## Facts for Sick Women

### Reliable Information

All American women know of the great success of Lydia E. Pinkham's Vegetable Compound in restoring to health women who suffered from ailments peculiar to their sex, yet there are some who are skeptical and do not realize that all that is claimed for it is absolutely true—if they did, our laboratory would not be half large enough to supply the demand, though today it is the largest in the country used for the manufacture of one particular medicine.

The Facts contained in the following two letters should prove of benefit to many women:

Buffalo, N. Y.—"I suffered with organic inflammation and displacement. When lifting I had such pain and bearing down that I was not able to stand up, and it hurt me to walk or go up or down stairs. I was going to a doctor without any results and he said the safest thing would be to have an operation. I met a lady who told me she had three operations and was not well until she took Lydia E. Pinkham's Vegetable Compound. I felt relief after taking two bottles of Vegetable Compound and I kept on with it until I was cured. I always use Lydia E. Pinkham's Liver Pills and they are fine. Everything used to turn sour on my stomach, and the Liver Pills relieved that."—Mrs. A. HOOKER, 533 Fargo Avenue, Buffalo, N. Y.

Sacramento, Calif.—"I had organic trouble and had such terrible pain and swelling in the lower part of my side that I could not stand on my feet or even let the bed clothes touch my side. I gave up my work thinking I would not be able to go back for months. My mother advised me to take Lydia E. Pinkham's Vegetable Compound as it had saved her life at one time, and it put me in a wonderful condition in a couple of weeks, so I can keep on working. I work in a department store and have to stand on my feet all day and I do not have any more pains. I surely recommend your Vegetable Compound to all my friends and you may use these facts as a testimonial."—BERTHA J. PARKER, 3320 M St., Sacramento, Calif.

## Bamboo Forests of the Punjab

Cutting bamboos to the Railroad.

ONE of the greatest drawbacks of a forester's profession is that he rarely lives long enough to see the results of his labors. This is particularly the case in India, where a forest officer hardly ever remains more than five years in one division. And what is five years in the life of a tree? But with bamboos it is different, for the shoots attain their full dimensions in the course of a few months and are ripe for felling after three years, says Country Life. It is this that makes the bamboo one of the most interesting species the Indian forest officer has to deal with, for he can literally watch its growth and observe with certainty the results of his care and attention.

In many places, where distance from the market makes it valueless for export, the bamboo is still looked upon as a weed cumbering up the ground beneath more valuable forest trees. But elsewhere it is one of the most valuable forest products. Indeed, few forests in India can show a net revenue of nearly a pound an acre per annum, which is what is now being derived from the Hoshiarpur bamboo forests in the Punjab. These two forests—Karnpur and Bindrahan—situated at the eastern end of the Siwaliks, overlooking the Beas river as it passes from the hills into the plains, cover altogether an area of 6,000 acres, of which nearly 4,000 acres comprise almost pure bamboo.

years the revenue obtained from these two forests has increased fourfold, while the actual net amount now received for every hundred bamboos is more than double what was previously paid by way of royalty.

In the Punjab the felling season for bamboos is a comparatively short one. Operations do not commence much before October and have to be completed by the end of January, although another month's work can be got in between May 15 and June 15. There are thus only five months in the year in which felling can be made, the reason being that stems felled at any other time of the year are very liable to be attacked by the bamboo borer, a small insect which eats away the inside of the stem and renders it useless for anything. To fell more than a million stems during five months requires, however, a large amount of labor. Fortunately, there is a fairly large local population in the neighborhood of these forests who, being for the most part agriculturists, have little to do in their fields during the winter months. When the work is in full swing as many as 300 or 400 men are employed on felling alone.

How the Bamboo is Handled. For felling a primitive form of bill-hook is used, which is extremely useful for getting among the crowded stems at the base of the clump, though in unskillful hands a great deal of damage may be done to other shoots in the clump. The bamboos, having been felled, are next roughly dressed of their side shoots and tops, and are then tied into bundles of five, ten or twenty, according to size. For the time being these bundles are thrown out on the compartment lines, but at the close of the day's work are collected together and carried on the coolies' heads to the forest depots. Here those which are to be manufactured, that is, fired and straightened, are put on one side, while the others which are to be marketed green are loaded into carts and sent off to the sale depot at the railroad.

Making up the green bamboos into, maybe, ten poles or lance staves is by far the most interesting part of the work in these bamboo forests. The first stage in making up is carefully to clean off all the knots. This is usually done by a gang of small boys armed with sharp knives. They soon become clever at this work and rarely spoil a bamboo by making a bad shot and damaging the skin. The poles are then cut to length, according to the purpose for which they are required, and handed over to the skilled workmen, known as kanagars, for straightening. Each pole is now put through a hot wood fire. This not only makes it supple, but also gives it a rich brown color, and by melting the dirty waxy covering gives it a clean and highly polished appearance. After this all curves are removed by bending the stem with some force in an opposite direction. The instruments used for this are either an upright pole planted in the ground, with slanting holes bored through it to take the bamboos, or a small implement held in the hand, which is used only for small stems and delicate work, such as lance staves.

Loyal to Her Church. Shortly after the birth of Liberty bonds, the principle of them was being explained to a group of people around a first Liberty loan booth. After the explanation of the fact that they earned 3 1/2 per cent interest, were nontaxable, etc., the solicitor continued: "These bonds are issued in all denominations."

A woman in the rear of the crowd, who had been hesitating for some time, then stepped to the front, saying: "I'll sign up for a hundred-dollar Baptist bond!"

Fleeting Glimpse. "You will be able to see Mr. Bilton in a few minutes," said the private secretary.

"Thanks," replied the persistent visitor. "As Mr. Bilton is a man of superior ability, as a"

Bamboo Cutting.

For many years these forests were worked on what is known as the "royalty" system. That is to say, each year the right of felling was put up to tender, the would-be purchasers offering to fell a minimum number of stems during the season and paying for the same at a fixed rate per hundred for each class of bamboo, the classification being made according to size. The large bamboo traders of the Punjab are, however, all more or less closely connected with one another. Many of them are intimately related, and they made it their business to insure that there was little or no competition for the contract. Year after year they offered the same rates, the number of stems they agreed was never more than that for they already had an assured price, and took no steps to create a larger market for their product, the consequence being that the full possible turn-out of bamboo from these forests was not obtained, and while the royalties were continuing to be paid, the outlying tracts were not being worked.

Direct Hint. "Yes," said the young student, thoughtfully, "when I get interested in a subject I never stop until I have embraced it thoroughly."

A WELL-KNOWN INSTITUTION.

Probably no institution in America is more widely known than Doctor Pierce's Invalids' Hotel in Buffalo, N. Y. Although established many years ago it is today a modern sanitarium, having all the latest facilities for the correct diagnosis of diseases and their successful treatment through medicine or surgery.

It was Dr. Pierce, its founder, who over 50 years ago gave to the world that wonderful stomach tonic and blood purifier, "Golden Medical Discovery," and that famous non-alcoholic medicine for women, "Favorite Prescription."

In his early professional career, Dr. Pierce realized that every family, but especially those who live remote from a physician, should have at hand an instructive book that would teach them something about First Aid, Physiology, Anatomy, Hygiene; how to recognize different diseases, how to care for the sick, what to do in case of accident or sudden sickness, etc., so he published that great book, the "Medical Adviser," an up-to-date edition of which can be procured by sending 50 cents to Doctor Pierce's Invalids' Hotel in Buffalo, N. Y.

Later, Dr. Pierce added another link to his chain of good works by establishing a bureau of correspondence to which any one can write for medical advice, without any expense whatever, and if necessary, medicines especially prepared in Doctor Pierce's Laboratory will be sent by parcel post or express for use at home, at a reasonable cost. Thus those who have symptoms of disease need not suffer mental agony fearing that they have some serious ailment, but can have a diagnosis made free by a physician of high professional standing. Write to Dr. Pierce relating your symptoms if you need medical advice for any chronic disease. All letters regarded as confidential.

## TASTEFUL FROCKS FOR YOUNG GIRLS

LENT usually finds the children's spring sewing well under way, if their clothes are made at home, or shopping industriously carried out if their belongings are bought ready made. The shops furnish as tasteful things as any one can ask for and as reasonably priced when the cost of labor is figured in. But there is some economy in making children's clothes at home and eliminating the price of labor. Besides there are little individual touches that may be put on by the home dressmaker.

Whatever the means of getting these outfits together, suggestions as to styles are thankfully received at about this time. The more important matter of selecting spring apparel for grownups calls for attention, with Easter close at hand and proves distracting. Two frocks for little girls are shown here with the recommendation to buy them if they can be found—or something similar to them, or to buy materials and copy them exactly. One cannot hope to improve

on the designs but colors may be selected according to their becomingness to young wearers.

All white or light colors in any of the substantial cotton weaves will make the dress at the left with its box-plaited skirt and belted smock. It fastens at the front where it is laced with narrow black ribbon that slips through buttonholes on each side of the opening. A very simple spray of embroidery adorns the smock at each side near its hem and at the shoulders. There is a narrow belt that buttons at the front.

Chambray with collar, cuffs and vest of pique make the pretty one-piece dress at the right. It has a shirred front panel in the skirt with the lines of shirring defined by stitches in black mercerized floss and the remainder of the skirt side plaited. A black silk tie finishes the neck. A mercerized cord, that slips through slides in the bodice and ties at the back, is the particular pride of this frock.

## IN THE SUNSHINE

Midnight on Bay Biscayne.

A TIDAL wave of tourists from the North has overrun and almost engulfed the coast cities of Florida during the winter months for the past two years. And it is no wonder. The coast resorts are simply heavenly and have reached that stage where they offer in addition to every comfort, unparalleled beauty to their visitors. A new day is dawning for them, too, for great numbers of people are coming to stay, building themselves homes and taking root, intending to spend the balance of their days in this sunny land.

The coast cities have, besides sunshine, the loveliest waters in bays and ocean that ever were.

polished to the last degree. There is a marvelous fashion parade there where one may see the best that art has to offer for the adornment of fair women. And the environment is worthy the best efforts of genius. It is an earthly paradise during its brief season. The larger cities have more lasting attractions; great estates and wonderful homes, with the country about them developed and inviting with miles of fruit trees and gardens. But, after all, only a small part of Florida is under cultivation—a great part of it waits for men to make it a prosperous land.

# CALOMEL

Calomel salivates! It's mercury. Calomel acts like dynamite on a sluggish liver. When calomel comes into contact with sour bile it crashes into it, causing cramping and nausea.

If you feel bilious, headachy, constipated and all knocked out, just go to your druggist and get a bottle of Dodson's Liver Tone for a few cents. This is a harmless vegetable substitute for dangerous calomel. Take a spoonful and if it doesn't start your liver and straighten you up better and quicker than nasty

calomel and without making you sick, you just go back and get your money.

If you take calomel today you'll be sick and nauseated tomorrow; besides, it may salivate you, while if you take Dodson's Liver Tone you will wake up feeling great, full of ambition and ready for work or play. It is harmless, pleasant; also safe to give to children.

**RECIPES FOR GRAY HAIR.**  
To half pint of water add 1 oz. Bay Rum, a small box of Barbo Compound, and ¼ oz. of glycerine. Apply to the hair twice a week until it becomes the desired shade. Any druggist can put this up or you can mix it at home at very little cost. It will gradually darken streaked, faded gray hair, and will make harsh hair soft and glossy. It will not color the scalp, is not sticky or greasy, and does not rub off.—Adv.

**HE MIGHT CHARGE FOR A LOOK**  
Certainly, at Price Druggist Wanted for Oil, a Little Should Go a Long Way.

Recently, one cold morning, several women were waiting in a North side drug store until the street car came. A colored woman entered and asked the druggist for a certain kind of oil. He went to the rear of the store where he kept the stock, and coming back, said: "It is \$2.25 an ounce. How much do you want?" The colored woman was plainly disconcerted at the high price. After a second's hesitation her face brightened, as she said earnestly: "Maybe a drop would be enough."

Just as seriously the druggist replied: "Lady, we don't sell it by the drop."

The ludicrous side of the situation struck the women spectators and they began to laugh. One of them remarked: "Well, at that price I think a small would be sufficient."—Indianapolis News.

South Carolina Lady Suffered Until She Couldn't Stay Up or Go Anywhere.—Tells How Cardui Helped Her Get Well.

Batesburg, S. C.—In telling how she found relief from troubles that had caused her much suffering, Mrs. E. E. Oswald, of this place, says: "Each month I would begin to suffer with my back and head. My limbs would ache and I would chill. I wouldn't be able to stay up, no matter what I wanted to do, or where I wanted to go. My people tried giving me different medicines and teas and tonics, yet I didn't get any better. "Some one told me of Cardui, and I began to take it. I noticed it helped me. I kept it up. After a few months I didn't have any trouble. For about six months I used it, before . . . "I found I was all right, and from that day to this have never had any trouble at this time. I have taken it since, a bottle or two in the winter, especially when I have been exposed, and would take a cold, for I consider it the best thing a woman can take to tone up the system, keep off nervousness, and increase the appetite. I certainly know it has been of great benefit to me."

**DOCTOR ADVISED CHANGE OF CLIMATE**  
Run Down and Lungs Hurt—Stayed Home and Gained 22 Pounds.

"In November, 1911, I had a severe cold and la grippe, which left me with a bad cough. My lungs and shoulder blades hurt so I couldn't sleep and I finally had to give up my job and was ordered to change climate. In April, 1912, I began taking Milk Emulsion. On the second bottle I could see a change. My appetite was better and I commenced to gain strength and weight. Now (August 23, 1912) I have used 22 bottles, have increased 22 pounds in weight and believe I am permanently cured."—W. F. Bourland, Route 5, Wolf City, Texas.

Mr. Bourland was fortunate in commencing to use Milk Emulsion when he did. A run-down system invites disease. Milk Emulsion costs nothing to try. Milk Emulsion is a pleasant, nutritive food and a corrective medicine. It restores healthy, natural bowel action, doing away with all need of pills and physica. It promotes appetite and quickly puts the digestive organs in shape to assimilate food. As a builder of flesh and strength Milk Emulsion is strongly recommended to those whom sickness has weakened, and is a powerful aid in resisting and repairing the effects of wasting diseases. Chronic stomach trouble and constipation are promptly relieved—usually in one day.

This is the only solid emulsion made, and so palatable that it is eaten with a spoon like ice cream. Truly wonderful for weak, sickly children. No matter how severe your case, you are urged to try Milk Emulsion under this guarantee—Take six bottles home with you, use it according to directions, and if not satisfied with the results your money will be promptly refunded. Price 60c and \$1.20 per bottle. The Milk Emulsion Co., Terre Haute, Ind. Sold by druggists everywhere.—Adv.

 in other ways. If elected com-

 same intelligent effort in dis-
