PATTERNS FOR PROGRESS IN COMMUNITY DEVELOPMENT

Where can our town see an example of Community Development?

WTU says Childress is a good example . . . many projects are underway.

Water is a problem with many West Texas communities, but Childress is solving it with an ambitious program. In connection with neighboring towns, there is a \$6 million dam and reservoir starting soon . . . under construction a \$4 million pipeline from the water supply to the city . . . and a pipeline system in the city. Add such things as a remodeled City Auditorium with convention facilities . . . vapor lamp street lighting downtown and on highways through town . . . remodeled Chamber of Commerce offices . . . over \$400,000 in Church construction . . . new lounge at the Airport . . . and modernizing of many business buildings. Scheduled for the immediate future are a school bond election . . . expansion of State buildings . . . and a new hospital. The Childress record is a PATTERN FOR PROGRESS in "community development," improving chances for continued economic growth and attraction of new industry plus making it a better place to live, work and play. Growth conscious towns are invited to contact their local WTU manager for assistance from our area development representatives.

Zing into spring! Chevrolet Impala

Chevrolet Impala Super Sport Coupe—one of two bucket-seated beauties for '65.

People who buy other big expensive-looking cars get one thing you won't (big expensive-looking payments)

It looks like a big car. And is—by almost any standard you want to apply.

Width? Nobody builds a car as much as one inch wider. Length? It grew three inches this year. Roominess? Every closed model's got three inches more shoulder room, front and rear, and more leg and foot room up front too. Luxury? Nice little touches like the look of mellow walnut across the Impala's instrument panel. And big touches. Like the fineness of the same Body by Fisher workmanship that makes some of America's most

expensive cars look so expensive. How about the ride? Chevrolet engineers took the Jet-smooth one and smoothed it out even more this year. Also made it more stable by widening the wheel stance. Price? That's where Chevrolets fall way short of the other big expensive-looking cars. But we wouldn't have it any other way. Would you?

One last question: How soon can you make a good spring buy on a Chevrolet? One last answer: Just as soon as you can get down to your Chevrolet dealer's.

HIGH TIME TO TRADE AT YOUR CHEVROLET DEALER'S

Operation Headstart

The group decided that immediate action should be taken to start a program this summer for pre-school children who may have trouble with first grade work next September. This program is, to a large extent, for Latin American children who are lacking in knowledge of spoken English, but other children with other problems may also be helped. This part of the program is called Operation Headstart. Bronte, Robert Lee and Silver school administrators agreed to work out needed details for early submission of applications for help in setting up this program.

Other parts of the program, many of which will depend on the help and cooperation of school officials for successful operation, will be worked on by the six sub-committees, working either together or separately, as seems expedient.
