Jeanne Lewis of Nashville, Tennessee, and Mrs. H. B. Lewis of Joaquin are visiting in the home of Mr. and Mrs. Carl Lewis.

Volleyball girls played the Ballinger sextet last Thursday night in two fast and furious games. Norton's first team lost by a score of 49-13, while the second team, well, it did likewise, with a score of 39-23. The team went to Bronte, Wednesday night.

The annual pictures arrived last week, at long last!

The volleyball team expects to attend the Paint Rock tournament this week-end. Power to you!

The Wingate basketball boys and volleyball girls came rollicking in last Tuesday night, but the Norton girls did things up right with a score of 68-13. The boys repeated the victory, with the first team winning by a score of 22-20, and the second team echoing the win with a score of 8-6.

TIME . . .

By Mrs. R. T. Whitehead

The most precious of all possessions is time. It is a gift from God. Every day you have less. Every second wasted you can never replace. Time is the most democratic of all properties. Every human being is a millionaire at birth, every one ends up as a pauper. In time, what you buy with it depends on you. Time can be exchanged for failure or success which ever you prefer. How much interest are you drawing on the only real capital you have? Time is the only thing money will not buy. Time is the only thing we will never have control of.

When a moment is gone you can never get it back, and God has given no promises - some have a long time, some are cut short. Let us take an inventory and see how much of our most precious possessions we have wasted. TIME.

BUS DRIVERS' CLUB MADE HAPPY!

Thanks to the generosity of shop foreman O. L. Pittman, who is also president of the Bus Drivers Club - the business men of Bronte will not be troubled as much in the future as in the past.

Pittman has purchased and installed a new radio in the bus shop, for the amusement of bus drivers only. The Club is also looking forward to other improvements.

Businessmen - please pass the cigars to Oliver!

COKE COUNTY PLACES HIGH IN ANGELO SHOW

In the lightweight pig division, with pigs weighing under 200 pounds, Wayne Arrott of Tennyson was first, and was also the reserve champion. His stock was sold to Gandy's for \$2 a pound. In the same division, Mit Arrott won the showmanship award.

For pigs weighing over 210 pounds, Charles Arrott of Tennyson placed third with his pig.

In Boys Fat Lambs, class 11 - cross bred lambs with no weight classification, Bobby Phillips of Divide was second, and Lester Boyd of Wingate was 11th.

Charles Arrott also placed fifth in the registered Aberdeen-Angus - class 96, heifer calved between Jan. 1, 1945 and May 1, 1945.

Mit, by the way, also won in the Coke County show, so surely did all right.

The boys all appreciated the purchases made at the show, which included Gandy's purchase of the pig, San Angelo National Bank, M-System, Modern Way Food Market, and Manitzas Bros. purchased calves, and Hemphill-Wells Beauty Salon bought a pig.

CHALK DUST . . .

FROM BRONTE HIGH SCHOOL

Thump, thump! Bang, bang? !!! What's that? Just Pete Taylor going to lunch, or Dolan Mackey going to football meeting, or Cecil Coalson hunting for his lost history book, or Howard Smith chewing gum, or Mr. Dean wielding the belt in the office, or J. S. Hageman snatching paper out of his typewriter.

Campus chatter: Myra Lou Kevil reports that she is enjoying English classes more under Flores that ever before.

Jim McCrary says that his dad is very optimistic. His dad gave him an electric razor for his birthday.

Those sporting new hair-do's featuring bangs: Billye Gunn, Katy Cutchen, Patsy Luckett, Vera Richman.

Joe Lee Scott always accidentally sits near Jewel Dean Latham, Bobbie Vaughn near Dorothy Ruth Stephenson, Glenn Blake near Martha Boatright, Travis McCarty near Nola Lawrence. Wonder why?

"Brother Goose," in Bronte Gym, March 18, 8:15 p. m., 20c, 35c.

Coach Cassiot announced that the spring football training starts Monday, March 11. The squad has new practice suits and new game suits, and it looks as if the boys might win some laurels next season.

Bronte may well be proud of the attitude of its coach and administration toward sports. They place scholastic attainments first, athletics next. To be eligible for football each boy must be meeting four classes and passing at least three of them. Those schools that "give" grades to football players and "doctor" the records of ineligible members are doing their boys more harm than good. More power to Bronte Longhorns.

Abilene Jaycees Visit Bronte

Four outstanding members of the Abilene Junior Chamber of Commerce visited with officers and directors of the Bronte Community Service Club last Friday to discuss the possibility of establishing a Junior Chamber of Commerce in Bronte.

Dues would be \$1 per year, which would include the official Jaycee magazine and other material as needed.

The Jaycees is a civic service organization dedicated to two purposes: (1) improvement and development of the community, and (2) improvement and development of its individual members to train them for business advancement and civic leadership.

Oliver Howard, president of the Abilene Jaycees and cashier of the Citizen's National Bank, declared that "no body tells you how to run your organization - it's in your hands and you do as you like. But if you want pamphlets and other informational material, the State and national organization is ready to help you at any and all times."

Accompanying Howard were J. W. Hooker of the West Texas Coffee Company, Harvey Kimbler of the W. T. McClure Machinery Company, and D. R. De Rusha, principal of Draughton's Business College.

Community Service Club officials conferring with the visitors included Hubert Whitt, C. E. Bruton, J. T. Henry, Bob Knierim, Frank Keeney, Otis Smith, and Marcus Tubbs, with the editor listening in. Club officials will report to members of the Service Club tonight concerning the negotiations, and expect to sound out sentiment regarding the plan proposed by the visitors to join up with the Junior Chamber of Commerce.

Mrs. Dale Stephenson has accepted a position with the AAA office. Ankie Davis is now working for the Looney Lumber Company.

Skinny Adams has been working harder than usual, but says he enjoys it.

ENLISTMENTS RISING

"The rush to join the peacetime Army is on," says Capt. Roy E. Mundell, commanding officer of the local Army recruiting station.

286 men enlisted through this station during the Month of February, 17- and 18-year-olds were in the majority and the oldest man enlisted was 35.

With the exception of 42 who enlisted for 18 months and 5 who enlisted for 2 years, all enlistments were for 3 years. There were 25 re-enlistments.

Air Forces service in the European Theater is still preferred as attested by the 150 who made that choice. 20 chose the Pacific Theater, 10 the Caribbean Defense Command. Also preferred were the Field Artillery, Transportation Corps, Military Police, Medical Corps and Infantry.

19 men took the oath on the 25th of February, making the highest total for any one day in over two months. Says Captain Mundell, "Simple arithmetic proves that the average man, unless he has a college diploma, is better off in the Army. Even a private's pay is better than the money some men with families can command outside. A man having a wife and three children came in recently and said he was reenlisting for that very reason."

Enlisting from Robert Lee was Raymond Millican.

NEWS BRIEFS

H. W. Stanley, Manager of the Trade Extension Department of the San Antonio Chamber of Commerce, wrote this week for information about the Bronte Community Service Club.

City Council failed to meet Tuesday afternoon at 5:00, as Barney Modgling and Emmett Caperton went to San Angelo to see about a pump to be used during the digging of the new well, and Mayor R. E. Cumbie was out of town, hence no quorum.

John Olive, of the Soft Water Service Company of San Angelo, is now negotiating for a representative in Bronte to handle his line of products. Inexpensive and easy to install, the system provides 100 per cent soft water at all times. Welcome in, John.

AIN'T LIFE FUNNY!

Human nature, bless our hearts, reveals itself in so many ways that we sometimes pause to wonder. Let's just consider a few examples: We want no Government interference on prices, but if the Government regulates my competitor and his prices, that is fine; in theory, no parking in the middle of the street is fine, but if we can't find a parking place ourselves, then it is permissible; our schools should maintain high scholastic standards, unless the football star is about to fail, then an exception should be made, sayeth those who may have bet on the outcome; democracy is fine as long as my candidate wins, if not, somebody ought to knock some sense into the heads of the voters; as a pedestrian, we will walk where we choose, as a driver — those dumbbells better get out of my way; yes, we believe in supporting the church, provided the other guys do it; now if we were running the government, we'd do it this way, but wait a minute — did we pay our poll tax so we can express our opinion; sure, liquor is fine, we say with hiccoughs, but better not let me catch my kids using it; and how often do we spend money we don't have, for things we don't want, to impress people we don't like?

PVT. JESSE EADS WRITES OF EXPERIENCES

The editor was happy to receive the following letter from a Bronte boy, Pvt. Jesse Eads, son of Mr. and Mrs. W. J. Eads of Bronte:
Fort Bragg, N. C.,
March 1, 1946.

Dear Editor:

The country here at Fort Bragg is very beautiful with lots of tall pine trees. It is also a sandy country. Surely is a nice place to be, but I had rather be in the good ol' Lone Star State of Texas. However, the Army puts you where it wants you to be.

I don't know of any branch of the service I had rather be in than the good old Field Artillery. The Army is a pretty good place for young boys like me and others to be.

I am in the 4th Platoon, which has the name of "Blood and Guts," guess the name fits us pretty well.

I wish some of the good ole Bronte gang were here with me for that would be fine. I will be proud when I can come home and visit the old home town again. May God bless you all.

Pvt. Jesse Eads, Jr.

Glad to hear from you Jesse, keep in touch with us again.

NOTICE TO VETERANS OF WORLD WAR II

I have been requested by Mr. John T. Godsey, Jr., contact representative of the Veterans Administration to announce that he will be in Robert Lee in the mornings of the 2nd and 4th Saturdays of each month beginning March 9th and will be available to all veterans and their dependents who have any questions or problems concerning their rights and benefits. You may see him in the office of the County Judge.

He also requested that I make it known to the business men of Coke County that they are eligible to take part in the apprentice training program of the Veterans Administration in having their business placed on the approved list of the Veterans Administration for apprentice training.

Respectfully yours,
McNeil Wylie,
County Judge.

SIMS RETURNING

T/5 Thomas L. Sims, of Bronte, Texas, is one of 1,400 Army veterans returning to the States aboard the S. S. Kingston Victory, which left Yokohama, Japan, February 6, and is scheduled to arrive in Seattle about February 21.

Clyde D. Barber, Jr., gunner's mate third class, has recently been discharged from the U. S. Navy.

ABOUT PEOPLE YOU KNOW

R. L. Wrinkle dropped in the other day with some interesting bits of news. Seems he was born in Hickory County, Missouri, in 1875, and came to Texas when he was two years old. From 1900 to 1916 he lived in Callahan County, then moved to Irion County, where he stayed from 1916 to 1920. During the latter year, he moved to Coke County, and is still around having a good time, 26 years here now. Now farming near Bronte, R. L. has five boys, all of whom live around here except Tipton, who is still in Callahan County. Elbert lives three miles north of Bronte, and his wife writes the Kickapoo Baptist Church news each week. Arthur also lives in that area, while Bill and George live in Bronte.

During February, several young men from this area enlisted in the U. S. Navy. Included among the number were Billie Dan Labenske, Theron Emmerson Tidwell, Charles Vernon Blake, and Troy Joel Richman. Lonnie Ray Forman from Maverick was also enlisted, according to reports from the U. S. Navy Recruiting Substation in San Angelo.

Pfc. Leonard Basquez, son of Mr. and Mrs. Juan Basquez, arrived home recently after receiving his honorable discharge from the Army. Having spent 14 months in the European theater, Leonard was really happy to get back. Mrs. Basquez, the former Miss Frances Marquez, and their two children, Frankie Ernest and Linda Gay, really welcomed him home.

Paul Minjarez, Richard Revez, and Manuel Cerda have recently been discharged from the armed services. Glad to see you fellows back.

"Uncle John" Butner has returned from Wichita Falls, and seems mighty happy to be back in God's country. "Couldn't even hear a rooster crow up there," he declared, "and had to get back here before I could listen to a calf bawl, too." "Uncle John" snorted. He's now living with his son M. A. Butner, and was having a time last week chatting with L. W. Beaty. Happy to have you back, "Uncle John," and want to talk with you some more when you get the time.

Uncle Sam Says

—Son, what you want to do 10 years from now? Go to college, I bet. Sure. Well, if you bought one Savings Bond a month from now till then, you would have \$3,000. Would help, wouldn't it? That's just why I want your Dad to keep on putting \$18.75 every month into bonds. What say, we talk plain to him like that?

ALL THEY ASKED WAS AN EVEN BREAK

Building a new country was no easy job. But there were men and women willing to tackle it—to turn their backs on the government managed way of life and their faces toward new frontiers. All they asked was an even break.

Free enterprise is another way of saying "an even break." It's the basic American principle of vision and private initiative. Just give an American an even break—a chance to get ahead—and he'll go on from there.

But when government goes into business, in competition with its citizens, the American ideal of an even break is destroyed—for government in business enjoys special privileges that are denied the people.

Take the case of government-owned power plants, for example. They pay no taxes; get money from the U. S. Treasury at little or no interest; make up losses out of the pockets of the taxpayers.

On the other hand, America's business-managed power companies—owned and operated by millions of folks like you—are on their own. They pay their full share of taxes, and they pay fair interest on loans.

The same forethought and experience which furnished electric power for a global war will assure America dependable—and cheap—electric service for a post-war world. There are still new frontiers in electric living to be opened. And business men can do the job better than bureaucrats.

JET PROPELLED AUTOS

By John Little

Quite successful results have been obtained recently, using the so-called "jet engines" as the propulsive force for aircraft. To presume that this type of power could be utilized to drive an automobile may seem rather fantastic, but nevertheless —

The comparative ratio of horsepower and weight between aircraft and automobiles, would lead us to believe that a much smaller engine, of any type would be required to move a vehicle of a given weight, at a stated rate, across the earth's surface, than would be necessary to propel another vehicle of the same weight, at the same speed, and to keep it suspended above the earth. Working from this assumption we will conclude that the jet engine to power an automobile would be a rather diminutive device.

The principle of the jet engine is briefly this. Air is drawn through the open end of a tube by a rotary compressor and crowded into a rather confined space called the combustion chamber. In this chamber a fuel of rather low volatility is sprayed, and ignited. The resulting combustion, while not a sudden explosion, produces an immense quantity of hot and expanding gases which escape as a blast from the rear of the tube. In doing so, the gases must pass through the vanes of a turbine causing it to rotate, which in turn drives the compressor mentioned at the beginning of the cycle. The continuous blast of hot gases causes a reaction on the tube, similar to the recoil of a gun. Therefore the tube is pushed forward with very nearly the same force that the gases have as they are blasted from the combustion chamber.

One drawback to this type of engine in an auto is the heat and force of its exhaust. If the engine were mounted at the extreme front of the vehicle, and sufficiently small in size, it could be built to exhaust into a comparatively larger "blast tube" running beneath, and the entire length of the vehicle. This tube would have to be double-walled, with a vacuum, or some insulating material between the walls to prevent excessive heat within the interior of the vehicle. A much smaller unit at the rear, blasting forward would act as reverse power, and also as a brake.

WHAT IS CHIROPRACTIC?

The science of Chiropractic recognizes the mechanism of natural healing, and seeks to encourage its most efficient operation. We consider primarily the structure of the body, because disturbed structure and spinal nerve pressure brings about a chemical unbalance within the body.

Some believe the chemical unbalance should be treated by the introduction of new chemicals to the body in the form of "medicine," and, if something is wrong with your body, chemically, then add other chemicals. Chiropractic goes a step beyond this and corrects the cause of the chemical unbalance.

Why did the body become chemically unbalanced to begin with? Why do some people become sick? Why do others not become sick? How can Chiropractic help sick people get well?

The chiropractor meets the problem of disease through the physical and mechanical approach. He locates, by means of the x-ray, the misaligned bone in the spine that is causing pressure on nerves. An adjustment relieves this pressure upon the nerves of the spinal cord — then the proper flow and amount of this vital nerve force may reach and repair the organs which may be involved, thus restoring balance and function.

Simple, isn't it? With respect to your health, it is best to go to a chiropractor that has modern and up-to-date equipment. You would not take your car to a garage that had no equipment, nor would you take your radio to a shop if the owner had nothing with which to repair the instrument.

In our clinic, we do not rub the patient, nor do we massage him — we find out by means of the x-ray where his spine is out of alignment — by means of the neurocolograph we find out how much it is out of place — then we adjust the spine to bring it back to alignment. Our equipment is necessary for you and your health — you will get the best results possible by using it.

Chiropractic will help you get well, you cannot say you did all you could to get well unless you tried Chiropractic. Let us help you — phone NOW for an appointment, for the sooner you come here, the sooner you will find yourself getting well.

Spray or Dust — For 'Peace' In the Garden

—Photo Courtesy Ferry-Morse Seed Co.

Watch for destructive insects as soon as the first little leaves poke through the soil in your garden. They are unusually ravenous for tender young foliage, shoots, and buds, and the smart gardener will be on hand with the proper control even before the pests show up.

Two types of insect are well known nuisances — those that suck the juices or sap of the plant, as aphids or plant lice, and those that chew or bite off bits of the plant. The work of the first is seen in general droopiness and unhealthy appearance of the plant; the work of the second shows up in actual riddling of the leaves and other plant parts.

For sucking insects the spray or dust must hit and cover the insect, actually smothering it. Stomach poisons are required for destroying chewing insects. The material is dusted or sprayed thoroughly on all surfaces of the plant so as to make a deposit. When the insect starts to eat the plant, it also takes in some of the poison and is killed.

Either dusting or spraying can be effective if properly done with a good insecticide. Now that the war is over, many of the old brands and various new ones will be plentiful. You may want to adventure with some of the new ones, but always follow directions. In small gardens dusting is perhaps even easier than spraying. Here's a simple apparatus for applying insecticide dust which you yourself can easily prepare:

Take a square of cheesecloth, a strong string, and a slender stick. Spread the cheesecloth on a flat surface and pile the insecticide dust in

THE INTERNATIONAL SUNDAY SCHOOL LESSON FOR MARCH 10, 1946

"NATIONAL DISASTER AND DELIVERANCE"
Memory Selection — "The Lord is my helper, and I will not err." Hebrews 13:6.

A nation that did not follow God's teachings and principles faced national ruin and disaster. The result of disobedience was ruin, for a people determined to do evil cannot prosper over any length of time. Obedience, however, brings deliverance, for if we repent and turn to the Lord in times of trouble, He will help us. The condition of security is obedience, and if we obey, then we may be delivered.

ANY PEANUTS TODAY

According to Leonard Fletcher, licensed grader for the Commodity Credit Corporation, 199,642 pounds of peanuts were purchased last year in Coke County, and he paid \$13,155.56 for them. Quite a record! You folks elsewhere maybe didn't realize what a place Bronte is, and what a place Coke County is! Peanuts!

Furthermore, the average price per ton was \$131.55, and the average grade was 62 per cent mature kernels. To top that off, the average amount per acre was \$20, and the crop was shipped to Portales, New Mexico.

Moreover, 350 acres are yet to be reported on, according to Leonard. "We had a fine crop," he noted, "for peanuts are a real source of revenue to the people of Coke County."
