

THE KERRVILLE ADVANCE

FIFTH YEAR, NO. 41

KERRVILLE TEXAS, THURSDAY, JULY 5, 1917

\$1.50 A YEAR

Revival Meeting.

The revival meeting at the Baptist Church is growing in interest and the congregations are still large both at the morning and night services. The meeting last night was made memorable because of the service for the local company of volunteers in the National Guard. Invitations were sent out to the entire company and their officers, but on account of the short notice and Captain Seeber being absent only twenty-four were present. But it was a gracious service, for ten of the number accepted Christ as their savior. After the sermon the young ladies of the Y. W. A. gave a reception to the soldiers in the church basement.

The meeting so far has resulted in about eighteen professions. The services will continue until Sunday night and perhaps longer. Street meetings at five o'clock each afternoon and ladies cottage prayer meetings will continue. Preaching services at 10:00 a. m. and 8:00 p. m. Evangelist B. G. Holloway and the singer, C. S. Cadwallader, are bringing great messages and the Lord is approving their work.

The National Guard

The local company of National Guard is still recruiting and hopes to enroll a large number of new members this week. The war department has made an announcement that the Guard will be ordered out in three groups, on July 15, July 25 and August 5, and that the entire National Guard will be drafted into the Federal service August 5.

BOYS—Get a good picture of yourself to leave with your parents before you go to war. You can never tell what might happen, and they will appreciate it. It is your duty to do so. Photos taken by Eugene T. Butt, Photographer.

Geo. Hay of Medina passed through here last Saturday en route home from Kible county where he went to buy some fine Angora goats of J. E. Taylor. Mr. Hay gave \$450 for two billies and says they are the best he has ever seen.

Controversy Over A. & M. Site

The location of the West Texas A. & M. College seems yet to be in doubt, notwithstanding the committee met last Friday and their report declared that Abilene had been selected over the nineteen other applicants for the college.

The committee went into executive session in the Governor's private office, not allowing newspaper reporters to be present and no one else except their secretary, W. E. Thomason. The newspaper men, as soon as the result was known, asked for a report of the vote and three of the committee, Messrs. Fuller, Davis and Hobby, declared that they did not vote for Abilene on the second ballot on which the vote was declared carried for Abilene. This caused much excitement and these men were called upon often to substantiate the statement made to the press. All three still emphatically deny having voted for Abilene except in the vote to make the selection unanimous after it had been declared three for Abilene, one for Amarillo and one for Snyder.

The Governor contends that the selection was regular in every particular and refuses to call the committee together to reconsider the matter. Lieutenant Governor Hobby at Houston gave out the following statement on Monday morning of this week: "In my judgment Governor Ferguson, or if he will not, a majority of the members, should reconvene the locating committee for the purpose of ascertaining how each member of the board voted on the second ballot. This should be done in justice to the veracity of the members of the committee and also in justice to the future of this great institution."

In the report of the vote as given out it appears that Kerrville failed to get a single vote either in the first or second ballot, the first ballot standing, Abilene 2, San Angelo 1, Snyder 1, Haskell 1. Those who had kept in close touch with the matter here were almost positive Kerrville would get two votes, and were very much disappointed in the result. We made a good fight and did all we could. We shall try to be good losers, and work the harder for something else that will help to develop our town and section.

THE KERRVILLE COMPANY

Following is a complete roster of the company of Infantry now being organized for the Texas National Guard by Capt. Chas. J. Seeber at Kerrville as shown by the enlistments up to Thursday afternoon:

Chas. J. Seeber, Captain
R. E. Hannay, Jr., 1st Lieut.
C. W. Fenstermaker, 2d Lieut.
Louis M. Menges
James C. Roe
Guy H. Cowden
Buioff Aduffo
Chandler Balentine
Edward L. Bierschwale
Frederick Bierchwale
John W. Bode
Jesus C. Cerda
Richard E. Cheek
Earl R. Cowden
Adolph Dubus
Rene Dubus
Sterling O. Durst
George S. Fisher
Francisco Lemos
Edward G. Friday
Chester W. Henke
Pierce O. Hill
Grover K. Holloman

Frank E. Pierce
Emmitt Rodriguez
Mack J. Scarborough
Sidney B. Shuford
Noah B. Taylor
Silas M. Tucker
Roy L. Weaver

Enlistments are still open for volunteers in the home company.

Big Sacrifice For Quick Sale.

80 acres improved farm joining city limits of Kerrville, river front. 41 acres cultivation with water power plant sufficient to pump water to irrigate entire place, and run electric lights for the home. Good residence with hot and cold water system, plenty of outbuildings, in sight of three schools. A beautiful observation in the mountains. The reason for selling the owner is interested in lumber manufacturing in California and must return at once. This is the biggest bargain in Texas. For price and terms see owner.

G. O. Beasley,
Kerrville, Texas.

G. F. Scallorn and daughter, Miss Dora, of Medina were Kerrville visitors Monday.

Bring your green and dry hides to us. We pay highest market prices.

Red Cross Column

This column is given free for use of the Red Cross and is edited by officers of the local Chapter.

A BIT OF RED CROSS HISTORY

We owe our Red Cross, as we have it today, to a little tract, "Souvenir de Solferino" written by a Swiss, Henri Dunant. In this tract, Dunant pictures the horrors of Solferino, where thirty thousand French, Italian and Austrian wounded lay in agony while the campaign went on. Nurses there were none, and preparations for the tragedy were unknown. That was in 1859. This "Souvenir" made such an impression upon the rulers of Europe that a conference was held in Geneva in October 1863, to discuss methods to relieve the sick and wounded in war. The outcome of the conference was a Treaty signed by fourteen nations. It provided that each government extend its sanction, authority and protection to volunteer relief organizations in time of war; that the privileges of neutrality be extended by all belligerents to the ambulances, hospitals, doctors, nurses, and all persons attached to the medical relief corps of the army; and finally, that the Red Cross, now familiar to all, and respected by all but savages, should be the universal insignia of volunteers in care of the wounded. Our beloved Clara Barton, who was active in the relief of the wounded during the Civil War, and who studied military relief with the Red Cross societies of Europe, bent all her efforts towards getting the United States to ratify the Geneva Treaty. In 1882 the Treaty was ratified by this country, and Miss Barton became the first president of the American Red Cross. The work has grown steadily and surely. In 1905—just yesterday among the events of prime importance in our history—all previous charters were repealed, and the Red Cross was reorganized by Act of Congress into the official relief organization of the United States of America. It is the only organization that can operate to give volunteer aid to the sick and wounded of the Army and Navy. The President of the United States is at the head of it. The Army and Navy are represented on its board and depend upon it. Foreign countries recognize and respect it. The brassard and the flag are the most familiar and welcome in the world. It belongs to YOU.

LOCAL NOTES

Mrs. L. A. Schreiner, Chairman of the Red Cross Instruction Committee, spent Friday in San Antonio making final arrangements for the course in Elementary Hygiene and Home Care of the Sick. Through the efficient work of Mrs. Schreiner and her committee, Miss Mary Robinson and Mrs. John Burney, fifty members were obtained for the class. The course of instruction, fifteen lessons in all, will be given by Miss Knot, a Red Cross nurse of San Antonio. Miss Knot will arrive in Kerrville and begin the class work on July 16.

The Red Cross Auxiliary wishes to thank the Kerrville Base Ball Club for the splendid sum of \$75, proceeds of the ball game on last Thursday.

J. F. Edwards who last week bought the Airdome Theatre has also bought out Mr. Pampell's picture show business. He will continue to run a good class of pictures at Pampell's Theater every night, and will open the Airdome again in a few days and operate both.

MOTHERS—Make your boys have a good picture taken of themselves before they leave for the army. If they should not return, you wouldn't take anything for it.

Eugene T. Butt,
Photographer.

ESTABLISHED 1869

Baker-Tankersley

Mr. Keatley G. Baker and Miss Luella Tankersley were united in marriage on June 28, at the home of the bride's parents, Mr. and Mrs. L. J. Tankersley, at Quanah, Texas, Rev. Bruner, pastor of the Baptist church, officiating. The bride is one of the most popular young ladies of her home city and section and comes from one of the best West Texas families. She is a graduate of the State University and has many accomplishments and virtues well worthy of the splendid young man she has taken as her life partner. Keatley Baker, the groom, is well known among our local people as a splendid gentleman and has made a host of warm friends since he accepted the office of County Farm Demonstrator here last November. He is a graduate of the Kansas A. & M. College, and is well equipped for his chosen field of labor.

Mr. and Mrs. Baker arrived in Kerrville Sunday where they will make their home.

Civic League Notes

The Kerrville Civic League will meet in regular session Saturday July 7, at 4 o'clock, in the Chas. Schreiner bank building opposite the Business Men's Club room.
Press Com.

Medina Local Notes.

(Regular Correspondence)

Rain is very badly needed in and around Medina.

Mrs. Whisenhunt has gone to Gonzales to spend several weeks.

Mr. Bud Keese and family left for their new home at Port Arthur Saturday.

Rev. Childers filled his regular appointments here Sunday morning and night.

The Exchange Club met with Mrs. Doss Caton Thursday afternoon in an interesting session.

Mrs. O. P. Baker, who is spending the summer here, was called to San Antonio Sunday to the bedside of her youngest son.

Leonard Caton went to San Antonio Saturday. Miss Allie Ruth Barnes spent last week with the Misses Scallorn.

Miss Bertha Smith of San Antonio is visiting friends and relatives here for a few weeks.

A miscellaneous shower was given Friday afternoon at the home of Miss Maggie Tomlinson in honor of Miss Maud Kelley who is soon to become one of Medina's fairest brides.

W. F. Stimson of Camp Verde was a welcome visitor to this office Tuesday morning.

SHE HAS LAID HER CRUTCHES ASIDE

Georgia Woman Was an Invalid for Twenty-Two Long Years, She Declares.

WALKS ANYWHERE NOW

"I Am On My Feet Again After All These Years," She Says—Wants Everybody to Know About Tanlac.

"Tanalac has done a hundred times more than I expected of it," said Mrs. N. A. Bishop, of Roswell, Ga., "for I've laid my crutches aside and am actually doing all my own household work."

"I was a cripple with rheumatism for a long time and for three years I had to use crutches to get about on. I had severe pains in my hips and the small of my back and for years I hadn't been able to do any of my household work to amount to anything. I lost my appetite and things didn't taste right nor agree with me, and I was constipated and had to be taking something for it constantly. All my neighbors knew about my helpless condition, for the fact is, I was an invalid for going on twenty-two years.

"After I had taken five bottles of Tanlac I could walk anywhere I wanted to go without my crutches, for I didn't need them any more, so I laid them aside. The rheumatic pains left me, my appetite is good and I can eat anything I want without the least bit of trouble. As I said before, I am on my feet and doing my own household work again after all these years. I want everybody to know about Tanlac, for it is certainly wonderful."

There is a Tanlac dealer in your town.—Adv.

Not Kiddin'.

Big Dipper—That's the dog star.
Milky Way—Kiddin'?
Big Dipper—No, Cereus.

WHY HAVE CHILLS AND FEVER?
"Plantation" Chill Tonic is guaranteed and will do the work in a week. Your money cheerfully refunded by dealers if it fails after giving it a proper trial. Price 50c.—Adv.

Still Suffering.

"Don't you think her voice is improved?"
"Perhaps, but not cured."

Whenever You Need a General Tonic Take Grove's

The Old Standard Grove's Tasteless Chill Tonic is equally valuable as a General Tonic because it contains the well known tonic properties of QUININE and IRON. It acts on the Liver, Drives out Malaria, Enriches the Blood and Builds up the Whole System. 50 cents.

Disappointed.

He—I only know that I love you.
She—Oh, dear! I thought you knew how to make money, too.

LET US PROVE

The superiority of Bond's Liver Pills. If you suffer from Headaches, Biliousness, Dizziness, Constipation, Coated tongue or other Malarial troubles, send to us for a free sample of Bond's Pills, the ideal Liver Stimulant that really acts on the liver. One small pill is the dose, you get bright and refreshed. 25c at all Druggists. Bond's Pharmacy Co., Little Rock, Ark. Adv.

More Serious.

REGGY—Is it a sin to steal a kiss?
PEGGY—Certainly. But, you know, there are sins of omission, too.

With the Fingers! Says Corns Lift Out Without Any Pain

Sore corns, hard corns, soft corns or any kind of a corn can shortly be lifted right out with the fingers if you will apply on the corn a few drops of freezone, says a Cincinnati authority.

At little cost one can get a small bottle of freezone at any drug store, which will positively rid one's feet of every corn or callus without pain or soreness or the danger of infection.

This new drug is an ether compound, and dries the moment it is applied and does not inflame or even irritate the surrounding skin. Just think! You can lift off your corns and calluses now, without a bit of pain or soreness. If your druggist hasn't freezone he can easily get a small bottle for you from his wholesale drug house.—adv.

Shortage Creates Longing.

Knicker—Funny thing about food.
Bocker—Yes; a shortage and a longing exist at the same time.

Acid Stomach, Heartburn and Nausea quickly disappear with the use of Wright's Indian Vegetable Pills. Send for trial box to 372 Pearl St., New York. Adv.

Experience is a dear teacher—when it comes in the form of a pretty school-ma'am.

A thing that someone doesn't find like other men.

Fools learn nothing from wise men, but wise men learn much from fools.

Rapid Evaporation of Water Secret of Success of The Iceless Refrigerator

Milk and other perishable foods can be kept cool and so preserved for considerable periods, even where ice is unobtainable. This can be accomplished by the use of iceless refrigerators, which are dependent on the rapid evaporation of water for the creation of low temperatures. These devices have been perfected by woman demonstrators in extension work, South, of the United States department of agriculture.

The iceless refrigerator consists of a wooden frame covered with canton

An Iceless Refrigerator.

flannel, burlap or heavy duck. It is desirable that the frame be screened, although this is not necessary. Wicks, made of the same material as the covering, resting in a pan of water on top of the cooler, conduct the water over the sides and ends of the pan and allow it to seep down the sides of the box. The evaporation from this moistened covering causes a lower

temperature inside. On dry, hot days a temperature of 50 degrees has been known to be obtained in the cooler. This is the way to build it:

Make a screened case 3 1/2 feet high with the other dimensions 12 by 15 inches. If a solid top is used, simply place the water pan on this. Otherwise fit the pan closely into the opening of the top frame and support it by one-inch cleats fastened to the inside of the frame. Place two movable shelves in the frame, 12 to 15 inches apart. Use a biscuit pan 12 by 14 inches on the top to hold the water, and where the refrigerator is to be used indoors have the whole thing standing in a large pan to catch any drip. The pans and case may be painted white, allowed to dry, and then enameled. A covering of white-canton flannel should be made to fit the frame. Have the smooth side out and button the covering on the frame with buggy or automobile curtain hooks and eyes, arranged so that the door may be opened without unfastening these hooks. This can easily be done by putting one row of hooks on the edge of the door near the latch and the other just opposite the opening, with the hem on each side extended far enough to cover the crack at the edge of the door, so as to keep out the warm, outside air and retain the cooled air. This dress or covering will have to be hooked around the top edge also. Two double strips one-half the width of each side should be sewed on the top of each side covering, and allowed to extend over about 2 1/2 or 3 inches in the pan of water. The bottom of the covering should extend into the lower pan.

Place the refrigerator in a shady place, where air will circulate around it freely. If buttons and buttonholes are used on the canton flannel instead of buggy hooks, the cost will be reduced.

I've Wished Time Away.

Since I can remember and all through my life, With its pleasures and sorrows, its troubles and strife, There's something we wanted, I must wait day by day, To come by it quickly, I've wished life away.

How in my school days I envied the men, And wished I were grown up, to be just like them. I was so impatient I could brook no delay, The time passed so slowly, I wished life away.

When I grew to a man, and I became married, With a family around me, and life's burden I carried, So hard did I labor, I scarcely could stay Till my day's work was done, I wished life away.

And now in my old age I look back with tears On the time that is past, fully three score of years, I'm growing quite feeble, my hair's turned to gray, My race's about run, I've wished life away.

—William E. Burke.

Some Observations.

The first shock the average bride gets is that which follows the discovery of a half-used plug of chewing tobacco in her husband's pocket.

A man has enough faults as it is without making himself disagreeable.

The people who enter matrimony with the idea that the divorce court will help them out if they happen to make a bad bargain usually land in the divorce court.

About the only time the average man doesn't pull his money out of his pocket with a flourish so that everybody can see the \$20 bill that is being used as a wrapper is when his wife is in the room.

Spring seems to be having difficulty getting its big guns into action.

Cure for "Strawberry Nose" Found in Simple Operation

That most distressing of facial deformities which doctors call rhinophyma, characterized by a much-swollen and reddened tip of the nose, making this look like a huge strawberry or a piece of cauliflower that has been dipped in beet juice, may be cured by a simple operation. Sir William Milligan of the Royal Infirmary, Manchester, describes this in the London Lancet.

The operation consists in cutting off all the hypertrophied tissue, while the nasal passages are kept extended with absorbent wool in order to preserve their contour. The raw surface is covered with two thin grafts of skin cut from the patient's thigh, over which a sheet of gold leaf is placed and a dry dressing fastened with adhesive plaster. It should be possible to remove the dressing in five days.

Specification.

"Kings in many respects are not like other men."
"No; for instance, they can be bald and yet have heirs apparent."

Says College Women Will Have Big Part in the Work Of Rebuilding the World

Any young woman who neglects the opportunity in this war time to prepare for the rebuilding of the world will be a world shaker, in the opinion of Miss Ada Rice, secretary of the Kansas State Agricultural College Alumni association. Miss Rice points out that at the close of the war there must be a rebuilding of national and international life. This will call for the best qualities of leadership and the best training, and in this work the college woman can play a part of great importance. College women must not wait until the end of the war for service, however, states Miss Rice. "The time is now at hand," she declares, "when the world must depend upon woman for carrying forward progressive movements." She urges college women to take an active interest and perform active service in the big movements now in progress.

Wise and Otherwise.

Look out for things that won't bear looking into.

Going to law is often a preliminary to going broke.

A boy in the schoolroom is worth a dozen in the poolroom.

Naturally a man would rather part his hair than part with it.

Meet people with a smile unless they want to borrow something.

Stocks usually recover from a fall quicker than the speculator does.

Even when they weigh their words rash people give short weight.

An airplane engine with 12 cylinders has been invented that makes more than 2,000 revolutions a minute.

Three asbestos mines have been opened in China, where extensive deposits of the mineral have been found.

Mother's Cook Book

We, ignorant of ourselves, Beg often our own harm, which the wise Powers Deny us for our good; so find we profit By losing of our prayers. —Shakespeare.

Seasonable Dishes.

A tasty sandwich is made by mixing a few finely chopped olives with a little cottage cheese. The bread need not be buttered for these sandwiches.

Onion Sandwich.—Soak for an hour finely cut Bermudas in ice water which has been well sweetened and salted. Drain and mix with slightly seasoned mayonnaise. Serve on rounds of buttered bread.

Ham finely chopped and mixed with chopped pickles or olives makes a change from the ordinary ham sandwich.

Rhubarb Marmalade.

Allow three-quarters of a pound of sugar to each pound of rhubarb. Cut in short lengths without peeling, cook slowly, stirring often to keep it from sticking or burning. After an hour place in the jars in the usual way.

FOLLOW UP.

By GEORGE M. ADAMS.

How common it is in games of football and other sports, some quick-thinking player

flushes off a thrilling play, only to fall back for the remainder of the game into obscurity—and for no other reason than that he failed to—Follow Up.

Periodic Brilliancy is not Success. The Great man is simply the Small man become great. Every Great man at some time or other is the unknown, obscure man. Make your life count by compelling every single effort to Figure in the final summing up. For after all, Success itself is nothing more nor less than work well performed and Followed Up day after day, year after year.

Periodic Brilliancy is not Success.

Facts in Figures.

Hawaii has two mountains 14,000 feet high.
United States received 238,000 immigrants last year.
Turlock, Cal., will cut 25,000 tons of peaches this year.
Wilmington, Cal., is to have a \$5,000,000 shipbuilding plant.
United States in 1916 exported \$150,000,000 worth of leather.
Southern California is gathering \$1,000,000 a day from tourists.
United States last year exported glass bottles valued at \$2,500,000.
Glen county, California, will devote 14,123 acres of land to rice-growing.

War Service of Y. M. C. A. Requires Vast Expenditure

The service which the Y. M. C. A. is planning to give the selective national army in its cantonments is going to require 1,100 secretaries and \$3,000,000 of which nearly \$2,000,000 has already been paid in or pledged. It is to be noted that an army of 1,000,000 men, which the 200 buildings the Y. M. C. A. proposes to erect will accommodate, will require an equipment of 200 pianos and piano players, 200,000 feet of films a day, 3,000,000 sheets of writing paper daily, 10,000 pens a day and a barrel of ink, 95 automobiles and trucks, 200 moving-picture machines, 200 graphophones and 10,000 records, 40,000 pounds of ice per day, a Bible to every man, magazines by the hundred tons.

Lightships and Weather Bureau.

The United States Weather bureau in co-operation with the bureau of lightships, department of commerce, recently equipped a number of lightships with apparatus for recording weather conditions. These observations are then reported by wireless and are of service to the bureau in its preparation of storm and other warnings to ships at sea.

One iron mine only has been discovered in Egypt which was worked by the ancients.

What Well Dressed Women Will Wear

Separate Skirts of All Sorts.

Now is the summer of the separate skirt at hand, with sports skirts and street skirts and tub skirts ready for the hot weather that is overhanging, and occasionally they are made in a silk skirt for more dignified dress. Hardly a wardrobe but has an example of each of these. Tub skirts, in heavy cottons, are smartly tailored, with big patch pockets, buttons and machine stitching to give them the proper finish for street wear. They are shown in pique, poplin, galatea cloth, basket and other heavy weaves. In the same kind of cloth, stripes and figured patterns give room for play of the designer's fancy in sports skirts.

That fancy appears to have strayed pocketward and to have lingered there. Especially in sports skirts in a plain color the pocket's the thing that announces the skirt as destined for the shore or camp or the link. Some of these pockets are so large that they look like panniers and suggest that a

hat might be carried in one and a sweater in the other. Mostly they are moderately large, square-patch pockets, and occasionally they are made in a fanciful shape.

White cotton gabardine is liked for many of the new sports skirts to be worn with bright-colored sweaters. Khaki, with brass buttons and fastened uniform pockets makes the correct "hiking" skirt. For country club wear there are white wash-satin, tub silk and heavy linen skirts.

Machine stitching in vivid silks lends the required dash of color to white silk, and bindings in contrasting color with large pearl buttons distinguish the linen models.

Taffeta silk in black or dark colors, with colored stripes, was introduced early and remains popular for afternoon skirts. The skirt pictured is shirred at the waist and has a sash and bag of the silk.

Some Pretty Suits for Midsummer.

Nothing can supplant the suit, so it is the earliest arrival in the fashions of each new season and its story is a serial with a chapter added every little while. But we have arrived at the last installment for the summer of 1917 and rejoice in a happy ending.

Wool jersey cloth queens it over its comrades, but nevertheless serge, taffeta, gabardine, tussah and some new weaves in silk make a strong finish.

There is no new departure in style to record in the new summer suits, but coats indulge in a few little vagaries in cut of the collar, adjustment of pockets and shaping of the skirt, merely by way of variety. The cape collar, similar to that shown in the picture has increased in size so that it falls over the top of the arm, but is trimmed into sloping revers at the front. There are attractive models of checked wool bound with braid, and belts and patch pockets remain much in evidence. But there are a few

pocketless coats and others with the widened hip effect. Serge suits are almost always very plain.

The summery suit pictured is of chiffon taffeta in an indistinct check. The coat is the usual length, but makes a new departure by its turned-back fronts, trimmed into lengthened points at the bottom. The skirt is set onto a short yoke and has a slight drapery or fullness at the hips.

Light gray and oyster shell weaves are shown among the smartest jersey and silk suits. A cool-looking model is of oyster white tussah bordered with a narrow band in black and white check. The checks are large, and a single line of them finishes the edges of the coat and the sleeves. They are not extended about the bottom of the coat, but cover the revers.

LAW REGULATING MOTOR VEHICLES

NEW LAW ENACTED BY THE THIRTY-FIFTH LEGISLATURE OPERATIVE ON JULY 1.

REGISTRATION FEES, ETC.

Law is Clearly Set Forth So That Those Who Operate Motor-Driven Vehicles Must Guard Against Violations, Etc.

Austin, Tex.—An act regulating the use and operation of vehicles upon the public highways of the State, passed by the thirty-fifth legislature and becoming effective July 1, 1917, follows:

Upon the receipt by the Highway Department of an application for registration of a motor vehicle accompanied by the fee required by law to entitle such motor vehicle to registration, the department shall file such application and shall alphabetically and also numerically register and correctly index such motor vehicles with the names, residences and business addresses of the owner, together with the facts stated in such application as a book to be kept for the purpose, under the distinctive number assigned to such motor vehicle by the said department, which book shall be kept open to the inspection of the public.

The department will furnish without charge, with transportation, to every person whose motor vehicle is registered as required by law, one seal of each size. The plates are made of steel with baked enamel, 5 1/2 inches wide, length between 12 and 17 inches, 1/2 inch space between letters, letters being 4 inches in height with 1/4-inch stroke. The number plates are to be the permanent numbers for the cars.

The distinguishing seals to the number of 160,000 to be supplied by July 15. The seal will be of steel 4 1/2 inches in diameter. The Texas star and lettering will be in white with a vermilion red background for the first year. The background will be white next year and blue the year following, or the national colors for the next three years. The seals will have to be gotten annually to show that the current year's license has been paid. A glance at the color will show whether or not the car has paid its current tax each year. The design is the state seal, except that the star is encircled by lettering showing that it is a registered motor vehicle of Texas with year date.

The plates, seals, etc., are given gratis when the tax is paid on the car. The tax is 30c for the remainder of this calendar year. The minimum charge is \$7.50 for any one year, or \$2.75 for the remainder of this year.

Chauffeurs must pay \$5 annually and will receive license, metal badge and seal. For this year they will pay \$2. Motorcycles must pay registration fee of \$5, or \$2 for the remainder of 1917.

Automobile dealers are furnished a general distinguishing number upon payment of \$15 and they may procure five additional numbers at \$5 each. If still more additional numbers are desired another \$15 number must be secured, which gives the privilege of five more at \$5 each. In other words, dealers buy in sets of six for demonstration and stock cars.

Auto owners paying 35c per horsepower do not contribute on a basis of the advertised horsepower of the car, but on its actual horsepower as ascertained by using the formula adopted by the Association of Licensed Automobile Manufacturers. The real horsepower is computed by the use of the measurements of the cylinders, piston, etc. It is less than the advertised horsepower in most cars.

The commission has motor vehicle registration cards. They show the name of the owner, residence, business address, model and make of car, number actual horsepower, name of manufacturer, manufacturer's car number, engine number and whether the car is propelled by gasoline, oil, steam or electric.

A car making forty horsepower and costing \$1,000 will bear a tax of \$14 to the state and \$10 a year to the national government, or \$24 for the year. The proposed auto tax by the national government is 1 per cent of manufacturer's cost. That would be \$10 on the car of \$1,000.

Every motor vehicle other than a motorcycle while on the public highways of this State, when in operation, during the period of one-half hour after sunset to one-half hour before sunrise, and at all times when fog or other atmospheric conditions render the operation of such vehicles unusual or dangerous to traffic and the use of the highways, shall carry at the front at least two lighted lamps showing the white lights visible under normal atmospheric conditions at least five hundred feet in the direction toward which such motor vehicle is facing, and shall also carry at the rear a lighted lamp exhibiting one red light plainly visible for a distance of five hundred feet to the rear.

Every motorcycle or bicycle, while on the public highway when in operation, shall carry on its front one lighted lamp showing a white light visible under normal atmospheric conditions at least two hundred feet in the direction toward which such motorcycle or bicycle is facing, and shall also carry at the rear of such motorcycle or bicycle one red light plainly visible from the rear.

Provided that no automobile or motorcycle or bicycle shall be used upon the highways of this State which is equipped with a lamp, when lighted is capable of projecting direct rays at a greater height than a parallel of four feet from the road, provided, however, that any automobile, motorcycle or bicycle may be equipped with a lamp capable of projecting direct rays at a greater height than a parallel of four feet from the road, if such lamp, when lighted, is not capable of producing a dazzling light or glare.

All motor vehicles must be provided at all times when being operated on

the public highways with adequate brakes kept in good working order.

Other than on vehicles actually engaged at the time in construction or repair work on roads, no tire on any motor vehicle or any other vehicle shall be permitted to be run or operated on the public highway in this State which has on its periphery, any block, lug, wire, nail, ridge, bead or any other protuberance of metal which shall project more than one-fourth of an inch beyond the tread or traction surface of the tire, unless the said wheels are protected by bands, wooden blocks, skids, or some other sufficient device to protect the highways against injury by reason thereof; provided, that this section shall not be construed so as to prohibit the use of traction engines with cleats on the driving wheels thereof on dirt or unimproved roads.

Every motor vehicle must have devices in good working order which shall be at all times in constant operation to prevent excessive or unusual noise, annoying smoking, or the escape of gas, steam or oil as well as the falling out of residue from fuel, and all exhaust pipes carrying exhaust gas from the engine shall be directed parallel to the ground or slightly upward. Devices known as "muffler cut-outs" shall not be used within the limits of any incorporated city or town or on any public highway where the territory contiguous thereto is closely built up.

No intoxicated person shall operate or drive a motor or any other vehicle upon any public highway in this State.

No person shall employ for hire as a chauffeur of a motor vehicle any person not licensed as in this act provided.

No person shall allow a motor vehicle owned by him or under his control to be operated by any chauffeur who has no legal right to do so.

No person having control or charge of a motor vehicle shall allow such vehicle to stand in any public street or public highway unattended without first effectively setting the brakes thereon and stopping the motor of said vehicle.

The driver or operator of any vehicle in or upon any public highway in this State shall drive or operate such vehicle in a careful manner with due regard for the safety and convenience of pedestrians and all other vehicles or traffic upon such highway, and wherever practicable shall travel upon the right hand side of such highway.

Vehicles proceeding in opposite directions shall pass each other to the right, each giving to the other one-half of the road as nearly as possible. Vehicles overtaking other vehicles proceeding in the same direction shall pass to the left thereof, and shall not again drive to the right until the road is reasonably clear of such overtaken vehicle.

It shall be the duty of the driver, rider, or operator of a vehicle about to be overtaken and passed, to give way to the right in favor of the overtaking vehicle on suitable and visible signal, given by or on behalf of the operator, driver or other person in charge and control of such overtaking vehicle, if such overtaking vehicle is a motor vehicle.

Excepting where controlled by such traffic ordinances or regulations enacted by local authorities, no person permitted under this act, the operator of a vehicle approaching an intersection on the public highway shall yield the right of way to a vehicle approaching such intersection from the right of such first named vehicle.

It shall be the duty of the person operating or in charge of an overtaking vehicle to sound audible and suitable signal before passing a vehicle proceeding in the same direction.

All vehicles approaching an intersection of the public highway with the intention of turning thereat, shall, in turning to the right, keep to the right of the center of such intersection and in turning to the left, shall run beyond the center of such intersection, passing to the right before turning such vehicle to the left.

In all passing and overtaking, such assistance shall be given by the occupants of each vehicle respectively to the other as the circumstances shall reasonably demand in order to obtain clearance and avoid accident.

Every person having control or charge of any motor vehicle or other vehicle upon any public highway and approaching any vehicle drawn by horse or horses, or any horse upon which any person is riding, shall operate, manage and control such motor vehicle or other vehicle in such manner as to exercise every reasonable precaution to prevent the frightening of any such horse or horses and to insure the safety of any person riding or driving the same; and if such horse or horses appear frightened, the person in control of such motor vehicle or other vehicle shall reduce its speed, and if requested by signal of the hand, by the driver or rider of such horse or horses, shall not proceed further toward such animal or animals unless such movement be necessary to avoid injury or accident, until such animal or animals shall be under the control of the rider or driver thereof.

The person in control of any vehicle moving slowly along upon any public highway shall keep such vehicle as closely as possible to the right hand boundary of the highway, allowing more swiftly moving vehicles reasonably free passage to the left.

The person in charge of any vehicle in or upon any public highway, before turning, stopping or changing the course of such vehicle, shall see first that there is sufficient space for such movement to be made in safety, and if the movement or operation of other vehicles may reasonably be affected by such turning, stopping or changing of course, shall give plainly visible or audible signal to the person operating, driving or in charge of such vehicle of his intentions to turn, stop or change said course.

held under control, and the operator thereof in approaching curves or sharp turns in the road shall give a warning by his gong or other adequate signaling device to the persons on the road.

Whenever an automobile, motorcycle or other motor vehicle whatsoever, regardless of the power by which the same may be propelled, or drawn striking any person or colliding with any vehicle containing persons, the driver of, and all persons in control of such automobile, motorcycle, motor vehicle or other vehicle shall stop and shall render to the person struck or to the occupants of the vehicle collided with all necessary assistance, including the carrying of such persons or occupants to a physician or surgeon for medical or surgical treatment, if such treatment be required, or if such assistance is requested by the person struck or any occupant of the vehicle collided with; and such driver and person having or assuming authority of such driver, shall further give to the occupant of such vehicle or person struck a request for the name and address of each person or other vehicle, together with the address of each one thereof. Any person violating any of the provisions of this section is punishable by imprisonment for not more than six months, or a fine of five years or in the county jail not exceeding one year or by fine not exceeding five thousand dollars, or by both such fine and imprisonment.

No race or contest for speed shall be held upon any public highway in this State.

Every person operating or driving a motor or other vehicle on the public highways of this State, shall operate or drive the same in a careful and prudent manner, and at a rate of speed not greater than is reasonable and proper, having regard to the traffic and use of the highway, and no person shall operate or pass a motor or other vehicle on a public highway at such rate of speed as to endanger the life of any person or the safety of any property; provided, that it shall be unlawful to drive at a rate of speed in excess of twenty-five miles per hour, and provided further, that in any event no person shall operate or drive a motor or other vehicle on any public highway where the territory contiguous thereto is closely built up, at a greater rate of speed than eighteen miles per hour, or in the business district of any town or incorporated city or village, at a rate of speed less than fifteen miles per hour in cities of less than 40,000 population, nor at a greater rate of speed than ten miles per hour in the business districts of cities of more than forty thousand population; provided that the regulations with regard to speed set forth shall not be held to apply to fire patrol or motor vehicles operated by the fire department in responding to fire calls, nor to police patrol or Red Cross ambulance or other vehicles responding to emergency calls.

In case of any person arrested for violation of the provisions above mentioned, unless such person shall demand that he be taken forthwith to a justice of the peace, the arresting officer shall take the name and address of such person and the names of his motor vehicle and notify him in writing to appear before a designated magistrate at a time and place to be specified in writing at least five days subsequent to the date of such notice, and upon the promise in writing of such person to appear at such time and place such officer shall forthwith release him from custody.

All persons wilfully violating such promise, shall be guilty of a misdemeanor regardless of the disposition of the charge upon which he was originally arrested, and upon conviction thereof shall be fined in any sum not to exceed one hundred \$100 dollars.

Motor vehicles in passing each other on the highways shall slow down their speed to fifteen miles per hour.

Limitation as to the rate of speed herein fixed by this act shall be exclusive of other limitations fixed by any law of this State or of any political subdivision thereof and local authorities, cities and towns shall have no power to pass, enforce or maintain any ordinance, rules or regulations in violation of the provisions of this act, and no such ordinance, rules or regulations of such local authorities now in force, or hereafter enacted shall have any force excepting, however, that:

(1) Such powers as are now or may hereafter be vested in local authorities to enact ordinances or regulations applicable equally or generally to all vehicles and other users of highways, and providing for traffic or crossing of highways, or for the orderly passage of vehicles and other users of the public highways or certain portions thereof where the traffic is heavy and continuous, and

(2) The powers now or hereafter vested in local authorities to license and regulate the operation of vehicles offered to the public for hire; and to regulate the use of the highways for processions and assemblages, shall remain in full force and effect and all ordinances, rules and regulations which have been or which may be hereafter enacted in pursuance of such powers shall remain in full force and effect.

An application for a license to operate a motor vehicle as a chauffeur, (and by "chauffeur" is meant any person whose business or occupation it is that he operates a motor vehicle for compensation, wages or hire), shall be made by mail or otherwise to the department upon blanks prepared for such purpose, and shall be accompanied by an annual fee of \$3.00, provided that the first fee payable under this act shall be \$2.00 for the period of time expiring December 31, 1917, and said fee shall be payable on July 1, 1917, and thereafter on the first of January of each year thereafter, and shall be paid by each chauffeur to the department a fee of \$3.00, accompanied by the application, as herein provided for; provided, that any person wishing to engage in the business of a chauffeur at any time after January 1, 1918, shall pay \$3.00 when making his application which shall pay his license fee till the 31st of December following the date of such application.

No person shall operate or drive a motor vehicle as a chauffeur upon a public highway in this State after the first day of July, 1917, nor shall any owner of a motor vehicle permit such vehicle to be so operated or driven after such date unless the requirements of this act, applicable to chauffeurs, shall have been in all respects complied with.

Any person who throws or deposits any glass bottles, glass, nails, tacks, hoops, wire, cans or any other substance likely to injure any person, animal, or vehicle upon any public highway shall be guilty of a misdemeanor, and upon conviction thereof shall be punished with fine not to exceed five hundred (\$500) dollars, or by imprisonment in the county jail not to exceed six months, or by both such imprisonment and fine.

The fines collected for violations of any of the provisions of this act shall be used by the municipality or the counties in which same are assessed in the construction and maintenance of roads, bridges and culverts in the city or county where such convictions are had.

Wherever the word "Department" is used in this act, it is meant the Highway Department of this State. "Motor Vehicle" wherever used in this act shall include all vehicles propelled otherwise than by muscular power, except such vehicles that run upon rail or tracks. "Automobile" as used includes all motor vehicles excepting motorcycles. "Motorcycles" as used in this act shall include all motorcycles designed to travel on not more than three wheels in contact with the ground.

TO COMMANDEER SHIPBUILDING.

Government to Take Over Contracts for Steel Vessels—3,000,000 Tons Promised in Eighteen Months.

Washington.—The vast amount of steel merchant shipping under construction in American yards—probably 2,000,000 tons—will be taken over immediately by the government under power granted in a provision of the war budget bill signed this week by President Wilson.

The announcement was made at a conference of the country's steel shipbuilders with the shipping board and its emergency fleet corporation. Shipping now in the yards will be hurried to completion by the institution of a system of a double and triple working shift and when the ways are cleared of present contracts the fleet corporation will begin construction of its great fleet of standardized steel ships.

Only by taking over contracts for itself can the government speed construction since congress failed to give it power to rush building for private owners. Major General Goethals, general manager of the fleet corporation, told the shipbuilders that he expected to turn out within the next 18 months fully 3,000,000 tons of steel shipping and perhaps more. Steel companies, he said, have agreed to furnish enough steel to build 800,000 tons a month. The only question, he said, is the capacity of the yards, working at top most speed.

About 1,000,000 tons of the shipping building in American yards or contracted for is for British account. This the British government has agreed to turn over to the United States voluntarily.

The vessels as fast as built will be chartered by the shipping board to private operators and perhaps in some instances to the allied governments.

The shipbuilders were told that the government at this time has no intention of taking over the ship yards if the shipbuilders exert their utmost efforts to speed construction.

Attention Called to Menace.

Washington.—Attention of congress is being called to the pink boll worm menace that threatens the cotton industry if once it gets a foothold this side of the Rio Grande, and plans are being sought to make the introduction of the pest from Mexico more impossible. The department of agriculture has a restrictive embargo against importation of seed from Mexico, with a view of preventing the worm being transferred to this side of the international line.

Freedom for Irish Rebels.

LONDON.—All the prisoners taken in the Irish rebellion of Easter Sunday, 1916, will be released without reservation. This announcement was made in the house of commons Friday by Bonar Law, who said the government felt that by so doing it would aid in the success of the approaching Irish convention which the government hoped would effect a reconciliation among the Irish political parties.

Lafayette's Tomb Visited by Pershing.

Paris.—Major General J. J. Pershing, commander in chief of the American expeditionary forces in France, spent his third and last day in Paris Friday before leaving for the front, in making official calls, paying a visit to Marshal Joffre, with whom he had luncheon, and visiting the senate. He also visited the Picpus cemetery, where he placed a wreath on the tomb of Lafayette.

To Tax Publishers On Profits.

Washington.—A new tax of 5 per cent on the net profit of all newspaper and magazine publishers was written into the war tax bill Friday by the senate finance committee in lieu of the 2 per cent advertising tax previously agreed upon and of the second class mail rate increase proposed in the house bill.

Name Shipping Board Counsel.

Washington.—Mr. Alfred Huger of Charleston, S. C., a lawyer, was Saturday appointed admiralty counsel to the federal shipping board.

CALOMEL WHEN BILIOUS? NO! STOP! ACTS LIKE DYNAMITE ON LIVER

I Guarantee "Dodson's Liver Tone" Will Give You the Best Liver and Bowel Cleansing You Ever Had—Doesn't Make You Sick!

Stop using calomel! It makes you sick. Don't lose a day's work. If you feel lazy, sluggish, bilious or constipated, listen to me!

Calomel is mercury or quicksilver which causes necrosis of the bones. Calomel, when it comes into contact with your bile, crashes into it, breaking it up. This is when you feel that awful nausea and cramping. If you feel "all knocked out," if your liver is torpid and bowels constipated or you have headache, dizziness, coated tongue, if breath is bad or stomach sour just try a spoonful of harmless Dodson's Liver Tone.

Here's my guarantee—Go to any drug store or dealer and get a 50-cent bottle of Dodson's Liver Tone. Take a

spoonful and if it doesn't straighten you right up and make you feel fine and vigorous I want you to go back to the store and get your money. Dodson's Liver Tone is destroying the sale of calomel because it is real liver medicine; entirely vegetable, therefore it cannot salfate or make you sick.

I guarantee that one spoonful of Dodson's Liver Tone will put your sluggish liver to work and clean your bowels of that sour bile and constipated waste which is clogging your system and making you feel miserable. I guarantee that a bottle of Dodson's Liver Tone will keep your entire family feeling fine for months. Give it to your children. It is harmless; doesn't gripe and they like its pleasant taste.—Adv.

What Could He Do?

The Monon passenger car was filled when a stop was made at a small way station a man and woman boarded it.

Mr. S., who was occupying a seat by himself, arose and offered the woman a seat. She accepted, but when Mr. S. resumed his seat she remarked: "I prefer my husband to sit by me, if you please."

When asked what he did, Mr. S. replied: "Well, what could I do but comply?"—Indianapolis News.

Dr. B. F. Jackson, Celebrated Physician, handed down to posterity his famous prescription for female troubles. Now sold under the name of "Feminalin." Price 50c and \$1.00.—Adv.

A Question of Time.

She—Albert, don't you think it is about time I had a new hat?
He (absent-mindedly)—I really don't know, my dear; I—er—seem to have allowed my watch to run down.

FOR TETTER, SCALY FACE ERUPTION.

Use Tetterine. It is also an absolute cure for Eczema, Ringworm, Erysipelas, Infant's Sore Head and all other itching cutaneous diseases. It gives instant relief and effects permanent cures.

"After thirty years experience in the drug business, I can truthfully say that I have never seen a remedy equal to Tetterine for Skin diseases. A few applications have made a complete cure of Tetter on hands, which I had almost despaired of ever curing. I also find it unequalled for chapped and rough skin."—Boland B. Hall, Druggist, Mason, Ga.

Tetterine, 50 cents at druggists or by mail from J. P. Shupfette, Savannah, Ga. Adv.

Confident.

"We need brains in this business, young man."
"Your business shows it, sir. That is why I am offering you my services."

Dr. Peery's "Dead Shot" is not a "toxic" or "syrup," but a real old-fashioned medicine for Biliousness, Worms or Tapeworm with a single dose. Adv.

One-Sided.

"Do you and your husband disagree?"
"He never does."

Important to Mothers.

Examine carefully every bottle of CASTORIA, that famous old remedy for infants and children, and see that it bears the signature of *Wm. L. Fletcher* in Use for Over 30 Years. Children Cry for Fletcher's Castoria

Will Have to Dig.

They were talking in Washington about putting a heavy tax on idle lands. In other words, the landlords will have to dig one way or another.—Houston Post.

DON'T WORRY ABOUT PIMPLES

Because Cuticura Quickly Removes Them—Trial Free.

On rising and retiring gently smear the face with Cuticura Ointment. Wash off the Ointment in five minutes with Cuticura Soap and hot water, using plenty of Soap. Keep your skin clear by making Cuticura your every-day toilet preparation.

Free sample each by mail with Book, Address postcard, Cuticura, Dept. L, Boston. Sold everywhere.—Adv.

Wrong Time.

"So she refused you?"
"Broker—Yes, but it was my own fault. I proposed on a declining market."

CAPUDINE

—For Headaches— Try it and be convinced. Good for aches in back and limbs also—Assists Nature to get right and stay so. It's Liquid—easy to take.—Adv.

Many a man's first mistake lies in the selection of his partners.

A man should be proud of his enemies if they are of the right sort.

WINTERSMITH'S CHILL TONIC

Sold for 47 years. For Malaria, Chills and Fever. Also a Fine General Strengthening Tonic. 50c and \$1.00 at all drug stores.

GREEN MOUNTAIN ASTHMA TREATMENT

This treatment is the result of many years of study and experience in the treatment of chronic and acute asthma, bronchitis, emphysema, hay fever, and all other respiratory ailments. It is a natural, vegetable, and non-toxic preparation, and is guaranteed to give relief in all cases.

La Valliere Vanishing Cream

Will Aid You to Possess a Beautiful Face. It cleanses, whitens and softens the skin and prevents tan and sunburn. Pure and absolutely harmless. Buy it of your dealer. If he will not supply you, send 35 cents to The La Valliere Co., New Orleans.

Kill All Flies! THEY SPREAD DISEASE

Destroy all flies, mosquitoes, and other insects that spread disease. Use the "Daisy Fly Killer" which kills them instantly and is safe for all household purposes.

Texas Directory

POISON IVY or "Poison Oak"

It is not a disease, but a result in serious cases of skin disease. Breaks out as a rash, making it unpleasant. SUIBROT POISON IVY REMEDY kills it. Acts quickly. Works efficiently. First time offered to the public. Satisfaction assured. Price \$1.00 postpaid.

"That's Fred Darling just come in. You know his wife made him."
"You mean that fellow with a waxed mustache and manicured nails?"
"Yes."
"Well, I know women did fancy work, but I never knew they did anything as fancy as that."

FRECKLES

Now is the Time to Get Rid of These Ugly Spots. There's no longer the slightest need of feeling ashamed of your freckles, as the prescription ointment—double strength—is guaranteed to remove these homely spots.

Simply get an ounce of ointment—double strength—from your druggist, and apply a little of it night and morning and you should soon see that even the worst freckles have begun to disappear, while the lighter ones have vanished entirely. It is seldom that more than one ounce is needed to completely clear the skin and gain a beautiful clear complexion.

Be sure to ask for the double strength ointment, as this is sold under guarantee of money back if it fails to remove freckles.—Adv.

Gazing at a Hero.

"Why is the crowd gazing with such admiration, almost awe, on him? Is he the governor?"
"Governor! Tut! He's no mere governor! He's the chap who owns the bowlegged bull pup that took the prize at the bench show."—Browning's.

She Knew.

Sailor—Yes, ma'am, them's men-o-war.
Girl—How interesting. And what are the little ones in front?
Sailor—Oh, them's just tugs.
Girl—Oh, yes, of course; tugs of war. I've heard of them.

The life of a woman whose husband has no faults must be awfully monotonous.

THE KERRVILLE ADVANCE

T. A. RUCKNER, Editor and Prop.
Mrs. Hattie Buckner, Associate Editor

SUBSCRIPTION \$1.50 A YEAR IN ADVANCE

Entered as second class matter at the postoffice at Kerrville, Texas.

The Glorious Fourth

The business houses of Kerrville closed their doors for the entire day yesterday in honor of the anniversary of our National Independence. There was no celebration here, but our people, many of them, went out of town and picnicked on the river and others went to Fredericksburg to the celebration there. Our city was as quiet almost as Sunday for it seemed the town was almost deserted.

The Federal law prohibiting sending news paper advertisements or other advertising into prohibition territory calculated to solicit sales of liquor in dry territory went into effect July 1st. This will not effect the Advance for we have never allowed our columns to be contaminated with such matter. There is another Federal law that will likely be enforced and that is the carrying of liquor into dry territory by mail carriers. This law is said to be violated in some parts of Texas, but we believe if the carriers were aware of the heavy penalty they would not consider taking the risk.

Amendment to Fire Ordinance

An Ordinance amending an Ordinance Prescribing and Defining the Inner Fire limits within City of Kerrville and Regulating the Construction, Repairing, Enlarging, Alteration or Removing of Buildings Within said Firelimits and Prescribing Penalties for the Violation of the Provisions Thereof.

BE IT ORDAINED by the Board of Commissioners of the City of Kerrville, that the ordinance heretofore enacted by the City Council of the City of Kerrville, prescribing and defining the inner fire limits within the City of Kerrville and regulating the construction, enlarging, repairing and removal of buildings within said limits and prescribing penalties for the violation of the provisions thereof, be, and the same is hereby amended, so as to read as follows:

SECTION 1. The following shall be and are hereby declared to be the Inner Fire limits of and within the City of Kerrville, Kerr County, Texas, to wit:

Beginning on the Guadalupe River bank, at a point opposite Washington Street, and where the north side of said Washington Street would reach said river bank should said street be extended to the said river; thence to the end on said Washington Street to its intersection with Main Street; thence north along Main Street to Clay Street; thence west with and along Clay Street to the bank of Guadalupe River and thence down said river with the meanders thereof to the place of beginning.

SECTION 2. Within the above defined Fire Limits it shall hereafter be unlawful for any person, firm or corporation to erect, alter, repair, add to or remove into and within any building or structure of any kind or class whatsoever situated therein, except the building so erected, altered, repaired, added to or removed be built of stone, brick, concrete or concrete blocks or of some other fire proof material, so as to render said building or structure fire proof, as

the term "fire proof" is defined by the rules and regulations promulgated by or under the direction of the Commissioner of Insurance and Banking of the State of Texas; and any person who shall hereafter, within the inner fire limits of the City of Kerrville, as same is above or may be hereafter prescribed by Ordinance of the City of Kerrville, erect, alter, repair or remove into, or begin the erection, altering, repairing or removal into the said fire limits, any building or structure other than one composed of fire proof material, or such material as to render the said building fireproof, shall be deemed guilty of an offense and upon conviction thereof shall be punished by a fine of not more than one hundred dollars. And for each and every day that the owners or builders of any such building or part of building being so erected, repaired, altered or removed in violation of the provisions of this ordinance shall continue to erect, alter, repair or remove such building or part of building, or allow same to remain, within the Inner Fire Limits of the City of Kerrville, after same shall have been so erected, repaired, altered or removed therein, shall be guilty of a separate offense.

SECTION 3. Upon obtaining the permission of the Board of Commissioners of the City of Kerrville, any person, firm or corporation may remove from within the inner fire limits of the City of Kerrville any structure or building erected therein previous to the passage of this ordinance.

Done by unanimous vote of the Board of Commissioners of the City of Kerrville at the regular meeting of the said Board on the 5th day of June, A. D. 1917, to become effective after the publication thereof.

H. C. GEDDIE, Mayor.

Attest: W. A. FAWCETT, Clerk.

Catholic Church Notes

(By Father Kemper)

Miss Matilda Funke of San Antonio has arrived to take charge of the Vacation Camp which the daughters of Isabella will conduct in St. Mary's Park until the reopening of school. The first guests to register were Mrs. L. Conroy and her six children. They are occupying "Portiuncula" as the janitor's residence is called.

Mr. Joseph H. Dufresne of Chicago died on Sunday morning. His wife who had come here previously, returned to her five children and relatives.

Miss Earl Newton, an old student of Notre Dame Institute, is spending part of her summer with her aunt Mrs. Chas. Wesch.

Patriotic Sunday was religiously observed at both Catholic congregations. Very many of the members of the Guadalupe parish have joined the exodus across the Rio Grande.

Leave a likeness of yourself with your sweetheart when you go to France. See, EUGENE T. BUTT, Photographer.

Kellog's Krumbles at Berry's.

Sidney Shuford returned the latter part of last week from El Paso and at once joined the local company of infantry.

Pioneer Flour, the old reliable tried and true, is the flour for you. Get it at Mosel, Saenger & Co.

Capt. and Mrs. A. W. McKillip left last week for Colorado Springs, Colo., where they will again spend the summer.

Courtesy our watchword. Low prices secure business, bargains always H. Noll Stock Co.

For Sale—Double buggy and harness at your own price. Cost \$135.00, used one year. Must sell. M. S. Osborne, Phone 57.

Our Pride and Whitehouse Flour always satisfy, at West Texas Supply Co.

For Rent—Houses close in, also comfortable houses out at edge of city limits. M. S. Osborne, Phone 57.

D. G. Cage and two sisters, Misses Cathryn and Eula Cage, of Austin are among the recent arrivals for the summer and are stopping at the St. Charles hotel.

Just received a complete stock of the celebrated Aladdin Aluminum ware. Best yet. See it at Mosel, Saenger & Co.

Mrs. V. V. Farrar and Mrs. Wm. Gentzer of San Antonio are among the recent arrivals to spend the summer here.

Kill the Blue Bugs
By Feeding "Martin's Wonderful Blue Bug Killer" to your chickens. Your money back if not satisfied. Ask Rawson's Drug Store.

Miss Mary McKay returned home yesterday from an extensive visit to friends in San Antonio and other places.

District Judge R. H. Burney and Gilbert C. Storms are at Leakey this week where court is in session.

Miss Adah Gibbens of Bandera is here to take the place of Miss Minnie Hudspeth as stenographer in the office of Capt. Chas. Schreiner while Miss Hudspeth takes a month's vacation.

It seems that some of our subscribers have not discovered that it takes something else besides wind and backbone to run a newspaper. Do you get the hint.

Mr. and Mrs. H. J. Howell left today for a few weeks visit to their home and friends at Gonzales.

Kerrville Slandered
The report published in the San Antonio Light of yesterday to the effect that a United States flag and an English flag had been mutilated and tacked up at the postoffice in Kerrville is utterly false. The unfortunate occurrence referred to was reported to have transpired at Fredericksburg and was wired in to the Light from Kerrville, thus accounting for the mistake. Kerr county has only 6,000 population, and to the present is credited with over 125 volunteers enlisted in the various departments of the army and navy. We claim to be as loyal as any county in the nation and such report as the above does us a grave injustice.

KERRVILLE, TEXAS

SWEET POTATO ACREAGE TO BE INCREASED

SWEET POTATO PLANTER IN ACTION.

The acreage of sweet potatoes should be doubled this year, assert members of the department of horticulture in the Kansas State Agricultural college. Growers of Irish potatoes have reduced their acreage by a good many acres, they point out. It is not expected, warn the horticulturists, that the inexperienced grower will make a plunge this year, but if each grower and farmer living on suitable land will increase his acreage, however little, much may be done to equalize potato prices this fall and winter. Every indication is for prices high enough to insure a profit.

Each grower should provide himself with some sort of warm, dry storage facilities. The prices of farm products at harvest time, when the majority of farmers sell, is always low. A storage for any product may easily pay for itself the first year.

HENS RECOMMENDED BY COUNTY AGENTS

Less Done for Development of Poultry Industry Than for Any Other Farm Stock.

The poultry committee of the recent farm bureau conference at University farm, St. Paul, believes that more work for the development of the poultry industry is needed, because:

Considering its importance, less has been done for it than for any other live stock industry, by farm bureaus. Poultry production costs no more per pound than the production of other kinds of live stock, yet the meat sells at a much higher rate.

The committee, moreover, believes that the farm flock should be encouraged rather than the large specialized poultry enterprise; that poultry work is especially adapted to boys' and girls' club work, and that farm bureaus in encouraging the work should not overlook the development of the co-operative marketing of eggs through local creameries, or assistance for poultry shows and associations.

SOME HESITATE TO TRY SWEET CLOVER

No Foundation for Fear That There Will Be Difficulty in Eradicating Crop.

(From the United States Department of Agriculture.)

Some farmers hesitate to plant sweet clover on their farms for fear they will have difficulty in eradicating it when the fields are planted to other crops. The results obtained annually by hundreds of farmers are sufficient proof that there is no foundation for such fear; in fact, farmers are experiencing much difficulty in cutting the first crop the second season so high that the plants will not be killed. The

Many gardeners and growers are beginning to worry about injury to trade because of garden enthusiasm in small towns. This will be true to a great extent only as to the early vegetables, say horticulturists. Very few office people and laborers care to get out early in the morning or late at night during July or August. It must also be remembered that vacations are taken from June to September and during the vacation weeds grow rapidly. To offset the vegetables grown at home, moreover, is the determination of each family to can fruits and vegetables in the home more than ever before. This will increase demand.

This year promises a shortage in many sorts of fruits. Because of the high prices during the past year much attention will be given during the present season to home canning and preserving.

new crop of sweet clover, unlike that of red clover and alfalfa, must come from the buds left on the stubble, so when the plants are cut below these buds they will be killed. As sweet clover is a biennial, the plants die as soon as the seed crop is produced.

When the first year's growth of sweet clover is turned under for green manure it is recommended that the field be plowed after the plants have made some growth the following spring rather than in the fall of the year of seeding. When the first year's growth is plowed under the same fall many of the plants will not be entirely covered, and these will make a vigorous growth the following spring. When the plowing is delayed until the plants have made some growth the following spring no trouble will be experienced in eradicating them.

PARIS GREEN HIGH; SUBSTITUTE READY

Arsenate of Lead Is Excellent Stomach Insecticide and Has Not Advanced in Price.

Paris green costs more than twice as much this year as last. It is selling at 30 cents a pound even in large quantities. It is doubtful whether it can be purchased for less than 45 cents a pound. Fortunately, says A. G. Ruggles, University farm, St. Paul, arsenate of lead, a better stomach insecticide than paris green, has not advanced in price. The powdered form may be obtained for about 25 cents a pound, and one and one-half pounds of the powder is used in making 50 gallons of spray mixture.

"In experiments at University farm," adds Mr. Ruggles, "we have found arsenate of lead better than paris green as a remedy for potato bugs, and all orchard insects. It is not necessary, therefore, to allow injurious biting insects to live simply because paris green is costly." The orchardist should get his spray materials as early as possible. It is not easy to tell when arsenate of lead may go killing after paris green.

WATER EQUIPMENT FOR FARM BUILDINGS

(By J. L. MOWRY.)

If there is a good spring or creek, safe and clean, on the farm, or a flowing well below which a little slope may be found, together with an oversupply of water from the well, it is not a hard matter to put in an equipment for running water for the house, barns and other farm buildings by the use of a hydraulic ram.

In installing a farm-house water supply, any hand pump of force type may be used. Since so much more water is used through a faucet than from a pail, having to pump by hand, usually puts the veto on a house system depending on hand pumping. A gas engine or windmill will also work in any system, pumping air or water, or both.

But in the case of spring, creek or overlow well water, a hydraulic ram is well worth consideration. A ram will probably cost the farmer any-

where from eleven to twenty-four dollars.

From the spring, or whatever the water source, (shown in the accompanying illustration, at (G), the water flows down a drive pipe, (A), flowing out of the valve, (F) until the friction of the passing water closes this valve; then the oncoming column of water, (A), pushing into the air-chamber, (C), compresses the air, passes out the service pipe, (D), until the force of the water (A) is balanced by the weight of water, (D) The opening valve, (E), will now close of its own weight. The valve (F) likewise, will open and the water will again start to flow, and the process is repeated. This gives an irregular flow but is very reliable and not expensive. A five-foot head will raise water 40 feet, provided the pipe (A) is 30 or 40 feet long. Only about one-seventh of the available water can be raised, but the ram will work night and day.

DAILY DAIRY

PLAN FOR CONVENIENT BARN

No Better Way to Keep Young Animals Than to Provide Pens in Which They Can Run Loose.

(By C. C. HAYDEN, Ohio Experiment Station.)

There is no better way to keep calves and yearlings than to provide pens in which they can run loose in small groups. Mangers and stanchions should be provided along one side of the pens, in which the calves can be fastened while eating.

The accompanying sketch shows a simple yet convenient plan. The dimensions are 30 by 40 feet. A space 10 feet wide is taken across one end to be used as a feed room. The remainder is divided into four pens, two on either side, each 12 by 14 feet. A feed alley 5 feet wide runs through the manger with six stanchions to a pen.

The stanchions as shown are two feet apart which is sufficient for even a yearling if fastened only while eat-

Convenient Barn Plan.

ing. The width of the manger, the spacing of the stanchions and height of the stanchions can be varied in different pens to suit sizes of calves.

The partitions between the pens should be about four feet high and a gate provided so that both pens can be thrown together. Gates can be placed at each end of the mangers, giving easy access to all pens from the feed alley. The stanchions, partitions and gates may be made of 1 by 4-inch stuff.

Ventilation should be provided the same as in any dairy barn.

FEED DAIRY COWS ROUGHAGE

Should Be Given to Limit of Animal's Capacity—Soy Bean Hay Is Classed With Alfalfa.

"Roughage should be fed to the limit of the dairy cow's capacity," says Prof. C. C. Hayden of the Ohio experiment station. "Relatively, the roughages, like hay and corn and stover, are much cheaper than grains and hay is of unusually good quality. Roughage, of course, should not be fed exclusively, as such feeding might lead to compaction and death even in dry cows and heifers. Some grain is needed in every dairy ration."

"This dairy specialist also declares: 'Choice alfalfa hay at \$20 a ton is cheaper than bran at \$30. Our experiments show that soy bean hay is in the same class as alfalfa, and clover is third. With corn at \$1 a bushel, clover hay should be worth about \$20 a ton, or \$5 more than it is now quoted.'"

Timothy hay is recommended for milking cows only in small quantities to replace such grains as corn and hominy. Leguminous roughages have proved far superior in numerous experiments to timothy for cows in milk.

SILLO OF GREAT IMPORTANCE

Huge Receptacle Means Saving of From 8 to 10 Cents in Cost of Producing Butterfat.

Practical dairymen who are silo users say that the silo on the farm means a saving of from eight to ten cents a pound in the cost of producing butterfat. Beef feeders say that ensilage saves from \$1 to \$1.50 per hundred pounds in producing beef.

Feeding experiments bear out these statements. On this basis ensilage under normal conditions is worth \$4 a ton. With an increase of 50 per cent in feed prices it is worth \$6 per ton.

Reports from farmers show an average cost of \$2.75 a ton for corn ensilage, including all factors incident to its production. The inadvisability of doing without a silo seems to be more important than the question of whether to build one.

CAUSE OF BULL'S UGLINESS

Confinement in Small, Dark Stall Makes Animal Unruly—Give Him Daily Run in Yard.

No wonder a bull gets ugly when he is shut up all the time in a small, dark stall.

Give him a daily run in a good-sized yard, and you will have a bull that is kind and gentle and a sure stock getter for many years.

It is foolish to sell a bull after a season's use unless he is a poor one

MANAGEMENT AND FEEDING FOR BABY BEEF

EXTRA FINE GRADE STEERS IN FEED LOT.

(Prepared by the United States Department of Agriculture.)

One of the first decisions that the producer of baby beef should make is whether to have his calves born in the spring or in the fall. At the present time most of the calves on farms are born during the spring, but those who have tried the fall calving plan under suitable conditions, find it possibly more satisfactory. The fall-born calf fits in with pastures some-what better than those born in the spring. His first summer is spent on the pasture and at the end of this period he goes into the dry lot for finishing. On the other hand, the spring-born calf must be fed during the first winter and when the pastures are ready usually cannot be placed on them because he has reached the finishing period and should go into the dry lot. Again, the farmer who sells milk will derive greater profit when his cows freshen in the fall, since milk markets are better then than in the spring. An additional advantage is the fact that finishing calves in the fall and early winter interferes less with other farm work than in the spring and early summer. On the other hand, in extremely cold climates calves born in the late fall will suffer, so that warm barns are a necessity. More feed is also necessary to maintain calves when they are nursing calves, and if this is done in the winter when pastures are not always available, the expense of keeping the herd will be somewhat increased. Furthermore, farmers who buy cows that have been bred to calve in the fall must lose six months of service from them if the change is made to fall calving.

Milk for Calves.

It is also necessary for the owner to determine whether the calves shall have all of their mother's milk or whether any other use is to be made of it. Under the so-called beef system, all the calves are allowed to nurse their dams and the cows are kept strictly for the calves which they produce. Under the system of double nursing, some of the cows are required to suckle two calves and the milk from the others is sold or disposed of in some way. Many herds, too, are kept both for beef and milk purposes. Under this system, known as the dual purpose, the cows are milked and the calves are raised on skim milk and grain. A fourth system is used chiefly in the Southeast and is known as the partial milking system. Under this method the calves take a portion of the milk and the balance is hand milked. This involves a great deal of trouble and labor, however, and is not practicable on the average beef-producing farm.

In general, it is said that the beef and the double-nursing systems are the most satisfactory for the production of prime baby beef. Under ordinary circumstances calves intended for baby beef should be fed a conservative ration of grain as soon as they will eat it. In all cases baby beef calves should be fed liberally on grain for at least one month before weaning time. They may be started when four to six weeks

of age on crushed grains and after a few weeks may receive whole grain.

At weaning time every effort should be made to get them through without loss of their calf fat. The grain ration should be increased so that the loss of their milk will not be felt. They should also be weaned gradually, the entire process taking from ten to fifteen days. Full-born calves should not be weaned until after the cows and calves are on grass, and spring-born calves should be weaned, if possible, early enough in the fall to allow them some time on grass. After weaning time the feeding and management of the calf depends largely upon the time of the year it is born and the age at which it is to be sold. Suggestive calendars for the management and feeding of both spring-born and fall-born calves are contained in Farmers' Bulletin 811. The rations provided for the calves in these calendars consist of corn, cottonseed meal, corn silage, clover hay, and oat straw, but other substances may be substituted for them. Barley, milo, kafir, and similar grains, for instance, may be used in place of corn, though in slightly larger quantities. Lined oil meal, too, is a satisfactory substitute for cottonseed meal. If neither is available, the roughage should consist chiefly of a high-grade leguminous hay. When available, oat straw should be kept before the calves at all times, not because of its nutritive value, but because of its slightly laxative and alterative effect.

PLANS TO CONTROL BEAN ANTHRACNOSE

Seed Selection Is Most Important—Spraying With Bordeaux Mixture Favored.

(By OTTO A. REINING, Colorado Agricultural College, Fort Collins, Colo.)

Bean anthracnose, a fungus disease common at certain portions of the season upon the wax and green beans, causes spotting of the pods and growing parts. The disease first appears as a small purplish discoloration which later develops into a larger spot with a darkened sunken center bordered by a light-brown ring. Spots can run together, forming irregular sunken areas. During certain stages, a pink mass of spores is formed in the center of each spot. The fungus penetrates through the pod into the bean seeds, the latter often becoming discolored or spotted.

Various control methods can be used. Seed selection is the most important. Seeds should only be used from healthy pods, preferably grown on fields where little disease is present. It is practically impossible to select clean seed, except by taking those from healthy pods.

Spraying with bordeaux mixture, 3-3-50 formula, is advised when the disease appears early, and if practicable. Burning of infected material, and rotation of crops is important.

APPLY BUSINESS PRINCIPLES TO FARMING

Farmers should apply business principles to farming, according to Theodore Macklin, in charge of agricultural economics in the Kansas agricultural experiment station.

"The farmer of today lives on the profit which he can make, more than he does on the few things which he produces and consumes without first selling," said Mr. Macklin. "His ideal is profit above everything else."

"Many complex forces affect the size of the farmer's profits. Market conditions and prices and the farmer's individual cost of production should be given consideration. The farmer's profit consists of the difference which may exist between the market price when he sells his products and his individual cost of producing those products.

"In the past this difference between the selling price and the supposed cost of production has been wide enough so that practically any farmer, regardless of his training, experience and skill, could make a living. The margin of profit has been growing smaller each year."

"When profits were relatively easily secured in generous amounts, the farmer could guess as to which lines of production were worth while, but now that margins have become so small, some way of keeping an account of his business is absolutely necessary if he would be certain of making the profit which he desires."

PROSPEROUS STOCK FARM IN KANSAS.

"Doans Saved My Life" "I Had Given Up Hope" Says Mr. Dent, "But Doan's Kidney Pills Cured Me Permanently."

Mr. Dent

"My kidney trouble began with back-ache, which ran on about a year," says W. H. Dent, 2113 Reynolds Street, Brunswick, Ga. "My back got so I was at times unable to sleep, even in a chair. Often the pain bent me double. I would be prostrated and some one would have to move me. I tried acid got into my blood and I began to break out. This got so bad I went to a hospital for treatment. I stayed there three months, but got but little better. Dropsy set in and I bloated until nearly half again my size. My knees were so swollen the flesh burst in strips. I lay there panting and just about able to catch my breath. I had five doctors; each one said it was impossible for me to live."

"I hadn't taken Doan's Kidney Pills long before I began to feel better. I kept on and was soon able to get up. The swelling gradually went away and when I had used eleven boxes I was completely cured. I have never had a bit of trouble since. I owe my life and my health to Doan's Kidney Pills."

Lemons Whiten and Beautify the Skin! Make Cheap Lotion

The juice of two fresh lemons strained into a bottle containing three ounces of orchard white makes a whole quart pint of the most remarkable lemon skin beautifier at about the cost one must pay for a small jar of the ordinary cold creams. Care should be taken to strain the lemon juice through a fine cloth so no lemon pulp gets in, then this lotion will keep fresh for months. Every woman knows that lemon juice is used to bleach and remove such blemishes as freckles, sallowness and tan and is the ideal skin softener, smoothener and beautifier.

Just try it! Make up a quart pint of this sweetly fragrant lemon lotion and massage it daily into the face, neck, arms and hands. It should naturally help to whiten, soften, freshen and bring out the hidden roses and beauty of any skin. It is wonderful for rough, red hands.

Your druggist will sell three ounces of orchard white at little cost, and any grocer will supply the lemons. Adv.

Don't depend upon nature to do it all. Grab a hoe and help her along, as much is demanded of her this year.

PRUDENCE

of the PARSONAGE By ETHEL HUESTON

(Robb-Merrill, Copyright, 1916)

THE TWINS TRY TO EM-BARRASS FAIRY WITH SOME PRACTICAL JOKING WHEN HER BEAU COMES TO VISIT HER.

Mr. Starr is a widower Methodist minister with five charming daughters. Prudence, the eldest is nineteen. She keeps house. Fairy, aged seventeen, is a college freshman. Carol and Lark, twins, are in high school, and Constance is in the grades. Mr. Starr is assigned to the congregation at Mount Mark, Ia., and the advent and establishment of his interesting family in the parsonage there stirs the curiosity of the whole town. The story concerns the affairs of the parsonage girls. Prudence has her hands full with the mischievous twins and Connie. Fairy has just announced that her beau is coming to spend the evening. The twins decide to have some fun, and have made their plans accordingly.

CHAPTER V—Continued.

As soon as they finished supper Lark said, "Don't you think we'd better go right to bed, Prue? We don't want to taint the atmosphere of the parsonage. Of course Fairy will want to wash the dishes herself to make sure they are clean and shining."

"Oh, no," disclaimed Fairy, good-naturedly. "I can give an extra rub to the ones we want to use—that is enough. I do appreciate the thought, though, thanks very much."

So the twins plunged in, carefully keeping Connie beside them. Connie had a dismal propensity for discoveries—the twins had often suffered from it.

Then they all three went to bed. To be sure it was ridiculously early, but they were all determined.

"You keep your eyes open, Fairy," Prudence whispered melodramatically. "Those girls do not look right, and she added anxiously, "Oh, I'll be so disappointed if things go badly."

Fairy was a little late getting up stairs to dress, but she took time to drop into her sisters' room. They were all in bed, breathing heavily. She walked from one to another, and stood above them majestically.

"Asleep!" she cried. "Ah, fortune is kind. They are asleep. How I love these darling little twines—in their sleep!"

An audible sniff from beneath the covers, and Fairy, smiling mischievously, went into the front room to prepare for her caller.

The bell rang as she was dressing. Prudence went to the door, preternaturally ceremonious, and ushered Mr. Babier into the front room. She did not observe that the young man sniffed in a peculiar manner as he entered the room.

"I'll call Fairy," she said demurely. "Tell her she hasn't primp for me," he answered, laughing. "I know just how she looks already."

But Prudence was too heavily burdened to laugh. She smiled hospitably, and closed the door upon him. Fairy was tripping down the stairs, very tall, very handsome, very gay. She pinched her sister's arm as she passed, and the front room door swung behind. But she did not greet her friend. She stood erect by the door, her head tilted on one side, sniffing, sniffing.

"What in the world?" she wondered. Eugene Babier was strangely quiet. He looked about the room in a peculiar, questioning way.

"Shall I raise a window?" he suggested finally. "It's rather—er—hot in here."

"Yes, do," she urged. "Raise all of them. It's—do you—do you notice a funny smell in here? Or am I imagining it? It—it almost makes me sick!"

"Yes, there is a smell," he said, in evident relief. "I thought maybe you'd been cleaning the carpet with something. It's ghastly. Can't we go somewhere else?"

"Come on." She opened the door into the sitting room. "We're coming out here if you do not mind, Prue," and Fairy explained the difficulty.

"Why, that's very strange," said Prudence, knitting her brows. "I was in there right after supper, and I didn't notice anything. What does it smell like?"

"It's a new smell to me," laughed Fairy, "but something about it is strangely suggestive of our angel twins."

Prudence went to investigate, and Fairy shoved a big chair near the table, waving her hand toward it lightly with a smile at Babbie. Then she sank into a low rocker, and leaned one arm on the table. She wrinkled her forehead thoughtfully.

"That smell," she began. "I am very suspicious about it. It was not at all natural—"

"Excuse me, Fairy," he said, ill at ease for the first time in her knowledge of him. "Did you know your sleeve was coming out?"

Fairy gasped and raised her arm. "Both arms, apparently," he continued, smiling, but his face was flushed.

"Excuse me just a minute, will you?" Fairy was unflustered. She sought her sister. "Look here, Prue—what do you make of this? I'm coming to pieces! I'm hanging by a single thread, as it were."

Her sleeves were undoubtedly ready to drop off at a second's notice! Prudence was shocked. She grew positively white in the face.

"Oh, Fairy," she wailed. "We are disgraced."

"Not a bit of it," said Fairy coolly. "I remember now that Lark was looking for the scissors before supper. Aren't those twins unique? This is almost bordering on talent, isn't it? Don't look so distressed, Prue. Etiquette itself must be subservient to twins, it seems. Don't forget to bring in the ste—" at a quarter past nine, and have it as good as possible—please, dear."

"I will," vowed Prudence. "I'll—I'll use cream. Oh, those horrible twins!"

"Go in and entertain Babbie till I come down, won't you?" And Fairy ran lightly up the stairs, humming a snatch of song.

But Prudence did a poor job of entertaining Babbie during her sister's absence. She felt really dizzy! Such a way to introduce etiquette into the parsonage life. She was glad to make her escape from the room when Fairy returned, a graceful figure in fine blue silk.

A little after nine she called out "dismally, "Fairy!" And Fairy, fearing fresh disaster, came running out.

"What now? What—"

"I forgot what you told me to say," whispered Prudence wretchedly. "What was it? The soup is ready, and piping hot—but what is it you want me to say?"

Fairy screamed with laughter. "You goose!" she cried. "Say anything you like. It doesn't make any difference what you say."

"Oh, I am determined to do my part just right," vowed Prudence fervently. "According to etiquette and all. What was it you said?"

Fairy stifled her laughter with difficulty, and said in a low voice, "The offense was against Fairy," said Prudence, with a solemnity she did not feel. "And the reparation must be done to her. For three weeks you must do all of her bedroom work, and run every errand she requires. Moreover, you must keep her shoes well cleaned and nicely polished, and must do every bit of her darning!"

The twins would have preferred whipping a thousand times. They felt they had got a whipping's worth of pleasure out of their mischief! But a punishment like this sat heavily upon their proud young shoulders, and from that time on they held Fairy practically immune from their pranks.

Prudence did not bother her head about etiquette after that experience. "I'm strong for comfort," she declared. "And since the two cannot live together in one family, I say we do without etiquette."

And Fairy nodded in agreement, smiling good-naturedly.

IMPORTANCE OF STRONG RAM

If Both Male and Ewe Are Weak in Some Points Weaknesses Are Intensified in Lambs.

A ram is half the flock. A good ram will impress his desirable qualities on his offspring. The ram must be strong in the points in which the ewes are deficient. It is a well-known fact that like begets like, and if both the ram and the ewe are weak in the same points these weaknesses will be intensified in the offspring.

If the flock is small, a ram lamb will be all right. If there are more than thirty ewes the ram should be two years old. The ram selected will depend upon the type of ewes in the flock. If the ewes are small and light-boned, a heavyweight and heavy-boned ram will be needed. A ram with more refinement should be used if the ewes are coarse-boned and rangy.

HANDLING STOCK MADE EASY

Big Crate Built on Flat Rack Enables Farmer to Haul Animals Without Fear of Injury.

The accompanying illustration shows a hog rack devised by an ingenious Illinois farmer and in successful use on his big farm. After several years' experience with it he maintains it is the best thing of its kind he ever saw.

It is simply a big hog crate built on a flat rack. The framework is laid out exactly like a hog rack and the

Hog Crate on Rack.

floor laid level on top of the bolsters. The picture shows how the crate or rack was built on this floor.

There are two partitions with hinged gates. This admits hauling several different classes of hogs and also prevents the animals from piling up on each other in transit, a difficulty so frequently encountered and sometimes a source of loss. You can put on as many hogs as you can haul. There is no danger nor particular difficulty. The ordinary loading chute is used—Farm and Home.

WATER SUPPLY IN PASTURES

Nothing But Absolute Starvation Pulls Animals Down in Condition Faster Than Thirst.

Look to the water supply in the pasture and see that no animal suffers for want of it. Nothing but absolute starvation pulls them down in condition faster than thirst. In the very hottest and driest weather horses get little good in the field unless they have thickets and woods to stand in, to get away from flies.

TRIM HORSE'S HOOF EVENLY

Best Instrument for This Purpose is Rasp—Keep Hoof Oiled if It Has Tendency to Crack.

A horse is just as good as his feet, and these should be given special attention; the hoof bears the same relation to the horse that the fingernail does to man. In the matter of care, and should be kept trimmed evenly. The best instrument for this purpose is the rasp. If the hoof has a tendency to crack it should be kept oiled.

There are a lot of us careless about providing for the preacher and his family. Some of us seem to forget that his needs are just as real and urgent as our own. Are you prompt with your tithes?

(TO BE CONTINUED.)

It is better to be able to turn your hand to anything than to put your foot in it.

FARM ANIMALS

DISEASED HOOFS OF CATTLE

One Trouble Caused by Excessive Wet Weather Is Hard to Manage—Is Not Contagious.

Not all hoof disease in cattle is the "hoof-and-mouth disease." There is one form of hoof disease which is especially hard to manage, which is caused by excessively wet weather and cattle having to be almost continually in the mud. We had a case of this kind this spring, says a writer in an exchange. The inner parts of the hoofs become very sore and tender and will finally become rotten, if not cared for in time.

We had a veterinarian prescribe treatment. This was kept up for a time without apparent results for the better. Then being very busy at corn planting time, the treatment was neglected and the animal got so it would walk on the toes, the back part of the hoof was so tender. We again tried the treatment, but the animal got worse and worse until it was a walking skeleton and could no longer stand up, when we put it out of its misery and dug a hole for the remains. We know this was not contagious as the other cattle were not affected in the least.

RIGHT THINNING AIDS TREES

Helps to Produce Marketable Fruit and Secures Best Selling and Most Profitable Crops.

Proper thinning helps trees to produce marketable fruit each season; tends to avoid danger of alternating crops. Secures best selling and most profitable crops.

Care should be used by pickers not to break off the fruit buds for the following year. Never allow the orchard boxes, filled with the fruit to stand in the sun.

Where possible, pick fruit during the coolest part of the day.

Picking at proper time is just as important as any other part of the work.

Fruit picked too early is usually unfit for food.

Fruit picked too late is usually too ripe for shipment.

Apples picked after heavy frost do not hold up well.

Rain on fruit that is maturing injures the keeping quality.

Care should be exercised in picking the different kinds of fruit so the marketable qualities will not be injured.

Proper packing is just as important as proper sorting, for a good neat pack helps sell the fruit.

SPRAY FOR SAN JOSE SCALE

First Summer Application for Apples Should Be Made Just Before the Tree Blossoms.

If apple trees have San Jose scale, scurfy or oyster shell scale, spray while the trees are dormant with a commercial sulphur solution at the rate of one to eight gallons of water. The first summer spray for apples should be applied just before the trees blossom, at a time when buds are showing pink, but before they have opened. This spray should consist of lime-sulphur at the rate of one to forty gallons of water, and to this mixture add arsenate of lead at the rate of two pounds to 50 gallons of water. These two materials should be mixed together, the lime-sulphur being a spray for apple scab, codling moth and curculio.

The second summer spray should be made immediately at the fall of the bloom, that is, after the blossoms have

been pollinized, with the same mixture as for the first spray. This spray is for apple scab, codling moth and curculio.

The third summer spray should be applied about two weeks after the second. This spray is also for the control of apple scab, and any codling moth or curculio that may still be working on the fruit. If the owners of apple orchards in Illinois will follow out the methods of spraying, use the materials mentioned, apply them thoroughly and at the proper time, they will have little difficulty in raising fruit free from fungus spots or insect injuries.

ORCHARD IS FARM NECESSITY

Place Without Fruit Trees Is Not Considered Charming Site for Home for Family.

A farm without an orchard cannot be considered a very charming place on which to make a home and bring up a family. There ought to be an orchard, even if but a small one, on every farm; and not only apples, but other fruits should be grown, because, even if not grown extensively enough to market, they add wonderfully to the comfort and enjoyment of the family.

CLASSES OF FRUIT GROWERS

One is Man Who Depends for His Living on Fruit He Grows—Others Are Indifferent.

There are three classes of fruit growers: 1, the man who depends for his living on the fruit he grows; 2, the man who has a few trees in some out-of-the-way place and who takes what the trees produce and is thankful for it; and 3, the careless farmer who considers a fruit tree nothing more than any other tree.

CLIMBED STAIRS ON HER HANDS

Too Ill to Walk Upright. Operation Advised. Saved by Lydia E. Pinkham's Vegetable Compound.

This woman now raises chickens and does manual labor. Read her story: Richmond, Ind.—"For two years I was so sick and weak with troubles from my age that when going up stairs I had to go very slowly with my hands on the steps, then sit down at the top to rest. The doctor said he thought I should have an operation, and my friends thought I would not live to move into our new house."

to try Lydia E. Pinkham's Vegetable Compound as she had taken it with good results. I did so, my weakness disappeared, I gained in strength, moved into our new home, did all kinds of garden work, shoveled dirt, did building and cement work, and raised hundreds of chickens and ducks. I cannot say enough in praise of Lydia E. Pinkham's Vegetable Compound and if these facts are useful you may publish them for the benefit of other women."—Mrs. M. O. JOHNSTON, Route D, Box 190, Richmond, Ind.

No Duplicates. He—'I'd like to marry a girl like you.' She—The edition is limited to one copy.—Judge.

Granulated Eyelids, Sties, Inflamed Eyes relieved over night by Roman Eye Balsam. One trial proves its merit. Adv.

After a man has acquired a reputation for wisdom he can say silly things and yet his friends will applaud them as wisdom.

IT IS IMPERATIVE that you keep a bottle of Mississippi Diarrhea Cordial in your medicine chest. In constant use for fifty years. Price 25c and 50c.—Adv.

When the Statue Nodded. Before he attained to the front rank in his profession, Fred Kitchen, the famous comedian, used to tour Europe in an aerobatic turn with a partner named Royal.

One week they were at the Eldorado theater, Naples, and after the performance they went for a stroll along the famous embankment, known as the Waterfront.

"Pretty soon," said Fred, in telling the story, "we reached a statue, and lo! it nodded gravely toward us."

"Did you see that statue nod?" said my partner.

"I certainly did," said I.

"Well," said he, "I'm going back to the hotel and to bed before I get run in. It's that confounded Capri wine."

"So, ashamed of ourselves, back we went, and sneaked up to bed."

"But at breakfast time next morning both of us seemed to be amazingly fresh considering our dissipation of the night before, and we could not understand why we had such good appetites until the waiter said: 'Did the gentlemen feel last night's slight earthquake?'"

Oh, That's Different. May—Has Mr. Eaton declared his intentions? Dora—Yes. May—What did he say? Dora—He declared in a most decided manner that he would never marry.

Subject to Approval. The Nurse—What do you think of the new twin babies? Little Ethel—Are they real goods or just samples to select from?
