WIHITA, Kans., Dec. 11 .- Officers claimed a solution of three murders after the alleged slayer, a 37-year-old farm hand, had been improsined behind the walls of the Kansas State reformatory, to save him from an infuriated mob.

The confession implicating the farm hand, Jack Wisdom, in the slaying of Mr. and Mrs. Harry Pritchard and Emory Large, was obtained shortly before Oklahoma officers found the body of Pritchard, a Wichita clothing merchant, ear El Reno, Okla.

Wisdom was arrested Sunday after a three week search was taken to the reformatory at Hutchinson, after a wild ride through Oklahoma and Kansas with an angry mob in pursuit.

MEXICO ABOLISHES THE QUICK DIVORCE INDUSTRY

Mexico, the republic of the Aztecs, has a supreme court. Well, that court handed down a most important decision. It'should interest many Americans. This is the ruling: A divorce decree obtained "without both parties having a hearing was invalid, thus opening a way for many Americans to appeal against Mexican divorces obtained by the husband or wife without the mate's consent." This ruling practically kills the quick divorce laws of five Mexican states, but it covers the entire republic of Mexico for the reason that local courts always follow precedent and that the quick action decision practically kills the while-youwait divorce industry of the sister republic. Many Americans have obtained divorces in Aztecland. Many divorced Americans remarried. And yet there are Americans who say that "Mexico is not a civilized nation."

TEXANS AND THEIR TAX BURDENS

"No use wavering between illusion and proven fact," editorializes Facts and Fiction magazine for November. "The plain record tells its own story. An annual tax bill, state, city, county and district, aggregating in excess of \$270,000,000, to say nothing of federal taxes, is rather conclusive that we are working for taxes rather than that our taxes are working for us. Then there's that \$119,000,-000 delinquent taxes, protesting as forcefully as figures can protest that there now exists an urgent ned for a closer and more sympathetic relationship betwen government and the people governed."

This is the advice of the veteran editor of the Texas magazine to the readers of his publication: "President District: needs of the moment should come first. If anyone thinks that in these subnormal times there is no need for utmost Fellows et al. vs. James Shaw, economy in the conduct of government affairs he is mistaken. If anyone things that the present is a convenient time, by taxation, to lasso a lot of the few remaining dollars he is mistaken for the second time. And, if anyone thinks that our annual tax burden, state and local community, amounting to considerably in excess of \$200,000,-000 of dollars, is not a menace to industrial stability HE ers & General Ins. Co. vs. Mrs. Taylor. IS MISTAKEN FOR THE THIRD TIME.

As a parting shot, the editor of Facts and Figures pass- vs. Mrs. Frona Ames, appellee's vir. vs. City of Abilene et al., Tay es this on to the reading public: "A tax burden, state and local communities, aggregating in excess of \$200,000,000 annually, does not reflect decent economy in the conduct of public affairs. Delinquent taxes, state and local, aggregating upwards of \$119,000,000, does not prove the population's ability to pay." There are practical politicians everywhere who are clamoring for additional revenue. This is passed on for their edification: They should step out in the barn lot and take a lesson from the rooster. Just for crowing so loudly in the early morning he loses his head hefore noon.

JOHN BULL MAKES THE DOLE PERMANENT

- John Bull instituted the dole before the coming of the

World War. This to keep "the starving from starving." Well, the dole has been continued all the years. Now the Betterton unemployment insurance measure has been given its second reading by the house of commons. According to its author-sponsor, it is one of the most constructive pieces of legislation ever introduced at Westminister. It is socialistic, of course. It is divided into two parts, dealing with insurance proper and with assistance for able bodied unemployed who are outside the scope of the insurance division has been extended to include a total of 16,000,000 persons. James Ramsay MacDonald, a socialist, is prime minister of a Tory government and the king of England. today, is a mere figurehead just as the king of Italy is the puppet of a dictator who says the last word for the people of Italy and the Roman empire-republic of the 1933 model.

DID YOU EVER STOP TO THINK

By EDSON R. WAITE, Shawnee, Oklahoma

It is said that the Printer's Devil you have so often heard about is really quite a person after all. His is an ancient title and although he is described as the "youngest apprentice in a printing shop" and is a printer's errand boy, there is more behind his title than just that.

One of the most famous of the early printers was Aldo Manuzio, who flourished in Venice during the fifteenth century. He employed a negro slave in his office and many of his customers believed the boy to be an imp of Satan. This proved to be bad for trade so Manuzio decided to use the boy to advertise his business. He paraded the boy through the streets and had the public crier announce. "I Aldo Manuzio, printer for the Holy Church and the Doge. have this day made public exposure of the Printer's Devil. All who think he is not flesh and blod may come and pinch

Business picked up after that, which just goes to show

that advertising paid.

Today things have changed. Newspaper advertising has taken the place of the old methods. It is the whip and spur for all business.
