the ledge."

CHAPTER IX-Continued -15-

So she was silent: and later, when they came back through the all to see. But even as she thought wet woods together, she decided this, she realized suddenly that she that this was a matter none should was no longer afraid, and wondered ever know. And thus resolving, she why. And then, without speaking found strength for the task before to Bart, she came quickly back into her, and was at peace again. Huldy was dead. Let it be by accident. The world would presently forget that Huldy had ever lived. When with Will she came back to tainty, like a revelation. the little house in the Valley, she had somehow stilled her fears,

Till she saw the sheriff there. When they came in, she felt her strength drain away. But then, and by Will himself, her foreboding was turned into fearful certainty; for

"Why, Sheriff, what fetched you

The sheriff hesitated. "I kind of hoped you'd bring this Zeke Dace you, Will?" he urged. "Didn't was trying to! And this time I declared. back with you," he said, evasively. you hear her screech when she Will shook his head, "I dunno sounded mighty loud to me." troubled tones. "He wa'n't to And he persisted: "But Sheriff, what fetched you?"

Jenny was breathless, waiting for the answer. Then Saladine said He looked at Saladine, "I mind," gravely: "I sent for him, Will." for?" he protested, bewildered.

And then the sheriff said: "Why Will, the thing is, it looks to everybody as if maybe Mis' Ferrin didn't just fall off of that ledge. They think some one maybe throwed her you to get down to the brook. Sup-

Jenny's throat constricted stranglingly. The hounds were on the

As though from far away she heard Will stammer: "Killed her, you mean?" "Something like that."

Will stood with his head bowed. "I guess not," he said firmly at last. "Who'd do that?"

"I was thinking maybe this Zeke Dace," Sobier suggested.

But Will shook his head, "No Sheriff," he insisted, "Whatever did He added with a glance at Salahappen, it wa'n't Zeke. He wouldn't go to hurt her." And he continued, half to himself: "There might have slipped. . . ." been some to hurt Huldy; but not! Zeke! Why, I'd as soon think I did I've got shoes on. It was someit myself," he said. one else," he insisted. "It wa'n't

Jenny felt the shock of a great

Then Bart chuckled. "That's a Joke, Will. I mean, to think you'd hurt Huldy," he explained, and body'd blame you! She needed it. He spoke to the sheriff. "Anyone around here will say the same!"

Will moved a little toward him. "I don't take that kindly, Bart," he said. "I don't want that kind of talk from you or anybody. Not about Huldy. Not now."

There was, briefly, silence; but after a moment the sheriff said. half to himself, in almost querulous

"It's a pity she didn't come to long enough to tell what happened

And it seemed to Jenny suddenly that this familiar kitchen was very small, and crowded, and stifling hot. She felt strangled, and her hand flew to her lips, and stark terror choked her. Then she saw Marm Pierce watching her with eyes suddenly keen and shrewd; and "Jenny," she called sharply. "You she felt smothered, and shrank

After the sheriff spoke there was you've told. You was down brook other room. stlence for a moment: then Jenny this morning. Did you see anyhad a respite, for Joe Matthews. the undertaker, came out of the tones were insistent. dining room. He spoke to Will.

"There, Will," he said. done all that needs doing tonight; steadily enough. The way was didn't you tell me this here beand if you want, I'll carry her home." He hesitated, added: "But if you take my advice, let her lay here tonight. I can 'tend to everyin the woods," thing a sight better in the morn-

Marm Pierce said: "She's welcome to stay, Will!"

Will nodded. "Well, likely that's sensible," he agreed.

thus turned away from her, opened Jenny?" she demanded. the door and stepped out on the porch, grateful for the taste of cool, moist air. In the kitchen she heard the sheriff say doubtfully: "I guess, Joe, you'll want to go along home now. I don't know as I ought to leave yet, though. I'd like to see this Zoke Dace, first But I wish't you'd bring Doc Harris in the morning. I want him to ute, before she died," said Jenny Jenny, she didn't see him after look her over."

When presently the undertaker came out to depart, Jenny drew out of his way. Sohier and Saladine crossed with him to where his truck stood, spoke with him said to Jenny casually:

"Hot in there, sin't it?" And in

and forks and cooking dishes were her off the ledge!" stowed away. Bart was by the door into the shed. Marm Pierce was oven with his greatcoat loose about he did!"

Will was beyond the stove, near crisply. the other door, impassive, waiting. Saladine, watching Jenny, thought she seemed in this moment to wear ny?" he asked in sober tones. a mantle of grace. She looked at Will and her eyes held his, and her tone was gently mirthful. "She told me you did it, Will,"

said Jenny, with a smile on her lips, and her glance serene.

Bart uttered a low ejaculation

"How come you didn't call me?" "I didn't want you," Jenny told

her gently. "The more fool you!" said Marm ter what he done!" Pierce briskly, her patience near pened?" she demanded.

Pierce, you let her tell it her own the kitchen where were Marm Pierce and Will. Her hand touched Will's sleeve, and peace filled her: shook and swayed where he stood, was sure!" and a deep enlightenment and ceras though this that Jenny had to say had struck him nerveless. Then the truck departed, and

turned indoors. After a moment the sheriff appealed to Saladine. business. I guess you was the last couldn't hear her. She was awful "Anything you've got to say?" Saladine shook his head. "I don't said to her, 'It's all right, Mis' heard what she said."

fell? I'd have said everybody in Marm Pierce exploded in a flerce where Zeke's got to," he admitted in a mile could have heard that. It impatience: "Get on with it, Jenny! What did she say?"

And Jenny answered: "She said wouldn't carry up to the farm, with I could have him now!

the hill between, and the trees." "I guess I kind of moved back, at that, away from her! It was he said, "when you went off with like she'd slapped me!" Her cheek Will stared at Saladine. "What Huldy, Zeke he come out of the was pale, and she spoke almost shed like he'd go along after you. humbly. "I didn't know what to I stopped him, made him stay be- do," she confessed. "So I just tried hind." And he continued after a to tell her it was all right, and I moment: "Seems like I kep' him told her Will was coming." there a sight longer'n it'd take

Her tones shook, then steadied. "And then she said it," she conposing you didn't stop any time on cluded. "She said, kind of slow and weak: 'Will knocked me off-' And she had to wait a minute, and then she said: 'He hit me!'" There was silence for a moment:

The girl was silent for an instant "By the time I figured you'd be before she could go on. gone," he explained, "I left Zeke "Her mouth was still kind of and went into the house; but when laughing," she finished. "And she sort it come on to rain, I wondered of coughed. I guess that was when where Huldy was. I come out on she died." A deep tremor shook the porch and yelled for Zeke, but her, but her voice was firm. "She he didn't answer, so I went hunting laid there, looking at me, and her them. The burglar who usu it had served the United States gov- after this district is in p ernment; that its policies were of Stray Stories, more value to this country than they ever had been publicly shown to be before and that in the end they had enabled the governments of Great Britain and France to maintain their strength and fight off the Central Powers until the men and money from the United

States were brought into play. Through the long years that J. P. Morgan and company has operated in New York the name has been synonymous with Wall Street. It was synonymous with Wall Street because demagogues and those politicians who profit by baiting big business as a popular sport had created that impression. ways when it was profitable for a representative or senator to con jure up a picture to win votes for himself you could find allusions to the "mighty power of Morgan."

It will be recalled how in recent years two former senators, Brookhart, Republican of Iowa, and Heffin, Democrat of Alabama, made mince meat of the "money changers of Wall Street." Always the "money changers" were headed up by the accord and need no help. House of Morgan. I mention these two former senators because their attacks are typical. There are those in the senate today who do the same thing for the same purposes.

The committee investigation of the House of Morgan showed that the institution had profited by acting as commercial agents for the allies and that in handling about three billion dollars in purchases for use at any drugstore. pany had taken bonds of the French and British governments and had sold them here. Evidence showed that after the United States entered the war, the United States government took over the job of financing those nations whose business and financial transactions had been handled by the House of Morgan prior

to April 6, 1917. So, the munitions investigation. instead of smearing the House of Morgan, apparently has told for the first time the details of how it func tioned during a period when the United States government could do nothing, a period when the vast ma jority of our citizens were proved to have been sympathetic with th allies against the central powers.

At the outset I said this investigation has flared back on its sponsors. Time alon-Senatorial will tell how sig-Inquiries nificant this explosion has been

and time alone disclose whether it

will have the effect of reducing the number of senatorial excursions into the affairs of private business. The senate has vast powers and they are susceptible to abuse. There are many unbiased students of government who hold the con warranted investigations by the sen ate, and that these investigations amount to persecution of private business. Obviously, some inquiries have turned as a large transfer of the sen and that these investigations amount to persecution of private business. Obviously, some inquiries digestive system. have turned up real dirt. Take the plete elimination without pain or oil scandal that came out of the Harding administration, for example. The facts in that conspiracy probably never would have been disclosed except for the vigorous job done by the late Senator Walsh. Montana Democrat. There are other illustrations of the truth of the statement that some investigations are valuable. On the other

hunting as such, represents a game somewhat outside of the rules of fair play. If the bitter feeling that was de veloped from the situation center ing around President Wilson's war time actions serves as a lesson for the future, I feel sure that there will be fewer senatorial inquiries It shows, or ought to show, that there should be some basis estab lished before a senate committee goes whole hog after the hides of any business men, large or small.

PAPA KNOWS-

BEDTIME STORY By THORNTON W. BURGESS

SAMMY JAY WORRIES

T ISN'T often Sammy Jay worries about anybody but himself. Truth to tell, he doesn't worry about himself very often. You see, Sammy is smart and he knows he is smart. Under that pointed cap of his are some of the cleverest wits in all the Green Forest. Sammy seldom worries about himself because he feels quite able to take care of himself.

But Sammy Jay was worrying now. He was worrying about Lightfoot the Deer. For two days he had been unable to find Lightfoot or any trace of Lightfoot. But he dld find plenty of hunters with terrible guns. It seemed to him that they were everywhere in the Green Forest. Sammy began to suspect that one of them had succeeded in killing Lightfoot the Deer.

Sammy knew all of Lightfoot's hiding places. He visited every one one of them. Lightfoot wasn't to be found.

Sammy felt bad. You see, he was very fond of Lightfoot. You remember it was Sammy who warned Lightfoot of the coming of the bunter on the morning when the dreadful hunting season began. Ever since the hunting season had opened Sammy had done his best to make trouble for the hunters. Whenever he had found one of

Whenever He Had Found One of Them, He Had Screamed at the Top of His Voice.

them he had screamed at the top of his voice to warn every one within hearing just where that hunter was. Once a hunter had lost his temper and shot at Sammy, but Sammy had suspected that something of the kind might happen and he had taken care to keep just out of reach.

Sammy had known about the chasing of Lightfoot by the hounds. Everybody in the Green Forest had known it. You see, everybody had heard the voice of those hounds. Once Lightfoot had passed right under the tree in which Sammy was

MOTHER'S

POTTED MEATS AND FISH

MY WAY

By DOUGLAS MALLOCH

ET me be up at morning,

And let me on my way,

Then who would long delay?

And doing something for the world,

The world that does the same.

For with so much to do, to see,

Then who would care to rest?

For with so much to see, to do,

But, when the even'se shadows fall.

For, with so much to see, to do,

Let me go seeking fortune,

Let me go finding fame,

Let me be far at noontide,

Be far upon the quest,

I hear the pulleys rumble,

I hear the traffic roar,

Let me be far at noen,

A hundred matters to be done

And highways to explore.

And so the morn to wature,

And so the Cor to ream.

Let me be com'ag house.

IN ENGLAND potted meats are so common that the everyday cook knows all about preparing them. We like to have such meats occasionally, and the following are reliable methods of preparing such dishes.

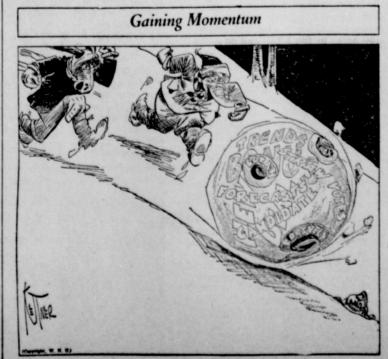

Meat such as ham, tongue or chicken as well as fish may be potted for a luncheon dish, rather than use it in other ways, such as hash, which is all too common in some homes. The goodness of the potted meats is, of course, first of all, in the meat, then in the proper pounding and preparation and seasoning. If carefully prepared and put away, these will keep for a long time and may be used for an occasional snack or an emergency dish.

Potted Chicken.

Take a cold roast chicken, reject ing the skin and sinews, chop fine and to every pint allow a half-cupful of chopped ham or tongue. Put the bones of the fowl into a saucepan, add a pint of cold water and simmer until there is half a pint of stock; strain and remove the fat. Pound the chicken, and ham or tongue to a smooth paste in a mortar with an old-fashioned pestle; this makes a smooth paste; or it may be put several times through the food chopper until fine. Then pound-the pounding makes the meat of the creamy consistency needed. Add a little of the broth, season with cayenne, nutmeg and a tablespoonful of butter. Put into small jars, press down and cover with a cloth, then cover the cloth with a flour and water paste. Bake in a moderate oven for half an hour, having the jars in water. Take out, remove the cloth, cover with melt-

ed butter, then tie over a paper moistened with egg white and se away to keep in a cool place until wanted. This will keep for months, and makes a fine hot-weather dish This will be a good way to take care of extra chicken at any time Fresh beef tongue, cold roast veal, boiled or roast mutton, ham and smoked tongue are all most tasty treated in this way. @ Western Newspaper Union

Fabric "Firsts" Arrive for Spring OF INTEREST TO

By CHERIE NICHOLAS

ing a great show in big stores as well as stores not so big. If nerves are tired and win-

ter gloom begins to pall why not slip away for a few hours from dull care and go meandering down aisle after aisle of the new materials? It will act like a tonic. Try it. There are quite a few things to

learn about the new fabrics. Generally speaking both the linens and the cottons are taking on a soft crepey finish which is "different." Then, too, there is a tendency toward rough spongy finishes and novel nubbed weaves. Patternings show decided originality and in instances are almost amusing. The modernized prints depict bars and music notes, or perhaps shell or fish motifs and the newest thing is vegetable designs, and they are wonderfully good looking. Very new, too, is the Terolean button motif which takes its cue from the bright painted wooden buttons that adorn peasant frocks and smocks

and jackets. It is well to keep in mind that cottons are scheduled to play a tremendously important role in the scheme of things. You will thrill at the sight of them. The newer types are positively baffling in that they so often give the impression of being handsome wool suitings or spongy soft uncrushable linens. They are that good looking they may be smartly worn about town, the new nubbed cotton tweeds making up most satisfactorily into tailored jacket suits.

For the do-your-own-sewing group the new materials are nothing less than inspirational. One of the newcomers in the realm of smart cottons of which you will be wanting to order a dress length at first

glimpse is twin-twine print, which looks more like a soft spongy loose woven linen canvas than anything else. You'll love this rough-surfaced cotton. It is cool and casual, doesn't crush, has practically no wear-out to it and is every inch smart and attractive in appearance. It has a hand-loomed effect with brilliant print on either white or natural grounds. The patterning is interesting, including square dot motifs in bright peasant blues and reds on natural, also florals in orange, green and brown. An allover scroll patterning in deep red on natural is, perhaps, handsomest of

The smart tailored coat frock pictured to the right is fashioned of dark-red-on-natural scroll-pat terned twin-twine. Black grosgrain binds the collar and front closing. Black bar buttons and patent leather belt are used as trim ac The other gown pictured is a

spectator sports mode done in a soft jersey type fabric of bemberg
with narrow white stripes on deep

landruff and Baldness, Guara toned grounds. The convertible neckline, ascot scarf and graceful cape sleeves are each fashion-right. This handsome fabric wears beautifully, resists wrinkling and is cool, sleek and slim under your topcoat It is shown also in white grounds way? with bright colored stripes for wear when the warmer days come It tubs or dry cleans nicely and easily presses slick and suave as new Jersey type fabrics are fashion news this year and are sponsored by leading designers of Paris, London and American style centers. @ Western Newspaper Union.

STYLE ACCENTS By CHERIE NICHOLAS

With smart Parisiennes black with beige or tan or mustard or related tones is providing a very important color theme for midseason with promise of its increasing popularity for spring. For style-alert American women the new and exceedingly attractive accessory pigskin sets, as illustrated, offer an excellent opportunity to carry out the voguish black and beige alliance. For sophisticated town wear one could scarcely conceive of anything smarter in the way of style accent than the tailored natural color pigskin trio of bag, belt and hat as complement to a chic black and metal dragons are used as coat after the manner pictured. tenings on black day dresses.

WARM FABRICS ARE FAVORED BY WOMEN

Fabrics are of exceptional interest in their variety. The most important group is definitely irregular in nubbed weaves with a marked hint of informality entirely consistent with a more colorful season.

The really formal coat tends to-

ward smoother, softly napped ma-

terials. Forstmann, the creator of these woolens, well realizes that formerly worshiped the bear. winters in the United States bring frigid winds and low temperatures. The slender silhouette, clinging lines and the response of the fabric to drape and tailoring are important factors, but women, young and old, want comfort in cold weather. They want physical comfort as well as the psychological comfort that comes from rich textures and deep colors.

Picturesque

A recent important fashion promenade showed models with enchanting names: an evening cape of Russian sable, for example, was called "champagne supper." A Russian ermine wrap with the fur mounted diagonally bore the name of "starlight." "Argentine" was the title all de of an evening gown made of brown and flesh colored satin.

Isinglass for Visors Isinglass visors are a new trick

in sunshades for Palm Beach wear. They are attached to caps and are tinted soft blue, rose or yellow to match some detail of a white beach costume.

Oriental Design Black crepe embroidered with tiny multicolored fishes makes a charming new evening gown. Jade and metal dragons are used as fas-

Flower pots used in the house are made very decorative if painted with water color paints.

A bottle of furniture polish rubbed into clean dry mop will give hardwood floors an excellent polish.

Maple sirup mixed with confectioners sugar to which a little butter or cream is added makes a delicious frosting for cakes.

Neck pleces of beef and lamb make delicious soups and stews.

A noted chemist gives us the information that science has discovere! that it is not dangerous to leave canned foods in the can after it has been opened. They remain in better condition until eaten if the unused portion is kept in the can. There is nothing about the can that will contribute to the spollage of food.

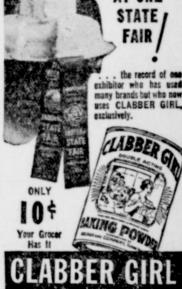

To keep the coffee pot sweet fill it with water to which one table spoon of soda has been added and set on the stove until water bolls.

To remove dust from upholstered furniture cover the surface with a large turkish towel that has been wrung out of water to which a tablespoon of ammonia has been added. Beat with carpet sweeper and all dust will adhere to towel,

Keep a large shaker containing six parts salt to one part pepper on the shelf of your kitchen range to use in seasoning foods.

YOUTH-INSPIRATION

Recently we were part of a large assembly, and heard the clear, ringing voice of a youth just past his teens, in word of suppliance say: "Guide us with thy everlasting love, help us to use our abilities with wisdom, may our lives be examples of all that is worthwhile, an dhelp us to meet life's perplexities fearlessly."

In the silent hush of the moment, that vast audience seemed to rise on tiptoe to meet the ardor of that youth, there was in that building a radiation of all that is typical of youth. An the thought came to me "where would we be in this world, if it were not for the youth of the land?"

Youth, that early part of life when hopes run high, that characteristics are: spontaneity, cheerfulness, hopefulness, fearlessness and we could go on and on naming them. Where would be be without that spark that buoys us up, renews courage as the years wane?

Youth, they who meet each new morning with renewed vigor and ambition. They know no fear, Engineer of New Mexico for a theirs is a faith born of an unseen guiding hand that leads to high ideals. It is to them we turn, with bright hopes for a new day. YOUTH! THE WORLD'S TO-MORROW

e Safety, Comfort and Pleasure Motoring Public. Prepared

by General Motors No. 4—OUR BRAKES
all noticed that whenever a train makes a long enough stop in a there's somebody on the job, dodging in and out under the cars

that everything is in good shape for the train to continue its trip. One of the things checked at every inspection point is the brakes. For nobody knows better than railroads how important it is to be able to stop when you have to stop.

Now, if we think of it in a certain light, we people

who own automobiles are all running little transportation systems of our own . . . just like the rail-roads and airlines and bus companies. Home is the main terminal and there are lots of stops along the line...flag stops, you might say, and regular scheduled stops—like the office, the grocery store, the school, the theatre, and our friends' houses.

Just like the railroads, one of the main things we need to look out for is our brakes. Of course, everybody knows this and yet somehow or other we're apt reless about it. Not that brakes don't give us plenty of when they're going to need adjustment. As time goes on we find that n push the pedal lower and lower, till after a

an shove it down almost to the floor-tre the brakes take hold. Even then we walt quite a while before we have them ed. It just seems to be human nature to put is like that. They tell us the result is that willfully doe nird of all cars on streets and highways at any have something wrong with their brakes. ble is that when we let our brakes go like Il of a sudden we may have to make an emerd we may find it rather embarrassing. gineers say that if we realized what goes on kes we would see why we ought to keep them

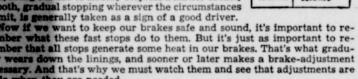

a city dad riction, the same old forces we've talked about before.

y lad? In many say that when we get going we build up a certain energy in the should say.

form of momentum. Now when we want to stop, we can't just destroy that energy, because, scientists tell us, Nature never lets any of its energy be destroyed. We can only convert it into some other form of energy. What brakes really do is to convert speed-energy into heat-energy. When we push down on the brake pedal we press the brake lining against the brake drums and this creates friction that changes the energy to heat. When we have changed all the speed energy to heat, then we come to a stop.

Now modern brakes are very powerful. In fact, a 100-horsepower car will have about 500-horsepower brakes. They can stop us pretty quickly even from high speeds. But when they do, they simply change those speeds into a great deal of heat, in a very short sometimes build up temperatures in our brakes as

ome of us may think it's fun to rush up ps, but we might as well realize that we for that kind of fun in excessive brake mply doesn't pay to build up brake heat a ban it can be thrown off. And we certainly anything back in time saved. For instance, ing 30 miles an hour, our brakes can stop feet if they are all right; but it takes them two seconds longer to stop us in twice that How much better it is, under any normal nces, to begin to apply the brakes a few arlier and, with gradually increasing presng our car to an easy stop. As a matter of fact, gradual stopping wherever the circumstances generally taken as a sign of a good driver. car to an easy stop. As a matter of fact,

o maybe it would be a good idea to keep on thinking of our cars as ate transportation systems. If we keep them in good running condition, will serve us with safety and satisfaction.

Shelton, will travel at a height of 26,000 feet and will make 300 miles an hour at cruising speed. The plane will make a Miami-Chicago hop shortly.

MEAT LEADS AS FAVORITE FOOD

Potatoes Rank Second in Survey in Twenty States.

By EDITH M. BARBER

THAT is your favorite food? Perhaps you will answer, instinctively, apple pie, or chocolate layer cake. But on second thought you consider what food it would e hardest for you to be forced to omit from your diet, you probably will decide with most other Americans that meat is your favorite food.

A survey made by a national restaurant system of sixty-five million meals served in 118 restaurants in 20 states showed that meat leads all other foods. Next came potatoes with - believe it or notmashed potatoes the most popular. This surprised me, because I do not usually give restaurant mashed potatoes a very high score. Beef and pork are the most popular meats, very much lower in the scale comes veal and still further down comes lamb, which is another surprise,

Fruits, milk and cheese are eaten in larger amounts than was previously the case. Vegetables and salads did not score high in this particular survey. Desserts were eaten by more than half the pa trons with apple pie leading the

In spite of the low score for vegetables in this particular survey the consumption of them is infinite larger than it was 15 years ago Until 1929, the vegetable production and sale increased greatly. Since that time it has dropped because people do not have as much to spend for foods and are likely to choose the more filling foods Louis Nova, twenty-one, six feet when they are buying their meals

The Household

By LYDIA LE BARON WALKER

WHEN a homemaker selects wall papers or decides on the color of paint if the walls are to be painted, she should have some idea of the effect of dark and light tate one style or the other, and the home decorator wish to follow the vogue, but it is unwise to do so to the detriment of interiors. A good expert decorator will always modify a style to accord with the beauty of rooms.

There are certain effects that can be determined in reference to any rooms. Light walls will contrib ute to an appearance of enlarged space. Dark walls will give a diminished effect. Rooms with sunny exposures can better afford to have dark walls than can rooms with northern exposures since the brilliance of sunshine is absent from the latter. If a southern exposure is shaded by evergreen trees that keep in foliage winter and summer. or if any room is shadowed by high walls or tall houses or fences, such rooms should not have dark walls.

A gloomy effect will result. Small rooms should not have

The administration will work out a system of granting farm subsidies to farmers restricting acreage under authority of the soil conservation act of 1935. In connection with the program the administration will make provision for obligations incurred under the AAA

Final Returns in the

ship Discovery II which was sent Literary Digest Poll LITERARY DIGEST'S Presidential straw vote has been concluded, and the final returns indicate a growing opposition to the New Deal. A total of 1,907,681 ballots was received, and of these 62.66 per cent were cast against the President's policies and acts, and 37.34 per cent were for the administration.

Thirty-six states gave majorities against the eleven still in favor of the President and his policies. Among the pro-Roosevelt states was Utah. The others were classified in the release as "southern and border" states.

Of the different sections of the country, New England cast the heaviest "No" vote, going 77.98 per cent against the administration. The Middle Atlantic states from New York to the west showed 68.89 per cent of the voters against Mr. Roosevelt and his recovery schemes, while the Middle Western states in the farm belt and the Rocky Mountain states indicated a ratio approximately the same as the nation at large-3 to 2 against. The three Pacific coast states totaled 58.04 against the New Deal.

THOUGH barely 738 square miles in area and with fewer than 825,000 people, the Saar has been one of Europe's most publicized regions since the World war. Powder keg of Europe; witches' caldron; political sore spot. For years such graphic labels have been acked onto this small but highly industrialized region lying north of Alsace-Lorraine between France

and Germany. From the days of Attila and the Caesars down to Foch and Von Hindenburg, its valleys and wooded hills have rocked and echoed to the tramp and shouts of marching armies,

Geographically, the Saar is an irregular patch of hilly land crossed by small valleys. It lies alongside Luxembourg, forms a buffer state between France and Germany, and was cut from the two German states of Prussia and Bavaria.

With a population about equal to that of Boston proper, it shelters more than 1,000 people per square mile-one of the most densely settled areas in all Europe.

Only such miniature European states as Andora, Liechtenstein, San Marino and Monaco are smaller than this tiny, yet dynamic country. America knows no state so dwarfish. Delaware is about three times the Saar's size, yet has less than a third its population.

Saarbrucken, metropolis of the Saar, has only 132,400 people; yet In one year Saar trains haul 60,000, 000 passengers!

Sit in any stuffy cafe at Saarbrucken, watch the guests eat red SEVENTEEN persons met a tragie steins of beer as the band plays cident that the United States has heavy Wagner music, and the place seems just another German indus

Lea Co. Oil Leases Bring Big Money N SOCIETY Phone 17

Two recent sales of Lea county oil leases show how big and quick money has been made by people who have had the nerve and faith to make investments, These two sales made recently are only among the hundreds which have brought vast returns to the investors and are only indications of what may be expected in the future in a

Miss Louise Wulff, a public ward, Los Angeles, California, recently sold the state lease on west half of the northwest quarter of section 17, township 20, range 37 east, in the Monument field, to a Los Angeles capitalist for the handsome sum of \$50,000 cash and in addition received an over-riding royalty of one-sixteenth.

The is said to have been one of the best sales since the boom days in the Hobbs field when as much as \$5,000 an acre was paid for leases in the most favored terri-

The eighty acres transferred by Miss Wulff s adjoining the famous section 7, where the Barnsdall recently completed two of the argest wells in the great Monu-

The records of the state land office disclose the fact that this ase, B-1616, was dated January 11, 1933. Miss Wulff renewed her Robert Cumpsten, Mrs. A. A. Mace at that time and it was a little less than three years until the sale was made by her.

\$400,000 Is Asked For Taylor Act

The house appropriations committee at Washington Monday recommended an increase of \$400. 000 for administering the Taylor grazing act in 1937 in ten public domain states. The proposed increase would bring the total appropriations up to \$650,000. In the \$400,000 proposed increase \$250,-000 was recommended for the construction and maintenance of range improvements, but the grazing committee contemplates the return women interested are invited to of this amount from the collection grazing fees, one-fourth of which is designed for government use in improving the range, onefourth for administration and onehalf for use of the states in such manner as the state may prescribe. R. F. Carpenter, director of Wednesday, February 5th, with grazing, told the committee he Mrs. Robert Cumpsten as hostess. anticipated the collection of \$1,-000,000 in 1937.

How To Be Used total of \$53,000 would be used the Washington office for the salaries of the director which would be raised from \$6,500 to \$8,000. An assistant director, a new position, at \$5,600, and sixteen technical clerical employes.

A total of \$148,620 would be used for the field administrative force of fifty-nine employes, an increase of nineteen, who would be appointed to assume the added duties created by the growing activities of the agency because of the creation of new grazing dis-An item of \$100,000 was recom-

mended for expenses of 250 temporary employes who are district advisers elected by the stockmen. Their expenses, \$5 a day while on duty, would average from \$50 to \$60 a year, the committee esmated.

The rest of the administrative xpense, approximately \$100,000, vas listed for supplies, materials and equipment

The \$250,000 for the improveent of the range would be used combat range destroying rodents, build bridges and trails to open inaccessible areas to grazing, conserve water resources, and to make other improvements.
