THURSDAY, OCTOBER 11, 1928

TOWN BUILDING

After having scanned our exchanges closely and found nothing that we can "swipe" we fear that we shall have to write an article ourselves and we take for our text that far from exhausted subject: "Town Building." Now, to begin with, we want to say that Hagerman is above the ordinary as a small town—but natural conditions would warrant the building of a city thrice the size of Hagerman, and such a city will be built if we get busy building and boosting.

Here is an extract from a poem we have in our scrap book that contains "more truth than poetry," as Solomon used to say: "Real towns are made, by men not afraid that others will get ahead. Where everybody works, and nobody shirks, you can raise a town from the dead." Hagerman is by no means dead, nor even sick—yet a little more life would mean growth and development. Below are only a few of the many things that could be done to bring more people to our town and increase our population.

Build more rent houses. People are not coming here unless they can find a place to live.

Build a large and modern hotel and pipe mineral water into it.

Build a small sanitarium to begin with, and equip it with mineral water baths. From a small beginning this sanitarium will grow into a large institution.

Go after and get a cotton mill to spin the cotton produced in the valley for shipment to weavers in other states. There is no need of shipping the raw cotton out when the thread could be shipped cheaper, and a portion of the money spent for manufacturing be left here.

Encourage the farmers to go into the production of vegetables and get a canning factory here.

All this and much more is possible—if we get busy and try to do it. "Not Failure," saith the poet Lowell, "but low aim is crime;" and we believe in towns as well as individuals aiming high. Boost—boost—boost. Tell the pop-eyed world of Hagerman and the opportunities that await them here.

HORSE NOT DOOMED

With the invention and the introduction of the automobile, tractor and other machines to take the place of the horse it was thought that he was doomed, but lately horses and mules are staging a comeback, and within a few years they, no doubt, will be in as great demand as ever.

True, we will never see harness horses in common use as they were a few years ago, but the saddle horse, draft horse and mules are coming back, slowly but surely.

The tractor is all right on large wheat farms, but you can't raise gasoline to keep it going, and you can raise your "fuel" for the horse and mule on the farm, and you don't have to get a mechanic to start horses and mules, sometimes you need help to stop the mule, but not often. On the smaller farms a tractor will not pay and but few small farms have bought them.

In the eastern states the fad of horse-back riding has again come back and saddle horses are now bringing good prices. The city man gets more pleasure from riding a good saddle horse than he does from driving a car, and have again stocked their stables.

Horse racing has been practiced since the dawn of civilization, but people still like to see 'em run, and though auto races for a time threatened to take the place of thoroughbreds, the horse has again come in to his own, and more and better race horses are being raised than ever.

It seems now that horse raising is an unprofitable business, but within a few years the colts raised now will sell for a fancy price.

A DIPLOMAT

A recent press report from Washington says that a foreign diplomat in Washington is allowed to bring in all the liquor he wants for his own use, which includes liquid refreshments for entertainments and social functions. This may be news to some but not to all.

On his own premises a foreign diplomat may serve whiskey to his guests by the barrel full if he likes, with just as much propriety as if he were in his own home overseas. If he wants to send liquor off his own premises nobody can interfere, if the messenger is of diplomatic retinue.

The fellows away from Washington who engage in the liquor business, known as bootleggers in the rough tongue, must be domestic diplomats.

We have been asked dozens of times lately if Hagerman's mineral water could be bought in bottles instead of five-gallon jars as now sold by a few individuals from Roswell who come down in cars and haul it up there and peddle it. People would use more of this water if it were bottled and shipped.

Now that the Cotton carnival is history we can all go back to our discussion of politics.

HOW IT WILL GO

(By Frank Sullivan)

Governor Smith, in my opinion, will win the election in the following manner:

Roughly speaking, there are 25,000,000 voters in the Republic. Of this number 10,000,000 are married. Now the 5,000,000 wives in this group will tell their 5,000,000 husbands how to vote, which will cause the husbands to get out and vote the opposite way. Likewise the husbands will tell their wives how to vote, with the same result, so the net result will be that all the wives will be voting opposite to all their husbands, which will automatically cancel those 10,000,000 votes unless some one has committed bigamy.

We therefore have only 15,000,000 to consider. Will Beebe, the naturalist, will vote for Smith on account of the New York governor's zoo, so that we now have only 14,999,999 votes to consider.

These votes are mostly those of republicans or democrats. Now, unless the elections of Harding and Coolidge were just a couple of terrible nightmares, the republicans have had a majority in the national elections during the eight years. Correct us if we are wrong.

Of the republicans, Dr. Nicholas Murray Butler has shown signs of voting for Smith, but those other republicans, the Messrs. Harry Daugherty, Albert B. Fall and Harry Sinclair will vote the straight republican ticket.

On the other hand, Mrs. Clem Shaver, wife of the former chairman of the democratic national committee, will vote for Hoover. In other words there are no party lines this year.

Let us therefore assume that all the republicans will vote for Smith and all the democrats and all the democrats for Hoover, except in the solid south, which will remain democratic.

In that case, assuming that the republicans generally get what they want in national elections, we may safely predict that Smith will win by twice as many votes as Cox and Davis lost by, divided by three and reduced to the least common multiple.

CAN YOU STOP IN TIME?

(Highway Department)

"Sixty-six feet per second—that is the distance you are traveling every second if you are doing 45 miles."

If you have two wheel brakes you cannot stop under 137 feet, which is three times the distance from fence to fence across the road. If you have four wheel brakes and good fortune you may be able to stop within 124 feet, which is twice the distance across from fence to fence. Figures recently compiled show that at 10 miles per hour a car travels 14.66 feet per second; 15 m. p. h. 29.33 feet per second; 30 m. p. h. 44 feet per second; 35 m. p. h. 51.33 feet per second; 50 m. p. h. 73.33 feet per second.

If you are doing 50 miles per hour and everything is in perfect order, the road dry, brakes good and everything in tip top shape, including the driver, it will take a city block in which to get stopped. At 75 feet per second do you wonder that your car can be off the road, in the ditch, upside down and you dead inside of a single second?

Many drivers have a sense akin to divine prescience when it comes to estimating almost the exact spot where two approaching cars will be at the moment of passing. Perhaps you are one of these drivers. If so, you may be safe 60 per cent of the time but as soon as fatigue begins to operate this sense becomes dim and inaccurate to a point where that cry so common after an accident is heard, "I misjudged the distance."

Study the figures given above and then practice seeing how quickly you can stop just before a dangerous curve, railroad crossing, wagon in the middle of the road or other obstacle. You will no doubt be surprised to find the distance it takes you to stop unless your brakes and all mechanical parts of your car are in perfect working order. Even then at 66 feet per second the point is can you stop in time?

CHEWING GUM IS UNGRACEFUL HABIT

(State Health Department)

Chewing gum is a useless and unpleasant habit, remarks a writer in Hygeia for October. It is something that cannot be done gracefully and may destroy the most charming face. Many salutary effects are claimed for chewing gum, but in most cases it is chewed for the sake of chewing. It appears to supply emotional expression for the habitual chewer that he can derive from nothing else. It does not produce any serious effects, but it is a social drawback. The woman of social poise and the man of business stability do not conclude their receptions and conference with the question, "Now where did I park my chewing gum?"

BARNUM WAS RIGHT—BUT THE BIRTH RATE HAS INCREASED

Noting in the papers where they were now selling the wood from the old roof of the White House at Washington, we are reminded that Barnum said: "There is a sucker born every minute." However, the birth rate seems to have increased in late years.

Of course this timber may be the real thing, and we are not expressing a doubt about it, but we are not in the market for any of the roof. When all this timber is gone there will still be parties peddling what purports to be part of this roof.

There have been enough "pieces of the cross of Christ" sold to build a fair sized city.

Three trains would not hold all the parts of the Charter Oak that have been sold.

Millions of copies of the "original" Ulster County Gazette carrying an account of the death of George Washington have been sold, and though the typesetting machine has been in use less than fifty years, we have seen copies of this paper that were set by linotype.

We once saw a gavel made from a tree cut from Lookout Mountain, near Chattanooga, Tennessee, with a bullet hole in it, supposedly fired by Federal Soldiers during the Civil War, but close examination showed the hole to have been bored with an auger.

If you want any of the roof from the White House, buy it before the original supply is exhausted.

E. P. Reavis, Hagerman Messenger editor is a consistent booster for Hagerman's mineral water. It looks to us like Reavis is a wet editor, but we hope nobody stops their subscription on this account.—Artesia Advocate.

Textile Things

Everyone who has tried to buy "all wool" at the store has usually met with difficulty, and the federal trade commission at Washington has been exposing fraudulent claims of merchandise of this kind and trying to correct the abuses resulting from false advertising and dishonest merchandising.

Ruth Ridenour, writing for Liberty magazine, describes how synthetic chemistry has stolen another march on mother nature and she observes that among the twentieth century high spots we have invented machinery to supply our growing needs, which accounts for airplanes designed to surpass eagles' wings, and for weapons of war deadlier than the lion's jaws, and such things. Miss Ridenour says that the chemists worked for 60 years to make silk fibre without the aid of the silk worm. In the end the triumphs of synthetic chemistry was represented in rayon.

It is rather surprising to learn that more cotton dresses were made and sold in the United States during the summer of 1928 than in 1927, but this may show how smartly dressed American women are filling out their wardrobes without cutting down the supply of more expensive garments.

Two piece frocks have not gone out of business as many of them are offered by the best merchants for the early fall and late summer.

Ribbons are striding forward in the fall fashion parade. As trimming one sees them on gowns for evening and sew fast as braid on daytime frocks, but it is in the realm of millinery that they are greeted with greatest acclaim. Brilliant ribbons made of super-lustrous rayon threads in stripes and plaids interwoven with gold and silver tinsel are very popular.

One of the services of dame fashion for fall is a charming balancing of side draperies on skirts with side jabots on blouses. This type of frock is usually created in soft crepe, satin or georgette.

AL SMITH CLUB AT LOVINGTON

J. B. Muncy returned from Lovington Monday afternoon and reports that an Al Smith for President club had been organized at that place Monday morning. The club begins its activities with 150 charter members. Mr. Muncy reports and a canvass of the business section of Lovington is being made and more members are being added.

Liza—What yo calls it when a gal gets married three times? Am dat bigotry?

Rastus—Oh, Liza, yo certainly am ignoramus. When a gal gets married twice, dat am bigotry, but when she gets married three times, dat am trigonometry.

Masterpiece Bodies by Fisher--The entire
country is saying, "That's the Style"

Setting an entirely new, a revolutionary, style—introducing what will unquestionably be the trend of smart body-design during the next several years—the new Bodies of the Silver Anniversary Buick are enjoying universal acclaim as the most original and distinctive, as well as the finest and most beautiful ever created by the world-famous Fisher organization!

Here is not only a new car but a new vogue—a vogue of symmetry, born of graceful contours instead of straight lines—a vogue of distinction, derived from sparkling colors, brilliant chrome-plating and artistic design—a vogue of tasteful luxury, composed of finest materials, velvet upholstery, artistic hardware and fittings and every appointment of comfort and convenience.

The entire country is saying "That's the style!"

DEXTER NEWS

Mrs. J. H. Southard, of Artesia, was in Dexter Friday.

Jim Caffell and P. P. Clark were in Roswell on business Monday.

R. L. Butler and family, of Odessa, are visiting Rev. Jones this week.

Mr. and Mrs. Roy Bailey were Roswell visitors Saturday afternoon.

E. B. McCaw visited his mother and other relatives at Artesia Sunday.

Mrs. H. H. Harris, who has been quite ill for the past week, is improving.

Dexter had the honor of winning first prize with her booth at the Cotton carnival.

Mr. and Mrs. S. Robinson attended church at the Church of Christ, in Roswell, Sunday night.

Mr. and Mrs. VanArsdol, of Hagerman, were visitors in the Roy Bailey home Sunday afternoon.

Chas. C. Fuqua, of Roswell, will begin a revival at the Church of Christ next Sunday, October 14th.

Joe Winkler, Mrs. P. P. Clark and Mrs. J. A. Winkler went to Roswell Friday to see the Old Timer's parade.

Miss Minnie Campbell attended the carnival at Roswell the latter part of last week, and visited with Miss Claris Clemons.

The small daughter of P. E. Janning, fell and broke her arm a few days ago, while playing on a horse trough at her home near here.

Mrs. Caruthers will give a quilting at her home next Wednesday for the benefit of Tipton's orphan home. A big dinner will be served those who attend.

The Bible class of the Church of Christ met at the home of Mrs. Cole last Thursday to entertain her aged father. Cake, sandwiches, coffee and watermelon were served.

ORDER CREATING DEXTER GAME REFUGE

Under authority conferred upon it by law, the Game and Fish Commission of the State of New Mexico, does this 21st day of August, 1928 decree that the following described area, to wit:
Sec. 16, Twp. 13 S., Rge. 26 E., situated in the County of Chaves, State of New Mexico, is declared to be a State Game Refuge in which game animals and birds may breed and replenish adjacent hunting grounds.
BY ORDER OF STATE GAME COMMISSION
E. L. PERRY,
State Game and Fish Warden
Secretary State Game Commission.
41-1t.

VALUABLE ADDITIONS TO AGRONOMY STAFF

Two men have recently been added to the personnel of the Agronomy department of the New Mexico college of A. & M. Arts; one in the plant breeding and another in soils. Dr. G. N. Stroman will take charge of the newly created position in plant breeding, and at present will devote all of his time to cotton breeding and to the study of the various problems concerned with cotton improvement. Dr. Stroman is a graduate of the Texas A & M. college and has obtained both his Master's and Doctor's degree at the University of Wisconsin, where his major work was in botany and plant breeding. For a time he was instructor in botany and genetics at the University of Wisconsin, and for a period of several years was engaged in plant breeding work with the Texas experiment station, his work being with corn and cotton, but primarily cotton. For the past three years Dr. Stroman has been running his own farm in Texas where he has been continuing his cotton breeding work in a practical way. He is the author of several bulletins on cotton and also several scientific articles on various problems of genetics. Professor James E. McKittrick, who takes charge of the soils work in place of Professor V. Jordan, who recently resigned, comes from the University of Illinois, from which institution he is a graduate, and he has also received his Master's degree in soils fertility at that institution. He is especially trained in problems pertaining to soil fertility and soil chemistry. For three years he has been assistant in the soil experimental fields of the Illinois experimental station, which work has been valuable training for his work in New Mexico. The college is very fortunate in securing the services of these two men.

REVIVAL TO BEGIN AT THE DEXTER CHURCH OF CHRIST NEXT SUNDAY

C. C. Fuqua, minister for the Church of Christ at Dexter will begin a revival meeting for that church next Sunday, October 14. On Sunday there will be three sermons; one at 11 o'clock in the morning; one at 3 o'clock in the afternoon and another at 8 o'clock in the evening. Basket dinner will be served that day, and everyone is invited to come and bring a well filled basket. The meeting will continue through the week, if not longer. A cordial invitation is extended to all to attend these services.

DEXTER NEW MEXICO (By F. L. Melhop)

In the Dexter and Greenfield communities rivalry between cotton and alfalfa has been keener than elsewhere in the Pecos valley. In other sections the supremacy of cotton as a money-maker for the grower has been generally conceded, especially since the falling off of alfalfa yields.

Endowed by nature with soil and other advantages that gave the Dexter section supremacy in alfalfa production for the valley, its farmers were slower to take to cotton growing. The crop that had lifted mortgages in the past was good enough.

This rivalry between the two crops still persists, with cotton perhaps having the edge over the legume crop in a normal year, but with plenty of farmers still loyal to their first love and with many cotton growers insisting that they want to get into alfalfa production as soon as possible.

Although buffeted by hail storms, hot winds and severe droughts during the summer just passed, cotton still continues as apparently having a slight advantage over alfalfa as a money crop. In addition to the hot winds and unusual aridity that visited the valley, the Dexter section was visited by two hail storms that severe toll from the cotton fields, in some instances destroying entire fields.

In spite of these hardships, present indications are that the largest crop of cotton in its history will be harvested in the Dexter and Greenfield sections this fall. This will be due to increased acreages, as well as more than average yield per acre. The Dexter public schools, under the supervision of Prof. J. I. McCullough, are all that could be desired. Eighteen teachers are employed, and the youth of the community have exceptional educational advantages.

THE DUSKY PEDANT

Lawyer: "Can you tell me if the defendant was expensively garbed?"
Rastus (a witness): "Deed she was, sah. Ah knows expensive garbage when ah sees it."

Miss Doris McVickers was a week end guest of Miss Gwendolyn Haynes of Roswell.

Miss Alma Thompson was a guest of Miss Georgia Zink during the Cotton carnival.

Mr. and Mrs. Tommy Wayne and Misses Hazel and Naomi Gainer from Tatum were Dexter and Roswell visitors during the carnival.

Mrs. E. Burrows and children returned last week to their home in Clovis after several days visit with Mrs. Burrows parents, G. W. Clark and family of Greenfield.

The Dexter public schools were turned out Wednesday, Thursday and Friday for the Cotton Carnival. A large majority of the directors, faculty, pupils and patrons attended and enjoyed all four days.

P. T. A. MEETING

The P. T. A. met Tuesday afternoon October 2nd, at the school auditorium. After a short business meeting the following program was given: The first grade pupils of both Miss Thomas and Mrs. Goodin sang two very pretty little songs. Mrs. George L. Reese of Roswell favored the P. T. A. with an address the subject of which was, "What the P. T. A. can do for mothers and what the mothers can do for P. T. A." Mrs. W. A. Hamilton of Lake Arthur talked on "What the Lake Arthur P. T. A. is doing."

As this was the first pep meeting of the year delicious chili was served to a large attendance.

START ROSWELL-DEXTER OIL SURFACING SOON

Preparations for oiling the Roswell-Dexter highway are now under way. The contractor is on the job and is stripping the Hagerman pit where crusher is set up. Operations were expected to start yesterday.

This project marks and innovation in the oil surfacing work of the highway department in the fact that surfacing and oil are pre-mixed at a central plant and are hauled to the road and laid down without the constant working of the turn-over method which was used on previous oil projects. Highway officials say that this method is particularly suitable for winter use as it would be impossible to get a thorough mix by placing the oil directly on the road as is done in the summer time. Under the pre-mix method the oil and the surfacing are combined at a high temperature at the mixing plant and then hauled to the road where the material is hand spread and later worked with a grader. Sixteen and four tenths miles are to be oiled on this project.

We have some nice pictures. See them at Teed's. 41-2tc

CHRISTIAN CHURCH
C. C. Hill, Pastor.

The sermon subject for next Sunday morning, Oct. 14, will be: "The kind of preaching the world needs today." The pastor will present a subject which is of thrilling interest just at this time. Why not hear him? Bible school at 10:00 o'clock. Preaching at 11:00 o'clock. Come, a cordial welcome awaits you.

IF BRYAN WERE NOW HERE; DOW TANGLED; HANNETT AND CRILE

(By the Republican State Central Committee)

If William Jennings Bryan were alive today, whom would he be supporting for president?

Thrice the candidate of the democratic party for president, and for more than a quarter century its trusted leader, Mr. Bryan would today find it difficult, if not impossible, to support his party's ticket.

Two incidents in his political career throw light on what course Mr. Bryan would take today.

The first was in July 1912, at the Baltimore convention. Mr. Bryan, elected from Nebraska to support the candidacy of Champ Clark, of Missouri, found himself constrained to arise and with whitehot eloquence denounce that candidacy, because the support of Tammany had been enlisted for it. Because Mr. Bryan would not stand for a Tammany-nominated candidate, the convention finally turned to Woodrow Wilson.

Bryan's Declaration
The second was in December, 1916, a great dinner was held in Washington in celebration of the second election of Mr. Wilson. Among those who spoke was Mr. Bryan. Then, as on so many other occasions, he rose to the heights in his appeal to the moral impulses of his hearers. In the course of his speech he said:

"When an issue is born it must be met; the prohibition issue is here. The line is drawn and parties as well as voters must take their stand on one side or the other, on the side of the home, the citadel of the people, or on the side of the saloon, the greatest enemy of the home. There is no middle ground.

"This is the greatest moral issue of this generation; our party cannot afford to take the immoral side of it, it will not do so. All I am in politics I owe to the democratic party; I love it too well to remain silent when an effort is being made to commit it to the championship of the breweries, the distilleries and the saloons. Its success, its very life, depends upon its being right; we cannot permit it to die of delirium tremens or to be buried in a drunkard's grave."

There can be little doubt that Mr. Bryan, if here today, would range himself along with Senator Simmons and other democratic leaders of similar convictions against the present democratic ticket.

Bob Dow

Bob Dow, democratic candidate for governor, is tangled in his own rope. Dow boasts of his ability as a cowboy and tries to imitate Will Rogers. But when he is among real-to-goodness cowboys they think of him as a lawyer. When among lawyers they think him a cowboy, especially since he expressed the opinion that a \$3,000 lawyer could handle New Mexico's interests in the Colorado river project. New Mexico's interests, measured in dollars and cents, are beyond computation. They run into hundreds of millions of dollars, if not into billions.

The other states immediately interested have the best talent each of them can secure.

Bob Dow, if elected governor, would put those interests in the hands of a lawyer who is willing to sell his services for a salary of \$3,000 a year. Few lawyers whose practice is limited to justice of the peace cases make less than that sum.

Hannett At It Again
Former Governor Hannett makes an attack upon Dr. A. D. Crile because Dr. Crile, when president of the agricultural college incurred a deficit.

The World War was on. The Federal government was sending 250 men each two months to be trained in road construction, bridge building and cement work.

A dormitory was destroyed by fire. The Legislature could not be called in extra session. The board of regents, composed of among the ablest and most patriotic men of the state, ordered Dr. Crile to spend the money necessary to meet the conditions. He did it. No dollar was wasted.

Hannett, when governor, and when there was no war, incurred a deficit of \$378,000. He, like Dow, is tangled in his own rope.—Political Advertisement.

FOUR NEW CLUBS IN N. M. FEDERATION

GALLUP.—Four new clubs will be added to the New Mexico Federation of Women's clubs at the annual meeting to be held in Gallup October 15 and 16.

The new clubs will be the Alladin Junior club of Canutillo, the Women's Civic club of Mountainair, the Women's Home and Civic club of Tatum and the Junior Civic club of Clovis.

A luncheon in honor of the new clubs is being planned, at which Mrs. Tom Charles of Alamogordo, vice-president of the state organization will preside. A flag contributed by the Albuquerque Women's club will be presented to the district having the most new clubs.

Dine and Dance Frocks Flaunt Huge Bows

Bows, huge bows some with long trailing ends to be caught up and held in the hand while dancing, thus does fashion issue orders in regard to midday's evening frock. The bow which lends its flattering presence to the black velvet dinner frock in the picture is really quite modest as to dimensions and bouffancy, compared to some.

FOUR MILLION FISH WILL BE PLANTED THIS FALL & WINTER

More than four million fish will be planted from the state fish hatcheries this fall and winter, according to E. L. Perry, state game and fish warden. Nearly two million have already been liberated in the streams and lakes, and the fish trucks are running day and night in an effort to get the huge crop of young trout out before bad weather sets in.

The fish are transported for the most part at night because of the cooler temperature, and in addition are heavily iced. Trout are very sensitive to changes in temperature and environment and the utmost care must be exercised in hauling them from hatchery to stream to avoid loss. All of the output of the hatcheries are transported in the department's own trucks and planted by trained men in order to insure the best results. In many states fish are delivered to individuals or clubs for planting, but while that practice materially reduces the cost to the state, the proper planting of trout calls for a high degree of skill and experience which is seldom found outside of the personnel of the department.

The fish being planted this year will average about 3½ inches in length, and are amply able to take care of themselves when liberated. The cost of producing and transporting such fish is far greater than that of the fry which were universally planted a few years ago, but the game department estimates that some 80 per cent of the larger fish survive the transplanting experience while but 15 per cent of the fry were able to live.

The department is preparing to hold something more than a million fish over the winter in the hatchery ponds for planting next spring, and will gradually work toward the production of larger fish, especially for heavily fished streams. Such streams, Mr. Perry contends, do not produce sufficient food to raise the tremendous number of fish demanded by the anglers from fingerlings to legal size, and the only solution is to raise the fish in ponds where they may be artificially fed until they approach catching size.

SOUSA AT ALBUQUERQUE

ALBUQUERQUE, Oct. 7.—John Philip Sousa, famous march king and dean of American musicians, has written a march, "New Mexico" which will be played for the first time when his 100 piece band appears at the University gymnasium, Albuquerque, Nov. 13. The engagement is under the management of Kyle S. Crichton, of Albuquerque.

The march "New Mexico" contains strains from Spanish and Indian melodies and from "O Fair New Mexico," state song. It was written at the request of Governor R. C. Dillon, Dr. J. F. Zimmerman, of the University of New Mexico, Mayor Clyde Tingley, of Albuquerque, and others. It will appear in regular Sousa programs after being played in Albuquerque. It will also appear as a piano number. It is one of the three marches composed by Comander Sousa this year, and is a great honor to New Mexico. It is hoped that it may be adopted as the state march. Comander Sousa's appearance in Albuquerque will be the only one in New Mexico.

Wife.—"You think so much of your old golf that you don't even remember when we were married."
John.—"Surely I do. It was the day after I sank that thirty-foot putt."

ACALA SEED TO BE CERTIFIED

George R. Quesenberry, state agronomist and secretary of the New Mexico Seed Association, was here Friday and Saturday and with County Agent W. A. Wunsch, visited a number of cotton fields of the project for the purpose of locating cotton seed which could be certified.

Eleven fields including about 1,200 acres, scattered over the project from Carlsbad to Malaga, in which the California acala seed had been planted, were selected as running true and uniform to type and the seed from them will be admitted to certificate.

The Eddy County Seed Association has ordered a supply of new sacks and will supervise the handling of the seed to keep it clean. New sacks, care in ginning and storage are all factors required for certificate. When the seed is sacked, each sack will be sealed and certified by Mr. Quesenberry. It is estimated that this acreage will produce about two carloads of certified seed above that needed for local demand.

Certified seed is selected from fields which are at least an eighth of a mile from fields of other varieties, preventing danger of mixture. Besides the fields on this project, there is one field grown from this seed at Artesia.—Current-Argus.

THE NAILPICKER GETS A TON OF METAL

CLOVIS.—The state highway nailpicker working in this vicinity has gathered almost a ton of nails and other metal from the roads. From here to Portales 280 pounds were gathered; from Clovis to Texico 751 pounds; from Clovis to Grady 492 pounds; from Clovis 10 miles west 237 pounds.

THE LAST DOSE OF SUMMER

We seem to be having the last dose of summer before winter sets in, and "Old Sol" certainly is giving us a good dose of it while he is at it. This is the season of the year for Indian Summer, usually characterized by hazy weather, especially in the eastern states, but nothing obscures the sun these days, and it is certainly hot.

If the weather keeps on like this for another thirty days the cotton will mature and the yield will be materially increased.

COTTONWOOD ITEMS (Miss Alma Bradley, Reporter)

Miss Leonora Bradley spent last week end in Roswell with Miss Myrtle Carpenter.

R. R. Smith and son have returned from a trip to Childress, Texas, where they have been visiting.

Mr. and Mrs. Ollie Fore and brother Carl, of Las Vegas are visiting at the home of Mr. and Mrs. J. I. Funk.

Mr. and Mrs. Kemp and children of Pampa, Texas are visiting at the home of Mrs. Kemp's mother, Mrs. Ray.

The date of the box supper to be given by the Cottonwood schools has been changed from October 9 to October 19.

Mr. and Mrs. J. I. Funk invited a few friends to an entertainment Tuesday night honoring Mr. and Mrs. Ollie Fore.

Mr. and Mrs. Ben Briscoe and children of Memphis, Tennessee, formerly of Cottonwood, have returned and are visiting relatives of Artesia and friends of this community.

Misses Mable Vowell and Ruby Jenkins teachers of the Upper Cottonwood, spent last week end in Lakewood visiting at the home of Mrs. R. L. Larmore. Miss Katie Cowan visited in Roswell.

HICKMAN DENIED APPEAL TO SUPREME COURT

WASHINGTON.—William Edward Hickman, of Los Angeles, under a sentence of death on October 19 for the murder of Marion Parker, 12 year old school girl, was Monday denied an appeal to the supreme court by Justice Sutherland.

"But doctor how can I drive a nail without hitting my fingers?" asked the confiding young bride after the bandage was adjusted.
"Hold the hammer in both hands," he advised.

STATEMENT OF THE OWNER-SHIP, MANAGEMENT, CIRCULATION, ETC., REQUIRED BY THE ACT OF CONGRESS OF AUGUST 24, 1912

Of The Messenger, Published Weekly at Hagerman for October 1, 1928.
October 1st, 1928

State of New Mexico, §
County of Chaves §§.

Before me, a Notary public in and for the State and county aforesaid, personally appeared E. P. Reavis who, having been duly sworn according to law, deposes and says that he is the editor of the Messenger and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management (and if a daily paper, the circulation), etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in section 411, Postal Laws and Regulations, printed on the reverse side of this form, to wit:

1. That the names and addresses of the publisher, editor, managing editor, and business managers are: Publishers, Martin and Blocker, Artesia, N. M. Managing Editor, E. P. Reavis, Hagerman, N. M. Business Managers, Martin and Blocker, Artesia, N. M.
2. That the owners are: W. C. Martin, Artesia, N. M. and C. R. Blocker, Artesia, N. M.
3. That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, or other securities are: none.

E. P. REAVIS,
Managing Editor.

W. C. MARTIN,
Editor.

Sworn to and subscribed before me this 1st day of October, 1928.

Ruth Lanthrop,
My commission expires April 7, 1931.

Notary Public.

CHE-MODEL

BURRO CAUSE OF CAR UPSET

A burro, ambling his way down the road this side of Seven rivers, at midnight Friday night, caused a car accident which was serious but might have been much more serious.

Mr. and Mrs. W. R. Fenton were returning from the Cotton Carnival, accompanied by the daughter of Mr. and Mrs. Joe Lusk who was asleep in the back seat of their car.

When Mr. Fenton saw the burro it was so close he put on the brakes quickly. They grabbed and threw the car sideways into the ditch where it overturned.

Mr. Fenton's principal injuries were about his face and head, which were badly bruised. Mrs. Fenton had one rib broken and other bruises, while their little passenger had minor bruises.

Automobile drivers are reporting much loose stock on the highways, and a warning to be keenly alert for stock on the road at night might not be out of place.—Current-Argus.

Air and Sea Planes

Given the same power, an airplane can attain a higher altitude than a seaplane because it is lighter than a seaplane, and the landing gear offers less resistance to the air than the pontoons of seaplanes; thus, the airplane is capable of greater speed which governs the altitude obtainable.

WEEKLY BUILDING AND IMPROVEMENT NEWS

(Reported by Kemp Lumber Co.)

Chas. Michelet is building a new tenant house on his farm in the Buffalo Valley community.

The walls of the W. E. Bowen building on Main street are now complete and the roof will be on within a few days.

A number of good tenant houses are being erected in the Buffalo Valley community. Good tenants demand good houses—and good tenants are the only ones that pay.

E. G. How is building a nifty combination feed house and garage. Ed believes in taking care of his car as well as his feed, and is saving on constructing costs by combining the feed house and garage.

HEALTH NEWS

Chaves county reported twelve cases of diphtheria to the State Health Department for the week ending September 29.

Twelve cases of diphtheria in Chaves county places Eddy county's children in great danger. Parents are warned of this danger. Diphtheria can be prevented—Toxin-antitoxin prevents it—Toxin-antitoxin will not harm your child.

Take your children under ten years of age to your doctor or the county health officer and get them protected before it is too late.

HARP APPOINTED

Through the suggestion of Joseph E. Maddy, conductor of the National High school orchestra, E. L. Harp, conductor of the Pecos Valley orchestra has been appointed on Southwestern music supervisors conference committee to represent New Mexico. The conference will be held in Wichita, Kansas, April 3, 4, and 5, and orchestra program conducted by Mr. Joseph E. Maddy will be presented on Friday evening, April 5th.

LAKE ARTHUR ITEMS

(Mrs. Ned Hedges, Reporter.)

Nearly all of our citizens enjoyed one or more days of the Cotton carnival last week.

Mrs. Tom Ridgway and children visited two days last week with her parents in Roswell.

E. C. Jackson and wife are on an extended visit to Tulsa, and other Oklahoma points.

Mrs. B. C. Moots is spending several days in Belen visiting her husband and son who are employed by the Santa Fe there.

Mrs. H. A. Sims is attending the I. O. O. F. and Rebekah assembly at Albuquerque this week as representative of the Lake Arthur Lodge.

A delegation of Rebekahs including Mesdames Fern Russell, Grace Latta, Eva Crook and H. E. Sims visited the Artesia lodge last Monday night.

The football game Friday between the Lake Arthur High school and Carlsbad High school teams was an easy victory for Lake Arthur, the score being 12-1.

Carlos Sides and Tom Ridgway returned Saturday from the Ruidoso country, where they had meant to trap this winter. They report that prospects are unfavorable.

The Misses Opal, Nevada and Beatrice Rhodes joined a bunch of young people of Hagerman and attended a meeting of the young people of the Nazarene church at Tatum, Sunday.

Miss Velma Borschell was here last Tuesday and conducted the second class in kitchen improvement. At the close of the meeting a light lunch of lemonade and cookies was served to about twenty ladies.

The Methodists and Presbyterians enjoyed a spread dinner at the Presbyterian church Sunday. The affair was complimentary to Raymond Burdick who is organizing a young peoples society here, and had invited in a number of out of town leagues for the conference at 2:30 p. m. The program was as follows: Prayer, Clyde Nihart; Song Service, audience; Talk, Raymond Burdick; Song, Miss Vera Herby; Talk, Clyde Nihart; Short Talks, visitors; Song, Miss Vera Herby.

Son: "Pa, What is the difference between capital and labor?"

Pa: "Well, the money you lend represents capital and getting it back represents labor, my son."

ROB. DOW GARRIES HIS CAMPAIGN INTO HOME COUNTY TUES. NIGHT

Bob Dow, democratic candidate for governor carried his campaign to his home county Tuesday night when he spoke to a large audience at Artesia. Mr. Dow assailed the state administration on charge of an extravagant program and also charged that they had broken their promise in failing to give the state a business administration, an economic government and lower taxes.

He also charged that the republican administration had increased expenses in four of the largest state departments and in doing so were attempting to build up a political machine at the expense of the tax payers. Referring to the legal representative, Francis Wilson, employed to protect New Mexico's rights in the Colorado river controversy, he said that Mr. Wilson had charged the state \$10,000 for a service that the best legal talent would have been glad to accept for \$2,500.

Mr. Dow further charged that the highway department, the state's biggest financial institution had degenerated into a political football. "When I am elected governor I shall recommend that the state highway be taken out of politics," he said and further when I am governor I will not wait until a month before the election to start road construction, but will see that road construction is started the first of the year." Mr Dow also stated that the recent highway investigation brought out that New Mexico had been paying more for road machinery than any other state in the union.

Mr. Dow recommended a legal department for the state rather than a number of special attorney's for each department. "A legal department under the attorney general's office will save New Mexico \$25,000 to \$30,000 per year," he said.

Concluding his remarks he said, "I understand that some of you people are not going to support me because you say I bolted the ticket in years passed." At this point Mr. Dow reached in his pocket and brought out a list of present republican nominees, reading off the list all who had been formerly connected with the democratic party. The list included only about two members, who had not been aligned with the democratic party, he said.

Hon. John Morrow, candidate for reelection to the position of congressman at large, was the next speaker introduced. In the beginning Mr. Morrow gave a brief review of the lives of both presidential candidates and turning to some of his accomplishments in the national congress told of his efforts to bring back to the state its mineral rights on some nine million acres of land. Also his efforts in securing for the Carlsbad caverns national recognition and the appropriations which followed.

The latter part of Morrow's address was devoted to the discussion of the national issues. Mr. Morrow turned aside to pay tribute to Governor Alfred E. Smith. "Some are opposed to Governor Smith on account of his views on prohibition," he said. But we all know that the enforcement of prohibition has been practically a failure during the past seven or eight years, he remarked.

"Effective enforcement is a matter of education and must begin at home. We do not teach the harmful effects of liquor to our children any more," he said. "And that is one place we have fallen down. The bootlegging industry is the fifth greatest in the nation, according to one democratic speaker," Mr. Morrow remarked.

Mr. Morrow favors protection of the American farmer as well as the manufacturer and recommended the government warehouse system as an effective means of handling crop surplus.

Mrs. Lusk the last speaker, gave a brief outline of the remedies needed to correct the evils existing in our state school system and told of some of the things she would undertake to accomplish if elected to the position of school superintendent.

J.C. PENNEY CO. A NATION-WIDE INSTITUTION

"quality—always at a saving" 311-313 North Main St., Roswell

Silk Frocks

The Pronounced Fashion-Successes of the Season

\$9.90 and \$14.75

LOCALS

H. Olive was in Roswell Tuesday.

Prof. Martin, of Roswell, was a Hagerman visitor Friday.

Mr. and Mrs. Stanley Sigler visited in Hagerman Sunday.

Mr. and Mrs. E. T. Swisher have moved into the Mrs. J. C. Hughes residence.

Mrs. C. A. Stroud is spending the week in Carlsbad as the guest of her mother.

Fredrick Heitman had his tonsils removed at the St. Mary's hospital, at Roswell, last Friday. Tuesday the wound began to bleed profusely and he was again taken to the hospital, and is reported doing nicely.

James Doughtry formerly with the Lee Tire Sales Co., has accepted a position with J. C. Penny & Co., at Roswell. Mr. Doughtry was formerly with the Penny store, and his friends will be glad to know that he has returned to his old position.

Mr. and Mrs. W. Z. Thompson, of Blanchard, Oklahoma, are visiting in the W. Pardee home this week. Mr. and Mrs. Thompson are old residents of Hagerman, having left here some twelve years ago. Mr. Thompson says it looks queer to see cotton growing here, as cotton raising had not been thought of when he left.

Ingenious Trouble Saver

The last name in the New York city telephone directory is Zzyd. It is not a real name, but was adopted by a man who wanted to avoid being annoyed by unnecessary telephone calls. He tells his friends that they can reach him by calling the last number in the telephone book. That also saves him the bother of trying to remember his number.

Strength of Animals

It is impossible to name the strongest animal in the world, since some of the smallest insects have more strength in proportion to their weight than some of the largest animals. An ant, for instance, may carry a load fifteen or twenty times its own weight, while an elephant could scarcely drag twice its own weight.

"That Glorious Feeling"

Clare Briggs, celebrated cartoonist, says it really is a "grand and glorious feeling" to leave one's home in a Silver Anniversary Buick.

NEW YORK.—It really is a "grand and glorious feeling" to own a new car, whether the first or fifteenth, according to Clare Briggs, famous cartoonist. Briggs was one of the first New Yorkers to purchase a Silver Anniversary Buick sport roadster and enjoys the gleaming luster and newness of the car, he states, as much as a veritable youngster.

"The cars are surely distinctive," commented Briggs on the new body style create by Buick. "Naturally, curving lines are always beautiful and the new Buick style seems to be based entirely on the curve. They are graceful and smart.
