

# THE MESSENGER

HAGERMAN, CHAVES COUNTY, NEW MEXICO, THURSDAY, SEPTEMBER 12, 1929.

NUMBER 39

Hagerman—Where the spring with healing in its waters is located.

## ∴ DEXTER NEWS ∴

### DEXTER GIN OPENED FOR 1929-30 SEASON

Two bales of cotton was ginned at Dexter last Saturday, the gin is baling a few bales each day this week, but many of the farmers will begin their picking the last of this week. The new cotton house is completed and is a great addition to the gin.

### FACULTY OF DEXTER SCHOOL IS COMPLETED

A nice program marked the opening of the Dexter school last Monday morning. From the number of pupils enrolled it seem Dexter will have all she can take care of. The commercial teacher recently secured will arrive from Silver City in a few days.

### DEXTER DELIGHTED WITH NEW MINISTER

Rev. Anderson, the new minister of the Presbyterian church, spoke at the morning and evening service last Sunday. The congregation is much pleased and feel greatly indebted to Rev. Hedges for securing this eminent pastor for Dexter. Rev. Jones of the Methodist church dismissed his evening service so his congregation might hear Rev. Anderson, and Rev. Hedges with his Hagerman congregation also attended the evening service. This pleasing minister will speak at the Presbyterian church each Sunday at the morning and evening service. All are invited.

### ATTENDS WEDDING IN ROSWELL

Mr. and Mrs. F. L. Mehlhop, Mrs. David Davis, Josh McNeal and Miss Alma Thompson attended the Zink-Griffith wedding at the Zink home in Roswell last Sunday morning at nine o'clock.

### LADIES AID SOCIETY MET TUESDAY AFTERNOON

The Ladies Aid Society of the Presbyterian church met Tuesday afternoon for the purpose of electing new officers for the year.

### CHAVES COUNTY COTTON CARNIVAL BOOSTERS HERE

A group of about thirty-cars carrying live wire boosters of the Chaves County Cotton Carnival from Roswell passed through Hagerman early Wednesday morning.

With horns blowing, they drove the length of Main street and stopped around the bank to distribute literature advertising the event.

The Roswell people were representing the Retail Merchants Association of Roswell, and numbered many prominent business men of that city. The group of boosters were under the leadership of J. E. Waterman, president of the Retail Merchants Association.

### LOCALS

Pecos Valley Prayer books have begun to arrive.

Clyde Keeth was in Artesia Monday attending to business affairs.

Wallace Goodwin was in town Sunday from Artesia, where he is working.

C. H. Tietzort, traveling agent for the Western Weighing and Inspection Bureau was in town last week.

Mr. and Mrs. L. M. Vickers of son, Frank, and Mr. and Mrs. Elmer Lankford were Lake Arthur visitors Sunday.

Rev. Van Bonneau, of Dodson, Texas arrived last Saturday to conduct a protracted meeting for the local Church of Christ.

Frank Bauslin went to Roswell last Sunday and returned with Mrs. Bauslin who had been visiting her daughter Mrs. Bullock.

Monday the high school agricultural class made an extension trip to Diamond A ranch, where they met the county agent and several state agricultural officers.

Miss Eida Dye has arrived from Fort Worth, Texas to attend Hagerman High school. She is a sister of Harold Dye and is staying at the home of Mr. and Mrs. Dye.

Dicky: "My dad is an Elk, a Lion, and a Moose."  
Mickey: "What does it cost to see him?"

of the community. We welcome this department of our paper back with the greatest of pleasure.

Several of the farmers suffered hail loss last week.

John Mehlhop left Monday morning for Roswell, where he entered the N. M. M. I.

Nicholas Crain leaves the 14th for Abilene, Texas, where he will attend Simmons college this year.

Miss Josephine Martin leaves the 15th, for Know College, where she is taking special work in music.

The Worman well located at Blackdom has secured another rig and drilling will be resumed this week.

The State Game Commission poisoned Lake Van last Saturday, making swimming prohibitive until the poison has been drained from the Lake.

Mrs. T. R. Blackmore and son, Bobbie, of Perrygrove, Arkansas and R. O. Hanny of Springdale, brother and sister of Mrs. W. T. Phillips, are visiting Mrs. Phillips and Frank.

Mesdames O. B. Berry, Breeb Hurst, and Misses Dorothy and Breebia Gean left Wednesday for Sherman, Texas, where the young people will attend Kidd-Key this year. Mrs. Berry and Mrs. Hurst will be home Sunday.

Rev. Atwood, pastor of the Baptist church of Roswell was in Dexter last Saturday with his niece, Miss Edith Jones, who has charge of the English department of the Dexter school, Miss Jones will spend this week in Roswell with her uncle's family.

Mrs. Frank Reinecke and little Ruth left last Saturday with the George Weaver family for Albuquerque, Esther Weaver will stay with the J. W. Sharp family and attend the State University this year. Mr. and Mrs. Weaver, Mrs. Reinecke and Ruth will visit Mr. and Mrs. Harry Reinecke before returning to Dexter.

WILL YOU TELL  
Our advertisers, please, that you noticed their advertisement in The Messenger.

### DEXTER TURNS GAS FRANCHISE DOWN

At the gas election meeting of the town of Dexter held on Tuesday, September 10, it was voted not to grant the gas franchise to the Pecos Valley Gas Company because of too high rates.

There were seventeen votes cast for the assent, and nineteen in the negative. Those opposing the granting of the franchise contended that the same rate of 67½ granted Roswell should be granted to Dexter instead of the \$1.00 rate asked by the Pecos Valley Gas Co.

### FOG AND SHOWERS

Many of the mornings have been foggy, giving the feeling of impending winter. Tuesday, a fine mist fell throughout the entire day, increasing into a rain several times. Several cars which had evidently been left out over night were stranded on the highway because of water in the carburetors and gas lines. It seemed to be an unlucky day for women drivers because two cars full of women and girls were stopped on the highway because of water in carburetors, etc. Local residents seem confident, however, that there is still some summer weather in store for us regardless of the occasional wintry aspects.

### OIL LEASES BRING STATE \$10,505.32

SANTA FE—The monthly auction of oil leases held Tuesday afternoon brought \$10,552.32 for nineteen tracts State Land Commissioner A. D. Crile said yesterday. The highest price bid was \$10 an acre by the Transcontinental Oil company for acreage in Lea county.

### COTTON GINNED

WASHINGTON, D. C.—Cotton of the 1929 crop ginned prior to September 1 was announced Monday by the census bureau as 1,570,030 running bales, counting 36,894 round bales as half bales.

Ginnings prior to September 1 by states: Arizona 1,771; California 280; Oklahoma 9,114; and Texas 811,719.

C. G. Mason returned Friday morning from Tucumcari, N. M., where he has been attending a meeting of the New Mexico Undertaker's and Embalmers association which lasted three days.

### NEW GAS LINE BEING SURVEYED BY P. V. GAS COMPANY TO CLOVIS

All of Roswell will soon be enjoying natural gas, supplied by the eight inch main from the Artesia field. Connections in the various parts of town are being made as rapidly as possible. The Pecos Valley Gas Co., is making a third survey of a line from the Texas Robinson well in eastern Eddy county to Clovis. Workmen are laying a main from Clovis south in the direction of Roswell, but it has not been determined which of the three routes the company will use piping the gas to Clovis.

J. Buster Brown of Las Vegas, N. M., was in town Monday visiting his brother-in-law O. J. Ford. Mr. Brown is chief of the Las Vegas fire department and is also the owner and proprietor of "Brownie's" cleaning establishment in Las Vegas.

### COTTON PRODUCTION IS 14,825,000 BALES IN A RECENT FORECAST

WASHINGTON—A cotton crop of 14,825,000 bales this year was announced Monday by the department of agriculture, as indicated from the condition of the crop on September 1, which was 55.4 per cent of a normal.

The forecast was the first official announcement this year of the size of the crop and compared with 14,478,000 bales of 500 pounds gross ginned last year. The condition on September 1, compares with 60.3 per cent on that date a year ago and 56.1 per cent the ten year average condition on that date.

Acreage left for harvest was estimated at 46,594,000 the abandonment being placed at 3.8 per cent, after July 1 when it was estimated 46,946,000 acres were in cultivation. The ten year average abandonment is 3.6 per cent.

### DAIRY CLASS MEETS

The dairy course, that is being taught by Prof. Hulet, met last Monday night. The previous night's discussions have been made on the feeding of dairy animals, but at this meeting each representative tested milk. Campbell Burrell's cow made the best test, testing 6.1%.

Those present were Messrs. Stine, Meeks, Hulet, Campbell Burrell, Alton and Marvin Menefee, Ray and Royce Lankford, Kenneth Stine and Olan Campbell.

Those making first tests were: Royce, Campbell, Kenneth and Alton. Those making second tests were: Olan, Ray, Marvin and Leon Meeks.

### LOCALS

Volney Brown returned last week to Fort Sumner.

Mr. and Mrs. W. H. Keeth were Roswell visitors Thursday.

Mr. and Mrs. Levi Barnett went to Hondo Monday in search of cotton pickers.

Mrs. J. A. Hedges and mother, Mrs. MacKintosh, were in Roswell Monday transacting business.

Mr. and Mrs. Loui Burck attended the old timers picnic at the First Methodist church in Roswell last Sunday.

O. J. Ford and Jim King went fishing on the Pecos Friday night, but they report that the only thing they caught was a cold.

C. O. Holloway and wife, and son, Chalmers returned Sunday night from Santa Fe, where they had been visiting friends. They report a fine trip.

Mr. and Mrs. J. Cowen attended church in Roswell last Sunday. There was a gathering of old timers who had been in this country over 30 years.

Elmer Lankford is building a new house for the use of cotton pickers this fall, on his ranch north of Hagerman. Mr. Lankford expects to convert the house into a garage later.

Mr. and Mrs. F. A. Kiper left last week for their home in Berryville, Arkansas. Mr. Kiper had been out here for the past two and a half months. His son, Andrew, took him back.

Mrs. J. L. King returned Thursday from Ravenna, Texas where she visited her daughter. Mrs. King returned by way of Commerce, Texas, where she visited with another daughter. Mr. King met her at Pecos, Texas.

### ANOTHER CLASS IN DAIRY PRODUCTION IS TO BE HELD MONDAY

### Milk Will Be Given Test—Number Of Farmers Plan To Make A Production Record Of Their Cows By Weighing Milk.

Prof Hulet announces that there will be a meeting of the class in dairy production Monday night in the Agricultural room at the school building at eight o'clock.

The discussion will be on the care of milk. Also there will be milk testing and anyone having one cow or more is invited to bring a sample of the milk and test it under the direction of Mr. Hulet.

The sample of milk should be taken by pouring the milk from one bucket to another several times as soon as possible after milking, and then pouring about a half pint into a jar which can have a lid placed tightly upon it.

The milk is to be brought to class where the test will be made. There are a number of farmers who are planning on keeping a production record of their cows by weighing the milk of each milking and recording it and who are also planning on bringing a sample of milk from each milking one day each month to the agricultural department of the high school to be tested. With a carefully kept feed record, it will be possible to locate any "boarders" that the farmer may have.

This testing service will be free and anyone desiring to find out what his cows are doing, should get in touch with Mr. Hulet.

### SOCIAL ITEMS

#### L. C. CLUB

The L. C. Club met at the home of Mrs. M. D. Menoud on Thursday, September 5th. This being the first meeting of the season it was more of a social. After a short business session delicious refreshments were served to Mesdames I. E. Boyce, Charles Mitchelet, J. W. Wiggins, E. D. Menoud, Jim Williamson, M. A. Jacobson, Ross Jacobs, Jim Sanders and five visitors, Mesdames Alice Hedges, Jim Mischelet, Misses Virginia Jacobs, Grace Menoud. The next meeting will be with Mrs. C. G. Mason Thursday, September 19.

#### B. Y. P. U. SOCIAL FRIDAY

Thirty-two merry young people enjoyed a B. Y. P. U. social Friday night at the Elton Lankford home. Games were played during the early part of the evening and then the guests were led through a room each receiving a large piece of watermelon. Every one had a fine time, and although a few rinds flew after the feast, there were no casualties.

#### LAWN PARTY

On Friday evening of last week, Miss Nadine Mann entertained a group of twenty-two young folks at a lawn party at her home. Various games were played, after which watermelon was served to the guests.

#### PARTY FOR MILDRED KEY

A surprise party for Mildred Key was given at the Key home Tuesday evening in honor of Miss Key's eighteenth birthday. There were nine young people present besides the hostess. Games were played during the early part of the evening, after which ice cream and cake was served. Many nice presents were received by Miss Key.

Mrs. R. H. Harris, daughter of Mr. and Mrs. R. Jennings, departed Sunday for Phoenix, Arizona. She was accompanied by Robert Mitchell, her son. Mrs. Harris plans to visit her sister, Mrs. Bob Johnson, at Bisbee, Arizona en route.

#### LAKE ARTHUR GETS FIRST BALE COTTON

The Lake Arthur community gets the honor of ginning the first bale in Chaves county this year. The first bale was ginned by J. M. Parnell, living southwest of town and was ginned Saturday by the Lake Arthur Gin Co., Mr. Parnell has several bales opened and cotton will soon be coming in rapidly according to J. R. Spence, manager of the Lake Arthur Gin.

THE TWENTY-EIGHT

### SALE OF 1929 COTTON IS GINNED AT HAGERMAN ON MONDAY

### Is Crowned By J. L. Bartlett — Bale Weighs 546 Pounds — Averaging Thirty-Five Per Cent Out.

The bale of cotton of the Hagerman town Monday was ginned by J. L. Bartlett, on the highway two miles from town.

The bale had 1460 pounds of cotton and got 511 pounds of lint—thirty-five per cent.

Mr. Akin ginned this bale free. At the time of the sale the cotton has not been sold. The bale weighed 546 pounds and brought \$26.00 per ton.

The Cooperative Gin was ginned by J. L. Bartlett, and the bale was brought in by Bros. of Lake Arthur. The bale was ginned by C. W. Cole. The bale averaged 1500 and 546 pounds of lint.

The picking has begun in earnest and is just getting warmed up. Cotton years are fine because of lack of production in this country. The outlook for the year is good. Many travelers have expressed interest in making the Pecos home in the future, because of the fine crops of alfalfa, and many cuttings of alfalfa, and now this crop of cotton, the farmers look forward to a better financially.

### SCHOOL NOTES

Members held their first class Tuesday. Miss Pearl Rich was chosen sponsor of the class. The following officers were elected: president, Dennis Harris; vice-president, Joyce West; secretary, Raynal Campsten; treasurer, Royce Lankford; yell leader, Hanson; class reported, Hedges.

The class flower is the carnation in shades of red and white. Monthly dues of twenty-five cents were agreed upon to help defray expenses of the class.

### CHAPEL NOTES

This year will occur the annual chapel each Tuesday morning. It will be under the direction of Miss Kimberley, and accompanied by the orchestra. Kenneth Stine played a solo which was enjoyed by everyone.

There made some announcements relative to the care of the children of the danger zone on cars when the drivers are in a hurry to get to some part of town. He then invited the speaker of the morning, Rev. Mr. Hall, pastor of the Methodist church.

Address was not of a very nature, but it had several suggestions which the children will do well to heed. These were such a way that no one will be in the way of the speaker. We hope that they will have the occasion to listen to more talks by Mr. Hall in this school term.

Frank Bauslin went to Roswell last Sunday and returned with Mrs. Bauslin who had been visiting her daughter Mrs. Bullock.

Monday the high school agricultural class made an extension trip to Diamond A ranch, where they met the county agent and several state agricultural officers.

Miss Eida Dye has arrived from Fort Worth, Texas to attend Hagerman High school. She is a sister of Harold Dye and is staying at the home of Mr. and Mrs. Dye.

## OPPORTUNITY GROWLS

Of all the animals roaming the jungles of the earth; of all the fearful denizens haunting the minds of men; of all the pad footed noiseless beasts which shadow men, opportunity is the most fearless, the most insidious, the most mysterious and cunning.

To some it presents a friendly appearance, purring, fawning. To others it comes slinking ominously, growling, snarling. Still others it scratches, bites and sucks the very life blood.

Opportunity is sure. Opportunity is omnipresent. Wherever one may go, opportunity is there before him, awaiting his answer. Some believe that the small town presents few opportunities. True, there are not many, but such as they are, they are challenging; they are worthy.

Opportunity is stalking the streets of Hagerman. It is growling. It is snarling.—It is demanding attention. It must be answered; it will be answered. The question is "Will the citizens who are already here answer, or will others come in who will reap the harvest?"

In a town where houses cannot be found for occupancy, opportunity says, "BUILD." In this day of home financing plans, any one of moderate means can build a nice house. Would such a venture pay? Opportunity says, "Try." Careful reasoning says, "Yes."

In a town where the tourist cannot stay over night because of lack of accommodations, opportunity shouts "Why not a camp ground?" Would not this also pay? What other town could so attract tourists as one with a spring that will heal disease?

In a town of the size of ours, why not a nice hotel? Opportunity can only say, "Make the venture." Investigation can only state, "It would pay."

When opportunity comes purring and fawning in friendship, you should listen. W. W. Akin would have had a dickens of a time putting a cotton gin here; the Farmer's Cooperative gin would have been unknown had not a young fellow by the name of Whitney married Miss Opportunity long ago and let her furnish the key to his invention.

Those mushy letters from our best girls could seldom reach us to-day if a kid by the name of Watts had not recognized the ghost of opportunity escaping in steam from the spout of a tea kettle.

Similarly, the future town of Hagerman will be in a bad shape if some one doesn't listen to the growls of that animal called opportunity.

## FEARS

Long ago on man's arrival, fear was good and helped survival, told the fighting sun of a gun when to quit and start to run, else the husky brontosaurus had not left a father for us. But our fear in modern days hinders us in many ways, petty fear that gnaws and eats, robbing life of all its sweets. Anxious thoughts are Jonahs, hexes, building up some mean complexes. Worry is a pivot hung, whence our troubles may be swung back and forth here and there never getting anywhere. That we should not give a cuss for the things ahead of us, bull ahead and go it blind, nay that is not in my mind. We should treat our troubles fairly, stand them up and face them squarely, then decide the facts in sight whether we should run or fight. This hard task is on you laid, keep your children unafraid. Almost all our panic fears have their roots in early years. I when summer days are warm, dearly love a thunder storm, always loved them from a child, never saw one yet too wild; but I look to left and right, half expecting some fearful sight passing graveyards late at night.—Exchange.

## THE WAY TO WIN

As we have often remarked before, if the democrats expect to get anywhere in 1930, they will have to quit spending so much time telling about the principles of Thomas Jefferson and what the party has accomplished in the past and tell what the party expects to accomplish in the future. In the past campaigns some of the long winded speakers appear to want to entertain their audience by reciting history that any school boy ought to be familiar with. This is all good in its place, but a three hour speech does not set very well with the average voter, who is usually occupying the no back boxing plank at an improvised campaign seating arrangement.

Most of us have been spoiled by the auto, the radio and the soft seat. When therefore we go to a political speaking and wishing to be polite remain on the hard seat for three hours, listening to a recitation of ancient history, the reaction isn't going to be democratic.

The usual order of things are almost reversed this year. The tourist can almost tell where the eastern and southern state line is by observing the range and crop conditions along the highways.

## HOME OWNERSHIP SHOWS THRIFT TREND

By S. W. Straus, President American Society for Thrift.

The immense development in home ownership, especially as evidenced in the increase in suburban building is a promising sign of thrift progress.

Much suburban building represents individual home ownership. The own your own home movement is also present in the smaller towns and cities.

Rather than being huddled in quarters not their own, people are more and more trying to live in semi-rural sections. In their plans for homes they are showing every indication of a desire to have modern structures that are far more than four walls. Beautiful types of architecture are now being studied out for the ideal small home.

While it is not possible to tell how many millions of dollars will have been absorbed by new home owning projects this year, it can be said that more Americans are now owning homes of their own than ever before.

Good roads and the automobile have enabled people to gratify their desire to enjoy better standards of living—to live amidst the beauties and comforts of a semi-rural existence where they may have their own gardens and flowers and ample room for rightful recreation and pleasure.

As the result of this great movement thousands of American are becoming home owners to-day who would never have taken this step otherwise.

It is a fortunate circumstance that this great movement—this migration to the suburbs, which is bringing with it such a tremendous amount of home ownership has been started. It has a general stabilizing effect, the value of which is beyond calculation.

The man who owns his own home is a stockholder of the United States. He owns a tangible part of it. The erection of his own home helps create new values for others as well as for himself. Through it communities grow and thrive, and the entire range of social conditions is bettered.

## THE LATEST SMITH STORY

Al Smith stories are becoming so numerous they have replaced the flivver gags of a few years ago.

Scarcely a day goes by but what someone tells one and the irrefragable Al gets his name in the papers again.

The latest is that Al will be appointed U. S. senator to succeed Royal Copeland. Copeland has shown no intention of resigning and Smith has shown no public desire for the office—but anyway its a good story.

When Al Smith was defeated for the presidency last November, those who opposed him politically hoped he was permanently on the shelf. Smith helped the idea along by announcing his retirement from politics.

But this man Smith is a remarkable individual. He rose from the sidewalks of New York to the governorship. He can operate a truck, sell fish, write an autobiography or build a skyscraper. It is not to be wondered that even though he lost the presidency, Smith has not lost the limelight.

Whither all this is leading, we do not presume to guess. We feel quite certain it is not toward the U. S. senate. The idea of Smith getting another man to resign in order to take his place doesn't fit into the picture. It doesn't sound like Al.—State Tribune.

## WHAT IS A BOY?

He is a person who is going to carry on what you have started.

He is to sit right where you are sitting and attend to those things you think are so important when you are gone.

You may adopt all the policies you please, but how will they be carried out depends upon him.

Even if you make leagues and treaties, he will have to manage them.

He is going to sit at your desk in the Senate, and occupy your place on the supreme bench.

He will assume control of your cities, states and nation; your prisons, churches, schools, universities and corporations.

All your work is going to be judged and praised or condemned by him.

Your reputation and your future are in his hands.

All your work is for him, and the fate of the nation and of humanity is in his hands.

So it might be as well to pay him some attention.—Boys' Club News.

## OIL INDUSTRY AND ROADS

Impatience is sometimes expressed by persons unfamiliar with conditions, because good roads are not built in all sections, and all at the same time.

Experience and experiments have proven that a well designed and carried out road construction and improvement program is far better than a hit and miss system that builds short stretches of temporary roads and then practically abandons them.

Building roads on the right basis is good business and, like all good business, must be planned and a definite program outlined which will get the best results for the least expenditure of time and money.

At the present time "secondary roads" paralleling and radiating from our through highways, are of the utmost importance to relieve traffic congestion and give the back country its fair share of public expenditures for road purposes.

Asphalt and road oils are playing a leading part in secondary road construction, illustrating another angle from which our country is interested in the oil industry.

## UNITED STATES LEADS IN FLYING

Four hundred hours "off the earth" is the latest continuous flight record for planes, established by U. S. pilots. The "Graf Zeppelin" has completed two trips across the Atlantic, and landed at Lake Hurst recently after flying across the continent. Regular dirigible service between the United States and European countries is promised within the year. The United States navy is building two giant dirigibles larger than the "Graf." A combined railroad and airplane service is now carrying passengers between New York and Los Angeles in about one-third the time the trip can be made by rail only. Airplanes carrying a large number of passengers and having berths in which the passengers can sleep are now being built. The navy has completed what is believed to be the fastest hydroplane ever built, and is expected to make four hundred miles per hour. Thus, the United States is beginning to lead the world in aviation, which is just and proper.

## EARLY WINTER PREDICTED

An early winter has been predicted by old timers for the Pecos valley. Cooler weather with much moisture has set in rather soon this year, many say. Fogs and mists have made heavy cover feel comfortable.

Varieties of wild fowls not ordinarily seen here until October have been seen flying across the valley. Bunches of geese and sandhill cranes are reported in Curry and Roosevelt counties. Livestock in many places have "put on their winter coats," it is said.

The National Tuberculosis Association says: "Tuberculosis gains among girls, due to smoking, late hours and inadequate diet in order to reduce; victims of 'flapper' age; death rate, 59 per cent greater than among boys five years ago, is now shown to be 100 per cent higher."

**TO WORK UNTIL 15th**  
SANTA FE.—With the state highway department in possession of enough money to carry on operations until September 15, no definite arrangements for either retrenchment or further financing has been made, W. C. Davidson, state highway engineer said Friday.

## WRECKAGE OF PLANE FOUND ON MT. TAYLOR AFTER A LONG SEARCH

ST. LOUIS, Missouri.—Transcontinental Air Transport headquarters here announced late Saturday that wreckage of the T. A. T. passenger plane "City of San Francisco" had been found on Mount Taylor, New Mexico, with all occupants dead.

It was announced that the T. A. T. plane "City of Wichita," which carries radio sending apparatus, had been dispatched to Mount Taylor.

A statement issued by Vice-President J. V. Magee of T. A. T. here said:

"George Rice, Western Air Express pilot, reported to T. A. T. officials he found the plane on the south side of Mount Taylor. John Collins, western superintendent of T. A. T. talked with Rice on the telephone and asked Rice if there was any possibility that he was mistaken and Rice said 'positively no.' Rice stated he circled the plane several times and that it had undoubtedly crashed into the mountain, as it had burned up."

"Rice had been assigned to the territory where the plane was found by John Collins, who told Rice to concentrate on Mount Taylor. Rice returned to the Western Express field at Albuquerque where he talked on the telephone with John Collins at Winslow. Pilot Scott in T. A. T. plane equipped with radio picked up Rice at the Western Air Express field and started for Mount Taylor."

Donald Bartlett, vice-president of T. A. T. in charge of operations, and Magee said they accepted the report as correct and announced the five passengers and three crew members were dead.

GRANT — Funeral preparations Monday marked the final chapter in a story of eight lives snuffed out in the crash of a giant air liner against a mountainside as a pilot battled blindly for a haven of safety from a storm.

With the lips of five passengers, one woman, and a crew of three forever sealed, the cause of the crash of the City of San Francisco, Transcontinental Air Transport, Inc., plane on Mount Taylor, 20 miles from here, may never be known. A searching party of fifty men, including an Associated Press staff man, was led by Sheriff Bob Roberts up precipitous sides of Mount Taylor which thrusts its jagged peak nearly 12,000 feet into the sky that was once the lake of the "mistress of the air."

In a little canyon heavily wooded with giant pine trees, this party of 50 suddenly came upon the scene where charred wreckage marked the final resting place of the huge ship. Over a space of 150 yards the plane was strewn in bits, the largest piece of wing section about 10 feet long. Three motors that roared their challenge to the elements when the City of San Francisco left Albuquerque, N. M., last Tuesday morning at 10:22 o'clock were shattered and strewn along a path cut by the plane as its journey was so suddenly and disastrously ended.

What was once a luxurious cabin of the plane lay before the searchers, a mass of melted and twisted metal and within were the broken bodies of the passengers and crew, burned beyond recognition.

On the arm of one of the pilots, a wrist watch was strapped, a single talismanic remnant of the wreckage. His hands were stopped at 11:01.

Sheriff Roberts examined a watch of one of the passengers. It showed 11:04. It was certain proof that the plane was winging its way on time when tragedy intervened.

### CAT FIRST AIR RIDER

STOCKHOLM, Sweden. — Sweden's first aerial passenger was a cat, it has been brought out by the Nya Dagligt Allehanda, a Stockholm evening paper. The animal was carried aloft on September 17, 1784, in the first balloon ever to be released in Sweden.

This balloon had been manufactured in Stockholm by the physicist, Prof. J. C. Wilke, and a lieutenant, Baron Goran Karl Silfverhjelm, from especially woven satin, and coated with a thin gum solution. The gas which filled the 12-foot bag had been produced from iron filings, water and a solution of vitrol.

### FIRST WOMAN TO SING OVER TELEPHONE DIES

Mrs. Alice Henderson, who claims to have been the first woman to have sung over the telephone, died recently in the city of Detroit. Before she was married she was the leading soprano in the philharmonic choir at Brantford, Canada. At that time Bell had constructed an experimental telephone system between Brantford and his summer home at Tutela Heights, and she was asked to sing over the wire. This she did, the experiment proving a great success.

"Mr." said the poor beggar, "will you kindly give me a dime for a sandwich?"

"Weel," said the Scot, "let's see the sandwich."

By AB Carter

## NEW LINE UP IN THE SENATE MAY PLAGUE PRESIDENT HOOVER

WASHINGTON, D. C.—Surprising changes in senate personnel, including a larger group of progressives may soon plague President Hoover and the conservative G. O. P. leadership, according to reports brought to Washington Monday by republican leaders here for the meeting of the national committee.

The 1930 elections, political rumblings reveal, may result in as sharp a realignment as in 1922, when a republican majority of only one vote led to some of Calvin Coolidge's most disastrous legislative defeats.

The predicted upset is feared partly because dissatisfaction with tariff proceedings and partly because of the natural phenomenon of a swing back from the huge Hoover majority last fall.

Present progressives up for reelection are expected to return, including Borah, Walsh of Montana, McNary and Norris. Norris has not yet announced his candidacy, but his friends are urging him to run again.

Despite his support of "Al" Smith last fall, it is not expected the reactionary republican machine can find anybody to beat him. Walsh has already tossed his hat in the ring.

This group may be increased if Iowa republicans can persuade William S. Kenyon to quit the federal bench and reenter the senate arena. Steck, democrat, comes up for reelection, and it is thought that Kenyon, a popular progressive, could win easily. Kenyon has not committed himself.

Cordell Hull, now a representative has announced for election to the senate in Tennessee, and his chances of victory might be good, in view of his long record and popularity.

W. E. Brock, millionaire candy manufacturer of Chattanooga, has been named to succeed the late senator Tyson, but many think Brock will not seek the nomination.

Politicians, for some reason, place credence in reports that "Al" Smith may succeed Senator Copeland of New York. According to the story, Copeland will be given a \$25,000 job as head of a new sanitary commission, and Governor Roosevelt will name Smith in the senator's place. The 1928 presidential candidate is known as a progressive on many questions, and would undoubtedly become spokesman for democrats of that group.

Senator Warren of Wyoming, a great conservative, may be missing. He is 85 and has lately shown signs of tiring from the strain of his senate duties. Senator Schall of Minnesota, whose earlier progressive tendencies seem to have disappeared, may have difficulty coming back. Friends of Walter H. Newton, secretary to Hoover, are grooming him for the senate and hope the administration will back him.

A conservative estimate places the area burned in western national forests from January 1 to August 20 at 280,000 acres, it was announced orally on August 23 in the Department of Agriculture, on the basis of the latest telegraphic reports to the forest service.

Old Timer—"When I was your age I thought nothing of walking ten miles to school."

Modern Boy—"I don't think much of it, either."

## COTTONWOOD ITEMS

(Miss Alma Bradley, Reporter)

Kermit Southard is employed at the Dexter Cash Store for a short time.

George O'Bannon left Tuesday for Missouri to visit relatives and the old home place.

J. C. Garner left for Texas last week where he will attend to business and visit relatives.

Misses Hannah and Emma Briscoe and friends of Artesia were visiting friends on Cottonwood Sunday.

Mr. and Mrs. J. N. Moore of Wichita Falls, Texas, were visiting at the home of Mr. and Mrs. H. B. Worley and family last week.

Mr. and Mrs. E. R. King and children of Lake Arthur and Mr. King's father and mother, Mr. and Mrs. King of Vernon, Texas were visiting on Cottonwood Sunday.

Mrs. J. M. Norris and daughter, Dorothy and sons, James and Wayne drove over to Las Cruces Wednesday where Miss Norris entered school. Mrs. Norris and sons returned home Thursday.

W. A. Watson and daughters, Misses Grace and Pauline drove to Alamogordo where they met Mr. Watson's brother, Ross Watson of El Paso. They returned by way of Clouderot.

## HARRY PATTON IS NAMED JUDGE OF NINTH DISTRICT

SANTA FE—Harry L. Patton of Clovis was appointed judge of the ninth judicial district by Governor Dillon Tuesday, to succeed Judge Carl Hatch who resigned effective October 1.

Mr. Patton is a democrat and was attorney general one term, including the years 1917 and 1918, having been elected when the late Ezequiel C. De Baca was elected governor.

## SECOND FIELD DAY PROGRAM OUTLINED

The program for the second annual field day of the experiment station, to be held September 23rd, was definitely outlined at a recent meeting of the committee, held for that purpose.

President Kent will open the program, giving a short talk and introducing the various heads of departments, explaining briefly the functions of each department. The rest of the morning will be occupied by the farmers in visiting the cotton experimental plots.

A diversion from the field day of last year will be that besides viewing the work done by the experiment station, the farmers will be taken over variety field experiments with cotton which are grown by one of the Dona Ana county farmers, only a short distance from the college.

In the afternoon the visitors will be shown the work that is being done in corn and alfalfa. Two hours of the afternoon will be left open, at which time departmental heads and other assistants will show farmers thru their various departments and cover phases of the work in which farmers may be particularly interested. Visitors desiring advice or suggestions can consult the various specialists or members of the experimental staff at this time.

In addition to President Kent, Fabian Garcia, director of the experiment station and W. L. Elser, director of extension will also appear on the program of the day for a short talk each.

"Where is the barber who used to have the end chair?" asked the customer.

"We had to let him go," replied the boss. "He had too much talent."

"Whaddaya mean, talent?" asked the customer.

"He got so he illustrated his stories with cuts when he was shaving people," explained the boss.—Cincinnati Enquirer.

## NAMES JURORS FOR HIGHWAY GRAFT QUIZ

SANTA FE. — District Judge Reed Holloman Tuesday announced the members of the grand jury which will begin an investigation on September 13 of the charges of graft in the state highway department by Frank Quinn, equipment engineer.

These jurors who will also investigate other matters will report September 12.

The jurors are: R. C. Ten Eyck, Conociano Ortiz, Joe Burns, Frank Ortiz, Sr., James C. Cassell, Hubert Galt, R. C. Kinsell, Beatriz Vigil, Perfecto Gallegos, Ed Cartwright, Jino Villanueva, H. M. Jaramillo, Donaciano Gonzales, E. A. Carr, F. F. Gornley, F. F. Sosaya and Adelaido Rael.

IT WILL PAY YOU  
To read carefully all that our advertisers have to say.

## GINNING RATE PROTESTED BY VALLEY GROUP

SANTA FE. — Twenty-seven farmers of the Pecos valley have complained to the state corporation commission against the ginning rates in that region. The rate is 50 cents and, they say, is too high.

The commission fixed the rate at 40 cents for the Messilla valley, but did not fix it for the Pecos valley. Chairman Hugh H. Williams of the commission said the complaint was made too late to give the commission time to order any change in the Pecos valley for this ginning season. He has written the ginners, however, asking them to lower the rate.

"When Mike arrived home in San Pedro, he fell on his face and kissed the pavement of our native city."  
"Emotion?"  
"No, banana skin."

## Constructive Community Banking Service

In conducting the operations of this financial institution, we recognize certain obligations and consider it our duty to inform every resident of the complete service which we are here to render.

Strong enough to protect you—large enough to serve you—small enough to know you.

**MUCH COTTON IS USED IN MANUFACTURING AUTOMOBILE TIRES**

WASHINGTON, D. C.—Use of cotton in the manufacture of automobile tires is increasing, the department of commerce announced recently in the sixth of a series of articles it has issued as a result of the investigations it is making of industries, arts, trades and professions in an effort to increase the use of cotton.

The survey showed that approximately 700,000 bales of cotton were used in the manufacture of automobile tires in 1928 as compared with 250,000 bales in 1921, an increase of 182 per cent. Fabrics and their use in the tire include cord and fillerless cord fabric in the carcass; the square woven fabric in the valve pads, chafer stripes, carcass and reinforced breaker fabric, lenos breaker fabrics, enameling duck in the beads, snaburgs in the flaps, sheeting in the beads and flannel in the flaps.

Possibility exists for a vastly greater consumption of cotton by automobile tire factories through the substitution of cotton sacks for bur-lap bales as wrapping, the department said.

Automobile tires are manufactured entirely of rubber and cotton, with the exception of the wire used as beads. The department explained the various forms of rubbers as it is imported; namely, biscuits or large lumps shaped like a half foot ball, crepe of a continuous thin sheet having the crinkly appearance of crepe, smoked sheet and latex and described how it was broken down and mixed with cotton in tire manufacturing. Study of new uses of cotton is being made under authority of a law of which Representative Marvin Jones, Texas, was author.

**RATTLESNAKE STEAK**

Students at the nature study camp of the Pennsylvania State College consider rattlesnake meat a great delicacy. Here is the sort of menu the nature students like best and the manner of preparing it:

Snapping turtle soup, fried rattlesnake, roasted Indian turnip, creamed hemlock fungus, green briar salad with staghorn sumac dressing, and wild huckleberries.

But is rattlesnake that is the really startling part of the bill of fare.

Catching the rattler is the only hard part about it. You can use your own method in this part of the job, taking care not to bruise, the victim, for that spoils the meat. Anyway, once the snake is caught, here's the procedure:

Grasp the reptile back of the head and decapitate it with a hatchet. Cut off the rattlers for souvenirs, turn the victim on its back, and with a sharp knife slit it from head to tail cleaning and dressing the snake as soon as this slit is made. Then strip off the beautifully marked skin, to be tacked on a board, dried and salted for another souvenir—and take the end containing length of clean, white meat and put it on ice for 24 hours.

Next day the meat is ready to cook. Get a frying pan hot, melt some butter in it, cut the rattler meat in lengths about half an inch long, roll them in flour or in bread crumbs, and fry them a nice golden brown.—Inland Oil Index.

Sergeant—Halt! You can't go in there?

Private—Why not, Sergeant?

Sergeant—Because its the colonel's tent.

Private—Then what have they got 'Private' over the door for?

**INSIDE INFORMATION**

Oysters, clams and other sea foods are among the best known sources of iodine among the common foods.

Do you know Farmers' bulletin 1530-F, "Fitting Dresses and Blouses?" It will help in your dress making problems.

Iron rust stains on white materials often respond to lemon juice. Spread the stained place over a vessel of actively boiling water and then squeeze lemon juice on the stain. After a few minutes, rinse the fabric and repeat.

Try a mock duck when you want a palatable, inexpensive baked meat. It's really a flank steak, stuffed with a bread crumb dressing, rolled, tied, and baked. Be sure to roll it lengthwise so that in carving the meat is cut across the muscle.

Bacon sandwiches out-of-doors can be made wherever one's picnic party happens to be. Each person can cook his own pieces over a fire in the woods with the aid of a forked stick. Many persons enjoy a leaf of crisp lettuce in a bacon sandwich.

Here's a good September menu: Corn soup, made from fresh corn cut from one cob; Omelet with Spanish sauce, which contains tomatoes and peppers; rice; new yellow or white turnips; apple sauce from some of the first windfalls, with cup cake.

A simple remedy for a seorch stain is to moisten the stain with water and place in the sun. For more serious cases a piece of cloth moistened with hydrogen peroxide may be placed over the stain, covered with a dry cloth, and the spot ironed with a medium hot iron. If the hydrogen peroxide soaks through, replace the upper cloth. Be careful to see that the hydrogen peroxide does not touch the iron as it will cause it to rust very rapidly. Rinse the garment thus treated before ironing. This method must be used carefully on colored fabrics as the dyes may bleach out.

**DROUGHT AFFECTS THE NORMAL CROP YIELD**

WASHINGTON, D. C.—Due to widespread drought which affected nearly the whole country during August, crop yields are now expected to be nine per cent below the yields of last year, and six per cent below the average during the preceding ten years.

The department of agriculture recently announced the condition of corn on September 1 was reported 67.9 per cent of normal or about 11 points lower than August 1 and about 10.5 points below the per cent reported a year ago.

Ordinarily, the department said, there is a decrease in condition of only two to three points from August 1 to September 1.

A certain man in the meat business made rabbit sausage.

So much sausage was sold that after while he began to adulterate it with horse meat.

His customers found out the adulteration and had him brought before the judge.

The judge asked him how much horse meat he mixed with his rabbit meat.

"Oh, about 50-50," he said.

"What do you mean by 50-50?" asked the judge.

The man replied, "vun rabbit und vun horse."

Believe it or not the east is having a drought.

**VEGETARIAN FAD IS NOT NEW EVEN AMONG THE MANY ANIMALS**

The vegetarian fad is not new. Dogs and foxes of ancient times were devotees of this supposedly modern practice, according to recent statement by E. B. Powell, in charge of fox and dog experimental work for Purina Mills.

"It is true," Powell says, "that the fox and dog of ancient times did eat meat in the form of small game, but when they killed their prey, the first thing they did was to eat the vital organs and intestines. By doing this, they got a large quantity of leafy vegetable matter which is high in vitamin content. If prey was plentiful, they frequently ate very little of the meat, eating the vital organs in preference to the body of the animal."

Dogs and foxes fed upon a straight meat diet for a year or two become sterile according to experiments conducted under the supervision of Mr. Powell. Not only did they become sterile on this diet, but their health was impaired because of a lack of vitamins A, B, D, and E.

It has been found that dogs thrive best when fed a mixture that contains cereals, and ingredients rich in vitamins which promote health and growth, in addition to the meat diet. These experiments show that cod liver oil, wheat germ meal and molasses contain the essential vitamins for the health and growth of the dog. If these products are cooked, however, the vitamins are destroyed. Thus the cooking that must be done to dog feeds, to insure their not spoiling and to make them more digestible, must be done before these vitamin carrying ingredients are added.

Yes, dogs and foxes are vegetarians, not because it is a fad, but because they are naturally vegetarians. No longer is a straight meat diet considered ideal for these animals; no—the diet containing cereals and such vitamin carriers as molasses, wheat germ meal, and cod liver oil in addition is receiving the more popular approval.

**HIGH ALTITUDE SAPS STRENGTH**

LEADVILLE, Colo. — The flying public may learn what altitude does to human bodies from a series of experiments performed here by a group of Harvard scientists.

Leadville is 10,200 feet above sea level, the loftiest city in the country.

The altitude here is found to reduce the energy by about one-fifth. But there is nothing to indicate that a person who flies up to the two-mile level has any less strength when he lands. The experiments show a wonderful adaptability of the body, so that it is probable a flier reabsorbs the lost strength as fast as he approaches the earth.

The tests are made by Dr. D. E. Dill, head of the fatigue laboratory of Harvard University, with Dr. John H. Talbot, research fellow; H. T. Edwards and S. A. Oberg, chemists, and A. Pappenheimer, Jr., all of the same laboratory.

"The results of the experiments," says Dr. Dill, "indicate that the maximum capacity of man for continued hard labor at this altitude is about four-fifths that at sea level. This would indicate that a long distance runner, for example, could maintain four-fifths of the speed that he could at sea level."

Concentration of oxygen in the lungs here is but about one-half that at sea level. Nevertheless, blood saturation in the lungs is approximately 90 per cent, while at sea level it is only five per cent greater. This is one of the experiments which Dr. Dill says shows the wonderful adaptability of the human body. The pressure of the air here is about two-thirds of that at the low altitudes.

The methods the body uses to adapt itself to lofty altitudes are deeper breathing and changes in the properties of the blood and in kidney function.

The tests were made with a stationary bicycle, fitted with a retarding brake drum, capable of forcing the person pedaling to exert various degrees of effort. The equipment for the experiments cost \$3,000.

**A HOPE**

All of the children are happy and gay In their life there is no gloom As I watch them romp and play I wonder if trouble is coming soon.

Hear their laughter and their glee, How their merry shouts do ring, Its a pleasure unto me When I hear them sweetly sing.

But when they are older grown, As they journey through life, Will we hear them sit and moan? Will their lives be full of strife?

We are hoping for the best, Wishing them a life of joy, May they have a blessed rest That this world cannot destroy.

Hoping that their lives may be Filled with joy and love and peace That from sin they may be free When this mortal life shall cease.

G. A. TURNBOUGH.

**NEW TELEPHONE PLAN FOR WALL STREET OFFICES**

System Recently Installed Will Speed Up Quotations for Stock Exchange Firms

A special telephone installation has been completed for the New York Stock Exchange which revolutionizes its quotations to its members.

By the old method the broker's call went over his private line, to his attendant in a booth at the side of the trading floor. Then a memorandum of the request for information was routed to the proper trading post by a pneumatic tube and the answer was secured in the same way. The new system consists of a two-position distributing switchboard from which lines run to the booths. The distributing switchboard is connected to a quotation switchboard, whence lines run to the trading posts on the floor of the Stock Exchange. There are three lines to some of these posts and two lines to others.

With this new equipment, whenever a call for information is received in the booth at the side of the trading floor, the attendant makes a call through the distributing board to the quotation position where the operator keeps available or secures the required information. This new system will save considerable time and will make the securing of necessary information much easier, as calls will not have to be relayed by booth attendants.

**TELEPHONE FOILS BANDIT**

Because there was a telephone at the grocery store of Perry & Tubman in Laurel, Mont., an attempt recently to hold up the store failed. John Tubman, when he was called upon to put up his hands, instead of acceding to the request, made a move to call help by telephone, with the result that the bandit hastily withdrew.

**JUDGE HATCH HAS QUIT THE BENCH**

SANTA FE.—Judge Carl A. Hatch has resigned as judge of the ninth judicial district, Governor Dillon announced Monday. The governor is expected to appoint his successor, who will serve until the next state election, in a few days.

Judge Hatch intends to enter private practice.

The ninth judicial district embraces the counties of Curry, Roosevelt, De Baca and Quay and is normally strongly democratic.

Mrs. Blanks: "You simply must stay with us; we're close to a beautiful old golf course."

Visitor: "How old is it?"

Mrs. Blanks: "I'm not so sure, but my husband can remember some one going around it in 69."

**"RE-pepped" USED-CARS**

We are offering many Used Cars of outstanding values. Visit our Used Car Lot and be convinced. Here are a few of the various models we have priced to sell:

1929 4-Door Chevrolet Sedan, looks like new, runs like new—price \$690.00

Model A Ford Coupe, equipped with 6-ply Double Blue Pennant Tires and seat covers. This car has only been driven 900 miles—price \$700.00

1928 Chevrolet Coupe, thoroughly reconditioned, good rubber and neat appearing—price \$475.00

1926 Chevrolet Roadster with dump bed, worth the money at \$125.00

This list represents a few of the many Used Cars we have to offer you—SEE US FIRST!

**LAWING'S MARKET**

Bowen Building—Hagerman, N. M.

**Watermelons and TIRES**

Watermelons look a lot alike. So do tires. But you can "plug" a watermelon to make sure it's good. You can't do that with tires. So you've got to rely on the name on the tires.

There's one name that means absolute assurance in the way of a guarantee of goodness through and through in tires. That name is GOODYEAR.

You don't need to paw over a heap of Goodyear Tires to pick out the best.

If it says GOODYEAR on the sidewall, you're OK with the first one you lay hands on.

The "grade" is also shown: DOUBLE EAGLE means "finest that can be made regardless of cost." ALL-WEATHER (heavy duty or regular) means "the best standard quality in the world." PATHFINDER means "good quality at a big saving."

Because years of experience have shown tire users that "GOOD-YEAR" means the "Most Value for the Money," Goodyear makes millions more tires than any other company. That fact is the only "plugging" which Goodyear Tires require. It says plenty!

## CATTLE SHIPPERS TO MAKE SAVING ON NEW ORDER

Shippers of cattle into the Pecos valley and points in Texas are the gainers by from \$15 to \$40 per car and there will be several thousand dollars in refunds on the lots upon which an I. C. C. rate decision received Monday was based.

Interstate Commerce Commission Examiner H. W. Archer was Monday reported as making definite recommendations as to the reasonableness of rail rates from points in Arizona and New Mexico to destinations in New Mexico and Texas, in cases heard at Roswell on May 20th this year.

The rates on range or feeder cattle were attacked as being unreasonable and the issues presented to Mr. Archer on behalf of J. J. Lane and other livestock shippers of this territory by the Pecos Valley Traffic bureau of this city.

The examiner has recommended material reductions in the rates which action, if finally sustained by the commission, will make it possible for increased shipments of cattle from Arizona and western New Mexico and west Texas.

Exceptions to the examiners proposed report are due to be filed with the Commission on or before September 30, 1929.

The decision will be generally recognized as being of immense importance to the stockers and feeders of the valley and various points across the state line, as it affects a class of cattle that is held for many months before they are sold and the money is available to pay complete charges. — Southwestern Dispatch.

## DEEPER AND DEEPER DRILLING FOR OIL

The American oil industry is digging in. As available oil-producing areas become fewer, the industry drives its wells deeper and the 10,000 foot level may soon be reached.

Two miles down is a long way to go for oil, the American Petroleum Institute points out, in an industry that is only 70 years old and that ten years ago considered 5,000 feet a great depth. But despite the extreme danger of deep drilling and the expenses which virtually have doubled the average cost of drilling a well in the last decade, several wells passed the 8,000 foot depth last year. The world's deepest well, in California, now is over 9,000 feet down and many wells in Texas and Oklahoma and California fields have gone below the 7,000 foot level. In fact, many wells have gone below water and have upset the prediction of oil field wags that if they went much deeper the drillers would be hearing protests from China.

Geologists believe that oil in quantity will be found at these extreme depths and the lessons in deep drilling learned in these new fields may lead to rehabilitation of abandoned areas.

Victrola—My Mother is terribly old fashioned.

Heatrola—Mine, too. That's why I always go out with my grandmother.

## NEW FILLINGS FOR SCHOOL SANDWICHES

September, school and sandwiches seem to go together. Many school lunches will be packed during the school term and sandwiches will form the bases of most of them. The following suggestions for sandwiches are offered to the housewife, by Miss Grace B. Loug of the Agricultural College.

Bread for sandwiches: White, Rye, graham, whole wheat, oatmeal, raisin, nut, brown bread or a combination of two or more breads may be used. Bread to cut well must be a day old, although new bread may be used. A sharp knife is essential for cutting bread thinly.

Butter should be spread thinly on all bread before filling is added. The butter fills the open spaces and prevents a "soggy" sandwich. It should be creamed in order to spread easily and smoothly. Avoid spreading butter or filling over the edge.

The fillings used determine the kind of sandwich.

Ham sandwiches—put one cup of cooked ham thru the food chopper with three hard cooked eggs. Add three tablespoons thick cream and sufficient salad dressing to make a paste of the filling. Spread on slices of any brown bread.

Cheese sandwiches—Melt two tablespoons butter and stir in two tablespoons flour. Add one cup milk and cook until thick and glossy. Take from the fire and add salt to season, a dash of paprika, one-fourth teaspoon ground mustard and one cup grated cheese. Set in a cool place and use a needed for a sandwich filling.

Bean sandwiches—Mash cooked beans or rub through colander, mix with tomato sauce or salad dressing and chopped sour pickles, green relish or chili sauce.

Carrot sandwiches—Put equal parts of fresh raw carrots and salted peanuts through the food chopper. Moistened with mayonnaise. Insert one or two thin slices of stuffed olive or sweet pickle in every sandwich.

Fruit sandwiches—Chopped dates, raisins or figs may be combined with orange or lemon or grape juice or with corn syrup and coconut.

For additional information, you may order the circular "School Lunches" from the Extension Service, State College, New Mexico.

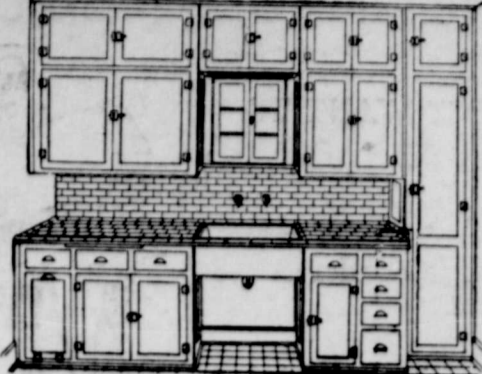

## THREE MEN FATALLY BURNED IN WINK TEX. FIRE SUNDAY NIGHT

WINK, Texas.—Three men were burned fatally in a fire at the bath house on the Republic Oil Company's lease near here Sunday night. The dead: Martin Smith, Albert Helms and R. C. Jackson.

D. H. Fisher and George Jackson were burned seriously and were brought here for treatment.

The fire was caused by the ignition of gasoline being used by the men in removing grease from their bodies. They had been working on an oil well and their clothing had become saturated in oil. A heater in the house was believed to have ignited the gasoline. Workmen nearby helped extinguish the flames.

"How did your son make out at college? Did he get any high marks?"  
"Oh yes, he got a scar on the forehead from a gin bottle."

## MODERN KITCHENS

are easily in reach of any home owner!

The Premier Kitchen Cabinet can be built in at a very small cost. Ask us to make you an estimate of the cost of a modern kitchen for you.

A record number of inspections of fruits and vegetables was made in the past fiscal year by the bureau of agricultural economics of the U. S. Department of Agriculture, a total of 266,831 inspections being made.

Sixteen farmer owned and operated cotton marketing associations with approximately 100,000 members handled more than 1,100,000 bales of the 1928 cotton crop. The best record was made by the Oklahoma Cotton Growers Association, Oklahoma City, which received more than 363,000 bales from its 25,000 members.

Fall-sown oats in the Southern states should follow crops that can be removed from the land in time to permit sowing the oats in early fall. Late seeding is believed to be responsible in part for the low yields secured from this crop in the south. The open furrow method of sowing oats will give some protection against injury from winter killing.

Considerable interest has developed during the past year in new dairy sections of the country in regard to the manufacture of cheese, and in answer to inquiries on this subject the U. S. Department of Agriculture has issued Miscellaneous Publication 42-M, "Points to Consider in Establishing a Cheese Factory." This publication can be secured by writing to the Department of Agriculture.

Vitamin A as contained in cod-liver oil is an elusive substance disappearing rapidly when the cod-liver oil is spread over large surfaces and exposed to light and air. For this reason, when stock feed containing cod-liver oil is purchased, the vitamin A substance should be guaranteed to be stable. If it is not, it is better to buy cod-liver oil and give it separately or mix it with the ration shortly before feeding.

There is no economy in having the cow thin at calving time. A cow in good condition starts-off the lactation period at a higher level of production than a thin cow and gives a larger yield of milk for the year. Since the cow normally loses weight for 3 or 4 weeks after calving, she should carry considerable flesh at the time. Feed during the dry period should be high in minerals, especially calcium, or lime, and phosphorus. The calcium can be supplied by good pasture in summer and well-cured leguminous hay in winter. Most of the high-protein feeds, such as wheat bran and the oil meals, are good sources of phosphorus as well as protein.

Celery in commercial quantities is usually stored in cold storages where under proper conditions it may be successfully kept for 3 or 4 months. Limited quantities of celery, however, are commonly kept for short periods on the farm. The usual method is to place the plants close together in a trench with the roots, which should not be trimmed off, imbedded in soil. Soil is thrown up about the plants and as cold weather approaches the tops are covered with boards or straw. Old hot-bed pits are frequently used for home storage, the tops being covered as in trench storage.

Beet tops and crowns, if properly handled, make good silage. The tops should be run through the cutter and put into the silo promptly after the beets are topped. In gathering the tops from the field care should be taken to have them free from dirt, which might damage the silage. Cut straw should be placed in the bottom of the silo to absorb excess moisture, and as fast as the tops are cut straw should be mixed with them. Special care should be taken to have the edges packed firmly. Salt sprinkled over every few inches increases the palatability of the silage. Water should not be added. A 12-inch layer of cut straw, or other coarse roughage should be placed on the top to keep out the air.

## GREAT BRITAIN LEADS IN QUOTA IMMIGRANTS

WASHINGTON, D. C.—Great Britain led in the number of quota visas granted to immigrants to the United States during the first month of the current fiscal year, according to an announcement by the Department of State. The figures issued by the department represent visas actually reported under each quota.

Reports of many other visas for which quota numbers have been allotted to distant consulates are received by the quota control officers only after the end of the month for which allotted. The figures in some cases are provisional in character and less than the total obtained at a later date.

The report lists Great Britain and Northern Ireland with 1,172, and Germany, 1,340. A few of the other countries are given as follows: Poland, 637; Italy, 535; Czechoslovakia, 284; Sweden, 255; Russia, 232; Norway, 225, and the Netherlands, 204.

## FIRST GAME OF WORLD SERIES TO BE PLAYED IN CHICAGO OCT. 8TH

CHICAGO, Ill.—The first game of the world's series will be played October 8 in the city winning the National League pennant, it was announced Tuesday at the office of Kenesaw Mountain Landis, commissioner.

The dates for the baseball classic were agreed on at a meeting presided over by Mr. Landis.

Others in attendance were E. S. Barnard, president of the American league; John A. Heydler, president of the National league, and officers of the Athletics and Cubs which appear to have the pennants cinched. William Wrigley Jr., owner of the Cubs and William L. Veeck, president of the team, were the representatives of the Cubs. Thomas Shibe president of the Athletics and Robert Shroeder, secretary, represented the Philadelphia club.

Granting that the Cubs and Athletics are the pennant winners, the world's series schedule will read as follows:

- October 8—At Chicago
- October 9—At Chicago
- October 10—Traveling
- October 11—At Philadelphia
- October 12—At Philadelphia
- October 13—Open (Sunday)
- October 14—At Philadelphia
- October 15—Traveling
- October 16—At Chicago
- October 17—At Chicago

### AN INGENUOUS DEVICE GIVES WARNING SIGNAL

Inevitably, in so complicated an electrical network as that of the telephone, "the bowsprit gets mixed with the rudder sometimes" and a fuse blows . . . but not for long. A fuse which not only blows but attracts attention by waving an arm and clamoring for help is one of the many ingenious devices which keep the telephone message from being delayed. Among the myriad fuses protecting the delicate apparatus from an overload of current, it would be hard indeed to search out a blown fuse, were it of the ordinary type. Accordingly Bell System Engineers have developed a fuse which rings an alarm, lights a lamp indicating the affected fuse bank, and throws out an individual signal when it is burned out. The telephone system uses annually over a million of these fuses.

### OPERATOR'S QUICK ACTION SAVES WOMAN GAS VICTIM

Miss Dorothy Johnston, Chief Operator in the telephone exchange at El Paso, Tex., is credited with saving the life recently of Mrs. James Q. Byrne of that city. Miss Johnston heard a groan after a call had come from Mrs. Byrne's phone, and realizing something might be wrong, she at once communicated with the police department. But for her prompt action Mrs. Byrne would have been asphyxiated, as the police found her lying unconscious on the floor beside the telephone in her home. The house was filled with escaping gas.

### Large Private Branch Exchange

Approximately 21,000 telephone calls are taken care of every day in Brooklyn's largest private branch exchange, that of the Brooklyn Edison Company. An operating force of twenty-six operators is required to maintain the company's switchboard.

IT WILL PAY YOU To read carefully all that our advertisers have to say.

## AT THE CHURCHES

B. Y. P. U.

Sunday night, September 15, 1929. B. Y. P. U. is growing rapidly and the young people are taking an interest in it. We had a large group of young people last Sunday night so follow the young people, they will lead you to B. Y. P. U. at 7:00 p. m. promptly.

Talks will be given by the following: Tom Utterback, Crystal Harris, Joyce Lankford, Jewel Barnett and Everett Lankford. Elseworth Evans in charge.

RAY LANKFORD, Pres.

### EPWORTH LEAGUE

There were about twenty members at league Sunday night. Now let's see if we can't make it at least thirty next Sunday. We are looking for you now don't disappoint us.

Program:  
Leader ----- George Lang  
Hymn 172.  
Prayer ----- Mrs. Bryan Hall  
Effect of Faith on the Personality of Jesus ----- Grace Menoud  
Faith Enriches Our Personality by Ridding Us of Fear ----- Elwood Watford  
Faith Determines the Very Nature of Our Lives ----- Paul J. Watford  
Hymn 199.  
League Benediction.

### METHODIST CHURCH

Sunday school 9:45 a. m.  
Worship at 11:00 a. m.  
Subject: "Spiritual Death."  
Special music each morning.  
Epworth Leagues at 7:30 p. m.  
Evening worship 7:45 p. m.  
Rev. A. L. Moore of Roswell will preach for us and hold conference after church.  
You are welcome at all times. Come.

BRYAN HALL, Pastor.

### METHODIST SUNDAY SCHOOL

For two years in succession our church has checked 100% on the "C" type program of work making us a standard school. The faithfulness of our officers and teachers together with the hearty cooperation of most of our members has made this record possible. The new program of work is much more comprehensive in its scope and will challenge our best efforts to maintain our record. If you fail our whole program will suffer. If you want to be with a live bunch join us next Sunday at 9:45 a. m. The devotional program in the adult department will be in charge of Mrs. West and the Sunshine class. "A long pull, a strong pull and a pull altogether."  
E. A. PADDOCK, Supt.

### REVIVAL MEETING AT CHURCH OF CHRIST

The Church of Christ began a two week's revival meeting last Sunday. Rev. Van Bonneau, of Dodson, Texas is the evangelist. The attendance has been very good, and the people all express themselves as enjoying every service.

### BAPTIST CHURCH

You are invited to attend our services next Sunday. Our Bible school starts at ten a. m. We have a class for every age. You and your grand parents, children and grand children, should all be in Sunday school next Sunday. We welcome you to our morning worship at eleven, at which time the pastor will preach. B. Y. P. U. will meet at seven p. m. Evening worship will be at eight p. m., preaching by the pastor.  
HAROLD DYE, Pastor.

### PRESBYTERIAN CHURCH NOTES

Last Sunday evening the Presbyterians dismissed their congregation here and quite a number went to Dexter to hear the Rev. John G. Anderson who has come to take charge of the Presbyterian work there. They were greatly pleased with the sermon they heard and say that the Dexter people are to be congratulated on having Rev. Anderson as their minister.  
New cement steps were placed in front of the Presbyterian church this week leading down from the sidewalk to the street. This will be a greatly appreciated improvement.

### PRESBYTERIAN CHURCH

"The Christian View of Life" is the subject for the sermon next Sunday in this church. In the evening the pastor will preach the first of a series of sermons on the general subject of "Bible Types of Modern Men," and the subject for Sunday evening is "The Man with the Secret Care." Every man more or less is carrying around some secret burden that the rest of us know nothing about. Come and let us talk it over next Sunday night. The Sunday school was greatly improved for last Sunday and the Endeavor Society had one of its most interesting meetings with Gladys Stroud as leader. Both of these services at the usual hours next Sunday. We believe there is nothing can satisfy human needs but the "all round gospel." "We speak the things we do know and testify of that we have seen."

ROSWELL—ARTESIA

## We Welcome the Customer Who Is "Just Looking"

If there is one person, more than another, whom we welcome in our store it is the shopper who is "just looking." Her desire to compare prices and value evidences a sensible appreciation of Thrift. Such a shopper will appreciate the splendid economies we are able to offer thru buying for over 1400 stores at one time.

She will notice the excellent quality of our merchandise, too, and will en- thusi- astically seize the opportunity of selecting her new coat or frock from a number of charming styles—each one an authentic Fifth Avenue mode.

Don't be afraid to drop in, at a J. C. Penney Store at any time. The shopper who is "just looking" today, is tomorrow's customer.

## THE KITCHEN CABINET

(©, 1929, Western Newspaper Union.)

He who is filled with happiness, though seemingly absorbed, emanates pleasure on whoever crosses his way. He cannot contain it all, but produces much for his neighbors. There is no other such agent for diffusing joy, as the heart that itself enjoys.—Palmer.

### FOR DINNER MENUS

Here are a few dishes which will help to start and finish a dinner acceptably:

**Iced Fruit Cocktail.**—Dice the following fruit: One grapefruit, three oranges, one banana, five slices of pineapple, one-half cupful of pineapple juice and a small bottle of maraschino cherries and juice. Mix all together and pour into a bowl to chill for five or six hours.

**Fruit Bread Pudding.**—Take two cupfuls of dried bread crumbs, four cupfuls of hot milk, one-half cupful of sugar, two eggs beaten well, four tablespoonfuls of melted butter, one-half teaspoonful of salt, one teaspoonful of vanilla and one cupful of chopped figs, dates or raisins. Add the bread crumbs to the hot milk and set into a buttered baking dish and bake until firm. Serve with a coffee-flavored sauce.

**Lobster Cocktail.**—Take three table- spoonfuls of lobster or crab meat for each serving. Add one tablespoonful of catsup or chili sauce, one table- spoonful of lemon juice, one-half tea- spoonful of salt, one teaspoonful of finely chopped celery and one-fourth teaspoonful of worcestershire sauce. Combine and chill for about two hours. Serve in cocktail glasses and garnish with thin slices of stuffed olives.

**Ice Box Orange Cake.**—Boil two cupfuls of water twenty minutes, soak two tablespoonfuls of gelatin in cold water to cover (five minutes), add to the boiling sirup; add two table- spoonfuls of lemon juice and one cupful of orange juice, the pulp of an orange shredded, chill then beat until light. Add two cupfuls of whipped cream mixed with one-half pound of marsh- mallows cut into bits. Beat well. Line a cake pan with waxed paper, sepa- rate twenty-four lady fingers and place around the edge, the remainder crumble and add one cupful of nuts chopped; put these in alternate layers with the cream. Chill at least five hours. Serve with whipped cream.

Nellie Maxwell

### Why Tower Does Not Fall

The fact that the Leaning Tower of Pisa stands depends on the law of statics which insures the stability of the leaning building whose parts are firmly bound together and whose center of gravity does not project beyond the limits of the supporting founda- tion. The leaning tower has a spiral stairway within, which is built with increased height on the sides of the lean and decreased height on the sides opposite the lean, thus throwing a greater weight of masonry on the side opposed to the lean.

### Foundation of Home Shows Real Condition

Several suggestions that will help everyone who is contemplating the purchase of a house are made in a letter contributed by a correspondent.

"Before you buy a house," he writes, "you should start with the basement and examine the walls for water stains and horizontal water lines caused by water seepage, or water standing in the basement.

"The foundation and retaining walls should be inspected for proper thick- ness," he continues. "A minimum width for main foundation walls below grade for a light-frame structure of one or two stories should not be less than ten inches, if of concrete; thir- teen inches of brick, and eighteen inches for stone.

"Concrete walls having a sandy or clayey appearance are deficient in cement, or else are constructed of bank sand and gravel containing a large percentage of loam. Such walls should be examined for sand and loam pocket- ings which are detrimental to the walls' structural strength and permit the en- trance of water.

"The wall plate or mud sill, which lies directly upon the foundation and upon which the floor rests, should be minutely examined for dry rot and decay. This is generally the first mem- ber of a dwelling's superstructure that goes bad."

"When do the leaves begin to turn?"  
"The night before exams start."  
Drexler.
