THURSDAY

HAGERMAN, CHAVES COUNTY, NEW MEXICO, THURSDAY, NOVEMBER 10, 1932.

NUMBER 45

## VOTERS COUNTY TICKET

Approximately 201,000 pounds of alfalfa seed have moved from the middle and lower valley, according to tabulations made here recently. The amount of seed which were shipped out of Roswell could not be obtained. The seed movement in this section was divided as follows: Lower valley 41,000 pounds; Artesia, 65,000 pounds and Buffalo valley ranch 95,000 pounds. One buyer estimates that over 300,000 pounds of seed have been shipped from the valley this year.

## NUMBER CASES WILL BE CALLED IN THE CHAVES CO. COURT

Twelve defendants were arraigned Monday in Chaves county district court at Roswell before Judge Harry L. Patton on various charges, preparatory to the regular fall term of district court in Chaves county which will open November 21, with Judge Henry A. Kiker presiding.

District Attorney Judson G. Osburn presented 21 informations to Judge Patton. Nine of the defendants, against whom informations were drawn had not been arrested and their names were not released for publication.

Leo Parks, charged with altering and changing numbers of a motor vehicle. Parks entered a plea of not guilty and he was held to await trial under a bond of \$750.

Jimmie Wooten and Floyd Tyler charged with larceny from a store. Plea not guilty, which was later changed to one of guilty. They were sentenced to from 1 year to 18 months in the state penitentiary.

Virgil Dolison pleaded not guilty to a charge of larceny from an automobile. Leslie Godbehere and Cortez Brown each entered a plea of guilty to the same charge.

Price Boyce pleaded not guilty to a charge of forgery and his trial was set for November 21, bond in the case being set at \$750. E. G. Pratt charged with the sale of liquor to minors, refused to plead "because of insanity" and his trial was set for November 21.

G. T. Braddock entered a plea of not guilty to a charge of forgery and his trial was set for November 21. Bond was set in the sum of \$750.

Dick Gomez and Thomas Yturaldi pleaded not guilty to two charges, one of larceny from a dwelling and the other of larceny of an automobile. Both trials were set for November 21 and bond in each case was set in the sum of \$750.

Lucas Trujillo, charged with larceny from a store, entered a plea of not guilty and his bond set at \$750.

Judge Patton, who has been designated by the supreme court to sit at Roswell, will be back in Roswell next Monday to hear a number of matters.

MA FERGUSON ELECTED

DALLAS, Texas—An avalanche of ballots in the general election Tuesday returned Texas to her ancient place in the ranks of the national democracy which she had abandoned temporarily four years ago.

In a contest of absorbing state interest, Mrs. Miriam A. (Ma) Ferguson, the state's first woman governor, ran well ahead of her republican opponent for the governorship, Orville Bollington, Wichita Falls. George W. Armstrong of Ft. Worth, who left the democratic party to campaign as an independent, trailed far behind.

The Texas election bureau early estimated Mrs. Ferguson, democrat, had defeated Bollington by a majority of from 160,000 to 180,000.

GEORGE REEVES DEAD

George Reeves a pioneer of New Mexico and father of Austin Reeves of Elk died at the home of a daughter in Chandler, Arizona Friday. Mr. Reeves made his home in New Mexico for forty-five years and formerly lived at Alamogordo where his body was shipped and buried.

CORRECTION

In last issue, we credited the Roswell Christian Endeavor with the fine program given at the local Christian Church. This was rendered by the Hagerman young people of that church.

Roy Lochhead, Jr., of Alamogordo visited in Hagerman last week.

## DEMOCRATIC TICKET IN STATE IS GIVEN DECISIVE MAJORITY

ALBUQUERQUE — Roosevelt's lead in New Mexico as returns continued to pour in from all sections of the state continued to mount.

All democratic candidates for state offices maintained substantial leads over their republican opponents.

Returns from 315 precincts gave Roosevelt a total of 48,275 votes to Hoover 26,283.

Representative Dennis Chavez snowed under his republican opponent, Jose E. Armijo, polling 50,101 votes to Armijo's 24,520.

The lead of Governor Arthur Seligman increased two thousand to 11,762. Former Governor R. C. Dillon, his republican opponent, polled 32,648 votes and Seligman received 44,410.

The totals for other state candidates:

Lt. Governor: Montoya (R) 20,557; Hockenull (D) 37,869.

Secretary of State: Garcia (R) 21,923; Baca (D) 40,234.

State Auditor: Quintana (R) 21,606; Velarde (D) 39,204.

Treasurer: Garner (R) 21,077; Graham (D) 40,084.

Attorney General: Westerfield (R) 22,113; Neumann (D) 38,971.

Supt. Public Instruction: Rousseau (R) 21,356; Lusk (D) 40,044.

Comm. Pub. Lands: Lee (R) 24,024; Vesely (D) 38,632.

Sup. Court: (long term): Mechem (R) 21,455; Bickley (D) 36,620.

Sup. Court: (short term): C. C. Catron (R) 16,798; Zinn (D) 27,737.

Corp. Comm. (long term) Williams (R) 22,599; Lamb (D) 35,120.

Corp. Comm. (short term): Sena (R) 21,028; Casados (D) 34,865.

ALBUQUERQUE — Roosevelt's lead jumped to 19,121 votes in New Mexico with 289 of 777 precincts reported. The vote:

Hoover 22,854; Roosevelt 41,975.

For governor: Dillon (R) 29,187; Seligman (D) 38,644.

LINDBERGH HOAXER RELEASED FROM JAIL

FLEMINGTON, N. J. — John Hughes Curtis, convicted hoaxer in the Lindbergh kidnaping appeared dramatically at Hunterdon county court house Monday and received an order suspending execution of his one year jail sentence.

He paid the fine which was part of his penalty with a single thousand dollar bill Monday.

Mr. and Mrs. Guy West and small daughter of Silver City were among the Hagerman visitors with homefolks during the convention week.

## SHARES NOBEL PRIZE

Prof. Edgar Douglas Adrian of Cambridge university, England, who shared with Sir Charles Sherrington of Oxford university the 1932 Nobel prize for medicine and physiology. Both scientists are of world renown and receive the award for their joint discoveries in the study of the neuron.

## \$72,000,000 OF FED. FUNDS ALLOTTED FOR HIGHWAY BUILDING

WASHINGTON, D. C.—Allotment of \$72,000,000 of federal emergency highway funds to the states up to October 29 was announced Friday by the department of agriculture.

At the same time, the bureau of public roads said other projects to be carried on under the \$120,000,000 emergency appropriation are ready for approval. It required that 25 per cent of the money apportioned to each state remain unallotted until November 1, unless a reserve has been established from other sources, to insure employment during the winter months.

By states the apportionment and allotments, respectively included: Colorado, \$2,258,613, \$57,309.70; Kansas, \$3,265,048, \$2,069,531.41; New Mexico, \$1,965,473, \$763,552.41 and Texas, \$7,664,621, \$3,839,538.65.

THURSDAY CLUB

The Thursday club met at the home of Mrs. W. A. Losey on Thursday afternoon of last week. The lesson conducted by Mrs. Harrison McKinstry and assisted by Mrs. J. E. Wimberly and Mrs. W. A. Losey, was "Citizens and Voting."

Present were: Mmes. A. M. Ehret, Aaron Clark, J. A. Hedges, Sam McKinstry, W. L. Heitman, Willis Pardee, Roy Van Arsdol, Harry Cowan, E. V. Sweatt, A. A. MacKintosh, Harrison McKinstry, J. E. Wimberly and the hostess.

## GAME DEPARTMENT TO OPEN SEASON FOR KILLING DOE SOON

The State Game Department announces that a special season on does and antlerless deer on a restricted area 15 miles southeast of Alamogordo has been authorized by the State Game Commission to relieve a congested, overstocked condition there.

The season will be from December 1 to December 15 and applications for permits will be received at the office of the State Game Department up to November 22. Permits will be issued to the first seven hundred persons filing applications. If seven hundred applications are not received by November 22, permits will be issued thereafter until that number is reached. Only seven hundred permits will be issued, and these to holders of regular 1932 hunting licenses only. The permittees will be authorized to enter the area in three separate groups for a period of 5 days each. The date each permittee may hunt will be specified upon the permit. Where parties are going together the applications should so specify. The first group will enter the area on December 1 and check out not later than December 5. The second group may enter on December 6 and check out not later than December 10. The third group may check in on December 10 and must check out not later than December 15.

Hunters will be required to check in to the west side at Alamogordo, to the north side at the Woods' ranch and to the south side to the forks of the road to Shelton's ranch.

Deer with antlers must not be killed, as a sufficient number of bucks will have been removed during the regular season. No turkey may be killed.

No charges for the permit will be made, but applicant must hold a regular 1932 hunting license. Only persons actually intending to go there to hunt should apply, and it will be expected that everyone to whom a permit is issued will go and get a deer.

LEGAL BEER COMING BY MARCH, SAID

BOSTON.—Labor's national committee for modification of the Volstead act Saturday predicted legal beer not later than March, with a strong possibility of it before the coming short session of congress is many weeks old.

Matthew Woll, vice president of the American federation of labor and the committee's chairman, said in a statement, replies to questionnaires to all congressional candidates and holdover members were the basis of the prediction.

## DEMOCRATS CARRY NATIONAL ELECTION WITH A LANDSLIDE

The press election result tabulation at midnight last night, with 95,531 of 119,714 voting districts in the country complete, gave:

Hoover 13,513,652, Roosevelt 18,872,321.

Roosevelt had taken 472 electoral votes with 59 for the president. None were in doubt.

Voting in that tabulation in the six states which Hoover carried was as follows:

Connecticut 169 districts complete, Hoover 287,841, Roosevelt 281,360. Delaware, 208 of 226 districts, Hoover 50,062, Roosevelt 43,314. Maine, 609 of 632, Hoover 163,500, Roosevelt 126,055. New Hampshire, 294 complete, Hoover 103,185, Roosevelt 100,621. Pennsylvania, 7,254 of 8,199, Hoover 1,350,564, Roosevelt 1,191,510. Vermont, 248 complete, Hoover 77,665, Roosevelt 54,751.

Michigan went democratic. So did Iowa, birthplace of Herbert Hoover; California, where he lives; Kansas, home of Vice-President Curtis and among others, Ohio, Indiana, Illinois and Minnesota.

That was only part of a country-wide political upheaval. The result was substantially the same whether one looked at the senate, the house, gubernatorial races or even returns affecting prohibition.

The opposition of anti-prohibition organizations and of devoted followers of Al Smith, combined with the ordinary republican opposition, did not prevent William Gibbs McAdoo from winning easily in California.

There were 34 senate seats at issue. The democrats captured 25 of these to give them 56 seats in the 73rd congress. The republicans took five. The others were still doubtful.

On the house side, already democratic, the tale of republican disaster was repeated. The winners have 218 seats there now. They are certain of about 260 after next March 4—and 78 house races are still in doubt.

Ruth Baker Pratt of New York lost to a democrat. Republican floor leader, Snell was re-elected, however, from upstate New York.

The tabulations tell another sad republican story in gubernatorial races. There were elections in 34 states. The democrats won 18 of these and on the basis of votes compiled late were leading in eleven others. They displaced eight republicans. Floyd B. Olson, farmer-labor, was elected in Minnesota.

MANY CALVES DELIVERED

The cattlemen of Lea county are making fall delivery of their calves this week. Already many such deliveries have been made and other shipments will be made during the coming week.

Calves have been contracted on a weight basis, steer calves bringing from 4 1/2 to 5 cents, and heifers selling around 4 cents. Calves are running a little below their usual weight especially with range conditions as favorable as they have been this year, but those ranchmen who contracted their calves early in the season are feeling good over the money they are bringing.

But it is difficult to find buyers at anything like a fair price for calves which are not contracted earlier in the season. It would seem that so far as the cattle market is concerned there has been no indication of any break in the depression.

—Lovington Leader.

RUNNING TRAIN TO POTASH REFINERY

The Santa Fe is running a train daily from Carlsbad to the potash refinery of the United States Potash Co., it was learned here recently. Approximately 175 tons are being shipped daily from the refinery it was said.

Billy Jo, Mary, and Hannah Burck, who were taken to St. Mary's hospital last week with alkali poisoning, have returned well and sound.

867 BUCKS KILLED

SANTA FE—A total of 1,636 hunters in the Mimbres and Magdalena areas have killed 867 bucks, 12 bear and 153 wild turkeys, Elliott Barker, state game warden said Monday. Approximately 200 large bucks have been taken from the Ruidoso refuge where a season has been opened on bucks this year.

## JEWELL DAVIS AND DUKE THOMPSON ARE INJURED IN WRECK

Jewell Davis returned to Hagerman late Monday night suffering from numerous cuts about the face and body, sustained when the car in which he was riding, struck another machine head on just this side of Lordsburg, this state.

Davis and Duke Thompson left Saturday morning for Lordsburg to get Mrs. Thompson and her small son. When the wreck occurred, Davis was asleep, but the impact threw him through the windshield. Thompson received a broken arm. The car belonged to Davis, but was being driven by Thompson at the time. Jewell Davis was unable to give clear details of the occurrence owing to the fact that he was asleep at the time, and that he was unconscious for twelve hours.

We have been unable to verify the reports that occupants of the other car involved in the wreck were killed.

## AUTHORITIES AGREE ON INTERSTATE SHIPMENTS

AMARILLO, Texas.—Representatives from New Mexico, Oklahoma, Kansas, Colorado, and Texas agreed Friday to a uniform plan of handling the collection of taxes on interstate truck shipments of gasoline.

The plan will require trucking contracts to present to refineries certificates from tax offices in the state where the gasoline will be sold, showing that the tax will be paid in that state.

The certificates will be issued in triplicate, one to be turned over to the tax department in the state which issues them, another to be held by the refinery selling the gasoline, and the third to be kept by the trucker.

Speakers said it now was possible for truckers to obtain gasoline under a pretense of hauling it into another state and then market it at some point within the state where the purchase was made without paying tax.

Truckers, refinery owners, gasoline distributors, and the tax departments of Texas, Oklahoma and New Mexico were represented at the meeting. Endorsements of the plan of regulation were received from Kansas and Colorado. The New Mexico gasoline tax department was represented by O. P. Coppedge and J. R. Holt.

## COTTON FORECAST IS UP--11,947,000 B'LS REPORTED YESTERDAY

WASHINGTON, D. C.—The cotton crop of the country was estimated yesterday at 11,947,000 bales of 500 pounds gross weight by the department of agriculture on the basis of conditions as of November 1. Last year's crop was 17,096,000 bales.

An indicated yield of 156.2 pounds of lint cotton per acre on the 36,611,000 acres as estimated September 1, was reported for picking this year, as compared with 149.3 pounds indicated a month ago and 201.1 pounds picked last year.

The indicated production by states included: Texas, 4,225,000; New Mexico, 88,000; Arizona, 84,000.

## HIGHWAY BIDS NOVEMBER 17

Bids for the construction of 10-521 miles of federal highway west of Roswell will be opened by the state highway commission in Santa Fe on November 17. It was announced at Roswell last week.

This new construction is to begin at a point approximately 15 miles west of Roswell and will continue to the present bridge at the foot of Border Hill.

The new survey leaves the present road to the north. It was said, the contract providing at this time only for grading.

Another project in this district will be up for bids at this time, it was announced Tuesday, this being in Eddy county, being 16.09 miles of grading from Malaga south to the Texas-New Mexico line.

#### PUPILS' PROBLEMS—PUTTING THE MIND TO WORK

(By E. A. White)  
To Pupils of Hagerman Public School:

Much has been said regarding the processes of thinking and the methods of thinking. It is true your method of thinking is important. But what you think of is also important.

Did you ever sit down and day dream and just watch the ideas come and go and when the dream was over just think back of the train of ideas—how varied—and dissociated and insignificant?

Did you ever ask yourself how such incongruous notions got into your mind? You were not unconscious. You still had power to control your mental faculties, but were not careful enough about selecting your ideas. The difficulty stated in plain words, simply means you hadn't chosen subject matter properly. Why not ask yourself questions? Will this line of thought help me master the fundamentals of knowledge? When I get through thinking this group of thoughts, can I read better, parse better, multiply better and so forth. In other words are you getting somewhere with the job of mastering the tool subjects of learning? A poet once said:

"I honor the man who is willing to sink Half of his fortune for the freedom to think. And having thought, be his cause strong or weak, Will risk the other half for freedom to speak."

There is a penalty attached to ignorance which for the purpose of this discussion, purely and simply means, absence of knowledge. For example: You know this fact quite well. Say Tuesday is examination day. If you don't know your lessons, you will pay or sometimes we say the premium is in form of learning.

Grades—Satisfaction—Culture. There is a premium now on health knowledge. You need not only have health knowledge, but you need to make use of it. A few days ago I was in camp with a young boy who had drunk too much coffee for supper. Try as he might, he couldn't go to sleep even though he had been working very hard the day before. The next evening came, he refused to drink coffee. He knew he couldn't sleep if he drank it. So he refused to do so. Coffee drinking is not the only bad health habit, but is one. Whenever you know a habit is against the law of health the habit must be shunned and a good one formed in its place. There are many other habits which are useful to boys and girls. I heard a young boy say the other day that he had already stopped several fights this year. He is showing good traits of citizenship even though he is only in the second grade in school. Teachers would have a much better time teaching, if all boys discouraged fighting.

Many of you have reached a point in your development where it would be hard for me to believe you had committed an offense against our regulations, even though I was told you did so. I put it past you. I feel you are safe against such behavior. Whenever your banker has decided your habit for honesty is permanently fixed, he will trust you for a loan. You had better take care of your credit, you may wish to use it with your home merchant. It can be done by thinking honest thoughts. As you think, so you are.

**SITTING BULL FALLS TO BE IMPROVED**

Vance Thomas has made arrangements with the Eddy County authorities for co-operative work for improvements on the highway leading west from Carlsbad to "Sitting Bull" falls. The forest service will furnish men, according to an announcement made at Alamogordo recently. About eight miles from the main highway to the falls are to be improved. Reports are that there is a constantly increasing number of people desiring to visit these picturesque falls. The forest service plans to institute some improvements at the falls.

#### SPORTSMANSHIP

There is no more time honored phrase of human tradition than that of sportsmanship. A true sportsman is a man of integrity, who can give and take—who can fight against odds and win. It is not the blood which he sheds on a hunting trip that gives him the thrill, but rather the excitement of the chase, and the realization that he is stalking game that is in its native element, equipped with keen ears, sharp eyes, and unerring sense of smell.

A professional guide was telling us this week of a deer slaughter that was provoked by the opening of a game sanctuary which had been a place of refuge for eleven years. The guide in question said that he watched a man walk straight up to a buck and shoot him at a distance of not over ten feet, while the animal looked at him without fear. Each year sees the influx of parlor sofa hunters, who are at the best, mere butchers, and at the worst, hysterical fools, who will shoot at any movement, whether the animal making it has a red cap on his head or horns. The early American Indian, while cruel in some ways was an angel of mercy, compared to some white men of today. The Indian wouldn't wait at a salt lick and shoot deer. Why? It was an advantage which he scorned. He wouldn't kill a rattle snake. Why? Because the snake was fair enough to warn a man with his rattles before he struck. The New Mexico Indian would go into the mountains and find a squirrel's nest and rob it of pinons. But he would always leave a bushel or more of acorns so the squirrel wouldn't die of starvation. Contrast this with the ruthlessness of some white men.

The purpose of this writing is not to glorify the Indian, but it is to emphasize that in human nature which causes man to kill for the sport of shedding blood. World wide attention has been turned toward France, where in one "high society" resort, 25,000 pigeons are shot each year by men with high powered rifles—in a "sportsmanship" event. The pigeons are placed in a small iron cage, and their winged cropped. Then, when a boy strikes the cage with a stone, the frightened birds fly into the air, where they flutter almost motionless while the riflemen shoot them to the ground. And France calls this sportsmanship. In Mexico, a blindfolded horse is led into the arena and left while a maddened bull gores him to death, as a prelude to the bloody bull fight. And Mexico calls that sportsmanship. In America, game refuges are established and left until the wild animals lose their sense of fear of man. Then, these places are suddenly opened up, and so called hunters slaughter the creatures in an orgy of blood.

And, some people call this sportsmanship.

**BAKING CIRCULAR IS NOW AVAILABLE**

Practical helps for successful baking in the home may be obtained from a new Extension circular on home baking prepared by Grace B. Long, State Home Agent, of the Extension Service of the New Mexico State College.

The art of home baking is one that requires considerable information and is only obtained through practical experience in applying such information, says Miss Long, but the art of baking can be mastered if directions are carefully followed and care is taken with all processes in the preparation and baking. Due to difference in the atmosphere many cakes baked by common recipes used in lower altitudes of other states are not successful in the various altitudes of New Mexico.

The recipes and instructions given in Extension Circular No. 115 on home baking are practical for different altitudes of New Mexico and also give definite instructions for adapting these recipes to the different altitudes. The circular gives practical recipes for light bread products, quick breads, cakes, cookies and pies of many kinds. The more common troubles with home baking are discussed and remedies for each problem given.

The information which is given in this circular is based on research work conducted by Marjorie W. Peterson at the Fort Collins, Colorado Experiment Station. A special room was constructed where the pressure of the atmosphere could be changed to that of the different altitudes. In this room the recipes were tested in many ways until the most successful ones were found and the principle of adapting the recipes was discovered. The principle changes in recipes for the various altitudes consist in varying the amounts of sugar, fat and

soda or baking powder. Copy of this circular may be secured by writing to the Extension Service, State College, New Mexico.

**TURKEYS SUFFER FROM PREDATORY ANIMALS**

Reports to the forest service are that the turkeys in the White Mountain district are suffering from coyotes and bob cats. One observer reports seeing one flock trailed by one coyote and three bob cats, while another flock was being followed by four bob cats. Predatory animals affect turkeys very adversely in the southwest and it will be necessary to keep bob cats and coyotes in check if the number of turkey necessary to satisfactory hunting is maintained annually. And it is going to take considerable money to employ competent hunters.

**ENGRAVING at The Messenger**

#### Smilin' Charlie Says

Typewriters for rent at Messenger

The editor's hay burner is out of fodder again, and our motto is scratch the guy's back with a rake that rubs ours with a tooth brush. So again, we make the offer of one year's subscription for four bales of hay. Just stack your hay in the editor's back yard and tie your name on the cow's tail. Think it over. One whole year's subscription to the Pecos valley's rip snortiest, ring tail tootnest weekly paper published in Hagerman, and how!

The parson says that just 'cause he's in the printin' business too the printers who printed the ballots didn't need to frame up on him and cheat him out of his vote for president by leaving the names of Hoover and Roosevelt off his ballot.—The Op.

We advertised the Peoples' Mercantile Company's sale, and on the opening day all clerks had to do without their lunch till nearly dark, and the sox and bloomers are still flying. Any time you think that it doesn't pay to advertise, just ask Dub about it. We sold Clyde Gant an ad for one dollar when he moved to Roswell to start a restaurant and he sold \$140 worth of fried chicken to Hagerman people in three weeks. If you don't believe it, ask him.

For Sale — Big game license, slightly used. Four bits.

Let me put you wise, on the above, the parson kinda misrepresented the article he is advertising for sale, as he became afflicted with that terrible malady, "the buck" and after missin' a nice big one with spikes at least six inches long, er maybe he didn't have spikes at all, th' parson says he might have had a red hat on for all he knows, he became slightly peeved and you've all heard of preacher's cussin', ravin' and tearin' their hair, well Harold, was 'fraid he'd run out of hair so he started beatin' his gun on the ground and tearin' up his license. Don't buy it, 'tain't any good, 'cause I saw it.—The Op.

Mrs. Dye voted for Hoover. May her name be MUD.

We have asked our research department to investigate the circumstance and report later on how Jim Williamson could chase deer hunters for two weeks and never get his white hat dirty.

**Blind Readers Get Books**

Books in braille for reading by the blind are made by women under Red Cross direction. Last year 2,812 such books were produced in single copy, and 3,538 in double copies. Fiction, biography, history, economics and school books were among those printed in braille. The Red Cross gives them to libraries for free distribution to blind readers.

**Had Done His "Bit"**  
Stories of absent-mindedness were being related in the smoking room of an Atlantic liner. "I'm very absent-minded myself," said a hitherto silent man. "I often find names and telephone numbers written in my notebook, but can't remember what persons they represent. Recently I had a general checking up. The name and address of one man baffled me, so I wrote to him asking if he had ever heard of me, and if I was supposed to do something for him. "He wrote back a cordial letter, saying I had already done it. Wife's first husband."

**Girls**  
Some girls are like angel food cake—a little bit of sweetness puffed to their seeming proportions by the good old principle of the expansion of hot air. With either, if there is the least slip in the making we have no use for the result, but if done to the proper turn we excuse the lack of substance because of the smooth, delectable fluffiness. — Indianapolis News.

## TO THE GIRLS AT THE FRONT OF THE STUDY HALL (Dedicated by Steve Mason)

"A breath can start it,  
Blowing into flame  
A quick, hot fire  
To ruin a name.

Oh, lips be careful,  
Oh, tongue, keep still,  
There are many ways  
To main and kill.

Far more cruel  
Than a gun for game,  
Is the breath of scandal  
Blowing on a name."

## MEMORY

As I sit here and look out my window,  
I see the flowers in the meadow,  
The birds and bees that come from the mountain,  
The water, the grass, and the fountain.

I sit here amazed  
And think as I gaze  
Of the times of long ago  
Of the times I've had below.  
Will there ever be such times?  
To me they're like chimes  
That ring out the times  
When I played in the health  
Out there beneath  
That old elm tree  
That means so much to me.

## CHAPEL EXERCISES

The Junior Glee Club entertained the school and visitors with four well selected numbers. The Junior Glee Club have taken good interest in their glee club work. We hope they will entertain again soon.

## HI—A—LOOKIE

Right over this way to see the— she's alive; she's alive. Ask your Ma for 20 or 30 cents to see "Helen Preferred performed by the Juniors.

Even if Sadie Lane (June Jacobs) wants a divorce that don't keep her from being a good actor—I mean her husband in the beginning of the play she finds that he isn't such a bad lot after all and decides to stick.

Now ain't this awful. Sounds like wedding bells to me. We thought the days of whirl-wind courtships and elopements were past but that's just what happens to Peter Latham and Irene Bloomer (Leonard and Jaucille).

Sue (Betty) to George (Leonard): You look marvelous in that bathing suit, George. So masculine. Your legs are straight and strong—and your arms too.

## WE WONDER

Why Leonard George likes to take portables home for Dexter girls.  
Why Arthur Densmore didn't accept the invitation to the Freshman-Sophomore party.  
Where Elizabeth was Thursday night at six o'clock.  
What happened to some of the finger-palish in the beauty parlor at the carnival at Dexter.  
Why Ruth Wiggins insists that the bookkeeping class is not dumb.  
How Kenneth is making it since Sunday afternoon.

## ENGLISH

It seems that the Juniors and Seniors who take english are having a happy time with Miss George. Some time ago they had to write some sonnets, now they are all wool-gathering over essays. Some don't seem to care much, and others are raking over all the essays in the H. S. trying to get a subject and—well, learn how to write an essay.

## POTASH INDUSTRY

D. E. Wichster, consulting geologist for Texas Potash Co.

Wells drilled for oil sometimes yield information which leads far afield. One of the greatest mining industries in the United States is being founded on information gained from a careful study of oil well cuttings and the product of the mines will supply the farmer with one of the most needed fertilizer elements, potash.

The farmer long ago began to realize that if he would continue to produce crops from his lands he must restore to the soil, thru fertilizers, those elements which the crops took from the soil. Research has proven that of the 3 essential fertilizer elements potash is the most vital. Every farm crop removes potash from the soil and every soil sooner or later unless properly fertilized, will become "worn out" and crops will cease to thrive.

Up to the present time nearly all of the potash used in the United States has been imported from Germany and France, which countries have a virtual monopoly on the market and have collected homage from every user. During the World War this foreign supply was cut off and we were able to supply a part of our needs from the brines of Western Nebraska lakes but at great cost. Since the war, vast amounts of money have been spent in efforts to locate a potash supply on this side of the water which could be produced in competition with European costs.

In 1925 the examination of cuttings from a well being drilled for oil in Eddy county, New Mexico, disclosed the presence of valuable potash salts in the great "Salt Series" of Permian Basin. This discovery was followed by prospecting with the core drill and to this operation our United States government contributed one appropriation of \$500,000.

The results of this careful search have proved most valuable and encouraging. Several potash salts have been found in commercial thicknesses and within the near future it is practically assured American mines will be in operation which will supply the entire needs of the American farmer and American industries.

Our potash beds occur at depths of from 300 to 1500 feet beneath the surface, are thick enough to be mined most economically and are essentially horizontal, therefore can be produced at minimum cost. Foreign potash salts occur under conditions which make their production far more expensive. The consumption of potash in the United States in 1930 amounted to approximately 1,000,000 tons and for this we paid the foreign monopoly approximately \$25,000,000.

Now, with a supply of our own, which can be produced for less than can the European potash, we can truthfully say we are no longer at the mercy of the foreign potash monopoly. The mining of even 1,000,000 tons of potash salts per year will be no small industry. The farming industry of the country will in the future, more than ever before, be dependent on an adequate supply of fertilizer of which potash is the most vital. Each year the demand for potash will increase as more and more will be needed to replenish nature's supply which is constantly being removed from the soil by plant life.

To take advantage of this new discovery the Texas Potash Corporation, U. S. Potash Co., Potash Company of America and some others have been formed and carried to the stage where at least one is commercially producing, economically excellent potash salts for agriculture and industry.

This great mining industry then is being founded upon evidences furnished by the cuttings from a well drilled for oil. The mining of potash to supply America's needs will employ thousands of men and the nation who supplies the food to the farmer is assured ample fertilizer with which to grow the crops which supply the food.

Watch this new industry grow.

## STRONG PURDUE MAN

One of the reasons for Purdue university's successes in football this year is Bill Fehring, who plays at tackle, and plays mighty well.

## FRED SUTTON IS FOUND GUILTY

Fred Sutton arrested in Carlsbad by Eddy county officers following a gun fight with local officers several months ago, was found guilty last week of bank robbery at Poteau, Oklahoma and was sentenced to 15 years in the Oklahoma state penitentiary it was learned last week.

Sutton was recently arrested in Kansas City on a postoffice robbery charge after he had escaped jail at Poteau while awaiting trial on the bank robbery charge.

Sutton was with Gene Walker and W. H. (Buzz) Tarrant when the three opened fire on deputy sheriffs Sam McCue and Homer Dunagan north of Roswell when the officers attempted to stop them in connection with a robbery at Elida.

Sutton later escaped and was arrested at Carlsbad. He was in jail at Roswell when it was learned he was wanted in Oklahoma

on bank robbery charges and was later turned over to Oklahoma authorities to face this charge on which he was convicted and sentenced this week.

## STATE AUDITION WINNERS NAMED

ALBUQUERQUE. — Miss Harriett Poorbaugh of Roswell and Jules Van Dersarl of Las Cruces won the state Atwater-Kent audition held over radio station KOB last Saturday night it was announced Thursday by Mrs. George W. Frenger, state chairman.

Second places were won by Barbara Eller and Reuben Cobas, both of Albuquerque, and third places by Ruth Day Davis of Farmington and Ralph Connel of Las Vegas.

Miss Poorbaugh and Van Dersarl will compete November 19 at Dallas, Tex., in a sectional audition. The winners there will qualify for the national finals.

## Great Stadium

Seventeen acres are in the inclosure of the Olympic stadium at Los Angeles, which is surrounded by massive walls 106 feet above the level of the field. Two years was required for its construction and the total cost was \$1,700,000. It has a reserved seating capacity of 105,000 and general admission capacity of 125,000. There are 79 rows of seats encircling the field, which if placed end to end would reach 90 miles. It is 1,121 feet long, 791 feet wide, with an outer circumference of about 3,000 feet. It is elliptical in shape and has 57 entrances and exits besides the peristyle entrance between the colonnades at the front. The main entrance is 400 feet wide, controlled by a series of gates.

## Brave Youngster

Buddy, age six, could think of nothing he desired more for Christmas than a tool chest. His two uncles, young men, teased him, saying: "You're too little for tools; you'd cut yourself first thing." Santa, however, brought the tools, and, after the Christmas dinner, Buddy planned away on a pine board in the midst of the family group. As prophesied, he planned his hand, but said nothing; only slyly kept wiping away the blood. After a bit, grandma said: "Buddy, what in the world is that red on your hand?" Buddy, feigning surprise, said: "That must be some of the cranberry juice from dinner."—In dianapolis News.

## Gobi Desert Winner

In the vast Gobi desert of Asia the camel and the pony still are used for transportation just as they were in the days of Genghis Khan, that great oriental conqueror of all Asia. At infrequent intervals streams have to be crossed, and some of them are too deep or swift to be forded. In such cases ferries are used. The camel of these high, cold deserts is of the Bactrian breed, quite distinct from the dromedary, native to low North African deserts. The dromedary has but one hump and the Bactrian camel two. A heavy coat of wool enables the Bactrian camel to withstand the rigors of his environment.

## Sherman's Bridge Builder

The first skyscraper ever built, the Home Insurance building in Chicago, was razed to make way for the new 42-story Field building. Erected in 1885 to a height of 10 stories, and later increased to 12, this structure was the creation of William Le Baron Jenney, versatile engineer who built bridges for General Sherman's famous march to the sea. He is also reputed to have introduced pumpkin pie to Paris. Jenney got the idea of the skyscraper from the bamboo huts of the Philippines, for which four standing trees supply the framework.—Boston News Bureau.

## Ways of the Hippopotamus

In spite of his terrifying appearance, the hippopotamus is not quarrelsome, and just wants to be left alone. He subsists on a vegetable diet. He loves to wallow in the water of some lazy stream, frequently sinking beneath the surface until only his nostrils and his eyes are visible. Upon the approach of an enemy the hippopotamus will take a deep breath and dive, remaining down for several minutes before coming up again to reconnoiter. He requires air, but his lung capacity is so great that he can stay under water for a considerable length of time.

## Wholesome Sweet

Honey is one of the best of the high energy-producing foods. Composed almost entirely of simple sugars it can be assimilated with ease. Honey is especially recommended for athletes. The rapid absorption of the simple sugar of honey replaces the sugars in the blood muscles that have been burned by strenuous exercise. Because it is easily assimilated, honey can be utilized by the body without placing much of a burden on an enfeebled digestive tract and is also recognized as a valuable food for babies and children.

## Officially First President

Because of the publication of the statement, such interest has been aroused in the assertion that Washington was not the first President that the State department has formally stated that he was.
