Researchers Link Alcoholism During Pregnancy to Birth Defects

During pregnancy, drinking alcohol can harm a developing baby. Surprisingly, evidence linking alcoholism and birth defects was not widely accepted until about four years ago. In 1973, we described a syndrome of birth defects that have abnormally small heads, look more like each other than any other children, and are underweight at birth. These infants are underweight at birth, have abnormally small heads, and are underweight at birth. This pattern of defects is termed "encephalocoele." To date, there is no clear understanding of whether this pattern occurs from malnourishment or from alcohol consumption.

Preserving Our Heritage

Reminders Of Our Past

The next time you visit a family friend or relative, sit down with them and talk. After all, conversation is the key to maintaining relationships. It's a way of sharing our thoughts and feelings, of understanding each other. It's not just talking; it's listening too. And listening can be as important as talking. So, when you next visit a friend or relative, take some time to listen. You'll be glad you did.

Sonora Minister Speaks

Christmas season is also one of giving, of sharing, of love and of peace. But it is also a season of Christ's birth. As we live in a world which has a great deal of hate and bitterness, the Christian minister would like to offer a message of Christ's birth. To many people, the season is difficult to celebrate. For others, it is a time of reflection and prayer. For still others, it is a time of family and friends gathering.

Sonora Minister Speaks

Christmas season is also one of giving, of sharing, of love and of peace. But it is also a season of Christ's birth. As we live in a world which has a great deal of hate and bitterness, the Christian minister would like to offer a message of Christ's birth. To many people, the season is difficult to celebrate. For others, it is a time of reflection and prayer. For still others, it is a time of family and friends gathering.
