### EASTER NEWS

Mrs. J. R. Mitchell of Memphis spent last week visiting with the William Moss family.

Mr. and Mrs. Larry McQueen of Memphis and Mr. and Mrs. Henry Solomon of Hereford visited the William Moss family.

Tom Bob Moss, student at West Texas University, is home for between mid-semester.

Mr. and Mrs. J. S. Scarborough and Mr. and Mrs. Joe Thommerson were in Lubbock Friday night to attend the Baptist General Convention.

Mrs. C. M. Smith of Hereford

visited Mrs. John Burnett Tuesday afternoon.

Mrs. Garland Jarvis visited Mrs. Flood Tuesday afternoon.

Mr. and Mrs. J. H. Flood visited Mr. and Mrs. Ray Bearden in Dimmitt Sunday evening.

Mr. and Mrs. W. O. Markley and children spent Saturday night with Mr. and Mrs. Buddy Barnes and family who live near Romero, Texas. The Barnes family recently moved to Romero from the Jumbo Community.

Mr. and Mrs. James A. Shaeffer from Claude visited in the Marvin Welty home, Mrs. Welty is their daughter.

Mr. and Mrs. Dale Maxwell flew to Silverton and Quitaque Tuesday to visit relatives.

Miss Glenda Pryor of Lubbock,

spent the week-end in the W A Epperson home.

Easter Club met in the home of Mrs W A. Epperson Thursday for their regular meeting with 13 members present. Mrs. Harry Smith of Jumbo Community on Oil painting. She brought a member of her painting and frames and demonstrated how different frames could add or detract from the painting.

Those present for the meeting were, Mrs. Nadine Hall, Mrs. Ruby Stone, Mrs. Mary Flood, Mrs. S.T. Walton, Mrs. Naomi Scarborough, Mrs. Becky Maxwell, Mrs. Rosie Markly and Sonia and Anna Mae Burnett, Anna Margaret Moss, Linda Welty and daughters and guests Mrs. H. H. Smith and Miss Linda Pryor and the hostess, Mrs. W. A.

Epperson.

Mr. and Mrs. Loy D. Stone, left Wednesday night for Dallas on a business trip.

Thought for the week, "An Automobile can help you see the world, But it is up to you, the driver, to decide which world."

Shirley Garrison returned recently from Denver, Colo where he attended the Sugar Beet tour with several men from the area. Ewing Mathis, Dimmitt, Jay Boston and Raymond Higginbotham, Hereford and Sherman Nelson Lubbock. One of the high lights of the sugar beet tour was the Great Western livestock show and rodeo.

Mr. Harvey Garrison from Texas Tech visited his parents the Shirley Garrisons the past week.

Mrs. Shirley Garrison was in

Leveland recently visiting her mother. Mrs. W. W. Welch and an aunt Mrs. Lee England. While there they visited her sister Cleon Ivey of the Pettet Community.

American agricultural abundance is a powerful force for world peace. Our food and other farm products are helping to promote economic growth in the newly developing countries of the world.

Wiring of too small a size may be the reason for trouble with farm equipment and home appliances. Low voltage can cause a loss in light output, a loss in heating efficiency, an increase in the energy required by electric motors and an increase in the heating of motor windings.

### Review Income Tax Rules Now

It soon will be time to start to work on your income tax report, says Mrs. Wanda B. Meyer, home management specialist with the Agricultural Extension Service at Texas A&M University.

You may want to review some of the rules which may help you save—if they apply in your case. Here's a checklist:

A portion of a dividend payment on stock that is designated as return of investment is not subject to tax, although it reduces the cost basis on which you figure your profit when you later sell the stock.

A mutual-fund dividend, the portion that is designated as capital

gain, is taxable, in effect, at only one-half of your ordinary rate.

Capital gains allotted to you on mutual-fund shares, but not paid, have to be reported as capital gains on your return. But you can claim credit of 25 per cent of the amount as taxes you have paid, as that's the sum paid by the company.

A child who finished college in June, 1963, can be claimed as an exemption, under the rule for full-time student of 19 years or over, provided you furnished more than one-half of his support for the entire year.

Scholarship payments received by a child in college aren't counted in calculating whether you furnished more than a half of his support.

Social security and other tax-exempt income received by a dependent doesn't count toward the income test that has to be met for an exemption. But any such income spent by the dependent for his own support has to be included in estimating whether you furnished more than half.

Other rules to consider are: A couple married at any time during the year, as late as December 31, can get the benefit of a lower rate for 1963 on a joint return; a dependent who died during the year, even the first week, can be claimed as an exemption if you were furnishing more than half of his support; people who reached age 65 on January 1, 1963, are entitled to an extra exemption and larger medical deduction.

### Miss Marilyn Perlich To Become Bride Of Lt. Donald L. Curry In February

The engagement of Miss Marilyn Marie Perlich to Lt. Donald L. Curry, son of Mr. and Mrs. C. L. Curry, of Dimmitt, Texas, has been announced by her mother, Mrs. Amanda Perlich, of Chicago, Illinois.

Miss Perlich, a graduate of Luther High South, has been a secretary at the U. S. Army Army Support Command in Chicago for the past four years.

Lt. Curry is a Bachelor of Science graduate of Texas Tech and majored in animal husbandry. He received his commission from R.O.T.C. in the U. S. Army, attended the Basic Officers' Course and the Commissary Operations Course at Fort Lee, Virginia, and completed his tour of duty at the U. S. Army Support Command in Chicago. After his discharge in February 1964, he will be employed by Swift and Company as a Cattle Buyer.

The couple will be married in Chicago on February 15, after which time they will reside in Fort Worth, Texas.

Mrs. Fred Jones visited her son, Jerry and wife in Lubbock recently. Jerry is in the insurance business.

The immediate project of the Foundation will be the construction of the memorial building at the theater entrance. The principal wall is already in place. The map mentioned above, the plaques to be made from the winning designs representing forty-one counties which were chosen in the competition among junior and senior high school students last spring, and the walls carrying the names of the donors will be finished in the near future. Everyone who has \$500 in the project may designate a name for the memorial wall. These names will be listed by counties and will include the occupation and the date of settlement in the area, in their listing. Since over 200 \$500 donations have been received, this is already a most interesting historical census. A sketch was presented to the audience showing how these will be used, and also showing the location of the memorial names which will be in the seating area.

The program consisted of some remarks by Mr. J. G. Voelm of Amarillo concerning the Potter County design plaque which the mineralogists of Amarillo are planning to make in flint mosaic from the Alibates Quarries which it represents.

Dr. Fred Jones visited her son, Jerry and wife in Lubbock recently. Jerry is in the insurance business.

The program was a film on "Grooming Calves for Shows." The meeting adjourned. Games and refreshments were enjoyed by eight members: Janna Thanisch, Jeanne Petty, Dan Petty, Leann Merritt, Brock Merritt, Dennis Cleaver, Rodney Hutto, Byron Hutto and adult leaders and parents.

### Heritage Meeting Held In Canyon At Fine Arts Building

The annual meeting of the Texas Panhandle Heritage Foundation took place in the Fine Arts Building of West Texas State University Sunday afternoon, January 26, at 4:00 p.m. The program consisted of reports on the state of the amphitheater and the project presented by Dr. Crannell Tolliver and Mr. R. C. Neely, Jr., of the building committee, Mr. Jerry LaGrone, Treasurer, Mrs. Kenneth Lanham, Secretary, Mr. O. P. Cowart reported on the recent visit of the officials of the Texas Parks and Wildlife Commission to the amphitheater in the Palo Duro State Park and also on the construction of the sand table for the relief map of the Panhandle which is to be on the pylon at the front of the theater as one of its principal ornaments.

Mrs. Ples Harper presented three budgets in her president's report. The first was for a production which Mr. Green who is working on the script for the show - has termed "homespun". This could be produced as soon as \$50,000 in underwriting or advance ticket sales was available. Since many of Mr. Green's productions have averaged an income of more than \$90,000 through the years, this is well within our reach. The second was for a production on the scale of the other Green dramas. This allows for the finishing of one dressing room and very elaborate lighting. To achieve this, the Foundation would need to raise \$110,000 more and \$65,000 of it could be in underwriting. The third would be much more expensive to install, but cheaper to sustain, as it would use automated light and sound - new techniques which would attract world wide attention when used by someone with Mr. Green's reputation for creating tremendous effects. This would require \$160,000 more than is available at the moment. \$75,000 of it could be in underwriting.

After consulting with Mr. Green, the Board decided to work one year more before opening in order to be able to match the scale of the other Green productions.

The immediate project of the Foundation will be the construction of the memorial building at the theater entrance. The principal wall is already in place. The map mentioned above, the plaques to be made from the winning designs representing forty-one counties which were chosen in the competition among junior and senior high school students last spring, and the walls carrying the names of the donors will be finished in the near future. **A FAIR FEEDING TRIAL OF BEEFMASTER'S LIQUID FEED WILL DEMONSTRATE TO YOU HOW THIS PRODUCT CAN MAKE MORE MONEY FOR YOU IN YOUR FEEDING OPERATIONS**

REPORTS FROM CATTLE FEEDERS EVERYWHERE indicate that cattle getting Beefmaster's Feed consistently do better, gain more and do so on less feed. They have less trouble adjusting to changes in rations, have a good steady appetite and eat better. Digestive troubles and bloat are practically eliminated, and severe weather changes do not bother cattle that are getting Beefmaster's Feed regularly.

**GOOD HIGH ENERGY, HIGHLY FORTIFIED PROTEIN SUPPLEMENT MEANS MORE GAIN QUICKER ON LESS FEED**

- STIMULATES RUMEN FUNCTION THESE WAYS:**
- 1 Starts a natural sweet fermentation
  - 2 Provides effective enzymes to assist those of the rumen bacteria
  - 3 Provides factors which are essential to the growth and multiplication of rumen micro-organisms

## Protestants Seek \$17,988,351 For Aid To Needy Overseas

Protestant denominations have set a record-breaking total of \$17,988,351 as the goal of their annual

One Great Hour of Sharing appeal for support of programs of assistance to the homeless, hungry and destitute in 44 countries.

This goal—an increase of \$1,142,211 over 1963—was announced today by Church World Service, which sponsors the appeal on behalf of participating Protestant and Eastern Orthodox denominations. Church World Service is a department of the National Council of Churches.

Funds realized through the One Great Hour of Sharing appeal will go toward support of individual denominational programs of assistance, and joint projects of aid carried on overseas through Church World Service, the World Council of Churches and related interdenominational organizations.

Highlight of the appeal this year will be One Great Hour of Sharing observances by more than 94,000 individual congregations throughout

## Changes Noted In Screwworm Eradication Work

Highly successful eradication measures, cold weather and the need to conserve funds have prompted screwworm eradication officials to cut the production of sterile screwworm flies by 50 percent.

An average of 70 million flies per week will be reared in the weeks ahead; production had been hovering near the 140 million per week mark during the fall Eradication workers are confident this number will be sufficient to adequately treat those areas of Texas where native screwworms can survive the cold temperature.

The sterile flies, which are released by airplane over screwworm infested territory, mate with native fertile female flies, but no offspring are produced. Nearly six billion sterile flies were reared and sexually-sterilized at the huge "fly-factory" near Mission last year.

Eradication officials stated that the decrease in fly production, as well as a cut-back in personnel of nearly 175 employees, was made possible by a significant reduction in the number of screwworm infestations in the past month. At the time that the decision to hold back production was made, several weeks had elapsed with no cases being reported in any of the five states in the eradication area. Authorities also said that it is important to conserve funds now to insure that money is available to initiate emergency measures that may become necessary later in the season.

During 1963, producers in 182 Texas counties reported 4,916 screw worm cases; the previous year, 49,484 cases were detected in 242 counties. While this indicates a 90 percent decrease, officials feel reporting was so much more effective than during 1962 that an even greater degree of control may have been achieved than the totals indicate.

the nation on Sunday, March 8. This marks the sixteenth annual concerted appeal of major denominations working together to relieve suffering overseas.

Both disaster relief services and long-term rehabilitation efforts to help those in need to help themselves are made possible through this united Protestant appeal.

In the past year Haitian survivors of Hurricane Flora were aided by volunteer medical, construction and agricultural teams, some of which are still working in the disaster area. Air shipments of life-saving drugs, blankets and foods were rushed to the scene.

Farming employs seven million workers, more than the combined employment in transportation, public utilities, the steel industry, and the automobile industry.

## SPENDS WEEKEND HERE

Burriss McRee of Amarillo spent last weekend in Dimmitt with his parents, Mr. and Mrs. M. F. McRee.

## ATTENDS SYLE SHOW

Attending the market and style show at Dallas this week are Mr. and Mrs. Al Jackson, Mrs. L. G. Manning, Mrs. Juanita Fulfer, Mrs. Kate Beecher, Mrs. Hugh Evans, Mrs. Fred Bruegel.

If cold weather interrupts the building of your new home, a preservative applied to the wood siding will protect the outside until the weather warms up. Materials such as pentachlorophenol can be used and will not affect the bonding facility of the paint when it is put on later.

## County League

(Continued from Page One)  
ed president in the midst of the great depression. Texas, New Mexico and all of the agricultural mid-west was saved from economic chaos, along with the rest of the country during his administration. How would this part of the country have gotten along without the federal Installations, along with farm program, labor aid, etc. How would we have fared without FDR, Sam Rayburn, Lyndon Johnson, Ralph Yarborough and the Democratic Party? How many farms had \$80,000 houses on them then. Why have walk-in closets when we had no clothes to fill them. No cars, much less Cadillacs.  
"Harry S. Truman carried on the

Democratic programs of his predecessors, and used the power of the United States to prevent the spread of Communism. We will have to admit that he did sometimes use a mild form of profanity, but have you heard Mr. Goldwater and the language he uses and he doesn't have the problems, and never will, of the president  
"President John F. Kennedy advocated, and put into motion, new programs, including the Youth Employment Act, Peace Corps, Mental Illness-Mental Retardation, Alliance for Progress, Food for Peace, Hospital Care for the Aged, Day Nursery Service for Children whose mothers work, the Civil Rights Bill, Manpower Development Program, Accelerated Public Works Law, Area Redevel-

ment Program, College Bill, Tax Reduction, Farm Plan, Education Bill and Health Action. His patriotism knew no bounds and his compassion for his fellow Americans was indicated by his every act. How proud I was that President Johnson picked up his complete program and plans and has started forth to see that they are carried out. The policies of the president have not changed, only the image has changed. I was sure that President Johnson would not disappoint us that we, the Democrats, stood for all the people, not just a chosen few. That we worked for a prosperous, progressive country, that we wanted to keep moving forward and remain the strongest nation in the world. Women have truly played a

vital part in helping carry these programs forward. We can depend on the leaders in our party to take care of our programs, but it is up to us to help organize and do the leg work Any successful political campaign must start at the precinct level, and by hard work we can be sure of a Democratic victory in 1964."

Mrs. White concluded her address with the remark, "Oh, yes, how many gifts did Ike receive, and with the highest monetary value of gifts ever received by any president in history. Why he so critical of a \$500 hi-fi set given to Johnson while he was still a Senator."

Labor Required For Texas Beef

How many hours do you spend annually caring for your beef cows? This information should be helpful in determining how to better use your labor next year, says Tom Prater, farm management specialist with the Texas Agricultural Extension Service. Operators who have other enterprises competing with their beef program for labor, and those that work off the farm or ranch will be especially interested in knowing how much time they spend with their cows, he says. A recent USDA report indicates that about 12 hours of labor were required annually per cow on beef operations in Texas, says Prater. This amounts to about 3.6 hours per 100 pounds of beef produced, he adds. The hours required per cow will vary on each operation depending on management, and other factors of production. Texas studies indicate that 18 hours per cow annually are needed on the Blackland farms of the state, 14 hours

on Grand Prairie farms, just over 18 hours on the Northeast Texas farms, and some West Texas ranches indicate labor requirements of about 10 hours, according to the specialist. In comparison, in the Mountain States such as Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, and Nevada, about 10 hours are required per beef animal, with 2.4 hours needed per 100 pounds of beef produced. The Delta States of Mississippi, Arkansas, and Louisiana require 15 hours per cow and in the Southeast States of South Carolina, Georgia,

Florida and Alabama, 14 hours are needed. This shows that Texas compares favorably with other beef producing states in the amount of labor required per cow for beef operations, Prater says. Castro Lodge AF & AM 879. Regular meeting 5:00 Monday. Practice every Thursday, Clyde R. Davison, Worshipful Master, Wayne Gipson, Secretary.

### BETHEL NEWS

by Mrs. Earl Lust

Mr. and Mrs. Monte Boozer and Mr. and Mrs. George Sides were hosts to a number of friends who met at the Boozer home Sunday night after church to honor their hosts.

Mrs. Kay Roberts was in Quanah last week from Tuesday until Friday as guest of her brother-in-law and sister-in-law, Mr. and Mrs. A. B. Roberts.

Mr. Vern Lust and Mrs. Earl Lust were among the Methodist Men from Dimmitt who attended the district layman's banquet at Plainview, January 21.

Mrs. Robert Austin and daughter Sherri are guests this week in home of Mrs. Austin's sister, Mrs. Tallet.

The Bethel Woman's Missionary Union of the Baptist church met Tuesday morning January 21st with Mrs. Donald Gilreath. Members present Mrs. Ivor Bagwell, Mrs. Dell Tallet, Mrs. Moss Howell, Mrs. Martin Young, Mrs. Gaines Neill, Mrs. Elbert Smith and the hostess.

Mrs. Vern Lust and Mrs. Earl

Bagwell's mother, Mrs. McClung in Mangum and with Mrs. Bagwell's brothers and sisters and their families in that area.

Mrs. James Welch and Mrs. Charles Wales attended the organizational meeting for Democratic Women of Castro County held at Dimmitt South Grade school Saturday afternoon.

Mr. and Mrs. Ira Brown went to Plainview Sunday morning and got his mother, Mrs. Susan Brown who went with them to Floydada to spend the day with Mr. Browns sister Mrs. W. M. Anderson.

Mrs. Leland Smith is visiting her daughter and her family the Sam Wilsons in Amarillo this week.

Judy and David, children of Mr. and Mrs. Glenn Lust of Lazbuddie spent most of last week with their uncle and aunt, Mr. and Mrs. Houston Lust. During that time Mrs. Glenn Lust was at Temple with her mother Mrs. Frank Hinkson of Lazbuddie who had undergone major surgery at a Temple hospital.

Weed control by means of chemical was discussed at a meeting of farmers at the community building of farmers on night of Jan. 21. The Program was sponsored by Fred Kuntz of Flagg Fertilizer Company. About 25 farmers were in attendance.

Lust attended a sub-district meeting of the Woman's Society of Christian Service at Bovina January 21.

Mr. and Mrs. Moss Howell, Mr. and Mrs. Herbert Howell, Mr. and Mrs. Jack Howell and Mr. and Mrs. Jimmy attended the Freshman basketball tournament at Springlake Saturday night. The Dimmitt freshman boys were winners of the tournament.

### Walter Rogers' WASHINGTON NEWSLETTER

#### THE ISSUE OF PRESIDENTIAL SUCCESSION

A proposal that would, in effect, create a "crown prince" for the United States of America has been advanced by a group of members of my own profession, the law.

Meeting at the request of the American Bar Association, the group recommended that a new Vice President be nominated by the President and confirmed by the Congress any time a vacancy occurs in the Vice Presidential office.

In other words, the process would be circumvented by which American voters themselves could have a direct voice in choosing the man closest in direct line of succession to the Presidency. The system proposed for adoption would fill the office of Vice President (at least until the next general election) by appointment—not voters' choice—in much the same way that top officials of the Executive Branch, men of cabinet rank and below, now are named and their appointments confirmed.

In 1947, Congress enacted the law which now provides for the order of succession to the office of President. The succession, thus, is now first to the Speaker of the House and next to the President Pro Tempore of the Senate and then to cabinet officers in the following sequence: Secretary of State, Secretary of the Treasury, Secretary of Defense, Attorney General, Postmaster General, Secretary of the Interior, Secretary of Agriculture, Secretary of Commerce, and Secretary of Labor.

You'll note that the most recently established cabinet position, that of Secretary of Health, Education, and Welfare, has not been included in the order of succession.

This week the Constitutional Amendments Subcommittee of the Senate Judiciary Committee held two days of hearings into the welter of suggestions proposed as solutions to the problems of presidential succession and disability. I'm certainly not opposed to this study or any other being made. Certainly

it is proper for any group to propose any solution deemed appropriate. And, at the same time, it is appropriate for those of us who oppose proposed solutions to speak out.

It is my earnest hope, however, that no proposal ever advances beyond the talking stage if it would permit the appointment of a Vice President of the United States. Into that office carrying that Constitutionally endowed title must go a person elected by the People if our democratic processes are to be served properly.

Presidential succession has always been a knotty issue. Views change from one period in our history to another. It was only natural that the question of presidential disability would become an issue following President Eisenhower's heart attack during his first term. And it was natural that the issue of presidential succession would again be raised following the tragic assassination of President Kennedy and the ascent to the nation's highest office of the then Vice President, Lyndon B. Johnson.

During George Washington's first term, Congress provided that in the case of the removal, death, resignation, or disability of both President and Vice President, the President pro tempore of the Senate, and if there was no President of the Senate, then the Speaker of the House, was to succeed to the Presidency and hold the office only until a special election had chosen a President for a four-year term. In 1886, there was neither a President pro tempore of the Senate nor a Speaker of the House, Congress, assuming that there never would be a time when all the cabinet positions would be vacant, changed the line of succession to members of the cabinet, beginning with the Secretary of State. In June, 1946, President Truman, having recently succeeded President Franklin D. Roosevelt, recommended abandoning the cabinet succession on the principle that no President that had succeeded from the Vice Presidency ought to be able to designate his own possible successor. In the Act of July, 1947, the Congress followed President Truman's recommendation by providing that the succession be first to the Speaker of the House, a man not only elected from his own constituency but also chosen by the majority of the members of the House of the majority party, and then to the president pro tempore

of the Senate, a Senator elected from his state and then, to provide a presiding officer in the absence of the Vice President, by the members of the Senate. Congress also provided that following these office holders should be ranked members of the cabinet in case of vacancies in the first two offices in the line.

Certainly problems can arise. No system we could devise would be eventual. But let us be careful before tampering with the present line of succession or the method by which Vice Presidents are chosen. The system has served us well. I would urge Americans to remember that many governments

would topple like a house of cards were the head of state to be assassinated. Ours, thanks to the Lord and the wisdom with which our system was conceived, did not.

The dairy industry involves people other than those who milk the cows. Figures show that 292,000 people other than those who milk the cows. Figures show that 292,000 people are employed in manufacturing dairy products in this country.

A carat is a weight used in selling gems and equals one-140th of an ounce.

### Celia Fay Patton - Robert (Bob) Simpson Wedding Plans Announced At Coffee

Mr. and Mrs. R. C. Patton of Seminole, Texas announce the engagement and forthcoming marriage of their daughter, Celia Fay, to John Robert (Bob) Simpson on Sunday, March 1, 1964 at 2:00 p.m. Simpson is the son of Mr. and Mrs. M. L. Simpson, Sr. of 113 Star Street, Hereford.

Announcement coffee was given by Mrs. H. H. Carlile, great aunt of Miss Patton's, in Dimmitt on Saturday, January 24 from 10:00 a.m. to 12:00 p.m. Assisting in the houseparty were Mesdames: Edgar Ramey, Sid Sheffy, Raymond Wilson, Sam Gilbreath, Tom Bice, Joe Nelson, Bill Simpson, Curtis C. Allphin, Jr., Bob Bergeron, Rachel Hunter, Pete Wright, T.G. McKinney, Wes Anthony, Rayphard Smithson, Fred Axe, and Raymond Hance and Miss Dorothy Wright. Mrs. Edgar Ramey and Mrs. Sid Sheffy alternated in receiving guests at the door. Mrs. Carlile, Miss Patton, Mrs. R. C. Patton, and Mrs. M. L. Simpson, Sr. formed the reception line. Mrs. Curtis Allphin, Jr. and Mrs. Sam Gil-

breath presided at the guest register. The table had a center piece of champagne carnations with velvet ribbons bearing the names, Celia and Bob and March 1, 1964, inscribed in gold. Mrs. Pete Wright and Mrs. Joe Nelson poured coffee from a copper coffee service. Double wedding ring vows will be performed by the Rev. N. S. Daniels, minister of the First Methodist Church, Seminole. Mrs. Curtis C. Allphin, Jr. of Seminole will attend her sister as Matron of Honor. Best man will be Joe Nelson of Dimmitt, brother-in-law of Simpson. The marriage will take place in the home of the bride's parents, west of Seminole.

Miss Patton is employed by the Texas Agricultural Extension Service as the Castro County Home Demonstration Agent with headquarters at Dimmitt. She is a graduate of Seminole High School and received a bachelor of science degree in home economics from the University of Texas.

Simpson is a graduate of Dimmitt High School and Texas Tech-

### Cotton Bollworms To Be Controlled By Insect Viruses

Two of the country's most destructive insects, the cabbage looper and cotton bollworm, have been successfully controlled by mass-produced insect viruses that are harmless to man.

Both insects are well known pests in Texas and as John Thomas, entomologist for the Texas Agricultural Extension Service puts it, just ask any Texas cotton producer about their resistance to chemical controls.

Tests conducted by the U. S. Department of Agriculture's Agricultural Research Service, much of the work was done at the research center at Brownsville, indicate that early-season spray applications of virus will artificially induce epidemics and control the insects before they can damage crops, explains Thomas.

Work is now underway to determine timing, rates and frequency of application of the viruses. Studies indicate only a small amount of insect virus material is needed for effective control. The scientists believe a man probably could hold enough powdered cabbage looper virus concentrate on the nail of his small finger to treat five acres. They also believe the looper and bollworm viruses can be produced at prices farmers can afford. But, adds Thomas, artificially produced viruses for insect control are still experimental materials and none are available for use by the public.

Research has established these points: both viruses are highly specific. One infects only the cabbage looper. The other bollworms and the closely related tobacco budworm. Both viruses are harmless to man, animals and plants. Fungi, bacteria, insect parasites or predators, and other natural enemies of the looper and bollworm are not harmed. Objectionable residues do not occur on treated crops; in fact, ineffective forms of the virus occur naturally on crops attacked by these two insects.

Thomas says scientists have long the potential of viruses for biological control of insects. Recently developed mass-producing techniques, however, makes it possible to exploit these two viruses, Thomas says.

Horace (VP) Henley has a real nice get together planned for February 8. There will be a real good, down to earth Jaycee Orientation presented to all members and their wives. Rumor has it that one of the Jaycee-ettes will be on the program to clue us in on the functions of that group. There is a social planned for after the orientation. One little catch, admission to the social is based on attendance at the orientation. Someone said it would cost latecomers \$5.00. Better show up on time, Gentleman?)

Talent show is coming up. There are a few new wrinkles in the mill for this year's show so it should be another whumping success. All profits from this annual venture will go to the CASTRO COUNTY SCHOLARSHIP FUND. More details later on this. Oh, yes, Horace Henley, the old Guitar Picker is in charge of this one.

### Jaycee Jake Says

The Jaycees really showed their colors last Sunday out at the airport when the roof went on the new hangars. There were fifteen Jaycees and a couple of old Roosters who showed for the job. Maybe there were a couple of more but I quit counting when we finished. The job wasn't complete though—seems we ran out of tin just before everyone quit. Seriously, it was a job well done, Jaycees. And the refreshments that were provided by the Jaycees really came in for their share of the praise. THANK YOU, LADIES. This brings the total number of hangars to thirteen. Thats a bunch for a small town airport. Kinda got tickled at 'Thumbs' Blackburn right at the last. It was recommended that he take a mail order course in Carpentry.

Would like to welcome another new member—Don Newman—we really got a lot of work out of him at the roof raising at the Airport. We could use a few more like him.

is the man in charge. Good job, Doc.

At long last, the Jaycees have recognized the need for a little advertisement of our fair city. Approved as a project will be the erection of four (4) that's right, four 8 x 16 foot billboards proclaiming a welcome to our fair city. There will be one on each main entrance to town. Bob Myers and Larry Glasmyer are co-chairmen on this project. No set date for the erection of these billboards has been set but you can bet it will be real soon.

Jaycees and their wives will be going to Lubbock in February (22 and 23) to attend the Winter Area Meeting of the Panhandle. There will be five clinics held at the meeting that will cover all phases of Community Development. Tentative date for installation banquet is April 18. That is when the officers for next year will be installed. That is, if they are elected on March 26 as scheduled.

That's about it. But one little afterthought. Occasionally the Jaycees are criticized. A wise old man once told his sons how to avoid criticism. His solution—

IT'S EASY TO AVOID CRITICISM—ALL YOU HAVE TO DO IS SAY NOTHING, DO NOTHING AND BE NOTHING.

Jaycees may get the criticism but they also get the job done. JAYCEE JAKE

# 1963 City Taxes Due

1963 Taxes for the City of Dimmitt are due and payable on or before Jan. 31, 1964.

Taxes which are not paid by that time will become past due on Feb. 1, 1964, and will take penalty, with interest to be added until paid.

All property owners in the city are urged to pay their taxes before February 1st and save Penalty and Interest.

## Grain Sorghum in National Spotlight As GSPA Hosts Officials In Meeting

Again Amarillo and the Plains sorghum area was the center of national and international grain discussions this week. Grain traders, export elevator operators and government officials met in two separate meetings with grain producers, cattle feeders, grain brokers, transportation men and market news representatives. Bill Nelson, Executive Vice President of Grain Sorghum Producers Association, host of the groups, said sessions of this type on international trade policy, transportation decisions and market information are of increasing importance to stability of farmer income as more grain is being produced, handled and fed in the open market under the effective influence of the current feed grain program.

In one session Gene Grummer, Assistant to the Director of Merrill Lynch, Pierce, Penner & Smith, Inc., New York, conducted a seminar on Futures Trading of Grain Sorghum under terms of the newly established Futures Contract, which named Amarillo, Plainview and Lubbock delivery points for all grain traded on the Chicago Board of Trade. It was disclosed that since the Grain Sorghum Futures contract was established in Mid-October that an almost ideal trading price has existed active price fluctuation and higher than normal "free stocks" of grain, yet very little trading has taken place.

Four problems related to the lack of trading were discussed and steps to relieve them mapped. They were (1) failure of local, national and international market news services to report grain sorghum futures in daily quotations; (2) unrealistic bonding requirements by the Board of Trade on grain warehouses to be eligible for delivery points; (3) price quotations based on freight paid to Gulf ports on trades which might actually be completed for delivery to West Coast points; and (4) lack of understanding of provisions of the trading in grain sorghum futures.

In other conferences Grain Sorghum Producers Association representatives met with George Koppel, Vice President of Koppel Bulk Terminal at Long Beach, California; Jim McJunkin, Transportation and Development Manager of the Port of Long Beach; Arnold Ferguson of the Commodity Credit Corporation of Kansas City, Missouri, along with local grain dealers and transportation officials to develop pricing, transportation and shipping policies which might help the grain sorghum area to regain fair competitive position with corn moving to the West Coast under recently announced freight rate reductions from the Mid-West. Currently approximately 117 million bushels of grain sorghum moves from the Plains area to the West Coast domestic and export market.

## Senator YARBOROUGH'S REPORT

Dear Fellow Texan: President Lyndon Johnson has submitted both his economic report and the proposed national budget for fiscal 1965 to Congress.

The economic report showed that in three years of growth the nation has gained \$100 Billion in its gross national product with the total going from \$500 Billion to \$600 Billion in that three years.

Unemployment is still the number one economic problem in this country, despite the general high prosperity.

The economic report is a dramatic reminder, with its proof of unemployment, that a tax reduction is badly needed to continue expansion, and, if possible, to speed it up.

Otherwise, where is the hope for the 36 Million Americans who live in a relative state of poverty? When one out of every five Americans fights a grim battle for physical existence, action is demanded.

In his call for a federal government budget expenditure of \$97.9 Billion for the fiscal year 1965, the President has reduced the 1965 budget by \$900 Million under the 1964 budget.

Much of this reduction is in defense spending, or fields closely related to national security. Most of the reductions were in this field because 61 cents of every tax dollar goes for national security. Of this 61 cents, 44 cents is spent for national defense; four cents out of every dollar for the space program; two cents for international affairs; and seven cents out of every dollar for fixed interest charges on the public debt, mostly from old defense spending.

This leaves 39 cents of your tax dollar which is divided: four cents for agriculture; 24 cents for Social Security and other trust funds; and 11 cents for all other government costs such as the courts, the executive, the Congress and the various departments and agencies.

Despite defense cost-cutting, in the past three years we have achieved a 100 percent increase in nuclear weapons; a 60 percent increase in nuclear forces in Western Europe; a 45 percent increase in combat-ready army divisions; a 35 percent increase in Air Force fighter squadrons; a 75 percent increase in air lift capability.

This, in brief, Fellow Texan, is

## SPORTS AFIELD

By Ted Kesting

The antelope jackrabbit is found from Mexico north into southern Arizona. Its flashing white sides when running remind one of an antelope's rump—thus the name.

—Sports Afield.  
Clean, dry socks are the first line of your defense against foot breakdown. Enough pairs should be taken on a hunting or camping trip to that they may be washed at regular intervals, then blocked on towels to prevent shrinkage. Insoles should receive the same attention that you give socks.—Sports Afield.

The worst thing that can happen to your boots is to be subjected to improper storage. Boots should be cleaned before storage, filled with a paper stuffing and hung in a cool, dry place. This allows a complete circulation of air on all sides of the boots.—Sports Afield.

Marsh rabbits and their closely related cousins, the swamp rabbits live through our southern states and into Indiana and Illinois. They are coarse-haired and are able to swim or dive with great ability.—Sports Afield

what your tax dollars will be spent for under the new budget.

### In Elevators

and in Long Distance, too

Service is Fastest When You Call by Number

The elevator operator knows exactly where to stop when you call your floor by number! Your telephone operator, too, can give you better long distance service—faster service—when you call by number.
