Winning Junior Aviator Contest

When his entry stayed aloft one hour and two minutes on its own power, Frank Kiewicz of Detroit, above, won the junior aviator gas model division of an amateur airplane contest held at Toledo, with the ship he is shown racing beside.

Jap Advance Slowed Up By Chinese Men

Defenders Waging Bitter Battle At Great Wall

PEIPING, Aug. 10. (P)—Chinese defenders of the great wall, in a desperate and bloody stand today at Nankow pass, 30 miles northwest of here, attempted to stem the tide of Japanese troops rolling into the unconquered provinces of Chahar and Suiyan. Chinese sources said a Japanese detachment had been wiped out.

Interest in Polo Games Here Rising As Tickets Sold

Interest in the polo games here Saturday and Sunday between the recently organized Midland team and the Wichita Falls four was rising today as sale of tickets was limited to six chukkers.

Guess What She Has Under Her Hat

Here's a game that's brimful of fun. It tests your skill in pulling a name out of a hat. The movie actress back of that floppy chapeau was accommodating enough to provide a clue with that pert nose, mouth, and chin combination. "But when the lid is lifted on this unusual derby, the rest is up to you. And if you have already made your guesses without naming Joan Fontaine, then you lose."

4 Killed As Plane Falls In Florida

Five Injured When Liner Tumbles to The Ground

DAYTONA BEACH, Fla., Aug. 10. (P)—Four were killed and five were injured here today when a 14-passenger Eastern Airlines plane, Chicago-Miami bound, crashed after a takeoff.

Rangers, Highway Officers Seek Four

AUSTIN, Aug. 10. (P)—Two Texas Rangers and two highway patrolmen rushed to San Antonio today to aid in the hunt for four armed men who were reported to have robbed the San Antonio Public Service Company of \$1700.

Willed Fortune

To a sedate, composed little girl, 7-year-old Elettra Marconi, above, daughter of the late Italian inventor, will fall the bulk of an estimated \$25,000,000 fortune left by the famed wireless expert. Elettra's mother is the former Marchioness Bezzola-Scala, Marconi's second wife.

Legislation To Be Asked This Week

Action Is Taken to "Put Bottom Under The Market," Said

WASHINGTON, Aug. 10. (P)—The senate agriculture committee voted today to favor ten cent loans on cotton to farmers, directing chairman Smith, South Carolina, to name a sub-committee to bring out the resolution providing mechanics for government advances.

Mrs. Chapman Will Read Health Paper

"When a Child Chokes" will be the subject of the paper read by Mrs. W. B. Chapman Wednesday morning over KRLL for the weekly health program. The paper was prepared by the American Medical Association and the time of the program is from 11 to 11:15 a. m.

Commission Asked Investigate Labor Troubles at Dallas

DALLAS, Aug. 10. (P)—Carl Brannin, Socialist worker, said today that he had asked the civil liberties committee of the senate to investigate labor disturbances here last night when Herbert Harris, New Haven, Mo., who was showing a labor picture was tarred and feathered, and George Baer, vice-president of the hatmakers affiliate of the CIO was allegedly kidnapped and beaten.

Texas Employment Gains Registered

AUSTIN, Texas. (P)—Employment in Texas in June increased 1.9 percent over the preceding month and 11.8 percent over the same month last year.

CC Directors To Sponsor Trips to Advertise Rodeo

At the most enthusiastic and best attended meeting of the year, directors of the Midland chamber of commerce, in regular monthly session in the chamber of commerce office last night, discussed plans for the Annual Midland Cowboy Contest, September 4, 5, and 6, and assured members of the rodeo committee of Midland Fair, Inc., of the unlimited support of the chamber of commerce in the staging of the big fall attraction.

Directors agreed to sponsor good-will trips to all cities and towns of West Texas and Southeastern New Mexico to advertise the Cowboy Contest, the good will trips to be started sometime next week. Persons making the trips will distribute rodeo literature and placards and will contact newspaper, radio stations and other business houses in each of the towns visited.

Late News

WASHINGTON, Aug. 10. (P)—President Roosevelt said today he had signed "with much reluctance" the \$132,000,000 interior department supply bill, providing for reclamation and education and many other activities.

RAYMONDVILLE, Aug. 10. (P)—A question was raised as to the qualifications of justice of peace S. P. Nilsen, Sebastian, to conduct the secret court inquiry into the Blanton disappearance case today, prompting Judge W. E. McHaren, whom Nilsen succeeded, to suggest adjournment until Wednesday, and contact a justice in whose precinct the Blantons disappeared.

Son of Inventor Victim of Death

WILMINGTON, Del., Aug. 10. (P)—William Leslie Edison, 58, son of the late inventor, Thomas A. Edison, died today in his Westover Hills home after an illness of six weeks. He held patents on many basic radio principles.

Gilbert Ragsdale Succumbs to Long Illness Today

Gilbert H. Ragsdale, 38, a resident of Midland for approximately 25 years, died at his home this morning at four o'clock following an illness of several months.

London Newsmen Banished by Nazis

LONDON, Aug. 9. (P)—A London Times correspondent has been asked to leave Germany in retaliation for the expulsion of three Nazi newspapermen from Britain, which Germany formally protested today.

More Correspondents To Be Expelled by The Nazis, Reported

BERLIN, Aug. 10. (P)—Nazi expulsion of a London Times correspondent, the official inspired editorial Boersen Zeitung declared today, was "only the beginning" of sweeping action against foreign newspapermen for allegedly meddling in "international affairs in Germany."

Legg Transferred To Sweetwater

SWEETWATER, Aug. 10. (P)—A. S. Legg, former district manager of the Texas Electric at Eagle Pass, and a representative of the company for 15 years, has been named new branch manager of the company here, replacing Lon J. Greer, deceased.

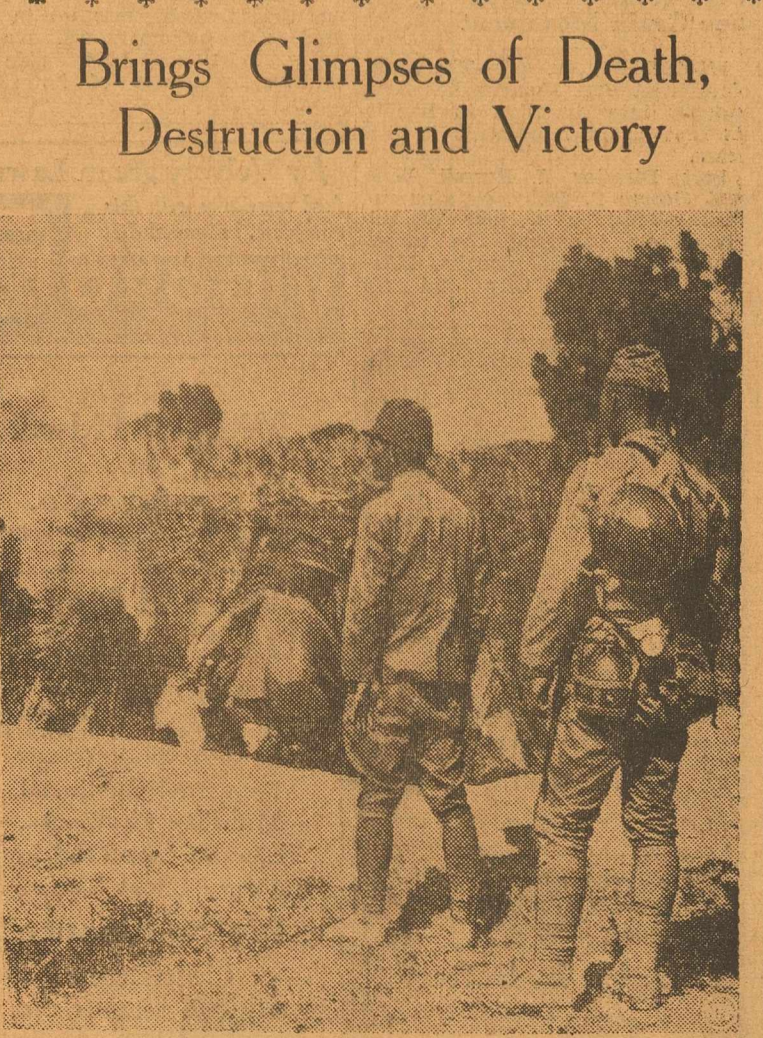

AT THE AIRPORT

A C-33 Transport plane landed today at Sloan Field en route to the Duncan Field in San Antonio from Tucson. B. M. Swisher was the pilot.

CAMERA ON WARPATH WITH JAPANESE IN CHINA

Shelled in retaliation for a skirmish with Japanese troops near Peiping, the Yuanping police station, headquarters of China's 29th Route Army on which the city depended for defense, lies in ruins. The direct hits scored on the building's walls are a tribute to the accuracy of the invaders' artillery.

The paths of glory lead to the funeral pyre for Japanese troops. Comrades stand at attention while an officer lights the pyre of soldiers killed in skirmishes with Chinese outside Tientsin, China.

Victory perches on the banners of the Japanese contingent that marches above into the outskirts of Tientsin after the rout of Chinese troops who sought to prevent the occupation of the city in the Nipponese military campaign to dominate north China.

NOT MAKING TROUBLE MERITS REWARD, TOO

Wondering just how many persons in the vicinity of Detroit had, like himself, lived 70 years or more without being arrested, one John A. Williams, 76, decided that the best way to find out would be through a letter to the editor of a newspaper.

The letter was published and in due time Mr. Williams began to get answers. In fact, so many answers from people who could meet the stringent qualifications, that Mr. Williams was impelled to organize them into a club.

Now in these days, almost any kind of an excuse will start someone organizing something which, nine times out of ten, is nothing more than a dues-collecting scheme. But a club of people who have never been arrested somehow is different. And its virtue is that it lays the foundation for a monument to one of the most deserving varieties of the "forgotten man."

Enormous portions of the nation's talents and resources are being devoted to cutting down the activities of the gangster, the murderer, the bandit and the parole-breaker. They are held constantly in ridicule before the public, as examples of lawlessness.

But comparatively little has been done to popularize the career of the law-abiding citizen or make him the model for positive education in the principles of progressive civilization.

It is when he is contrasted against his opposite that the man who has never been arrested assumes his real proportions. In general he is the man who does not kidnap children. He does not rob banks, run gambling houses, sell liquor to minors or break traffic laws. He does not run up the taxpayer's bill in lengthy trials or prison maintenance. He is the fellow who does not slug pedestrians along dark streets or shoot G-Men or write bad checks.

In summary, he is the fellow who has not caused every civilized nation most of its household grief and has not cost that nation appalling sums in money and misery.

Of course, there are many who have committed illegal acts and got off scot free. And there are others who have been haled before the judgment bench when they were perfectly innocent.

But when account is taken of all exceptions, there still remains a large section of the population whose clean record with the law attests its value as a bulwark to the national morals.

Other heroes have been eulogized and their status set up in the name of other noble causes. But the award of high distinction for the man who has just simply kept out of trouble all his life is strangely missing.

UNDEVELOPED FILM FIELD

When the first course in visual education was offered 15 years ago, thoughtful men saw in it the promise of great accomplishments in the field of mass teaching. Through moving pictures and slides, they reasoned, large sections of the population could be interested in fields of knowledge otherwise limited to a comparatively small group of students.

Today, according to Gayle Starns of the University of Kentucky extension division, visual education is still in the pioneer stage. Courses are offered in 25 teachers' colleges, 21 liberal arts colleges, 21 municipal and private universities and 12 state universities.

This is in contrast to the thousands of theaters serving cities and hamlets from coast to coast with a strict diet of amusement films—and some of them not so amusing.

In view of hopes originally held for the motion picture as a medium to bring light and knowledge to the masses, it seems that there has been a serious oversight somewhere along the line.

At The White House

Behind the Scenes in Washington

WASHINGTON, Aug. 10. — There is no more assurance as to when Congress will adjourn than there was two or three months ago.

As against a strong general desire to get away, especially reinforced by southern members who want no wage-hour legislation, are various new developments which may keep the House and Senate here until the middle of September — or allow them a brief vacation and bring them back by October.

Perhaps the most important such factors are the recent drop in the price of cotton, which put the administration's southern opposition in something of a hole, and a secret coalition of northern senators with farm state senators to get behind both wage-hour and crop control legislation.

Cotton Tune Changed.

THE development in cotton caused a prompt appeal to the White House from most of the southern contingent which had been insisting rather dismally that there was no need for further legislation this session. To the request of southerners for a federal loan of 12 cents a pound Roosevelt replied there would be no renewal of crop loans unless Congress passed crop control legislation such as he had vainly requested. This appeared to give the President, with his veto power, something in the nature of a temporary whiphand.

The Senate's vote of 56 to 28 for the wage-hour bill has pepped up drooping spirits and defeatist attitudes among administration congressional forces.

Both labor and the White House now hope probably in vain for a stronger measure than the Senate bill permitting a federal board to set minimum wages at not more than 40 cents an hour and maximum work weeks of not less than 40 hours. They received an unexpected sock in the jaw when Congresswoman Mary Norton's House Labor committee, supposedly under control, voted overwhelmingly to accept the Senate bill.

Vote "Swap" Possible.

THE South appears to have lost its fight against any wage-hour legislation whatever. The House leadership, heavily representative of that section and aided by Vice President Garner, has been the strength of the "let's go home" movement, which now seems to have some of its starch. Meanwhile a "prairie bloc" has been formed with the idea of trading with northern members on the basis of votes for a stronger wage-hour bill and votes for a far-reaching farm bill. If this trade works out well you probably will be hearing that the combination has some farmer-labor party seeds in it. Meanwhile, there's a good chance that farm legislation will contribute toward protracting the session longer than had been expected.

Insists on Action.

THERE is still some possibility that Congress will go home without acting on all the administration's "Must" legislation. But it's a small one. Roosevelt recently told Senate Alben Barkley, Speaker Bankhead and Majority Leader Sam Rayburn that if Congress walked out on him he would go to the country with denunciation via radio.

Tax, Sugar Hurdles.

THREATS of tax loop-hole legislation which would be retroactive are to be heard and certainly would cause terrific commotion if the administration got behind it. The best bet is that the administration won't dare.

Roosevelt has just tossed in another likely cause of delayed adjournment by notifying House sugar bloc leaders that he would veto any sugar legislation which retained present restriction on Hawaiian and Puerto Rican sugar refining operations.

Differences between various Senate and House versions of legislation indicate the possibility of long drawn out conference squabbles. Roosevelt may decide to veto the District of Columbia appropriation bill because the Tydings-Miller retail price-fixing bill has been attached to it as a rider. So more time would be consumed.

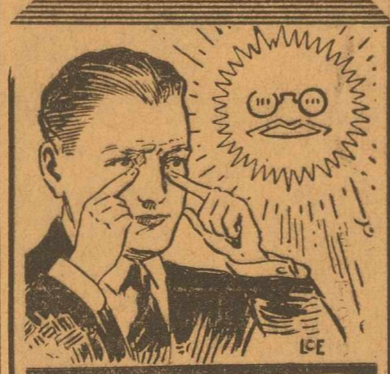

He is expected to hold up appointment of Supreme Court Justice Van Devanter's successor until the very end of the session — as a matter of strategy.

Meanwhile the prevalent notion here is that Congress will get away between the 21st and 28th of August. But even though Congress can act with lightning speed at times, that notion is approaching absurdity.

Port Houston Ready For Grain Movement

HOUSTON, Tex. (UP)—The grain elevator at Port Houston has been brought into condition to handle its first export movements in five years.

Port Director J. Russell Wait sent George S. Colby, elevator superintendent, on a tour of the grain belt, including the export centers of Chicago, Omaha, Minneapolis, Kansas City and St. Louis.

Crumit Collects Anonymous Letters

Oddest hobby to come to light, for so these many months is that pursued by Frank Crumit, master of ceremonies of the Ford Motor Company's "Universal Rhythm" broadcasts, heard over Columbia on Sunday nights at 9 p. m. (EDST). Frank collects anonymous letters.

Being somewhat of an amateur psychologist, Frank Crumit finds in the unsigned letters he receives a wealth of material indicating various abnormalities and subnormalities of the writers.

"The persons who writes an anonymous letter," said Frank, "lets himself go in expressing himself, since he feels he is shielded by his anonymity. The results may not be pleasant to the receiver's feelings, but they certainly make interesting reading."

"Of course, I receive anonymous letters which are mild or even favorable. However, the great majority of the unsigned mail is bitterly vindictive. Very often it doesn't even make sense. It is an emotional display with little or no reason. The writer often picks some unimportant personal matter, takes a rabid dislike to it, and then proceeds to express himself."

Asked what most annoyed him in connection with anonymous letters Frank Crumit replied:

"The fact that it is impossible to answer them. I don't mean I'd like to meet the writers of such letters, but very often it would be easy to give them good reasons for the things they criticize, if I could only reach them. As it is, the only thing I can do is hope that some day the writer will see the light by himself."

"In the meantime, from their letters I have learned a great deal more about them than they think they know about me."

Baylor Bear Club To Sponsor Rodeo

WACO, Texas, Aug. 9.—The old west will live again in Central Texas as when the Bear Club sponsors its big Central Texas Championship rodeo at Katy Park here on Aug. 13-14-15.

Some of the outstanding rodeo stars of the Lone Star state—riders, ropers, trick artists—who make the big time shows have entered the various contests. Extraordinary stars of the rodeo have signed to enter the bulldogging event, which is an evolution of a difficult feat started years ago when Will Pickett of Taylor, Tex., thrilled and started the rodeo world by leaping from his horse to the horns of a running steer and then throwing him without the use of his hands. That was in August, 1904.

Calf belting, bronc riding, steering, calf roping, and cowboys bareback mule riding contests are on schedule for the three-day affair.

Roy Dillon of Elkhart, Anderson county, is director, and Ralph R. Wolfe, business manager of athletics at Baylor university, is general manager of the second annual Central Texas Championship rodeo.

The management of the Waco show has attended the big rodeos of the state this year and have brought back all the ideas that are new to incorporate in the Katy Park entertainment.

Lots No. 3, 4, 5, 6, 11 and 12 in Block No. 19, Original Town of Midland, Midland County, Texas, and levied upon as the property of Emma Reeves and E. W. Reeves and that on the first Tuesday in September, 1937, the same being the 7th day of said month, at the Court House door, of Midland County, in the City of Midland, Texas, between the hours of 10 A. M. and 4 P. M., by virtue of said levy and said Execution I will sell said above described Real Estate at public vendue, for cash, to the highest bidder, as the property of said Emma Reeves and E. W. Reeves.

And in compliance with law, I give this notice by publication, in the English language, once a week for three consecutive weeks immediately preceding said day of sale, in the Midland Reporter-Telegram, a newspaper published in Midland County, Texas.

Witness my hand, this 20th day of July, 1937.

A. C. FRANCIS,
Sheriff Midland County, Texas.
By Fisher Pollard, Deputy.

A Portable Yard Lamp Adds An Outdoor Room To Your Home

● Add new zest and relaxation to your evenings at home, and add new life to outdoor parties and games with this new, portable yard light. This well-made lamp and the 50 feet of weather-proof cord will provide light for many pleasant evenings outdoors, at a cost of only about 1½ cents an hour on your low electric rate.

We will bring one of these lamps to your home, if you like, and show you how it sticks easily in the ground and can be moved from place to place.

Relax in comfort in an easy chair in the back yard and read where it is cool. This new type of portable light sticks in the ground anywhere.

This light gives you brilliant illumination for bridge, picnic suppers at home or for dozens of other outdoor entertainments and games.

Leave your yard work until the cool of the evening and work cooler and easier under this light, which can be moved to any part of the yard.

College Girl Has Style All Her Own Sweaters Stressed In Campus Modes

By MARION YOUNG
NEA Service Staff Correspondent
NEW YORK.—On the campus, college girls from coast to coast like flared or pleated skirts, saddle shoes and short wool socks and sweaters. Sweaters and still more sweaters. For afternoon, dirndls, in velvet and velveteen, and Tyrolean jumper frocks are their pets.

For evening, they snoot the puffed, sleeved, ingenu-ish gowns their elders recommend and insists on low-cut, slithering creations in black velvet or white satin.

These bits of information, set down in the fond hope that they'll be helpful to girls who are shopping for college clothes for the first time, were gleaned from gay young undergraduates who are acting as advisors in college shops now and will be back on various campuses in a few weeks.

Anything frilly, fussy or fancy is frowned upon. It's smart to take quantities of amusing accessories, and those in the know say every coed should take one item which

later becomes her personal trademark. A gold bracelet with unique monogram or a family heirloom locket or an unusual jacket in unexpected colors, for instance. Whatever it is, it's worn and worn until it becomes as much a part of its owner's personality as her hair or eyes or arms. Silly idea, of course, but one which is approved by coeds who are fashion leaders.

Select Outfits That Will Do Double Duty.
If you want to supplement your daytime wardrobe of sweaters and skirts with a dress or two, do pick semi-tailored, very simple frocks of sheer wool or silk that looks like wool. New this year is a pert jersey suit, which includes a dark gray pleated skirt, a wine jerkin—high-throated, short-sleeved and fastened at the back with three tiny buttons—and a gray blouse (to match the skirt), cut on the lines of the jerkin but with long sleeves. Anyones can see the mixing possibilities in this.

New, too—and really a honey—

is a brief, boxy lambskin jacket lined with gay plaid wool to match a pleated skirt. This is collarless, fastened with leather frogs, and comes in nutria, chamois or butterscotch yellow with various linings and skirts. The Vassar coed who recommended it says her classmates will wear it over evening gowns as well as campus togs.

The young experts from Eastern schools all agree that a fullish, full-length swagger coat—tweed on one side and water-repellent gabardine on the other—is a must. It is fall and spring topcoat and raincoat all in one bundle, and, in addition, is pretty smart.

Suit Is Foundation Of Limited Wardrobe
One who is operating on a limited budget but is anxious to have an absolutely right wardrobe might begin with a suit. This is a very important item, because you make your first impressions in it. Let it be a three-piece affair, including skirt, tailored jacket and topcoat, and let it be in a neutral color so

the coat can go over other costumes and so you won't hate the suit next spring.

Add to this two skirts with slide fastener closings—one in a tweed mixture, the other of monotone flannel (gray is smart and harmonizes with everything); all the sweaters you can lay hands on (but three good ones are better than six which won't stand the gaff of frequent washings); a reversible topcoat-raincoat; saddle shoes; socks to match sweaters; a hat for the suit and a casual one for classes.

You must have at least one afternoon dress. And if one is all you can have, pick a black velveteen dirndl or a full-skirted jumper with a sweet white blouse. Wear a tiny black velveteen calot, white gloves and high-heeled pumps with this.

For the budget-minded, a black evening dress with a matching jacket is practical and smart. You can amuse yourself Sunday mornings after chapel trying to figure out ways to make it look different without borrowing your roommate's clips too often. Don't let lack of an evening wrap worry you much. If a choice you must take, take funny little wool mittens, extra gloves, scarfs and a second belt in preference to a formal wrap. And don't let anyone give you frilly underwear or a satin negligee with a train. Tailored lingerie and a fine serviceable flannel bathrobe are what you'll bless them for—for years to come!

At southern and southwestern schools, light washable silk dresses are worn during the first six weeks at least. Smart as they are, you can't start breaking in your flannel skirts and cashmere sweaters while it's all hot as blazes. With the budget firmly in mind, pick washable silks which will be nice next spring and the following spring and fall, too. Stick to the shirtwaist varieties with pleated or flared skirts and colors that make you look your prettiest.

For classroom and general wear, Ruth Hollingshead (left), junior at Connecticut College, advocates a flattering gray jersey suit. The skirt has pleats all around; the maroon jerkin, short sleeves and buttons at the back. The long-sleeved gray blouse is cut like a jerkin. Kay Tweedy, right, Vassar senior, wears sweaters and skirt, undergraduates' "uniform" in the East. Her sweaters include a neat cherry pullover and a turquoise cardigan with ribbon binding. The skirt is checked tweed with kick pleats at front and back.

Betty Heinzelmann, left, Smith junior, wears the smartest outfit from one of the better college shops. It includes a brief, boxy, jacket of sheared baby lamb, which comes in butterscotch yellow, chamois and nutria with brown leather frogs, lined with plaid wool to match a pleated skirt and scarf. This is the type of coat that coeds wear over evening gowns as well as casual daytime outfits. Pretty Ruth Hollingshead, student at Connecticut College, models a reversible topcoat which is checked tweed on one side, natural gabardine on the other. Under this are a gray flannel skirt and a yellow pullover sweater. The crew hat is natural gabardine to match the coat.

Even the Baby knows that efficient cleaning pays . . . Our service is rapid and efficient.

For afternoon dates and tea parties, Billie Pels, left, who'll be a senior at Sweetbriar this year, likes a two-piece frock of plaid sur silk with pleated skirt and snug blouse with black velveteen collar. Kay Cousen, a senior at Smith, picked a Tyrolean jumper outfit, right, as the ideal afternoon costume. Of black velveteen, it has challis flowers appliqued on the waistband, and is worn over a green silk blouse. The Tyrolean hat, of black felt, is trimmed with appliued roses to match the waistband. (From Lord and Taylor, New York)

Buckingham Palace Marks Centennial Site Bought For Mulberry Garden

LONDON (U.P.)—Buckingham Palace, the focal point of the empire, is celebrating its centenary.

It was 100 years ago that Queen Victoria, three weeks after she became queen, drove from Kensington Palace to her new "Palace of Pimlico." A few weeks after it became Buckingham Palace, the official town residence of the monarch.

Buckingham Palace has had a romantic history. It owes its existence to George IV, who, on finding the royal residences of his time too small and inconvenient, decided to create a home fitting the dignity of a British sovereign.

Several sites were suggested, but he insisted that the most suitable was Buckingham House and its grounds, then a mulberry tree garden founded by James I in the hopes of creating a flourishing silk industry in England.

James' scheme was a failure and the house was leased by Goring and called "Goring House."

It was leased by the Earl of Arlington from the crown in 1672. The house was destroyed by fire and "Arlington House" was built. This became the property of the Earl of Grafton and eventually passed to the Earl of Massgrave, later to be the Duke of Buckingham, who added wings which exist to a large extent today.

George III and Queen Charlotte lived at Buckingham House, as it then was, forming the nucleus of the art pieces which Queen Mary has done so much to preserve.

When the property came to George IV alterations and improvements were begun, and the king frequently was at odds with his exchequer over funds. At the time of his death \$3,250,000 had been spent, and during the reign of William IV another \$50,000 was necessary to improve the building.

William died before the work on the house was completed, and so Queen Victoria became the first sovereign to live at the palace on its new phase as state residence.

Tech Graduate Is Dietitian for Navy

LUBBOCK.—Appointment of Georgia Mae Smith, Crosbyton, as dietitian at St. Johns College, Annapolis, Md., has been reported by the home economics division of Texas Technological College, from which she received a degree in foods and nutrition in August, 1936.

Miss Smith, who was an honor student, became an apprentice in the catering department of the International House, Chicago in September, 1936, and in March was appointed assistant to the manager of that department.

Mrs. Link Is Program Leader for Circle

Members of the Rachel circle of the First Presbyterian church met Monday morning with Mrs. Philip D. Larson and Mrs. W. L. Miller as hostesses at the Miller home, 104 West Kentucky. The Auxiliary president, Mrs. M. C. Osborne led the devotional, and Mrs. L. C. Link was leader of the program on "Advancing with Christ." A round table discussion of "Religion in Russia, China, Spain, and Germany" concluded the program.

A refreshment plate was served to Mrs. Link, Mrs. Osborne, Mrs. Perry Collins, Mrs. R. L. Mitchell, Mrs. Don Stooky, Mrs. W. T. Schneider, Mrs. Otis Kelly, and the hostesses, Mrs. Miller and Mrs. Larson.

Missionary Society Plans Social Meeting

Mrs. M. J. Allen led in prayer to open the meeting yesterday of the Missionary Society of the First Methodist church. Mrs. Clift M. Epps was in charge of the Bible study on the subject "Stewardship of Properties, of Acquiring, of Administering and of Giving."

Next Monday afternoon at 3:30 there will be a social meeting at the church, with Mrs. P. A. Nelson in charge of the program.

Mrs. G. W. Williams was a visitor, and the following members were present: Mrs. S. P. Pollard, Mrs. M. J. Allen, Mrs. E. L. Phillips, Mrs. H. C. Barnes, Mrs. Jess Barber, Mrs. John Andrews, Mrs. M. V. Coman, Mrs. J. H. Rhoden, Mrs. W. F. Prothro, Mrs. Epps and Mrs. J. M. Prothro.

Two Coon Hounds Have a Big Day

HOUSTON, Texas. (U.P.)—Two sad-eyed coon hounds had a day in court.

The ownership of the youngest was in dispute. The other dog taking a day off from the bayou sections, was a silent, and apparently bored, witness.

One man claimed the young hound's name was "Stock" and it belonged to him. Another man claimed ownership and declared the dog's name was "Black."

The hearing was before Justice of the Peace Tom Maes.

Before the hearing one man had possession of both dogs. After the hounds name was "Stock" and it room and the facts explained, Justice Maes dismissed a theft charge against one man and advised the other to attempt to establish ownership of the young hound through a civil suit.

Each man took a dog and left. The hounds appeared to be glad the court session was over.

Hundreds of girls are employed in the egg freezing and processing plants of Shanghai, China, to break and smell the 5,000,000 or more eggs handled there daily. Expert sniffers can detect a bad egg in a mixture containing several hundred eggs.

OF LOCAL INTEREST

Miss Grace Evans has returned from a trip to Fort Worth and Dallas.

Mrs. J. P. Boyd and daughter, Lela, of Stanton, and their house guest, Miss Zada Wells of Dallas, were Midland visitors Tuesday.

Mrs. Joe House and daughter, Peggy Jo, and son, Billy, Mrs. H. B. Dunagan, Mrs. C. M. Dunagan and children and Maybeth Judkins have returned from the Paisano encampment near Alpine.

Announcement has been received here of the marriage on July 27 of Miss Dale Jobe and C. W. Tate in Odessa. The bride is the daughter of Mr. and Mrs. J. T. Jobe.

Mr. and Mrs. B. T. Graham returned recently from a family reunion at Knapp, Tex., over the week-end. Forty-five people attended.

Mrs. Anna H. Powers, daughter of Dr. H. J. Fleming, former pastor of the First Christian church here, visited friends yesterday when en route to El Paso.

Mark Dorsey, Remmel Cowan, and Bobby Walker returned last night from a trip taking them to Austin, Waco, and Dallas. At Waco they saw the all-star game and all agreed that it was exceptionally good.

Miss Marion Chambliss left this

morning for her home in Cisco after a brief visit with Miss Eunice Allen here.

Miss Dorothy Young, daughter of Mr. and Mrs. Raymond Young, has returned from El Paso where she has been for several months.

J. E. Simmons returned yesterday from Denver, Colo., where he has been for several weeks.

R. E. Williams has returned from California where he has been on a business trip.

Mr. and Mrs. Chappell Davis have as their guest Mr. Davis' sister, Miss Anne Davis from Ruston, La. She will be here for several days.

Mr. and Mrs. W. R. Bowden have gone to New Mexico, where they will spend their vacation.

Identification Experts Meet in Austin Aug. 26

AUSTIN, Texas. (U.P.)—Identification experts in Texas will learn of the newest developments in the field from national authorities in Austin, Aug. 26-27.

The Texas division of the international association for identification, meeting here then, lists on the speaking program L. A. Hince of the Federal Bureau of Investigation and Dr. Leonard Keeler, director of the scientific crime detection laboratory of northwestern university, Chicago.

Future of Salmon Industry Rests On Bonneville Dam's Fish Ladders

By NEA Service.

BONNEVILLE, Oge. — If the fish ladders and elevators being constructed at a cost of \$3,500,000 in the Bonneville dam here serve their purpose and give migrating salmon a chance to clear the 75-foot obstacles on their way up the Columbia river to spawn, the money will have been well spent.

For on these man-made devices, designed by the U. S. Engineering Department and Bureau of Fisheries, rests the future of the salmon fishing industry, one that is valued at more than \$10,000,000 annually.

The story of spawning salmon has been an enigma for centuries. Just how the mighty Chinook and others of the species, after from two to five years of wandering around the great stretches of the Pacific find their way back to the tiny tributary of the Columbia in which they were spawned, is a mystery.

Run River in Hordes.

But the unerring instinct of the fish causes it to run the river in hordes in February and March each year. Somehow the returning salmon elude commercial and sporting fishermen, survive water pollution of several streams entering the Columbia, surmount waterfalls as high as 20 feet, and finally arrive at fish ladders and elevators here kind. There, after depositing spawn the fish die.

Soon after the eggs of the parent hatch, and as soon as the fry develop into fingerlings, they work their way downstream into the Columbia and finally reach the Pacific.

The Columbia and its tributaries are the chief source of salmon. Skeptical conservationists and commercial fishermen doubt that the fish ladders and elevators can help the salmon conquer the biggest obstacle in their path. Government engineers, however, are confident that they will.

One-Foot Leaps.

On paper the two methods seems practical. Since a salmon's instinct tells him that by finding fast water he won't wind up in a blind alley, the fish ladders and elevators have been constructed so that a great volume of water flows through them to induce salmon to enter.

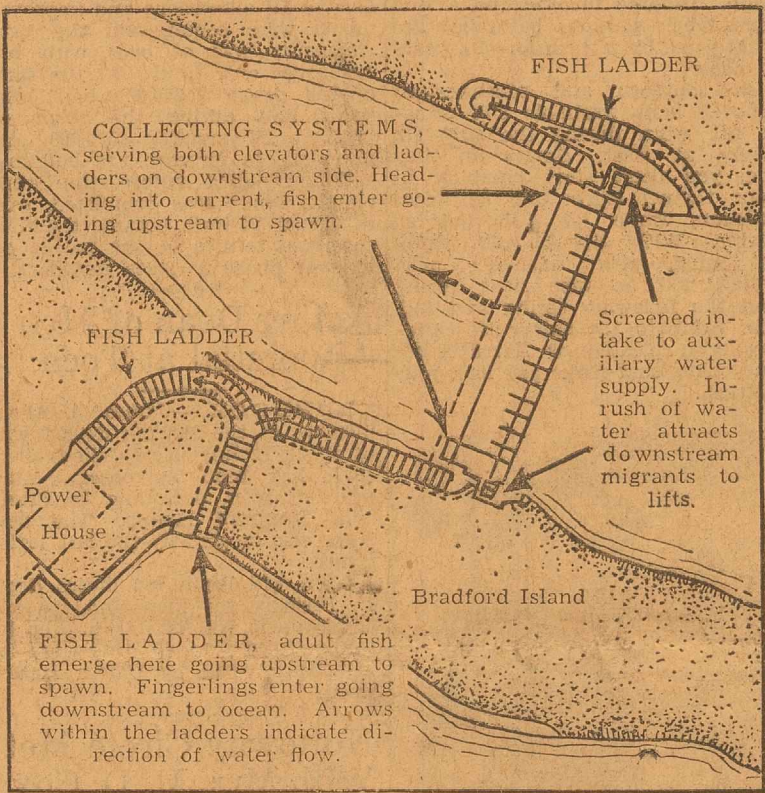

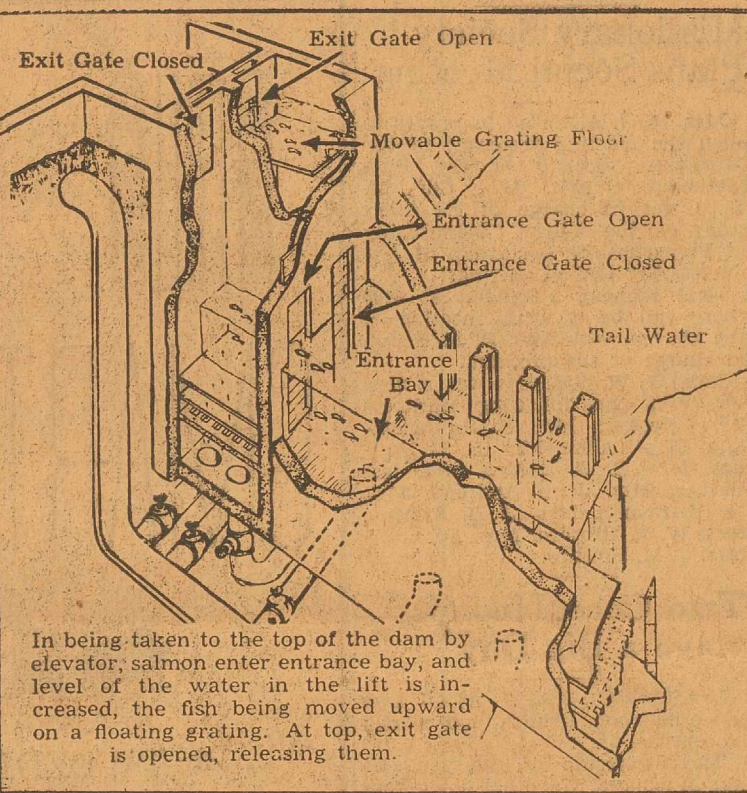

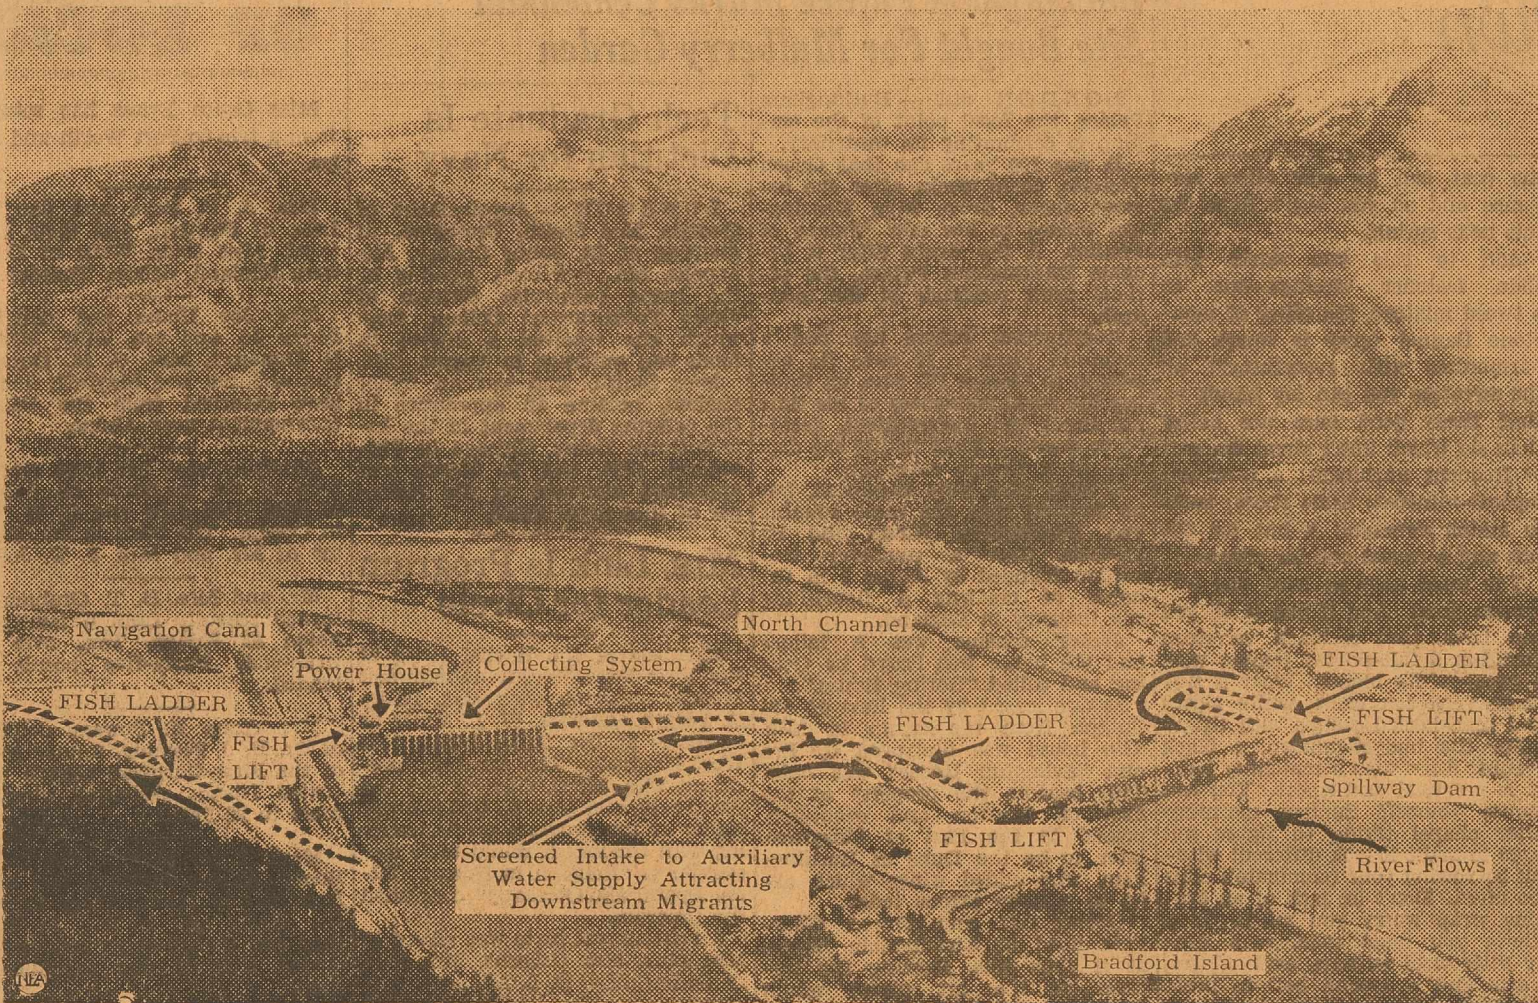

The ladders, one on each side of the dam, consist of 75 pools, each 15 feet long and six feet deep. To climb from pool to pool and eventually surmount the 75-foot barrier, the fish leaps one foot at a time, no feat at all for a finny warrior that clears 20 feet in negotiating waterfalls.

The elevators operate off a collecting chamber. They are 20 feet square and, when fish enter, a gate closes behind them and the water level increases from about 10 feet to the height of the dam. As the water rises, a grating slowly is lifted under the fish, forcing them to evacuate the chamber and move into the water behind the dam when the top is reached.

Have to Get Down, Too.

Getting the adult salmon up and over the dam isn't the only problem engineers have had to cope with; they must make preparations for young fish to get down and find their way to the Pacific after they begin their downstream trek.

For this purpose bypasses are installed across the crest of the dam to conduct the youngsters to gravity ladders at both ends. The young salmon tumble down these ladders which are made up of pools with a

fall of from 3 1/2 to 4 feet each. Possibility of fish ladders has been proved to some extent at the Rock Island dam farther up the river. There one ladder has handled as high as 100,000 migrating adult fish a day. Granting that engineers have

solved the problem of getting fish up and down the Bonneville dam, they still have a greater task confronting them. When the Grand Coulee dam is thrown across the Columbia farther up the river, it is generally acknowledged that even elevators and ladders will be im-

practical in helping fish upstream. The only other alternative is to net the adult fish and take them to nearby hatcheries where they can spawn. The fingerlings will be released into the river when at the proper size and allowed to work

their way down to the ocean. No one is saying much about the procedure at Grand Coulee just yet, for the big test at Bonneville will not come until next year. If the fish ladders and elevators here work out, engineers figure the procedure at Grand Coulee will be solved.

HARDWARE TAMES GULF; SCHARBAUER CREW OUTLASTS KRLH AGGREGATION

League Leaders Capture Game By Rally In Seventh

The Midland Hardware club maintained its place at the top of the Industrial League last night by outlasting the Gulf team in a battle of base hits. The final score was 13-9, five runs in the seventh inning putting the game on ice for the winners.

In the second game of the night the Scharbauer Hotel crew took sole possession of third place by slammimg the offerings of little "Junior" Bizzell all over the south part of town for an easy 12-10 win over KRLH, further buying the talkative boys in the bottom position.

The Hardware and the second place Ford clubs will meet tonight in the first game and the Sinclair and Gulf clubs will meet in the second affair.

Playing off games postponed from early last week, the Hardware and Sinclair will meet in the first game tomorrow night, the Hotel and Ford clubs meeting in the second one.

"AT THAT PRICE, WE CAN AFFORD AIR CONDITIONING, TOO!"

Carrier

PORTABLE SUMMER Air Conditioner

PRACTICAL, low-priced air conditioning is a reality at last! Carrier engineers have made it possible with the Carrier Portable Summer Air Conditioner.

Perfect for your office, living room, any single room, because it plugs into the light socket, requires no alterations. It cools, dehumidifies, ventilates, filters out dust and dirt, cuts outside noises to a minimum.

The Carrier Portable is designed and perfected by the same organization that has made installations in the U. S. Capitol, Radio City, the "Queen Mary."

Call us today—early today!—so that we can deliver and install your Carrier Portable without delay.

Transformation of Lower Valley From Brushland to Citrus Producing Region Shown In Data Gathered for Celebration

MERCEDES, Texas. (AP) — Data gathered by the Mercedes historical committee, headed by Mrs. R. W. Winn, for use in the "Cavaleade of

the Lower Rio Grande Valley" at Mercedes' 30th birthday anniversary celebration, Sept. 15-18, shows the transformation of the Lower Valley from a vast brushland to a rich agricultural and citrus-producing region in the past thirty years. was not the only period of rapid growth in its history.

The Civil War period, 1860-64, was perhaps one of the most exciting eras of valley history, marking the beginning of the cotton industry on a large scale. From historical records received from Harbert Dav-enport of Brownsville, Mrs. Winn has assembled a story of that period, when Bagdad, an international port 10 miles south of the mouth of the Rio Grande, grew almost overnight to a city of 16,000 and furnished the only outlet for cotton grown west of the Mississippi.

The cotton business of the valley had its beginning nearly 75 years ago at Matamoros. During the Civil War federal troops landed at Brazos De Santiago and ships blockaded the port. Hundreds of bales of cotton transported overland from Alabama, Mississippi and Texas piled up at Matamoros.

After the blockade ships, discharged cargo 10 miles south of the mouth of the Rio Grande where a town named Bagdad sprang up. The cotton being held at Matamoros was sent to Bagdad, 22 miles away, by wagon, oxcart, or any way it could be transported. This being a foreign port it could not be blockaded.

French, English, and Mexican ships anchored off shore loaded cotton for Europe and the eastern seaboard. Here at the tip of the United States was one of the largest cotton exchanges in the world, thousands of dollars being handled daily in the boom town and at Matamoros. Many fortunes were made or started here, notably that of the Stillmans of New York.

The road between Matamoros and Bagdad was congested with traffic, stage coaches, wagons, oxcarts, mules and horses. A man who had a skiff or lighter made from \$20 to \$40 a day. Bagdad's population quickly reached 16,000 while Matamoros became a city of 60,000.

Tender, Aching, Swollen Feet

Your feet may be so swollen and inflamed that you think you can't go another step. Your shoes may feel as if they are cutting right into the flesh. You feel sick all over with the pain and torture, you'd give anything to get relief.

Two or three applications of Moone's Emerald Oil and in fifteen minutes the pain and soreness disappears. A few more applications at regular intervals and the swelling reduces.

And as for Soft Corns and Callouses a few applications each night at bed time and they just seem to shrivel right up and scale off. No matter how discouraged you have been, if you have not tried Emerald Oil then you have something to learn—best of all an offensive odor is gone for good—drugsists everywhere.

City Drug Store—Palace Drugs

Big Spring Hospital Bids to Be Called In Near Future

AUSTIN, Aug. 10, (P)—Preliminary work has been started on Texas' broad program of providing better facilities for its insane. Claude Teer, chairman of the board of control, said here the city of Big Spring had telegraphed it would make good on the proposals which led to its choice as the site for a new state hospital for the insane and architects would draw up plans for the institution this week.

Bids for construction probably will be let in from 30 to 45 days and it is possible actual ground work will begin in 60 days. The hospital will cost \$817,000.

Teer said the new institution, which will take care of 540 patients with construction at existing institutions, also authorized by the legislature, at its last general session, would go a long way toward solving the problem of housing the state's feeble-minded.

Contracts for two buildings at the hospital near Austin where adult feeble-minded males are maintained will be let August 27. Plans for nearly all the other structures will be let August 27. Plans for nearly all the other structures will be completed in 30 days, and bids will be called for later.

Ray Milland Heads Cast in Yucca Film

If anybody ever was equipped to play a role in a naval aviation picture it is Ray Milland who portrays an aviation lieutenant in Universal's spectacular "Wings Over Honolulu," to be shown at the Yucca Theatre Wednesday and Thursday. He scored previously in "The Smart Girls."

The qualifications of the handsome young Britisher who plays opposite the beautiful Wendy Barrie in the picture are three-fold.

First, he is an airplane pilot, so that he knew his outside loops in the navy planes which were used in "Wings Over Honolulu."

Second, he had spent several years at sea, thus acquiring a "salty" air which fits the role of a naval aviator like a boss's knot. Third, Milland spent a considerable period in the Cheshire Yeomanry in England.

Jack Rabbit Hunter Uses Ford V-8 To Net Fleet Quarry

Catching jack rabbits for greyhound coursing and trailing with beagles is a novel industry in southwestern Kansas in which a Ford V-8 pick-up commercial delivery car plays an important part.

This unusual business is owned and operated by Earl Johnson of Rago, believed to be the nation's number one jack rabbit hunter. Johnson catches and ships about 3,000 jack rabbits annually. Rago, population 100, is mighty proud of its largest and best known industry.

The procedure for catching jack rabbits has been developed into a fine technique by Johnson. First, a favorable area is selected and then a fish-net, a quarter mile long and 4 feet high, is set up at a strategic spot.

Johnson, in his pick-up loaded with cakes, and several assistants, on horseback, gather at a point a mile or so from the net. At a signal from Johnson, the line starts forward amid shouts and yells and the drive is on.

Jack rabbits pop up from all sides and demonstrate what they can do in an emergency. It is no simple task to keep them headed toward the net, as the animals streak over the countryside in every direction at speeds said to be around 55 miles an hour.

Dexterously manipulating his vehicle over the rough terrain, Johnson chases rabbits and arrives at the net in time to be in on the "kill."

The rabbits are momentarily knocked out as they strike the net. This gives the riders time to dismount and pick them up. Each rabbit is placed in a separate compartment as they will fight to the death if placed together.

The great speed of jack rabbits, mentioned previously, is substantiated by the fact that a shutter speed of 1/500th of a second, used in taking pictures of one of the rabbits striking the net, failed to stop the action.

Farmers are glad to have Johnson stretch his quarter-mile net on their land, as jack rabbits are regarded as pests.

Street Decorating Contract Awarded

Contract for the decorating of the downtown streets and business houses for the annual Midland Cowboy Contest, Sept. 4, 5 and 6, this morning was let to W. E. Ezzell of Big Spring by members of the Retailers' committee of the Midland Chamber of Commerce, W. B. Simpson, chairman. Ezzell will use all new equipment in the decorating and will start decorating the town Sept. 1.

Ezzell will solicit the merchants relative to the decorating of their respective store fronts, prices for the decorating being \$2.50 for 25-foot front; \$3.75 for 50-foot front, and \$5.00 for 75-foot front. All merchants are urged by the Retailers committee to have their business establishments decorated for the fall rodeo.

The streets will be decorated free of charge with three streamers to the block. An attractive job is promised.

Members of the committee also recommend the closing of all local business houses on Sept. 6, Labor Day, which is the final day of the Cowboy Contest. The list of holidays to be observed during the year as agreed upon by all local merchants early this year, includes the Labor Day holiday.

public school land.

One mile north of No. 2 Sharpe, Continental No. 1 W. McCarty Moore, 440 feet out of the southwest corner of section 46, had averaged the last 20 feet to present depth of 4,985 feet in lime. Drilling continued.

Armstrong Sets Pipe.

Amerada No. 1 Armstrong, test over five miles west of the Wasson pool, which showed for production when it reported show of gas in cuttings from 4,943-59, trace of porosity from 4,959-75, and saturation and porosity from 4,975-92, the total depth, is w. o. c. after cementing 7-inch casing on shoulder at 4,752 with 250 sacks. Standard tools will be rigged up. Location of the No. 1 Armstrong is 660 feet from the north and west lines of section 458, block G.

Phillips and I. T. I. O. No. 1 E. C. Brand, wildcat a mile and a half northwest of the Wasson strike, is running 7-inch casing on shoulder at 4,927 feet. It showed saturation and slight porosity in cores from 4,842 to 4,913. Location is 2,310 feet from the north and 330 feet from the west line of section 55, block AX.

Continental No. 1 Jones, in section 22, block A-7, public school land, northwest of Ames, is taking a distillate test. Total depth is 5-156 feet. The formation was soft from 5,123-37. Argo No. 1 Jones, four miles farther north, is drilling unchanged in lime at 4,957.

Means Extension Shows.

M. J. Delaney Company No. 1 H. A. Moore, indicated mile northwest extension of the Means pool in Andrews, was showing a little oil when swabbed down to 3,700 feet after drilling casing plug. Total depth is 4,579 feet in lime.

In northwest Andrews, Amerada No. 1 Littman is still shut down for orders after swabbing 49 barrels of oil, three per cent water, on 23-hour test. Beachard & Porter No. 1 Cox is drilling lime at 4,815 feet.

Hargrave & Peters No. 1 Rloridan, southeast of the town of Andrews, is drilling lime unchanged at 4,935 feet.

Making exceptionally fast time, Moore Brothers Corporation No. 1 George Cleveland, southwest Yocum, wildcat in section 706, block D, Gibson survey, this morning was drilling lime at 4,405 feet.

Texas No. 1 Walker, section 794, block D, is drilling lime at 4,754 feet. Denver P. & R. No. 1 Whittemburg, section 831, block D, is waiting for drilplippe at 4,587, while Bohago and Bohd No. 1 West, section 606, is preparing to run 7-inch, bottoned at 1,833.

Ector Wildcat.

An Ector wildcat between the Harper and Addis pools, Fuhrman Petroleum Corporation and Colton Brothers No. 1 Elliott F. Cowden, is drilling at 2,752 feet in red sand. With elevation of 3,024, it topped anhydrite at 1,575.

Northwest of the Harper pool, L. H. Wentz No. 1 Paul Moss is drilling at 3,440 in anhydrite. Carter No. 1 Parker, a mile to the north and slightly west, is drilling plug.

South of the Foster pool, Midcontinent No. 1 Wanda Hinkle is drilling plug from 10-inch cemented at 200 feet with 140 bags.

and in the British Household Cavalry, thereby gaining the military bearing that makes him convincing as an officer.

As a result of this background, Milland was welcomed by the regular navy men with whom he worked during the filming of the picture. They found that he talked their language.

"It was like going home," the actor said, "to visit the North Island Naval Air Base at San Diego, where we filmed exterior scenes of 'Wings Over Honolulu.' I like planes, I like ships, and I like the life. What more could I ask?"

Canada to "Dry Clean" Old Mint Refinery

OTTAWA, Ont. (U.P.)—The Canadian government is staging a "gold hunt" in an abandoned refinery of the Royal Canadian Mint here.

The refinery was ordered dismantled after a new one had been built. Before the tons of old floor and wall material is thrown away, it will be "dry cleaned" at the Dominion fuel-testing laboratories to recover thousands of dollars worth of gold and silver that is believed to be lodged in them in the form of dust and filings scattered from the minting machines.

Egypt Guarded by Trenches

CAIRO (U.P.)—A network of trenches along the Egypt-Libya frontier, constructed during the Ethiopian war as a precautionary measure, are to be maintained, it is understood here.

More than \$2,000,000,000 has been spent by the world-at-large for radios in the past decade.

Dog Has Seven Pups, Adopts Eight More

BEAUMONT, TEXAS, (P)—W. R. Blackman's part terrier, Trixie, had seven pups. A week later W. B. Barnes' dog, Rags had eight pups.

Rags died. Trixie took Rags' family and solved a problem well-known in large families—that of feeding all. Trixie's lurching facilities were inadequate for 15 pups at a time so she alternates the families. Trixie is a medium-sized dog.

Trial Marriage Known In Solomon Islands

SYDNEY, N. S. W. (U.P.)—Trial marriages and semi-detached married couples are neither new nor exceptional in Malatia, one of the Solomon Islands. Dr. Ian Hogbin told members of the Anthropological Society here.

"If a girl does not like her mother-in-law, for example, during the trial," he said, "she makes a few attempts to run away. The family politely stops her the first two or three times, but if she persists they just let her go. And that ends the romance. When a man and a woman marry, they live in separate establishments, meeting formally only at the evening meal.

The oldest rosebush in England is located near Staplefield Church, Sussex, where it has been for the past 70-odd years.

In seating guests at dinner, it is customary to separate married couples but to allow an engaged man to remain with his fiancee.

Feb. 1, 1859, was the birth date of Victor Herbert, famed American composer.

Charles Lamb was born on Feb. 10, 1775.
