Hagerman—Where the most valuable mineral water in the Southwest flows from an artesian well in the city.

HAGERMAN, CHAVES COUNTY, NEW MEXICO, THURSDAY, JUNE 20, 1929.

NUMBER 25

DEXTER NEWS

ROSWELL GAS MAIN TO BE FINISHED BY JULY 20 SAYS REPORT

Workmen are making rapid progress on the construction of the eight inch gas main to Roswell. The line has been built passed Lake Arthur and the Pecos Valley Gas Co., expects to have the line completed into Roswell by July 20th. The feeder lines in the area of the Texas Company Robinson No. 1 have been completed, a five inch line will be connected with the main running toward Roswell when the main is finished. The Pecos Valley Gas Co., now has nineteen million feet of open gas flow available and expect to add seven million feet more to the flow, when the auxiliary line is completed. Three new wells recently drilled in the area of the Vandagriff well, northeast of Artesia, have been connected up.

—Artesia Advocate.

AT THE CHURCHES

CHRISTIAN CHURCH SERVICE

Regular services next Sunday at eleven o'clock. Preaching by the pastor. Special music will include a solo by Mrs. Opha Sturling. The Bible school will assemble at 10:00 a. m. Let all be on time.

C. C. HILL, Pastor.

HORTON WHITE WINS ATHLETIC AWARDS

Word has been received from Washington and Lee University, Lexington, Virginia, that Eugene Horton White, brother of Supt. E. A. White, who took his Master's Degree in June, received two athletic awards at commencement time. One in football and one in baseball. He was all-southern full-back on the football squad, and captain of the baseball team. He received a monogram blanket and a miniature gold charm emblematic of each sport. In order to win these awards, Horton has been a letter man for three years. He has been employed to coach the football team at Stephen F. Austin Teacher's college, Nacogdoches, Texas, next year.

AUTOMOBILE ACCIDENT NEAR FELIX BRIDGE

Late Saturday night a car owned and driven by A. C. Newton and containing as occupants Oscar and Bill McInnis was struck by a car loaded by young men from Artesia. Both cars were traveling toward Hagerman a short distance from the Felix bridge when the accident occurred. Fortunately no one was seriously hurt and the damage to the car was not severe. A car in front of the one driven by A. C. Newton was stopped rather suddenly for the repair of a punctured tire. The Newton car was swung by the driver onto the opposite side of the road to avoid a collision and was struck almost immediately by the car filled with young men from Artesia which was going about sixty miles an hour.

WOMEN HITCH-HIKERS GO THROUGH HAGERMAN

Julia Keathler of Kansas City, Missouri, and Anita Miller of New York were in Hagerman Friday night. At that time they had been hiking for six weeks. They came to Hagerman from Carlsbad where they visited the Carlsbad Caverns on Friday. The young women were on their way to Albuquerque.

SALE OF COTTON SENT THROUGH AIR

The first bale of the 1929 crop, brought from Texas, was off Monday on the floor of the New York Cotton Exchange. The United States fund for the Salvation Army in Christi, Texas.

CAMP LEFT SATURDAY NIGHT FOR CHLOE CAMP

A short visit with his family in Chloe Camp. From there he traveled thru various points on a combined business and pleasure trip.

Mrs. Charles Bond of Roswell is visiting her mother this week.

Everett Latimer has installed a new water softener in his barber shop.

Bell Chappel who has been in Dexter since February left Sunday for Clarendon, Texas.

Lloyd Blakney arrived Monday from Raton, where he has been on a combined business and pleasure trip.

The Gerard Home which was recently damaged by fire is being quite extensively remodeled and repaired.

Mrs. W. H. Webster, who has been spending a couple of weeks with her mother left Friday for her home in Dalhart, Texas.

Mrs. L. B. Hurst from Kansas City is making an extended visit in the home of her son Breebe Hurst. She expects to go to Denver, Colorado after her visit in Dexter.

The revival meeting being conducted by Rev. J. A. Bell are still in progress. The evangelist is preaching constructive and inspiring sermons. The crowds have been small due to the fact that this is the busy season for farmers.

Mrs. Clyde Barnes and daughters, Avalee and Mrs. E. McKinstry of Hagerman left this morning overland for a three weeks visit and pleasure trip to Skekie, Oklahoma, their home town. During their absence from Dexter they expect to travel through several points in northeastern Oklahoma.

Mrs. Guidot, and Misses Flora and Dal Durand arrived Wednesday night for a visit in the Raymond, Roger and A. Durand homes. They are on their way home from California. They passed through Dexter on their way to California and were accompanied as far as Albuquerque by Mr. and Mrs. Raymond Durand. They visited Las Cruces, El Paso, Elephant Butte Dam, Santa Fe and Taos before going to Albuquerque.

NO CHANGE IN HOOVER CONSERVATION POLICY SAYS SECTY. WILBUR

PALO ALTO, California.—Secretary Wilbur does not contemplate any changes in the executive order of President Hoover withdrawing the public domain from oil prospecting.

The interior department head declared here yesterday that careful study of all factors in the handling of the public domain in relation to the conservation of oil convinced him there would be no change in the order of March 12 barring the further issuance of permits for oil and gas prospecting.

Secretary Wilbur, coincident with officiating at commencement exercises at Leland Stanford junior university of which he is still president, also has been studying reports of the Colorado Springs governors' conference where the Hoover order was attacked by representatives of the Rocky Mountain states. He said that nothing in the reports caused him to contemplate recommending any change in the order.

"Through affidavits," the secretary said, "the department of interior has been able to decide on equities of those who have spent money on the public lands and where such expenditures have taken place, permits are issued or extended."

PARDEE'S HAVE GUEST FROM ILLINOIS STATE

Mr. and Mrs. Smith Pardee and daughter, Gean Marie from Rockford, Illinois, and Mrs. Parsons, from Glen Ellyn, Illinois, arrived overland Tuesday afternoon, for a visit with Mr. Pardee's parents, Mr. and Mrs. Willis Pardee. They arrived in time to celebrate Mrs. Willis Pardee's birthday with a big chicken dinner on Wednesday.

They expect to take a trip to the mountains, and visit Mr. Pardee's sister, Mrs. C. E. Wheelock in Shafter, Texas before they return to Illinois. They will be here about ten days.

Messenger Want Ads pay.
Messenger Want Ads pay.

Curtis Chappel from Clarendon, Texas arrived Sunday night to spend the summer in Dexter.

Billie Herbst who has been confined to his home with the measles is able to be out again.

Clyde Barnes left Dexter Wednesday for Plainview, Texas where he expects to be employed in the wheat fields.

Miss Avalee Barnes and Miss Pauline Robinson spent the week end in Roswell guests of Miss Thedel Lawson.

Mr. and Mrs. J. D. Winfield, from Brockwell, Oklahoma are visiting Mrs. A. Durand. They will remain about a week.

Dr. E. J. Hubbard and family arrived in Dexter Tuesday afternoon from a several weeks sightseeing and pleasure trip to the Pacific coast.

Mr. and Mrs. J. T. McNeil received a cablegram from their son, Josh, who is taking a student tour to Europe, saying that he arrived in South Hampton, England, Monday.

John Mehlop, Paul Turner, Henry Devenport, and Mr. Devenport, have returned from their sight-seeing trip through the state. They report a very delightful trip. Paul Turner, Henry Devenport, and Mr. Devenport have returned to their home in Palestine, Texas.

Miss Myra Campbell, who taught in the Dexter High school several years ago, came to Dexter recently from Los Angeles, California. She has been teaching at Ontario, California during the past year. She expects to visit for a short time in the Hurst home. Dennis Jarnigan met her at Albuquerque and they came overland from there.

AUBREY LEWIS VERY ILL

Mrs. DeHart received word from Denver the first of the week that her son, Aubrey Lewis was critically ill in the Fitz-Simmons hospital. She and Doris and Jack Lewis, left overland immediately for Denver. During their absence Dorothy Lewis will stay in the J. T. McNeil home.

WHEATLEY TO LEAVE FOR INTERNATIONAL SCOUT JAMBOREE MON.

Monday, Richard Wheatley, Artesia Eagle Scout, expects to begin the first lap of an eventful journey to Arrow Park, England, where he will attend the International Boy Scout Jamboree.

The fact that Richard will be New Mexico's only representative to the greatest gathering of the scout organization has even undertaken is considered a unique and distinct honor to his state, community and to himself. It will be a new chapter in his life and one that will be the envy of all of his fellow members.

Richard will leave for McAlester, Oklahoma, where he will join the Oklahoma scouts for a seven day camping period. After the camping period is completed, he will journey to Ardmore, Oklahoma and after ten days of waiting, he will board the train with the Oklahoma delegation for New York, where on the 20th day of July, the Boy Scouts of America will embark on the ship "Samarra," for Queenstown, England. If everything goes according to the schedule, the scouts will land at Queenstown on July 28th. From there they will go to Liverpool and then to Arrow Park, where the Jamboree will be held from July 20th to August 13th.

Thirty thousand scouts from forty-two nations are expected to attend the Jamboree including a thousand scouts and five hundred leaders and executives from the United States.

After the Jamboree is closed on August 13th, the scouts will spend the following day in rural England and August 15th in London. On August 16th, they will start on a tour of three nations of Europe, visiting firsts Holland, then Belgium and then France. The tour will end August 20th and on the 21st the scouts will set sail for home, arriving at New York on August 29th.

Mr. and Mrs. Jack Sweatt, Miss Dorothy Sweatt and her guests Miss Mary Hall Black, and Miss Ada Bell Hayes were Roswell visitors Monday afternoon.

FIRST PERIOD AT GIRL SCOUT CAMP STARTS JULY SEVENTEENTH

Final details are being arranged for the summer camping period at Camp Mary White, for Girl Scouts. The first period will start on July 17th, it was announced at Roswell, and continue for two weeks. Those who have not registered are urged to do so now. Camp Mary White has undergone a wonderful improvement since it was first established in Bear Canyon, near Weed. Six thousand dollars was spent in camp improvements last year and thirty-five hundred dollars has been expended this spring, completing the building program as follows: Seventeen sleeping shacks, (Adirondack); one cooking shelter, one infirmary, one spring house, water piped to each kitchen shelter and Emily Ingham hall slabbed. In addition to a number of minor additions a large swimming pool a quarter of a mile square has also been completed.

SOCIAL ITEMS

L. C. CLUB

The L. C. Club met at the home of Mrs. Charles Michelet, Thursday afternoon, June 13.

After the devotional session a flag program was given, to commemorate Flag Day which was June 14th.

At the close of the social hour the hostess served dainty refreshments to fourteen club members and four visitors. The visitors included Mrs. O. L. Bullock of Roswell, Mrs. Jim Michelet and Misses Mary and Olan Williamson.

The next meeting will be held at the home of Mrs. W. L. Heitman. This will be the last meeting of the year and all members are urged to be present.

RHODES-KIPER

Oscar Kiper and Miss Nevada Rhodes were married at the Fayetteville court house, Fayetteville, Arkansas, on Wednesday afternoon, June 12, in the presence of about twenty friends and relatives.

After the ceremony Mr. and Mrs. Kiper and Mrs. Earl Camp left for Berryville, Arkansas where they visited relatives. They also visited relatives in Neutonia, Missouri and Muskogee, Oklahoma.

The bride is well known in Hagerman. She lived in this community several years before moving to Fayetteville, Arkansas.

The groom is the oldest son of Mr. and Mrs. P. E. Kiper and has lived in this community for many years.

Mr. and Mrs. Kiper will make their home in Hagerman, and Mr. Kiper will continue his work in the Kemp Lumber Company, where he has been employed for several years.

MR. AND MRS. REED ENTERTAIN TUESDAY NITE

Mr. and Mrs. J. W. Reed gave an interesting and instructive program at the school auditorium Tuesday night.

Mr. Reed who is an ex-professor gave an instructive lecture on longevity. He gave some clog and old time Negro jig dancing to help prove his theories about longevity, as well as to entertain.

Mrs. Reed who has been actively engaged in grade school work for many years, gave a lecture on grade school work. She gave a child's story and a humorous recitation for the benefit of the children.

HOME UNIT NO. TWO

Home Unit number two met at the school house Tuesday afternoon. Miss Velma Borschell directed a very interesting and profitable lesson on bound button holes and set-in pockets.

Since such small crowds have been attending the meetings, Miss Borschell feels that it is not worth while to keep up the organization. Those who are interested in the work may join Unit One.

SUNDAY SCHOOL CLASS PICNIC TUESDAY NITE

The young people's class of the Methodist Sunday school enjoyed a picnic in the E. A. Paddock grove Tuesday night.

SCENES FOR MEDICINE MAN SHIFTED TO THE RUIDOSO SECTION

Realistic Scenes To Be Taken In Mining District Of Mountains — The Carlsbad Cavern Section Will Be Filmed Next.

For the next four or five days scenes for the "Medicine Man" will be taken in the mountains near Ruidoso. It will be possible to secure realistic mining scenes in this territory. The troupe will leave Roswell for Ruidoso to-day.

Scenes of a bar room and dance hall typical of frontier days have been taken during the last two weeks in Roswell. With these scenes as back ground, close-ups have been taken of the principal characters in some of the climatic situations of the play. Van Sweatt of Hagerman, who has been employed for several weeks with the troupe has played the part of a henchman to the villain in several of the scenes and has been in a few of the close-ups.

The Carlsbad Caverns will be used for scenes for four or five days after the filming is completed at Ruidoso. The filming of this picture has caused unusual local concern and further developments of the picture will be followed with increasing interest.

AUTOMOBILE FATALITIES

Approximately 9,000 persons have been killed in motor vehicle accidents in this country thus far this year, according to reports received by the Travelers Insurance Company from state officials.

With the motoring season under way, the motor vehicle death rate has increased, as was to be expected and as indicated by the trend within the three-months period, February to April inclusive, and the fact that April's automobile fatality record was the greatest of the first four months of the year.

After cooking angels on horseback, toasting marshmallows and eating a bountiful picnic supper, the class played running games until they were too tired to run any more.

GIRL SCOUTS GO ON HIKE

The Girl Scouts met Tuesday afternoon at the home of Mrs. Willis Pardee. Miss Esther Victory, County Nurse met with them and conducted the first of a series of health lessons. After the lesson Misses Mabel and Dorothea Cowan took the troop on a hike out east of town. When they got tired of hiking they sat down in the shade of some trees and told ghost stories.

METHODIST MISSIONARY SOCIETY ENTERTAINS

The Woman's Missionary Society of the Methodist church met in the basement of the education building Wednesday afternoon.

The president, Mrs. C. W. Curry presided over the business session Mrs. W. P. West was leader and had charge of the devotional service. The subject was "Repairing Broken Homes." Different phases of the subject were discussed by Mrs. B. J. West, Mrs. A. E. Watford, Mrs. Earl Stine and Mrs. Leon Meeks.

At the close of the meeting lemonade and cake was served to Mesdames W. P. West, C. W. Curry, B. J. West, E. T. Swisher, Lloyd Harshey, Bryan Hall, J. H. Slayter, C. E. Carter, J. L. Mann, Eliza Floto, Leon Meeks, Carl Ridgely, Dave Ridgely, A. E. Watford, H. C. Bobb, Earl Stine and Joyce West.

DAVIS-DAVIS

D. W. Davis and Mrs. Leona Davis both of this place were married at Roswell by Judge C. C. Hill on Thursday afternoon June 13th. They will make their home in Hagerman.

THURSDAY, JUNE 20, 1929

THE PRESS

A renewal of the demand for freedom of the press and praise of the New Mexico press were made in telegrams sent the New Mexico Press Association in session at Tucumcari Saturday by Senators Cutting and Bratton.

"The meeting of the New Mexico editors today is an event of unusual interest," Senator Cutting said in a telegram to Paul Dodge, secretary of the association, "and I send you my sincere and affectionate greetings. The tremendous importance of the press is being brought directly home to the nation now that the main issue before the United States Senate is the possibility of obtaining a vote before recess on the antiquated and indefensible rule allowing the people's business to be transacted in secrecy.

"To the press is due credit for bringing this issue to the front. If a vote can be obtained I am confident of the result and that the press will be entitled to special recognition from the American people. As usual the newspapers of the nation have shown themselves anxious to protect the people's business and bring home to them the fact that their representatives are public servants and accountable to them in every act."

Senator Bratton telegraphed: "Please allow me to extend greetings and personal regards to each delegate and visitor attending your convention. It is my hope and belief that your association together in Tucumcari, one of the fittest and most progressive cities throughout the state will be delightful and profitable.

The responsibility of the press in accuracy and faithfully disseminating facts, and information upon which public opinion is founded cannot be overstated. You have discharged that responsibility in a splendid manner and I am certain that from an exchange of opinions you will be enabled to increase your already excellent degree of service to the people of the state.

"I hope this convention is the best you have ever had."

WAGES AND INDUSTRY

The outstanding result of our modern industrial age has been the increased wage level in recent years with consequent improvement in living standards.

W. Jett Lauck, former professor of Economics and Politics at Washington and Lee University, traces this movement in his book, "The New Industrial Revolution and Wages."

Labor has been gradually reaching a higher social status. As Mr. Lauck says: "The new industrial era in America has been built primarily upon the rock of service and performance, and not the least amazing of the many marvelous developments of the industrial revolution has been the discovery of modern industry that equity and service actually pay and are the essentials of permanent industrial achievement—that industrial expansion and operation should primarily be a social function and service."

Industrial prosperity, under the modern scheme of things, is the result of individual prosperity. The old theory of getting labor as cheaply as possible has disappeared. A new industrial philosophy sees the advantages of paying high wages for good work and increased output per man.

As Mr. Lauck's very valuable volume shows, a new age has arrived in the United States—an age of higher wages, greater production and more general prosperity and progress than the world has ever known.

GROWING MINDS

The Southwestern Ambassador remarks, "Physically we stop growing when we reach our eighteenth to twenty-first year, except possibly for an unwelcome expansion about the middle when forty rolls around. However, it is a sad commentary on the human race that a large number reach the limit of mental growth about the time they have attained their full height. At twenty-one most of us have but laid the foundations of our mental structures; we have just learned to think, yet here many stop. They become men and women of little trival minds. Their daily routine of business and social life absorbs them and shuts them away from broader, higher thinking. Their associates are too often their mental equals, rather than their superiors. They cease to read those things which require and stimulate thought. They permit the demands of the day to rob them of time for contemplation.

The mind is not used, which even is not taxed with difficult problems of thought, like unexercised muscles becomes flat and flabby.

We can not tower mentally above our fellows, but it is given to each of us to grow in mind; from year to year to become wiser broader, more tolerant and thereby be of greater service to others and live with greater pleasure to ourselves.

The Chamber of Commerce and other civic organizations of the town can't do much for you unless you do something for them.

ROAD LAWS PUBLISHED IN BOOKLET FORM

The special road laws and miscellaneous legislation relating to highways in New Mexico which were enacted by the last legislature have been compiled and published in a booklet by the State Highway and Motor Vehicle department, it was stated at Santa Fe recently.

The 38 special road laws carry with them levies which will total \$557,498 when all collected. Most of these levies will be for the two calendar years 1929 and 1930, although a few run over into 1931 and 1932.

The miscellaneous legislation portion of the book has the greatest interest for the public at large and especially out of state persons, as it carries in it the motor vehicle registration act and the uniform motor vehicle code. There is also a transcript of the new anti-theft act. It is possible that these latter laws will be put up in special form and in large quantities at a later date because of the demand of the travelling public for copies.

HOW LONG

In a recent issue, a contributor asked "How long is a four-minute speech?—and told us it was the exact amount of time that it took to express a single thought. To make that four-minute speech you may have had to think for four hours or four years. Thoughts are jewels that lie embedded in the ore of thinking. The man invited to give a four-minute speech is usually offended. How could he possibly say all he has to say on the subject he knows about in four minutes? He can, of course, if he knows how to mint his metal.

In the famous lawsuit of Whistler versus Ruskin, the famous American etcher was asked contemptuously how long it took him to "knock off that Nocturne."

"About two hours," said Whistler. "And you had the affrontery to charge a thousand pounds for the work of two hours?" thundered counsel.

"No," replied the artist. "For the knowledge of a lifetime."—The Rotarian.

DILLON AND SPRINGER ARE FOLLOWING LAW

Somehow or other this newspaper just can't seem to work up any feeling whatever toward Governor Dillon and Charley Springer for refusing to take the funds set aside for highway purposes to defray expenses of the state other than highway construction and maintenance.

Laws enacted by the legislature specify just how the highway funds are to be used and for what purpose, and this thing of ignoring and setting aside the laws of the state have become entirely too common in New Mexico.

Good roads will do more to build New Mexico than any other one thing imaginable, and so long as funds have been created and are available for road purposes they should be used on the roads.

"Robbing Peter to pay Paul" has always been considered poor management, and, beating the devil about the bush never pays.—Tucumcari News.

WORD TO THE KNOCKERS

Every community of any size and Artesia is no exception is cursed with a few human pests, who can not see any good in anything nor anybody. They cuss the town and its people and wonder why they can not get along any better, but do not have the mental capacity to see that such action is far more injurious to the individual than to the community and its people.

It is highly distasteful to the better class of citizenship to have to listen to the woes of the knocker, who thinks the community he lives in owes him a living, even though he can never find a good word for it. To such people we wish to extend them a cordial invitation to leave town and assure them that they will never be missed.

IT'S BAD BUT COULD BE WORSE

Recent estimates on the damage caused by the hail to the farmers southeast of Artesia, say the hail last week ruined about eight hundred acres of cotton. One cotton grower says that a hundred acres of cotton is worth ten thousand dollars. Figuring on this basis the loss sustained by farmers of the hail area would run in the neighborhood of eighty thousand dollars. This is assuming of course that the cotton market remains near the 20 cent mark.

The cotton land will be planted in row crops. If most of the land is planted and feed stuff is a fair price next fall, the farmer, who lost his cotton by hail may come out the winner in the long run. Who knows?

AN INTERNATIONAL LANGUAGE

The Daily Telegraph of London, commenting on the fact that differences in language are at present a barrier to international communications, foresees a time when one or two languages will be understood the world over. The linking up of the great American and foreign powers by telephone has given a strong impetus to this movement.

Once international telephony comes into greater use, through a common language, it will mean a great step forward in promoting understanding and friendliness among the great nations of the world. Again American private initiative and enterprise blaze trail for world progress.

If it's dry weather, we complain of the dust and if the weather is wet the weed grows. Weeds don't bother a great deal unless they are on the main thoroughfare of the town and unfortunately some of them are. They make an unsightly appearance on Main street.

If Hoover passes a few more regulations similar to his oil conservation policy and Mrs. Hoover entertains regularly Depriest, wife of the negro congressman, do you suppose the dear "peepul," will be ready for a change four years hence?

The fellow who has led an active life until passed middle age and then decides to retire, finds himself in the same position with the plant, when it reaches the age of maturity.

Tip to the merchant: When a boy buys a suit of clothes he secretly thinks he will look like the man in the advertisement.—Swiped.

INSIDE INFORMATION

Serve small portions of food to children so that they can clear their plates without the feeling of being stuffed, or nagged into eating.

Grass stains will usually come out of washable materials with vigorous rubbing, hot water and soap, if treated while fresh. If traces of stain remain on white materials, they may be bleached out with Javelle water.

The waists for sun suits for children should be made of loosely woven fabrics, so that the ultraviolet rays of the sun can reach the body through the large spaces in the material. All the common textile fibers stop most of the ultraviolet rays.

Don't put hot foods in the refrigerator. Cool them first to room temperature. Don't use ice to cool such things as the tops of carrots, the outside leaves of lettuce or thick paper parcels from the market. Don't waste ice storing vegetables for a short time if you are going to use them immediately. Opening and shutting the door frequently raises the temperature of the air in the refrigerator, so that more ice is required to cool it.

Lemon is not the only garnish for iced tea, although it is very commonly used both to decorate the glass and add to the flavor of the tea. A spray of mint, a rose geranium leaf, a thin slice of orange or lime, are other attractive garnishes; and some people like a flavoring of whole cloves or stick cinnamon, put into the tea while it is hot, or a few cloves stuck in each slice of lemon and arranged pleasingly on a plate to be served with the tea.

HOOVER'S OIL POLICY MAY BE CHANGED

George Otis Smith, director of the federal geological survey and President Hoover's technical adviser is said to have expressed an opinion in Denver Thursday, that the public lands withdrawal order should be modified and probably would be.

Taking A Vacation?

Reduced Vacation Rate for Your Telephone

If you are going to be away from home for a month or more this summer you can save money on your telephone bill.

With our vacation rate plan you can have your telephone service suspended, just as you stop your newspaper, ice or milk service while you are out of town. This plan for residence telephone service is available for any period of more than one month and less than three months.

The rate during the suspended period will be just half your regular monthly rate. Your telephone remains connected, you retain your number and directory listing, outgoing calls can be placed but no incoming calls received. Service will be restored as soon as you return.

During your absence you will be billed for the regular amount, then when you return you will be credited with the amount due you on the reduced rate.

Send us a card a few days before your vacation over and your telephone will be restored to regular service when you arrive home.

Retain business contacts by "Long Distance" while away.

Anchored Down

A home in which no children are
 Is like a sky without a star,
 Or so it seems to me.

But, I suppose, the man and wife
 Who live, by choice, a childless life,
 Rejoice to be so "free."

"No kids for us," they likely say,
 "To have to watch through night and day—

No, Boy—they're too much fuss!
 And furthermore, it costs too much
 To buy their clothes and food and such—
 No, SIR—no kids for us!

"We like to roam about the town—
 But kids, of course, would hold us down,
 Like chains around our feet.
 YOU raise the kids—WELL have the fun!
 YOU stay at home from sun to sun—
 WELL live the life that's sweet!"

But, oh, the joys of life they miss,
 Who do not know the baby's kiss,
 And smiling, sparkling eyes!
 And oh, how empty life will grow,
 As down the years they slowly go,
 And Youth behind them lies!

WE'RE anchored down, I must confess,
 But anchored, though, with Happiness,
 And all that makes life fine!
 YOU live the life that's fancy-free,
 Without a child—but as for me,
 I'll take the kids for MINE!

LAKE ARTHUR ITEMS
 (Mrs. Ned Hedges, Reporter)

W. W. Walton was a business visitor in Roswell Monday.

Little Mozelle Pate left Monday for a few months stay in El Paso with her grandmother.

Rev. Z. B. Moon filled the pulpit at the Methodist church here Sunday and preached an excellent sermon to an appreciative audience.

A large number of the citizens of the community attended the funeral service of George Jordan which was held from the McClay funeral parlors last Thursday.

Mr. and Mrs. Clyde Nihart and daughter Ruth came in last Wednesday from Minneapolis, Kansas, where they had attended the funeral of Mrs. Nihart's father Mr. Copeland.

M. S. Bruning brought in a 2,000 gallon artesian well this week on the old Dozier place now owned by Mr. Glazier. The place will be farmed this year by J. M. Frazier and his sons.

Howard Moots accompanied by his three little girls and John and Charles Aleshire of Los Angeles, California and Mrs. George Copeland of Minneapolis, Kansas arrived in Lake Arthur Tuesday for a few days visit with relatives.

Mr. and Mrs. Jim Murphey of Globe, Arizona and Bob Jordan of Wyoming are visiting at the home of Mr. and Mrs. Milton Godsell this week. Mrs. Godsell and Mrs. Murphey are sisters of George Jordan and Bob Jordan is a brother.

Mrs. B. C. Moots and son, Lyle accompanied by June Moots attended the funeral services of the late Mrs. Howard Moots which was held from the Baptist church in Clovis Saturday morning. Mrs. Moots was a former Lake Arthur girl and her sudden death came as a distinct shock to her many friends here. She leaves besides her husband and three little girls a father, John Aleshire, a brother, Charles Aleshire, and two sisters, Mrs. Adanelle Krest and Mrs. George Copeland.

NEW AIR MAIL LINES ARE RECOMMENDED

Suggestions for a new trans-continental air mail service along the northern tier of the United States between Seattle and St. Paul and Milwaukee were offered to the Interdepartmental Committee on Airways, which met at the Post Office Department to conclude a series of hearings regarding the expansion of the present air mail system throughout the United States.

Senator Jones, of Washington, who made the suggestion to the committee, also requested a direct air mail service between Pasco and Seattle, Washington, and between Pasco and Spokane, Washington.

Creation of a new network of air-mail services in the Southern States with a trunk line to the middle west to such cities as Cincinnati and Detroit, by way of Washington, D. C., and Pittsburgh also was suggested to the Post Office Department on May 23. The committee is composed of representatives of the Commerce and Post Office Departments.

SPECIAL FARM OUTLOOK REPORTS TO BE ISSUED

Special outlook reports designed to assist farmers in planning crop and livestock production programs on the basis of the prospective demand for their products will be issued during the current agricultural season by the Bureau of Agricultural Economics in Washington.

An outlook report for hogs will be issued on July 15; poultry, July 22; sheep and wool, August 5; strawberries, August 15 or earlier, prior to setting of new beds; beef cattle, August 26; early potatoes (Florida and lower Texas valley), September 1 or earlier; winter grains, including wheat, rye and southern oats and barley, September 5.

Outlook reports on truck crops will be issued from time to time, provided new information on each product now being collected by the bureau proves adequate for that purpose; on fall, winter and early spring lettuce; fall and early spring cabbage; Bermuda and Creole onions and fall and early spring tomatoes.

January 27, 1930, has been set tentatively as the date of issuance of the bureau's annual outlook report for 1930, which will deal with the production and marketing outlook for all important agricultural products at that time. Annual outlook reports and some special reports have been issued annually by the bureau for the last seven years. The issuance of the special reports in addition to the annual report is to enable farmers to adjust production programs in view of the very latest developments of the season.

The legal marriage age for young men in Italy is now 16 and for girls 14.

Hd. Orig. 12-29-16 640 acres.
NOTICE FOR PUBLICATION
 032833 MFN

Department of the Interior, U. S. Land Office at Las Cruces, N. M. May 15, 1929.

NOTICE is hereby given that Eligio Rodela, of Picacho, N. M., who, on March 3, 1927, made Hd. entry containing 640 acres, No. 032833, for E 1/2 sec. 7, W 1/2 sec. 8, Township 13-S., Range 17-E., N. M. P. Meridian, has filed notice of intention to make three year proof, to establish claim to the land above described, before Dan C. Savage, U. S. Commissioner, at Roswell, N. M., on the 29th day of June, 1929.

Claimant names as witnesses: George Clements, A. Roy Treat, Antonio Maldonado, of Picacho, N. M., Hubert Staggs, of Roswell, N. M. V. B. MAY, Register.

MEXICO CROPS PART OF JUNE 1

WHEAT: The wheat acreage reports twenty foreign countries total, is 98,644,000, compared with 92,700,000 in 1928, and 95,000,000 in 1927.

WHEAT: The condition of winter wheat in the United States on June 1, indicated 622,000 bushels, which is an increase over the crop on May 1 of 4% over the crop on May 1. The 5-year average crop was 600,000 bushels and the 1928 crop was 579,000,000 bushels. The crop on June 1 over May 1 was due mainly to favorable fall in the great plains all of which showed an increase. The total increase amounted to 1,000,000 bushels. The other crops show a slight decline since the condition of the crop in Mexico amounted to 48%, compared with 62% for a 10-year average and 65% on June 1, 1928.

WHEAT: The condition of spring wheat in the United States on June 1, indicated 4 points above the condition a year ago, but is below the 10-year average of 4.5. Cool weather has delayed growth of this crop in the wheat growing states, but reports are reported in a strong condition. The condition of New Mexico crop was 89% compared with 90% on June 1, and 82% for the average of 10 years.

WHEAT: The condition of 86.6% in the United States is much better than for last year which amounted to 76.6%. Prospects are better than in most states, except those in the west, where the crop seems to be the smallest since the condition of same hay in Mexico was 89% compared with 86.6% for the 10-year average of 86%.

WHEAT: June 1 is too early to show the production in the Not States, but indications are that the production in the country as a whole will be less than usual, especially in California and Florida. The crop has been particularly heavy. Apples, peaches, grapes and grapes will be the average of recent years.

WHEAT: In western New York, the Ozark region, Kansas and Nebraska, an increased crop is expected over last year, but in all other states the crop

will be smaller. For the United States the apple crop seems likely to average 10% less than that for last year, but more than the crop of 1927. The condition of the crop as of June 1, averaged 66.6%, compared with 72.2% in 1928, and a 10-year average of 68%. For New Mexico the condition averaged 63%, compared with 40% last year, and a 10-year average of 65%.

PEACHES: The condition of peaches in the United States averaged 54.7%, compared with 72.7% last year, and a 10-year average of 64%. The crop in New Mexico averaged 46% condition on June 1, compared with 25% a year ago, and a 10-year average of 41%.

PEARS: The pear crop in the United States averaged 58.5%, compared with 70% a year ago, and a 10-year average of 65.5%. The New Mexico pears averaged 59% condition on June 1, compared with 33% last year, and a 52% for a 10-year average.

NEW MEXICO COTTON-SEED HAS HIGH OIL CONTENT

A three year test made by the New Mexico Agriculture Experiment Station showed that Acala cotton, the variety grown most extensively in the state, averaged from .7 to 2 percent higher in oil than the averages reported from other regions, says C. W. Botkin, experiment station chemist. The protein in the New Mexico seed was found to average high or higher than averages reported for seed from other states. Gossypol, a toxic substance occurring in cotton-seed, was lower in the New Mexico seed than the percentage reported for high oil varieties in other regions. Less than one-fifth of this toxic material was present in the cake and meal made from this seed.

Acala seed was as high in oil and protein as any variety analyzed. This variety delinted, moisture free, averaged 26.5 percent of oil and 24.7 percent of protein for three seasons. This average for oil, being from .7 to 2 percent higher than averages reported for other regions, classes New Mexico seed with the highest oil yielding seed. Since the protein in New Mexico seed was found to average as high or higher than the averages reported for seed from mother states, this high oil producing seed cannot be classed as low in protein.

Immature or bolly seed were found to contain less oil protein than mature seed. Data for the season of 1927 show that there was no decrease in the quality of the mature seed during the picking season. The quality of the seed was rather uniform for the different cotton growing counties and did not show much seasonal variation. A complete report of these tests has been published in New Mexico experimental station bulletin No. 175 which is available for general distribution.

When Will Your Ship Come In?

Every person is looking for the day when his ship will come in. The landing day of your ship depends on how constantly you save. Wasted money will sink your ship.

WEDDING INVITATIONS—THE MESSENGER

What a beautiful floor!

The visitor is at once impressed with the beauty of a Bruce Oak Floor, and as she is escorted by her gratified hostess through all the rooms, her delight increases as she sees how the atmosphere of her friend's home is enriched by the mellow expanse beneath their feet—dignity and the warmth of hospitality in the living room, good cheer in the dining room and good taste throughout.

There is no floor that can compare with a Bruce Oak Floor; it has character, beauty, and it will last for all time.

If you lack Oak Floors in your present home, there is a special thickness made to lay over the old worn floor.

We will be glad of an opportunity of telling you more about Oak Floors as related to your individual requirements.

**Colonial Home Made Attractive
by Wide Porch With Glazed Entry**

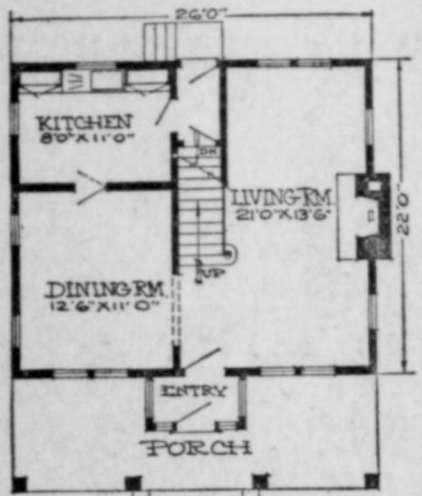

A comfortable looking colonial home. Excellent floor plans, economical construction and an inviting open front porch, distinguish this home.

By W. A. RADFORD

Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to practical home building, for the readers of this paper. On account of his wide experience as editor, author and manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 1827 Prairie Avenue Chicago, Ill., and only inclose two-cent stamp for reply.

Here is the type of home which will appeal to a great many prospective home builders, especially those who want a modern dwelling, require only a limited number of rooms and have not a large amount of money to build with. It is a simple colonial home made attractive by a wide porch with a glazed-in entry.

This house is of frame construction and is only 22 feet by 26 feet.

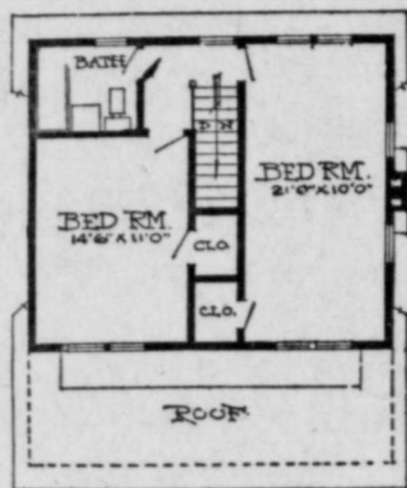

First Floor Plan.

The interior arrangement is such, however, that there is an unusually large living room, 13 feet 6 inches by 21 feet, extending the depth of the house at one end. In the center of the outside wall of this room is an open fireplace while two windows at

the front, two at the side, one at either side of the fireplace, and two at the back, provide it with an unusually large amount of light and excellent ventilation.

As will be seen by the floor plans, the dining room is also a front corner room and is connected with the living

Second Floor Plan.

room by a cased double opening. This room is 11 feet by 12 feet 6 inches. The kitchen, 8 feet by 11 feet, is directly back of the dining room. Open stairs run out of one side of the living room directly opposite the entrance door and lead to a central hall on the second floor. Here are found the bedrooms, one directly above the living room and practically the same size, and the other 11 feet by 14 feet 6 inches. At the head of the stairs is the bathroom. Should the family be willing to have smaller bedrooms or should the occasion arise the large bedroom can be partitioned into two, each one being 10 feet by 10 1/2 feet.

The wide porch with the brick steps and the overhang of the porch roof take from this home the plainness which is sometimes a drawback in the true colonial design.

**GEN. WILLIAM BOOTH CENSUS MEASURE IS
FORMER SALVATION SIGNED TUESDAY BY
ARMY HEAD IS DEAD PRESIDENT HOOVER**

HADLEY WOOD, England.—Covered with a Salvation Army banner, the body of General William Bramwell Booth lay in his pleasant suburban home here Monday. His passing Sunday night was unrecognized by any outward sign of mourning either officially or among the rank and file of the Salvation Army, which he headed so long until disposed recently.

Not a flag was lowered at the international headquarters in Queen Victoria street. "We keep our standard flying high," said a high official. "For General Booth is not dead—he has passed to glory."

But though the Army tradition does not admit loss there was in evidence everywhere among Salvationists a deep sense of personal loss that they felt at the 72 year old General's death, so quietly and suddenly Sunday night after final months of life which had been filled with the agony of ill health, distasteful conflict, and defeat.

**MAN TRAINS TURKEYS
TO DRAW GAME TO HIM**

RADIUM SPRINGS.—It takes a turkey to catch a turkey, says J. Wilbur Wortman of Albany, Ga., owner of a locally celebrated pair of hunting fowls.

Wortman trained the hen and gobbler to play Judas to thier wild swamp brethren, from chickhood onward. Teaching them absolute dependence upon himself for food and water, he spent hours hiding from them, and then calling to them with the plaintive call of the wild turkey.

They soon learned the wild turkey call and abandoned in the locality of wild turkeys, they invariably will call to their hidden owner luring sympathetic swamp turkeys within range of his gun. Wortman recently refused offers of \$100 apiece for his "hunting turkeys."

Messenger Want Ads pay.

WASHINGTON, D. C.—President Hoover Tuesday signed the census and reapportionment bill.

The new act has a two-fold purpose; provision for the regular decennial count of the population and the setting up of a plan for reapportionment of the house of representatives. This will be the first reapportionment since 1910.

The census count will be for the calendar year 1930 and the house members will be apportioned upon it.

Under the reapportionment a number of states will gain additional representation while several others will lose seats.

Disposition of the census-reapportionment question was one of the major tasks listed by President Hoover for the special session. This and farm relief now have been acted upon. Of others, the tariff bill is pending before the senate finance committee and the senate has refused to approve a resolution to postpone operation of the national origins clause of the immigration act.

The census act also provides a continuing arrangement whereby all future decennial census and reapportionments will take place automatically without further enactment of law unless the present statute is repealed or superseded.

An army of 100,000 workers, chosen by the director of the census, will take the population count beginning early in May, 1930. The task must be completed within two weeks in the cities and one month in rural sections and a report must be made to congress the following December.

The act, in addition, authorizes a census of unemployment, agriculture and irrigation in the United States and its possessions. The work will cost in excess of \$39,000,000.

The cow tree of Guatemala yields milk which can be used in coffee and is fairly palatable.

**VACATION EXAMPLE OF
HEALTH THRIFT**

By S. W. Straus, President American Society for Thrift.

This is the beginning of the summer vacation period and, therefore, a proper time for all of us to do some thinking on the fact that thrift in health matters is more important than thrift in money matters.

It has been within recent years that the public generally has begun to understand that thrift means much more than saving money. But if it is thrifty to save money, is it not more thrifty to conserve a possession that is beyond price and value, namely, good health?

A few days ago there was completed a remarkable survey of health conditions in the city of New York. Health facts discovered there may, with more or less accuracy, be recorded as typical of the entire country and are, therefore, of general public value. Here are some of the facts regarding health conditions in the nation's largest city: from 125,000 to 200,000 persons are continually sick in bed and from 250,000 to 800,000 more are constantly ill; of the 70,000 deaths per year, a very large percentage are from sickness that might have been prevented or postponed; the total annual outlay for the care of disease is \$150,000,000; the annual loss in wages due to illness is \$75,000,000; amount spent annually in the prevention of ill-health, \$8,500,000.

We hear much about losses incurred by the public through fraudulent or unsound investments. Needless and preventable losses of time and money through ill-health constitute an even heavier economic drain on the country.

Health thrift is more important than money thrift because without money we can still work and win, but without health we are helpless and advancement is practically impossible.

Fortunately, more thought constantly is being given to thrift of health. It was recently announced that the Rockefeller Foundation last year spent more than \$21,000,000 in practical and experimental medical work while within recent years it has spent \$144,000,000 for the same noble purpose.

Vacations are taken for the purpose of conserving one's health. When they are so planned and carried out as to be helpful along these lines, they are by no means a waste of time—they are, quite the contrary, a good example of thrift.

WHITE SHIRT SEASON

is now here. We have them from \$2.00, \$2.50 and \$3.00, and a few as good as \$5.00. The Arrow and McDonald Brand. J. Duvall, 122 N. Main St. Rosewell. 24-2tc.

**NO CHANGE IN TIME
BE MADE RAIL MATTER**

SANTA FE.—United States Senator Bronson Cutting Tuesday advised Chairman Hugh Williams of the state corporation commission by telegram that the interstate commerce commission has refused to alter its rule governing the usual time for the filing of briefs and arguments in such cases as the application of railroads to enter Lea county.

The Texas and Pacific and the Santa Fe have petitioned to construct steel lines into Lea county.

"Trust you realize," the telegram said, "that partial cause of delay can be attributed to applications for charter, as they, themselves can hasten the matter if they desire, by submitting briefs sooner and arguing the case sooner."

**K. O. B. RADIO STATION
HAS INCREASED POWER**

K. O. B. radio broadcasting station of the New Mexico State college has been granted permission to increase its sending power from 10,000 to 20,000 watts, according to word just received from R. W. Goddard, dean of the State College school of engineering.

The increased power permit makes K. O. B. by far the most powerful educational station in the United States and places it among the strongest stations in the country.

The permit was granted following a conference at Washington between Dean Goddard and members of the Engineering Department of the Federal Radio Commission. Dean Goddard designed station K. O. B. and has given much of his time to the study of radio engineering. He

states that \$75,000 has been in the State College station of the increase in power can be immediately.

**HOUSE PASSES FARM
RELIEF**

WASHINGTON, D. C.—Acting quickly to the recommendation of President Hoover, the house today passed a bill to appropriate \$151,500,000 of the 500,000,000 authorized for the federal farm relief act.

Action was taken shortly after the white house recommendation had been forwarded to the capital budget bureau.

ROSWELL, N. M.

C. GODDART KILLED BY LIVE WIRE NEAR ROSWELL TUESDAY

Clyde Goddard, aged 35 years, was instantly killed Friday evening about 5 o'clock at the Orchard Camp ground, which he was preparing to open to the public at Main street and the Country Club road, by coming in contact with the high power electric line which crosses his place, and on the Berrendo tracts.

Just how the accident happened is a mystery, as no one saw the fatal accident. An employee heard him fall, and ran to his side, but it was plain that he was dead. The high tension line had nearly decapitated him and had then terribly burned the lower part of his body.

OLD AGE PENSIONS SHOW NEED OF THRIFT

By S. W. STRAUS, President American Society of Thrift

Considerable attention at this time is being given the subject of old age pensions. No one can in fairness say that the hand of helplessness should not be extended to those whose years are many and whose possessions are few.

Generally speaking, those who have reached the afternoon of life must depend on charity unless in their younger years they have been able to accumulate enough to furnish a living income. While it is right that every humanitarian consideration should be given to our aged dependents these human activities should not bind us to the folly of thriftless habits during that period of life when we are able to earn and save.

Every individual should rise above the plane simply of striving to protect himself against aged pauperism. His thrift should carry him to the greatest possible heights of usefulness and success. He should not be satisfied with the mere condition of material independence. Nevertheless, the very fact that so much attention today is being given to old age pensions shows that many of our citizens have neglected even to care enough for their own welfare to provide against the existencies of old age.

Many poultry men are building up a good trade by selling pullets of from 8 to 12 weeks of age. This offers a profitable outlet for surplus chickens and gets the pullets off the range before they crowd the birds that are being raised for laying stock. By the time pullets are of greatest danger and can be kept 8 weeks old they are past the stage in colony houses or in summer shelters on range at low cost and with a minimum amount of attention. They usually find a good market among farmers, backyard poultry keepers, and others who do not have brooder equipment.

Alfalfa hay should not be put in the barn too green, as it is likely to heat and in extreme cases burn.

Eggs shipped to market should always be packed in the fillers small end down, as they carry better in transit and storage in that position.

Bermuda grass pasture should be kept closely grazed, as the stems become dry and wiry if allowed to get too old. Where there are not enough stock in the pasture to keep the grass well grazed, it often pays to harvest for hay and get a fresh growth for pasturing that will be more nutritious and palatable than the older stems.

A type of library recently introduced in rural communities is the country library, of which there are 245 in the country. They are generally adopted by popular county vote and are of two kinds; the county contracts with a city library or adjacent county library to give county service, or the county establishes a separate library and existing libraries are excluded from the county library and tax area if they prefer.

Makers of Roquefort cheese in the town of Roquefort, France, where almost the entire world supply comes from, don't have to worry about proper temperature, ventilation, and humidity for curing, as the cheese is cured in caves. These caves are of peculiar rock formation in which there are caves and grottoes connected with one another and with the outside by numerous channels. The temperature and humidity of the caves remain about constant the year round, conditions being excellent for mold growth and ripening of the cheese.

If it is decided to renovate the strawberry bed and keep it for another year, first mow the tops, particularly if the matted row system is used, then clean out the bed, removing surplus plants, and cultivate the soil between the rows. In regions where the growing season is long, the foliage should be mowed and the bed renovated as soon as possible after fruiting. Some strawberry growers apply a small amount of fertilizer after renovating the bed.

CLEAN THE GRANARY

Peanuts have the reputation of being a very satisfactory feed for hogs, particularly for fattening purposes, when fed alone or with mineral supplements. Recent experiments by the U. S. department of agriculture, however, show that growing pigs make much more profitable gains when tankage is included as a protein supplement to the peanuts. The feed cost of 100 pounds of grain, not including minerals, was \$9.92 for the pigs fed both peanuts and tankage, and \$17.86 when only peanuts were fed. Each pound of tankage fed saved more than 5 pounds of peanuts, resulting in a saving of \$7.94 per 100 pounds of grain. The tankage seemed to stimulate the appetite of the pigs, those fed tankage eating more peanuts than those not getting it.

Goodyear and Kelly Springfield Tires

are known the world 'round as the best all around tires. They know no seasons and will give you good service in summer as well as in winter.

If you have never used Goodyear or Kelly Springfield's, the next time you need a tire is a good time to try one of these well known makes.

HOW

PHRASE IN COMMON USE MAY HAVE ORIGINATED.—It has been suggested, says the Mentor Magazine, and not without good cause, that the homely expression, "bringing home the bacon," may have originated in the ancient English ceremony called "The Dunmow Flitch," at which a gammon, or flitch (a side or leg), of bacon was awarded to the couple that swore that for a year and a day they had neither had differences nor wished themselves unwed. The ceremony takes its name from the historic village where the custom originated, at Little Dunmow in Essex, forty miles from London.

The antiquity and origin of the Dunmow Flitch ceremony is obscure. Some think that it had an ecclesiastical beginning; that a gammon of bacon was first given by the prior as a reward to a "pilgrim" or novice, who after a year and a day had not repented of his "marriage to Holy Church," as it was called. Other historians suggest that the flitch was given when the church blessed, made permanent (and rewarded!) "handfastings," i. e., irregular marriages that were tried out for a year and a day. The ceremony is supposed to have become more or less a jocular tenure even before the Fourteenth century, and the frequent revivals that have been made partly solemn and partly an excuse for merry-making.

For a long while the custom fell into abeyance, although there have been frequent attempts at revivals. Even to this day ceremonies are held in various parts of England, although it is many years since one was held in Dunmow itself.

Mother—Daughter, dear, I'm afraid that young man is a bad egg.
Daughter—He's all that and even worse.
Mother—What do you mean?
Daughter—He's a bad egg that's broke.

During The Coming Hot Days

it may be necessary for you to take off your coat—but hardly ever your shirt. In fact when you're wearing our Wilson Brothers Shirts you don't want to take them off.

You'll find a choice selection here in your size and color. Prices from \$2 to \$5. Other style Shirts at \$1.50—while our good work Shirts start at \$1.

THE MODEL

OIL PRODUCTION IS INCREASED 25,644 BARRELS THIS WEEK

TULSA, Oklahoma.—The Oil and Gas Journal Tuesday said the total daily average oil production in the United States during the week ended June 15 was 2,743,186 barrels, an increase of 25,644 barrels over the previous week. This continued the erratic movement that during the last two months has drawn the production curve alternately up and down. The production for the week ended June 8 was approximately 3,000 barrels under that of the preceding week.

The total increase in light oil was 23,350 barrels; heavy oil 2,294 barrels.

Oklahoma fields aided by an approximate 7,000 barrel drop in the Seminole area, decreased approximately 9,200 barrels, while west Texas and other Texas areas showed general increases. The total estimate for the Mid-Continent area was 1,458,909 barrels, but 402 barrels over the production for the preceding week.

HERDER'S DEATH ACCIDENTAL

Roswell officers, who returned last week from Hope, found that Maximo Otero, a sheep herder employed southwest of Hope, had met his death accidental, Maximo was found by another herder, shot through the heart and Chaves county officers were called to investigate.

MCKEE NEW SUPERINTENDENT OF SANTA FE LINES

LAS VEGAS.—H. R. McKee, assistant superintendent of the Arkansas division of the Santa Fe railroad with headquarters at La Junta, Colorado, Saturday was made superintendent of the New Mexico division of the railroad, succeeding J. Fred Anton, who died recently from injuries suffered in an automobile accident near Ft. Sumner.

THINGS THAT NEVER HAPPEN

By GENE BYRNES

NEW MEXICO HIGHWAYS SHOW IMPROVEMENT OVER THE PAST YEAR

SANTA FE.—The 3,000,000 tourists who will come to New Mexico in 1929 will find touring conditions better this year than ever before, a survey by the Highway Service Bureau shows.

The trunk line roads and many of the secondary roads are in better shape this year due to the intensive construction and reconditioning work of the fall and winter months. Notorious bad spots have been eliminated by new projects, curves have been flattened, spillways revamped where they have ridden roughly in the past, the new maintainers and advanced maintenance methods taught by the Highway training school are showing good results, while the oil surfacing work is steadily pushing up the total mileage figure on semi-hard surfaced roads.

Many new routes have been opened up since last season, and many old routes which were passable in only the most favorable circumstances have been worked on to bring up to the all-year specification. New road work is constantly reaching out to make accessible major tourist points of interest.

Service stations, campgrounds and hotel facilities have been increased and brought up to new high standards all over the state. Lordsburg, Carlsbad and Raton all have new hotels of the highest type, while several other cities have new high class structures under way which will be finished soon.

Another great step forward over last year's conditions is the adoption of the uniform motor vehicle code. This advance in legislation will have a large appeal to eastern tourists who are used to abiding by the same code in their home states. The new motor vehicle code provides for greater safety on the highways while taking away at the same time that bugaboo of the tourist, the hard boiled traffic cop. The new code also makes it impossible for small towns to lay down speed traps to catch the unwary tourist who is thereupon invited to help pay the town's taxes.

Touring information of a more up to date nature than has been available before is ready for the tourist this year through the cooperation of the various touring agencies, chambers of commerce and the highway department. This service is undergoing constant improvement work to bring it up to a plane of high usefulness to the tourist and state traveler.

A few of the roads which have been worked on the past season or are being worked on now and which will be of definite benefit to tourists are: U. S. 80, The Broadway of America oil work, Carlsbad Cavern, guard rail, new surfacing; State road 2 between Roswell and Carlsbad, oil work and new federal aid project; San Juan Basin roads, new bridges and road projects increasing accessibility to Aztec Ruins; Zuni road, increasing accessibility to Ramah; Inscription Rock and Zuni; Acoma road, new bridge and light grading; state road 11 between Silver City and Springerville, new projects aiding in bringing the hunting and fishing region of the Mogollons closer to supply points; Hillsboro-Kingston new project making the Black Range summer playground more accessible; La Luz-Highrolls, same for the Cloudcroft playground; Hope-Mayhill-Elk, east side of the Sacramentos gateway; Socorro-Magdalena gateway to Datil region, new project; Socorro-Belen, major link on America's oldest road, new projects, etc.

Tourists to New Mexico this year should be pleased with the steps which have been taken to make their stay in the state more enjoyable, says the service bureau. Early reports from the vanguard of the season's tourists indicate that this result is being achieved.

BAPTIST ASSEMBLY BUILDING AT RUIDOSO NEARING COMPLETION

The assembly building of the Baptists of southern New Mexico, located in the Ruidoso section is nearing completion and everything will be ready for the annual encampment from July 6th to 14th inclusive.

The plan and purpose of the encampment, while intended to promote the religious welfare, is intended to be recreational as well. At the first gathering in the building, two prominent Baptists will deliver a number of addresses during the sessions. Dr. W. F. Fry, of Abilene, Texas, professor of Bible in Simmons University will give daily lectures on the Bible, while Dr. J. J. Cook, former pastor of the Roswell Baptist church will bring evangelistic messages.
