State Oil Allowable Is **Boosted 2,000 Barrels**

The New Mexico oil allowable was hiked 2,000 barrels for the t Southwestern Music month of April to a new total of tival Was Started At 71,000 barrels daily. The previous month's total was 69,000 barrels. The principal increase was made in the Lea county fields, where the tates are in Roswell attendated at the Roswell Junior Three at the Roswell Junior the Ros bulk of oil production now exists.

HILL BILLY PROGRAM DRAWS LARGE CROWD

The program put on by members of the Baptist Hill Billy Band on Tuesday evening was attended by a large responsive crowd. In addiby individuals, the main attraction was the comedy act, "The Womanless Wedding." Participants in this were Bill Alexander, bride; Ramon Welborne, groom; Frank McCarthy, minister; Dub Andrus and John Clark, bridesmaids; Ernest Bowen, groomsman; O. J. Ford, soloist; Louie Heick, bride's father; J. T. West, groom's father; Brennan Witt, flower girl; E. A. White, ring bearer. The costumes and the acting of each actor was perfect enough in detail, that the audience was hilarious in response.

oon, beginning at The program was under the supervision of Mrs. O. J. Ford, and assisted by Mrs. F. W. Sadler.

ONE BOND ISSUE DEFEATED AT ROSWELL

Roswell voters approved and defeated a bond issue in Tuesday's election. A \$65,000 bond issue for school improvements carried, but a \$75,000 bond issue for a new city GREAT SUCCESS hall was defeated. The democratic ticket, headed by Charles L. Allison for mayor, was elected.

pre-nuptial shower of Miss Lillis

Mae Andrus.

Mr. and Mrs. Jim Kink returned home from Hot Springs Tuesday afternoon where they had been on a short fishing trip. They reported a three-inch snow there.

Mrs. Jim Michelet is planning to expected to be finished entertain on Saturday, complimenpart of the week. A tary to Mr. Michelet, and again on borers were released Sunday. She plans to have the Michelet relatives to a noon-day dinner.

> C. E. Lannom of Lannom's store is planning to open up a furniture department about the fifteenth. He has rented the building next door to his store, and will make a definite announcement soon.

> Mmes. W. A. Losey, Jack Sweatt and Miss Dorothy Sweatt are entertaining this afternoon, complimentary to Miss Lillis Mae Andrus, whose marriage to Mr. Bob Conley of Roswell will occur next Sunday.

Mr. and Mrs. Wilfred McCormick, who have been making their home in San Antonio, Texas, during the winter months, are expected to arrive here Thursday for a few days visit before going to Ruidoso to look for a location to live through the summer months.

At the Methodist church a class for the intermediate boys has been formed and Earl Stine will be the teacher. The class will be started next Sunday, so all boys who have been coming to that church or any who aren't attending any other church are invited to come and join this class.

Mr. and Mrs. Jewel Davis and children returned Thursday evening from a trip to Oklahoma where they visited friends and relatives. They reported that in some places where they passed through, the wind and dust was much worse than it is here. And that some land where grass used to be looked as if it had been plowed.

Over The Past Month Be Held Saturday OIL SECTOR

The third monthly auction will be held in Artesia Saturday, April IS ROUTINE 11, at a new location on the vacant lots south of Peoples Mercantile Co., building. Col. Tom McKinstry, Hagerman auctioneer, will conduct Eight Locations Staked the auction.

A small commission will be charged the seller on this occasion, but the commission fee will not be any more than that charged at the usual farm auction sales. Farmers, oil men and others will have an unusual opportunity to dispose of numerous items they did not need. In fact the monthly auction here will serve a real need. if the people will use it, because it will afford an opportunity for the buyer and seller to get totion to band numbers, and numbers gether and both profit. Expense to the individual will not be as great as if a private auction were undertaken. The sponsors of the auction, the Chamber of Commerce, has arranged to make the auction as interesting and inexpensive as possible.

Arba Green, manager of the Chamber of Commerce, said Tuesday arrangements were underway have each merchant contribute some one item to be auctioned to the highest bidder. These items will permit the prospective buyer to make a greater selection and at a considerable saving.

CITY ELECTION RETURNS

In Tuesday's election of town officials, the mayor, and members of the board of trustees and city treasurer were re-elected, the office of city clerk being the only holder to be replaced. The finals as given are as follows: Mayor: J. T. West, 164; T. D.

Devenport, 150. Trustees: J. V. Brown, 187; Harry Cowan, 155; W. A. Losey, 179; Clarence King, 141; E. S. Bowen, 177; A. D. Lawing, 131; Perry Andrus, 164; C. R. Hanson,

City Clerk: C. G. Mason, 210; B. McCormick, 96. City Treasurer: Mayre Losey 162; Willis Pardee, 136.

Storm Death Toll And Tender Flowers Stands Now At 426

Fear of Epidemic Lessens As 2,000 Relief Workers Clear Wreckage.

Progress in rehabilitation and promises of federal aid cheered tornado-torn Gainesville, Georgia, and Tupelo, Mississippi, yesterday while scores of cities in half a dozen southern state kept anxious

watch on rising rivers.

President Roosevelt announced allotment of \$2,500,000 in Works Progress Administration funds for rehabilitation work in the southern storm area.

Gainesville planned to bury most of its dead yesterday while 2,000 relief workers continued clearing wreckage. Some stores reopened. The Red Cross reported it was caring for some 3,000 homeless and several hundred injured.

About 1,500 relief hands cleared debris in Tupelo where most of the 195 dead have been buried.

regions and the flood troubles which were worrying other sections two to three years for assault with had not become acute in the storm

Hundreds of thousands of lowlying acres were inundated in Tennessee, Alabama, Georgia, Kentucky, and the Carolinas with several thousand persons driven from their homes by the rain-swollen streams.

Four deaths were charged to the flood conditions, including three in Tennessee and one near Boone, North Carolina.

Railroad and highway travel was impeded by North and South Carolina floods. The main valley of the Mississippi was regarded as safe behind its gigantic new flood

The toll of storm and flood dead in the south this week by states: Mississippi, 211; Georgia, 185; Tennessee, 15; Alabama, 11; North Carolina, 2; South Carolina, 1; Arkansas, 1. Total 426.

GAINESVILLE, Georgia - Almost 400 storm dead of Gainesville and of Tupelo, Missisippi, went to Mrs. Ned Hedges of Lake Ar- hastily-dug graves yesterday, in some instances in group burials for sanitation reasons.

LEA OIL MAN SUCCUMBS

L. S. Hard of Marion, Kentucky, eighty-year-old oil millionaire, died Miss Eleanor Hughes of Roswell at Hobbs Friday after a sudden visited home folks in Hagerman illness. Mr. Hard had been in Hobbs several days looking after his oil interest. Miss Lillian Hard, J. W. Alters and Miss Patsy a niece of the deceased and the Farkas visited in Albuquerque only survivor, arrived by plane Saturday to take charge of the body. Mr. Hard is said to have Miss Flora Hughes had an acute owned considerable oil interests in

> NON-POLITICAL COMMITTEE TO INSPECT STATE SCHOOLS

SANTA FE - Governor Clyde Tingley announced Saturday he plans to appoint "non-political" committees of three or four persons to inspect New Mexico institutions.

"These committees would represent the public in determining if institutions are functioning properly and make suggestions for improvements," the governor said.

Hauptmann Pays Penalty Friday

SYNOPSIS

Kerry Young, a lad of seven, is prepared to flee the burning lumber camp of his benefactor, Jack Snow, who took the youngster to live with him at the death of Kerry's mother. Tod West has instructed Kerry to come with a file containing the camp's funds should it be endangered. Flames attack the office, and Kerry. the bank the file is found empty and Kerry is blamed with taking the wrong one. Snow, his headquarters and money gone, is ruined, and soor thereafter dies, leaving Kerry to the Poor Commissioner. Kerry suspects manhood, and an expert woodsma learns of the whereabouts of West. going quickly ahead of Young. Kerry rescues a lovely girl from a scoundrel, who proves to be West. Tod threatens to pauperize the girl, Nan Downer. She thanks Kerry and tells him of the robbery, and murder of her father and of Tod's advances. She is operating a lumber tract which her father had purchased from West Kerry makes camp. At the general store in West's Landing, he finds 'od engaged in a poker game. Jin Hinkle, timber employee, loses heavily. Kerry exposes Tod's cheating and disarms him, The crowd is unconvinced of Tod's duplicity. Kerry identifies himself to West, who design the control of the contro nies knowing him, and advises him to leave town. Nan tells Dr. Ezra Adams of Kerry's rescue of her from Tod, and of West's threat. Ezra, who is coroner, visits Kerry, and appoints him coroner's clerk. Suspicion of the murder had rested on Holt Stuart, employee of Downer, and upon Jim Hinkle, who was cleared by Tod. The doctor has the fatal bullet and the serial numbers of the stolen bills, one of which has just been paid to Adams. It came out of the poker game. Tod orders Jim to run Kerry out of town. Kerry discovers he is being spied upon by a 'breed. Jim comes to Kerry with a warning

CHAPTER VI-Continued

"If you know what's good for you," in his manner, then was a tered, and began to trot. convincing quality not present before, "you'll haul out today!" "And if I shouldn't . . . what

Hinkle shrugged. "Well, I'd fig- sharply, and Young saw a man ure I'd done all that anybody can grasp her arms, holding her from do for you by comin' here." He ad- hurling herself into the swirling vanced a few steps, his voice mod- current below. erating. "I'm not handin' you anything, Young, I'm just doin' you a friendly act. This country thinks girl!" a boy answered excitedly that won't stand to see anything done against him."

"Yeah? West, and who else?"

Young let his head drop backward and laughed.

So that was that!

He had been spied upon since daybreak, had been warned to clear out by an emissary who did not say

all that he thought and felt. Not long after Jim Hinkle's departure Kerry set out, Tip following at his heels

Nan Downer locked up from he desk and listened to Kerry's brief speech explaining his presence. "A job?" she asked, and surprise in her face.

It was not the surprise which made the deepest impression on Young. It was the quick coloring of her cheeks, the changing light in her eyes which indicated an interest in him over and above any amazement or regret or enthusiasn which his question might have pro

"Yes, a job. You know how it is, I guess: I've sort of got to stick around a while; and when I'm in one place, I don't just hanker to

She traced a pencil-line on a pac before her, considering,

"If you want to take a chance of defying Tod West, it is your af-What sort of job are you

Kerry grinned. "I can do a lot of things in and around the woods, all the way from

eruising, up through logging opera tions to milling." "Are you a draftsman as well?" She turned to a series of large maps hanging from the wall, greens

and reds and blues splashing the surfaces to indicate the various types of growth which cloaked the descriptions, with figures showing the size and densities of stands, with streams and lakes set down in detail.

"You see," she explained, "these prospects of ours are the sort who will want to know, down to the last detail, what we're offering in exchange for their money. Could you do just this sort of thing as well as these jobs have been done?"

Young stepped closer to the maps, studying them a lenginy interval. "I can," he said finally.

Nan hesitated. "Of course, we can't pay you down, deep and deeper. The depths heart.

hurt his eardrums; his lungs cried

him while he shaved this morning.

was drowning!

And then pressure was on his hand was placed; fingers were fastening in his shirt, . . He kicked savagely, rolled over.

He dashed a hand across his eyes. eluded the clutch and shot upward. gulped air through open mouth. A rod below him the swarthy man ed to let him through. It was Jim rose, spitting, and turned up Hinkle, panting, his face the color stream. He gave Young one glance, of suet. His eyes, large and desand the dark eyes shone with perate with query, turned to Young. Trying that! And now, of all

attempting to find the child; he was intent on bringing harm upon we won't quit!" one who was. A bitter loathing sang in Kerry's heart for a mo- The inside of one knee had rubbed but Kerry said quickly: "Don't ment, but he drove it away. No worry about that. I'd figure, Miss time, this, for personal animosities.

He took a deep breath and went

lege working for you. When do we down again, water hurting his ears. pressing against his throat. "I can't talk that detail with you now, because Holt is out on the of lighter color. . . . Sand? A bouljob. We've worked such things out der? A clay ledge? He expelled together since my father died. He'll be back this evening. Will you his will, all his heart and consciousness into a final downward He would, he said, and started stroke. His reaching hand touched

something soft; his fingers entwined there. It was cloth! The current bore at him; his grip on They had given up hope. the fabric held.

He dragged himself against the the step. The retriever inspected current, tugging at that garment, battling to dislodge it. . . . His head buzzed; a quick nausea spread through his vitals. He felt that man beast. But when her small this was his last instant of consciousness. His tortured lungs excrown of his head, and her gentle panded, and water gushed into his throat. He wrenched mightily with fellow he was . . . why, then the the one hand, as a new, an inner darkness, engulfed him, and then and his eyes rolled, and his pink gave up . . . yielded, let his lungs have their way, and was shocked to find himself breathing sweet air.

He was on the surface, barely able to float, but he was not alone. In the crook of his arm was a limp, light body!

Upstream he heard screams and shouts. None had noticed that he came up with a burden. He drew the child's head to the surface, got a hand beneath her chin, and kicked feebly.

He tried to shout for help, but his voice was only a gurgle. He redoubled his efforts, but his whine in his ear, and hot breath Young. on his cheek, and Tip was there at his side,

"Good-" he gasped. "Hie!" He fastened fingers in the mat of stiff curly hair; the dog angled girl, eyes following the great frame across the current towing his of the man, strength of which could

He Fastened Fingers in the Mat of Stiff Curly Hair.

Young's floundering feet the bank.

He dropped to his knees beside log. He threw the little girl face down across it. He hooked a finger in the mouth, prying open the set "Good dog!" he gasped and dived jaws, flattening the tongue, and bore his weight down on her back. It was dark down there. He Water gushed from the mouth. Again he drove water from the say these; you get to hell outta drove himself deep with mighty sweeps of his arms, with powerful scissor-kicks of his long legs. He strength poured back into his own catch up with-" held his eyes wide open, and when he felt his ability to stay down

Others were coming now; help was on the way. A man was almost to him; more streamed behind. But there was a job to do, and he knew how to do it, the task that would give strength to this last and per haps waning hope,

Roughly he lifted the small body with arms and legs so pitifully life less, and stretched it on the log head lower than the feet. He time, and faced about and dived jerked one of the child's arms belower ribs and pressed firmly. . .

He held the lungs compressed an instant and let the ribs spring outas he drifted past. He rose quick- ward. Down again went his weight and water trickled from the mouth A distracted woman burst through the growing group. She tried to swimmer so close to him again and the men took her gently away. "She'll want . . . all the air . . . hat you might get some other was the face which had peered at with tensity stamped on faces.

"What do you think, Young?" someone asked.

. . Common cause, surely, a child He twisted his head dcubtfully, He went down again, down and and a sharp pang of dismay ran his Uniform The girl's one arm, hanging in-

out for relief from this repeated ert over the log, swayed dismally as he worked, . . . Fifteen minutes; the watchers

back; on the small of his back a were moving and muttering. The child's eyes were half open. . . Brown eyes, he saw. Twenty minutes.

Figures were running along the high bank. A man hurtled down toward them, and the crowd part-This must be his child!

"Can't tell, Jim," Kerry replied times? The fellow was not even to the unspoken question. "We queror should have an outside chance. And

His shoulders and back ached.

This condition is quite evident to observers continuously on the job here for even in the personal manner of the President himself there is an outward appearance that he believes the situation is well in hand.

As far as I can discover, one reamuch better is that events leading used. up to the national Democratic convention seem to be cleared of any harassing possibilities.

I am sure that it will be recalled w something like the blues overcame many New Deal stalwarts after former Gov. Alfred E. Smith of New York, 1928 Democratic Presidential candidate, let loose a blast at the New Deal in his Liberty League dinner speech. I happened to be in a position to know that the Smith speech caused all kinds of commotion and fear among New Deal leaders. They know, as everyone else knows, that "Al" Smith has a big following. When he threatened "to take a walk," he loose a declaration that was charged with dynamite and the New Dealers could not calculate how nuch dynamite.

Now, however, it appears quite certain that much of the danger inherent in the Smith declaration has been eliminated. Notwithstanding the Smith indictment of the President for repudiation of platform promises and his description of the Roosevelt policies as "a national menace," there is going to be a pitifully small number of anti-New Deal Democrats in the Philadelphia convention. The number the wall of a child in a storm.

It was to be expected, as I have of politician, be he Republican or three pints of syrup. Democratic, cannot afford to bolt. So, while the Philadelphia conven. on a large commercial scale, tion of the Democrats may have some seething underneath the surface, it is without the realm of posimportant revolt against renominaion of Mr. Roosevelt.

Inasmuch as the New Dealers can properly regard their situation G. O. P. pretty well in hand, they nat-

in a Hole urally can feel a blt cocky over the difficulties in the Republican ranks. First, the Republicans are at a disadvantage in that their convention in Cleveland is to be held at an earlier date than the Democrats meet. This, however, is more real than apparent. It is thus because of the intra-party battles that appear certain to come to the surface at Cleveland. The Republicans are not together, not unified, on anything. A half dozen candidates with appreciable followings are snapping at each other and two or three factions are announcing almost simultaneously what the platform is going to say. It just cannot help leading into a beautiful mess at Cleveland unless the Republican leaders show more intelligence than they have shown thus far.

In the meantime, the Democrats are making note of the various battle charges. You can be sure they will use them. Whoever the Republicans nominate at Cleveland necessarily faces a big fight but as the situation now stands, I think the Democrats will be able to make it an offensive campaign whereas ordinarily the party in power must give over much of its campaigning to a defense. This is true unless the Republicans can get together and take the offensive themselves by criticizing and attacking on a

united front. Of course, much water can run under the bridge before the November election. It is always possible that the party in power can make mistakes, can be led into a blind alley under the political guns of its

opposition.

Soon maple sugar ington quite a general feeling that became the sugar of the early setthe Roosevelt re-election chances tlers even as far south as Virginia

"At first the white men followed the Indians' methods of producing maple syrup and sugar. But it was not long before they learned that the Indians' deep gash in the trees often njured them. Tapping methods were improved, but the evaporating process has changed little except that on why the New Dealers feel so more modern equipment is often

Tap With Auger.

"Today the tappers first brush the bark with a stiff broom to remove dirt and loose particles, and then tapthe tree in a healthy spot some distance from the scar of a previous tapping. The Indians lost much of the sap because of the large 'bleeding' gash. Modern tappers carry an auger which makes a hole only three eighth's to a half inch in diameter in to which is inserted a spout leading to a bucket

"More than 12,000,000 maple trees are tapped annually. Nearly onehalf of the trees are in Vermont backyards and forests; nearly one third in New York state. Ohio, rank ing third, taps 1,300,000 trees; while Pennsylvania taps nearly a million Michigan, New Hampshire, Wisconsin, Maine and Massachusetts are lesser contributors to the United States' maple sap barrel.

"On an average, maple trees supply the sugar and syrup industry with more than 3,600,000 gallons of syrup and nearly 2,500,000 pounds of sugar

Dated this 2nd day of April,

W. A. LOSEY, We wonder:-

A Series of Brief Discussions on Driving, Dedicated to the Safety, Comfort and Pleasure of the Motoring Public. Prepared by General Motors

No. 6-POWER AND SPEED

Most of our motor cars will go so much faster than we ever care to drive them, that no doubt people often wonder why so much speed is built into them in the first place. Of course, automobiles aren't built with the idea of pleasing the manufacturer or the engineer or the

salesman. They're built to suit the men and women who are going to own and drive them. And there are certain things that people do insist on in their cars. It happens that some of those things are of such a nature that when the engineers provide them, an ability to go fast just naturally results.

For instance, nearly everybody likes to get going as promptly as possible. Now that's just a matter of the power we have in our engine and how our car is

Then there's the business of hill-climbing. That may not mean as much in some localities as in others, but cars have to be built to suit us whether we live in Maine or Florida, Iowa or California-wherever we may live and wherever we may want to go.

Engineers tell us that they could build a fairly low-powered car that would pull us up the steepest hill. But if they did,

> over the top and onto a level stretch, we could only go crawling along at a rate that wouldn't satisfy even the most conservative drivers.
>
> But perhaps the most important reason for having our power what it is in modern cars, is a matter that many of us have never considered. We all know what happens to us, when we, ourselves, are going at high pressure all the time, either physically or mentally. A person can work 12, 14 or 16 hours a day,

they would have to gear it so low that when we got

our last reserves of energy all the time. In the same way, anybody who has ever run machinery knows that if you keep it going at full capacity and full speed day-in-and-day-out, you're just multiplying the

but we know we get along best when we don't tax

chances of a breakdown, sooner or later. And that's how it is with a car. By building in the ability to run at high speed, engineers make it practical to run at reasonable speed. If our car can go seventy, eighty or maybe even more miles an hour, then it won't have to strain to go thirty-five, forty, or somewhat faster if circumstances demand. So we can drive it along at sensible speeds hour after hour, day after day, without over-working it.

When we stop to think about it, lots of things are built with that added safety margin. Elevators in our office buildings could carry far heavier loads than the weight of all the people they can

of our buildings, the rails under our trains-in fact, any number of things we depend on day-by-dayare much stronger than they really have to be. They all have that extra margin of protection.

that speed is simply a by-product of power. We can use that power unwisely, or we can use it sensibly and get better performance and dependability as the result. Manufacturers can't decide that. It's all up to us.

The second year home economics class has just completed a unit in child training and development. The girls observed the children in the first three grades and wrote a State Engineer of New Mexico for a permit to appropriate the underity traits observed in children tesian Basin to the extent of 320 which is self-reliance, cooperation, fection, unselfishness, and vocab-8 inch in diameter shallow wells ulary. These reports were read and discussed. They also studied the with a cold was told that he had cluded height and weight, posture, color and quality of skin, happiness, alertness and activities. The problem of how to keep children healthy and happy was also discussed. Later the girls observed the fourth and fifth grades and made similar reports. The girls enjoyed this unit very much and it gave them a better understanding attitude toward children.

The Junior class, sponsored by Ramon Welborne, has completed plans for the annual Junior-Senior banquet. The banquet will be held in the basement of the Presbyterian church, on the evening of April 24, with the Presbyterian Ladies Aid in charge. About fifty are expected to be present.

The Senior class presented their annual class play, "Deacon Dubbs,' Thursday evening, April 2, to a packed house. The characters were unusually well portrayed, especially Yennie Yenson, Trixie Coleman, and Deutronomy Jones. Those who participated in the play were: Sara eth West, Wanna Bee Langenegger, Phyllis Andrews, Charline King, Dunny Deter, Grace Wade, Alma Sue Boyce, Bill Bogle, Oscar Allison, Charles Wier, Earl Hammons, George Toby, Stenson Andrus, and Dub Hardin. Miss Jessie George, Senior class sponsor, directed the play.

Have you heard that Dunny and Phyllis brought the question up in Senior class meeting whether or not they would be allowed to invite certain boy friends to the Senior picnic? How do you suppose Bill Bogle, Oscar Allison, Earl Hammons voted?

.... It has been the custom for a number of years for the Senior class to leave something for the school in memory of their class. ning to leave a fund to be used in school grounds.

Did you hear Bill Bogle calling that dance in the Senior play the other evening? That was worth the money.

Hints To Gardeners

by Harold Coulter Vegetable Expert Ferry Seed Institute

Starting Seeds Indoors

GARDENERS usually obtain more satisfactory results in growing certain vegetables such as tomato, cabbage, broccoli, egg plant and pepper if the plants are started early indoors from seed. One advantage is that seed of known variety from a dependable source

can be used. Should you prefer plants, however, make certain they are from a reliable source.

Tomatoes are one of the most satisfactory home garden items, and one of the most popular of this group. Seed can be obtained from a nearby dealer and should be sown about eight weeks before setting plants in the open.

Sow the seeds not more than onequarter inch deep in good loamy soil in a flat box which has quarter-inch holes in the bottom to permit drainage. Water thoroughly but not too frequently, preferably on bright days.

Good sunlight and good air circulation prevent "damping off" which is caused by an accumulation of moisture at the surface of the soil. Keep the temperature fairly even

and warm—about 70 to 75 degrees. When the young plants are about ore and one-half inches tall, they should be transplanted to a larger box or into a cold frame, according to the facilities available. If kept in a box, they should be "hardened off", placed in the open in the shade

off", placed in the open in the snade six or eight mild days. Young plants spaced about three inches apart each way will have plenty of room to develop. In the garden, plants should be spaced bout four feet apart each way for best results.

Tomatoes do best on loamy soil.

Sandy soils produce early crops but the picking season is short and the yield not so heavy. Heavier soils produce later but more abundantly. Cabbage, broccoli, pepper and egg plant may be handled in a similar tashion.

Health Column

Conducted by Dr. J. R. Earp, Director, New Mexico Bureau of

Public Health.

The Hedgehog Compromise We owe to Schopenhaur a neat ittle allegory of human behavior. There were a number of hedgehogs which, as the weather grew colder moved nearer together to keep each other warm. But presently they pricked each other with their spines and so moved farther apart, until they got cold. At last they found the place where they could benefit most from their neighbors' warmth without suffering from the prickles.

We begin this experiment at a very early age. We take our brothers' and sisters' toys. They punch our heads. We scream aloud, so attracting our mothers to our defense. Our brothers learn to prick us more cautiously and at last we learn to ask for their toys before day, and who is pr we borrow them.

So in the heart of the family we first yearn the hedgehog compromise. And we must learn it again in the community. Only the experts can become politicians. The very greatest experts are, or should be, in the diplomatic corps.

There are many, alas, who never succeed in learning the hedgehog prolonged honey compromise. Among them are those who fall victims to dementia precox, one of the commonest forms of insanity. They escape the prickles by retiring into themselves and living entirely in the world of their own imagination. They freeze one. (How long doe mentally for lack of the warmth of to grow?) human contact. At the latter end even their own limbs become strangers to their minds and will of orchid is a ray stay for hours in any position into certain aubu which an outsider may place them. Hysteria is another method of escaping from the difficult problem pened to the Mon of keeping warm but unhurt. Four jasts? out of every ten persons who attend public medical clinics and dispensaries are there on account of nental maladjustment.

We still learn by trial and error n the old hedgehog way. Some day we shall use reason to supplement our instincts. Minds will then be healthier and wars will be no

Maybe one reason the gals have started wearing imitation vegetable bunches is to match the little spinach patches found on the chins of some of their gentlemen friends.

Find

From Your Doctor if the "Pain" Remedy You Take Is Safe.

Don't Entrust Your Own or Your Family's Well - Being to Unknown Preparations

BEFORE you take any prepara-tion you don't know all about, for the relief of headaches; or the pains of rheumatism, neuritis or neuralgia, ask your doctor what he thinks about it — in comparison with Genuise Sayer Aspirin.

We say this because, before the discovery of Bayer Aspirin, most so-called "pain" remedies were advised against by physicians as being bad for the stomach; or, often, for the heart. And the discovery of Bayer Aspirin largely changed Bayer Aspirin largely changed medical practice.

Countless thousands of people who have taken Bayer Aspirin year in and out without ill effect, have proved that the medical findings about its safety were correct. Remember this: Genuine Bayer

Aspirin is rated among the fastest methods yet discovered for the relief of headaches and all common pains . . and safe for the average person to take regularly. You can get real Bayer Aspirin at any drug store — simply by never asking for it by the name "aspirin" alone, but always saying BAYER ASPIRIN when you buy.

Red Bluff Power **House Bids Ready**

Bids for the construction and equipping of a power house at the was purchased by the Hotel Cortex last week in the Red Bluff offices for \$75.00 or 21.6 cents per pound. at Pecos, Texas, says the Pecos The average price for the entire Enterprise. The engineering staff sale was 14.1 cents per pound for was studying the bids, preparatory lambs and 12.5 cents per pound for directors that they award the conthat that bid could be ascertained.

J. H. Miller stated that the bids tendered indicated that a saving of around \$22,000 would be realized on with old man Booth." Old drop his gun, which he did, as he passing the Westminster Cathedral the project for which \$155,000 has been allotted. It is believed that the successful bid will be in the neighborhood of \$133,000.

Erection and equipping of the power house will mark the last stage in the construction of the dam. It is through the sale of current from the plant that a large farmed, this sale of power to farm-

spillways before it would go over the top of the dam.

Work of installing the valves in the conduits began this week, but was postponed for a few days. Their installation will make controlled storage possible as the conduits can be closed and the flow through them regulated at will.

Healthy Pullets For New Flock

under the project is all being of the pullets during this summer, an all-day affair with dinner on plied. says W. M. Ginn of the New Mexico State College. Pullets that are stunted in the summer can not be developed into profitable layers affiliations of patients when they

> The most important practices necessary for developing healthy extremely hard of hearing, entered pullets are to grow them on clean birds. Movable brooder houses are important items in many poultry men's programs for growing better pullets. With a movable house, the chicks can be grown on clean soil on which there have been no hens and chicks for several years. Moving the brooder house each year to a new area, away from the old contaminated soil, makes it easier to get pullets through the summer without serious infestation.

Another practical method is to use range shelter for summer pullets. The chicks are started in an ordinary, clean brooder house and then, in the summer when heat is not needed, the pullets are moved out on a range and the range shelter is used, which consists primarily of wire floors and sides and a good roof. This is one good method of keeping the pullets away from the old hens where they

MODEST peas appear so con-stantly on our tables that one would think that they would get over their modesty, but they never seem to. Perhaps that's the reason why they appear new and green every year. But, around the holi-days, they can be made to appear as "partified" as any other vege-table, providing one will take a little trouble to dress them up. Here are ways of doing it that will make them seem at home in even the most elaborate dinner.

Peas and Radishes Baked in Cream: Cook one cup sliced un-peeled radishes for four or five minutes in the boiling liquor from a No. 2 can peas; then drain. Add the peas to the radishes. Dice four slices bacon, fry crisp, drain off fat, and add bacon to vegetables. Season with salt and pepper and turn into a buttered cas serole. Pour over three-fourths cup thin cream or rich milk, and bake thirty minutes in a 375-de-gree oven. You will get the best results by using the thin cream. Serves five or six.

Peas with Cheese

Peas au Gratin: Heat the con tents of a No. 2 can peas in their own liquor until it is almost all absorbed, then spread them out in

a buttered glass pie plate or shallow baking dish. Sprinkle with salt and pepper, and pour over six tablespoons cream. Cover with one-half cup grated cheese, and dust with paprika. Place under broiler flame or in a very hot oven until cheese melts and browns and the cream bubbles. Serve from dish in which baked. Serves six.

MONTHLY AUCTION

Artesia, Saturday April 11

Offers a splendid opportunity for buyer and seller to get together. You may have one or a dozen articles around the home or farm you do not need that your neighbor wants.

BRING THEM IN AND REALIZE YOUR PROFIT

All items at place of auction, south of Main street and just south of the City office and Peoples Mercantile Co., will be offered to the highest bidder.

ED, WORN

"A Grave in Russia" By FLOYD GIBBONS Famous Headline Hunter.

THIS is the story of why Donia Santanovsky of Bronx, N. Y., came to America. It is also the story of why Donia is afraid of snow. That's a funny sort of fear, especially as Donia came here from Russia where they have plenty of that cold, white stuff of the resort town were live porcuthat powders the earth in winter.

But then, if you'd gone through what Donia did, over there and a mother bank at the scribes in the little village of Shulac, near the city of Kiev-well-maybe back and spread wings were used you'd be afraid of snow, too. I know that if it had happened to me, I'd by three baby hawks as a landing move down on the Equator where I'd never even have to think of the stage, high above ground.

In the winter of 1919 Donia lived in that little village of Shulac that I just mentioned. She lived there alone with her mother, for her father had been killed in the World war.

The Times Were Hard, Even for Russia.

Those were bad times in Russia. The Czarist government had fallen, and there was little real law in the land. No much order, either. Roving bands pillage the country. Bandits were everywhere,

And worst of all were the Cossacks, those half savage soldiers of the former czar. Wherever they went they robbed and terrorized. Especially they terrorized the Jews wherever they found them.

That, of course, was nothing new. Even under the czars there had been anti-Jewish riots, most of them instigated and carried on by these same Cossacks. Now, though, they were even less restrained than they had been in the old days of the monarchy. Jews were robbed, beaten, tortured and killed. They have a name for those slaughters over there. They call them

"The Cossacks Are Coming" Was Bad News.

Donia and her mother lived in constant fear of these pogroms. They were the only Jewish family in the neighborhood-the only one within a radius of five miles about their little village. And one night, as Donia lay in bed with a high fever there came an ominous knocking at the door. When Donia's mother opened it she saw a peasant, shaking with fear, who cried out the dreaded warning, "The Cossacks are coming."

Donia's mother became pale with terror. Donia started to cry. She valley. It meant an outlet for their ture, we suggest the alliance of was only six years old then-not much more than a baby. But the crops and prosperity. But that last springtime, youth and gay silk a most talked of color. Gray shoes, other favorities. Cossacks didn't spare even children when they were out on their savage ed only a little while. Then dis print. In the new season's style gray hats, gray weaves, gray sum-

Fever or no fever, Donia was taken out of bed. Her mother wrapped her in some blankets and, dragging her by the hand, started for the house of a Christian neighbor where they could hide until the Cossacks had gone.

It was a bitter cold night. It had been snowing steadily for days. It was hard going through the drifts, and the neighbor's house was a mile away. But Donia's mother hurried on, going as fast as the drifts would paired. In several cases freight plan the wardrobe of Miss Sweet trains were wrecked or detailed. let her, and dragging little Donia along by the hand.

They Seek Refuge in the Frozen Tundras.

They had almost reached their destination when they heard the beat of horses' hoofs far up the road. The Cossacks were on them! There wasn't time to reach the house where they were to find shelter. Hardly

Mother and Child Fled Through the Snow,

time for anything at all. Donia's mother looked around for a place to hide. The bare, treeless landscape stretched away, bleak and shelterless. Into a symphony of sound, like the rustle of wind through pine trees, that quickly lulled them to sleep.

Printed silk crepe is a favorite for practical daytime wear. The rustle of wind through pine trees, that quickly lulled them to sleep. fever-stricken Donia.

There wasn't any choice. Better an easy death than the tortures of the Cossacks. Better a death from pneumonia than the fiendish cruelty of the horsemen who were riding toward them. Donia's mother got down on her knees and began scooping a hole in the snowdrift at the side of the road. She tore cloth from her skirt and put it over their faces so they could breathe. Then she put Donia in the hole she had scooped out, lay down beside her and began covering them both with snow.

They Hide Under the Cossacks' Very Eyes.

They had no sooner finished than the Cossacks rode up. They came right up to the spot where Donia and her mother lay buried in the snow Mother and daughter held their breaths. Had they Massachusetts looked rather scorn--and stopped! been discovered? Had the sharp eyes of the Cossacks read the marks and fully at the crops in the fields along

But no. The Cossacks, it seems, hadn't noticed their hiding place. They had just stopped to talk. For endless minutes they chattered while here," he said to the farmer lean-Donia and her mother wondered how long they'd have to lie there mo ing on the fence. "Can't you raise tionless under that cold blanket of snow.

Time dragged on. Donia's mother felt that she was freezing. Donia long since had stiffened and lost consciousness at her mother's side. Then, at last, the Cossacks climbed back on their horses. Hoofbeats rattled off down the road.

The Cossacks had gone-but it seemed to Donia's mother that they I couldn't ever get a good crop had gone too late. Her little girl, all stiff and blue, lay motionless in somehow. The trouble was that the snow bank. She picked her up and carried her to the neighbor's the soil was just too rich for 'em. house, convinced that she was dead.

But Donia wasn't dead. She lived to tell us her story. And soon would start growing, the blossoms after that escape she and her mother came to America. They didn't want would come out, and then they'd any more experiences like that-no more adventures with Cossacks, and set and the melons would begin to with the cold snows of Russia.

175 Medieval "Monsters" Left in French Flanders

A recent census in France reteals that there are 175 medieval monsters existing in French Flanders today, writes a Lille (France) United Press correspondent.

They are the world's biggest toys, averaging 22 feet in height and are one to five centuries old. The Flemish populations of France bave been amusing themselves with these monstrous playthings since the Fifteenth century. The municipal councils provided communal shelter for these wood, cardboard and cloth giants which emerge once a year to preside at the town fes-

tivals and carnivals. Gargantua, the historic brain child of Rabelais, resides at Bailil citizen named Berguemard, a historic Doual

FRANK E. HAGAN and ELMO SCOTT WATSON

The Double Tragedy

A FEW years ago a group of for-ty Chicago and Milwaukee newspaper men were guests of the Milwaukee railroad and Rocky Wolfe, now a widely known radio sport commentator, on a week-end outing in Manitowish, Wis.

Among the extraordinary sights pines strolling about a nine-hole

A dormant appreciation of Nature having been awakened in the minds of the visiting city folks, they were treated by Wolfe to the prize story of the vicinity.

A Manitowish hunter, according to Rocky, reported that he had shot a fox which had a dead porcupine in its mouth. The fox was already dead when shot, for the spines of the porcupine had killed it.

It was learned later, Rocky averred, that the porcupine had been a pet which earned a living by carrying fruit on its back from its owner's orchard to the cider mill.

"And I am ashamed to report. gentlemen," Wolfe concluded, "that both animals were intoxicated when the double tragedy occurred."

The Colorado Cinder Beetle

Eve's Epigrams

Let Not Affection Fade

By DOUGLAS MALLOCH

A SADDER sight the sad heart knows

Than petals falling from a rose, Than dying grasses where a plain No longer feels the kiss of rain, Than shattered beauty when a tree Lies prostrate, never more to be: Such things are even sadder when They happen in the hearts of men.

For a rose whose day is done, Its petals falling one by one, And like a plain whose withered grass

Shall never green again, alas, And like a tree whose branches lie Along the ground, to droop and die, So is the careless fading of That thing of beauty known as love.

Let not that sadness come to you If there is anything to do: A more forgiving tenderness To make you love the more, not

Any eye for virtue, not for sin, Since mortals all bave both with-

Let every rose fall in the glade, But not your own affection fade. Douglas Malloch. - WNU Service

with long sleeves, size 16 (34).

St., Chicago, Ill.

Blouses have to go a long way oward giving the tailored and mannish suits a sweet and feminine appearance. The model at the top is a new lingerie blouse made of madonna blue crepe de chine and trimmed with tiny crystal buttons. Soft puff sleeves tightly banded and a fluffy bow at the throat contribute the feminine touches.

At the bottom is a most attractive shirt blouse-it has a charming Peter Pan collar and buttoned panel for the waist closing-the model is made of batiste with either shor sports or long bishop sleeves.

Barbara Bell Pattern No. 1850-Both blouses—is available in sizes 14, 16, 18, 20; 40 and 42. Coresponding bust measurements 32
