Baird's Ronnie Ault set two records and repolee that it is Easter. Some and throughout the Christian world people will worship and rejolee that it is Easter. Some and resolve the day to a fashion parade when we should remember the very first Easter parade that took place at dawn that Sunday morning with devout people making a sorrowing procession to the tomb of their crucified Lord. That is true, and the celebrating should never done the clebrating should never dim the celebration but commercialism isn't all that big boog-a-boo you might think it. Like one educator we know of we agree that commercial folks are to be applauded for adding to the popularity of holidays and now if you'll only think of some way to make church-going imant on the other weeks of the eternally grateful for it. Congratulations to the Baird Public Schools for winning the eternally grateful for it. Congratulations to the Baird Public Schools for winning the eternally grateful for it. Congratulations to the Baird Public Schools for winning the eternally grateful for it. Congratulations to the Baird Public Schools for winning the eternally grateful for it. Congratulations to the Baird Public Schools for winning the fine record).

Anyone who's looked around knows the majority of Chevrolet models—6's and V8's together—list for less than comparable models of other low-priced cars. But the price tag alone is only one of a whole raft of reasons a Chevy does better by your dollars.

Chevy does better by your dollars.

Nothing near Chevy's size and price can match the Full Coil cushioning of its ride, or the fine, finished workmanship of its Body by Fisher. That even applies to some cars that cost a lot more. You're up in the higher price brackets before you find a car that moves as quietly as a Chevrolet or offers the inner space that Chevrolet does.

Or look at the extras Chevy gives you — at no extra cost—that others in its class can't offer at any price. Shock-cushioned steering. Safety Plate Glass in every window. Keyless locking of all doors. Crank-operated vent windows. Chevrolet offers the widest choice of power teams, too. Drive a Chevy just once.

You'll have a tough time settling for anything less.

Launch Missive Missile

NEW YORK—What else is new in the space age? Well it's the missive-missle, an item first dreamed of seventy years ago. And like our space program it has had its ups and downs.

This is the story of the ball

like our space program it has had its ups and downs.

This is the story of the ball point pen.

John Loud of Massachusetts is credited with having developed the ball point pen in 1890. Yet it wasn't until the early 1940's that a man named Biro, an Argentinean, obtained the first commercial patent.

And it was only 15 years ago that ball points hit the American scene with such impact that the pens were selling at upwards of \$15 — and hard to get at that. Within a year the bubble burst. The ink in the new pen was faulty and the market turned down until it was almost as low as the face of a new buyer.

Then in the early 50's the Hung arrian scientist, Fran Seech, provided a remedy for the alling pens by developing a quick dry permanent ink. His discovery catapulted the ball poin:

""Teague came up with a pen point.

Promptly dubbed the "Golden Satellite" by Scripto the unit is now being marketed throughout the nation.

So if the maliman complains that more missives are being written now than ever before, it is probably well to remind him to complain Loud — John that is.
