PORTALES, ROOSEVELT COUNTY, NEW MEXICO, FRIDAY, AUGUST 25, 1916

Number 42

Now Let the Democrats Nominate William C. McDonald and A. A. Jones, the Result, Democratic Success

Democratic Convention Proceedings

The county convention met in pursuance to call of the chairman at 2:00 p. m. August 19th, 1916 at the county court house Portales, New Mexico.

The motion was made and duly seconded that G. L. Reese be made chairman of the meeting and W. H. Braley secretary. Motion properly seconded, A. R. Self, A. D. Smith, S. E. Johnson appointed committee on credentials. No contesting delegates appearing all delegates were seated; also in cases where no delegates appeared parties from such precincts who were present were seated.

The motion properly seconded, James A. Hall, J. J. Pinson, W. O. McCormick and A. D. Smith were appointed committee to recommend delegates to the state convention to be held at Santa Fe, New Mexico August 30th, 1916.

It was moved and seconded that this convention choose twenty-four delegates to represent Roosevelt county in the state convention, to be held at Santa Fe on the 30th day of August 1916 and that those of the delegation thus chosen who are personally present at such state convention shall cast the entire vote of this county no proxies being permitted and that in determining how a vote upon any question shall be cast a majority of those personally present shall control. Upon being put to the house this motion was unanimously carried and it was so declared:

J. G. Tyson; D. K. Smith; W. R. McGill; W. M. Atkinson; G. L. Reese; Arch Gregg; Lee Carter; A. J. Evans; J. W. Ballou; Nolan McCall; D. L. Harding; R. G. Bryant; G. W. Strond; W. H. Brayley; W. W. VanWinkle; J. W. Thompson; A. D. Smith; Zade Woods; Frank Greathouse;

Upon motion duly seconded G. L. Reese, chairman, A. J. Evans, W. R. McGill and R. G. Bryant were selected as committee on resolutions, who report the following:

RESOLUTIONS

The Democratic convention of Roosevelt county, New Mexico, in convention assembled on the 19th day of August, 1916, adopted the following resolutions:

We, the Democracy of Roosevelt county, New Mexico, in convention assembled, pledge our continued adherence to both the National and state administration as upheld and endorsed by the Democrats officiating in those administrations.

We endorse the policies of the president of the United States in his domestic and foreign diplomacy, and his guidance in preventing war between the United States and foreign nations at the same time maintaining the honor and dignity of the United States and we especially endorse his policies in our relations with the republic of Mexico, and in advocating non-interference in Mexican affairs except as a last resort.

We are in favor of the six hundred forty acre homestead bill now pending in Congress, that will multiply successful home builders on what is now largely unproductive public domain, and we favor the elimination from forest reserves of all non-timbered lands and the restoration thereof to the public domain.

We condemn the action of the last Republican legislature in unlawfully unseating the duly elected representatives of the people which was for the sole purpose of giving the said Republican legislature an arbitrary two-thirds majority in order that it might nullify the executive participation

and perpetrate vicious partisan legislation.

We condemn the action of the last Republican legislature for its failure to enact just laws of taxation so that the expense of government might fall equally upon all classes or property and persons within the state.

We cordially and heartily endorse the honest, economical and patriotic administration of our governor, the Honorable William C. McDonald, and all other Democratic state officers; and we congratulate the people of the state of New Mexico on the safe and wise administration they have given them of their public affairs in the new condition of statehood, so that our state has won the respect of the nation in the demonstration of its ability for self government as a sovereign state.

We favor the issuance of bonds and the enactment of such legislation as may be necessary to raise sufficient funds to obtain our proportionate part of the federal aid for good roads recently set apart by the congress of the United States; and we recommend that appropriate legislation be enacted by the legislature setting apart a sufficient portion of the moneys derived from licenses on motor vehicles to provide a sinking fund for the payment of such bonds and the interest accruing thereon.

We favor the enactment by the legislature of a law reducing the conventional or contract rate of interest to be charged on loans from twelve per cent per annum to ten per cent per annum.

Upon motion duly seconded we especially endorse the actions of Governor W. C. McDonald in endeavoring, by the exercise of his veto power, to protect the taxpayers of New Mexico against the excessive salary proposals by the Republican majority of our legislature.

Committee: G. L. REESE.
R. G. BRYANT.
W. R. MCGILL.
A. J. EVANS.

The said resolutions were read and convention unanimously adopted same. No further business appearing convention adjourned, sine die.

C. L. REESE, Chairman.
W. H. BRALEY, Secretary

Got off with Fifteen Years

E. B. Hawkins returned Wednesday evening from Mangum, Oklahoma, where he had been in attendance on the trial of Joe Burton, who last summer murdered Virge Heatly. The facts developed at the trial failed to show any provocation, whatever for the crime, yet the jury brought in a verdict carrying a penalty of only fifteen years imprisonment. The facts of the murder were that Mr. Heatly was sitting on his horse when Burton walked up to him and began shooting, four shots taking effect, three of which would have been fatal.

Picnic at Emzie

There will be a two days picnic and barbecue at Emzie, the new town three-quarters of a mile from Redland. Mr. Roberts the owner of the townsite, says that there will be barbecued beef for everyone and that all kinds of games and sports have been provided. He wants everyone to come and enjoy themselves. The dates are Friday and Saturday, September 1 and 2.

Mr. and Mrs. W. H. Ball and George Ball, and W. N. Smiley and family arrived in Portales the last of the week to visit with the two former. Mr. and Mrs. Ball have been visiting the latter at Stafford, Kansas.

THE BIG BARBECUE WAS A HUMDINGER AND SO WAS RAIN THAT HAPPENED AT SAME TIME

Rain, Mud, Music and Barbecue, Combined With an Immense Crowd of the Best Natured People in the World, Tended to Make the Portales Picnic a Howling Success

The Roosevelt County Creamery is Completed and Everything Ready to Commence Operations. Experts Say That There Are Larger Creameries But None That Are Better. Will, Probably, Open for Business on Monday, August 28th

The barbecue and picnic last Saturday was the biggest success in the history of Portales. It was a success in more ways than one. Shortly after the crowd commenced to gather in the morning it began to rain, or sprinkle, and continued intermittently until well into the afternoon, when the rain began to fall in torrents. The crowd appeared to pay no attention to the wetness, but milled around, munching barbecue and jollyng each other. It was the best natured gathering the writer has ever seen. Isaac Barth, of Albuquerque, was billed as the principal speaker but failed to arrive, and T. E. Mears delivered the address. He took the county commissioners to task for appropriating money for the county and state fair and gave those present to understand that the farmers of the community could flourish comfortably without the aid of the banks, but the banks were dependent for their existence upon the farmers. There appeared to have been no objections to the county appropriations for the California fair. The audience at the speaking was confined, largely, to ladies and the address was well received and given close attention. The sports were pulled off in conformity to the program, and proved a source of much merriment. The ladies band, of Clovis, was the chief attraction, and though the streets were muddy and the down-pour of rain almost incessant, the ladies paid no particular attention to these inconveniences, but played as though everything was merry and the goose hung high. Everybody complimented this band of ladies and their music was well worthy of all the encomiums. Among the distinguished visitors were Messrs. T. J. Guilfoil, of Albuquerque, and G. A. Davisson, of Roswell, who both appeared to have a good time despite the dampness. Taken all together, the day was an enjoyable one and well worth the trouble and expense and is one that will be long remembered by the people of Roosevelt county.

Roosevelt County Creamery Completed

The creamery has been completed. Whatever the origin of the fire that destroyed the old one, the stockholders and the farmers of Roosevelt county have responded to the call, and the present brick building now stands in the place of the one burned, while the very best type of machinery that money can buy has been installed and everything is now ready for business. Unless some unforeseen accident happens, operations will begin on next Monday morning. President J. P. Deen informs the News man that there is but little of the stock unpaid at this time, and that he expects that this will all be taken up by the time specified to open. Robert E. Sorenson, an experienced butter maker who served five years at the manufacture of butter in Denmark, one year in Germany and three and one-half years in the United States, has been put in charge of the manufacturing department and will receive the cream, make all the tests and manufacture it into the finished product. He has a diploma from the Iowa state fair commission

which shows that the product of his labor won the first prize at that fair. You will find him courteous and obliging and just as accurate as lies within human effort to be. He has been some time in Portales and is well known. The creamery starts out with what appears to be a certainty of success from the start. It is understood that a market has already been established for the entire output and that there will be no risks to run on the sale of the product. The old name, "Alfalfa Brand Butter," will be continued, it having established a reputation for itself in the markets of the country. The capacity of the plant is one thousand pounds per day, one churning, however this could be multiplied by six with the same equipment now in use. Every thing has been provided for manufacturing butter under the latest scientific sanitary conditions and those who buy the product of this creamery may rest assured that they are getting something in which there is not the least particle of dirt or unsanitary substance. The creamery will

be operated by the directors and stockholders and whatever of profit there is will belong to the farmers who are responsible for its existence. It is hoped that the farmers who are milking cows will give their loyal support to home institution in preference to any foreign corporation, and it may be safely stated that if they do this the profit will all be theirs. Stand by your home institutions and they will stand by you.

Judge Lindsey Gets Nomination

The following parties were nominated at the Republican state convention which was held at Santa Fe this week.

For United States senator—Frank A. Hubbell of Albuquerque.

For representative in congress—B. C. Hernandez of Rio Arriba.

For governor—Holm O. Bursum of Socorro.

For lieutenant governor—Judge W. E. Lindsey of Roosevelt.

For justice of supreme court—Clarence J. Roberts of Colfax.

For secretary of state—Gilberto Mirabal of Valencia.

For state auditor—W. G. Sargent of Rio Arriba.

For treasurer—Gregory Page of McKinley.

For superintendent of public instruction—J. H. Wagner of Dona Ana.

For attorney general—Frank W. Clancy of Santa Fe.

For commissioner of public lands—R. P. Ervian of Union.

For corporation commissioner—Malaguas Martinez of Taos.

For presidential electors—Juan Ortiz of Santa Fe; L. C. Hill of Dona Ana; C. H. Hammond of Curry.

Scheme to Work the Streets

Last Monday morning the business men of Portales met in the office of W. H. Braley for the purpose of devising ways and means for working the streets of Portales. Many suggestions were made but the most feasible one was for the citizens to request the county road board to allow the town to use that part of the street fund as is collected in the city for work within the city. Clovis has such an arrangement as have many other towns in the state. Also W. O. Oldham, Ed J. Neer, Mr. Hoagland, R. L. Blanton and J. B. Priddy were appointed as a committee to take whatever steps they deemed necessary for the purpose of working the city thoroughfares.

For Sale

Block No. 4 in Leach addition containing five acres of land. Also lots No. 7 and 8 in block No. 42 of the original town. Will take live stock in exchange for any of this property. Address P. W. Price, Hereford, Texas.

Dr. Johnson and family left Tuesday for a three weeks trip to eastern points, and will likely have another chiropractor with him upon his return. The doctor says he has worked too hard the past year, and must have help.

W. Latney Barnes, big realty dealer of Amarillo, was here this week looking after some business interests he has here. Mr. Barnes owns some very valuable lands in the Valley.

J. B. Priddy, Joe Moody, Carl Johnson and W. T. Roach, this week shipped two cars of hogs to the Fort Worth markets. Mr. Roach accompanying them.

J. B. Priddy, managing partner in the Warren-Fooshee store at this place, left Thursday morning for the eastern markets.

A. A. Beeman, cashier of the First National bank of Elida, was a Portales visitor this week.

Miss Mattie Doss Hightower, of Roswell, is in the city the guest of Miss Fannie Williamson.

Peaberry coffee, 41-2 pounds for \$1.00, at People's Store.

To our Friends and Customers

It occurs to us that it would be a good stroke of business for everybody who possibly can to plant a little wheat. I understand that you can get the seed-wheat from the Leach Coal Company. If Curry county, adjoining us on the north, can raise wheat successfully every year, there is no reason why we cannot do the same thing. You readily understand that this makes you a good winter pasture and helps you in the dairy business as well as tiding over some of your poor cattle and if the season is favorable you should get a crop of wheat next summer.

Don't have for an excuse that the jack-rabbits will get it, but get your seed and prepare your ground like you expected to raise wheat and plant a few acres. If you have no drills sow it by hand. As I under it, you will have to act promptly on this, as wheat does best in this country sown not later than September 15th. I do not think it is necessary to argue this question but merely wish to call attention to it and I know you will see the wisdom of sowing some wheat.

First National bank of Portales.

By W. O. Oldham, President.

The above suggestion by Mr. W. O. Oldham is a good one and should be followed by every farmer in Roosevelt county who has wheat land, and all this soil will raise good wheat except possibly, that which lies immediately in the sand hills. It is a good proposition if only utilized for pasture. Your cows will give just as rich and just as much milk when pastured on wheat as they will when turned into an alfalfa field. Cream is a cash product and one that pays better than any crop you can raise. With the present season in the ground there can be no question of getting a splendid wheat pasture and, with just the ordinary rains that we always have in the early spring, but little chance is taken of a grain yield of twenty to thirty bushels per acre. We now have a new elevator and the best of facilities for caring for and marketing your yield and this wheat crop as a side issue cannot help but put many good dollars in your pocket.

Good Rains

It began raining in Portales last Saturday, continuing most of the day. It also rained a part of Sunday and Monday and, practically all night Monday night. It was general all over the county and there must have been nearly five inches of water fell. The farmers are happy and the cow men are tickled to death. This assures plenty of feed, a considerable amount of grain and sufficient grass for all the stock here. Already there has been a wonderful improvement in all kinds of plant life and the grass is good at this time.

E. L. Hinton returned Thursday from Kansas City, where he had been with a couple of cars of hogs for W. F. Faggard. They were a mixed bunch of hogs but brought good prices, really much more than was expected when they left here. Mr. Faggard will probably ship two more cars next week, as they seem to be going up all the time.

Jim Warnica has just installed a new steam pressing machine, the very latest thing out. Jim says that it cost a pile of money but that it will enable him to do just as high class work as can be done in the largest cities.

Messrs. A. A. Rogers and G. W. Carr made a business trip to Albuquerque this week.

CIUDAD JUAREZ

STREET SCENE IN JUAREZ

CIUDAD JUAREZ, the scene of the recent important events in connection with the trouble with Mexico, is situated on the right bank of the Rio Grande, directly opposite El Paso, Tex., and 1,223 miles north of Mexico City. The very name of the city of Juarez suggests noteworthy events in the history of the southern republic, and the conferences which have been held there recently by the representatives of the military forces of both the American and Mexican governments add another interesting chapter to the community's annals, says the National Geographic society bulletin.

For more than 200 years Juarez was known as El Paso del Norte (the pass of the North), and it was not until 1885 that the city was renamed in honor of one of Mexico's greatest statesmen and patriots, Benito Juarez, who established his capital here during the troublous times when Napoleon III of France was abetting the ill-fated Maximilian in his effort to found an empire in the western hemisphere.

Juarez, a full-blooded Zapotec Indian, born in an obscure village near Oaxaca, succeeded to the presidency of Mexico when Comonfort, weary of the internal strife, "quit the job" and went to the United States, leaving affairs in the hands of his chief justice. Immediately Juarez was embroiled in civil war by the assumption of the executive office by Zuloaga. It was while trying to displace his rival that the Indian patriot endeavored to borrow money from the United States and, as a part of the bargain, he agreed to a treaty the terms of which brought forth a storm of protest from England and France. By this treaty, which was never ratified, the United States was to have a perpetual and unrestricted passage across both the Isthmus of Tehuantepec and the northern states of Mexico, and the right to employ American troops to enforce these rights as well as to protect American citizens against levies and loans.

Start of Maximilian's Attempt.
A short time later Juarez precipitated an international crisis by his decision to suspend for two years the payment of interest on the national debt. England, Spain and France sent fleets to Vera Cruz to force payment, but England and Spain soon withdrew, while France, her soldiers once on Mexican soil, decided to press her claims, and gradually Napoleon's scheme for a western empire began to assume definite form. His scheme eventuated in the abortive attempt to establish Archduke Maximilian of Austria on the throne of the Montezumas. It was during the famous defense of the city of Puebla against the invading French army that a young Mexican soldier, who was to become the most conspicuous figure in the history of modern Mexico, distinguished himself by his bravery and his exceptional powers of leadership. This young hero was Porfirio Diaz, now known to fame as "the strong man of Mexico."

It was in the center of the international bridge which connects Juarez and El Paso that President Taft and President Diaz (he who had been Juarez's military right hand) met in 1910, upon the occasion of the centenary celebration of Mexican independence. The traveler who passes through El Paso on his way to Juarez may choose any of four times by which to set his watch—Central, Mountain, Pacific and Mexican. Mountain time is an hour slower than Central, while Pacific is an hour slower and Mexican is 24 minutes faster than Mountain.

Famed for its Bull Fights.
On account of its bull fights and cock fights, Juarez has long been a city of festal-day pilgrimage for Americans in search of a new sensation. The Spaniards, who became addicted to the bull-fight habit in the twelfth century, during the occupation of the Iberian peninsula by the Moors, introduced this sport into Mexico shortly after their overthrow of the Aztecs. The fights in Juarez are not so elaborately staged as those in Mexico City, for native bulls are used customarily, and these have not the ferocity of the animals imported by the capital from Andalusia at a cost, frequently, of \$1,000 (Mexican) each.

More Effective Now.
In 1945 there were 1,240 sugar mills in Louisiana and their output averaged that year 171,005 pounds per mill. The operation factories numbered 153 in 1913 and averaged 3,826 pounds of such each; while the short crop of 1915 was handled by 136 factories, the average of each being 2,022,000 pounds.

In Woman's Realm

As an Addition to the Summer Wardrobe, There is Nothing Better Than a Frock of White Georgette—Design Shown is Pretty and Easy to Make—Some Little Accessories That Give Appearance of Coolness.

Frocks of white georgette continue to delight those who find it necessary to supplement the summer wardrobe with an extra dress or so. Women who are discriminating find in the refinement of this sheer, soft fabric, in white especially, a charm that is not to be resisted. The designer of the pretty model shown had midsummer days in mind and trimmed it with the coolest-looking of all color combinations. It is banded with green and white striped satin, and the green is in a vivid and brilliant shade. The skirt is plain, gathered in at the waist line and straight hanging.

its blouse, because these may be made of the sheerest and softest materials, mere clouds above the world of fabrics.

After a glance through the assortments of blouses and neckwear, organdie, crepe georgette and crepe de chine are firmly impressed upon the mind in materials. Hemstitching, eyelet work and embroidery and a fashion for contrasting colors in trappings have developed into the strongest features in the decoration of summer blouses and neckwear. There is no more to be said, for the pretty story of these summer styles is finished.

OF WHITE GEORGETTE CREPE.

A wide border of the striped satin finishes the bottom, and narrow bands of it are placed above the border. They are all cut on the bias of the goods and finished with tiny machine-stitched hems. Besides their decorative value these bands give to the skirt the required flare at the bottom. The bodice is plain and full, finished with a cape collar opening in a V at the front. The sleeves are full and long, with shaped, flaring cuffs that extend over the hands. They are joined to the sleeves with narrow bands of satin. The bodice and skirt are in one piece and joined by a wide girdle of the striped satin.

A slip of white taffeta is worn under this frock, and the cool sheen of the silk is one of the charms of the frock.

In spite of its airy texture georgette proves to be a durable material. A little gown of it like that shown here

A cape-collar and two collars with Jabots are pictured here. The cape-collar is of white organdie with scalloped and embroidered edge and a band of hemstitching. Between the hemstitching and the edge there are little wreaths of embroidered blossoms centered with eyelet work.

The collars with Jabots are made of white crepe de chine, finished with picot edges and hemstitching. In one of them large embroidered dots are done in color, Copenhagen blue and light green being among the favorites. This collar opens in a long point at the front, and the Jabot is gathered to a band. The other collar is an effective pattern for either organdie or crepe. The frills are plaited and finished with picot-edge. The V opening at the throat is short and the Jabot fastens with small, oblong, pearl buttons, down the front.

Neckwear such as this provides one

IN THESE, WEARER LOOKS COOL.

may be made successfully even by the amateur in dressmaking.

Filmy, fresh and cool-looking clothes make the woman who wears them a joy to look upon in the hot days of midsummer. When she provokes people to say: "I wish I felt as cool as you look," it is assurance that she has achieved the best results in her summer apparel. Summer blouses and summer neckwear are among her first aids in accomplishing results that make her a refreshing presence.

In vain the thermometer climbs, in the presence of crisp, unwiltable organdie, or limp and filmy crepe, that is as cool looking as a mist. Therefore, the charm of the summer frock depends upon its collar and cuffs, and that of the summer street suit, upon

of the means for looking cool in torrid weather. A good supply of it will help out the tourist, and much of it is only a matter of pretty frills.

Julie Bottorby

Rinse the Hair Well.

It is almost better not to wash the hair at all than to leave soap in it. There is no better proof that the oil has not been thoroughly washed than to have the soap stick tenaciously when we try to rinse it out. It is held by the oil and will not come out until more soap has been put on and then rinsed until the water runs clear.

The KITCHEN CABINET

Small service is true service while it lasts. Of humblest friends, bright creature, scorn not one. The daisy by the shadow that it casts Protects the lingering dewdrop from the sun. —Wordsworth.

SUCCULENT SALADS.

The fresh, juicy vegetables are most acceptable for the salad course on the hot days.

Cress, Cucumber and Tomato Salad.

Water cress makes a delightful salad alone, but when combined with cucumbers and tomatoes it is especially so. Prepare a bed of well washed, crisp cress; arrange slices of cucumber and bits of tomato; dress with three tablespoonfuls of oil and one of vinegar, season well with salt and a dash of red pepper; add the dressing just as it goes to the table, otherwise the salt will wilt the crisp vegetables.

Tomato Jelly With Celery Salad.—Soak three-fourths of a box of gelatine in a half cupful of cold water. Cook a can of tomatoes, half an onion and a stalk of celery, a bay leaf, two cloves, a teaspoonful of salt and a dash of paprika ten minutes; add two tablespoonfuls of vinegar and the gelatine and strain into a ring mold. When cold turn from the mold and fill the center with tender celery, walnut meats and French dressing; well mixed. Garnish the center with the tender leaves of the lettuce and bits of curled celery around the border of the jelly.

Sliced Tomato and Cucumber Salad.—Arrange overlapping slices of tomatoes on a chop plate and in the same manner sliced cucumber. When serving have the salad dressing passed and each may thus be served in the proportion desired.

Tomato and Onion Salad.—Peel and shred four tomatoes; slice thinly a very mild onion and separate in rings; add oil and vinegar and season with salt and pepper. Tarragon vinegar is simply good vinegar with tarragon leaves steeped in it. One may prepare it as well as mint vinegar which the herbs are green before blossoming.

Cabbage and Pepper Salad.—Shred crisp cabbage; add two green peppers, finely shredded for a quart of cabbage and a half cupful of nuts. Mix well with any desired dressing and serve well chilled.

A happy lot must surely be his—
The Lord, not slave of things—
Who values life by what it is,
And not by what it brings.
—John Sterling.

TASTY TID-BITS.

A delicious jelly is made of equal parts of quince and apple. Cook the fruit separately as the quinces require longer cooking or when the quinces are nearly tender the apples may be added. Strain and proceed as with any other jelly.

Fig Toast.—Wash and cook half a pound of pulled figs until tender; add one-fourth of a cupful of sugar and the grated rind and juice of half a lemon. Cook until the sirup is well reduced. Cut the crust from a thick slice of bread and saute in butter until brown on both sides. Drain on soft paper; then heap the figs upon it, cover with two-thirds of a cupful of thick cream, slightly sweetened. Serve at once. Sponge cake may be used instead of the bread, and other fruits like prunes, apricots, peaches or strawberry preserves may be used.

Mushroom Cakes.—Now that the delicious field mushroom is abroad in the land, is the time to use the delicious morsels. Wrap mushroom caps that have been cleaned and peeled with strips of bacon and either bake in the oven on a broiler over a pan or saute in a hot pan. Serve on toast.

Canned Apricots With Rice.—Put a half a cupful of rice over a hot fire to boil in a pint of milk and half a teaspoonful of salt and let cook in a double boiler until the milk is absorbed. Meanwhile cook half a can of apricots with four tablespoonfuls of sugar and the grated rind of an orange for six minutes. Make a border of the rice on a serving dish and turn the apricots and sirup into the center of the dish. Serve as a dessert for luncheon.

Pineapple Sponge.—Heat a pint of grated pineapple over hot water, sprinkle into it one-third of a cupful of tapioca, the minute kind, mixed with two-thirds of a cupful of sugar, and half a teaspoonful of salt; when the tapioca is transparent add the juice of a lemon and the whites of two eggs, beaten stiff. Serve with cream and sugar.

Tapioca and Banana Sponge.—Sprinkle half a cupful of tapioca and two-thirds of a cupful of sugar into a pint of boiling water; add half a teaspoonful of salt and cook over hot water; stirring occasionally. When the tapioca is transparent add the juice of two lemons and fold in the

whites of two eggs, beaten dry. Serve spread over sliced bananas with cream and sugar or with a cold boiled custard. Other fruit may be used, such as peaches, the juice being used instead of water.

Not understood. How many breasts are aching For lack of sympathy! Ah! day by day, How many noble, lonely hearts are breaking! How many noble spirits pass away, Not understood.

IN RASPBERRY SEASON.

This delicious-flavored berry is a source of pleasure from the time the first rosy berry appears until the last jam is eaten.

Delicious Dessert.—Bake a loaf of angel cake in a flat tin, cut in squares or rounds to serve; pour over the cake some raspberry juice and heap on top a spoonful of whipped cream, garnish with a spoonful of the berries.

Filling for Cake.—Take three-fourth of a cupful of heavy cream and add a fourth of a cupful of milk; beat until stiff; add a third of a cupful of powdered sugar, one-half cupful of mashed raspberries and a dash of vanilla.

Raspberry Cream.—Put a quart of berries through a sieve to remove the seeds, add a pint of whipped cream which has been sweetened with a half pound of sugar and flavored with a little grated lemon peel. Mix well, serve in tall glasses, garnish with a few choice berries.

Raspberry Ice Cream.—Add a quart or more of standard berries to a quart of thin cream, a pinch of salt and sugar to taste. Freeze and serve garnished with the fresh fruit. A little lemon adds to the flavor and makes a more pleasing color. There is no more delicious frozen dish than this one. One may serve the cream with small cup cakes flavored with rose.

Raspberries served with plain boiled rice, whipped cream and sugar is a delicious combination. Mold the rice in a ring mold and fill the center with well-sugared berries. Pass the cream if unwhipped, or cover with whipped sweetened cream.

A New Way to Serve Grapefruit.—Cover the halves of the fruit prepared for breakfast with a thick layer of honey. By morning the honey will all be dissolved and the grapefruit especially delicious.

And if you fall—why, rise again! Get up, and go on; you may be sorely bruised and soiled with your fall, but is that any reason for lying still, and giving up the struggle cowardly? —Charles Kingsley.

COMBINATION SALADS.

Solomon might have said of the making of salads there is no end, for the possibilities of new combinations are always at hand, so that we may ever have variety.

Sweetbread and Cucumber Salad.—Arrange the leaves of head lettuce so that its shape is not destroyed. Have ready a pair of sweetbreads, cooked in salted acidulated water 20 minutes; then cooled and cut in small cubes and marinated; also the same quantity of cucumbers, cut in dice, chilled in ice water and dried upon a cloth. Drain the French dressing from the sweetbreads and scatter the bits of meat through the lettuce. Press three-fourths of a cupful of firm mayonnaise through a pastry tube in little stars here and there throughout the lettuce and serve at once.

Chicken and Fresh Mushroom Salad.—Peel fresh mushrooms, break in pieces and saute in melted butter five minutes with a slice of onion; add chicken liquor or hot water and simmer until tender. Remove the mushrooms from the liquor and set aside to cool. Add the liquor and the mushroom stalks to the liquid in which the chicken is to be cooked, then put the chicken and mushrooms together with celery or lettuce with any favored dressing.

Duck and Olive Salad.—Cut meat from a roast duck in small pieces and slice stuffed olives very thin, using two tablespoonfuls of olives to one cupful of meat. Serve on a bed of cress or lettuce.

Oranges cut in slices and dressed with French dressing is a good salad with duck.

Chestnuts cooked in chicken broth and mixed with twice as much celery makes a delicious salad.

Green and White Salad.—Cut cooked chicken or sweetbreads in small cubes, mix with seeded skinned white grapes and tender blanched stalks of celery; take equal portions of celery and meat and half as much seeded grapes. Mix with French dressing and let stand an hour before serving. Garnish with mayonnaise and pistachio nuts.

EVERY DEPARTMENT OF FARM MUST BE WELL ORGANIZED FOR SUCCESS

New Yorker Works Out Profitable Solution of Farm Problems in His Region—Started Enterprise Without Previous Experience to Aid Him—Always Weighed Advice Carefully and Measured It on Basis of His Own Conditions.

(By G. H. ALFORD, State Demonstration Agent, Maryland.)

The purpose of this article is to emphasize the following facts: It is not enough to raise good crops or to secure large animal production; these must be economically secured. This is only accomplished when capital and labor are so adjusted to existing conditions that maximum yields are obtained at the lowest cost. To farm successfully every department must be well organized and must be coordinated with the others. Labor must be fully employed, capital must be well utilized, both quantity and quality of products must be secured, and the products must be well marketed. All these things come as the result of close attention to and a detailed knowledge of the business.

The reasons and at the same time the justification for recounting the experiences and the methods of any individual farmer, however successful he may be, lies in the fact that a definite illustration brings out the underlying principles most clearly and effectively. To most practical men the concrete appeals more strongly than the abstract. Especially is this true in the teaching of better farm management, because it is a comparatively new method of attacking farm problems which is not yet clearly defined. It is because Mr. L. J. English of Binghamton, N. Y., has worked out a profitable solution of farm problems in his region that his success is worthy of telling and of reading.

Had No Experience.
Mr. English purchased the farm in 1897. He had no previous farm experience to aid him in starting the enterprise. His new possession consisted of 162 acres of land, "more or less," with good buildings and all the stock,

rugged constitution, however, and had been brought up on hard work, so that he was not afraid of it. To the college and the agricultural press, and especially to the personal help and interest of one college professor, he ascribes all the success he has ever made. These forces stirred him to study his business and to use in every way possible the agencies at hand which would help him and which would aid him in obtaining a better knowledge of the principles of farming. He had observed that rapid progress was being made in every line of industry but agriculture, and he took a new interest in everything pertaining to better farming. Yet he never made the mistake of taking advice wholesale. It was always weighed carefully and measured in the light of his own conditions.

When Mr. English took stock of his resources he found that his income was practically confined to one source—dairying. Some cows were making a good profit; others were causing a daily loss. The fertility of the soil was maintained by the use of manure alone, and this went to produce feed crops for the cattle. Very little hay was sold. There was no systematic plan of crop production or rotation or definite method of soil improvement.

System Had Faults.
Such a system had several faults, the correction of which was early recognized as essential to success. Unprofitable cows were destroying the profit of the better ones. The limitation of the income to practically one source put upon that factor the entire burden of the farm expenses. Labor was poorly distributed and was of necessity frequently employed on unproductive enterprises in order to hold it

when the labor was not fully and profitably employed. The distribution of labor was so poor that the men could not be given steady employment by the year, and some difficulty was experienced in getting satisfactory labor. So this farmer wanted to add to his income without cutting down the income from milk, and by this means to secure a better distribution of labor.

Sugar beets were first tried, as a factory was then in operation at Binghamton. It was found that an average of from 10 to 20 tons of beets could be raised per acre, which brought \$5 per ton. An average income of at least \$75 per acre could thus be obtained, besides saving as many tons as there were beets sold. These were of considerable value as a succulent feed for the cows.

Potatoes Were Next.
The next crop tried was potatoes and it proved to be so good a money

Man's Greatest Benefactor—the Cow She Pays Debts and Saves Home.

maker that it is now an annual crop. Irish Cobbler was the variety grown and with good culture 300 to 350 bushels per acre were produced annually. As many as 5,000 bushels of potatoes are often grown on this farm in one season. The growing of these crops led to some direct sales in the city, and until the last year or two a small but profitable direct market garden business was carried on. Potatoes and apples are still sold direct in the city.

The large cash sales from these crops as compared with grain and hay, early taught Mr. English the lesson which so many farmers are now learning to their advantage, namely, that it is cheaper to buy grain than to raise it when the land upon which grain is grown will yield much more—often double—the cash value of the grain in other crops. It is a simple economic proposition to decide which is cheapest—home-grown or purchased grain. Mr. English figured that he could raise enough sweet corn, potatoes, onions, or other similar crops to buy the grain which would have grown upon his land and still have a good margin left for profit.

Mr. English is an ardent advocate of the use of clover, both as a forage plant and as a soil improver. It is the key to success in his system of farming. His average crop of clover is about three tons per acre, and several times he has cut five tons per acre in two cuttings. Not only does it yield practically as well as alfalfa under his conditions, but it is regarded as equally valuable as a feed for cattle. For such he insists that the clover must be cut earlier than is the custom. He aims to cut it before much bloom appears. Despite the lower analysis of clover in digestible protein, his practical experience shows that it is as good a milk producer as alfalfa.

In addition to the grain ration mentioned, the cows on the farm receive a good feed of silage and all the clover hay they can consume.

Noteworthy Farming.
This facility of adapting his farming to the conditions of the season and the markets is one of the things which makes the farming of Mr. English so noteworthy.

In this rotation as now practiced, commercial fertilizer is used on potatoes only. From 500 to 600 pounds of a fertilizer containing 4 per cent of nitrogen, 6 per cent of phosphoric acid, and 10 per cent potash is almost always used, being applied with a potato planter. Tests have shown that fertilizers with corn were unprofitable under the conditions of this farm, but that manure gave very satisfactory results. Of all the land to be seeded to clover, 400 to 600 pounds of hydrated lime (this form is used because it is easiest to apply, though its first cost is higher than other forms) is applied once in three years. In all these applications no fixed rule is invariably followed, but the needs of the crops and the season are always considered. A definite system followed as closely as good judgment will permit is the very best kind of farming.

The results of 15 years' work along these lines has been the development of one of the most successful systems of farm management in the whole region. Every cow in the dairy is now a profitable one. All the "boarders" have been dropped. Without materially increasing the expenses of the farm, the income has been practically doubled by supplemented receipts from the dairy and by cash crops for the city markets, especially potatoes. While the income from the dairy has been increased, the expenses have been reduced by growing a larger part of the rations on the farm. Succulent feeds and feeds high in protein have made this possible, especially corn for silage and clover hay.

Light Pink Roses.

FALL PLANTING OF ROSES

By PRISCILLA PAKE.

Fall planting of roses may be done in the latter part of October or early in November, or even as late as the middle of December, with excellent results.

Roses planted in the fall, however, should be set deep and banked well with earth just before the ground freezes. It is also well to cover the soil about the plants with manure, which should not be removed until the middle of April, or until all danger from a severe frost is over, whereupon this dressing may be forked under.

When the rose plants are received from the nurseryman they should be unpacked as soon as they come to hand. Thereupon the tops and roots should be well sprinkled with water, after which they should be covered with bagging and placed in a shaded spot until ready to plant.

If the ground is not prepared when the plants arrive, it is advisable to put them in a shallow trench and cover the roots with loose soil until the ground can be put into a proper condition. The enrichment of the soil, however, should not only be made at the time of the preparation of the bed before planting, but in the spring of every year, for with such attention a bountiful supply of flowers may be expected every season.

When planting, spread the roots out carefully and do not cross them or crowd them. They should be placed well below the surface of the soil and arranged, as far as possible, in their natural position.

When the roots are covered the earth should be firmly pressed down upon them, particularly around the stem. If manure is put in the bottom of the hole it should not be allowed to come in contact with the roots.

After planting, the roses should be well cut back to a few buds, freely watered and protected for a few days if the sun is strong. After that they will have become thoroughly established.

If the ground is wet when the plants

are received it is better to postpone the planting, as the soil is liable to become baked and the safety of the plants may be thus endangered.

During a dry season the rose requires plenty of water, and frequently soaking the bed with liquid manure will be beneficial. The moisture may also be conserved by abundant cultivation.

In the winter the roses should be protected with a good mulch, which is best done by covering the roots in December with coarse litter, or leaves, to about six inches in depth, or they may be covered with evergreen boughs or similar material.

But if the exposure is very great it is advisable to lay the plants down and cover them with earth, putting them to sleep, as it were, on the bosom of Mother Nature.

CLEMATIS A GOOD VINE

Clematis, paniculata, is one of our most popular vines. It seems entirely free from disease and is unusually hardy. Its foliage is attractive and its small white blossoms which completely cover the vine make a glorious spectacle over porches and pergolas.

One of its chief attractions is that it does not come into bloom until after all the other vines are faded and yellow. It is a rapid grower.

Clematis must be planted in a soil of good loam, well drained. Give it protection of leaves in the winter.

THE WILD GRAPE VINE

To me the wild grape vine produces the sweetest odor of any plant in existence. The wild grape is a hardy vine, growing with scarcely any attention.

It can be made to cover a side fence as a dense hedge, or trained over trellis or up shade trees.

Young plants may be secured in almost any wood or along bushy fence rows.

They are transplanted in late fall or winter.—E. V. B.

WHO'S GOT THE MONEY

In Four Staples Alone the Farmers of Western Canada Produced 408 Million Dollars in 1915.

The Calgary (Alberta) printers have a house organ, called "The Magnet," and in its columns a few weeks ago appeared an article entitled "Who's Got the Money?" It was cleverly written, and but for its length, the writer would have been pleased to have copied the article in its entirety. The purpose for which this article is published, however, that of letting the readers of the paper know of the great progress that is being made in agriculture in Western Canada, will be served by copying a portion of the article. Doubtless the readers of this paper doubtless have friends in one of the three provinces—Manitoba, Saskatchewan or Alberta, and they will be interested in feeling that their friends are enjoying a portion of the wealth that has come to Western Canada farmers as a result of careful tilling of a soil prodigal in everything that goes to make good grain, cattle, horses, hogs and sheep.

Reproducing from the article:
The Government does not produce money. It can stamp "One Dollar" on a slip of white paper, and we accept it at a dollar's worth, but neither the paper nor the printing are worth a copper. What gives it value is the promise of the people of Canada which stands behind the printed slip, and our faith in that promise.

Now do you know who's got the money?

Let us put it into figures. The farmers of Alberta, Saskatchewan and Manitoba last year raised 342,948,000 bushels of wheat. If we take for an average 85 cents a bushel in Manitoba, 81 cents in Saskatchewan, and 79 cents in Alberta the season's wheat crop was worth \$290,629,000. Add to this an oat crop of \$34,840,000 bushels, worth \$95,457,000; a barley crop of 25,254,200 bushels, worth \$15,871,000, and a flax crop of 10,559,000 bushels worth \$15,843,000, and you find that on these four staples alone the farmers of Western Canada produced a wealth of \$407,800,000.

Please note that this wealth is in money. It is not in real estate as inflated values, industrial stocks that are half water and the rest air, fictitious goodwills or unsaleable merchandise. It is in hard cash, or—which is better—hard wheat.

These figures are only for the staple grain productions. They do not include the millions of dollars represented by the live stock and dairying industries, or the additional millions included in the root, fruit, and garden crops. The creameries of Saskatchewan, for instance produced more buttermilk and ice cream last year than their total production amounted to six years ago. The milk, butter, and cheese production of Alberta for 1915 was valued at over eleven million dollars. The potato crop of the three provinces was worth five millions and a half. Corn and alfalfa—comparatively new crops, charged with tremendous possibilities—amounted to over a round million. Even honey—you didn't know we raised honey (the bee kind) in this country, did you? Manitoba produced 100,000 pounds in 1915, and there isn't a bee in the province that doesn't swear he's a better honey-sorter than anything in California or Washington.

That's where the money is; in the jeans of our honest friend the farmer, who was too slow to get into the cities when the rest of us saw short-cuts to wealth; who hadn't imagination enough to think a man can make money without earning it, and who was too dull to know that hard work is foolhardy. Well, he has the laugh now. Likewise the money.—Advertisement.

Cows Make the Farm More Profitable.

machinery and other equipment then on the farm. The stock consisted of three horses, 50 cows, 12 head of cattle and a few chickens. The ordinary equipment was left on the place, together with some hay, grain and roughage. About 90 acres of the farm lie in the broad, level valley, the remainder being on a slope too steep for cultivation, and on the top of a hill nearly 500 feet above the valley. About 30 acres of quite level and easily tillable land are on the hilltop, but it is difficult of access. For this entire property \$16,000 was paid—\$8,000 in cash and \$8,000 as a mortgage. The land and buildings were valued at \$12,000 and the stock and other movable equipment at \$4,000.

The former owner had been in possession of the farm for 67 years. It had been profitable 20 or 40 years before, and had been recognized as a farm of considerable fertility. In the years immediately preceding its purchase by Mr. English, it had not paid expenses, to say nothing of the interest on the investment, and the

neighborhood generally prophesied that the former owner would get the farm back on the mortgage in a few years. It was even said that there was a deliberate purpose in selling to one who had so little farm experience.

Had Little Capital.
As can readily be imagined, Mr. English found himself in a rather difficult position when he took possession of the farm. He was practically without farming experience and had very little working capital. He had a

unsatisfactory both to employer and men. No definite system of crop production was in use to provide the right proportion of each crop with the proper distribution of labor. The maintenance of fertility was expensive. All these things it was determined to remedy.

The first step to be taken was the improvement of the dairy. The performance of each cow was studied and the unprofitable ones disposed of. The next important step was to increase the sources of income by growing such other crops as the labor necessary for the dairy could handle without extra expense, or, in other words, to diversify the farming. The third, but by no means the least important step, was to be the development of a rotation that would improve the soil, furnish the maximum feed for the stock and provide a cash crop. These were taken up and carried out as rapidly as possible.

A herd of 50 fairly good cows was purchased with the farm, and at the start dairy products were about the only source of income. Gradually this has been changed, and at present, even though the dairy is an important part of the farm, attention is given to several lines. A purebred sire was included in the farm purchase. It has been the policy at all times to keep a purebred sire of good quality in the herd. The heifer calves from the best producing cows were grown and tested out for dairy production, the best being kept and the others discarded. In this way the quality and the producing power of the cows have been constantly increased. The herd today is uniform and able to produce results. Several cows have produced 60 pounds or more of milk a day and have maintained this record for continuous periods of from four to six months.

Limiting Factors.
Mr. English found that with this method the cows were the limiting factors in the profit. No matter how large the crop or what it was worth in the market, its value was measured entirely by what the cow could make out of it. If the price of the milk was low, so was the price of the crop. If the cow was a poor one, the price of the crop was still lower. Moreover, there was much time on this farm

Senator Fall Issues His Defi

Senator Albert Bacon Fall delivered the Republican key note speech at the convention in Santa Fe, and in that speech he issued his defi to the Democrats. He said, among other things, that the Republicans were prepared to engage in any kind of a mudslinging contest that might look good to the opposition, and that he was prepared to hurl mud for mud, and make it stick, too. Now this is not the only questionable enterprise in which Mr. Fall has engaged and which he has made stick. Just why did he conclude that the Democrats were going to sling mud? Was it because he knew that the last Republican legislature had furnished them with all the ammunition they could reasonably use in a contest of that character, or was it that "A guilty conscience needs no accuser?" Mr. Fall might well consider before he makes any rash promises. Is he in a position to go before the people and explain why his party found it necessary to unlawfully deprive two regularly elected representatives of the people from their seat in the last legislature? Is he in a position to explain to the people why and how they set the provisions of the constitution of the state at naught and continued their unlawful session after the time prescribed by law for its adjournment? Is he in a position to explain to the voters the thousand and one other unlawful measures imposed upon the people he appears so anxious to go before? The Democrats are not exactly "hankering" after a contest of this kind, but should the necessity arise, there is no question but what they could keep Mr. Fall busy from now until long after votes had been counted in the coming election. If this defi was issued in the nature of a bluff, it will not stand up, and there is no one who knows this better than its author. The farther the Republicans can keep away from past history the better chance they have for success, however, that is up to them and if they want to travel the other route, the road is open and they know the way. The News knows of no Democrats who are quaking in their boots or who have any reason to fear a full and complete investigation of their official acts, yet it is free to confess that were they the rankest bunch of political pirates, they still might compare favorably with the notorious Republican two-thirds majority, who for something more than sixty days dealt misery to the only honest governor the state of New Mexico has had for the past twenty years.

The Republican Convention

The indications are that Holm O. Bursum will be the next defeated Republican candidate for governor of the state of New Mexico, and that Frank A. Hubbel will be doomed to wage a hopeless contest with the Honorable A. A. Jones for a seat in the United States senate. It would appear that the Republicans would have learned from sad experience that the proletariat of the "Sunshine State" would have nothing from Bursum, in an official capacity, yet with their customary disregard for the common "geezer" they will again attempt to force the hero of the penitentiary scandal upon a long suffering public. It has also been written that O. A. Larrazola will, at this meeting of the stalwart plunderbund, be recompensed for his desertion of the Democratic party with a nomination for the office of attorney-general, a position entirely too large for his limited ability and one which he can never hope to win at the polls. Frank A. Hubbel is also a politician with a past that he would give much to escape from, yet which pursues him like a relentless nemesis. Time was when he carried the Bernalillo county vote in his vest pocket, but that was several moons ago and it is very doubtful now if he can hold his own with the rest of his ticket. If the Republicans were striving for Democratic success this year they could not have happened upon any route more certain to attain that end than the nomination of the three men above named. It is also conceded that Sargent will be the choice of his party for treasurer while "Bob" Ervien will have no opposition for land commissioner. B. C. Hernandez, the dark skinned redeemer of the state of New Mexico, will be the Republican choice for congressman as he was for permanent chairman of the convention. Should the rest of the state ticket develop no more strength than the foregoing would indicate, Republican success in New Mexico will be anything but a two to one shot. If the Democrats use that business sense and judgment they are accredited with and nominate a ticket with Jones for the senate, McDonald for governor, Davison for commissioner of public lands, E. C. DeBaca for treasurer, and the rest of the ticket of equal strength, the Republican gang of misrule and graft will be driven from the state house.

The Continental Tailors Fall Season Opens Today

That's a piece of news that good dressers will receive with interest—it means a lot to such men—and you're one of them. The Continental Tailors make clothes for good dressers—make them to measure—guarantee them in every way.

The first point that will interest you is woollens and patterns—that point has been splendidly covered. You've never seen a wider selection—and you've never seen a wide selection that was so universally attractive.

The next point you'll consider is style and tailoring and fit—if you decide upon any style the Continental Tailors offer, you'll have a good style. And the tailoring will be hand tailoring throughout—the fit will be perfect and guaranteed.

The Continental Tailors of Chicago offer you good made to measure clothes at moderate prices.

Notice of Contest

F. S. 010466, Cont. 2530
Department of the Interior, United States land office, Fort Sumner, New Mexico, July 18, 1916.
To Walter E. Kimball, record address, Clovis, N. M., contestee:
You are hereby notified that Martinia A. Todd, who gives Texico, N. M., as his post office address did, on June 29, 1916, file in this office his duly corroborated application to contest and secure the cancellation of your homestead entry, serial 010466, made Dec. 11th, 1912, for west half section 5, township 1 south, range 36 east N. M. P. meridian and as grounds for his contest he alleges that said entryman has never at any time established his residence on the said land. You are, therefore, further notified that the said allegations will be taken by this office as having been confessed by you, and your said entry will be cancelled thereunder without your further right to be heard therein, either before this office or on appeal, if you fail to file in this office within twenty days after the fourth publication of this notice, as shown below, your answer, under oath, specifically meeting and responding to these allegations of contest, or if you fail within that time to file in this office due proof that you have served a copy of your answer on the said contestant either in person, or by registered mail. If this service is made by the delivery of a copy of your answer to the contestant in person, proof of such service must be either the delivery was made stating when and where the copy was delivered; if made by registered mail, proof of such service must consist of the affidavit of the person by whom the copy was mailed stating when and the post office to which it was mailed, and this affidavit must be accompanied by the postmaster's written acknowledgment of its receipt, or the affidavit of the person by whom the copy was delivered, if made by registered mail, proof of such service must consist of the affidavit of the person by whom the copy was mailed stating when and the post office to which it was mailed, and this affidavit must be accompanied by the postmaster's written acknowledgment of its receipt, or the affidavit of the person by whom the copy was delivered, if made by registered mail. You should state in your answer the name of the post office to which you desire future notices to be sent to you.

Portales, New Mexico

Preparedness Safety First...

Preparedness is just as applicable to the banking business as it is to the defense of a nation. Preparedness at this bank means preparedness to supply the legitimate needs of our clients. Safety first is applicable to those far sighted people who believe that a moderate bank account is the best safeguard against poverty in old age. Commence that account today. Get the depositing habit before you grow old, it's easily acquired.

WHY PAY MORE

Twelve Gauge Black Powder Shells, 50c
22 Shorts, 15c

J. B. SLEDGE, HARDWARE AND IMPLEMENTS

With Electric Starter and Electric Lights
Four Inch Tires

LIKE larger and higher priced cars this new Overland is the latest streamline design. In point of appearance alone it has value far surpassing any other low priced car. And its equipment includes everything that riding comfort and driving convenience demands. It has the reliable Autolite two-unit starting and lighting system. There is a speedometer in the cowl dash, and a full set of tools. Large tires—four inches all around—insure greater mileage and comfort than can be obtained from the smaller tires used on other cars of similar specifications, and the rear springs are the famous cantilever type. It is in every respect a thoroughly equipped light weight car.

I. J. WILCOXEN, 3 miles northwest of Portales.

For Sale

Some good milk cows, also stock cattle. One mile east four south of Portales.

J. B. H. YOUNG, 10-42p

To the Farmers

The fair commission believes that the farmers of Roosevelt county are going to back them up this year just as they did last year with the very best stuff they can possibly bring in, in order that Roosevelt county may go up to Albuquerque and maintain its position as the banner county of the state of New Mexico. The commissioners will announce in next week's paper a list of cash premiums offered at the county fair and they have set the dates of September 21, 22 and 23 as Roosevelt county fair dates. In addition to offering a list of cash prizes the county fair commissioners will pay a farmer the market price for such of his goods as they take for exhibition purposes at Albuquerque, that is in each case where the farmer does not feel that he can donate this to the good of the cause. We expect that most farmers will be willing to donate them but in some instances it may be that it will be necessary to receive some compensation for the goods and in that event, the commissioners want to pay the market price. Bring the very best stuff you have.

Remember, your commissioners are up against it good and strong, and in spite of a handicap year they want to take off the first premium in the state competition.

The commissioners want to call your attention, particularly the dry farmers attention to the fact that the state fair is offering a \$250 cash prize for the best dry farm exhibit at the state fair. Your county fair commissioners will transport to Albuquerque any dry farm exhibit taking the first prize at the county fair, intact and set it up for the dry farmer. They will give the dry farmer one-half of the first prize of \$250, or \$125 in cash should this dry farm exhibit win the state dry farm prize. The other \$125 will be expended in transportation and arrangement of the exhibit together with the county exhibit at the state fair.

Dry farmers, get busy on this and take down this prize. It is an opportunity to pull down some real good money.

Fair Commissioners.

Portales School Notes

It's just a few more days till school begins. Let's have all social events, such as parties, etc. before that time. Every night will be needed for school work.

Patrons of this school, who now reside outside the district, should be in Portales by September 1st, so the children may be enrolled in the census of this district where they will attend.

Grade pupils, who were "promoted conditionally," will please be at the school building August 31, at 9: a. m. You can then be examined on the conditioned subject.

Coach Culberson says he is going to have a fine football team this year. He hopes to defeat all comers.

The janitor is putting on the finishing touches now and will have every thing in fine condition by September 5th.

A high school education increases a boy's earning capacity at least \$10 per day for every day spent in acquiring it. Will you let your boy drop out of school? Send him to school now. In a year or two it will be too late.

A course in high school, including music and expression, has prevented many an old maid.

Leave your child cattle, land and money, without an education and he may lose what he has. Give him an education and he has power to earn more.

If you want your child to dislike school, have him, placed in a grade too advanced for him to work, school soon becomes a drag and is hated. Place him where he can get up his work cooperate with the teachers in every way, and he will be happy at school. School is the child's business. There is just one thing

to attend to it. That time is now. To-morrow is too late.

If your child were running a race, you would want him to get an even start. A big race for all, starts September 5th. All can win who strive diligently. See that your child gets an even start least he be handicapped throughout the year.

Council Proceedings

The town council met in call session, J. P. Deen, Mayor, P. E. Jordan, S. A. Morrison and G. M. Williamson, trustees, all being present.

A motion was passed unamously that no concessions or occupation license for concessions be issued for picnic day, Saturday August 19th, 1916.

There being no further business the council adjourned.

J. P. DEEN, Mayor.
W. H. BRALEY, Clerk.

ALL KINDS OF PROVISIONS RETAIN CONTROL OF SELF

Truthful Traveler Explains How Sailors Were Enabled to Alleviate the Pangs of Hunger.

He was describing the privations of a voyage from which he had just returned. "Then," he said, "I went down to the cabin to lunch." "Lunch!" exclaimed one of his hearers. "But you told us there was nothing to eat left on board. What did you have for lunch?" "Oh!" was the reply, "it was a very modest affair—beef, wine and an egg." "Beef?" Where did you get the beef from?" "Oh!" was the reply, "that came from the bulwarks." "And the wine—how about that?" "Oh, that came from the porthole!" "Oh, oh!" laughed the listener. "Good, very good! But tell me where did you get the egg?" "Oh, that was the simplest of all!" came the reply. "The captain gave orders for the ship to 'lay to,' and he gave me one."—Pearson's Weekly.

The Other Side of It. The Lady—Why do they call the class of men you belong to tramps? The Hobo—I guess it's 'cause we refuse to do a 50-cent job for a 15-cent handout, ma'am.

Sir Francis Elliot, the British minister to Greece, was a great oarsman in his day.

Without That It Is Unreasonable to Think One Has the Ability to Control Others.

The other day a man who makes his living by fighting was struck by an undersized man, and instead of returning the blow he walked away from his diminutive assailant. This man exhibited much more self-control than the majority of people. Men who class themselves as being on a higher plane than this fighting man would have mixed immediately with the hot-headed individual. What would you have done? The chances are that you would have rushed at the fellow with all your might; you would have permitted your savage instincts to rule you. This proves that you have not as much power as you should have over your impulses. You may boss other people, but you are not boss of yourself. Maybe you wonder why others are forging ahead of you as leaders of men. It is because they have a check rein on themselves. They have schooled themselves that they may be able to guide others. Self-control is the attribute of a leader.—Chicago American.

It is awfully risky for a pretty girl to go into a dark hall with a man—and that may be why she likes to do so.

For Ten

A package of New Post Toasties provides servings for ten people—a delicious breakfast dish—corn flakes with new form and new flavour.

New Post Toasties are known by tiny bubbles raised on each flake by the quick, intense heat of the new process of manufacture.

They bear the full, true flavour of prime, white Indian corn, not found in corn flakes of the past; and they are not "chaffy" in the package; and they don't mush down when milk or cream is added, like ordinary corn flakes.

Try some dry—a good way to test the flavour, but they are usually served with rich milk or cream—

New Post Toasties

Sold by Grocers everywhere.

LIFE IS SAVED BY DREAM GIRL

Man Warned in Vision in Frozen Alaska and Turns Back.

COMPANIONS ARE LOST

Wealthy Mining Engineer Writes Syracuse, N. Y., Girl of Remarkable Experience in North—Dream Girl Tells Name.

Syracuse, N. Y.—A dream which appeared to him and saved him from death in the wilds of Alaska was the introduction Donald Mack of Juneau, Alaska, wealthy mining engineer, gave himself in a letter to Miss Ethel Williams, a prominent Syracuse university society girl.

Miss Williams, who resides with her father and sister, received a picture of a dog team and the following words penned in a masculine hand: "If you will write to this address I will tell you why I have sent this card."

Girl Receives Story. Miss Williams received the following story from the man in the north after the ice had sufficiently broken up to permit the transportation of mails: "I am a mining engineer and my work has taken me far into the interior of the country. Ordinarily I finish my work and reach the settlements before the lakes and rivers close and am able to make the trip by boats and canoe. Last fall I delayed too long and was obliged to come out by sled, a distance of 700 miles.

"Shortly before I reached Lake Tash I fell in with three Indians and a Frenchman on the trail. We started to cross the lake, stopping midway on a small island to rest and sleep. While I slept I dreamed. I saw a young girl dressed in light summer clothing standing in the deep snow around me. Dream Girl Tells Name.

"It was so real to me that I asked her who she was and why she was there. She told me her name was Ethel Williams and her home in Syracuse, N. Y. She said she knew it was my intention to keep on the direct route over the lake, but that disaster lay in that direction, as there was open water covered by drifting snow. To be

"I Followed the Instructions of the Dream Girl."

safe I should go about 25 miles up the river, where I would find safe crossing. "At this point I was awakened by the howling of dogs and the shouts of the Indians. It was three o'clock in the morning. They were making ready to go. I told them of my dream and they laughed at me. But I did not go on with them.

"I followed the instructions of the dream girl, and when I reached Juneau the Indians and Frenchman had not been seen. I headed a searching party down the lake to the point where they should have reached the mainland. We found the canoes and their sleeping bags and other camp outfit floating in the open water. "So Miss Williams, I consider that you saved my life, and mailed the card to you from Juneau."

SENTENCE IN INSTALLMENTS

Theatrical Management Places Clothes on a Poster Woman at Superior, Wis.

Superior, Wis.—Because the authorities objected to a poster used by a theater to advertise the appearance of a film play the management of the theater caused the figure of the woman on the poster to be draped in overalls. On the large poster full sized overalls were required, on the smaller sheets children's sizes were utilized.

The figure, which has been draped "a la Anthony Comstock" is that of a nude woman hung on a rack. Most of the form is hidden by the rack, but the poster was deemed sufficiently risqué to warrant exercising the strong hand of censorship—hence the overalls.

It was explained by the theater management that the figure on the poster was allegorical and did not represent an actual scene from the film.

SAVE A DOCTOR'S BILL by keeping Mississippi Diarrhoea Cordial handy for all stomach complaints. Price 25c and 50c.—Adv.

What's in a Name? Bacon—I see they are advertising now Zeppelin socks. Egbert—Isn't there danger of their coming down at the wrong time?

UGH! CALOMEL MAKES YOU SICK! CLEAN LIVER AND BOWELS MY WAY

Just Once! Try "Dodson's Liver Tone" When Bilious, Constipated, Headachy—Don't Lose a Day's Work.

Live up your sluggish liver! Feel fine and cheerful; make your work a pleasure; be vigorous and full of ambition. But take no nasty, dangerous calomel, because it makes you sick and you may lose a day's work. Calomel is mercury or quicksilver, which causes necrosis of the bones. Calomel crashes into your bile like dynamite, breaking it up. That's when you feel that awful nausea and cramping.

Listen to me! If you want to enjoy the nicest, gentlest liver and bowel cleansing you ever experienced just take a spoonful of harmless Dodson's Liver Tone. Your druggist or dealer sells you a 50 cent bottle of Dodson's Liver Tone under my personal money.

It's hard for most of us to be good when we have a chance to be.

WHOOPIING COUGH

For whooping cough and its after effects there is no better medicine than Lung-Vita. Here is what Mr. G. W. Head, 2108 22d Ave., N., Nashville, Tenn., says about it: "My boy had whooping cough and typhoid fever, which left him with a severe cough. This cough stayed with him for several years and was frequently so bad that we had to prop him up so that he could get his breath. We used Lung-Vita and he has not been bothered with this cough since."

Lung-Vita is recommended for consumption, asthma, colds, whooping cough, croup and grippe. At your dealer or direct. Price \$1.75. Booklet upon request. Nashville Medicine Co., Room 161, Steger Building, Nashville, Tenn. Adv.

If a man has no show at home it is up to him to patronize a circus.

SWAMP-ROOT STOPS SERIOUS BACKACHE

When your back aches, and your bladder and kidneys seem to be disordered, remember it is needless to suffer—go to your nearest drug store and get a bottle of Dr. Kilmer's Swamp-Root. It is a physician's prescription for diseases of the kidneys and bladder.

It has stood the test of years and has a reputation for quickly and effectively giving results in thousands of cases.

This prescription was used by Dr. Kilmer in his private practice and was so very effective that it has been placed on sale everywhere. Get a bottle, 50c and \$1.00, at your nearest druggist.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

Many a self-made man tries to blame the job on his wife.

Always use Red Cross Ball Blue. Delights the laundress. At all good grocers. Adv.

Aleppo employs 8,000 ropemakers.

He Threw Calomel Away

Wm. S. Prince of Birmingham, Ala., writes—"I was suffering with indigestion, biliousness and kidney trouble. I tried calomel and the doctors, for about a month. Finally I tried

Dr. Thacher's Liver and Blood Syrup

and the first bottle relieved me very much. I am sound and well, can eat anything." Thousands of others suffering from liver, kidney, stomach and bowel trouble have been quickly relieved by this wonderful remedy which builds up the entire system. Sold at all druggists, 50c and \$1 per bottle. Made by THACHER MEDICINE COMPANY, Chattanooga, Tenn.

State of New Mexico, State Corporation Commission of New Mexico.

CERTIFICATE OF COMPARISON
United States of America, State of New Mexico, ss.

It is hereby certified, that the annexed is a full, true and complete transcript of the

CERTIFICATE OF INCREASE OF CAPITAL STOCK
THE ROOSEVELT COUNTY CREAMERY
(No. 8616)

with the endorsements thereon, as same appears on file and of record in the office of the State Corporation Commission.

In testimony whereof, the State Corporation Commission of the state of New Mexico has caused this certificate to be signed by its chairman and the seal of said commission, to be affixed at the city of Santa Fe on this 19th day of August, A. D., 1916

[SEAL] M. S. GROVES, Chairman.
Attest: EDWIN F. COARD, Clerk.
(I. R. Stamp 10c)

CERTIFICATE OF INCREASE OF THE CAPITAL STOCK OF THE ROOSEVELT COUNTY CREAMERY

Know all Men by These Presents:

That at a meeting of the stockholders of The Roosevelt County Creamery, held at the court house in Portales, Roosevelt county, New Mexico, at the hour of two o'clock in the afternoon of the twenty-first day of June, 1916, upon notice to each stockholder given and served within the time and in the manner prescribed by the articles of incorporation and the by-laws of the company, which notice was given pursuant to a resolution passed by the board of directors in which it was declared advisable that the capital stock of this corporation should be increased to twenty-five thousand dollars, divided into one thousand shares of the par value of twenty-five dollars each, at which meeting two-thirds in interest of each class of the stock holders having voting powers, represented at such meeting, voted in favor of the proposition to so increase the capital stock of said corporation.

It is, therefore, hereby certified that the capital stock of the Roosevelt County Creamery, the principal office of which is at Portales, New Mexico, has by the consent of the stockholders been increased to twenty-five thousand dollars, divided into one thousand shares of the par value of twenty-five dollars each.

J. K. Reese, whose address is Portales, New Mexico, is secretary and the agent in charge upon whom process may be served.

In witness whereof, we have hereunto set our hands and seals, and have affixed the corporate seal of said corporation, at Portales, New Mexico, this 29th day of July, 1916.

[CORPORATE SEAL] J. P. DEEN, President.
Attest: J. K. REESE, Secretary.
(I. R. Stamp 10c)

State of New Mexico, County of Roosevelt, ss.

On this 29th day of July, 1916, before me personally appeared J. P. Deen and J. K. Reese, president and secretary, respectively, of the Roosevelt County Creamery, to me known to be the persons described in and who executed the foregoing instrument, and acknowledged to me that they executed the same as their free act and deed, for the uses and purposes therein recited, and that the recitations and statement of fact made in the foregoing instrument are true within their own knowledge.

IN WITNESS WHEREOF, I have hereunto set my hand and affixed my official seal the day and year in this certificate first above written.

[SEAL] JAMES A. HALL, Notary Public, Roosevelt County, N. M.
My commission expires 19th day of December, 1918.

AFFIDAVIT OF PRESIDENT AND SECRETARY

State of New Mexico, County of Roosevelt, ss.

On this 11th day of August, 1916, before me personally appeared J. P. Deen, president, and J. K. Reese, secretary, of The Roosevelt County Creamery, each being personally known to me, who being by me severally and duly sworn, each for himself and not one for the other, did say that J. P. Deen is such president, and that J. K. Reese is such secretary, respectively, of said above corporation mentioned in and which executed the foregoing certificate of amendment; that the seal affixed to said certificate is the corporate seal of said corporation; that said certificate of amendment was signed and sealed in behalf of said corporation by authority of its board of directors and with the assent of at least two-thirds in interest of each class of stockholders of said corporation having voting powers as their voluntary act and deed and as the voluntary act and deed of said corporation, which assent was given upon roll call of the stockholders at a stockholders meeting held at the court house in Portales, Roosevelt county, New Mexico, at the hour of two o'clock in the afternoon of the twenty-first day of June, 1916, and which stockholders meeting was called pursuant to resolution of the board of directors and upon notice to each stockholder given and served within the time and in the manner prescribed by the articles of incorporation and the by-laws of the said corporation.

J. P. DEEN,
J. K. REESE.

Subscribed and sworn to before me this 11th day of August, 1916.

[SEAL] JAMES A. HALL, Notary Public, Roosevelt County, New Mexico.
My commission expires December 19, 1918.

Where Quality
Is Paramount

Miss Williamson Will Sing

At the Lyric Theatre Monday evening for the Art and Dramatic club in their production of "Living Pictures" taking the place on the program which had been assigned to Miss Elizabeth Garrett but who was unable to fill the engagement on account of her being called out of the city. Miss Williamson will make her own selection for the number and will be accompanied on the piano by her friend, Miss Irene Smith, who is with her as the guest of Miss Mattie Doss Hightower. Miss Williamson has a beautiful voice which is being trained under the best masters of Denver, this being her second year at the conservatory. The patrons of the art should attend the program Monday to hear this talented young woman. — Roswell News.

Married in Texas

Pete McDaniel, familiarly known as "Uncle Pete" who is one of our oldest and best known citizens, was united in marriage to Miss Viny Mitchell of Leonard, Texas, July 20. The wedding occurred at the court house in Hillsboro, Texas.

"Uncle Pete" has been a resident of this county for 14 years and was one of the first to file on a homestead in this locality.

We unite with his friends in wishing Mr. McDaniel and bride long life, happiness and prosperity. — Clovis News.

"Uncle Pete" is quite well known in Portales and was at one time a frequent visitor here. His friends in Portales will join those in Curry county in wishing him prosperity and plenty.

Teachers Make Perfect Record

Mrs. Mildred King of Santa Fe and Miss Thyrza Johnson of Roosevelt county, among hundreds of teachers examined this summer, alone made one hundred per cent. They spelled fifty words correctly, placed the correct diacritical marks for all the vowels and consonants, marked and accented a group of seventy words, and gave two rules that are useful in spelling. — Albuquerque Morning Journal.

Entertains for Mrs. Stonum

Mrs. R. H. Bailey entertained at 1 o'clock dinner for Mrs. Stonum.

Covers were laid for the following guests; Mesdames Leach, Carr, Mock, Stone, Humphrey, Stonum, Lindsey, and Miss Plant.

The afternoon was spent on the wide veranda of the pleasant home.

PEOPLE WILL TALK

And it is to our advantage that they do, for our regular patrons cannot help but tell their friends of the good qualities of our Drugs, Medicines, and Toilet Articles, and the moderate prices we charge for them. We make a specialty of putting up doctors' prescriptions, and our charges are modest. Moreover, you may rely upon prompt service.
