, home and church activities, with relation to the National DAR objectives which are educational, historical and patriotic. Non-DAR judges who evaluated the entries were Mrs. Ruth Stuart, former ENMU teacher of English and outstanding New Mexico woman educator; Mrs. Baron Stuart, former

MRS. MARK CHARLES

mer ENMU Economics professor and State Senator R. C. Morgan.

Mrs. Charles, who maintains two households—one in Portales while attending ENMU and one in Stratford where she and her husband have recently moved from Bovina. She has been active in community and church activities in Bovina.

Mrs. Charles has served the DAR as a page at the New Mexico State Conference and as the State Regent's page at the National DAR Congress in Washington, D. C. She is Chapter Chairman of Junior Membership and has worked in this capacity to raise funds for scholarships for students at the DAR schools for mountain children in North Carolina, South Carolina and Georgia. She has served as El Portal Chapter Secretary and is an enthusiastic supporter of the newly organized Yucca Society, Children of the American Revolution.

Shower To Fete Bride Elect

Miss Carole Jean Hastings, bride-elect of Jerry Wright, will be honored with a bridal shower Monday, February 17, in the home of Mrs. Jimmie Charles.

The come-and-go courtesy will be between the hours three and five p. m.

Hosting the occasion are Mrs. Chester Rogers, Mrs. Jimmy Charles, Mrs. Harold Morris, Mrs. Norvell Strawn, Mrs. John Dixon, Mrs. A. L. Hartzog, Mrs. Herman Estes and Mrs. A. E. Steelman.

To Odessa

Mr. and Mrs. Tom Ware and children visited recently in the home of Mr. and Mrs. Dick Martin of Odessa.

THE HIGH PLAINS FARM AND HOME

Red Barn Open House

Open house for Red Barn Chemical installations in the Parmer County area will be Saturday, this weekend, announces Jerry Higdon, district manager.

Red Barn has locations at Friona and White's Elevator (east of the Hub) in Parmer County, and also at Hereford, Dimmitt, Muleshoe, Sudan and Clovis.

The Louisiana-based company, which engages in service to agriculture from Florida to New Mexico, has been opening up its territory on the irrigated High Plains rapidly.

As an incentive to attendance Saturday, a prize of 2,000 pounds of fertilizer will be awarded, and free coffee and donuts will be passed out all day at each of the Red Barn locations.

Warning Issued On Traveling Peddlers Of Trees

The approaching spring season brings with it the threat of bogus tree and nursery stock salesmen operating primarily out of the backs of pickup trucks. Agriculture Commissioner John C. White warned this week.

Commissioner White said his Austin headquarters is already receiving complaints from home owners who have purchased from traveling peddlers and the plants proved to be dead or dying. The influx is apparently heavier this year and an especially troublesome area has been pinpointed around Dallas and Fort Worth.

Teams of Texas Department of Agriculture inspectors have been deployed throughout the state to be on the lookout for itinerate salesmen. Several truckloads of illegal and below standard trees have been seized, White said.

Buyers are urged by Commissioner White to buy only nursery stock which has a certificate of inspection from the Texas Department of Agriculture. This inspection certificate is required by state law but difficult to enforce on fly-by-night operators who slip in from out of state.

"I recommend that home owners buy from reputable local nurseries--or at least always ask to see the inspection certificate," said White. "Bargain plants often prove to be not such a good bargain after all."

Sorghum Clinic Scheduled For Parmer Farmers

Parmer County farmers are invited to attend a Sorghum Clinic Tuesday at 7:30 p.m. in Bovina School cafeteria.

The clinic, which will deal with weed control in grain sorghum with propazine, is sponsored by Geigy Agricultural Chemicals, which has dealers in the county.

Farmers who attend will hear specialists discuss spray application techniques and equipment in regard to controlling weeds in sorghum with propazine and "how to boost yields through effective weed control," according to Charlie Cypert, Geigy representative of Plainview, who will be in charge of the program.

Refreshments will be served at the meeting, Cypert says. A question and answer session will follow the program. "We feel that Parmer County farmers will enjoy the program and will benefit from it," Cypert says in extending an invitation to attend the clinic.

FHA Loans Total \$74,526,000 In 1963

The U. S. Department of Agriculture's Farmers Home Administration made or insured \$74 1/2 million in loans to Texas farm and other rural families, during 1963, L. J. Cappelman, state director of the agency, has announced.

A total of 11,977 families used one or more of the agency's loan programs during the year.

Farmers Home Administration operates a board program of supplementary credit for rural development in Texas. The agency makes loans for family farming operations, farm development, rural housing, community water systems, soil and water conservation and development, recreation enterprises, and other purposes.

Loans are made only to borrowers who cannot obtain credit from banks, Production Credit Associations, and other conventional lenders.

Cappelman reported that in 1963 Farmers Home Administration supervised loan programs had two major results of importance to the economy

of the state.

"Loans to family farmers enabled them to make a major contribution to the well being and progress of the state's agriculture during 1963," he said.

"Capital and management assistance supplied by Farmers Home Administration to its borrowers helped them develop and enlarge their farms, operate more efficiently, and build a sound farming business.

"In addition, Farmers Home Administration loan services for the broader rural community resulted in new homes and better rural neighborhoods in many parts of the state. These services of Farmers Home Administration were expanded in 1963. We believe they will continue to grow in line with increased emphasis of national and state leaders on rural and area development programs," Cappelman said.

Cappelman gave the following breakdown of FHA's loan programs in Texas for 1963.

A total of \$35,000,000 went to 6,755 Texas farmers to pay

for equipment, feed, seed, livestock, for other farm and home operating needs, and to refinance chattel debts, carry out forestry purposes, and develop income-producing recreational enterprises.

Farm ownership loans totaling about \$10,000,000 were used by 436 farmers to enlarge, develop, and buy farms not larger than family size, and to refinance debts, carry out forestry purposes and develop income-producing recreation

enterprises. Emergency loans amounting to an estimated \$18,000,000 were made to 3,785 farmers to assist in maintaining normal farming operations following the various emergencies in different sections of Texas such as drouth, excessive rains, storms or tornados, insect damage, etc.

Rural housing loans estimated at \$6,000,000 were made to 671 farmers and other rural

On The Farm In Parmer County

By DERYL COKER County Agent

Sometimes a person gets to wondering if computers aren't going to take the place of the human brain. Computers figure ratios for livestock, predict political winners, and even go over your tax records and advise a person on which enterprise is paying the most money for the investment. We have several farmers in the county interested in such a program, and if you are interested be at my office at 2:30 on February 18.

Food production today is a highly complex business, and top production involves the use of numerous chemicals for disease, insect and weed control. Chemical residues have become very important. Residues permissible by law are expressed in terms of parts per million.

One part in a million, more concisely written "1.0 ppm," is cutting it pretty thin, but it is a term that should be of much interest to consumers as well as producers.

Since most people probably have never given much thought to what the term implies, lets list a few examples. One inch is 1.0 ppm in 16 miles. A postage stamp is 1.0 ppm of the average adult's weight. A one gram sewing needle is 1.0 ppm of a one-ton haystack. One minute is 1.0 pp of two years.

Thus, one part per million is a surprisingly small entity. It is important to the consumer to have some knowledge of how little pesticide residue actually remains on the fresh produce he buys. It is equally important for the grower to understand how strict are the conditions under which he must operate to come within the limits of residue as required by law.

The timing of applications of pesticides and the strict observance of the amounts recommended by the manufacturer as carried on the labels of containers are mighty important.

As aids to producers, the Texas Agricultural Extension

Service makes available guides, leaflets and other publications containing the latest information and suggestions for the sage use of chemicals in agriculture.

"BLACK OR RED"?

Economics Of Weed Control In Cotton

The scarcity and cost of "hoe labor" has caused farmers to look with favor on chemicals as a means of weed control. Accurate data, stresses John Siebert, Area Extension Farm Management Specialist, is the most important factor in considering economic advantages of chemical versus other weed control methods. The specialist in a recent report discussed chemicals and their role as an added "farm hand."

PRE-EMERGENCE

1963 results from the application of Diuron (Karmex DL), Herban, and Prometryne were comparable on both broadleaf weeds and grasses in Oklahoma -- about 50% kill within 33 days after application. Both Dacthal and Trifluralin (Treflan) gave better than 60% control of both broad leaf and grass weeds after the same period of time. (Treflan was incorporated in soil with a rake.)

Comparable results from applications of Diuron, Herban, and Prometryne were received at Lubbock and Amarillo. At both locations control was 80% or better. Dacthal and Treflan gave very good weed control (93% plus) when incorporated.

POST-EMERGENCE AND LAY-BY

With two applications (second treatment applied first of June) of Diuron, Prometryne and Dacthal with DSMA, (applied with surfactant) broadleaf weed control was almost 100% in Oklahoma research.

Directed applications of Diuron and Prometryne (with surfactant) as post-emergence treatments gave very good weed control at Amarillo. Diuron was used at two rates as a lay-by treatment with varied results at Amarillo.

At Home In Farmer County

By CRICKET B. TAYLOR
 County HD Agent

WORKING WIVES AND THE FOOD INDUSTRY

More and more households have two incomes these days and it is estimated that half the married women will be wage earners outside the home by 1970, according to research findings.

Working wives require after-hours for shopping, many stores are open from 9 a. m. till 9 p. m. now and will be remaining open later in the future, if present trends continue.

Do you know that families with working wives spend 20% more on food? Store managers offer wider ranges of selection and better quality products because of this. They are including more luxury items and more processed, ready prepared, precooked foods which have found favor with busy homemakers.

The food buyer, whether working out of the home or not is really "boss" of the market system; her food selections determine whether or not foods will continue to be offered at the going price in form and amount.

With the many convenient foods offered today the preparation of a meal has been simplified. Knowledge of nutrition - foods for fitness and meal planning to meet the basic nutritional needs of the family has become more important to the homemaker than that of preparation.

Programs and classes on nutrition to meet the needs of the family are being given and are available to special interest groups upon request. Adult 4-H leaders are giving training in nutrition in order that 4-H girls and boys know how to select, prepare and learn why foods make a difference in the way they look, feel and act. Those girls and boys taking Food projects are now preparing for their county food show in April. "Yes! we do have six or eight boys in 4-H foods projects."

To assist working mothers two helpful publications are available from my office upon request. These are the daily food guide, "Food for Fitness" and "Quick Meals" - both are free. Come by the HD Agents office for your copy.

Rorabaugh New Holly Sugar V-P

Guy O. Rorabaugh, Colorado Springs, was elected vice president-operations of Holly Sugar Corporation by the board of directors recently.

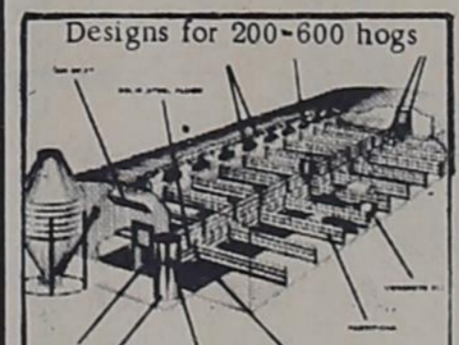

A veteran of 29 years with Holly, Rorabaugh had served as general superintendent since last May, taking charge of the operating department following the death of vice president V. I. Morris.

A native of Salida, Colo., and a chemical engineering graduate of the University of Colorado, Rorabaugh's first assignment with Holly was as special chemist at the Sidney, Mont., factory in 1935. Successively, he was stationed at Holly factories at Hamilton City, Calif., Hardin, Mont., and Worland, Wyo., prior to transfer to Colorado Springs as manager of the research laboratory in 1949.

In 1946, Rorabaugh was promoted to the post of chief chemist and director of research, the position he held at the time he became general superintendent.

As vice president-operations, Rorabaugh is in charge of operations, expansion and improvements at Holly's 10 factories in Colorado, Wyoming, Montana and California, and the construction of the new Holly mill at Hereford, scheduled to go into operation this year.

FARMER-FEEDERS CAN COMPETE

What is the present status of small scale farmer-feeding operations on the Plains? A brief look at trends of the past decade might suggest large-scale feedlots in this region will soon have all the business.

Not necessarily so, according to Area Extension Livestock Specialist Dixon Hubbard. He says a close look at the relationship of costs to return for the small-scale feeding operation indicates the opposite might be true. It's well known on-the-farm feeding has worked for the Corn Belt cattle feeder for many years -- and it's still working, he points out.

One reason small feeding operations might look to be on the way out is because the large feedlots in Texas and other western states have persuasive percentages on their side. On January 1, 1950, about 19% of all cattle on feed were in the 11 Western states -- Texas included. Twelve years later the figure had risen to 27%. The growth of cattle feeding in the West is due primarily to the rise of a relatively few operations but each with a huge feeding capacity.

In the Midwest, for example, there are many feeders, but usually lot capacity is small in comparison to areas such as the High Plains. For example, in 1961, Texas had only 254 feedlots. But capacity of over 80% was 1,000 cattle or more. Not only that, but less than half the feedlots had 95% of the

cattle. As a contrast, in Illinois, over 35,000 farms marketed fed cattle during the same period. But less than 1% turned over 500 head or more annually.

The question, says Hubbard, is why can't the Plains' feeder make money feeding small groups of cattle if the Corn Belt feeder can?

The large feedlot operators in the Plains and other western areas attribute their growth directly to large-scale operations. Large capacity and effective, fully utilized, high-quality facilities are a basic and accepted fact of a successful large-scale feeding operation.

Later in the season, the farmer moves the cattle into an otherwise unused lot that was probably constructed at low cost. Once again, the lot shows up as an expense item, but without the cattle it would stand idle.

The labor farmer-feeders use during the winter feeding period is in the same category as the lot and pasture, how else could he sell his high quality labor year-round time from harvest to spring planting? Also, if the operation is looking

for a way to keep high-quality labor on the farm year-round, cattle feeding might serve to make this possible.

These same calculations hold true--in part--for other items such as land and equipment. The result is small-scale cattle feeding on many farms can mean a profit of \$4 up to \$9 per hundredweight gain if forages, lots, building, equipment, and labor are assumed to have no other productive use, according to USDA economists.

Despite the growth of the large scale feeding enterprise, the farmer feeding a small number of head is apt to remain in strong competitive position. Cattle feeding, Hubbard adds, might offer him a means to turn many of his resources into cash income.

Effects Of Nuclear Explosions

T. G. HOLLMIG AND BOBYE RINEY, CIVIL DEFENSE SPECIALISTS TEXAS AGRICULTURAL EXTENSION SERVICE

Imagine a nuclear attack! We hope one never happens. But since we are living in the nuclear age, it could happen. A nuclear explosion produces a fireball in which the heat is intense—nearly equal to that on the surface of the sun or to millions of degrees of temperature. The heat causes the surrounding air to expand and create a strong outward blast wave. At the same time the bomb fuel, bomb casing, and other weapon parts vaporize and immediately become radioactive.

After a short time the fireball begins to cool and starts rising. As the cooling air rushes in to fill the vacuum, it may lift tons of debris into the mushroom shaped nuclear cloud. The debris mixes with the radioactive materials and becomes dangerous fallout. Tremendous energy, depending on the size of the bomb, is produced by a nuclear explosion. The energy produced is distributed in several ways. Half is dissipated as blast which compresses the air outward from the explosion center. Another 35 percent is dissipated as thermal energy in the form of heat and light. Another 5 percent is initial radiation which is dissipated within a minute after the detonation. The remaining 10 percent of energy is dissipated through residual

radiation which is the radioactive fallout we are concerned about. Bomb size and design, distance from the point of explosion, height of the burst and the ground terrain are factors which determine the effect of a nuclear blast. Blast effect can range from slight to complete destruction in the immediate area of the explosion. Protection from flying particles such as rocks, glass or wood is a major problem. An 8 megaton surface blast would destroy most brick or wood-frame

houses out to about 6 miles from ground zero. A 20-megaton surface blast would extend this same destruction out to 8 or 9 miles.

The thermal energy created by the tremendous heat of the fireball causes fires, burns to exposed skin, and severe eye damage—perhaps even blindness. Heat, like light, travels in a straight line and anything which casts a shadow affords protection.

Initial radiation is not of concern as this takes place

immediately after the explosion and its effects are not as great as the heat and blast in the area. Therefore, the heat and blast would cause more damage than initial radiation to anyone exposed to it. Residual radiation, on the other hand, is most important since it is contained in fallout. It is the radioactive fallout which can contaminate a very large area and against which we must protect ourselves, our food and water supplies and the other necessities for maintaining production and life should an attack ever occur.

NEWS FROM THE FARM BUREAU

BY RAYMOND EULER

By Raymond Euler

Since it is in school that our children are supposed to obtain their understanding of economics in general, we think it is important that parents of school children know what may be offered along this line in our public schools. There are three books on economics that have been approved for selection and use in Texas Public Schools. We have quite a bit of information by quotation from these three books, but here is the first one listed for each book: "The Federal Government can maintain a budget deficit because it has the unique power to create money". (From Economics For Our Times, by Smith and published by McGraw-Hill) Page 510.

added, "his understanding and dedication to the entire Farm Bureau program, his natural ability to work with people, and his 15 years experience in organization work with farmers and ranchers ably qualify him for his new duties."

The new organization director is a native of Anderson County and a graduate of Texas A. and M. University. He was employed with the U. S. Biological Survey (now the Fish and Wildlife Service) for four years and also worked for an oil company and an insurance company before joining the TFB staff as area field representative in 1949.

During World War II, Little served with the 75th and 83rd Infantry Divisions in the states and spent 23 months overseas with the Chinese Army. He was awarded a medal by the Chinese government.

Little is married to the former Mildred Rabke and has a married daughter, Mrs. M. Wayne Brackeen, and a son, Derek, in high school. He is active in the Methodist Church in Cuero.

To stop bleeding use direct pressure. When the wound is large, like the one illustrated here, keep piling large quantities of cloth over the wound, one piece on top of another, and use continuous pressure to check the flow of blood.

TFB Organization Director Resigns

WACO -- (SPL) -- Texas Farm Bureau President C. H. DeVaney has announced the resignation of Millard Shivers as TFB organization director and the appointment of Wayne L. Little of Cuero, former TFB area field representative, as his successor effective that date.

DeVaney's announcement came on the heels of an announcement by Shivers the preceding day at a press conference in Austin that he will be a candidate for the post of Texas agriculture commissioner in the forthcoming Democratic primary.

The TFB president expressed "regret" at Shivers' resignation and said "his services will be missed." He pointed out that the organization's membership has increased each of the eight years Shivers has served as

organization director. "In 1956, when he came to the Texas Farm Bureau from the Tennessee Farm Bureau, the membership was 65,311, and it has grown to 89,401 as of October 31, 1963," DeVaney said. In addition to heading the nine-man TFB organizational field staff, Shivers has been in wide demand as a speaker before civic, industrial and agribusiness groups, and others, where "he has ably presented the Farm Bureau philosophy," DeVaney said.

In announcing Little's appointment to the post, DeVaney expressed confidence that "Farm Bureau will continue to grow stronger as a result of his efforts." He noted that Little's activities as area field representative have "carried him throughout the state," and

ness in sorghum feeds. It is part of a broad effort by USDA's Agricultural Research Service to find new uses for farm products, Harp said, and that Bill Nelson, GSPA's Executive Vice President, had made two trips to the Industrial Utilization Research Center at Peoria, Illinois, in the past to gain attention to grain sorghum in the overall program. This pigmentation problem was one discussed last March at the Association's Biennial Research and Utilization Conference which was attended by Dr. F. R. Senti Head of USDA's Utilization Research Program.

Under the Indiana contract, Professor Ernest Wenkert will study the isolation and characterization of pigments from varieties of milo or kaffir sorghums. He will also test the response of these pigments to bleaching and other treatments.

Earlier ARS studies by C. W. Blessing, C. H. Van Ert, and Dr. R. J. Dimler, scientists at the Northern Utilization Laboratory, Peoria, Ill., show that sorghum grain contains -- in addition to pigments -- unidentified colorless compounds that are converted to colored ones by acid. These compounds could discolor sorghum products that are expected to be white; they are also believed to cause bitterness.

Dr. Dimler will be USDA's technical representative on the project.

Research to identify pigments and related compounds that color or flavor grain sorghum and its products will be conducted by the Indiana University Foundation under contract with the U. S. Department of Agriculture, Elbert Harp, President of Grain Sorghum Producers Assn., announced this week.

The research is aimed at providing a basis for future studies on avoiding discoloration of sorghum products such as starch and on avoiding bit-

Utilization Research To Study Grain Sorghum Pigments

Wanted: A Texas Hero

Somewhere in rural Texas lives a person who is due a hero's award. He or she, adult or youth, may be your neighbor.

The Texas Farm and Ranch Safety Council is now seeking that individual and you can tell them where he or she lives and about the deed performed. The individual being sought by the Council may have rescued another person from a burning building, saved a child from drowning, rendered services beyond the call of duty during a neighborhood or countywide emergency or risked his life to save another from electrical shock or a highway or farm accident.

There are many rural heroes

in Texas, the Council believes, and they want to recognize and show their appreciation to the one considered by a selection committee as most typical of the nominees.

The Council will present to the person selected their Rural Heroism Plaque. Nominees must come from a rural area or from a town of less than 2,500 population. It is easy to make the nomination. Just submit a narrative covering the heroic deed but include the details, such as the full names of all persons involved and include news clippings and pictures if available.

Then mail the entry before March 1, 1964 to Rural Heroism Award, 3900 Barnett Street, Fort Worth 3, Texas. By recognizing heroic rural service in this manner, the Councilmen believe attention will be focused on the continuing need for improved safety conditions in our rural areas -- at work, at home and at play.

Asks More Technical Training

Austin Texas (SPL) -- George H. Hurt, state director of vocational agriculture, reports that of the 1963 High School Graduates who completed Vocational Agriculture offered in their school and were available for employment, 52.5% were employed in full-time farming or full-time agricultural occupations.

After reviewing data obtained in a survey of the state by his office, Hurt remarked, "These data point up a need to intensify training in technical areas for the group that is entering the related agricultural occupations. This type of training can possibly be offered best in the junior - senior year of high school. Training in the basic science of agriculture, including farm mechanics and farm management, needs to be accelerated for those who will enter farming and pursue a college

education." The figures from the study are as follows:

During 1962-63--46,603 High school boys were enrolled in Vocational Agriculture (1st through 4th year) 12,802 or 27.5% completed all vocational agriculture offered in the high school and/or graduated. 6,753 or 53% of the 12,802 remained in school. 1,044 or 8% entered the armed forces.

143 or 1.1% were incapacitated for immediate employment. 4,862 or 37.9% of the 12,802 were available for employment. The following disposition was made of the 4,862: 1,092 or 22.5% went into full-time farming or ranching. 1,458 or 30% entered full-time agricultural occupations (Total of two above is 52.5% in agriculture.) 1,614 or 33% entered full-time unrelated occupations (Total of three above is 85% full-time employed) 365 or 7.5% were employed part-time. 216 or 4.5% were unemployed. 117 or 2.5% --status unknown

It might be pointed out that the 1963-64 enrollment is 47,963 or 1,360 increase over the 1962-63 figures. The breakdown by years is as follows: VA I -20,301, VA III-11,079, VAII-15,052, VA IV-1,531.

Production Credit Association Reports Active Year In 1963

PLAINVIEW -- (Special) -- The Plainview Production Credit Association, the nation's largest, now observing its 30th anniversary as an agricultural financing institution, loaned a total of \$45,909,691 in 1963 to its farmer and rancher stockholder borrowers in an eight-county area of the High Plains. In a year-end report of activities, General Manager Noel Woodley of Plainview reported the association's 1963 loan volume increased more than \$6,000,000 over the 1962 figure of \$39,886,126, an all-time high in the history of the Production Credit system of agricultural financing.

A favorable outlook for agriculture and agricultural credit conditions in the association's area during 1964 was forecast by Woodley. He pointed out that 1963 was a good crop year and collections have been good. "Credit needs will probably continue to increase due to the increased cost of production, farm equipment and land," he said.

The Plainview Production Credit Association is owned and operated in its entirety by 1,779 farmer and rancher stockholder-borrowers in Bailey, Lambco, Castro, Floyd, Hale, Lamb, Farmer and Swisher counties.

The association was chartered in 1934, and since that date has loaned more than \$206,340,775 to farmers and ranchers in its territory.

"We have but one reason for our existence," Woodley explained, "and that is to provide a dependable and adequate source of agricultural credit at the lowest possible cost." The 36 associations serving all 254 Texas counties receive their loan funds through the monthly sale of debentures on the nation's commercial money market by the Federal Intermediate Credit Bank of Houston, discount agency for the Texas associations.

Although original capital for the associations was supplied by the federal government, Woodley explained, by 1949 all 36 Texas associations had retired all federal funds and association capital became wholly owned by association stockholders.

"At no time have federal funds been used for loan purposes."

The Old Timer

poses," he emphasized, "We compete for loan funds at the lowest possible interest rates each month on the nation's commercial money market through the sale of our short-term debentures." Serving on the Plainview Production Credit Association's board of directors are President Grady Shepard of Hale Center, Vice President Henry Hayes of Plainview, Don Garrison of Silverton, Billy W. Carthel of Frona and Watson S. Jones.

Offices are operated in Plainview, Dimmitt, Floydada, Frona, Littlefield, Muleshoe, Olton, Silverton and Tulla. Personnel includes the following: Plainview -- General Manager and Secretary-Treasurer Woodley, Assistant Manager Fred Conner, Assistant Secretary H. L. Howerton, Assistant Treasurers Frances Miller and Ruby Lena DeMent, Loan Representatives Waldo Baxter, Jimmy Holt and James M. Lackey, Assistant Bookkeeper Melba Kelly and Office Secretaries Sarah D. Ross and Martha Stark.

Dimmitt -- Field Office Manager Ewing L. Mathis and Office Secretary Ann Armstrong; Floydada -- Field Office Manager Edmond A. Williams, Assistant Manager Bill Black and Office Secretary Darlean Turner.

Frona -- Field Office Manager Wade Wright and Office Secretary Thelma Watkins; Littlefield -- Field Office Manager Martell LeVeque and Office Secretary Jonnie E. Brestrup; Muleshoe -- Field Office Manager W. B. LeVeque, Assistant Manager Bo Bryant and Office Secretary Nellyne Morris.

Olton -- Field Office Manager Bobby J. Harber and Office Secretary Velma Kemp; Silverton -- Field Office Manager Steve Scott and Office Secretary Brenda Patton; Tulla -- Field Office Manager C. E. Anderson Jr. and Office Secretary Daphne Hale.

Woodley announced that the association's 30th annual stockholders' meeting will be held in Plainview on Saturday, March 7.

FOOTSAVING EDUCATION

by James E. Edwards

How Can I Be Sure That My Children's Shoes Fit

When I Buy Them

If you mean that of the shoes to check the fit of the shoes yourself, you should first work in a shoestore for at least two years. Then you will be more uncertain than you are now.

If the shoe internship is impossible I would use the practice of most women when they buy a pair. They don't rush downtown at fifteen minutes before closing time and let the first operator they come to give their hair a fast sizzle. Hairdos are too important.

Even a newcomer to town knows before she leaves the house not only which beauty parlor she is going to but which beautician will give her the kind of curl she wants. She will read current magazines waiting for the operator to take her and she might even overpay the bill if she is especially pleased with what the mirror says after the ordeal.

"Who fits your children's shoes?" should be as commonly asked as "Who does your hair?" Try it. You will find that our town has shoefitters who realize the health importance of children's shoes and will do a really professional job if they know that you are not primarily interested in speed, low price or high style.

ELECTRICITY POWERS PROGRESS This is National Electrical Week, marking the 117th anniversary of the birth of Thomas Alva Edison. It was Edison's invention of the first practical incandescent lamp that gave birth to an industry that now employs more than three million men and women, or 1 out of every 20 American workers. Almost every industry owes its progress to the power produced by electricity for, truly, electricity powers progress. IN THE HOME IN INDUSTRY IN BUSINESS ON THE FARM NATIONAL ELECTRICAL WEEK... FEBRUARY 9-15, 1964

Aeration Suggested As Aid To Maintaining Grain Quality

Farmers who experience trouble maintaining quality in farm stored grain are advised by W. S. Allen, agricultural engineer for the Texas Agricultural Extension Service, to consider grain aeration.

Aeration is simply a matter of forcing air through the grain, and only a small air flow is required to do the job, Allen says. The air is supplied with a motor-driven fan. Allen describes the process as a practical way to improve grain storage conditions.

But the engineer points out aeration and grain drying are not the same. The purpose of grain drying is to remove moisture. Large volumes of air must be forced through grain to dry it. Aeration is not used to dry grain, but mainly to cool it. The initial and operating costs of aeration equipment are relatively low.

A motor and fan unit is the heart of a grain aeration system. A duct system distributes the air. An air flow of only a fifth to a twentieth cubic of air per minute per bushel is adequate—only a fraction of air

needed for drying. Allen says the aeration fan should run when the air temperature is 10-15 degrees below the grain temperature. Cool the grain to about 50 degrees, he says. Cooling below this point is usually not advisable, especially if the bin will be unloaded in the summer.

Aeration helps maintain grain quality without moving the grain. Handling damage is reduced, and there is less wear and tear on conveying and elevating equipment. Too, a good

system will help to remove off-odors, retard mold growth, reduce insect activity and prevent moisture accumulation, Allen explains.

Local county agents or Allen can supply additional information on the subject. His address is Agricultural Engineer, Texas Agricultural Extension Service, College Station, Texas.

Texas Grown Carrots Astound Great Britain

Carrots from the Rio Grande Valley of Texas were shipped in volume to markets in Great Britain for the first time in history during 1963. The great impact of these quality Texas carrots is best illustrated by the following article written by columnist W.A. McDonald in the IRISH PRESS, Dublin.

"Texas carrots are, of course, the biggest and longest in the whole wide world, but how it is economically possible—even for super efficient American businessmen—to export them to Britain at a profit is hard for us to believe. "But there it is: in the first two months of 1963, Texas-

grown carrots to the value of 300,000 pounds sterling (\$840,000) were sold on the British market. And if anything can shake us up in this country (Ireland) to the realization of the opportunities we are missing by virtually ignoring the cross-Channel vegetable market, this should do it!

"London's Covent Garden Market alone handles some 100 million pounds sterling worth of vegetables, fruit and flowers each year. Two-thirds of this is imported. And a considerable proportion consists of types of produce which we can certainly grow in Ireland—most definitely we can produce carrots as succulent and sweet as any other country.

"There are a number of lessons we can learn from the story of the Texas carrots, apart from the obvious and shaming one of our missed opportunities. In the first place, the service and packaging of the carrots was of such a quality that Covent Garden dealers were delighted. And they promptly offered a premium price for them.

Although they had to bear a nine-day rail journey and a ten-day sea voyage, the carrots arrived in perfect condition. They had been packed in dry ice. They were perfectly clean and exactly graded; each one was practically a foot long and uniform in shape.

"They came in bulk 50 lb. or 56 lb. bags and also in 1 lb. prepacks. A build-up of shipments ensured that supplies appeared regularly on the market.

"True, there was a temporary shortage of English carrots this year, but American market intelligence men investigated the possibilities and

recommended that an experimental shipment should be made. Probably the U.S. exporters lost money on the first effort because of the high freight charges, but they reckoned—and accurately—that their goods would soon be outselling all competitors.

"Due to the shortage, the usual import duty of \$2.80 per ton was waived. Covent Garden salesmen rapidly learned to appreciate the American product, and within weeks they were glad to offer prices well above the normal rates. At times the Texas carrots were quoted at 38 shillings (\$5.32) per bag which is about 10 shillings (\$1.40) more than was paid for homegrown supplies.

"What particularly endeared the Texas products to the salesmen was the fact that every bag or package was generously overweight.

"A commission agent explained that a 50 lb. bag could contain anything up to 60 lb.—certainly never less than the stated weight of the contents. Each 1 lb. package was more likely to weigh at least two ounces more.

"Our own people," headed, 'are always a bit inclined to give under weight. The buyers know this and they adjust their prices accordingly.' "By their excellent presentation and service the Americans have certainly shaken up the British producers—and have given us an object lesson in marketing.

Will 1964 Be Screwworm-Free?

Vigorous participation in the screwworm eradication program by Texas farmers and ranchers will be necessary if the Southwest is to become screwworm-free in 1964.

Dolph Briscoe, Jr. of Uvalde, said detection of screwworm-infested animals and collection of larvae samples will be even

more important this year than it has been in the past. Briscoe is president of the Southwest Animal Health Research Foundation, which spearheaded the drive to collect \$3,000,000 from livestockmen to get the eradication program underway nearly two years ago.

Briscoe noted that several weeks have elapsed with no screwworm cases being reported in the five-state eradication area. He cautioned, however, that during cold weather, screwworm flies in the pupae stage can remain embedded in the soil for extended periods; when they emerge during brief warm spells, new rounds of infestations could result.

A single undetected, unreported case could set the eradication program back for several months, Briscoe said. "We must always keep up our guard when dealing with this insect," Briscoe warned. "The screwworm fly has shown a remarkable ability of taking advantage of any lapses in vigilance by livestockmen."

He urged livestock producers to watch their animals closely and treat cuts or scratches that could become infested. After several larvae have been collected from infested wounds and mailed to the Mission laboratory for positive identification, wounds should be treated with insecticide.

About five percent of the nation's gross national product and employment originates in timber-based activities. Timber increases in value nearly 25 times between the stump and delivery of finished products to the consumer.

Don't forget about your hens when freezing weather hits. Birds need plenty of water to produce to the best of their ability. Electric warmers can be used to prevent freezing in water lines and troughs.

"I wasn't doing forty miles an hour," protested the motorist. "Nor thirty, nor even twenty." "Here, steady now," interrupted the magistrate, "or you'll be backing into something!"

SOMETHING TO THINK ABOUT Little Mary had been naughty and had been sent into the other room to "think things over." After a while she came out all smiles and said, "I thought and I prayed." "Fine!" said her

mother. "That will help you to be good." "Oh, I didn't ask God to help me to be good," said May. "I just asked Him to help you put up with me."

T-Bone Club Is Organized

The High Plains T-Bone Club was organized at Hereford recently. Paul Engler, manager of the Hereford Feed Yard, was elected president. Joe Easley of the Easley Feed Lot was named vice president and Foster Parker of Happy was named secretary-treasurer.

The feeders of an eight county area were invited to attend the organizational meeting. Purpose of the club was announced as both social and educational. "With the growth of the feeding industry in the Plains area, a need for an organization where feeders may get together to discuss mutual problems and hear programs of interest was recognized," Engler stated.

The High Plains club is one of three contemplated for the area. One is planned for Dumas and the organizational meeting of the Plainview Club has already been pegged for the 23rd of this month. Each club will serve feeders in a group of counties in the Plains area. Proposed is that all three clubs will meet in joint session in Amarillo periodically.

In addition to the election of officers and statement of purpose the club named a committee to draw up by-laws. They agreed to meet monthly at the different towns in the area. No dues were set as membership qualification at this time nor were any clear lines as to eligibility for membership.

LEGAL NOTICE
THE STATE OF TEXAS

TO: PEDRO VIGIL and his unknown wife or wives, and should he be deceased, then his unknown heirs, legal representatives and assigns, all of whom are unknown, and all unknown claimants, DEFENDANTS, GREETINGS:

You and each of you are hereby commanded to appear by filing a written answer to the Plaintiff's Petition at or before 10 o'clock A.M. of the first Monday after the expiration of 42 days from the date of the issuance of this citation, the same being Monday the 2nd day of March, A.D., 1964, at or

before 10 o'clock A.M., before the Honorable District Court of Parmer County, Texas, at the Courthouse of said County in Farwell, Texas.
Said Plaintiff's petition was filed in said court on the 17th day of January, A.D., 1964 in this cause, numbered 2429 upon the docket of said Court, and styled I. W. QUICKEL, Plaintiff, Vs. PEDRO VIGIL, ET AL, Defendants.

The names of the parties to the cause are as follows: I. W. QUICKEL is Plaintiff, and PEDRO VIGIL and his unknown wife or wives, and should they be deceased, then their unknown heirs, legal representatives or assigns, and all unknown claimants are Defendants.

A brief statement of the nature of this suit is as follows, to-wit:

This is a suit in Trespass to Try Title, plaintiff alleging that on or about the 1st day of January, A.D., 1964, he owned in fee simple and was in possession of all of Lots 16, 17, 18, 19 and 20 of Block 12, of the Original Town of Bovina, Parmer County, Texas, as shown by Plat of said Town of

record in the Deed Records of Parmer County, Texas, and that Defendants, and each of them, unlawfully entered thereon and ejected him therefrom and withheld possession thereof from him, and Plaintiff seeks judgment for title to and possession of said property, and for a writ of possession. Plaintiff further claims title by virtue of the five year statute of limitations, and the ten year statute of limitations, all as is more fully shown by Plaintiff's Petition on file in this suit.

If this citation is not served within 90 days after the date of its issuance it shall be returned unserved.

The officer executing this process shall promptly execute the same according to law and make due return as the law directs.

ISSUED AND GIVEN under my hand and the seal of said Court in my office at Farwell, Texas, this the 17th day of January, A.D., 1964.

ATTEST:
Dorothy Quickel
Clerk, District Court,
Parmer County, Texas

FEBRUARY
Feb. 10, 1933—A new feature in telegraphic service was introduced in New York when the Postal Telegraph Company started to deliver "singing telegrams."

Feb. 13, 1741—Andrew Bradford of Philadelphia published the first magazine in the U.S., a periodical he called *The American Magazine*, or a *Monthly View of the Political State of the British Colonies*. (Benjamin Franklin had hoped to get out the first American periodical, but his magazine, *The General Magazine & Historical Chronicle*, went on sale three days after Bradford's.)

Feb. 14, 1886—The West Coast citrus industry was born as the first trainload of oranges left Los Angeles for eastern markets.

Feb. 17, 1897—Two thousand women attended a meeting in Washington, D.C., to organize the National Congress of Mothers, the forerunner of today's Parent-Teacher Association.

Feb. 25, 1840—The first so-called "society reporter" made his debut as William H. Attree, an ex-sports writer of the New York Herald, covered the costume ball given by Mr. and Mrs. Henry Brevoort in New York attired in a suit of armor. The results of his report gave way to a scandal so acute that the City Council promptly passed a statute forbidding masked balls.

Young Demos Hear Boston

"Politics plays a big part in a person's life—usually more than that person realizes." Those were the words of Jay Boston of Hereford, who was guest speaker at a regular monthly meeting Tuesday night of Parmer County Young Democrats.

The meeting was in Bovina Restaurant. Pointing out that he favored America's two-party system, Boston said he believes people should study the history of the two parties in America.

"Without farm programs, I believe half the farmers in our area would go broke in three years," commented Boston, who received nationwide publicity during the Eisenhower-Ben-

son administration when he officially offered to give his Deaf Smith County farm to Benson if he (Benson) could farm it and make a living on it under the farm programs which were in effect at that time.

"The big difference in the

two parties is that the "Republicans believe in tight money and high interest rates," Boston told his listeners.

Leon Smith, Jr., vice president of the organization, presided at the meeting.

Next meeting will be second

Tuesday in March at Hub Community Center. Meeting time will be at 8 p.m.

All Parmer County Democrats between the ages of 16 and 35 are invited and welcome to attend the meeting, Smith says.

PRESIDENTIAL SHIRTS—The stairstep Bushnell boys, sons of Mr. and Mrs. D. R. Bushnell, are proud of their new shirts which are souvenirs from Johnson City, the hometown of President Lyndon B. Johnson. Johnson City is also the home town of the Bushnell boys' parents, though all three of the boys are natives of the Plains. Bushnell's sister, who lives at Johnson City, sent the shirts to her nephews. The boys are, left to right, Ronnie, 13 months; Dennis, 4; and David, 6. The picture was made by their photographer father.

Bookmobile Schedules Tour Of Parmer County Saturday

A bookmobile from the Texas State Library will be shown in Parmer County Saturday, making eight stops at various points in the county.

The bookmobile program has been proposed for a three or four county area, as a means of bringing top-quality library service to areas at a minimum expense to cooperating counties.

The Texas Bluebonnet is either *Lupinus texensis* or *Lupinus subcarneus*, two very similar species.

Mobile library stops are scheduled Saturday at Lazbuddie, Hub, Black, Friona, Rhea, Bovina, Oklahoma Lane and Lariat. The bookmobile will be on display after 11 a.m. Tuesday at the Courthouse in Farwell.

Most stops will be brief. Time schedule has been adopted as follows: Lazbuddie, 8-8:15 a.m.; Hub, 8:50-9:05 a.m.; Black, 9:35-9:50 a.m.; Friona, 10:05-12:30; Rhea, 1:05-1:20 p.m.; Bovina, 1:50-3 p.m.; Oklahoma Lane, 3:20-3:35 p.m.; Lariat, 3:45-4 p.m.

Accompanying the book-

mobile will be Charles Gholz, field consultant for the Texas State Library. He will briefly explain how the bookmobile works, and answer any questions. Receptions at each stop are planned.

At a meeting of the commissioner's court Tuesday, the county will be asked to participate in the program, to assure library service for Parmer, Bailey and Castro counties. These three counties would more or less be "charter" members, and other counties could later be added if the need arises.

Under the plan, a free two-year demonstration is provided by the state association. If the counties involved would act now, it is pointed out that the remainder of 1964 could also be added to the demonstration period, giving more than two years of free service.

At the end of the demonstration period, counties participating would begin paying the cost. Under a three-county set-up, Parmer County's cost would run between \$4,500 and \$5,000 annually.

This cost includes expenses for a driver and librarian. The state will donate 10,000 books under the arrangement. The bookmobile will carry around 1,500 books at a time.

If a book isn't stocked that a user wants, it will be secured and delivered on the next trip, or mailed as the case demands.

Porter Roberts, Friona Chamber of Commerce manager, is one of the backers of the project. "We had a program like this at Post when I was there. It proved very satisfactory," he said.

SCIENCE SKETCHES

A SEVEN-TELESCOPE observatory has been opened at Dickinson College, Carlisle, Pa. Three 8-inch and three 3-inch telescopes plus a refracting instrument for navigational and time-determining studies are installed in the \$50,000 complex.

THE COMMON conception of welding as a slow, tedious process is behind the times. New fully automated gas-shielded, flux-cored processes, says National Cylinder Gas, Chicago, achieve remarkably rapid metal-deposition rates, consuming as much as 34 1/2 feet of wire electrode a minute on long, continuous welds.

METHODIST MINISTER RETURNS "HOME"

Two-year-old Jack Daniels (inset) sits on the steps of his new Home, the Methodist Home in Waco, Texas on January 21, 1937. Jack and his six brothers and sisters entered the Home for children following the death of their parents.

In the larger picture, Methodist Home Superintendent Hubert Johnson welcomes Jack Daniels back to the Home following his recent appointment as chaplain. In his first sermon Rev. Daniels told the children he can understand their feelings well because he has been on both sides of the Methodist Home pulpit. Rev. Daniels felt his call to the ministry while growing up in the Christian atmosphere of the Home. His good record in public school and at the Home helped him earn an Albaugh Scholarship for his bachelor's degree.

Rev. Daniels worked his way through theological school as a student pastor. After graduation he served Methodist churches in the Central Texas Conference for seven years preceding his appointment to the Methodist Home. He will guide a program of bible study for the children, supervise daily devotional services in each Home unit and hold regular services in the chapel. As the children's pastor Rev. Daniels will offer experienced counsel in helping solve problems of faith and life.

The Methodist Home serves both Texas and New Mexico and since its founding 74 years ago has cared for over 8,700 children orphaned by death and human failings.
