

The Sudan News

VOL. 4

SUDAN, LAMB COUNTY, TEXAS, AUGUST 9, 1928

NO. 7

Brannen's Letter Next Week

We are in receipt of a communication from Mr. Brannon, postmaster at Littlefield, a reply to an editorial in The Sudan News of last week.

From the fact that we are having a photostatic replica made of the same it will cause delay in publishing same until next week's issue.

"CODFISH SOCIETY" ON THE CONCRETE

With Personalities To None

"Speaking about automobilists in general and those who own them—or suppose to own them—right in my own town," said a stranger to the editor of this paper the other day, "I can recall several instances of people shirking paying their other honest debts in order to own a machine."

"One, in particular," he continued, was a fellow who owes me something over a hundred and paid me twenty dollars on account, the very same day making a large payment on a new machine, and is now on an extended vacation."

These remarks made set the editor thinking, and when bedtime came began to further contemplate that they might be similar cases right here in Sudan when of a sudden he fell asleep and had a dream, and this is what he dreamt:

That each and every person indebted to The Sudan News filed in so fast that it was an effort to write out the receipts, and as suddenly awoke only, on consulting the books, to find out that the poet who penned the words that "Dreams are only the vagaries of sleep," knew just exactly what he was talking about—unless there be in our midst some who wish to prove that the poet was wrong.

As for ourselves we may be walking some, but what we are walking on is paid for and are not rolling around the country in something that isn't.

At the same time we would like to have one—we admit.

Three thousand dozen eggs and five thousand pounds of chickens are stored in the pantry of a large steamer crossing the Atlantic, for the meals of its passengers during its voyage.

Linton Dining Room Moved

Mr. and Mrs. A. D. Linton have moved their dining room to their lots east of Main Street. Mr. and Mrs. Linton have built up quite a reputation as feeders, and many of the traveling men make it a point to be in Sudan in time for meals while making this territory. The building will be used as a dwelling.

Birthday Dinner

A delightful birthday dinner was given at the home of Allen Scoggins, Sunday, in honor of Miss Allen Scoggins and Miss Velma Morgan, they being the same age. Those who enjoyed the happy occasion were Messrs. Grover Crane, Aubra Morgan, Kermit and O. B. Workman, Johnny Sherat, Melvin Scoggins and Misses Bonnie and Velma Morgan, Alma Ruth and Ida Rene Crane, Beatrice and Eunice Moore and Aleana Scoggins. All report a fine time.

Misses Enza and Hazel Capps of Groesbeck, visited Misses Bonnie and Velma Morgan last week.

Lee Capps and family visited the Bob Grissom family Saturday.

Mrs. C. E. Locke, of Muleshoe is visiting her daughter, Mrs. C. L. McKinley and family, this week.

Mrs. C. L. McKinley, who has been ill several weeks, is reported better, and is expected to fully recover in a short time, from having her teeth extracted.

For Sale—Crop of 150 acres, 14 acres in cotton, balance feed. Teams and tools. Sell altogether or separate. J. M. Renick, 7-1-2 miles southeast on John Janes' land. Sudan, Texas. R. 1.

Trades Day Posponed To August 27th.

At a meeting of the Business Men's Association the latter part of last week, it was decided to hold Sudan's Trades Day, August 27th, instead of August 20th, as announced. The date being changed on account of the 5th Annual Celebration of Amherst being set for Friday and Saturday, August 17th and 18th. Please remember that Sudan's Trades Day will be on Monday, Aug. 27th. Final announcement and program with premium list will be published next week.

Auto Accidents On Increase All The Time

Statistics have announced that in 1928 there will be 23,500 people killed in traffic accidents. Twenty-thousand deaths in one year! As many lives as were lost in the battle of Gettysburg! When are we going to wake up and do something about it!

All of these deaths, of course, will be accidental. Barring some that will be caused by drunken and mentally deficient drivers, they will all be caused by people who have the best intentions in the world—people who, today, would give their automobiles away if they knew they were going to take a life some time this year.

The speeder will cause some of them—the man who is in such a hurry to get wherever he is going that he forgets the pedestrians, little children, especially, can suddenly appear on the highway without warning.

The road hog will cause others—the driver who wants to stick in the middle of the road, the driver who makes it a point of honor not to give an inch more space to the other motorist than he has to.

The "take-a-chance" idiot will cause many more—the driver who zips by another car on the wrong car on the wrong side and trusts to luck that the other driver won't happen to pull over towards the curb until he gets by.

The slow-poke, who usually thinks he is a very careful driver, will be responsible for quite a few. This driver, you know, plods along at twenty miles an hour, forcing other cars into the wrong traffic lanes when they pass him.

The "in-and-outer"—the driver who weaves a cork-screw track through heavy traffic, tooting his horn and scraping fenders as he goes—will have plenty to answer for, too.

And last, but not least, there is the man who loses his temper—which is apt to include any of us. When another car spurts by you and cuts in pretty close in front of you, you get sore, don't you? You have an impulse to dart in ahead and cut in close to it to get even, don't you? Well, don't do it. Ninety-nine times out of a hundred it would be all right, but the hundredth time might cause a wreck that would take several lives. You can't afford to lose your temper in an automobile.

Our traffic toll is a national shame. Sooner or later we must devise some system of traffic control far better than we now have. In the meantime, it is up to each individual car to handle his car always so that there is no chance of his hitting any person or automobile.

Bureau Meeting

Lamb county Bureau meeting expecting more than five hundred people in Littlefield Friday August 10 at 2 p. m. at Palace theatre.

The renewal marketing agreement embodies all the essential features of the old agreement and in addition the "Price Taxation Pool" and a provision for the cancelling of the agreement at the end of each alternate year.

Some cotton producers who have never signed any marketing agreement and some who have signed one find two major objections to our present contract, and will answer a request to sign up about in the following words, 1st I have to wait too long for my money, 2nd I have nothing to say about when my cotton is sold and when I get final statement.

The new agreement makes provision for these objections in the daily or 'price fixation pool'. Where the member may ship his cotton and draw the advance in the usual way.

He may have the cotton sold as soon as the bill of lading and draft reach the Dallas office if he so desires or any day thereafter that suits his convenience. Or he may ship in the seasonal pool just as we have been doing for the past several years.

At Levelland Saturday there was about one hundred people present and after they finished signing up there was found to be seventy-seven contracts signed adopting the new agreement. Surely the people of Lamb county will do as well.

Remember the new agreement does not take any essential features from the old agreement, but just makes it more liberal so as to suit the convenience of a large number of cotton producers as well as the business interests who are interested in the "proceeds" of our cotton crop.

M. S. Hudson, our District Director, of Hale Center, will be present to explain the new contract fully. If we can give him an audience equal to the meeting in April last year, we can all hear about the new agreement in a very short time.

Everybody come.

J. W. Hammock.

Opens New Hamburger Stand

A. E. Ketchum who has been operating a hamburger stand in the Blanchard building, has moved into the building next to Stuarts Cash Grocery, and is serving the public with those good hamburgers, pies, barbecue and other good things. Mr. Ketchum stated to a representative of this paper, that he would arrange to serve short orders and breakfast in a short time.

Card of Thanks

I want to thank the voters of Commissioners Precinct 4 for their liberal support during the campaign just closed and their vote at the poles July 28. I shall do all that I can to merit your confidence during the coming two years as your commissioner.—Ellis J. Foust.

E. S. Gee, who resides 6 miles west of town, has been confined to his room this week on account of illness.

Looks Like 8000 Bales

The Lornhorn was quite long-legged and capable of enduring a prolonged march of four days' duration, without food or water.

He could subsist on mesquite and prickly cactus and many other breeds of cattle shipped from other states fell exhausted and died on the march, while the sturdy, persevering Longhorn reached the land of food and water in better shape than when he started.

And when the plains were opened up and ready for occupancy and its rich virgin soil was being turned over to bring forth production many a sturdy, horny-handed son of toil had as much to start on as the Longhorn on a forced march, that embraced at times a distance of two thousand miles or more.

Many of these farmers had hardly enough mule power and agricultural implements to begin with, but by perseverance and hard work transformed what you might say, to a certain extent, was a former wilderness to a land of everlasting productivity.

John Trotwood Moore, celebrated novelist, in one of his books, referred to the Shannadoah Valley of Tennessee and eastern Virginia as being "The Dimple of the Universe," in making reference to the diversified agriculture in what we readily admit is a beautiful country. But were Mr. Moore alive today and accompanied the editor of this paper on a trip through this country on Sunday last he probably would have given the above title to the Plains of Texas.

Old methods of tilling the soil have become obsolete, the successes of these toilers have been so brisk that prosperity, through industry, has smiled upon them, and are the owners now of all machinery known to modern agriculture.

Tidy and substantial dwelling houses are visible everywhere and modern out-buildings and barns greet the eyes of those who pass this way.

And especially those from the East who pass over these Plains—and there are quite a few of them—and know its history and have read the stories of "The Staked Plains," gaze in amazement—they seem to slant their eyes for a glimpse of the picturesque cowboy with his broad sombrero and forty-eight, trim saddle with steel front horn to wrap his lariat, perched on his intelligent mount, when of a sudden a cordial "Howdy" comes from a field of waving grain and the housewife in a perfect sea of chickens, cows, hatcheries and then when a trim auto shoots out the gate and off to town—the vision is gone.

Providence has blessed this county and surrounding counties as well. Rains, in abundance, came just at the right time—when the cotton, a tiny little struggling plant, drank deeply of the life-saving moisture, rapidly leaped into maturity and unfolding its delicate pink petals to the farmer's gaze, threw new life into his other activities and his efforts have not been in vain.

For the benefit of those who do not know we have to say that Lamb county is noted for the production of corn, maize, cotton, watermelons, fruits and vegetables of all kinds in profusion.

The price for maize on 1926-27 crop averaged \$1.50 a hundred, with prospects of an advance this year.

Maize fields have been yielding on an average from a ton to two tons. We hope for an increase.

Sudan gins during the same two years reached 6,000 bales. The outlook is it may reach 8,000 bales this year.

Besides these bumper crops on hand farmers are going into the poultry industry on a large scale, many breeds of the fowls in general being experimented on at the present time in order to determine the best production. This means a saving to his own account and an added product which readily finds a cash market.

Cattle, hogs, poultry, up-to-date dairies, in addition to other production, is going to make some pretty thrifty people in Lamb county.

It is a known fact that a child must crawl before it can walk.

It is true also of towns.

At least it has been so with Sudan.

And now that Sudan has got on its pegs and able to bear out that proverb she is beginning to show other towns not only knowing how but actually doing things.

She also wears short skirts and bobs her hair. Which goes to show she's getting there.

Every business house in Sudan is occupied.

Seven new homes have gone up, you might say, in the last few days, each containing five rooms or more and all modern conveniences.

Erection of three new brick buildings and at least ten new residences are in view.

Know Thyself

The man who knows just what he's about, Must have his own number, without any doubt. It is only by knowing himself that he can Be able to judge and size up his man. He who is able to judge a man right Wins many a battle without having to fight. So study yourself, it's the very best plan You have of knowing the other man. The First National Bank has found that you Must know yourself to know who's who.

The Colfax Bookplate

By AGNES MILLER

WNU Service

© by The Century Co.

SYNOPSIS

On a certain Monday morning Miss Constance Fuller, seller of rare books at Darrow's Bookshop, New York, notices that the first customer is a dignified old gentleman, who saunters into the alcove placarded "Medical Works." Peter Burton, one of the employees, amazes Constance by telling her he paid \$518 at auction for an old law book containing a Colfax bookplate. Suddenly a girl's shriek of "Murder!" rings out. The elderly customer is on the floor unconscious with his right wrist slashed. Just before the shrieking girl falls in a faint, she calls out to Peter: "Keep it! Keep it for me!" Peter's sister, Nancy, began that morning working at Darrow's. Nancy tells Constance of her elopement with Brandon Tower, an elopement which was cut short when Tower attempted to make off with Nancy's suitcase. Constance explains Darrow's card-index system to Captain Ashland, a nephew of Mr. Darrow's. They examine the book Peter paid \$518 for and find the bookplate to be a forgery. Constance is asked to assist Detective Almy in his investigation of the murder of the elderly gentleman. The girl who fainted, Julia Grosvenor, turns out to be his granddaughter. She can throw no light on the mystery. Constance removes the bookplate from the old law book and discovers a small key secreted in a hollow on the cover. She makes other discoveries, too. The next day it is discovered that the book has been taken from a locked drawer in Constance's desk.

CHAPTER VIII—Continued

"On examining the bookplate with a magnifying glass, I noticed on it an object that bore the same pattern—in miniature, of course—as the arrangement of those sixteen slits you see on that paper. I took the object as some kind of surgical instrument, as it was on a table with others I could identify, such as the scalpel. This instrument had sixteen slits, six down the center, a row of five on each side of the central row."

"All the same size?" asked Mr. Roberts, eyeing the yellow note again.

"Yes, just as those slits are."

"What did this instrument look like?"

"A small, cube-shaped box. I can't even guess its purpose. It has what I take for a handle on the back, and something that looks like a small lever on top. But, since this instrument appears on the bookplate in this book which conceals a key, and on this yellow slip, picked up just before the accident, there is found pierced the pattern on the instrument. I fancy there's some connection among all these facts."

"Tell me about this key," said Mr. Roberts.

I described how it was fastened into the book cover, and made a rough sketch of it, also of the instrument drawn on the bookplate, which he then recollected having seen the day before. I related how I had heard the time-clock ring twice in the course of the past evening, at twenty minutes past seven o'clock and at a quarter past ten; how, directly after the second time, I had seen Mr. Case and the stranger standing below me as I waited on the balcony; how the two recognized each other in silence, and how the stranger vanished. I concluded with all the details of the morning, including Mr. Case's asking for the book, and returning it untouched.

"It's most unfortunate you had to be here alone all morning," frowned Mr. Roberts; "but it's time to send for Almy, and tell him all you've discovered, or believe you've discovered about that book."

"Do you really think it's important? At last!"

"Possibly; at least, something of what you say confirms a fact hitherto held in confidence; to know it now may help you. You saw Mr. Case searching, you believe, for this book which you think an object to so many persons. Well, he was absent from the conference on Monday morning shortly before eleven o'clock; and during that time he was seen in the rear of the bookshop."

The thrill that ran through me was anything but pleasant. Mr. Roberts continued:

"He stepped out of Mr. Darrow's office, saying he wished to get a certain list of books from Miss Wilkes, whose office is of course on the fourth floor. A few minutes later he returned with the list, but he was seen during that time coming down the rear gallery stairs into the shop."

"Who saw him?" I demanded.

"Miss Grosvenor. She doesn't know him; but in the course of accounting for her movements, to Almy, she described having seen Mr. Case that way."

"Do you think there was any connection between him and Grosvenor after all?" I hazarded. "I thought he said he didn't know him."

"No; what he said was that he had never seen Mr. Grosvenor in the shop, as you and the other clerks had. It

may be that he did know him. Your statement of his interest in this law book, provided it can be proved that Mr. Grosvenor also had an interest in it, might confirm this idea."

"Why did I lose that book! And who took it?"

"Perhaps Almy can trace it. At all events, we have this note of yours, your statements, and your sketches, to work on. And don't let worrying over past mistakes lead you into further ones. This case isn't growing less troublesome."

"What's happened now?" I faltered apprehensively.

Mr. Roberts looked decidedly disturbed as he replied:

"It has been learned that Miss Grosvenor, in accordance with a frequent custom of hers, visited her grandfather's safe-deposit box last Saturday; she alleges that he sent her, that she delivered to him two thousand dollars in Liberty bonds, which he wanted for some transaction; and a complete memorandum of their numbers was found in his desk, in her writing. But on Wednesday these bonds were sold in the market for Charles MacIvor, her cousin."

"But I thought he sailed—"

"The radio message regarding his grandfather's death could not be delivered. He was not on the ship."

I was thunderstruck. I recalled Ernesto's "She likes him pretty good. I'm sorry," and how Julia herself had told me her cousin had sailed—how strangely she had spoken of him.

"What does she say?" I finally asked.

"She insists she gave the bonds to her grandfather, and knows nothing further about them."

"Looks bad," said L.

"Yes," said Mr. Roberts. He had agreed with me! I left the office in a panic.

CHAPTER IX

Night at Normandy Terrace

Nancy was awaiting me at my desk, as it was two minutes past five o'clock. She insisted on my accompanying her forthwith to Normandy terrace, declining my offer to appear tactfully just before dinner.

So we went forth. "Say, who do you think spent last evening with me?" Nancy asked.

"I couldn't guess," I returned, simulating enthusiasm, but really tired, out and worried to a point where I didn't care at all.

"Cheer up; you'll be interested when I tell you. It was that Miss Grosvenor who lives downstairs."

"The ideal!" I gasped, galvanized into life again. "So soon... really, you oughtn't... where was—"

"Peter? Gone to Raynes Foreside, you remember. I hope some other time he will have a chance to meet her; she is a nice girl, though not sophisticated. I had met her on the stairs that morning, and introduced myself as a new neighbor, and asked her to come and see me if she felt like society any time, because I felt like a fool."

"Doesn't it seem a little soon after her bereavement for her to be making calls on a stranger?" I suggested frigidly.

"No; not under the circumstances. She's been almost alone ever since she got back from the hospital Tuesday. We had a nice time. I made a point of telling her how good Peter was to me, bringing me to that lovely apartment—"

"What?"

"And I showed her his picture, and told her how everybody thought such a lot of him at Darrow's. And she told me about her work in the Aldrich studios, which she simply loves. But

French Houses Pretty, but Not Comfortable

Have you ever—but of course you have—raced down in a too swift train from Cherbourg to Paris, through the French countryside on a spring afternoon when all the apple trees in Normandy are in full bloom? And through the trees you catch a glimpse of little old farmhouses that have stood there in the midst of their flowering orchards for centuries? Enchanting, these little houses; but according to modern standards hardly comfortable. says Arts and Decorations. Once inside, we should find the rooms too small and crowded; the windows too small to admit of proper ventilation; the kitchen antiquated, and the work done there made doubly difficult because of lack of equipment. No, these little houses are lovely to look at; on a walking trip, if night came on too

Early Golf Balls

The game of golf was old and well developed when it was introduced into the United States. The first games were played in New York in 1890. Solid rubber balls were used. Earlier in the history of the game balls made of feathers encased in leather, were employed, but not in this country.

I'm sure she detested her grandfather."

"I'm amazed that she should have even hinted such a thing!"

"Do you really think she would have had such rotten taste, especially when he was dead?"

"Then what do you mean by saying she didn't like him?"

"I said I thought not," said Nancy, meekly. "I saw in the paper that he had a million dollars, so of course anybody would have liked him if possible. But she had to work terribly hard, and she never seems to have had any fun. She invited me to go to see her this evening, but I said you were coming to see me; so, as she remembered your name, she said, from having heard that you took care of her when she fainted, she invited you, too. . . . No, it's not impossible to go, because I have accepted for both of us."

"Perhaps," it occurred to me, "Miss Grosvenor, having extracted the information she desired from me the other day, is now in a mood to give some. The evening may be profitable, after all."

So, after a suitable interval had followed an excellent dinner snugly presided over by Ernesto, I followed Nancy downstairs to the second-story door which, unknown to her, I had entered two days previously. The long room, with its bright ceiling and rosewood furniture, over which lamplight

Next Second a Man Sprang Through It.

now shed a softening glow, made her eyes dance with delight; but she introduced me demurely enough to Julia Grosvenor, who made no reference to having received me before, though she was cordially itself.

Yet soon I felt sure I should never pass an evening more consummately dull. Julia did not mention even the most ordinary of her own affairs, and I could not help wondering if the matter of the vanished bonds had not made her even more secretive than before. I grew wearier and wearier after the sleepless vigil of the night before, and felt increasingly peevish over the wasted evening.

"I fear, Nancy, we've already kept Miss Grosvenor up too late."

"Oh, you don't want to go yet!" protested Julia.

"We don't want to go at all," Nancy assured her; "not from this lovely room! I've never seen so much nice furniture; and I know quite a lot about furniture, for one so young. My father has stacks of mahogany four-posters and applewood corner cupboards and banjo clocks. How he

Burial of Giants

To bury a woman who died at Maquass, South Africa, the services of 30 men were required. The coffin was 3 feet 4 inches high at the shoulder and 6 feet 3 inches in length. Twenty men had to assist in putting the corpse into the coffin, and 30 pallbearers lowered it into the grave. The deceased, who was a young woman, had been bedridden for a year. Owing to her weight a special bed had to be made on the floor.

Greek Gathering Place

In ancient Greece the Agora was the place of assembly, usually the market place.

would love that enchanting little sewing table!" She indicated the miniature table I had noticed on my first visit. "We've nothing like that, though I've seen some in antique shops."

"That's something special, though," returned Julia; "it's just a dummy, a cabinet-maker's model. It's not useful for anything but ornament. My grandfather frequently had such objects made, when he was in the lumber trade, to show off samples of wood. But if you'd like to see something really quaint, I'll show you my pet candle stand I made in five shades of green, that gave me quite a nice idea once for a big lampshade they liked at the studio. Wait just a minute!"

She went off through the door at the rear of the long room, leaving Nancy rapturously beginning another puzzle, and me highly impatient. It was late. Somewhere I had heard a clock striking eleven, not long before. The silence in Normandy terrace, profound all evening, was now becoming unearthly, particularly for a spot one block from Broadway. Even Nancy sat perfectly quiet, her eyes on her book, as if the night chill had frozen her. And suddenly that strange chill in the air was a cold wind, blowing across the room.

I glanced at the door through which Julia had disappeared. It was shut. I turned swiftly to the French window behind my chair. Slowly, cautiously, it was opening.

Next second, a man sprang through it, from the balcony into the shadow between the windows. From beneath his visored cap, his eyes swept the room. I leaped up, so did Nancy, her eyes glittering like chips from a blue glacier. The intruder rushed forward headlong, knocking over the chair from which I had retreated. The rear door burst open, a strange loud click sounded somewhere; but there was no time to shriek a warning before Julia Grosvenor, collapsing against a distant bookcase, cried out in a mingled astonishment and anguish that rallied me to her support against all misgivings:

"Charles! You . . . again!"

The intruder, a tall, handsome young man, flashily dressed, tossed his cap on the table as if he felt quite at home. "Pardon me for interrupting your party, Julia," he said easily. "Of course I didn't realize you might be having one. Still, this is the only practical way I could get here. Other people, you see, are trying the ordinary ones. Dear me, have I already frightened away one of your guests! Sorry!"

Nancy had indeed disappeared. I had not noticed her departure until that moment. But I had no intention of following her, however clear the visitor's hint to that effect might be, for Julia cried out in a desperate voice:

"Don't go, Miss Fuller! Please don't leave me!" She was in an almost uncontrollable state of terror. I was frightened, myself, especially by the cocking of that revolver the minute before. But it would not have been like Nancy to run from danger, and Julia made no motion to leave the room.

"But why, my dear Julia," interposed the visitor, smoothly, "do you ask this lady, with whom I have not the pleasure of being acquainted, to stay. I shall be gone within five minutes; all I wish to see you about is one of those family matters which are such a bore to one's friends."

"I won't see you alone!" flared Julia, with unprecedented vigor. "If my friend will stay, you can say what you have to say before her, or else not at all. What do you suppose she, or anyone else, would think of your breaking in here this way, at this time of night? You'd better say something first to explain that!"

The young man bowed obediently.

"My excuse must be," he observed to me, "that this is my own house. My name is Charles MacIvor, and I have the honor to be Miss Grosvenor's cousin."

I may have succeeded in conveying my opinion of him without speaking. He turned abruptly to Julia.

"You know what I've come for," he said. "Have you got it? I'll make a most liberal settlement with you. You can stay here as long as you like. Haven't I explained that to you over and over again? Think about it. You owe me something."

"I haven't got what you want," said Julia shortly. "Do you think I'm not telling the truth? When have I had a chance to get it?"

"Where is it?"

"Where it's always been."

Charles MacIvor swore under his breath. My attention was fixed on him. His face was unfamiliar; yet its bold charm was arresting, and there was something vaguely familiar about him as he stood there gazing menacingly at his young cousin. Yes, it was that cap, more unmistakably, that rapid determined glint. I had seen Mr. MacIvor, with that cap on his head, stand up from beneath my desk the previous night at a quarter past ten, and walk with that same headlong stride past Mr. Case and out of Darrow's front door!

And I had seen him on the stairs in this house last Monday noon when I was in the restaurant with Nancy, posing before the hall mirror, and hurrying down the hall. And I knew now the reason why at that moment he had seemed vaguely familiar; because I had seen him dash down the aisle of the shop that same Monday morning, with his brief-case! So this was Charles MacIvor, Julia's cousin. And was he in pursuit of the object regarding which Julia had cried out to Peter, an hour or two after Charles MacIvor had dashed down the aisle, "Keep it for me?"

Small Bears Clearly

Not Wanted at Feast

Yellowstone park ravens and magpies evidently never heard of Elsha; at any rate they certainly have no fear of bears.

Ranger Thad POUND was making his rounds a short time ago, when he noticed a great commotion among a flock of ravens and magpies. Upon investigation he found that the center of the disturbance was a very much distressed she bear with a pair of cubs which were receiving the mauling of their lives from the birds' beaks. The cubs were rolled over on their backs, trying to defend themselves with their paws, while the mother was hard put to it to shield her lustily bawling offspring.

The occasion of the battle was the carcass of a winter-killed elk, on which the birds had evidently been feasting. Interrupted by the bears, they had resented the intrusion and turned to do battle with the unwelcome guests.—Kansas City Star's Science Service.

Earth's Curvature

The geological survey says that in surveys of small tracts of land no account is taken of the fact that the surface of the earth is spherical. The irregularities of the surface more than make up for the curvature. True north and south lines are not parallel, but get closer and closer together as they go north or south from the equator. For large areas the curvature of the earth is apparent. In the general land office surveys the curvature shows. The blocks of a square mile are made as nearly square as possible, the error from curvature being all thrown into the northwest corner of each six-mile block.

Cecile's Sharp Wit

Here's the latest on Cecile Evans, Hollywood's sharpest wit. The story, told by James R. Quirk in Photoplay Magazine, goes that she drove her roadster into the temporary garage of a four-thousand-dollar-a-week man on the First National lot. Along came the Rolls-Royce.

What do you mean by stalling your contraption in my garage?" yelled the justly irate F. T. A. W. M.

"I'm sorry," apologized Cecile. "I saw one of your pictures last night and I thought you were through here."

Fooling Evil Spirits

Among semi-civilized races interchange of dress is a serious business and is practiced regularly. In many of the numerous islands in Australasia, whenever a man is troubled with an evil spirit he leaves his home secretly, dons a woman's dress, assumes a female voice and pretends to be other than he really is.

Children's handkerchiefs often look hopeless when they come to the laundry. Wash with good soap, rinse in water blueed with Red Cross Ball Blue.—Adv.

In Love

"Why is Eloise on the roof with a telescope?" "Aw, she's lookin' for a letter by air mail."

Hope is all right when it forms a partnership with Hustle.

Sincerity recognizes sincerity.

Predatory Bird Shot

A great American osprey, habitant of the sea and sometimes called the "ocean fish hawk," was brought down near Lancaster, Ohio, recently. The big bird, the only one ever seen in Ohio and one of the very few in the United States, was shot by William Loving, who saw it in the act of carrying away a lamb. The bird measured 6 feet between wing tips.

In Doubt

"Has the book a happy ending?" asked Alfred.

"I don't know," responded Eloise.

"Don't know?"

"In the last chapter they are married and begin hunting for an apartment."

ALLEN'S FOOT-EASE

Stops the pain of Corns and Bunions and you can walk all day in ease and comfort. Nothing gives such relief to hot, tired, aching, inflamed or swollen feet, blisters or calluses. A little ALLEN'S FOOT-EASE sprinkled in each shoe in the morning will make you forget about tight shoes. It takes the friction from the shoe. Always use it for dancing and to break in new shoes. For Free Sample and Foot-Ease Walking Doll, address ALLEN'S FOOT-EASE, Le Roy, N. Y. In a Pinch, Use Allen's Foot-Ease

Farmers to Use Planes
Many owners of large farms in South Africa are considering the use of airplanes for trips to the city. Farms in that country are enormous in size, as a rule, and planes could also be employed in making trips of inspection. Yards are so large that there is ample space for landing at the owner's front door.

The chronic bore would make a splendid population for some desert island.

Peace Registers Victory

A peace note, Secretary Kellogg's proposal of a treaty outlawing war, open to the signature of all nations, is now assured of success. Peace has scored a significant victory over the war god.

In June, 1927, Briand sent to the United States a treaty "denouncing war as an instrument of internal justice." But this was in substance an alliance with France which might incense

other nations, so Kellogg proposed to bring other nations in and make the treaty multilateral, "condemning war as an instrument of settlement, substituting pacific means always instead of war." Borah brought the measure before the Senate and it was worked over and sent back to France. There was the problem of defensive warfare and the effect of this treaty on existing treaties. Reservations were offered and finally made acceptable to all.

France, Germany and Italy accepted the treaty in its final draft and have agreed to sign. Great Britain has indicated her approval and is expected to sign soon. Signature and ratification will probably be accomplished by fall.

The signature of this treaty is a substantial and moral victory for peace. It depends wholly upon the honor and good faith of the signatory nations because there is no means of enforcement except the power of international respect for treaties. In other words, when the nations sign this treaty they will agree not to resort to warfare in settling difficulties. It is the first deliberate and sincere effort of nations to abandon war as a national policy. It is like two men agreeing to settle their dispute in court rather than with knives, clubs, fists and guns.

The significance of the treaty lies in the fact that it is the first effort of the United States to enter into a definite agreement with a group of nations or all nations not to make war, and to

FOR HOME AND STABLE

The extraordinary Borozone treatment for flesh wounds, cuts, sores, galls, burns and scalds is just as effective in the stable as in the home. Horse flesh heals with remarkable speed under its powerful influence. The treatment is the same for animals as for humans. First wash out infectious germs with liquid Borozone, and the Borozone Powder completes the healing process. Price (liquid) 30c, 60c and \$1.20. Powder 20c and 60c. Sold by H. G. Ramby Drug Store

AN EXHILARATING EFFECT

A bottle of Herbine on the shelf at home is like having a doctor in the house all the time. It gives instant relief when the digestion gets out of order or the bowels fail to act. One or two doses is all that is necessary to start things moving and restore that fine feeling of exhilaration and buoyancy of spirits which belongs only to perfect health. Price 60c. Sold by

H. G. Ramby Drug Store

collaborate with them in maintaining peace. It may be called, so far as peace is concerned, a supplementary league of nations, working to thrust aside war and maintain peace by all the available means that lead to peace and preserve it.

When this treaty is signed the United States necessarily becomes an active participant and collaborator with the nations to maintain peace. It enters the peace councils of Europe and will have to be consulted before peace is broken. This treaty, therefore, is considered highly significant by the entire world.

The world is coming to see the futility of war as a means of settling disputes. It is beginning to realize that war only adds to disputes rather than settle them with a cost that is terrible. It is beginning to realize that the next war would pale into insignificance the horrors of the last war; thus world the welcomes with gladness this new note of world peace.

Progress.

At every crossing on the road that leads to the future, each progressive spirit is opposed by a thousand men appointed to guard the past. Let us have no fear lest the fairest towers of former days be sufficiently defended. The least that the most trained among us can do is not to add to the immense dead weight which nature drags along.
—Maurice Maeterlinck.

Dangers.

Thirty-nine people in a year slip on soap in the bathtub and are injured enough to collect insurance damages. This is the record for just one company, the Aetna, which also pays damages to 505 injured in a year by tripping over rugs and 369 who fell down stairs. Sixteen golfers collected damages for being hit by golf balls and nine others for falling into bunkers. Five dancers had valid claims from colliding with other dancers.

Acorn Alcohol.

Up to the present time no industrial use has been made of acorns, but recent experiments show that alcohol can be made from them. Shelled acorns contain about 40 per cent of starch which can be readily saccharified and then converted into alcohol.

New Alloy for Grate Bars.

A new alloy for grate bars with only a 50 per cent higher cost than cast iron is claimed to possess from three to ten times longer life.

To Make Them Believe
In 6,000 years of history that we know of it has never been considered necessary to lock someone up.

The Nineteenth Hole.
At an English inn a group of golf enthusiasts were discussing over the drinks their wonderful performances on the greens that afternoon, when the jolly proprietor said: "I'm sorry, gentlemen, but it's time to put up the shutters, so we'll have to shut up the putters."—Boston Transcript.

London's Unhealthy Areas.
In some of the more crowded parts of London, the "unhealthy areas," there is an average of 53 houses and 415 persons to the acre, according to statistics gathered by a committee of the Ministry of Health. The "standard of density" recommended by this committee is 12 houses and 60 persons to the acre.

The Sixth Sense.
"Cupuncturesia," a sixth sense that enables the possessor to intuitively perceive the truth, has been discovered by a French scientist. He asserts that this sixth sense is especially developed in women. A lot of husbands will wonder why this is hailed as a recent discovery.—Omaha Bee.

Gilders of Early Times.
Short gildes in the air were made as early as the reign of King Harold of England by a monk named Elmer, who, after several successful flights jumped from a lofty tower with wings strapped to his body. He glided for a furlong or more, when, striking a cross air current, or "air pocket," he fell to the ground, breaking both legs. He attributed the accident to his neglect "to fit on a tail."

Smoking a Real "Deadly Sin."
Smoking is a real deadly sin in some countries today. It is probable that more men have died from tobacco smoking at the hands of Sikhs, Senussis and Wahibis, whose religions forbid this practice, than died under the Roman empire for professing Christianity.

Fish Not Brain Food.
It used to be believed that certain foods, especially fish and other foods containing phosphorus, were especially valuable for the gray matter of the brain. This is not believed any more. Brain cells apparently use the same kinds of food materials as all other living cells do. The best way to feed the brain well is to keep the body in good health.

His Qualification for Service in the Tanks

After a six weeks' intensive campaign, Richard Barthelmess and his fellow-players in "The Patent Leather Kid" company were honorably discharged from the United States army at Camp Lewis, Washington.

While at Camp Lewis some of the finest battle scenes were screened. More than 3,000 United States regulars and 600 civilians participated in the war spectacle, which is featured by the 50 huge United States tanks.

During the shooting an extra came up to Richard and announced he'd like to enlist in the tanks.

"Why so keen about the tanks?" asked Dick.

"Oh," replied the applicant modestly, "I'm a pretty good swimmer."
—Film Fun.

Death to Cats of Rome

The mayor of Rome, Italy, has issued a decree which puts an absolute ban on all cats in the interest of public health. The excuse that they keep down the number of rats and mice is met with the statement that there are much more effective ways of doing this than by the use of cats.

Charity is a cloak that is sometimes used to cover an amateur conceit.

Perhaps the moon is called silver because it comes in halves and quarters.

NURSES know, and doctors have declared there's nothing quite like Bayer Aspirin for all sorts of aches and pains, but be sure it is genuine Bayer; that name must be on the package, and on every tablet. Bayer is genuine, and the word genuine—in red—is on every box. You can't go wrong if you will just look at the box!

Aspirin is the trade mark of Bayer Manufacture of Monocetate Ester of Salicylic Acid

COOL HOT WEATHER DRESS FOR GIRL

Excellent Type of Sleeveless Garment for Summer.

(Prepared by the United States Department of Agriculture.)

Here's an excellent type of sleeveless dress for a little girl to wear on warm afternoons in summer. It was designed by the bureau of home economics to be made from any plain commercial pattern that has kimono sleeves with a seam on the shoulder. The armholes are made at the point most becoming to the child. Carried out in white or pastel shades, it is pretty enough for a party, and yet if developed in colors, such as old rose, green, delft blue or even darker shades, it would be entirely suitable for ordinary wear on hot summer days. The material is fine cotton voile, and the only trimming consists of the stitched design in leaf green yarn, and the neck binding and tie of green voile to match. This dress is so simple that it can be cut out and made on the sewing machine in about two hours.

The armholes and front opening are bound in the white voile, and slight gathers are taken in at the neck and bound in green voile. To make the stitched trimming, the yarn is wound

A Cool Hot Weather Dress for a Little Girl.

on the bobbin, after loosening the shuttle tension, and white thread is used for the upper stitch. The design is marked and stitched on the wrong side of the material. The turned-back corners of the square pockets are also trimmed with the stitching. These pockets are made of a double square of voile, and turned with the seams in. They are in keeping with the design on the front.

It is a good idea to use a double bias neck binding about three-fourths of an inch wide when folded. The raw edges and the top of the dress are seamed together, with the binding lying on the right side of the garment. The binding is then folded over, but does not have raw edges to be turned under on the other side. A second stitching, also on the right side, very close to the first seam, holds the folded edge and makes a neat finish.

Hems on any dresses are much more attractive if put in by hand, and often set better than when stitched on the machine. On children's dresses hand-sewed hems facilitate letting the dress down when necessary. The first hem should be very wide to allow for growth. In sheer materials like voile, the turned-under part of the hem will look best if it is the full width of the hem, and the allowance for letting down can be taken care of in this way.

SHRINKAGE IN HAM CAN BE PREVENTED

Thermometer Assures Success in Cooking Meat.

(Prepared by the United States Department of Agriculture.)

Could there be any roast meat more savory and appetizing for high days and holidays than a choice baked ham, crusted with browned sugar, studded with cloves, and redolent of the spicy pan gravy with which it has been basted? Success in cooking such a ham to a turn is assured if you use a meat thermometer, the bureau of home economics of the United States Department of Agriculture tells us.

Whether a ham is to be boiled or baked, it cooks more rapidly and shrinks less when the rind is left on it. Make a tiny slit with a sharp knife or a steel skewer and insert the meat thermometer through the rind into the center of the thickest part of the ham, place it on a rack in a large kettle, cover with hot water, and cook at the simmering point until the meat thermometer registers 160 degrees Fahrenheit. Remove from the fire and let the ham cool in the liquor. The temperature of the ham will reach 170 degrees to 174 degrees Fahrenheit before it drops. Before baking a ham, soak it overnight in water to cover. Place it on a rack in an open pan and bake in a slow oven (200 degrees Fahrenheit) until the thermometer in the meat registers 160 degrees Fahrenheit. The temperature at the center of the ham continues to rise for about 45 minutes after it is removed from the oven and it will reach 170 degrees to 174 degrees Fahrenheit. Take off the rind, score the fat, coat with the brown sugar mixture, and return to the oven. Whether boiled or baked, the time required for the ham to reach 160 degrees Fahrenheit will be about 25 minutes to the pound.

In addition to greater uniformity of results at different times of cooking and more exactness in results, the thermometer helps to prevent overcooking, so often the cause of lost flavor, poor appearance, and unnecessary shrinkage.

Apricot Charlotte Good as "Company" Dessert

Here's a "company" dessert that will appeal to your guests, whether young or old. It must be made several hours before it is wanted, and that is always an advantage, since it permits the housewife to "get the dessert out of the way" and give her attention to other dishes on the menu. The bureau of home economics sponsors the recipe:

1/2 lb. dried apricots 1/2 cup boiling water
2 1/2 cups cold water 1/2 pint whipping cream
1 1/2 lbs. gelatin 1/2 cup sugar
1 cup sugar 1/2 teaspoonful salt

Wash the apricots and soak them over night in 2 cups of cold water. Cook the apricots until soft in the water in which they were soaked and press them through a fine sieve or colander. Put the 1/2 cupful of cold water over the gelatin and after it stands for 5 minutes add the boiling water. Stir until the gelatin has dissolved, then add the sugar, salt, and apricot pulp. Chill and fold in the cream which has been whipped. Line a serving dish with lady fingers or slices of sponge cake, and pile the apricot mixture lightly in the center. Place the dish in the cold for an hour or more before serving.

Cottage Cheese

One gallon of skim milk will make about one and one half pounds of cottage cheese. If the milk is sweet it should be placed in a pan and left in a clean, warm place at a temperature of about 75 degrees F. until it clabbers, when it should have a clean, sour flavor. Ordinarily this takes about 30 hours. A small quantity of clean-flavored sour milk mixed with the sweet milk will hasten the process, according to the United States Department of Agriculture.

CREAM CHEESE IN ROLLED SANDWICHES

Cream Cheese Mixed With Finely Chopped Watercress.

(Prepared by the United States Department of Agriculture.)

The rolled sandwiches in the illustration, taken by the United States Department of Agriculture, are spread with cream cheese mixed with finely chopped watercress. Chow chow, chili sauce, or any desired pickle mixture might have been used in place of the watercress. Equal parts of soft cheese, chopped olives, pimientos, or green peppers, and nuts might be used. Many different finely chopped vegetables may be worked into cream cheese to be used in this way. Some of the best liked are parsley, watercress, lettuce, spring onions, chives, radishes, cucumbers, and celery. Onion or lea-

on juice may be included in the seasoning.

The bread for rolled sandwiches should be fresh and elastic in texture, so that it will not crumble or break when rolled. Spread the sandwich mixture on the cut end of the loaf, then with a very sharp knife, cut off the thinnest possible slice, roll it up, and trim the ends.

Toasted crackers are used for the round sandwiches. In a hollow on top of each a little colorful jelly is placed. These crackers should not be spread until just before they are to be eaten, as the cheese softens the crackers if allowed to stand.

POULTRY

SKIM MILK FOR HENS IS FAVORED

Skim milk is great pig feed, but the man who feeds the milk to his hens and takes his profit in the form of increased egg yields is the one who makes the most money from his milk, according to Iowa State college poultrymen.

Seven years of continuous experimentation at the college has proved that milk, when fed to poultry, will return from three to six times as much profit as when fed to pigs. It has also been found that, when eggs are selling for not less than 30 cents a dozen, skim milk is worth around \$2 a hundredweight as feed for good pullets. There is practically no difference between the value of skim milk and buttermilk for poultry, repeated tests have revealed.

When hens fed tankage or meat meals as their main source of protein were compared with those that also had milk, it was found that the milk-fed birds outlayed the tankage-fed birds by 25 to 40 per cent during cold weather. Milk should always be fed sour because birds will consume more of it in this condition. It has a slightly laxative effect and the lactic acid combats many disease germs.

From October 1 to May 1 it is profitable to give the hens nothing but milk to drink and from May 1 to October 1 they may be allowed to choose between milk and water. When birds are given all of the milk they will drink, the amount of tankage or other packing house by-products may be reduced one-half, for milk furnishes one-half the protein necessary for laying hens. The Iowa poultry specialists advise the keeping of only as many birds as can be supplied with milk.

Laying Hens Need Moist Mash in Warm Weather

Summer feeding of farm poultry can be carried on economically and to good advantage, says Cora Cooke, extension poultry specialist at the university of Minnesota. The amount of feed required on the average farm is less than in winter, a higher production can be counted upon, and prices of eggs are usually ascending after the low period caused by the spring surplus. The specialist points out that the cost of the ration can be reduced by cutting down the meat scrap one-half and omitting it altogether if plenty of milk is available, and also by reducing the amount of corn and, in the case of dual purpose flocks, omitting it entirely. "The principal thing to look out for is that plenty of mash is used," he says. "As warm weather comes on a moist mash once a day will do wonders in keeping up egg production. Hens that molt early should be disposed of before poultry prices drop in the early fall." Reports of storage conditions presage a favorable season, says Miss Cooke. A recent report said that 13 per cent fewer eggs and 39 per cent less dressed poultry are in storage than a year ago.

Marking Broody Hens to Cull From Laying Flock

There is a wide variation in the amount of broodiness in hens in the same flock. Some lay a comparatively few eggs between spells of broodiness. Others go broody rarely if at all. An excellent practice is to mark through some method or other the number of times the hens become broody during the season.

A simple and yet effective method is to use celluloid rings to slip on their legs. A bunch of rings of one color can be used, thus leaving other colors for other marks if desired. Each time a hen is placed in the broody coop or set, if the chicks are hatched and raised with hens, a ring can be placed on her leg. Any hen that accumulates more than two before midsummer could be culled from the flock. Frequently a hen will go broody every two or three weeks, even when she is placed in the broody coop at the first sign of broodiness. Such should be sold or eaten at the third attack.

Proteins in Whey

Whey contains milk sugar, fat, minerals, and proteins of very high quality. It is therefore an excellent feed for poultry. However, it contains only about 6.6 per cent of dry matter, therefore it is difficult for a hen, with her limited capacity, to consume enough to supply her wants. Keep the usual feeds before the hen, so that she will be sure to get enough to eat. Since the whey contains so much water, it would be well to take away other sources of water.

Poultry Prospects

Says the Massachusetts Agricultural college: "The outlook for egg, broiler and poultry prices is slightly better than in 1927. Feed costs on the other hand are expected to continue high, at least during the first half of the year." We've covered nine sheets of paper trying to figure out whether that's intended as encouraging or discouraging, says the Farm Life. Our own opinion is that poultry looks better this year than last, and we're going right ahead for a better flock.

Take American Apples

Denmark has taken to heart that maxim about an apple a day and is buying more American apples. Purchases have tripled in five years. Most barreled imports come from Virginia, but California and other states also ship the fruit. Smaller quantities are obtained from Australia, Italy and the Tyrol.

Colored Sugar Latest

Cleopatra's pearl liquor is modernized in the drinking of "jewels" with the after-dinner coffee in Europe. The "jewels" are tiny crystals of sugar, colored like amethysts, topaz, sapphires and other gems. The sugar is said to be healthful and palatable as well as attractive.

If we thought our advice were going to be followed, we'd offer much less.

No Wood in This House

A house without a single sliver of wood in its construction is being built in Gary, Ind., for the president of a local steel company. The framework is made of angle-irons with a complete system of diagonal bracing. Both bolting and electric welding is used to fasten the steel together. Concrete is used in the foundation and for the floors, while stairs, sills and interior trim are all steel.

His Final Mistake

"You've been a most faithful husband, John. I believe that not once since you married me have you done a wrong thing."
"No, my dear, that was the last."—Montreal Star.

The man who never engages in an argument with a woman is wise indeed.

PEXEL is the last word in jelly making

PEXEL always makes jelly jell. Absolutely colorless, tasteless, odorless. Unlike other products, Pexel is a pure fruit product—100%. Doesn't change taste or color of most delicately flavored fruit.

Pexel saves time and fuel. More than repays 30c it costs. More jelly—fruit, sugar and flavor aren't boiled off because, with Pexel, the jelly is ready for glasses as soon as it comes to full boil. It jells by the time it is cool. Get Pexel at your grocer's. Recipe booklet in each package. 30c. The Pexel Company, Chicago, Ill.

Not Today

Little Betsy was gazing out of the window one afternoon during a recent severe storm. She saw the sun become overshadowed by heavy clouds and the day grow almost dark. "My, there won't be any daylight savin' today," she said sadly.

Commercial Discovery

It has been discovered that the hot mineral waters of Bath, England, will permanently tint glass, and it seems possible that the well-known health resort may become a famous glass-staining center.

The charm of a bathroom is its spotlessness. By the use of Red Cross Ball Blue all cloths and towels retain their whiteness until worn out.—Adv.

Don't insure your life and then proceed to work yourself to death.

Old age doesn't boast any more; it only grows gently reminiscent.

Man's Greatest Benefactor

Truly, the Cow is man's greatest benefactor. Hail, wind, droughts and floods may come, destroy our crops and banish our hopes, but, from what is left, the cow manufacturers into the most nourishing and life-sustaining foods--and is she not life itself to the thousands of little ones dependent upon her? We love her for her docility, her beauty and her usefulness. Her loyalty has never weakened--and should misfortune overtake us, as we become bowed down with the weight of years, we know that in the Cow we have a friend that was never known to falter. She pays the debt. She saves the home. God bless the Cow--little do we realize the debt we owe her!--Selected.

Mr. and Mrs. L. J. Sullivan and children, of Vernon, were guests of Mr. and Mrs. W. R. McDaniel last week. They were enroute home from Amarillo.

CHILDREN'S FATAL DISEASES

Worms and parasites in the intestines of children undermine health and so weaken their vitality that they are unable to resist the diseases so fatal to child life. The safe course is to give a few doses of White's Cream Vermifuge. It destroys and expels the worms without the slightest injury to the health or activity of the child. Price 35c. Sold by

STUART'S CASH GROCERY

Earning, Saving And Spending Of Equal Value

Andrew Carnegie, one of the world's greatest exemplars of thrift, was once asked which he considered the most important, earning, saving or spending. He replied by asking which of the three legs of a stool was the most necessary.

It would be well if this understanding of thrift were widespread.

The three factors in the process of acquiring and using money are inter-dependent and it is false doctrine to over-emphasize saving.

We see examples every day which tend to prove that quite a large percentage of the people give insufficient attention to spending or investing. There are opportunities on every hand for earning money and it is difficult in these times and under present conditions for the average person to save something out of his income. But the amount of money which is lost through the unwise use of savings is now said to be greater than the annual growth in national savings deposits.

With the vast majority of people the annual growth in national savings deposits.

With the vast majority of people the accumulations of savings is a slow process, requiring great patience and persistence. The margin between income and the necessities of life is not wide. Hence it is all the more unfortunate that greater attention is not given to the problems involved in the proper use of savings.

The trouble very largely lies in the fact that people do not give sufficient study to these problems. Incidents are not uncommon where persons have parted with the savings of years on the misrepresentations of total strangers. Every saved dollar represents hard work and great patience. Just as much thought

and care should be used in administering it as is requiring and saving it. If this rule were applied by every one there would be a tremendous elimination of lost or wasted money.

It is the part of good thrift to be as careful in letting go of your dollars as you were in getting hold of them.

A barber was much surprised to receive a tip before he had cut his customer's hair.

"Thank you! It isn't many who tip us first," he said.

"That isn't a tip," snapped the man in the chair--"that's hush money."--Prairie Farmer.

In San Antonio, designed by the noted sculptor, Gutzar Borglum, a bronze plaque depicting the face of the late William D. Winburn, San Antonio Light city hall reporter, and suitably inscribed, will be hung in the San Antonio municipal building. Mr. Winburn, who was a young man, was killed in an airplane crash while working on a feature story for his paper, was honored in death when the municipal airport was named for him.--Auxiliary.

Mr. and Mrs. L. E. Slate, and mother, Mrs. Bert Slate, of Iowa, returned Tuesday from Carlsbad where they spent several days outing.

Mr. and Mrs. C. T. Mason and children, of Olton, spent the week-end with their daughter, Mrs. W. R. McDaniel and family.

Automobile Etiquette.

Authorities on etiquette agree that when a man and woman are riding together in a carriage or automobile the woman should be seated on the right. If the vehicle is not so placed that the woman, in stepping in, can easily move over to the right side, good form permits her to take her seat and allow the man to step across to his seat. Some authorities regard it as extreme for a man to walk to the left side of the car to enter. In case there is no door in attendance the man can close the door as he steps into the car.

This England.

"I am English, born and bred," announced the political candidate. "My father and grandfather were English, my wife is English, my works are in England and my workpeople are all English. I stand before you as an English candidate." And then a pitying voice came from the audience: "Oh, man, hae ye nae ambition ava?"--Sporting and Dramatic News (London).

Condensed Music.

Little Benjamin, aged four, had two pets--a canary and a cat. One unlucky day the door of the cage was left open and the cat was caught in the act of swallowing the last morsel of the poor bird. Little Benjamin gazed at the cat a few minutes in sorrowful meditation, and then suddenly asked: "Mamma, will pussie sing now?"

Available Gabriel's Call.

What has become of the man who always wanted to die "with his boots on?" He has a son who now expires peacefully in bed sans tonsils, appendix, a tumor or two, and with a silver plate in his knee joint. Times have changed since the pioneer days of America--worse luck!
