

# My Experiences in the World War

BY GENERAL JOHN J. PERSHING

reaching the Meuse. The Eighty-ninth division, Fifth Army, overcame stubborn opposition and captured Beaufort on the 4th. The Meuse was reached on the 5th. The Forest was cleared up the following day, and Cesse was captured. The Second division in its attack made slight headway during the next two days it advanced rapidly, and by night it reached the Meuse south of the forest.

The First corps the Eighteenth division, on the 4th, in spite of the heavy stand, captured Vaux-en-Sommaux. The enemy retired during the night and the division took up the pursuit, following vigorous rear guard action until reaching a line between the 4th and 5th divisions on the night of the 5th its progress continued, the division being opposed on the 4th and east of Oches, but on the 5th its line was pushed forward north of Stonne and La Neuville. On the 6th the division reached the Meuse between Villers and its patrols.

The Seventy-eighth division on the 4th captured Les Petites Armes, and on the following morning advanced more than a mile to the north. The Forty-second division on the 5th captured the village of Baulon, and on the 6th established itself north of Baulon.

The ambition of the First Army, and mine, that our troops capture Sedan, which the 18th had lost in a decisive battle in 1870. I suggested to General Foch that the prescribed line between our First and the French Fourth Army be ignored in case we should reach the French, to which he had no objection, but on the 5th he warmly approved.

To reach the objective the left flank of the First Army would be ignored, as Sedan lay to the northwest beyond that line. In the afternoon of November 5, the First corps was directed to its energies to capture Sedan on its right by the Fifth Army.

The misconception in the Fifth Army of the exact intent of my order resulted in the First division moving beyond the left flank of the Fifth corps and striking directly across the sector of the First corps during the late afternoon of the 6th and through the night. The troops of the division carried out this unwise forced march in fine lines, despite their tired condition. Considerable confusion resulted in the Forty-second and Seventy-ninth divisions, and their advance was delayed as roads were blocked by the columns of the First division. The Forty-second division then began a race for the honor of capturing Sedan.

These divisions had entered the Meuse of the French Fourth Army and were waging a fight with the enemy for the possession of the Meuse south and west of Sedan, on the morning of November 7, the men of the Forty-second and First divisions on the heights overlooking the city. Under normal conditions the action of the First division was the responsibility for the movement of the First division directly across the sectors of other divisions would not have overlooked, but the splendid spirit of that unit and the approach of the end of hostilities resulted in leniency.

The enemy's main line of communication was now within range of machine guns of the First division, which had driven him 24 miles since November 1. His position on the western front was so untenable and he urged immediate consideration of an armistice.

On November 9 Marshal Foch, then in conference with German representatives regarding the terms of the armistice, sent telegraphic instructions to all allied commanders in chief from which it might be inferred that he was mainly regarding the outcome of the operations and wished to let the delay. The following was the message received:

"The enemy, disorganized by repeated attacks, retreats and expeditious movements. It is important to co-ordinate and expedite our movements."

"I appeal to the energy and initiative of the command in chief of their armies to decide the results obtained."

**No Respite for Enemy.**

In response to this appeal were immediately issued and executed by the First Army under way November 10 and let here again no sort of urgency was necessary. Our troops determined not to give the enemy any respite. Already the Meuse had been reached by the whole army, and the Fifth corps got over during the night of the 10th-11th. Part of the 10th division crossed on the 11th west of Pouilly, and the 11th division of the Ninetieth division (Allen).

The Second division was unable to cross at Mouzon, as planned, but about a mile south of the town the engineers of the division, with exceptional rapidity, threw two bridges across, which one regiment passed. The Seventy-seventh division, now the left of the Fifth corps, over the patrols on the 10th and the low ground north of the Meuse, opposite its front being flood-

## TENNIS TOURNAMENT NEXT FRIDAY P. M. AND ALL DAY SAT.

The long awaited tennis tournament is at hand! This coming Saturday will see the first tennis tourney of its kind ever conducted in the valley when twenty local tennis enthusiasts start battling for the 1931 mixed doubles championship of Hagerman.

All signs indicate a day of unusual attractiveness. Beginning at six o'clock in the morning, the preliminaries are scheduled to last until one o'clock when the semi-finals will be promptly started.

Through the past three weeks, interest has been steadily growing in the affair and the entry list has grown to the amazing toll of ten teams in our little city. The tourney has become a community proposition! People are talking tennis on the streets and dozens of cars are expected to cluster about the court watching their favorites in action.

As the day approaches a great deal of conjecture naturally arises concerning the relative merits of the various entries. With Pete Losey's announcement that he would compete, many of the fans are expecting him to cop first honors. In other years, Pete ruled the local courts and was undisputedly one of the best players in this section. He is paired with Miss George. The Nail-Denham combination has its boosters, as well. Then, there is R. W. Conner and Miss Burt who may have a lot to say about the championship. Just as stanchly, Bryan Hall and Carolyn Paddock have a flock of supporters who are looking for them to give a good account of themselves. It's hard to say! These pairs are all formidable and are all capable of playing good tennis. Among a quartette so apparently even, the breaks of the game and the effect of such a severe mental strain, may well decide the eventual winners.

Of course, there may be a winner among some of the lesser lights. That's what makes tournament play fascinating! There is always the prospect of some "dark horse" coming along to upset the pre-game dope and romp thru the field for the highest honors. It is not unlikely in the forthcoming meet.

Since the entry list has grown so large, it has become necessary to schedule two of the matches on Friday evening. This will narrow the list to eight teams who will begin their play at six o'clock Saturday morning.

The first contest for Friday evening, will take place promptly at 8:30 when Alma Nail and Loula Denham meet Mr. and Mrs. Maxwell. Immediately following, Steve Mason and John Duke Garner, with their respective partners, will clash for the right to continue on Saturday morning.

A mammoth picnic is being arranged for the players after the championship finals at 4:00 o'clock in the afternoon.

The preliminary matches are as follows:

Nail-Denham vs. Mr. and Mrs. Maxwell at 8:30 Friday.  
Mason-Banta vs. Garner-Dozier at 4:30 Friday.  
Hearn-Carter vs. McCormick-E. Paddock at 6:00 Saturday.  
Bowen-Clemons vs. Conner-Burt at 7:00 Saturday.  
Losey-George vs. Hall-C. Paddock at 8:00 Saturday.

From then on, the usual process of elimination will be followed according to the brackets.

There is absolutely no admission charge at any of the local tennis exhibitions. The public is urged to attend these contests and learn to enjoy the oldest of modern sports.

When things look blue nobody can help the situation by turning yellow.—Weston (Ore.) Leader.

Lady Driver (after collision)—"But I insist it was all my fault."  
Gentleman Driver: "No, my dear lady, it was my fault. I could tell your car was being driven by a woman at least 40 rods away and I could easily have driven over into the field and avoided this."

She—Were you in the army?  
He—Yes, I served one year.  
She—Did you get a commission?  
He—No, straight salary.

# Reduction of Gin Price

The Farmers' Cooperative Gin Company announces that it is well equipped to give satisfactory and guaranteed work this year at a material saving to the farmers.

## Our Proposition is to Furnish Bagging Free This Year

This in itself will mean a saving to the local farmers of five thousand dollars—based on last year's production, which we ginned—two dollars a bale.

## Shopping for Fuel

Suppose you could buy natural gas service "over the counter" like you purchase meats and vegetables. With such a daily opportunity to compare its cost with other values on your shopping list you would find that PECOS VALLEY GAS CO. SERVICE is actually the least expensive item in your cost of living.

Sixteen and a half cents will not go far in providing household necessities—yet 16 1/2c is the average daily gas bill throughout the year, for cooking, heating and hot water supply on the Pecos Valley Gas Co., System. From boiling a kettle of water to heating an entire house this inexpensive convenience is always on tap—wherever and whenever you require it. The same quality service to every household, at the same price for the same quantity.

## \$10,000 IN CASH PRIZES

FOR THE BEST ANSWERS EXPLAINING THE MYSTERY of the "HIDDEN QUART" AND TELLING HOW THIS QUART BENEFITS MOTORISTS

**Fact No. 1—Thousands of motorists and service station men have observed that after a car has been given its first fill of Conoco Germ Processed Motor Oil and it drives 200 to 350 miles, a look at the crankcase gauge shows that about one quart of oil is apparently missing... but**

**Fact No. 2—These same people have noticed that on the second and later fillings with Conoco Germ Processed Motor Oil, scarcely a drop of oil will disappear during the first 350 miles, and practically none at 500 and up to 1,000 miles!**

The above facts have been checked by actual tests with cars that use six quarts of oil for the crankcase, cars in good mechanical condition and driven at ordinary rates of speed. These facts will also prove true for your car, in proportion to the amount of oil your crankcase usually holds, your car's mechanical condition and the speeds at which you drive.

What becomes of the "hidden quart"? The answer is easy if you study the facts given above and keep in mind the things that only Conoco Germ Processed Motor Oil can do. The explanation of the whereabouts of the "hidden quart" is simple—no technical knowledge of motors or oil is necessary.

Remember—The "hidden quart" of Germ Processed Oil does not escape through leakage... does not burn up, wear out nor evaporate. It is present but unaccounted for. Fact No. 2, given above, proves all this.

After you've found where the "hidden

quart" goes, you can easily see the special benefits it gives the motorist—advantages that no other oil can give.

Ask at any Conoco Station or Conoco Dealer for free Entry Blank which contains information about Conoco Germ Processed Motor Oil that may help you win. Conoco Station and Dealer employees will gladly answer your questions. Remember, you do not have to buy anything to enter this contest.

See Rules of Contest for complete details.

### THE QUESTION

"What becomes of the 'hidden quart' and how does this quart benefit the motorist?"

#### COMPLETE RULES OF CONTEST

- Answers may be any length not exceeding 200 words; length of answer will not determine winners. Write answers on Official Contest Entry Blank preferably, or on plain white paper. Conoco Stations and Dealers will give you an Official Contest Entry Blank free. Elaborate presentations of answers will not count in your favor.
- Write your answer in plain, simple language. Technical terms or special scientific knowledge will not influence the judges.
- Contest closes midnight, September 28, 1931, and no entries bearing postmarks after midnight, September 28, 1931, will be accepted.
- Contest open to everybody except employees and executives of the Continental Oil Company, Conoco Stations, Conoco Dealers and the Company's advertising agency, and their families.
- In case of tie, both contestants will receive full amount of prize tied for.
- You do not have to use or purchase Conoco Germ Processed Motor Oil or other Conoco products to compete for prizes.
- All entries submitted, whether or not they win prizes, become the property of the Continental Oil Company and may be used in advertising without payment, and none can be returned to senders.

### 29 PRIZES

First Prize	\$5,000
Second Prize	\$3,000
Third Prize	\$1,000
4th, 5th Prizes	\$500
6th, 7th, 8th and 9th Prizes	\$100
10th, 11th, 12th and 13th Prizes	\$50
14th through 29th Prizes	\$25

WINNERS WILL BE ANNOUNCED as soon after the contest closes as possible. Announcement of all winners will be made in this newspaper.

**DINNER PARTY**

Mr. and Mrs. Son Wood were hosts to a dinner party on Wednesday evening, September 16, complimentary to the birthday of their young son, C. J.

A small table was set exclusively for the honoree and his guest, Little Miss Dorothy Sue Devenport, and was decorated with the traditional birthday cake, lighted with six small tapers.

At the large table were seated: Messrs. and Mrs. T. D. Devenport, Jim King, Mrs. Seaborn Price and the host and hostess.

**WOMAN'S CLUB**

The Hagerman Woman's club will meet with Mrs. J. A. Hedges at the manse, Friday, October 2nd at 2:30 p. m. The subject for the afternoon will be Russia. Mrs. Ernest Uitterback will be leader. It is hoped each club member will be present and bring a guest.

MRS. HOWARD RUSSELL,  
President.

**BRIDGE PARTY**

On Wednesday evening, Mr. and Mrs. Clyde Gant were hosts to four tables of bridge players.

READ THE MESSENGER

**LADIES AID**

Mrs. T. D. Devenport was hostess to the Presbyterian Ladies Aid and a number of guests on Wednesday of last week.

The rooms were airy and fragrant with lovely blossoms, and after the devotionals and business session led by Mrs. Hugo Jacobson, the time was spent in visiting.

Delicious refreshments of sandwiches and lime, vegetable salad and iced tea were served to about thirty-five members and guests.

**SOUTHWESTERN QUITS MERCHANDISING FIELD**

Announcement is made in this issue of the decision of the Southwestern Public Service Co., to cease selling electrical appliances. The decision was reached several days ago, but was not made public until this week here. In quitting the merchandising field, officials of the Southwestern have announced that they felt it would be more satisfactory to turn the sale of electrical appliances over to the individual dealer. It is understood arrangements have been perfected to have all appliances previously sold by the Southwestern serviced.

**Things WORTH KNOWING**

Soybeans furnish good pasture in late summer and early fall when perennial pastures are short.

Swine contract tuberculosis from cattle and fowls. Don't allow your hogs to feed with tuberculous cattle or poultry.

The tomato grower can control the blight disease by deeply and completely plowing under all crop remains and other dead organic matter in the fall. It is not easy to control blight by spraying or dusting.

A national forest camp group was recently swamped by a rush of 4,000 gold seekers a few hours after a little of the precious metal was panned where a flood had bared a gravel bed in the neighborhood of one of California's first placer mines.

The phrase "springing up like a mushroom overnight," has some truth, since mushrooms grow at a phenomenal rate during moist, hot seasons. This is partly explained by the fact that much of the tissue forms before the fungus breaks thru the ground. Then the fungus tissue absorbs water very quickly and expands rapidly in wet weather.

The home gardener can "store" celery where it is growing by placing enough earth around the base of the plants to protect them from freezing; usually eight to ten inches are required. Let them stay this way until just before severe freezing. Then bank the earth up to the tops of the plants, almost covering them. As the weather becomes colder, cover the ridge with coarse straw, or corn fodder held in place by stakes or boards. It is inadvisable to store large quantities of celery in this way as considerable loss will occur thru severe cold on sudden rises in temperature. It should also be remembered that it is hard to get the celery out when the ground is frozen.

A modern little carrier is a paying investment for the dairy barn. It saves labor because it holds much more than a wheelbarrow, less effort is needed to move it, and its tight tub prevents the dripping of liquid. For a stable with a low ceiling, the dairyman can buy a carrier consisting of a tub mounted on wheels and arranged for attaching to a track conveyor and hoist at the door.

**Tested Wheat Recipes**  
(Prepared by U. S. Department of Agriculture)

- Here are some tested recipes for the use of whole wheat, as prepared by the U. S. Department of Home Economics:
- BEEF AND COOKED WHEAT**
- 2 tablespoons fat                                    3 cups water  
1 onion, chopped                                    ¼ cup of chili pepper  
1 pound beef, diced                                    Salt  
Flour     2 cups cooked wheat
- Melt the fat and cook the onion for a few minutes, then add the meat which has been lightly rolled in flour. When the meat has browned somewhat add the water, partially cover and simmer until the meat is tender. Stir in the chili pepper and the wheat, and add salt to taste.
- WHOLE WHEAT, FISH AND TOMATO**
- ¼ pound canned fish                                    1 teaspoon salt  
1 quart canned tomatoes                               ½ teaspoon pepper  
½ cup chopped celery                                    2 cups cooked whole wheat
- Drain the fish, reserve the liquid and flake the fish into small pieces. Cook the tomatoes, celery and fish until the mixture is fairly thick. Add the seasoning, wheat and fish, and cook a few minutes longer and stir to blend well. Serve on crisp toast.
- WHOLE WHEAT PILAU**
- 2 thin slices salt pork                                   ½ cup chopped celery  
2 onions, cut fine                                       1½ teaspoons salt  
3 cups tomato juice and pulp                        ¼ cup minced parsley  
2 cups cooked wheat                                    Pepper
- Fry the salt pork until crisp, remove from the fat and cook the onion in the fat until lightly browned. Heat the tomatoes, add the wheat, onions, celery and salt, and cook 15 minutes. Stir frequently. When the mixture has thickened stir in the crisp pork and parsley and add more salt if needed and pepper. Serve on crisp toast.
- WHOLE WHEAT MUFFINS**
- 1 cup sifted flour                                        1 egg  
½ teaspoon salt                                         ½ cup milk  
2 teaspoons baking powder                           1 tablespoon melted fat  
1 cup whole cooked wheat
- Sift the dry ingredients together, add the wheat, and mix thoroughly. Beat the egg, add the milk, and stir into the dry ingredients with the fat. Pour into greased muffin pans and bake in a moderate oven about 30 minutes. Serve hot.
- WHOLE WHEAT PIDDING**
- 2 cups hot milk                                         1 cup chopped seeded raisins  
2 cups cooked whole wheat                           1 egg  
¼ teaspoon salt                                         ½ teaspoon vanilla  
2 tablespoons sugar
- Mix the milk, wheat salt and sugar. Add the raisins, beaten egg and the vanilla. Pour into a baking dish and bake in a moderate oven about 30 minutes or until set. Chill before serving.

**Announcement!**

We wish to announce that after September 26th, 1931, we will cease the activities of our merchandise department.

In the past we have conducted a merchandising department for the convenience of our customers and for the proper introduction of Electrical Appliances.

As our local merchants have ample stocks of Electrical Appliances and are in excellent position to render efficient service on all types of this equipment; this feature of our business will be discontinued, and we are sure you will find what you desire at your favorite dealers.

**Southwestern PUBLIC SERVICE Company**

Many light frame farm buildings develop sway-backed roofs, bulging walls, or sagging floors, or they may lean or collapse completely because they are not properly built in the first place. Most failures of farm buildings are caused by improper foundations, insufficient anchorage of frame to the foundations, or insufficient bracing of the frame. You can get a 6-page leaflet on Bracing Farm Buildings, Leaflet 77-L, from the U. S. Department of Agriculture, Washington, D. C.

The quantity of feed a laying hen eats varies widely. A hen will eat more of one kind of feed than of another. A big hen eats more than a little one. A layer has to eat more than a loafer. Hens will usually eat more of a mixed grain ration than of a ration made up only of one grain. Leghorns and similar small breeds eat less than birds of the larger breeds. Usually birds bred for high egg production consume slightly less feed than birds of the same size of less productive strains. Records at agricultural experiment stations show that leghorns laying an average of 150 eggs a year consume about 80 pounds of grain annually, and that general purpose breeds with the same production eat about 87 pounds. Hens usually eat more grain during seasons of heavy egg production.

**IN AUTO WRECK**

J. T. West and W. A. Losey escaped serious injury when their car collided with another on the highway near Ora Grande Wednesday night.

Blinding lights were the cause of the wreck, which smashed the West car pretty badly, and slightly injured the mayor's hand. A lady in the other car was injured painfully, but not seriously. Messrs. Losey and West returned this morning.

**THIEVES CAUGHT**

Two local boys, whose names we are withholding because of their first offense, removed the spare time from the car belonging to Rev. J. A. Hedges Tuesday night, and then proceeded to drain the gasoline from the tank of Jim Michelet's car. Deputy Sheriff Jim Williamson was called and after tracking the other car in the company of Jim Michelet, the two boys were caught. The lads were taken to Roswell for trial, but were released pending their court appearance next Monday.

**PLAN PLANTING OF 3,140,000 TROUT YEARLY**

Plans having the planting of 3,140,000 trout yearly, the amount estimated to be needed to stock all streams at the present time was adopted by the state game and fish commission at a meeting in Santa Fe Saturday.

**POULTRY POINTERS**

Interest in poultry news increases at this time of year. The price of eggs gradually advances, and with the coming of fall, hens gradually fall off in production, and pullets are slow to start laying high priced eggs. Don't force pullets into production; grow them into production. In order to hold off early production and to keep from forcing pullets into production, poultrymen often starve pullets. Don't do this as it has a tendency to cut down on the number of eggs a pullet will produce her pullet year.

In place of the above, feed a tested, well-balanced ration according to production, and grow your pullets into production. Let the size of the frame, the weight, and the firmness of the flesh be the indication of production rather than the age of the pullets. Big pullets lay more and bigger eggs.

Following is a summary of thirteen Canadian National Egg-Laying contests, stretching from coast to coast. (Report given at American Poultry Association convention, Ardmore, Oklahoma, by Dr. George Robertson, chief assistant in the poultry division of the Department of Agriculture of the Dominion of Canada).

Leghorns		
Wt. lbs.	Production per year	Egg Wt. doz. in ozs.
Under 3	155.3	22.8
3 to 3½	166.1	23.4
3½ to 3¾	188.1	23.9
3¾ to 4	194.6	24.1
4 to 4½	207.1	24.5
Over 4½	207.0	25.0
Barred Plymouth Rocks		
Under 5 ½	177.0	23.3
5½ to 6	184.3	23.7
6 to 6½	186.7	24.0
6½ to 7	184.4	24.0
Over 7½	217.5	24.5

Study the above charts. This is conclusive evidence that you should grow your pullets into production. Grow them so they are large strong and vigorous before they start their winter's job. If you delay the development and maturity of your pullets, you cut down on profits and also the number of eggs.

The Ohio experiment station divided a group of pullets hatched April 7. They developed one group so they were ready for production in October and November. They delayed the maturity of the other group so that they started production in December. The following table shows what delayed maturity of only one to two months means from the dollar and cent standpoint to the poultry raisers.

Group 1—Early producers, averaged 160 eggs per bird per year, at \$5.03 receipts from eggs per bird per year.

Group 2—Delayed maturity averaged 113 eggs per bird per year, at \$3.25, receipts from eggs per bird per year, with a difference in receipts per bird per year of \$1.78.

You can get a pretty good idea of what's the matter with the cotton industry by canvassing the average clothesline.—Tampa Times.

**WANT CRUDE REDUCTION**

WASHINGTON, D. C.—Representatives of the western oil producing states Monday laid before Secretary Lamont a plan calling for reduction of petroleum production by all countries of the world to a point equal to the cuts being made within the United States.

Tuesday the representatives intended to lay their program before President Hoover. They were assured by Secretary Lamont that he would look into the possibilities of the plan to determine its feasibility. Eventually they hope to have the state department take up the proposal with the foreign nations.

On a tentative basis, the petroleum production of the world would be limited to 3,929,923 barrels for this year. For 1932 the figure would be 4,153,005 barrels for 1933 the output would be 4,372,603 and for 1934, 4,591,781 barrels.

**4H ACHIEVEMENT DAY HELD AT COTTONWOOD**

The Sewing clubs exhibited their work of the year at the Lower Cottonwood school Thursday in the 4-H Achievement Day and in the judging the sewing was placed as follows:

Geraldine Felton, first; Ida Mae Burke, second and Minnie Opal Parker, third. In the fourth year work, Mary Jane Terry and Marjorie Bell Funk tied. The canning team composed of Mary Jane Terry and Marjorie Bell Funk will represent Eddy county in the state contest. Two teams contested in the sewing work and Geraldine Felton and Ruby Rowland won over Minnie Opal Parker and M. Rowland. In the garden club, Ernest Malone and Joe Bill Funk will represent Eddy county at State College. The state contest will be held October 11 to 15. These contests were judged by Miss C. Wetzel, agent at large from State College.

In the county clothing exhibit first year work, Katherine Loving, placed first; Jessie Townsley, Loving, second; Geraldine Felton, Cottonwood, third. In the second year work, Ola Mae Foshee, Malaga, and Catherine Franz, Malaga, second and third. In the third year work, Ida Mae Burke, Malaga, first and second.

**FARMERS' GIN ANNOUNCE REDUCTION IN GIN PRICE**

The Farmers' Cooperative Co., announces a drastic reduction in the cost of ginning, to keep pace with hard times.

The ginning price will be stationary at 40c, but the bag which has amounted to two dollars a bale in the past will be given free. According to C. Curry, manager of the gin, this will mean a saving of over a thousand dollars to local farmers over last year.

Visitor—Well, Joe, how do you like your new little sister?

Jes—Oh, she's all right, I like her but there are lots of things needed worse.—Pathfinder.

**Nature Dips Her Brush In Gold and Crimson**
