School Days are Here! SEPTEMBER 8th, 1924

Will It Mark an Epoch in Your Life?

The opportunity of a lifetime is within the grasp of every student it Hedley Public School. In laying the foundation for every step of the way up the Ladder of Life, the learning that is yours to have is begun here in the home school, and is the basis for a finished education. It is the trail to the "University white way."

Let us wish for the Hedley Public School, with its splendid advantages of buildings, campus, its School Board, Faculty and Student Body, the largest degree of success. We are ready to cooperate with you in every way. To this end our line of School Supplies is complete. We carry everything-tablets, pencils, clips, coloring pencils, crayolas, rulers, compasses, note book binders and fillers, graft paper, inks, all the colors for school work, and fountain pens for every use, priced from \$1.00 to \$7.00.

Do You Teach the Youngsters to Face the Facts?

School bells ringing for the new term call tomorrow's men and women - the leaders and workers of a few years hence. Billions could not equal the wealth of this nation in its boys and girls. Added billions could not pay what school days will be worth to them.

Train them to meet each test as best they can, and to cheer the comrade along the way. And teach them that thrift and a knowledge of how to save are big stepping stones to success.

Fish Rained From Sky

Sure Relief

It sounds like a fish story, but John W. Garrett of Colorado Springs, Colo., maintains with a straight face that it actually rained fish in Colorado recently. He said he picked up 35 small swimmers in the gutter near his place and reported other tales of fish fallin with the rain.

Thousands Have Kidney Trouble and Never Suspect It

Applicants for Insurance Should Use Swamp-Root

Judging from reports from druggists who are constantly in direct touch with the public, there is one preparation that has been very successful in overcoming these conditions. The mild and healing influence of Dr. Kilmer's Swamp-Root is soon realized. It stands the highest for its remarkable record of success.

An examining physician for one of the prominent Life Insurance Companies, in an interview of the subject, made the astonishing statement that one reason why so many applicants for insurance are rejected is because kidney trouble is so common to the American people, and the large majority of those whose applications are declined do not even suspect that they have the disease. Dr. Kilmer's Swamp-Root is on sale at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to test this great preparation, send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing, be sure and mention this paper .- Advertisement,

Youth in Love

In every heart grows an evergreen tree-its name is love. So long as it flourishes you are young. When it dles you are old. We ought to be a little older at sixteen and a bit younger at sixty. Why not always be yowhful?-Grit.

If you use Red Cross Ball Blue in your laundry, you will not be troubled by those tiny rust spots, often caused by inferior bluing. Try it and see. -Advertisement.

The aches combines well with pineapple, orange, and uice of blackberries, rasplemon: th currants, blackcaps, grapefoods, particularly the rolled and flaked fruit, limes, and plums can be used ected combinations. Lemon in any se is necessary (unless limes are used ing in the home than those which have for the purpose) to make the drink sufficiently acid to quench the thirst

on a hot da The amount of water added depends the kinds of fruit used, somewhat or and also on the preference of the A preponderance of very "taster." mon or lime-will stand acid juice more dilution than the milder flavors. In general one part of water to one of mixed fruit juice can be tried at first, and more water added if it seems desirable. Tea may be substituted for about one-third of the water if the punch is made for adults; if children are to have any, it is better to omit the tea. The individual taste must be the guide in sweetening.

Sugar should be added to fruit drinks in the form of sirup, to get the best effect, as well as to use it in the most economical way. Two parts of sugar to one of water should be simmered for five minutes and then cooled before adding to the other ingredlents. Sugar sirup can be prepared for several days at a time, and kept bottled in the refrigerator; leftover fruit juices may also be boiled with sugar and kept in a cold place for short periods until one has enough on hand to make up a good fruitade.

A thin slice or two of orange and emon, some chopped bits of pineapple and banana, a few colorful berries, inite attention to the bowl or pitcher of punch, and a sprig of mint both flavors and completes it. Professional caterers often include a slice of cuumber. When a fruit punch must be prepared for a large gathering of people-a dance, a sociable, or a picnicit is helpful to have exact ingredients specified. About 40 persons can be served by the following recipe, which

Fruit Punch. berry, raspber-ry or strawberry juice. cupfuls boiling

cunful freshly apollinaris or made, strong tea. ginger ale. pounds sugar boiled with 1 quart water for quart grape, currant, logan-5 minutes.

Cook the pineapple for 20 minutes fers with the cereal. A cupful of rolled in the boiling water and strain. Cool, make the punch a few hours ahead A level teaspoonful of salt to a cup- and let it stand closely covered on fruit and mint leaves.

milk, which might otherwise be thrown | White corn meal cooked in butteraway, may be used for the purpose, wilk makes a dish which resembles Rice, cooked in an uncovered double cottage cheese in flavor. It may be boller, or in a pan in a very "slow" eaten hot, but is especially palatable oven, can be made to absorb about six when served very cold with cream. times its volume of skim milk. To cook For this purpose it is sometimes a cupful of rice in this way instead of molded in cups. . In making it, allow i in water may be considered equivalent, part of corn meal to 6 parts of butterso far as tissue-forming materials are milk and I teaspoonful of salt to each concerned, to serving it with half a cup of meal, according to the United States Department of Agriculture.

ROAST LAMB AND MUTTON ARE EXCELLENT

(Prepared by the United States Department of Agriculture.) Cold roast lamb and mutton, thinly sliced, are excellent, but the family may be tired of having the remains of the roast served that way, or the pleces may be too small to slice. In either event, these suggestions for utilizing this kind of left-over meat, offered by the United States Department of Agriculture, may be appreciated by the one who prepares the family meals, Minced Lamb.

Chep pieces of lean, cold rosst lamb fine. A pint of chopped meat will serve a family of five or six. Rub 1 tablespoonful each of butter and flour together; add 1/2 pint of milk, stir until boffing; add tablespoonful of finely chopped parsley. 1/2 teaspoonful salt, and a dash of cayenne. Add the meat and stand over hot water. Serve in a border of rice.

Cutlets of Cold Mutton. From a leg of mutton, cooked rare, cut pieces about the size of an ordinary loin chop. These may be fried in a little fat, or dipped in egg and bread crumbs and fried in deep fat, or they may be brushed over with fat, and broiled. The result is more like meat cooked for the first time than the ordinary warmed-over meat. Cutlets so prepared may be served with any of the surces served with chops,

CLEAN UTENSILS ARE ESSENTIAL IN DAIRY

Every utensil which comes in contact with milk or cream must be thoroughly washed and sterilized immediately after it is used each time. The utensils which require this care are milk buckets, cream separators, cream cans, strainers, and stirring rods. The following procedure is recommended by dairy specialist.

1. First rinse the milk off these tensils with cold or lukewarm water. If hot water is used for this purpose. will scald the milk on the utensils 'n a thin film which is very hard to emote later. This thin film of milk or cream that is left is an ideal medium or bacterial growth, and will conaminate the next batch of milk or cream handled in the container.

2. Wash thoroughly each utensil in not water containing alkali washing powder. Do this washing with a brush rather than a rag. A rag is a filthy carrier of germs and does not scour the urface of a smooth metal utensil. A brush is much easier to keep clean and will reach all corners and sections of the utensil that cannot be reached by rag. Also soap or soap powders should never be used in washing dairy itensils. The base of all soan is a grease which forms a film on the milk essel, which will in turn collect dust and dirt and thus form a place for pacteria to lodge and a medium for their growth. Soap also leaves an odor in the vessel which is taken up by the milk and cream.

After the utensils have been horoughly washed as outlined above, they should be rinsed in clean hot water to thoroughly remove all the washing powder and wash water.

4. Scald all utensils with boiling water, or better still, sterilize them with live steam by inverting them over steam jet or by placing them in a sterilizer in which live steam can be held under pressure.

Never dry the utensils with a rag. Let them dry by the heat acquired during sterilization or by hanging them in the sun under a screened sunning rack. It is better that this sunning rack and drain board be placed inside the milk room and next to double windows. This protects the vessels from flies and wind-blown dust and dirt.

The wash vat should have two compartments, one for the wash water with washing powder and the other for rinsing purposes.

Saving Can Be Made on

Calf Raising Expense Six calves have been raised successfully at University farm at St. Paul.

granular cereals can be put directly is recommended by the United States | Minn., by using skim milk powder in place of ordinary skim milk. The experiment was in charge of Dr. C. H. Eckles, chief of the division of dairy husbandry, and T. W. Gullickson, a member of his staff. The change from the whole milk to

the skim milk powder was made at the age of three weeks, they report. At the end of 60 days the skim milk powder was gradually withdrawn from the ration. From the age of 70 days the calves were fed alfalfa hay and a standard grain mixture. At six months of age they were somewhat below normal, but attained the normal condition in both weight and height by the age of eight months.

Ten pounds of powdered skim milk added to 90 pounds of water will make 100 pounds of normal skim milk. The powder can be bought for 10 cents the pound. The grain ration consisted of four parts of corn, one of bran and one of linseed. This mixture serves the purpose just as well as more expensive commercial calf meals, says Doctor

To raise the calf with the minimum amount of milk was the motive of the experiment, "The milk of 45 out of every 100 cows kept in the United States is sold as whole milk." Dector Eckles says, "Owners of dairies where milk is marketed in this way are confronted by a serious problem in rafsing the necessary number of calves to maintain their herds. If no calves are raised and the farmer must buy what he needs, there is constant danger of disease and his herd seldom Improves from year to year."

Dairy Notes

Give special care to cooling the cream.

Clip pastures every two weeks to kill obnoxious weeds.

Milk cows have increased in number and value in the past 15 years, but not in proportion to the increase in the human population.

The only advantage of a scrub cow Is that it doesn't take so long to milk . . .

Cows ought to do very well on a liberal allowance of alfalfa hay, supplemented with ground barley and beet pulp.

Of the total number of pure bred dalry cattle of the United States, about 58 per cent are Holstein-Friesian, 25 per cent Jerseys, 9 per cent Guernseys, 3 per cent Ayrshires. and 1 per cent Brown-Swiss.

shave With Cuticura Soap And double your razor efficiency as well as promote skin purity, skin comfort and skin health. No mug, no slimy soap, no germs, no waste, no irritation even when shaved twice daily, One soap for all uses-shaving, bathing and shampooing .- Advertisement.

Fruit-Producing States

California produces approximately 70 per cent of the oranges grown in the United States, Florida being the only other state producing any considerable quantity. Nearly all of the lemons grown in the United States are produced in California. A lemen grove near Santa Paula Is said to be the largest in the world. The quantity of grapefruit produced is increasing, but Florida far outranks Celifornia in both quantity and quality.

Don't chuckle if you put over a substitute when an advertised product is called for. Maybe your customer will never come back.

SELF-MADE HAPPINESS

ATHATEVER It may be with retheir content and easy conscience, the dark castles and stepping forth into idea that you cannot be as happy and the cheerful. life-giving sunshine, carefree as they, is usually misterid- flooding the heavens and importuning

To make one's self happy ought to be one's chief purpose in life, quite shall wake up some delightful morning apart from the thought of wealth or and find ourselves in an arcadia of our station. There is no sense in going own creation, beautiful, lovely and inaround with sour faces, hard-drawn spiring beyond our fondest dreams lips and creased foreheads.

Why carry gloom about with you, when it lies within your natural power happy in the happiness of our own to diffuse sunshine among others, and bask in sunshine yourself?

The habitual grouch, the man and itself! woman who are continually finding fault with the weather, imagining ills and seeking every opportunity they can conjure up to air their grievances, are not adepts at making friends or keeping them.

They have no passionate kindness, no essence of love, no magnetic qualities of heart or soul, so they run mad. and in their frenzies become a menace to their intimates and all the world.

They may tell us that happiness cannot be self-made, yet they belie this affirmation by exhibiting their ability to make themselves miserable.

If this same force were exercised as it should be, it would be found equally capable of producing geniality. gladness, animation, hopefulness and high spirits.

And herein is the evidence that everybody has the substance within him to create his own happiness.

That we mortals should waste our years in ignorance of this patent truth

Through the Glad Eyes of a Woman

By JANE DOE

FLUTTERBIES

I HAVE been reading the report of the commission formed to consider the greater possibilities of aviation for commercial and domestic purposes.

My prophetic instincts have been aroused and I foresee, in the future, announcements such as these in our newspapers:

"LADY—Five in family, requires an avieuse. Must be a careful flyer, an early riser, and fond of needlework. Low altitudes. One who would occasionally assist in nursery preferred. \$25 a week and use of piano. Mrs. B., etc.

In reply to Melisande, we would advise her to be extremely careful Moreover, he may be a lover of cows. about forming promiscuous acquaint-anceship with strange avieurs. But, as she says, it is extremely difficult to cut a man dead after one has wept on his shoulder. While making all due allowances for a little navival. shoulder. FARM

LINSEED OIL MEAL BEST FOR LAMBS

Two hundred and seventy lambs recently finished a 110-day feeding trial at the University of Nebraska where a series of trials are now under way to determine the amounts of linseed oilmeal to add to the standard fattening ration for best results. Similar tests are also being made on alfalfamolasses meal.

Tight-wooled Wyoming lambs of medium weight were selected. At the time the experiment began they were valued at \$13.05 a hundred and averaged about sixty-three pounds per head. The standard ration, consisted of corn and alfalfa hay to which was added varying quantities of oilmeal or alfalfa-molasses meal. Each lot consisted of 30 lambs

The greatest profit was made on the lot fed corn, alfalfa and a medium (.237 pound daily per head) allowance of oilmeal. The lot averaged 84 cents profit per head. Second best profits, 78 cents per head, were made on the lot which received corn, alfalfa and heavy (.342 pounds daily) feed of oilmeal. The light (.142 pounds daily) feed of ollmeal produced the third most profitable group which made 70 cents per head.

Lots fed corn, alfalfa and alfalfamolasses meal came in fourth and fifth, the profit on a medium feed of the meal (.554 pounds per head daily) being 69 cents per head and on a light feed (.186 pounds per head) being 64 cents. The check lot which had corn and alfaifa with no supplements made a profit of 43 cents a head.

In this experiment both alfalfa-molasses meal and linseed oilmeal had higher replacement values when fed in small amounts than when fed in either medium or heavy allowances. Feed prices were as follows: Shelled corn, 60 cents a bushel; oats, 40 cents; oilmeal, \$50 per ton; alfalfa-molasses meal, \$25 per ton; prairie hay, \$12 per ton and alfalfa hay, \$15 per ton. The largest daily gains were made in the lots receiving oilmeal. The lowest cost of 100 pounds gain was in the group which received a light allowance of alfalfa-molasses meal, corn and alfalfa hay. Only three cents behind came the group fed alfalfa hay and corn. Greater profits were made on groups having a higher cost per 100

Vermifuge One of Best

pounds gain, because of better finish and consequently better prices.

Remedies for Pig Worms A vermifuge of from three to five grains of santonin mixed with from five to eight grains of calomel is one of the best remedies for worms in This dose is sufficient for 100 pounds weight. If the pigs are small and it requires two or three to weigh 100 pounds, the large dose should be given. Divide the drove into ten or fifteen hogs each. Then place ground feed in a trough moistened with milk or water and sprinkle the powder evenly over the feed. They should not have any feed for at least twelve hours before the medicine is given. It may also be given in capsules and when this method is used the dose is from two to three grains each of santonin and calomel. The pig's mouth is opened and the capsule dropped well back.

Nature's Tonics Needed

for Young Growing Pigs Nature's tonics for young growing pigs are exercise, sunshine, plenty of green succulent feed, and clean surroundings, say live stock specialists at the South Dakota State college. The man who will be most successful in weaning a high average number of pigs for each sow kept on his farm is the man who will plan to take advantage of these tonics. A large part of the success with the litter, therefore, will depend on getting the sow and pigs on pasture when the pigs are ten days to two weeks old, or as soon after that age as possible. It is

*********** Live Stock Squibs

just as important to the health and

thrift of the litter for the mother to get exercise as for the pigs.

Locate a pure bred ram for this

Rid the sheep of stomach worms and keep a sharp watch out for dogs.

Wonder if the farmer who said there was no money in the hog business had a pasture for his hogs?

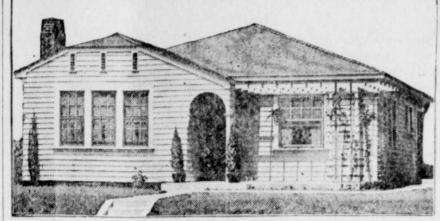

It is a mistake to sell the brood sow just because she is two or three years old. Keep her as long as she remains vigorous.

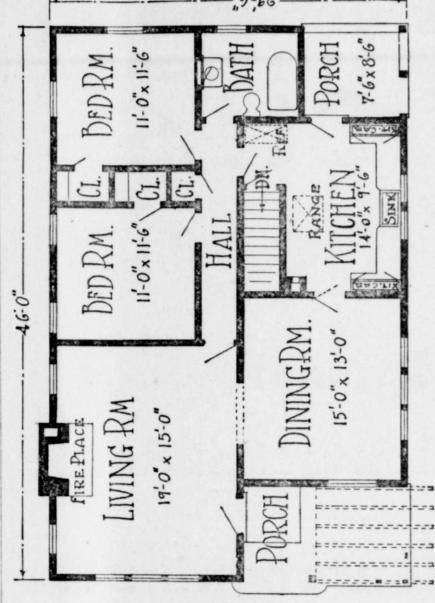

Feed enough grain to hogs on pasture to keep them in good thrifty condition.

Good pastures don't, like Topsy, just grow. They need the encouragement given by limestone and acid phosphate.

Properly managed a sow will breed until she is six or eight years old and bring better pigs than a young sow. And yet breeders will nearly always pay more for an untried gilt than they will for a tried sow.

Bungalow Most Convenient and Practical of All Small Homes

Her Neighbor's Advice Helped Mrs. Frick

"YOU can be just as healthy, strong and happy as I am,' said one woman to her neighbor after listening to the description of her ailments,-'if you will take Lydia E. Pinkham's Vegetable Compound. My condition was very similar to yours, I suffered from those awful bearing down pains, weakness, backache, nervousness and headaches until I could hardly drag around. Today I am strong, well and happy because I followed the advice of a friend who had been greatly benefited by this old-fashioned root and herb medicine."

Nearly fifty years ago Lydia E. Pinkham of Lynn, Mass. prepared from medicinal roots and herbs Lydia E. Pinkham's Vegetable Compound. Its fame has spread from shore to shore. You will now find in every community or neighborhood some woman who has been restored to health by its use, or has some friend who has. Therefore ask your neighbor.

Thousands of unsolicited testimonials such as the following are on file at the Pinkham Laboratory at Lynn, Mass., and prove the merit of this medicine. Therefore no woman should continue to suffer from such ailments.

Mrs. Frick Tells of Her Experience

PERRYSBURG, OHIO—"I took Lydia E. Pinkham's Vegetable Compound because I suffered with pains in my sides all the time. I can't remember just how long I suffered but it was for some time. One day I was talking with a neighbor and I told her how I was feeling and she said she had been just like I was with pains and nervous troubles and she took the Vegetable Compound and it helped her. So then I went and got some and I certainly recommend it for it is good. Whenever I see a woman who is sick I try to get her to take Lydia E. Pinkham's Vegetable Compound."—Mrs. Ada Frick, R. No. 3, Perrysburg, Ohio.

Such letters Should induce others to try

the events of the day, she was very,

clothing had been wet. She shivered slightly.

"You're cold," he said, as he placed his arm about her. "I'm a little chilly," she admitted. "I had to swim my horse across the river today-he got into a deep spotand I got wet." She congratulated herself that she had made a very

clever explanation. with any of the family ducats. Roy He put his coat about her shoulders succeeded to the worries of wealth and drew it tight. Then he sat beside and I came to the ranges, where I her in silence. There were many have been able to make a living, and things he could have said, but this seemed to be neither the time nor the happy. I'll take a wager that today place. Grant was not Transley. He I look ten years younger than Roy, that had for this girl a delicate considera-I can lick him with one hand, that tion which Transley's nature could I have more real friends than he has. never know. Grant Transley a doer. Grant knew that the charm which enveloped him in this girl's presence was the perfectly natural product of a set of conditions. He thusiasm had carried him into rather was worldly-wise enough to suspect that Zen also felt that charm. It was as natural as the bursting of a seed in "I'm sorry I bored you with that moist soil; as natural as the unfolding of a rose in warm air.

Presently he felt her head rest against his shoulder. He looked down upon her in awed delight. Her eyes had closed; her lips were smiling faintly; her figure had relaxed. He could feel her warm breath upon his face. He could have touched her lips with his. Slowly the moon traced its long are

in the heavens.

CHAPTER VII

Just as the first flush of dawn mellowed the east Grant heard the pounding of horses' feet and the sound of voices borne across the valley. They rapidly approached; he could tell by the hard pounding of the hoofs that they were on a trail which he took to be the one he had followed before he met Zen. It passed possibly a hundred vards to the left. He must in some

way make his presence known. The girl had slept soundly, almost without stirring. Now he must wake her. He shook her gently, and called her name; her eyes opened; he could see them, strange and wondering, in the thin gray light. Then, with a sudden start, she was quite awake.

"I have been sleeping!" she exclaimed, reproachfully. "You let me sleep!"

"No use of two watching the moon. he returned, lightly.

"But you shouldn't have let me sleep," she reprimanded. "Besides, you had to stay awake. You have had no sleep at all !" There was a sympathy in her voice

very pleasant to the ear. But Grant could not continue so delightful an indulgence. "I had to wake you," he exclaimed.

"There are several people riding up the valley; undoubtedly a search party. I must attract their attention.'

They listened, and could now hear the hoofbeats close at hand. Grant called; not a loud shout; it seemed little more than his speaking voice, but instantly there was silence, save for the echo of the sound rolling down the valley. Then a voice answered, and Grant gave a word or two of directions. In a minute or two several horsemen loomed up through the

vague light. "Here we are," said Zen, as she dis tinguished her father. "Gone lame on the off foot and held up for repairs. Y.D. swung down from his saddle "Are you all right, Zen?" he cried, as

There was an eagerness and a relief in his voice which would have surprised many who knew Y.D. only as a shrewd cattleman.

Zen accepted and returned his embrace, with a word of assurance that she was really nothing the worse. Then she introduced her companion.

"This is Mr. Dennison Grant, fore man of the Landson ranch, Dad." Grant extended his hand, but Y.D. hesitated. The truce occasioned by the fire did not by any means imply permanent peace. Far from it, with

the valley in ruins-. Y.D. was stiffening, but his daughter averted what would in another mo ment have been an embarrassing situation with a quick remark.

"This is no time, even for explana tions," she said, "except that Mr. Grant saved my life last evening at the risk of his own, and has lost a night's sleep for his pains."

"That was a man's work," said Y.D. It would not have been possible for his lips to have framed a greater compliment. "I'm obliged to you, Grant. You know how it is with us cattlemen; we run mostly to horn and hoofs, but I suppose we have some heart, too, if you can find it."

They shook hands with as much cordiality as the situation permitted. and then Zen introduced Transley and Linder, who were in the party. There were two or three others whom she did not know, but they all shook hands.

"What happened, Zen?" said Transley, with his usual directness. "Give us the whole story."

Then she told them what she knew from the point where she had met Grant on the fire-encircled hill.

"Two lucky people-two lucky people," was all Transley's comment. Words could not have expressed the jealousy he felt. But Linder was not too shy to place his hand with a friendly pressure upon Grant's shoul-

"Good work," he said, and with two words sealed a friendship.

Two of the unnamed members of the party volunteered their horses to Zen and Grant, and all hands started back

Y.D. Exploded in Somewhat Ineffective Profanity.

to camp. Y.D. talked almost garrulously; not even himself had known how heavily the hand of Fate had lain on him through the night.

"The haymakin' is all off, Darter, he said. "We will trek back to the Y.D. as soon as you see fit. The steers will have to take chances next winter."

The girl professed her fitness to make the trip at once, and indeed they did make it that very day. Y.D. pressed Grant to remain for breakfast, and Tompkins, notwithstanding the demoralization of equipment and supplies effected by the fire, again excelled himself. After breakfast the old rancher found occasion for a word

with Grant. "You know how it is, Grant," he said. "There's a couple of things that ain't explained, an' perhaps it's as well all round not to press for opinlons. I don't know how the iron stakes got in my meadow, an' you don't know how the fire got in yours. But I give you Y.D.'s word-which goes at par except in a cattle trade-" and Y.D. laughed cordially at his own limitations-"I give you my word that I don't know any more about the fire

than you do." "And I don't know anything more about the stakes than you do," re turned Grant.

"Well, then, let it stand at that. But mind," he added, with returning heat, "I'm not committin myself to anythin' in advance. This grass 'll grow again next year, an' by heavens if I want it I'll cut it !- Ne son of a sheep herder can bluff Y.D.!"

Grant did not reply. He had heard enough of Y.D.'s bolsterous nature to make some allowances.

"An' mind I mean it." continued Y.D., whose chagrin over being baffled out of a thousand tons of hay overrode, temporarily at least, his appreciation of Grant's services. "Mind. I mean it. No monkey-doodles next Obviously Y.D.

worked up, and it seemed to Grant that the time had come to speak. "There will be none," he said, quiet-

ly. "If you come over the hills to cut the South Y.D. next summer I will personally escort you home again."

Y.D. stood open-mouthed. It was preposterous that this young upstart foreman on a second-rate ranch like Landson's should deliberately defy him.

"You see, Y.D.," continued Grant, with provoking calmness, "I've seen the papers. You've run a big bluff in this country. You've occupied rather more territory than was coming to you. In a word, you've been a good bit of a bully. Now-let me break it to you gently-those good old days are over. In future you're going to stay on your side of the line. If you crowd over you'll be pushed back. You have no more right to the hay in this valley than you have to the hide on Landson's steers, and you're not going to cut it any more, at all."

Y.D. exploded in somewhat ineffective profanity. He had a wide vocabulary of invective, but most of it was of the stand-and-fight variety. There is some language which is not to be used, unless you are willing to have !curious sense of honor entered into young man names, and although there was considerable truth in Grant's remark that Y.D. was a bully, his bullying did not take that form. Possibly, also, he recalled at that moment the obligation under which Zen's accident had placed him. At any rate he wound up rather lamely.

"Grant," he said, "If I want that hay next year I'll cut it, spite o' h-l an' high water."

"All right, Y.D.," said Grant, cheerfully. "We'll see. Now, if you can spare me a horse to ride home, I'll have him sent back immediately."

Y.D. went to find Transley and arrange for a horse, and in a moment Zen appeared from somewhere.

"You've been quarreling with Dad," she said, half reproachfully, and yet in a tone which suggested that she could understand.

"Not exactly that," he parried. "We were just having a frank talk with each other." "I know something of Dad's frank

talks. . . . I'm sorry. . . . I would have liked to ask you to come and see me-to see us-my mother would be glad to see you. I can hardly ask you to come if you are going to be bad friends with Dad."

"No, I suppose not," he admitted. "You were very good to me; verydecent," she continued.

At that moment Transley, Linder and Y.L. appeared, with two horses. "Linder will ride over with you and bring back the spare beast," said Y.D. Grant shook hands, rather formaly, with Y.D. and Transley, and then with Zen. She murmured some words of thanks, and just as he would have withdrawn his hand he felt her fingers tighten very firmly about his. He answered the pressure, and turned quickly away.

Transley immediately struck camp, and Y.D. and his daughter drove homeward, somewhat painfully, over the blackened hills.

Transley lost no time in finding other employment. It was late in the season to look for railway contracts, and continued dry weather had made grading, at best, a somewhat difficult business. Influx of ready money and of those who follow it had created considerable activity in a neighboring center which for twenty years had been the principal cow-town of the foothill country. In defiance of all tradition, and, most of all, in defiance of the predictions of the ranchers who had known it so long for a cow-town and nothing more, the place began to grow. No one troubled to inquire exactly why it should grow, or how. As for Transley, it was enough for him that team labor was in demand. He took a contract, and three days after the fire in the foothills he was excavating for business blocks about to be built in the new metropolis,

It was no part of Transley's plan. however, to quite lose touch with the people on the Y.D. They were, in fact, the center about which he had been doing some very serious thinking. His outspokenness with Zen and her father had had in it a good deal of bravado-the bravado of a man who could afford to lose the stake, and smile over it. In short, he had not cared whether he offended them or not. Transley was a very self-reliant contractor; he gave, even to the millionaire rancher, no more homage than he demanded in return. . Still. Zen was a very desirable girl. As he turned the matter over in his mind Transley became convinced that he wanted Zen. With Transley, to want a thing meant to get it. He always found a way. And he was now quite sure that he wanted Zen. He had not known that positively until the morning when he found her in the gray light of dawn with Dennison Grant. There was a suggestion of companionship there between the two which had cut him to the quick. Like most ambitious men, Transley was intensely ealous.

No more haying and the fight off. What is Transley's next move to win Zen?

(TO BE CONTINUED.)

True fortitude I take to be the qu seession of man's self, and und turbed doing of his duty, whatever ever sets or danger lies to the cor-

Plan New Buildings With Eye to Future

It has often been a criticism of Americans that they are short-sighted that they pay too much attention to the immediate thing, and not enough

tory of this country, especially in the early days, bears out this contention. Even today we see many tendencies to disregard the future and be wasteful with the present. For example, let us take home construction.

to the future. To some extent, the his-

Nearly everybody knows of in stances of wild-cat promotional schemes in connection with new city additions, where houses have been thrown up in wholesale fashion. Often these homes have been of the most flimsy type of construction. They have been built solely with the idea of havout on the ground, there and then. ing a good appearance for the time Y.D. had no such desire. Possibly a long enough to sell them. The builder, whose only idea has been promotion. the case. It was not fair to call a has not cared whether the houses were permanent

Such building as this has often caused false construction standards. America could well take lessons from Europe in home building. Many of the dwellings of Europe today are hundreds of years old. The reason for this is that hundreds of years ago Europe began to feel the need of conserving materials by adopting a type of construction that would endure, that would not necessitate replacement and constant repairs.

The outcome of this need was the almost universal adoption of various forms of masonry construction. The masonry houses of Europe are often the residences of the descendants of the men who built them hundreds of years ago because the builders of the other countries sought permanence in their homes, not just houses that would look good long enough for them to find buyers.

Park Systems That Would Benefit All

The national parks preserve for the American people the most superb and majestic beauties and wonders of nature and, in somewhat lesser degree, the ever-increasing number of state and county parks give to their constituents this same ample recreational op, ortunity. City parks, too, are recognized as a necessary adjunct to civic endeavor and backward, indeed, is the municipality that is not taking steps to meet to the full this demand of its people for recreative pleasures,

Growing from this recognized benefit of public parks has come the idea, not yet thoroughly fastened upon the public mind, but, nevertheless, being seriously considered and thought out by those who are looking ahead to future needs, of a great network of parkways connecting this entire system of national, state, county and municipal parks so that one may hike. ride or drive over pretty much all of our country without encountering the unkempt, soiled and neglected side of

our national life. While this may appear visionary, in reality it promises full attainment, and the seed is already sprouting in the establishment of the national park-topark highway and other great national and state highways, where those in charge are making somewhat scattered, yet ever increasing, attempts to beautify by removing billboards and road signs, preserving native roadside trees, shrubs and flowers, and doing effective planting along their highways. -Parks and Recreation.

Care of Trees

Too few of us in building our new home realize the injustice to which we are subjecting our trees. We appreciate trees, it is true, and would be widely indignant if told that in our haste to have a new home we are deliberately murdering the trees-our best landscape asset.

It is such a common thing to see the cellar dirt thrown out on the yard and new grade established, thereby bury ing the roots of the trees from one to three feet under their former level, that we scarcely give it second thought. In excavating our cellars we give very little thought to cutting off the main arteries of these trees-the roots. Yet if we deliberately do these things we can but expect that within a very short time the trees will show evidence of carelessness.

Scout Room for School

In plans for a new \$300,000 school, Malden, Mass, has not forgotten its present and future scouts. In the basement, in addition to shops, showers, classrooms, lunchrooms, domestic rooms and suites, ample space will be allotted for a special boy scout room for scoutcraft activities and troop

"Clean Up"

It is to the interest of the individual and of the community to "clean up." So why not get busy now? By so doing the city would be made a cleaner, a prettier, a healthier and a "safer" city. For removal of rubbish and accumulated refuse would mean clean yards and attractive premises.

Worthy Memorial Spring Lake, N. J., has a Memorial Community house, erected at a cost of about \$150,000

Easy to Perceive

"There," said Sherlock Holmes, "sits the loneliest man in the world. Unmarried, unloved; no brothers or sisters, no little children to call him uncle; not even a landlady's child to smile at his return."

"Wonderful," gasped Doctor Wat-

son. "How do you know all this?" "Elementary, my dear Watson," replied the great detective; "he opened a package of eigarettes and threw the picture card away!"

Clean Child's Bowels "California Fig Syrup" is Dependable Laxative for Sick Children

Even if cross, feverish, bilious, constipated or full of cold, children love the pleasant taste of "California Fig Syrup" and it never fails to sweeten the stomach and open the bowels. A teaspoonful today may prevent a sick child tomorrow. Doesn't cramp or overact. Contains no parcotics or soothing drugs.

Ask your druggist for genuine "Cal-Ifornia Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you may get an imitation fig syrup.

Gypsy Characteristics

There is a great difference in language and character in different gypsy tribes. In America the younger generations speak English and are rapidly forgetting their native tongues. The gypsies of one nationality are not very friendly with gypsies of another nationality and rarely does a Hungarian gypsy marry a Rumanian gypsy, or a member of either of these groups marry a Brazilian or Spanish

BAILEY-HEFNER

Mr. Olen Bailey and Miss Eleanor Hefner suprised their many friends on Thursday of last week when they drove to Memphis and were united in mar-

riage, Judge Hoffman officiating. The bride is a daughter of Mr. and Mrs. T. F. Hefner, is a popular and talented young lady, and has been a successful teach er the past two or three years. The groom is a son of Mr. and Mrs. E. E Bailey, an industrious young man of clean habits, and an employe of the Dishman Gin.

Mrs. Bailey had a contract to teach in the Roaring Springs school the coming year, and we understand she will fulfil this contract. She left first of the week to attend the Institute at Canyon, and from there will go to her school.

We extend to the young couple our very best wishes.
