

McCULLOCH COUNTY FEATURED IN OIL EDITION N. Y. TRIBUNE

FRANZ JOHNSON INJURIES FRIDAY MAY BE FATAL

Franz Johnson, one of the old and most highly esteemed of our citizens, was perhaps fatally injured last Friday morning, and is, at present, hovering between life and death at his home six miles east of Brady.

Mr. Johnson, who is well over 70 years of age, was out in his field planting maize seed. A young horse dashed by his team frightening them and causing them to run away. Mr. Johnson being thrown off the planter and sustaining a broken arm at the right shoulder, a deep gash across the forehead and a fractured skull. On account of the seriousness of his injuries coupled with his advanced age, the attending physician holds out little or no hope for his recovery. Mr. Johnson is conscious at intervals, but at latest reports was not doing well.

Death of Austin Strickland.

The death of Austin Strickland occurred at 7:30 o'clock Monday evening at the home of his parents, Mr. and Mrs. W. M. Strickland, aged 29 years and 11 months. Funeral services will be held this (Tuesday) afternoon at 5:00 o'clock at the Methodist church, the Rev. J. W. Cowan conducting, and interment will be made in Brady cemetery.

Austin (Snow) Strickland, was born and raised in Brady, and is known by practically all our citizens, to whom news of his death brought a pall of sadness. For a number of years he was employed with the firm of Satterwhite & Martin. About seven years ago he went to Dallas, where he was employed with the Katy railway, and for the past three years with the T. & P. railway offices at that place. He had been in bad health for some three or four years, and about a year ago, came home and spent some time here recuperating, following which he was enabled to return to his duties. He again came to Brady about three months ago, and for the past 30 days had been confined to his bed most of the time. Death brought a welcome relief to his sufferings.

Besides his parents there survive three brothers: Ben, Oscar, and Mort (Doc) Strickland, all of this city; and two sisters: Mrs. Gene Townsend of Brady and Mrs. G. C. Simmons of Dallas. Mrs. Simmons has been here the past week or two attending the bedside of her brother.

Attending the funeral from out of town are Mrs. Grace Hall and Mrs. J. D. Benham, cousin and aunt of deceased, who came from San Saba this afternoon.

KERR "SELF SEALING" MASON JARS.

Awarded Grand Prize in 1915—the highest award at the San Francisco World's Fair. Seals airtight, with out using a rubber ring. The Kerr "Self Sealing" Mason Jar keeps your fruit—no mould, no spoiling. Two styles—regular and wide mouth. Try a dozen today. Be sure the fruit you put up is saved! O. D. MANN & SONS.

NOTICE TO FARMERS!

Please take note that I will have four trucks to move grain. Also two used trucks, which I will sell cheap to anyone who has enough grain to justify the investment. F. R. WULFF.

HARVEST TIME.

In Harvest time—good harness means good work and a successful harvest. If your harness needs repairs, let us do it—we'll make them almost good as new, and put them in shape to give you good service and satisfaction.

GULF RUSSELL WELL IS GUSHING OIL HIGH OVER DERRICK AT INTERVALS

"Reports coming to Ballinger from the Russell well shortly after noon Friday stated that the well was resorting to its old tricks and about noon sent oil gushing high over the derrick again.

"This well was shot last Monday morning and bridged over. The process of cleaning out seventeen hundred feet of bridge has been underway all the week, and from time to time the report has come that both the gas pressure and oil supply showed considerable increase.

"It is presumed that nearer the drill goes to the bottom of the hole the stronger the flow of gas and oil, and it is now predicted that a much better showing will be made when the six inch casing is set and the hole cleaned out.

"The gushing today was by heads and similar to the flow which this well has been making from time to time ever since oil was found at a depth of 2390 feet.

"The spasmodic gushing of this well keeps the speculators guessing, but it is a safe bet that paying oil is somewhere near with plenty gas to bring it out of the ground. The Gulf Production Co., the company which is drilling this well, is spending enough money on the well to drill several wells, indicating that they have faith in the proposition. The well was spudded in last July.

"The Gulf Production Co., holds leases on ten thousand acres in the Russell field and made propositions to purchase the remaining ten thousand acres of this ranch.

"The source of supply for both gas and oil is fixed at 2390 feet in this well. This was the depth at which the well began gushing, and where intermittent gushing stopped only when the casing was put down the supply being shut off and the hole drilled to a depth of 3500 feet. The eleven hundred feet below the oil sand was a waste of drilling, and expense for nothing.

"When the casing was pulled to the 2390 foot mark, the well immediately began cutting up again. It was here where the pegs were fixed for shooting the well, and after two or three months preparation, delays, etc., the well was finally shot last Monday. The charge of explosive left about eighteen hundred feet of clogged up hole. The drillers set about immediately cleaning out the hole, with gas and oil 'spewing' out constantly.

"At a depth of about 1800 feet of cleaning out the gas pressure again began to exert itself and sent gushes of 'corruption' over the derrick.

"Just what is under the remaining two or three hundred feet of cave-in is a matter of speculation with odds in favor of a good well."—Ballinger Banner-Ledger.

ADVERTISING AND WRITE-UP GET ATTENTION OF OIL OPERATORS

MUCH FAVORABLE COMMENT UPON ENTERPRISE OF BRADY CHAMBER OF COMMERCE IN EXPLOITING LOCAL FIELD THROUGH N. Y. DAILIES

Brady and McCulloch county are receiving much favorable publicity in the north and east, and, in fact, throughout the U. S., as a result of the advertising placed by the Brady Chamber of Commerce in the Texas Oil Edition issued by the New York Tribune, and also by the New York Herald on June 8th. These papers also gave local operations a wonderful amount of publicity through a news story concerning McCulloch county and the activities here. The combined efforts of the New York Tribune and the New York Herald gave this Texas oil edition a circulation of 750,000 copies. This circulation reached to every state in the Union, as well as to all parts of the world.

Comment upon the Brady Chamber of Commerce efforts as regards this special edition has been most favorable. J. Steve Anderson, representing Anderson & Pritchard, oil producers of Oklahoma City, and who own leases on 63,000 acres in McCulloch, Mason and Menard counties, was among those who foresaw wonderful returns from this publicity. "There was a great demand for the Tribune's special oil edition," he stated, "and all available copies were bought up on sight. You folks are certainly live ones, and I, for one, expect to get some results for McCulloch county when I visit New York City within the next few weeks."

The following is a reprint of the article appearing in the New York papers:

"Among the new oil fields brought into prominence by the widespread oil activities in the State of Texas, there is none, perhaps, that has gained more notice or attracted more attention than has the McCulloch county oil field of Texas. This promising field has come in for much favorable comment due to the fact that developments, instead of being few and widely scattered as in most so-called 'wild-cat' fields, are going on in almost every community in the county, the operators showing such remarkably activity as to make apparent wonderful faith in the possibilities of McCulloch county being the home of the next big oil strike in Texas.

"Brady, the county seat of McCulloch county, is known as the geographical center of the State of Texas. It is located 195 miles southwest of Fort Worth, Texas, and is less than 150 miles south and a little west of Ranger. It is located both on the Frisco and the Santa Fe railways, and some ten years ago bore the distinction of being the greatest shipping point in the world for cotton. Today it still retains the title of the greatest shipping point in the world for cotton, wool and pecans combined.

"The present oil activity in McCulloch county dates back into 1918, when a few rigs began drilling for oil. Previous to this the Union Oil Co. of California had Prof. W. L. Watts, geologist for that company, spend seven months in McCulloch county, making a geological survey of the county. His report was so favorable that this company acquired numerous

(Continued on Page 3)

PROGRESS OF OIL DEVELOPMENTS IN MENARD COUNTY THE PAST WEEK

(A. G. Holmes in Menard Messenger) Russell, Holmes & Callan on the Martin ranch are waiting for casing. Rains have delayed hauling of casing, tools and supplies.

Leonard Petroleum Co., on Waring ranch, drilling at 2450 feet.

McClelland & Schaefer drilling contractors of Arton, Okla., have a contract to drill several wells for Devenish, Thomas & Ludlow.

Mr. Schaefer is on the ground and has a string of tools on the Frisco tracks which will be moved out as soon as roads are so hauling can begin. Two more car loads of rig irons and derrick arrived Monday night for Devenish, Thomas & Ludlow. Tracer is following the steel derrick for Beneditum & Trees which has been delayed in transit but is expected to arrive daily.

Devenish, Thomas & Ludlow have moved into their new offices in the Bevans Block and are now getting settled.

Broad-Anderson.

As a complete surprise to relatives and friends, the marriage of Mr. Edwin Broad and Miss Allie Mae Anderson was announced by this popular young couple upon their return from Menard Sunday night. The wedding ceremony took place at the residence of Mr. and Mrs. Chas. Broad in Menard, at 8:00 o'clock Sunday night, the Rev. J. A. Boatman of Menard performing the ceremony. Attending the bridal couple from Brady were Mr. Gibbon Roberts and Miss Nan Vaughn. The party returned Sunday night, and will be at home in this city to their friends.

Both Mr. Broad and his wife are Brady products, having lived here practically all their lives. The groom is the son of Mr. and Mrs. Edd Broad, is a member of the firm of Broad Mercantile Co. and is one of our rising young business men, as well as being one of the most popular and highly esteemed young men of the city. His bride is the daughter of Mr. C. A. Anderson, and is a most lovable young woman, and a popular member of local church and social circles.

The Standard, in common with all their many friends, extends congratulations and the very best of good wishes to Mr. and Mrs. Broad.

Funeral of Chas. Steelhammer.

The funeral of Chas. Steelhammer, who died in Dallas at 3:40 o'clock last Thursday morning, was held last Friday afternoon at 4:30 o'clock from the residence of his parents, Mr. and Mrs. A. Steelhammer. Services were conducted by the Rev. J. H. Taylor, and interment was made in Brady cemetery.

During the several months that he had been ill, deceased had submitted to five operations, one for removal of the appendix and four for abscess of the liver. It was thought that he was on the road to recovery, and it had been arranged to bring him home Friday to spend several months here recuperating. An abscess on the lungs developed, however, and he was suddenly taken down again Wednesday. His death occurred at the age of 27 years, 9 months and 22 days.

Surviving, besides his parents, are his widow and three children; also four brothers: Bill, Albert, Jr., of Dallas, Theodore and Clarence, and five sisters: Mrs. Agnes Blackshear and Mrs. Joe Conley of Dallas, Mrs. A. Anderson of San Saba, and Adina and Amelia Steelhammer living at home.

Attending the funeral were his widow and children, Mr. and Mrs. Joe Conley, Mrs. Blackshear and Albert Steelhammer, Jr., all of Dallas; Mr. and Mrs. Adolf Anderson of San Saba; F. W. Henry and H. H. Otte of Camp San Saba; Albert Probst and Albert Behrens and families of Katemcy; Chas. Steelhammer and family of Cow Gap.

The widow and children expect to remain in Brady and make their home here.

Fishing tackle, Gold medal folding cots, folding camp stools. O. D. Mann & Sons.

Barley Chops for horse or hog feed. Also all sorts of other feed including oats, hay and grain. MACY & CO.

Moline (Buckeye) Mowers and Rakes. New ones just arrived. Look them over before you buy. You will like them. O. D. MANN & SONS.

TO THE MEMBERS OF THE SWEDISH INSURANCE CO., "GOTA."

You are hereby notified to meet on Saturday, June 21st, 1919, at 3 o'clock in Brady, to elect delegates to a convention in Round Rock, Texas, and to attend to such other matters as may properly come before the meeting.

C. A. ANDERSON, Vice-Pres.

WET WEATHER MAKES OIL OPERATIONS SLOW

With rain coming regularly every week, and with the heavy rain of the past couple days, oil operations are certain to be slowed up. The roads are in a lobbly and transportation of the heavy oil material and supplies is out of the question.

The rig for the Brandenberger test in Mason county has all been assembled, and the drillers, Messrs. J. R. Roberts, Miles Drummond and C. A. Crope, have arrived from DeLeon and are ready to begin drilling. Operations, however, will be held up pending the hauling out of the casing and cable. This material is on the track here, but will, of necessity have to wait on better roads and weather.

At the Douglas well the crew began setting the 8-inch casing at 1900 ft. Sunday, and are ready to resume drilling. The Douglas company received their new 3500 ft. cable a week or so ago, which would indicate that they are preparing to go to this depth if a well is not brought in sooner.

H. T. Sparks, field manager for the Star Oil Co. of Corsicana, reports his well on Survey No. 49, drilling at 250 ft. Last Friday at 190 ft. the drill went through a strata of coal, but it is now in red bed. The formation is looking so good, and with favorable report made on this location by two prominent geologists, acreage in the vicinity of this well is enjoying a steadily increasing demand. In fact, Manager Sparks is highly pleased with the prospects and now that he has been enabled to resume drilling, hopes to put the hole down rapidly.

The Lohm Oil & Gas Co. of Alvarado is reported by Manager H. R. Bevil to be drilling again after a several weeks' delay waiting on repairs.

TORN CHECK CLEARS MAN CHARGED WITH FORGERY—WORD "PAY" MISSING

Because of a flaw in the indictment the case of the state against Nathan Arnold, charged with forgery, was dismissed in the Tom Green county district court Tuesday afternoon. Judge Charles F. Dubois quashed the indictment.

It was charged that Arnold passed a \$2.75 check on J. A. Weatherall, local grocer, signing the fictitious name of V. Barr and in exchange of a sack of flour. When the check was removed from the check book, the word "Pay" was torn out. This, in the court's opinion, made the check worthless, and the act did not constitute forgery, although the bank made payment on the check.—San Angelo Standard.

ROCHELLE WINS SECOND HOTLY CONTESTED BALL GAME FROM MERCURY SUN.

Rochelle won the second of a series of hotly contested baseball games from Mercury Sunday, the game having been played on the Rochelle ball grounds. The final score was 2 to 0. On the Sunday previous Rochelle won the first of the series, defeating Mercury by a score of 1 to 0.

Batteries in Sunday's game for Mercury were Beasley and Cox; for Rochelle, Williamson and Ray Floyd. The feature of the game, and, in fact, the main thing that won the game for Rochelle was the spectacular work of Arthur Floyd in left field.

BRADY, TEXAS, June 17, 1919.

HONEST INJUN.

Rain, mud, moisture, downpour and precipitation are words that are being about as hard worked by West Texas editors at present as camouflage, liaison, dud, tank and similar words were by war reporters during the late unpleasantness.

THE BIRTHDAY OF THE FLAG.

Last Friday was Flag Day—to commemorate the 142nd birthday anniversary of our flag. The following editorial, printed in the Temple Telegram, on Flag Day, is well worth reading:

"Today is the 142nd anniversary of the birthday of the American flag. Old Glory, the banner that has never known defeat.

"Its potentiality in peace and in war is due to the fact that it has always stood for the rights of the common people.

"Whether flown from the mast head of the Yankee privateer piloted by Paul Pones in defense of the infant republic, flaunted in defiance of Al-bion's disregard of sailors' rights flung to the breeze over the halls of the Montezumas to assure the freedom of Texas, borne in the conflict between brother Americans that this government might not perish from the earth, or carried in triumph on the fair fields of France to insure the world that democracy should have an eternal existence, the Star-Span-gled Banner, unsullied by defeat, is today the emblem of liberty to millions of men in every clime under the shining sun.

"When it was created its field of blue bore the impress of thirteen stars—emblematic of the thirteen sovereign states allied under the name of a single nation. Today its field is studded with forty-eight stars in a single constellation, and the name of that political star-group is America. The field of its usefulness has magnified, but the principles that called it into being have never changed.

"Today as we reverence the flag as we fling it to the breezes of heaven, let every American reconsecrate life and all held dear to the perpetuation of Liberty at home and its extension throughout the world."

AN ACTUAL INCIDENT WITH A BIG MORAL

A short time ago a farmer asked a buggy manufacturer for a price on a certain type of vehicle.

Upon receipt of the quotation the farmer wrote the manufacturer accusing him of "profiteering" and similar high commercial crimes and misdemeanors. In justification of his charges he reminded the manufacturer that he (the farmer) had once bought a very similar buggy from the same factory at a price far and away below the price now quoted.

This particular manufacturer operates one of the systematic business-concerns that maintains a record of all its transactions.

Upon receipt of the farmer's letter of complaint the manufacturer looked up the previous sale to which the farmer referred.

He found that such a sale had been made as the farmer stated and that the farmer had paid for that buggy not in money but with a shipment of wheat.

The manufacturer thereupon replied to the farmer giving the complete record of the transaction and said: "If you will ship to me for your new buggy the same amount of wheat you shipped for your old one I will gladly ship the buggy and in addition will ship you a kitchen cabinet and a good kitchen stove!"

Another actual incident. During a train conversation a mechanic complained bitterly that he had just been obliged to pay \$5.25 for a pair of shoes that he "used to" buy for \$2.50. Further conversation developed the fact that the mechanic's present pay is \$9.50 per day and that the best wages he ever "used to" get was \$4.00 per day.

In his article on "The New Price Revolution," Irving Fisher, Professor of Political Economy, Yale University, says: "When we investigate almost one of the so-called high prices for industrial products we are likely to find that individually it is not high; that is, not high relatively to the rest. * * * We are on a high price level, which will be found a stubborn reality."

Let us stop thinking of changes as they were five years ago. Commercial, financial and social conditions have changed more in the last five years than in the previous fifty years. The old conditions are never coming back.

LET'S GO!

TO PUNISH FAKE ADVERTISERS.

Fake advertisers will get their just dues, if a law which has been drafted and which will be presented to the next legislature is passed.

The bill is one which has the support of all legitimate advertisers, and advertising agencies and advertised mediums. No honest newspaper man will carry fake advertisements if he knows it, but he has no way of passing on many ads which are submitted to him. The law will protect the honest advertiser and make it hard for the fake advertisers.

In part the proposed bill provides: "Any person, firm, corporation or association, who, with intent to sell or in anywise dispose of merchandise, securities, services or anything offered by such person, firm, corporation or association, directly or indirectly, to the public for sale or distribution; or with intent to increase the consumption of or induce the public in any manner to enter any obligation related thereto, or to acquire title thereto; or any interest therein; makes, publishes, disseminates, circulates or places before the public in this State in a newspaper or other publication or in the form of a book, notice, handbill, poster, bill circular, letter or pamphlet, or in any other way an advertisement of any sort regarding merchandise, securities, service or anything so

offered to the public which advertisement contains any assertion, representation or statement of fact which is untrue, deceptive or misleading shall be guilty of a misdemeanor."—Ballinger Banner-Ledger.

P. T. BARNUM WAS RIGHT.

A tent show blew into town yesterday and showed to a good sized audience last night. The drama put on was a wild west scene with no particular plot except to get the money—60 cents to get in and 25 cents for a seat after you got in—and 15 cents to see the whole show before you got out—which was entirely too expensive. The funds were supposed to be apportioned as follows: Fifty cents to see the show, ten cents for war tax, and 25 cents for an upholstered cushioned reserved seat where one could see the elephant eat peanuts and 15 cents to get out. These tent shows making one-night stands are longer on graft than they are on talent and the public should beware of them.—San Saba Star.

P. T. Barnum was right—"the American people like to be humbugged." By universal consent the tent show which showed in Brady last Thursday was "rotten"—so rotten that it was ridiculous, and therefore funny. Being funny, those in attendance, should have gotten their money's worth. However, in this case, the admission price was so high it was impossible to get value received.

The show gave but one performance here—for very good reasons. In the first place, it would have showed to empty seats had it given a previous performance here, or else the performers would have had to carry away with them a choice collection of decayed hen and garden fruit and stale odors.

Talk about profiteering! That show even made a profit off the war tax. Normally the war tax should have been 6c on a 60c admission—but the show garnered 10c war tax. Then they raked off 25c reserve seat charge and 15c for a ticket to the concert following the "regular" show. That made the ticket cost an even dollar. One dollar for a bum performance. Too high! But when our citizens were offered a chautauqua program of ten numbers for \$2.00, many of those who attended the tent show had cold feet and couldn't afford to pay the price of a chautauqua ticket.

P. T. Barnum was right! Nevertheless The Standard is in favor of giving the people a square deal. Every performance of any nature, should be compelled to advertise its admission price in full. Stop the humbug. Give the people a square deal.

SNAP SHOTS.

Augustine Openbottom says that his brother-in-law has installed an electric fan in the vacant room over his fish market, and rents it out to people who want to spend their vacation at the seashore, but haven't the price.—Dallas News.

THE TEMPLE TELEGRAM.

WONDER WORDS.

Not a Knot Noted in Log Sealing 6,000 Ft. Lumber.

Wonder, Ore., June 7.
Editor Brady Standard:
I forgot to tell you about the weeping fir tree that stands in our back yard.

This peculiar species of fir is very rare. I have only seen one other and that on top of a high ridge about 3 miles from here. I do not know whether it belongs to the yellow fir family or to that of the white fir. The distinguishing characteristic of this tree is its long hanging twigs and branches similar to those of the weeping willow. To my thinking, the f.r. spruce and hemlock are the most beautiful of all trees. Especially at this season of the year when they are putting on new growth.

While the last year's growth of one to three feet remains a dark, bluish green, the new growth of a few inches at the tips of each twig is of a real bright, yellowish green * * *—well, there is no use trying to describe it, for you can't begin to imagine its real, majestic beauty and grandeur without seeing it for yourself.

Tell the Jones Lumber Co. to send a man out here to take the photograph of a log without a knot to put on their stationery. The wonder logging crew cut a sugar-pine tree from which they got seven sixteen-foot logs from six-foot diameter but cut, to 3-foot top cut. It scaled over six thousand feet of lumber without a knot and is worth on the Eastern markets, one hundred and fifty dollars per M. Logging on the mountain sides is a very dangerous business. One of the men caught a fall and broke a rib. One was hauling a truck load down a steep place with a four-horse team and his brake rope broke and the wagon shoved the team down the mountain and a log slid off the wagon onto one of the horses, killing it. The driver escaped unhurt. Another man, Geo. Duncan had the misfortune to

let a log roll over him, crushing his skull, killing him instantly. When we consider the danger connected with it, five dollars a day for a man and fifteen dollars a day for a man and team is not too much.

"O.I.C.U.R. RIGHT."
P. S.—What do you think of the ad I have in our two county papers? It reads like this:

What means this eager, anxious throng At Wonder Store the whole day long? These Wondrous gatherings day by day What means this strange commotion? say!

In tones of joy the throngs reply, Every one has come to buy! To sell and buy, to sell and buy, No wonder why! no wonder why!

"O. I. C."

Card of Thanks.
We wish to thank the friends and neighbors who were so kind and sympathetic to us in the illness and death of our husband, son and brother, Chas. Steelhammer. For the many floral offerings and for the words of condolence, we are deeply grateful. May God's richest blessings rest upon you all.

ADVERTISING AND WRITE-UP GET ATTENTION OF OIL OPERATORS IN N. Y. DAILIES

(Continued from Page 1)

considered a wild-cat field, for it has some of the best-paying shallow production in the state, known as the Lohn shallow field. This field being located about 18 miles northwest of Brady. The first of these shallow wells was begun in September, 1918, drilling with an ordinary water rig. Oil sands were reached at 211 ft., and after being shot, the well tested out around a 25 to 30-barrel producer. This oil tested out 42.5 gravity—the same high grade oil as is had at Ranger, Texas, at 3200 odd feet. In fact, the Lohn oil is declared the only oil in the United States which tests out the equal of the Ranger oil. The well proved such a splendid investment that five additional wells were immediately contracted on the same tract. Three of the five struck oil sands at the same depth as well No. 1, but have not equaled the production of No. 1 because they were not shot. Well No. 5 passed through dry sand at the 211 ft. level, but at 224 ft. struck a new oil sand, harder and darker than the regular Lohn sand, and, when shot, No. 5 developed around 35 to 40-barrel production. Well No. 6 has also been drilled into the oil sand; also A. W. Cooper's well No. 1, on an offset tract, struck sand at 207 ft., and has drilled in. Both these wells are waiting on shooters and storage before being tested out.

"The company operating these shallow wells recently began cleaning out Well No. 1. This well had been producing since last November, and after being cleaned, again tested out 25 barrel daily production. The longevity of the well was so gratifying that the company has arranged to shoot all the wells not heretofore shot, and will also clean out the entire series. In addition, they have contracted for the drilling of still another series of wells.

"Two months after the first shallow well was begun, the Prairie Oil & Gas Co. struck the same sand at 380 feet in their deep test two miles northwest of the shallow field, the sand being reported as good for a 40-barrel production. The company immediately shipped a Star rig, and are now developing the shallow sand.

The following table showing the cost of drilling a shallow well in the Lohn shallow field, and the production in a period of 30 days proves what a splendid proposition a shallow well may be:

Cost of Drilling	\$250.00
Casing	150.00
Pump and Equipment	85.00
1-Acre Lease	50.00
Total	\$535.00
10-Barrel Production @ \$2.25 per Bbl.	\$22.50
Less 1-8 Royalty	2.80
Less Pipe Line Charge	1.50
Net Daily Revenue	\$18.20
Revenue for 30-Day Period	\$546.00

"The fact that a shallow well with but a 10-barrel daily production will more than pay itself out in 30 days, shows the wonderful possibilities of this production, and is responsible for something like 60 wells now drilling or under contract to drill in the Lohn shallow field. Operations are not confined to the 208 acre tract, which comprises the original shallow field, but extend several miles in all directions from this field.

"Inviting as the shallow field is, there is still a bigger and more inviting field for those who would drill for deep oil. At present there are between 25 and 30 deep tests drilling or under contract to drill in McCulloch county, and backing these are the greatest oil companies in the United States, and, in fact the world. Prominent among those drilling are C. S. Thomas, of Los Angeles, Calif., who for many years has been head of the geological department of the Union Oil Co. of California. Mr. Thomas now has two deep test wells under way, and has a third deep test under contract to drill at an early date. Mr. Thomas has made numerous trips to McCulloch county, and over the McCulloch county territory. His view of the possibilities of developing an oil field here may be summed up in his own words: "We are going to get oil here. Of that I feel absolute certain. So sure, in fact, that I will be almost ready to quit Texas entirely, if we fail." The Prairie Oil & Gas Co. is another of the large companies drilling in McCulloch county, and their test has been doing down at a most satisfactory rate. The Cosden Oil Co. is backing another test, which is known as the Texas Oil & Refining Co. well. In addition there are a dozen other deep tests already drilling in the county, the number including some of the biggest independent operators in the South. Practically all of these tests are being drilled with the heavy type rigs, and expect to go to 4,000 ft. depth, unless oil is found at a less depth. This assures the most thorough test of any field in the South.

"During the past five months development in the McCulloch county oil field has come rapidly and has exceeded by far the expectation of the most sanguine. Not only has McCulloch county seen great progress, but wells have been contracted and are drilling on all sides of McCulloch county, which would indicate one of the most extensive fields in the U. S. Geologists state they have never seen a better or more exposed formation than throughout this section—and McCulloch county will, according to their opinion, develop the next big strike in Texas.

"The wide-spread fame of the McCulloch county oil field is largely due to the campaign of information and publicity inaugurated by the Brady Chamber of Commerce, a set of live-wire boosters, comprising the leading bankers, business and professional men of McCulloch county. In their efforts to place McCulloch county in the public eye, they have raised a campaign fund which is being expended for display advertising space in the leading newspapers of the U. S.,

THIRTY-SIX HOURS RAIN IS NEWEST RECORD

The regular weekly rains have not failed us. Sunday was the eighth consecutive Sunday for rain to fall in McCulloch county, and while Sunday's rain was scarcely more than a heavy mist, nevertheless it was sufficient to keep up the record. Furthermore, it was followed by thirty-six hours of almost uninterrupted down-pour. The rain started with light sprinkles during Sunday night and early Monday morning, and continued through Monday with increasing volume. By Monday night half an inch of rainfall had been recorded. Monday night and early this morning the rain fell steadily unto about 10:00 o'clock, a total precipitation of 1.2 inches being recorded since Sunday. While the rain fell heavily all of the early part of the morning, yet no wind accompanied it. The ground was saturated, however, and most of the moisture ran off.

Just what effect the rain will have is hard to conjecture, although considerable damage to both cut and uncut grain is likely to result. However, the farmers are optimistic over the return of the sunshine, and are hoping for a spell of dry, warm sunny weather which is needed to complete the harvesting of the small grain, and the growing of cotton. Corn and maize is everywhere reported as fine as ever had in this country and prospects on the whole were never better.

and in addition have sent out thousands of circulars and descriptive literature. The most successful, as well as unique plan to acquaint the general public with the development in McCulloch county and the possibilities of the oil game there, has been the free distribution of large maps of McCulloch county showing the various big tracts under lease to prominent oil companies or individuals, the deep tests drilling or contracted, and the shallow wells drilling or contracted to drill. This map is accompanied by an up-to-date resume of the operations, which enables everyone interested to secure accurate and intelligent information upon the McCulloch county development.

"Another novel plan of the Brady Chamber of Commerce just recently inaugurated, has been to run a free auto excursion trip once each week, the trip making a circle of the county and visiting the various deep tests, and the shallow fields as well. This excursion trip has been arranged for the benefit and convenience of visitors from a distance, and assures them of first-hand information and acquaintance with the various operations. In addition, the Chamber of Commerce maintains a live organization to assist and direct operators and investors; in fact, it has left nothing undone to assure the greatest possible results for all who may seek or desire its assistance.

"To its efforts is largely due the rapid and extensive development of the county, which is regarded as remarkable in view of the distance from the older oil fields and the difficulty in securing tools, materials and supplies. Now that the big steel mills and manufacturers are getting their production back to a peace basis, this difficulty will be largely relieved, and the balance of the present year should see tremendous strides in the development.

"To the man who would enter the oil game, McCulloch county offers unexampled inducements. For the small operator, there is the shallow field, offering quick and wonderful returns on a comparatively modest investment. For the big operator there is the deep field, its secret still locked firmly within its bosom, with over a score of fortune hunters putting forth their best efforts to locate the treasure trove and bring into the world the liquid gold which has transformed many a pauper into a millionaire, and many an unknown community into one of the big spots on the world's map.

"Nor do the possibilities end with the attempt to secure oil. Refineries, pipe lines, manufacturing enterprises, increased property values, and a thousand and one other opportunities are by-products of the development of oil. All these opportunities now stand on the threshold in McCulloch county, Texas, and beckon to the man of foresight. The great opportunity is today!"

CHAUTAUQUA IS SUCCESS--PROGRAM BEST EVER

In spite of rainy weather and an auspicious beginning, the Brady chautauqua already bears the brand of success. The rain Monday did not appear to dampen the enthusiasm in the least, and the chautauqua ticket committee was kept busy all Monday morning giving out and taking phone orders for season tickets. As a consequence, not only has the guarantee been more than met, but all incidental expenses have already also been covered, and the door receipts promise a nice little nest egg for the Brady fire department, who stand sponsors for the chautauqua.

No program was held yesterday afternoon, the Cartwright Bros. Quartet having failed to put in their appearance. The company had made their arrangements to be driven from Llano to San Saba and then planned to take the train from San Saba to Brady. The jitneys failed to appear at the appointed time, however, and delay ensued in securing other jitneys. Then the rain caused them to be stuck in a mudhole just long enough to miss connection with the San Saba-Brady train.

However, the quartet made up for the disappointment by giving one of the best programs last night that has ever been heard here. Dr. Roland A. Nichols gave a lecture on the subject, "The Man Worth While," which was universally declared to be a splendid and highly interesting one.

Considering the rain, a splendid audience was on hand to greet the opening program, and everyone was highly pleased with the offering.

No program will be had this afternoon, but a double program is promised for tonight, including a musical entertainment by the Helene Burgess String Quintet, and a lecture entitled, "What Next?" by Dr. L. G. Herbert, whose appearance here last year proved one of the best of the 1918 program.

Tomorrow a splendid program will be offered in the Royal Hawaiian Singers and Players, and anyone who appreciates the wonderful music of these people will be certain to want to hear it played by the natives in person. Another feature will be the talk of Sergeant Edwards, Canadian war hero. If Edwards can anywhere near equal the address given last year by O'Connor, then his talk will be worth the price of the season ticket alone.

Thursday afternoon and night, DeWillo, will entertain in remarkable fashion with the concertina. At night, M. H. Jackson lectures on the "Shamrock and Heather" and Morris G. Hindus, Russian scholar, gives an insight into the chaos and upheaval in Russia.

The closing day's program, Friday, will be a musical entertainment by the fifteen Navassar girls, in novel orchestral music.

You Do More Work.

You are more ambitious and you get more enjoyment out of everything when your blood is in good condition. Impurities in the blood have a very depressing effect on the system, causing weakness, laziness, nervousness and sickness.

GROVE'S TASTELESS CHILL TONIC restores Energy and Vitality by Purifying and Enriching the Blood. When you feel its strengthening, invigorating effect, see how it brings color to the cheeks and how it improves the appetite, you will then appreciate its true tonic value.

GROVE'S TASTELESS CHILL TONIC is not a patent medicine, it is simply IRON and QUININE suspended in Syrup. So pleasant even children like it. The blood needs Quinine to Purify it and IRON to Enrich it. These reliable tonic properties never fail to drive out impurities in the blood.

The Strength-Creating Power of **GROVE'S TASTELESS CHILL TONIC** has made it the favorite tonic in thousands of homes. More than thirty-five years ago, folks would ride a long distance to get **GROVE'S TASTELESS CHILL TONIC** when a member of their family had Malaria or needed a body-building, strength-giving tonic. The formula is just the same today, and you can get it from any drug store. 60c per bottle.

FOR A LIMITED TIME!

You can get The Fort Worth Record until December 1st, 1919, at the following rates:

Daily and Sunday... \$2.95
Daily without Sunday... \$2.55

Remember with the Sunday edition you get a comic section and also the new and wonderful Rotogravure section. Ask to see the Rotogravure—you'll want it sure!

THE BRADY STANDARD.

Even the Judge Smiled. Counsel and witness were getting on capitolly, for they were both on the same side. Everything was going swimmingly, and the case seemed already won.

"Now, will you tell me once more," said the counsel suavely, "the exact words used by the defendant in the libel you complain of?"

"Certainly!" responded the plaintiff. "He said he defied me to find a bigger liar and thief than I was myself."

"And what did you reply?" inquired counsel.

"Why," answered the witness, innocently, "I told him I should go straight off and see my lawyer."—Pittsburg Chronicle-Telegraph.

WATER WORKS MAN GIVES OUT FACTS

After Searching For Years He At Last Finds Medicine That Ends Troubles.

"I have been trying for years to get something that would relieve me of my troubles and have found it at last in Tanlac," said Alfred Jolly, of 3291 Quitman street, Denver, Colo., and an employee of the waterworks department of that city.

"For a long time," he continued, "my stomach was in such an awful fix that I could eat hardly a thing without being in misery afterwards. Even the lightest foods would blow me up with gas and I was constantly belching up sour, undigested food that at times would almost choke me, and often I would get so dizzy and light headed that I would almost fall down, and I would get so nervous that it was almost impossible for me to rest at night. I suffered agony from rheumatism and was in such a wretched condition that I was hardly fit for a thing."

"After trying nearly everything I could hear of I took Tanlac, and it sure hit the spot and has made a different man of me. My appetite is splendid, my nerves steady, I sleep like a log at night, have gained eight pounds and am in better shape than I have been in years."

Tanlac is sold by leading druggists everywhere.

We have added a line of strictly high class Trunks to our line. See them in the show window. O. D. MANN & SONS.

A Possible Excuse.
"You'd better marry me. Eligible men are scarce."
"I suppose I could offer that as an explanation," said the girl reflectively.—Louisville Courier-Journal.

Kerr Self-Sealing Mason Jars. Two styles—regular and wide mouth. Seals air tight without a rubber ring. O. D. MANN & SONS.

Catarhal Deafness Cannot Be Cured by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure catarhal deafness, and that is by a constitutional remedy. **Catarhal Deafness** is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result. Unless the inflammation can be reduced and this tube restored to its normal condition, hearing will be destroyed forever. Many cases of deafness are caused by catarh, which is an inflamed condition of the mucous surface. Hall's Catarrh Cure acts thru the blood on the mucous surface of the system. We will give One Hundred Dollars for any case of Catarrhal Deafness that cannot be cured by Hall's Catarrh Cure. Circulars free. All Druggists. **P. J. CHENEY & CO., Toledo, O.**

LOCAL BRIEFS

J. M. Stewart is here from Sonora and will continue his visit with E. A. Hallum until the next dry spell. Following his return to Sonora, Mr. Stewart expects to take a trip of several months out through Arizona and California.

Dan Hurd was the near-victim of an accident last Friday afternoon which might have had serious consequences. While riding on a cultivator his team became frightened and turned the cultivator over. Fortunately Mr. Hurd was thrown clear of the implement and so escaped serious consequences.

Doc Wyrw was in from the Five community Monday. Doc says between the wet weather and the scarcity of help, the farmers are having a hard tussle to save their grain. With a bumper feed crop to be saved, with corn and maize the best in years and with cotton chopping staring them in the face, the farmers are facing some busy times, and there is no excuse for any loafers in this neck of the woods.

Messrs. Howard Broad, A. J. Ricks and Lee McShan, who have been at Austin for service on the Federal jury, returned the latter part of last week. McShan was called for service on the Federal grand jury. Broad and Ricks were permitted to return home, but were ordered to report again yesterday morning for service on the Federal jury. They left, accordingly, Sunday to return to Austin. They report many citizens from this section having been called for Federal court service.

Grove's Tasteless chill Tonic restores vitality and energy by purifying and enriching the blood. You can soon feel its Strength-giving, Invigorating Effect. Price 60c.

PERSONAL MENTION

Mr. and Mrs. Duke Mann left yesterday morning in their car for Sabinal, where they expect to spend some time visiting her parents, Rev. and Mrs. I. T. Morris. Miss Mary Morris, who has been their guest here, returned home with them.

Mrs. E. B. Ramsay and little son, Edwin, accompanied by Mrs. Ramsay's mother, Mrs. E. H. Alcorn, left Sunday for a visit with relatives and friends at Taylor and Georgetown.

Mrs. Ramsay and son will be gone about a week or so, while Mrs. Alcorn expects to spend several weeks. Mayme Mayse, the eight-year old daughter of Mr. and Mrs. John Mayse, last week had the misfortune to run a nail into her hand, and the injury has caused infection to set up and given the little lady much pain and discomfort. Latest reports, however, are that she is improving nicely.

Sonny's Selfishness

It was son's birthday, and his mother had told him to invite his little friends for the afternoon. Then she got to work and made cakes and jellies and all sorts of goodies. The hands of the clock crept round to tea time at last, and son, eyeing the laden table, said:
"Can I start now?"
"No, of course not!" said his mother. "You must wait till your friends come."
"Mother," he said, "I didn't ask them to come. I thought it would be nicer to have it quite exclusive."—Pittsburg Chronicle-Telegraph.

Our line is complete in every particular, and we invite your inspection and your patronage. We guarantee everything we sell. If it isn't good, bring it back—we'll make it good. THE BRADY STANDARD.
