

THE MESSENGER

HAGERMAN, CHAVES COUNTY, NEW MEXICO, THURSDAY, JUNE 6, 1935

NUMBER 23

Hagerman, in the Pecos Valley's chest farming belt.

Hagerman is located in the area that offers you health and opportunities.

VOLUME THIRTY-FOUR

MALARIA TO BE FOUGHT BY STATE HEALTH DEPT.

Little On Mosquitoes By State Authorities To Be Undertaken — Project To Wipe Out Deadly Spreaders.

an announcement which has been made recently by the state health department, states that malaria, already with the largest malaria control project, and second only to one in the world, New Mexico is soon to have an even greater series of projects in this work.

With a huge slice of federal money coming, the New Mexico health service now is working on plans to drive the mosquitoes malaria spreaders — from the state.

The drive will be three fold. First, swamps will be drained, second, poisons will be distributed in infested waters. Third, the areas in malaria areas will be quito-proofed.

J. C. M. Adams is in charge of the work. In the last five years, the state has cut 169 ditches 5 miles in length to drain 49 miles and 32 ponds, the swamp drained being 719 acres and pond area 97 acres. There has been excavated 35,860 cubic yards of earth.

The poison method employed uses both Paris green and oil. Paris green is mixed half and half with 50 pounds of sand and mixture is distributed over the area, the sand sinking and the green being suspended. The mixture is used only as a vehicle for spreading. The mosquitoes take the Paris green for vegetable matter and eat it—which is their end.

The oil is distributed over the area and in death to the "wiggle" or mosquito larvae. Malaria is an enervating disease which its victim weak and an prey later for any other disease. Malaria itself is seldom fatal of the reasons, according to J. Adams, that little attention has been paid to it most of the time. Malaria also is called "chills fever," with the victim suffering both extremes. It is very prevalent in New Mexico.

Dr. E. F. McIntyre, Santa Fe city health officer, examined the 99 children in a Santa Fe school recently and of these at least, he found 28 cases, a high percentage. In Socorro county, Adams says, the rate is eight to nine and one half percent.

New Mexico's malaria is similar to Europe's and there is no datum its introduction here. Tropical malaria is carried by any mosquito the malaria here is carried on by females of two species. In Rio Grande valley the anopheles maculipennis carries it and in the Rio Grande valley the anopheles punctipennis carries it. Drainage operations under the federal grant will be carried on in the Ana, Sierra, San Juan, Rio Abasco, Santa Fe, Socorro and Ed-Edwards. Control projects, the drainage, will be carried on in the Bernillo, Sandoval and Socorro counties, with prospects of including Eddy and Chaves counties in the near developments.

Chaves county has the largest control project in the nation. It is second only to the pontine malaria project of Mussolini's Italy, which is the largest in the world. Dr. C. W. Gerber, Dona Ana city health officer, each two miles from March 1 to the fall, covers 250 miles of ditches, which was in Dona Ana county that malaria first was discovered, soon after stationing there in 1865 of a group of Civil War soldiers from the south. The disease amounted to a scourge but died out. In 1923, with introduction of iron growing and importation of iron pickets to the region, malaria again broke out but Dr. Gerber about brought it under control again.

Only humans, birds and monkeys are subject to malaria. It does not attack other life.

to The Messenger

Good Fruit Yield Expected In Most Valley Locations

Recent cold weather, with snow in the higher elevations, has ruined much of the fruit crop in the mountain districts. However, according to reports of county agents the trees in the valley sections, especially those of the Tulareosa and La Luz valleys have escaped and a good fruit yield is expected.

Fruit in the Hope section will be some lighter this year, said to be due to the heavy dust storms when the fruit trees were in full blossom, but has not been affected by cold or hail, as reported in some localities.

C. W. CURRY EXHIBITS RARE CACTUS HERE

C. W. Curry had on exhibition last week at the Hagerman Drug a rare specimen of cactus. It was a South American, and was given Mr. Curry last winter on his trip to South Texas. From the description, it is called the "Echinopsis Multiplex," a night bloomer, has a beautiful, delicate pink and white color. It is small and adapted to small spaces, a prolific grower and a good bloomer.

PIONEER MINER DIES AT GHOST TOWN OF ORGAN

Henry Foy, discoverer of the Torpedo mining claim in the Organ mountains near Alamogordo, one of the heaviest producing mineral deposits ever found in that vicinity, died of old age, last Friday at his home in the old ghost town of Organ.

Foy, although he sold the Torpedo to wealthy eastern interests for a good some, died poor. This mine has produced many millions of dollars in silver and lead. His friends raised funds for his burial in the Organ cemetery, a peaceful spot in the heart of the mountains where lie many miners, gamblers and adventurous characters who made Organ in its early days, one of the busiest and toughest little camps in the southwest.

Foy who realized sudden wealth from the Torpedo, went "outside" and lost it almost as suddenly, returning to the mountains where he has spent the most of his life in a nearly deserted camp. He never failed, until the last days of his illness to spend the greater part of each day in a fruitless search in the mountains which had yielded him fame and fortune, but which refused to repeat the act for him. He is survived by a wife and daughter who live at Organ and a son who is located in a CCC camp at Silver City.

The funeral was held at Sunset, Sunday evening. The pall bearers were all old time mining men of the vicinity.

MR. AND MRS. JOHNNIE BOWEN LEAVE HERE

Hagerman is losing a very estimable family this week to Roswell. Johnnie Bowen bought an interest in the Old Mission Barber Shop in Roswell, and left Monday to assume his new position. It is with much regret that the community accedes to this move. Johnnie has lived in Hagerman all his life, the son of Mr. and Mrs. W. E. Bowen; graduated from the local high school about ten years ago, and has been in the barber shop nearly twelve years. He worked with the late Everett Latimer for several years, and is one of the best in the trade. Always courteous, patient and never speaking ill of any one; always interested in affairs of community building and progress, and naturally, a citizen of that type will be missed. Mrs. Bowen and Jimmie will leave later this week for their new home.

RAILROAD WEEK JUNE 10-15

From June 10th to 15th will be railroad week, and it is interesting to note some of the improvements made in the roads in the last few years. We recall when it was a joke about the slow train through Arkansas. Now there is efficiency in their speed. Diesel-driven, stream line trains have cut down the time between important cities, until the business man finds them of real benefit. Another improvement is the air conditioned cars, which means the right temperature all the time. This is made possible by filtered air, odorless and free from dust, and freedom also from such of the noise. All the roads in the west have improved their traveling facilities to meet the needs of a fast moving modern world.

Water Prospects At Two Reservoirs Good At This Time

CARLSBAD — L. E. Foster, superintendent of the Carlsbad reclamation project said Saturday there is 19,000 acre feet of water in the lake McMillan and lake Avalon reservoirs for the irrigation district.

This amount is 7,600 acre feet more than was measured in storage at this time last year, Foster said. He also described prospects for irrigation in the district as good.

WASHINGTON, D. C.—Brighter prospects for summer water supply on federal reclamation projects were seen by Dr. Elwood Mead, reclamation commissioner. Mead said since partial cessation of the drought period in western United States storage in federal reclamation reservoirs has increased, with few exceptions.

He added some projects, however, are still short of normal storage. Mead said "an extreme shortage of irrigation water is anticipated for the Carlsbad, N. M., project. At the end of April the reclamation service reported there were only 5,500 acre feet of water in McMillan and Avalon reservoirs which is about one-tenth of the total capacity and one-third less than the March storage.—Current-Argus.

ASK NEW MEXICO TO JOIN STATES IN THE N. R. A. COMPACTS

DENVER—Governor E. C. Johnson Saturday backed up the plan of Governor Harry W. Nice of Maryland and attempted to rally the support of chief executives of eleven western states in backing National Recovery Act compact between the states.

In a telegram to Governor Johnson, the chief executives of Maryland suggested a conference of governors to work out NRA provisions and agreements.

In replying, Governor Johnson suggested that the nation be divided into at least five districts for the purpose of having agreements to meet similar conditions confronting each of the groups.

Governors who had received the communication were: Henry Blood, Utah; B. V. Mower, Arizona; C. B. Ross, Idaho; Frank Merriam, California; Leslie A. Miller, Wyoming; Clyde Tingley, New Mexico; Richard Kernan, Nevada; Charles H. Martin, Oregon; Clarence B. Martin, Washington and F. H. Cooney, Montana.

LAW ON CAR LIGHTS BRAKES TO BE ENFORCED

A campaign for enforcement of the law requiring quarterly checking of lights and brakes on all cars, will be started here, it was announced yesterday by city and state police. The second quarter check is due now.

The red sticker, sign of compliance with this law, must be one of the windshield of all cars, these officers state. The state officers also are checking all trucks for compliance with laws governing weight, height and length of all trucks traveling on New Mexico highways.

A REAL RECORD

J. C. Bumgardner, Jr., one of the Hope high school 1935 graduates, received an award of unusual merit, same being for perfect attendance in school for a period of twelve years, being neither tardy or absent for that period of time. We doubt whether their is another student in the state with that kind of a school attendance record.—Penasco Valley News.

Pettit Is Likely To Go On New State Game Commission Soon

SANTA FE—Governor Tingley is expected to name a new game commission with the next day or two. It was generally believed that Federal Judge Colin Nebbett would be left as chairman. Dr. Fred Pettit of Albuquerque is said to be slated to succeed Gilbert Espinosa of Albuquerque, whose term has expired, and W. A. (Pete) Losey of Hagerman, former game commission member and president of the state G. P. A. is touted as the successor of Ross Malone, Sr., of Roswell, who resigned after campaigning against Tingley in the last election.

Malone is a democrat, so is Losey. Both Pettit and Espinosa are listed as republicans.

One Driver Is Killed In The Memorial Day Races At Indianapolis

Speedway, Indianapolis — Kelly Petilla, hard driving Los Angeles Italian won the 500 mile automobile race over the bumpy two and a half mile brick track at the Indianapolis Speedway last Thursday.

A record crowd of 155,000 witnessed his triumph.

Wilbur Shaw, Indianapolis, finished second, two and a half miles back.

Petilla drove the entire distance without relief and made only two stops for fuel, and to change tires.

Wild Bill Cummings of Indianapolis, winner of the 1934 race, finished third. He was about five miles behind the winner.

Petilla drove the 500 miles in 4:36:47.00 to average 106.240 miles an hour, breaking the track for the distance. Petilla accomplished this record breaking despite the fact that the race was slowed up for thirty-three miles, during the last fifty miles, due to a drizzling rain.

Floyd Roberts, Los Angeles, finished fourth, ten miles back. Ralph Hepburn, also of Los Angeles, was fifth.

Thirteen of the original 33 starters survived the terrific speed. The dead driver was Clay Weatherly, Cincinnati, killed when his car crashed into a wall on the dangerous north turn. His mechanic, Edwin Bradburn, Los Angeles, was still in a semiconscious and very dangerous condition at the field hospital, although doctors attending him said he had a chance to live.

Several vertebrae in the middle section of his spine were fractured but he was not paralyzed. He suffered no other injuries.

MEN'S CLUB JUNE 11th

The Hagerman Men's club will hold its regular meeting on next Tuesday evening, June 11th. The meeting will be held in the Presbyterian church basement, and the ladies of the L. C. club will serve the dinner. Dinner will be served at 8:00 p. m.

The week of June 10-16 is national railroad week, and Mr. E. McElroy, transportation inspector of the Santa Fe, of Amarillo will be the principal speaker. It is expected also that one other out-of-town speaker will be present.

Rev. J. W. Slade, chairman of the membership committee, urges that all members be present at the meeting next Tuesday night, as he has an item of business which he wishes to propose.

FLOOD WATERS TAKE LIVES AND DAMAGE MUCH PROPERTY

Fresh rains continue to swell flood waters over the nation which are taking a heavy toll of lives and damaging crops and real estate which is mounting into millions of dollars.

The Missouri river is reported five miles in width in places with the Kaw river of Kansas and the Platte of Nebraska pouring into it, much apprehension is felt about the results.

In the floods wake in both Kansas and Nebraska, rehabilitation work has started with government funds.

Property losses continue to mount and officials are as yet unable to estimate crop losses in the two above states including the state of Missouri. While both Kansas City and St. Louis were threatened with flood waters, it was not considered as serious yesterday.

In the heart of the republic of Mexico the flood waters are still doing much damage, 350 bodies were dug out of a church where probably 400 people were trapped and drowned.

Cutting's Remains To Be Returned To State of N. Mexico

Remains of the late Sen. Bronson Cutting, killed May 6th in an airplane crash in Missouri will be transferred to Santa Fe for burial in compliance with his wishes, it was learned Friday.

Members of the senator's family wrote Herman Baca, one of his closest associates in Santa Fe, saying: "We have learned of Bronson's desire to be buried in New Mexico, and of his further desire that his grave be in the National cemetery in a place which he himself pointed out, and with which I think you are familiar."

"It is of course a great sacrifice to his family to have him buried so far away, but we all feel that Bronson was so much identified with the state of New Mexico and that his affections were so bound up with the affairs of the state, that it is but just that his body return to the state."

The letter added it was not possible at this time to fix the exact time of the transfer of the remains from the Brooklyn, New York cemetery.

Baca said arrangements for services at Santa Fe will be made after the time for the removal is known.

Baca said the spot picked out by Senator Cutting in the National cemetery was near the grave of the late Lieut. Antonio J. Luna who Baca said had been one of the late Senator's closest friends.

The will of the late Senator Bronson Cutting will probably be filed this week, unless application is made to the probate court for further extension of time.

LOCAL LETTER CARRIERS RETURN FROM MEET

J. E. Wimberly, Hagerman and Clyde Nihart, Lake Arthur, returned last Thursday night from the United Postal Employees convention, which had convened in Las Vegas on Wednesday and Thursday. A banquet was given them on Wednesday night. Thursday morning the united organizations had their meeting, and on Thursday night, the sectional sessions were held. All postal employees can belong to their sectional organizations, and to the united organization. About 150 employees attended. Next year's meeting will be in Clovis on Memorial day.

TO SAY THE LEAST IT'S A NEW METHOD

PROVIDENCE, R. I. June 3 — Officers are seeking verification of a grisly underworld tale that Danny Walsh, rum syndicate chief, was stood in a tub of cement until it hardened about his feet, then thrown alive into the sea.

They hoped to get details of the disappearance of Walsh from Arthur Rowland, 43, former rum-bottle skipper of Bridgeport, Connecticut, who, police said, admitted he attended the "death supper" to Walsh at the Bank Cafe in Warwick on February 2, 1933. Walsh was never seen alive after that night.

The underworld's legend of his torture death persists, however. Walsh was taken out in a boat, the tale runs, and with his feet in wet cement, forced to watch it harden into the weight that would drag him to the bottom of the sea.

Questioning of Rowland, resumed has led to no revelations that promise immediate arrests, Lieut. Ernest P. Stenhouse of the state police said.

Mr. and Mrs. Carl Hawkins announce the birth of a son on Monday of last week. They will call him Carl, Jr.

The Veterans To Fight Delay In Paying Bonus

WASHINGTON, D. C. — Representatives of the American Legion and the Veterans of Foreign Wars decided yesterday to buck "to the last ditch" a move to delay the campaign for cash payment of the bonus until the next session of congress.

John Thomas Taylor, legislative counsel for the Legion, said that organization believes "the adjusted service compensation certificates should be paid in full at this session of congress and will fight to the last ditch for such a payment."

G. K. Brobeck, legislative adviser for the V. F. W., asserted the veterans feel "payment should be made at this session and will press efforts toward that end."

Tuesday leaders of the Patman inflationary bonus blocs in House and Senate announced that, rather than compromise in an effort to get immediate action, they would carry the issue to the country and attempt to push a bill through next year, providing for immediate payment in full. Most of them felt the bonus strength would be greatest in a campaign year.

LARGE CROWDS ATTEND FINALS OF INSTITUTE

Large crowds were in attendance at the New Mexico Military Institute finals at Roswell, which opened Saturday and lasted thru Tuesday. About five hundred parents and alumni of the school were in attendance for the thirty-seventh graduation exercises, in which 86 members of the first class received diplomas, delivered by Hiram M. Dow, representing Governor Clyde Tingley, who was unable to make his appearance.

Quite a number of Hagerman people attended the final ball at N. M. M. I. Monday evening. Among them were: M. and Mrs. L. W. Garner, whose son, John was among the graduating class; Mr. and Mrs. Jack Sweet; Mr. and Mrs. Ernest Bowen; Miss Dorothy Sweet; Pickens West; Misses Mary Alice Rabb and Wilma Walden, Rynam Cumpsten and Donald West; Mrs. John Mann, Miss Lillis Mae Andrus.

The local bank has received notices about the identification of the ransom money paid for little George Weyerhaeuser. A description of each denomination paid was given.

The officials of the First National Bank of Roswell received a set of the complete list of bank notes that were paid to the kidnapers, Tuesday, they stated from the United States department of justice.

BANKS RECEIVE RANSOM MONEY DESCRIPTION

Justice. Serial numbers of the 20,574 bills of denomination of twenty, ten and five dollar bills, were printed in a booklet of some size.

They stated that all the bank notes, according to the booklet, contained the letter "L" and were issued from the Federal Reserve Bank of San Francisco, California.

NEW STATE OFFICERS FOR DISTRICT ARRIVE

Two officers of the recently enlarged state police force, T. E. Jackson and J. W. Hardin, arrived Thursday in Roswell and are making a survey of their territory which includes Chaves and Lincoln counties.

These officers stated that within a short time, their families will arrive and establish residences in Roswell. The office for the state police is in the sheriff's office in the courthouse.

PECOS RIVER IS CAUSE OF DEATH

SANTA FE—Swift waters of the Pecos river at Terrero claimed the life of Angel T. Ortiz, 12, last Friday afternoon.

The boy whose home was in Madrid, was in Terrero visiting an aunt and was playing with some other youngsters near the river when he went into the water and was carried off his feet.

The body floated some distance down the river where it struck a log and was then recovered, it was testified at the inquest.

Miss Margaret Slade of Texas Women's College will arrive home this week to spend the summer. Miss Gladys Menefee of State College will spend the summer with homefolks.

Miss Margaret Slade of Texas Women's College will arrive home this week to spend the summer. Miss Gladys Menefee of State College will spend the summer with homefolks.

BOY RELEASED WHEN RANSOM IS PAID—KARPIS GANG SOUGHT

Nine Year Old George Weyerhaeuser Safe At Home — \$200,000 Ransom Paid—Army Criminal Hunters In Search.

George Weyerhaeuser, nine year old son of Mr. and Mrs. J. P. Weyerhaeuser of Tacoma, Washington was released by kidnapers just before dawn, Saturday, June 1, unharmed.

It is reported that \$200,000 ransom was paid by the boy's parents reputedly worth \$5,000,000, however a statement was issued by them revealing that the amount was raised by the aid of friends.

Held by kidnapers for 8 days the federal agents were held in leash during the entire time. The nine year old boy, heir to the country's greatest timber fortune was released on a lonely country road. He made his way to a farm house, walking several miles, was given dry clothing, as he had been released in a cold rain soaked country side. The farmer started to the city with the boy and was met by a newspaper man who rushed the child to his parents.

Immediately after the release of the kidnaped boy, every law enforcement agency in the northwest joined hands to throw a blockade over all possible avenues of egress and soon the jaws of the man hunting machine were snapping at potential traces of the suspected Alvin Karpis gang. The Karpis mob engineered the Edward G. Bremer kidnaping which also netted them \$200,000. Apparently the abductors had a four hour start on the hunting army, the boy was released about 4 a. m. and it was 8 a. m. when he reached home, for a joyous reunion with his family after nearly eight days of horrifying suspense.

Young George was on his way home from school at the luncheon hour when he was grabbed by the kidnapers. He was put into the back of a car and covered with a blanket, he was told not to yell if he did not want to be hurt, so he kept quiet. The child also rode in the trunk of the Buick car occasionally, but got along alright as there were holes in order that he could breathe.

While the forces scoured the country side for his captors, young George slept the first night in the home where fear and uncertainty gave way to hysterical joy.

The first of the marked ransom bills was discovered in eastern Oregon, Tuesday. Statements of a justice department spokesman intimated that the case will "break wide open in 48 hours," as more recent indications predict that the kidnaping has been laid at the door of Pacific northwest criminals.

MISS PECOS VALLEY TO BE SELECTED

Miss Pecos valley will be the title of the beauty winner to be selected from Hagerman, Lake Arthur or Dexter in the Yucca Theatre's beauty pageant contest to be held on the stage of that theatre June 12th and 13th. This winner will be selected independent of the number of entries.

Several Hagerman girls have entered and more are expected before next week.

The winner selected from here will win a beautiful engraved loving cup and will also be given a special 5 day trip with other beauties from Oklahoma, Texas and New Mexico and will compete in the final contest late in July. The Yucca management claims this as the greatest contest ever held in New Mexico.

The final winner gets a trip with chaperon to Hollywood, California by American Air Line, a screen test at Paramount Studio, two gorgeous dresses designed by the famous Lettie Lee. A royal suite of rooms at the Hollywood Roosevelt hotel, a movie star to her personal escort, a trip to Cataline Island and the California Pacific exposition.

All the expenses will be paid for the local winners and also the final winner and her chaperon. Winners may also suggest one more for their chaperon and who will make the complete trip with the final winner.

Wilfred McCormick was a Roswell visitor on Tuesday.

Mr. and Mrs. Levi Barnett were Roswell shoppers on Monday.

Industries To Keep The N R A Standards

Pettit Is Likely To Go On New State Game Commission Soon

SANTA FE—Governor Tingley is expected to name a new game commission with the next day or two. It was generally believed that Federal Judge Colin Nebbett would be left as chairman. Dr. Fred Pettit of Albuquerque is said to be slated to succeed Gilbert Espinosa of Albuquerque, whose term has expired, and W. A. (Pete) Losey of Hagerman, former game commission member and president of the state G. P. A. is touted as the successor of Ross Malone, Sr., of Roswell, who resigned after campaigning against Tingley in the last election.

M. H. Hunter Dies From Injuries Received In Auto Accident Wed.

Merrill H. Hunter, 47, resident of Roswell for the past 19 years succumbed last night at 10 o'clock in St. Mary's hospital to injuries received when his car and a truck collided near Tatum last Sunday night. Mr. Hunter received a brain concussion and never regained consciousness.

He is survived by his widow, two sons, Chester and Kenneth. Funeral arrangements are pending, but probably will be in Roswell Friday, it was announced last night.

Charlie Foster of Lake Arthur was a business visitor in Hagerman last Monday.

RECKLESSNESS

There seem to be a good many people in this country who don't care much for living but who would be the first to be aghast if you accused them of it. For no reason at all, they are constantly and cheerfully risking their necks—and yours.

This group of citizens—who total hundreds of thousands constitutes our reckless, ignorant and irresponsible motorists. Consciously possessed of the idea that their abilities are not second to those daredevils of the race tracks, they make a practice of driving faster than the law allows, even though they are going nowhere in particular and have all the time in the world to get there. They weave in and out of traffic—if they waited until the road was clear for passing, they'd lose a precious second or so. They drive on the wrong side of the road. They have a contempt for traffic lights and signals, which were obviously created for less gifted mortals. They laugh at the rumored perils of hills and curves and take extreme pleasure in passing on them. When their brakes go bad their steering or lighting systems falter, they put off repairs until some other time.

The rest of us wouldn't have any kick coming if the suicide regiment risked their own lives only—that, after all would be their prerogative. But they menace us as well—menace everyone and everything which uses the streets and highways. The innocent suffer along with the guilty and unless these drivers are curbed, we all run a chance of being numbered among the victims.

In 1934, 24 people out of every 100,000 were killed or their deaths caused directly by automobiles.

Each 100,000 cars in use killed 130 people. Statistics show that it is steadily becoming more acute. In 1931 registrations and gas consumption was 3 percent greater than in 1934 and yet the death toll was 8 percent under that of 1934.

The time has passed when appeals to the reckless driver to improve his ways are sufficient. He has refused—and the force of public opinion, backed by modern, aggressively enforced laws, presents the only solution.

Colorado has recently passed the automobile financial responsibility law, one of its provisions is: that after an accident which results in a judgment, the motorist's license will be taken from him if the judgment remains unpaid. In order that he be licensed again to drive, he must furnish proof of financial responsibility.

STATE POLICE REPLACES THE MOTOR PATROL

Jack L. Nichols and C. Lawhon, state police for Eddy, Lea and part of Chaves counties arrived in Carlsbad, Friday to establish their headquarters in that city. Nichols' family has already joined him and Lawhon's family will join him in the near future.

They expect to co-operate with city and county officials in launching a rigid enforcement of state brake and light laws for automobiles.

The state's challenge to law violators in the form of the state police force, 30 strong, swung into action last week in every district of the state.

The state police succeed the old motor patrol. Under the new set up there are 27 policemen with E. J. House as their chief. There are also two plain clothes men. The plain clothes men will receive roving assignments while the police are stationed in specified districts.

The police have taken an intensive course of instruction under expert supervisors and the force is regarded as one of the best law enforcement units of its size in the country.

Calling Cards, 100 for \$1.75, on grade paneled or plain stock. The Messenger.

LEGAL ADVERTISEMENTS

NOTICE FOR PUBLICATION

Department of the Interior, General Land Office at Las Cruces, New Mexico, May 8, 1935.

NOTICE is hereby given that Buck R. Brinkley, of Dexter, New Mexico, who, on May 10th, 1930, made Additional Homestead Entry, No. 041857, for Lots 1, 2, S 1/2 NE 1/4, SE 1/4, Section 4, Township 13 S., Range 27 E., N. M. P. Meridian, has filed notice of intention to make three year Proof, to establish claim to the land above described, before Dan C. Savage, U. S. Commissioner, at Roswell, New Mexico, on the 20th day of June, 1935.

Claimant names as witnesses: Edra G. Hudson, Hiram H. Hudson, Louie Heick, Richard C. King, all of Dexter, New Mexico. PAUL A. ROACH, Register.

NOTICE STATE ENGINEER'S OFFICE

Number of application RA-1268 Santa Fe, N. M., May 11, 1935.

Notice is hereby given that on the 11th day of May, 1935, in accordance with Chapter 131 of the Session Laws of 1931, H. Steffen of Hagerman, County of Chaves, State of New Mexico, made application to the State Engineer of New Mexico for a permit to appropriate the underground water of the Roswell Artesian Basin to the extent of 1200 gallons per minute by drilling a 12 1/2 inch in diameter shallow well to approximately 150 feet deep, located in the SW corner SW 1/4 Section 1, Township 14 South, Range 25 East, for the irrigation of 80 acres of land described as follows:

W 1/2 SW 1/4 Section 1, Township 14 S., Range 25 E., 80 acres.

Any person, association or corporation deeming that the granting of the above application will be truly detrimental to their rights in the waters of said underground source may file a complete sworn statement of their objections substantiated by affidavits with the State Engineer and file proof of service of a copy thereof upon the applicant with the State Engineer on or before the 20th day of June, 1935, the date set for the State Engineer to take this application up for final consideration unless protested.

THOMAS M. McCLURE, State Engineer.

NOTICE STATE ENGINEER'S OFFICE

Number of application RA-1269 Santa Fe, N. M., May 17, 1935.

Notice is hereby given that on the 16th day of May, 1935, in accordance with Chapter 131 of the Session Laws of 1931, Wm. L. Heltman of Hagerman, County of Chaves, State of New Mexico, made application to the State Engineer of New Mexico for a permit to appropriate the underground waters of the Roswell Artesian Basin to the extent of 1200 gallons per minute by drilling a 12 1/2 inch in diameter shallow well to the approximate depth of 150 feet located in the SE 1/4 NW 1/4 Section 6, Township 14 S., Range 26 East, N. M. P. M., for the purpose of irrigating 160 acres of land.

Part East of canal in W 1/2 described as follows: Section 6, T. 14 S., R. 26 E.-----40 acres Part East of canal in SE 1/4 Section 6, T. 14 S., R. 26 E.-----120 acres

160 acres 100 acres of above acreage has rights under Hagerman Irrigation Company, and said water from well will supplement this right.

Any person, association or corporation deeming that the granting of the above application will be truly detrimental to their rights in the waters of said underground source may file a complete sworn statement of their objections substantiated by affidavits with the State Engineer and file proof of service of a copy thereof upon the applicant with the State Engineer on or before the 26th day of June, 1935, the date set for the State Engineer to take this application up for final consideration unless protested.

THOMAS M. McCLURE, State Engineer.

NOTICE STATE ENGINEER'S OFFICE

Number of application RA-1270 Santa Fe, N. M., May 20, 1935.

Notice is hereby given that on the 17th day of May, 1935, in accordance with Chapter 131 of the Session Laws of 1931, The First National Bank of Roswell, County of Chaves, State of New Mexico, made application to the State Engineer of New Mexico for a permit to appropriate the underground water of the Roswell Artesian Basin to the extent of 1500 gallons per minute by using a 12" in diameter shallow well drilled in 1930, located in the SW 1/4 NW 1/4 Section 14, Township 14 South, Range 25 East, N. M. P. M., for the purpose of irrigating 160 acres described as follows:

NW 1/4 Section 14, Township 14 South, Range 25 East, 160

WOUNDED MAN CRAWLS FOUR MILES TO RECEIVE AID

Nerve and fortitude of the west were the qualities which probably saved the life of Beneno Anthony, shepherd in the El Paso Gap sector, located 50 miles west of Carlsbad.

Anthony's .44 calibre revolver dropped from his bed roll, discharged and struck him above the ankle, shattering the bone. Alone and without aid, he checked the flow of blood and then began to crawl on hands and knees to his nearest neighbor, four miles away.

The accident occurred at eight p. m. last Friday. Anthony reached his neighbor's home at 7:00 o'clock Saturday morning. A few minutes later, the injured man's journey would have been of no effect as the neighbor's horses were saddled and in readiness to move a herd of cattle. Anthony is in a Carlsbad hospital and is expected to recover.

CARBON PAPER—The Messenger

any person, association or corporation deeming that the granting of the above application will be truly detrimental to their rights in the waters of said underground source may file a complete sworn statement of their objections substantiated by affidavits with the State Engineer and file proof of service of a copy thereof upon the applicant with the State Engineer on or before the 29th day of June, 1935, the date set for the State Engineer to take this application up for final consideration unless protested.

THOMAS M. McCLURE, State Engineer.

NOTICE STATE ENGINEER'S OFFICE

Number of application RA-1266 Santa Fe, N. M., May 11, 1935.

Notice is hereby given that on the 11th day of May, 1935, in accordance with Chapter 131 of the Session Laws of 1931, E. B. Franklin of Colgate, State of Oklahoma, made application to the State Engineer of New Mexico for a permit to appropriate the underground water of the Roswell Artesian Basin to the extent of 700 gallons per minute by drilling a 10 inch in diameter shallow well to the approximate depth of 150 feet, located in the N 1/2 SE 1/4, Section 11, Township 13 South, Range 26 East, for the purpose of irrigating 80 acres of land described as follows:

W 1/2 NW 1/4 SE 1/4 Section 11, Township 13 South, Range 26 East-----20 acres SW 1/4 SE 1/4 Section 11, Township 13 South, Range 26 East-----40 acres S 1/2 SE 1/4 SE 1/4 Section 11, Township 13 South, Range 26 East-----20 acres

Any person, association or corporation deeming that the granting of the above application will be truly detrimental to their rights in the waters of said underground source may file a complete sworn statement of their objections substantiated by affidavits with the State Engineer and file proof of service of a copy thereof upon the applicant with the State Engineer on or before the 20th day of June, 1935, the date set for the State Engineer to take this application up for final consideration unless protested.

THOMAS M. McCLURE, State Engineer.

NOTICE State Engineers Office

THOMAS M. McCLURE, State Engineer.

Four Star Fashions BY THERESE

A georgette blouse in a quality to stand up under a warm summer's wear is a treasure that guarantees you fresh charm whether you are busy or frugal. This material-hued Burnham model edges its delicate fluted front and for the elements with fine matching Valenciennes lace. It keeps its tailored look, however by a trim neckline fastened in a simple bow.

EVERY few weeks the fashion-wise woman casts an appraising eye over her own clothes—for she knows that others are constantly doing it. This habit of checking up on your prospects for a chic effect pays grand dividends in increased smartness. It will, of course, be one of your momentous considerations in planning clothes for a vacation.

A suit and a stock of fresh blouses are dependable pals to tie to, in taking a trip. Whatever else the blouses do for you, they must put up a good front. Cascading jabots edged with lace, yokes and collars of dainty shirring, or filmy fluted ruffles make the fronts of sheer types so pretty they have a right to be cheery about it. It's good news that georgette, chiffon, and organdie in delectable pastel shades are among the fabrics doing their bit to further the flair for femininity.

In addition, calls for tailored blouses made of linen and preferably with pockets, have reached the proportions of an avalanche. Make—leading in linens as in sheers,—shrimp pink and aqua and the brand new raspberry or Dubonnet red, as well as the ever-smart navy and brown are some of

With this Flak cruiser you have a head-start in style, whether you go vacationing on land or water. Packing it in your bag won't hurt its soft shape for it's made of rows of white program ribbon, with a hand-stitching effect in matte-colored thread to match the shiny pedaline straw underbrim.

The millions who have been "attending to their knitting" it seems are now working their needles overtime on yards of lively color. It is the innumerable lovely yarns available, I believe, that often decoy women into this absorbing game of knitting, although there is a challenge for experienced as well as beginning "hands" in recent novel patterns I have seen. One was an exceedingly clever suit, with swagger jacket knitted in a raised diagonal diamond motif. Another model that fairly oozed individuality had lacy, intricate bands set in plainer stitches, while a trim frock a friend just finished of Nomotta floss in the new amethyst shade had crocheted balls decorating the neckline and patch pockets.

This year the knitted costume forms the backbone of the vacationist's wardrobe. Indeed, besides hand-made outfits for wearing, to be in fashion you should take along the knitting that is to be your next smart ensemble!

Heads Up! Soft Hats Win Hats of fabric, felt, and straw seem to be holding their own Derby

In the center is a cool and distinctive-looking frock of Nomotta Shetland floss that can be made almost in a jiffy in the fascinating new herringbone ribbing stitch. This is a model that the slender girl will claim as her especial set in shrimp pink, turquoise, or other gay summer colors.

for mid-summer supremacy, and whichever wins, it will be a victory for soft types. Quite the most intriguing compromise to the situation are hats that combine brims of straw with fabric crowns in contrasting colors. Some of these crowns are of linen, some of ribbon or silk pipe, and others of crepe, while the brims usually are pliable, also.

There's no resisting the persuasion of delicate hues offered by Flak felts. Wide-brimmed simplicity of line features the latest versions, making them surprisingly suitable to both sports or semi-dress costumes, and thus an ideal asset to a vacation. The appeal of color which has permeated the whole feminine mode carries into millinery, so that all-white hats promise to be somewhat of a rarity. Instead, a favorite among sports hats adopts a tailored trim of tri-colored ribbons. In the straw numbers you may choose the rough onion peel or the bakus with equal assurance of smartness, and my own axiom is that a becoming hat or two will do a lot toward making the summer a success.

Farmers Of State Study AAA Work

During the first part of 1935, farmers in New Mexico counties having major agricultural adjustment programs, have studied and discussed the different phases of AAA work, including the clarifying amendments (H. R. 7088) to the adjustment act. The various crop control associations in these counties, in cooperation with the extension service, have encouraged discussion meetings where farmers have had the opportunity to inform themselves about the purposes and objectives of the adjustment programs.

In the counties of Colfax, Eddy, Harding, Quay, Roosevelt, San Miguel, Union and Dona Ana, a total of 223 meetings, with total attendance of 6633 have been held since January 1, at which the AAA was discussed in general. A total of 274 have been held for the express purpose of discussing the amendments to the AAA act, now pending before congress. Recently, a series of educational meetings was held in the wheat counties to consider the proposed continuation of the wheat adjustment work.

Farmers in ten of the counties mentioned above have gone on record supporting the AAA amendments. This expression of sentiment has been accomplished by resolutions at three district meetings held at Tucuman, Clovis and State College, and by sending representatives to Washington where resolutions supporting the amendments were adopted.

Dona Ana county has gone on record both opposing and supporting the clarifying amendments. Its county allotment committee supported the amendment and a meeting of its farmers voted in opposition.

In the eleven major counties, where the above described activity has taken place, are found 97 percent of all wheat allotment contracts, 90 percent of the state's corn-hog contracts, and 96 percent of the cotton contracts.

When the New Deal muddle, goes into a huddle, To concoct more schemes to confound and befuddle, I'm told 'tis a sight, The way they fall out and fight About which one shall be the biggest duck in the puddle. —Shoup in Curry County Times.

Governor Asks People To Pay Taxes By 15th

SANTA FE — "I hope full advantage will be taken by the people," said Governor Clyde Tingley, Monday in reminding tax payers that the 1935 legislature passed an act giving until June 15, 1935, for payment of 1934 taxes without interest and penalty. "I believe that if it is generally known that payment of 1934 taxes before June 15 will permit payment of 1933 and prior years taxes before December 1, 1935, without interest and penalties, many taxpayers will make special efforts to meet the conditions."

"I am informed," the governor said, "there are taxes unpaid in New Mexico to the amount of \$10,000,000. If a substantial part of this large sum can be collected, we can meet all our budgets on a 100 per cent basis this year and next, and put every fund on a cash basis. It is incumbent on tax collecting agencies and tax payers to cooperate in a general effort to clear the tax rolls of these delinquent taxes. This can be done only by their payment in full as to principal. Our state constitution does not permit elimination otherwise."

"If 1934 taxes are paid as suggested above before June 15 next, our state and local governmental agencies will reach the end of the fiscal year on June 30, 1935, with all bills paid and with balances instead of deficits."

"I suggest that the week beginning Monday, June 10, be 'pay taxes week' in New Mexico."

Mr and Mrs. George Hopp of Los Angeles, California visited for a few days last week with the family of E. D. Menoud. While here they, in company with Mr. and Mrs. Menoud and Jack Menoud went to the Carlsbad Caverns.

Henry: I'm sorry, Josephine, but I went into six stores and tried to match your sample of goods but there wasn't a thing in town anywhere like it.

Josephine: That's just what I wanted to find out. Now I can make a new dress and know that all the other women in town won't have one just like it.

Two men occupying a seat on the loafer's bench were discussing the tendency of the churches to become more liberal and the remark was made that some churches were doing things now they would never have thought of ten years ago, and one of the said: "Yes, (calling the name of an orthodox church), a member of this church almost admitted that it was possible for a man to get to heaven without being baptized."

Happy In Refrigerator

In their icy quarters with private swimming pool, a dozen Antarctic penguins are ready to give a chilly greeting to President Roosevelt as Admiral Byrd and his ship come home.

PREENING their feathers and splashing merrily in their private swimming pool, more than a dozen Antarctic penguins last week prepared to receive a greeting from President Roosevelt as Admiral Byrd's supply ship steamed up the Potomac to Washington.

The birds are Imperial penguins, and are half as tall as a man. They are the first of the Antarctic breed ever brought back alive to the United States.

Whether the penguins must be kept permanently under refrigeration remains to be discovered.

Other varieties live in the tropics. In fact, the vessel stopped at the Gallapagos and picked up a collection of the smaller penguins that thrive there.

Even in the cold of their special air conditioned room with its salt water swimming pool, more than half the birds died. Ironically, they were stricken with pneumonia, autopsies revealed, indicating that at least they were protected from the heat while the ship was in the tropics.

Quarters for the penguins were installed aboard the ship in New Zealand before it started for Little America just January to pick up the expedition. A tank was built in the floor and the most efficient type of refrigerating equipment installed to keep both the air and salt water at low temperatures.

Oddly enough, this material, depended upon to keep the penguins cold and alive, was also used to keep Admiral Byrd warm and alive in the hut he occupied during his solitary antarctic vigil last year.

It was also used in all the houses at Little America.

More significant is the fact that New Mexico also ranks first in the percentage (90) of enrolled schools which participated in the study.

Puerto Rico is the only territory whose improvement displayed a keener interest in the pact than New Mexico.

The next highest percentage in membership increase is 520 for Utah, and in participation is sixty for Tennessee.

The work of New Mexico's committee and the assistance given by superintendents, principals and the teachers of social science, have been referred to by Mr. Watkins as being parts of one of the best educated plans in the six years of the Forum's history.

Mr. Watkins has asked the same committee to function during the next school year in order that improvement may be superimposed upon the work already established by this year's committee and former state committees and chairmen.

Irvin P. Murphy, superintendent, Grenville schools, is chairman for New Mexico.

Pioneer Birthday Celebration Held At Clovis Wed.

The Clovis community celebrated their birthday anniversary Wednesday with a unique program.

History was rehearsed from the Slaughter ranch and De Oliverias through the 80's and 90's, through the rush settlement of 1906 and 1907.

Pioneers of Curry county and neighboring sections who were there before statehood days, January 6, 1912 helped make this one of the biggest days Clovis has ever seen.

According to statements made by A. W. Anderson, general chairman of the event and C. L. Dobbs, parade chairman, they have never seen such enthusiasm displayed in making preparations for a celebration.

Literally miles of parade included floats, old carriages, cowboys, pioneers, bands and flags. Old time photographs, many of which are considered "priceless" by their owners, were displayed with old time relics in show windows.

Large numbers from eastern New Mexico and parts of Texas attended the rodeo in the afternoon, the old fiddlers contest attracting a huge crowd in the evening.

A dance Wednesday evening closed the celebration in which more than 2,500 pioneers registered for events.

State Ranks High Study Peace Pact

In a special letter to the state chairman of the National Student Forum on the Paris Pact, Arthur Charles Watkins, director, has complimented the work of New Mexico, which made the greatest percentage of increase in membership (71%) of any of the states.

Approximately 100 high schools enrolled to study international relations by means of student projects developed in the light of the pact.

More significant is the fact that New Mexico also ranks first in the percentage (90) of enrolled schools which participated in the study.

Puerto Rico is the only territory whose improvement displayed a keener interest in the pact than New Mexico.

The next highest percentage in membership increase is 520 for Utah, and in participation is sixty for Tennessee.

The work of New Mexico's committee and the assistance given by superintendents, principals and the teachers of social science, have been referred to by Mr. Watkins as being parts of one of the best educated plans in the six years of the Forum's history.

Mr. Watkins has asked the same committee to function during the next school year in order that improvement may be superimposed upon the work already established by this year's committee and former state committees and chairmen.

Irvin P. Murphy, superintendent, Grenville schools, is chairman for New Mexico.
