EARTHQUAKE!

A VERY SEVERE SHOCK EXPERIENCED AT BUNDER ABBAS, PERSIA, ON JULY 9.

HOUSES COLLAPSE

GOVERNOR'S PALACE AND THE CUSTOM HOUSE DESTROYED.

WERE PANIC STRICKEN

The Population Flocked to the Beach for Safety and Only One Fatality Resulted—A Worse Disaster Feared at Kishim.

Bombay, July 18.—A severe earthquake shock was experienced at Bunder Abbas, Persia, on the morning of July 9.

It lasted three or four minutes and was followed by lighter shocks. The governor's house, partly collapsed and the custom house was destroyed.

While the population were panic-stricken and flocked to the sea beach for safety only one fatality was reported.

The shocks are believed to have originated at Kishim island whence loud detonations were distinctly audible at Bunder Abbas.

It is feared the destruction at Kishim has been heavy.

A few years ago an earthquake at Kishim killed hundreds of people.

THE NEW DATE SET FOR KING'S CROWNING

An Official Notice Promulgated Today Fixes the Coronation Ceremonial for August 9—Rehearsals in Progress for the Event.

London, July 18.—Official notification was issued this morning that by the king's command the coronation of King Edward and Queen Alexandra will take place August 9. Rehearsals of the procession from Buckingham palace to Westminster abbey took place this morning and officials of the various state departments concerned in the abbey ceremony are again busy with preparations for the crowning.

Uncle Sam Not Represented.

Washington, July 18.—The United States will probably have no special representative at the crowning of King Edward next month. Whitelaw Reid has informed the state department that he sails for home on July 25.

FRED LEE RICE HANGED.

The End of a Celebrated Criminal Case at Toronto. Toronto, Ont., July 18.—Fred Lee Rice was hanged here today for the murder of Constable William Boyd, June 4, 1901. It was the celebrated case, involving the death of two officers, William Boyd and Walter Stewart, at the hands of Rice and his pal, Frank Rutledge and the suicide of Rutledge in jail.

THERE WILL BE NO STRIKE.

Delegates to the Miners' Convention Oppose a Walk Out.

Indianapolis, July 18.—This morning sentiment among the delegates to the miners' convention was fully as strong as ever against a strike and all danger of such an event has now passed. The anthracite men favoring the strike admitted there was no chance of a walk-out.

The convention devoted the forenoon to the discussion of an amendment to President Mitchell's recommendations by which relief funds may be used for the benefit of all striking miners bituminous as well as anthracite. No decision was reached. Dillin Bros' Milk Bread has more substance in it than any other.

WILL FIGHT FOR THREE DISTRICTS

REPUBLICANS ARE APPREHENSIVE OVER FALL RESULT.

Desirous of Regaining Galveston District and Taking in Two Others.—Hawley Declines the Nomination.

Austin, Tex., July 18.—(Special.) Trouble is brewing for the Democratic congressional nominees in three southern districts. As the result of a conference held in Galveston ten days ago the Republicans will soon begin campaigns in the Seventh, Ninth and Fifteenth with a view of regaining the first and capturing the other two.

In the conference were former Congressman Hawley and United States District Attorney McLemore of Galveston, United States Marshal Hanson of Houston, George Burkitt of Palestine, and Banker Carl Dilworth of Gonzales. Information was given that the Republican campaign committee feared losing the next house, and had urged all possible endeavor to cut into what promises to be a solid delegation from Texas.

Ex-Congressman Hawley, what sat several years in Washington from the Galveston district, has refused to become a candidate against Gregg of Palestine, the Democratic nominee. Burrow, a wealthy German of DeWitt county, will probably be the Republican candidate against Burgess in the Ninth, and John C. Scott an attorney from Nueces county, will head

the Republican ticket against John Garner of Uvalde, Democratic nominee.

Democrats apprehend no trouble unless it be in the Galveston district which is the only one that has ever given a Republican majority. Hawley's reason for declining the nomination is said to be on account of personal business. He is heavily interested in Cuban lands and the sugar industry.

VERDICT OF CORONER'S JURY.

The Daly-West Mine Officials Held Blameless.

Park City, Utah, July 18.—The coroner's jury returned a verdict holding the officials of the Daly-West mine entirely blameless for the accident by which 35 men lost their lives.

THE BIG OIL WELL IS STILL BURNING

The Experiment of Snuffing Out the Flames with Steam and Chemicals Will Be Tried This Evening or Tomorrow.

Jennings, La., July 18.—The situation in the oil field here is unchanged the fire still burning with as much fury as ever. Some say it is increasing, but the operators deny this.

Workmen are busy digging trenches to drain away the oil and throwing up levees to prevent any further spread of the fire. Two cars of chemicals which will be used in addition to the steam have arrived and were immediately taken to the field. It will not be until late today or perhaps not until Saturday that all things will be in readiness to make an attempt to put the fire out with steam and chemicals.

A SWINDLER

GEORGE G. COREY ARRESTED BY THE POSTAL AUTHORITIES IN NEW YORK FOR MISUSE OF MAIL.

MISUSE OF MAILS HE THREATENING LETTERS TO FARMERS.

HIS CAREER OF CRIME

He is Supposed to Have Operated in Europe as Well as in the United States and to Have Stolen \$500,000.

New York, July 18.—By the arrest of George G. Corey, in Paterson, Putnam county, New York the postal authorities believe that they have closed the career of an alleged daring swindler, whose operations are alleged to have extended from this country to England and France, and who has stolen not less than \$500,000.

It is the belief of the postal authorities that the prisoner is identical with Charles Corey whose success in persuading the members of the Corey family all over the country to advance him \$10,000 on the pretense that he could place them in possession of an estate in England worth \$10,000 recently came to notice.

In Paterson, Corey is said to have announced he was a great grandson of John Drake, and that, as his heir, he was the true owner of large tracts of land in Putnam and West Chester counties, the deeds for which he is alleged to have possessed.

Corey insisted after his arrest that he was not a swindler, but that the estates actually existed, and that they were worth not less than \$10,000,000. He was locked up in Ludlow jail.

REPUBLICAN RIVALS TO MEET.

Messrs Roosevelt and Hanna to Attend the Same Gathering. Cleveland, O., July 18.—Committee of Hungarians will soon call upon President Roosevelt to ask him to attend the dedication of a statue that is to be erected in honor of Louis Kossuth in the public square in this city.

CROOKED BANKING IN BERLIN.

Directors Are Found Guilty and Fined and Imprisoned. Berlin, July 18.—After many weeks' trial the directors of the Prussian Mortgage bank and allied concerns charged with falsifying the balance sheet were sentenced to various terms of imprisonment and fines.

Doing and Thinking.

Mamma-Bessie, why don't you wash the dishes? It is easier to do a thing than to sit and think about it. Bessie—Well, mamma, think about it. I'll sit and think about it.

Admire a girl's hat, and she will tell you that she didn't like it after she got it home and tore it all to pieces and retrimmed it.—Achtson Globe.

POSITION IN SLEEP.

Night Habits That Affect Their Dominance Over All Mankind.

There are few persons who can tell offhand just what positions they assume to find sleep, and yet there is not an individual in the world who has not some trick of distributing limbs and trunk to insure slumber's blissful spell which he practices unconsciously. This is a night habit as perpetual and immutable under normal conditions as the succession of the seasons.

It is seldom of our own deliberate volition for sleep, as you will find tonight on going to bed if you remember these words. In truth, if you do not seek to combat the instincts you will be surprised at the dispositions of the various members involuntarily made. If you endeavor to sleep by a new arrangement of the body, you will also be surprised by the revolt against slumber which will surely ensue, but even before the struggle is well begun you will probably surrender and permit the all-masterful night habit to re-instate those little details of position which long practice has made necessary to your comfort.—Family Doctor.

Things Borrowed.

Along with the habit to pronounce people's names correctly, to reply promptly to notes and the like another mark of the regard for the rights of others which indicates inherent borrowed articles. In cities and large communities there is comparatively little of the kitchen borrowing that does not find a fairly good list of borrowed articles accumulated in the course of the year, a book from this friend, an umbrella from that, a written recipe from another, a bit of fancy work as a model from another, and so on.

To Take Out Ink Quickly.

Clerks and others who write in their shirt sleeves are often annoyed by getting their immaculate linen ink stained. If the stain is allowed to remain until the garment reaches the laundry, the process of washing will produce an indelible brown mark, but for a few cents any writer can guard against annoyance and loss of this kind, for a little chlorinated soda will remove every suspicion of ink stain almost instantaneously. It is only necessary to rub the soda in and then rinse or wash it out with a few drops of water, and all trace of the ink is gone.

Breaking a Custom.

At one time if a Japanese girl married a foreigner she was instantly depreciated. A Portuguese gentleman was probably the first European to marry a daughter of the land of the chrysanthemum with impunity. He went there years ago and fell in love with a Japanese girl. Her parents warned her of the fatal consequences of marrying him, but she persisted, with the result that the mikado decided that she must be beheaded. However, after a correspondence of over five years' duration between the Portuguese and Japanese governments she was permitted to live.

Human Bait For Leeches.

In meridional Russia and especially in the innumerable ponds of the basin of the Don and Donetz rivers the inhabitants gain a remunerative livelihood, though dangerous and disagreeable, in leech fishing. Bare legged they tramp about the water, and leeches fix themselves upon the bare flesh. As soon as the fishers reach terra firma they remove the flabby animals and deposit them in an earthen vessel. It is a painful and weakening operation and sometimes even fatal.

The Town of Mothers.

The town of Leonberg, in Wurttemberg, is known as the "town of mothers," for there the mothers of Schiller and Kepler lived. On the walk of the old castle where the magna charta of Wurttemberg liberties was signed by Ulrich, the well beloved, tablets have been placed in honor of the mothers of the poet and the astronomer.

By His Own Efforts.

Joax—Young Sumpkins has at last succeeded in carving out a fortune by his own efforts. Hoax—Why, I was under the impression that he married an heiress. Joax—So he did, but he had to cut out a dozen other fellows before taking up his residence on the sunny side of Easy street.—Chicago News.

Amiability Rules.

Don't flatter yourself that friendship authorizes you to say disagreeable things to your intimates. On the contrary, the nearer you come into relation with a person the more necessary do fact and courtesy become.—Holmes.

Nothing to Laugh At.

"Writing jokes must be a funny way of making a living." "It isn't. I have tried it and I know it is no laughing matter."—New York Times.

THE PHILIPPINE FRIARS.

Cardinals Will Whom Taft Is Arranging Their Disposition.

The commission of cardinals negotiating with Judge Taft at Rome relative to the disposition of church property in the Philippines is composed of some of the ablest men in the church. Three of them—Cardinals Rampolla, Vannutelli and Gotti—are regarded as being strong candidates for the papacy. With them is Cardinal Vives, the most scholarly of the Spanish cardinals, and one other.

Judge Taft is assisted in the negotiations by Judge James H. Smith of the Philippine supreme court, Major John Biddle Porter of the judge advocate general's office and Bishop O'Gorman, Sioux Falls, S. D.

The falls at issue arise from the separation of church and state consequent on the American control of the islands. The main point is the withdrawal of the friars from the Philippines. This the United States insists

CARDINAL RAMPOLLA.

on, will purchase the friars' lands at a price agreed on by the arbiters. The government will also pay indemnity, to be fixed by the arbiters, for the occupation of ecclesiastical buildings.

Cardinal Rampolla, head of the commission of cardinals, is a noble Sicilian family. He is now in his fifty-ninth year. He is of tall, straight and well proportioned figure, with black hair streaked with gray, dark complexion and mild, dark eyes to which drooping eyelids give a somewhat passive expression. His step is firm and elastic in spite of a nervous ailment.

Cardinal Rampolla's chief charge is to act as mediator of foreign affairs, to receive ambassadors, send papal instructions to nuncios and delegates and to see that they are carried out. He is also president of the committee for the administration of the property of the holy see.

The cardinal is an indefatigable worker. He has not been one day absent from Rome since he took up the duties of his present office. He rises early and devotes the first hours of the day to meditation, mass and prayer. He is a man of great piety. Amid all the distractions of the secular cares of his office he has preserved the priestly habit.

Fifteen Kinds of Kisses.

The monks of the middle ages divided the kiss into fifteen distinct and separate orders—the decorous, or modest kiss; the diplomatic, or kiss of policy; the sly kiss, to ascertain if a woman has drunk wine; the slave kiss; the kiss infamously, a church penance; the slipper kiss, practiced toward tyrants; the judicial kiss, the feudal kiss, the academic kiss (kissing the cross), the religious kiss, or joining a solemn brotherhood; the hand kiss, the Judas kiss, the medical kiss, for the purpose of healing some sickness; the kiss of etiquette; the kiss of love, the only real kiss.—London Tit-Bits.

GOOD AS CANDY.

Children Like Grape-Nuts.

Wise selection of food will help any one. The healthy people can keep well and those who are ill can obtain sure benefit by the steady use of Grape-Nuts. A lady says, "To say that Grape-Nuts Food has been a help to me is putting it very mild indeed. For seven years I was an invalid suffering from extreme nervousness and weak, tired, exhausted feeling. I was compelled to lie down several times each day and the least exercise exhausted me. I was also unable to sleep nights. I read many times of the remarkable results from the use of Grape-Nuts Food and finally decided to try it. I ate Grape-Nuts three times a day in different styles for about three months, then twice a day, and have realized a wonderful benefit. I have grown strong and almost entirely well. Can do all my own work, and seldom have to lie down until I go to bed at night, then I enjoy restful sleep. I do not become fatigued as I used to and am able to study more in my line of work as it used to. My brain does not get weary as it used to. My stomach is strong and I can eat and eat three hearty meals a day. We would hardly know what to do without Grape-Nuts for the house. The children often say: 'Mamma, make a great big pudding this time.' They enjoy the food as they would candy." Name given by Postum Co., Battle Creek, Mich.

MACHINISTS WALK AT SAN ANTONIO

SOUTHERN PACIFIC MEN WENT OUT AS WAS EXPECTED.

Other Craftsmen Will Follow if Demands are not Granted—Frisco Officials Inspect the Arkansas & Choctaw and are Pleased With Their New Purchase.

The strike of machinists and helpers in the shops of the Southern Pacific at San Antonio developed yesterday as was expected, 70 men laying down their tools and going out. The molders, blacksmiths and other craftsmen did not join in the movement, as they are awaiting the issue of their case as laid before the management of the road at Houston. Should these demands be denied they will join the ranks of the strikers. This leaves the road practically without machinists between Houston and El Paso, as those at Del Rio are expected to go out today in sympathy.

The demand of the strikers is for a 10 per cent increase in wages. The machinists receive 33 cents per hour; apprentices from 10 to 27 1-2 and 30 cents; the handy men from \$2 to \$2.25 per day, and the helpers from \$1.50 to \$3.

EUREKA SPRINGS.

Something of the Frisco's New Hotel and Other Attractions.

W. A. Tuley, general passenger agent of the Frisco returned last night from a visit to Eureka Springs, Ark., where he superintended the opening of the Crescent Hotel which is now under the management of the Frisco system. He is enthusiastic over the success of the enterprise. He says the house has been thoroughly repaired, renovated and refurnished. An electric elevator and other important improvements have been made, making it elegant as any hotel in the United States. It will be open the year round under the management of E. B. Sumner, late of the West End hotel, St. Louis and the New Gayso hotel, Memphis, while the office is in charge of A. G. Lewis, recently chief clerk of the Worth hotel of this city, where he has many friends. A first-class orchestra, bowling alleys, tennis grounds and ping pong tables have been provided, also a thoroughly up-to-date grill room. When Mr. Tuley left, there were about 100 guests already there and many applications for rooms from prominent people in Texas.

Mr. Tuley says that George T. Williams, a prominent live stock commission broker of Chicago has just completed and opened the Palace bath house, which is equal to anything in this country, being supplied with every modern convenience with tub, vapor, electric and Russian Turkish baths. The building is four stories high, is built of stone, and is equipped with a modern elevator, while the top floor is fitted up with elegant sleeping apartments. There is also a first-class barber shop connected with the establishment.

Eureka Springs, says Mr. Tuley, is provided with a first-class and up-to-date electric street railway line, operated the year round; is lighted with electricity, has ice plants, steam laundries and other conveniences of a modern city.

ON INSPECTION TOUR.

Frisco Officials Take Trip Over the Arkansas and Choctaw.

A party of prominent Frisco officials arrived in the city last night from the North. The personnel was: B. L. Winchell, vice president and general manager; A. J. Davidson, general superintendent; C. R. Gray, superintendent of transportation; A. S. Dodge, freight traffic manager; Geo. A. Hancock, superintendent of machinery; Bryan Snyder, passenger traffic manager; and J. F. Hinkley, chief engineer of construction. The party has been making a trip of inspection over the Arkansas and Choctaw line that was purchased by the Frisco last week. The inspection is understood to have been satisfactory, the new owners being greatly pleased with the conditions along their new acquisition. The party after a brief stay started on their return trip.

THE BROWNWOOD EXTENSION.

Frisco Officials Took no Final Action Today on the Mason Petition.

The petition of citizens of Brady for an extension of the Frisco line from Brady to that point was under consideration by the officials of the road here today. No determination was reached, however, and the matter is still

pending. Work on the extension from Brownwood to Brady, Mr. Winchell says, is progressing rapidly. Contracts have been let for the entire distance and work is being done all along the line. It was begun only about a month ago but good progress has been made.

In regard to the Arkansas and Choctaw Mr. Winchell believes it to be a valuable acquisition to the system, as it runs through a very fertile country, paralleling the Red river. It has not been determined yet what course will be followed by the proposed extension west from Madill. There is some uncertainty also in regard to the direction of the eastern extension from Goodland, but it will run either to Stamps direct or in a more easterly direction to Hope and at that point make connection with the north and south line that will be extended from Stamps to Hope.

Notes and Personals.

G. W. L. Smith, commercial agent of the International and Great Northern, headquarters at Dallas was a visitor in the city yesterday.

B. T. Boozie of Jamestown, Cal., general freight and passenger agent of the Sierra Railway company of California, is in the city in the interests of his road.

J. B. Bartholomew of Palestine, formerly commercial agent for the Texas and Pacific, now with the International and Great Northern, is in the city renewing old acquaintanceships.

A. J. Newsom and R. E. George, division passenger agents of the Houston and Texas Central, the former with headquarters at Dallas and the latter at Waco, were in the city yesterday on business.

Greenville is to be made the supply depot of the Missouri, Kansas and Texas for bridge materials of all kinds for use along the system. Almost 600 car loads are to be deposited there at once as a beginning.

W. H. Firth, general passenger agent of the Chicago, Rock Island and Texas is expected back tomorrow from Denver where he has been in attendance on the meeting of the Transcontinental passenger association.

A representative of the Katy gives out the information that about 45,000 Finlancers are coming to America, one colony at least being located in Oklahoma. Others will be formed in various sections of the West and Southwest.

Kansas City and Chicago parties are projecting a new railroad from Clinton, Mo., to Hancock, connecting two different divisions of the Frisco. This cut-off, it is thought, is not instigated by the Frisco itself, but is undoubtedly designed for sale to that road after construction.

A meeting of the stockholders of the Union Belt railway at Memphis has been called for July 23, at which time the transfer of 55 per cent of the stock to George Gould will be consummated. This will give Gould a controlling interest in the property.

M. R. Brigance an old time employe on the Texas and Pacific, but who is now located at Honey Grove, is here on a visit to his son and is shaking

hands with old-time friends. He says crops are in fine condition in his section and that in some places corn will make 75 bushels to the acre.

Memphis believes that the long-looked for union depot is in sight. Differences between the Illinois Central and the Louisville and Nashville have been patched up and it is thought the project will soon be put through. Other roads will make the new station their terminals, but just how many has not yet been determined.

New switch yards are being surveyed this week at Parsons by the Katy. Several accidents have occurred at the present location, and it is thought another place will be less dangerous to the public, hence the change. The new site is north of the city limits, and will cover all the ground necessary. One estimate says 100 acres will be required.

For Tat.

In the peace congress at The Hague Lord Pauncefoot attracted the attention of the delegates by taking notes with a fountain pen the handle of which was formed by the shell of a dum-dum bullet. One day the representative of a foreign power, excited by the heat of the discussion in the interests of eternal peace, said to him sharply:

"My lord, it isn't right for you to use that murderous shell in this congress. The instruments used by persons are almost emblematic. They can become a part of themselves, an expression of their ideas and of their personality."

Lord Pauncefoot smiled, but said nothing.

The following day his critic, wanting to write something, turned to the English diplomat to borrow a pen. The ambassador pulled out of his pocket an old fashioned pen made of gray goose quill, and after the borrower had finished said:

"Monsieur, it isn't right for you to use such an instrument in this congress. The instruments used by persons are almost emblematic. They can become a part of themselves, an expression of their ideas, of their personality."

Not Quite Complimentary.

A very ordinary looking nurse was exhibiting the new born sister to six-year-old Bertie.

"Look at the sweet little baby, my dear! Is she not pretty?"

But Bertie, who has been made painfully aware from the servants of the household that the new arrival will usurp his past privileges as an only child, exclaimed with secret exultation:

"Auntie says that pretty babies grow up ugly."

"Maybe they do," assented the nurse, unable to forbear a smile.

But the smile was lost upon Bertie. He stood for a moment in meditative mood, and then, glancing up from his contemplation of baby's features to those of the nurse, he said with childish confidence:

"Nurse, you must have been a very pretty baby!"

SOME EARLY HISTORY ABOUT THIS TOWN

GATHERED FROM REMINISCENCES INDULGED IN BY OLD TIMERS.

Captain Day Was in the Race for Mayor and Didn't Know It—The Vote Was Tied, and Later He Won Out by Three Votes.

Several gentlemen who have seen Fort Worth grow from an inland village to its present magnitude and importance as a commercial and railway center, were in City Assessor and Collector Day's office this morning, some of them having had a brief session with the equalization board, when the conversation drifted back to the early days of Fort Worth. Capt. Day was one of the party. One of the gentlemen present reminded the captain that 28 years ago yesterday there was an election for mayor held in Fort Worth, and that he (the captain) tied a man known as Uncle Larry Steel for the honor, there being three men in the race—Messrs. Day, Steele and John D. Templeton. Day and Steele both beat Templeton, and the two former tied. Ten days later there was another contest between Day and Steele, and Capt. Day beat his opponent only three votes.

The story dates back to 1872, when Fort Worth as a town was incorporated. At that time Dr. Burtis was elected mayor. The terms then were for only one year. He was re-elected each year thereafter, and in 1874 resigned to enter a partnership with Dr. Field for the practice of medicine. His resignation made an election necessary, and the friends of Capt. Day placed him in the field against the two men—Messrs. Steele and Templeton. Capt. Day at the time was in Jack county, and had been there for some time on business. He knew nothing about having been placed in the race until after the election. Upon returning he was apprised of the result and was urged to get out and hustle for the honor. He did so, with the result that he was elected. He served as mayor and recorder for the remainder of that term, and was elected at each of the three years following. At the 1874 election the tickets read "Old Settler" and "New Comer." Capt. Day's opponents were old settlers and he was the new comer, having only been here since 1872.

He had the honor of being mayor when the first railway, the Old Reliable Texas and Pacific, entered the city, and of course recalls with pride the time, and reviews with equal pride the city's growth from that time to its present magnificence, now known the country over as the railway center of the southwest.

Capt. Day was succeeded by the following mayors in turn: Judge E. C. Beckham, Peter Smith, Dr. Broiles, Mr. Pendleton, then Peter Smith again to fill out the unexpired term of Mr. Pendleton, B. B. Paddock and the present Mayor Powell.

Capt. Day recalls how he induced the railway contractors to pay off its hundreds of employes in this city in 1876 when the contract was completed to Fort Worth. The contractors' offices were in Dallas. They had arranged to pay off the employes at Dallas. Capt. Day as mayor induced the contractors to pay off here by promising that no arrests for drunkenness should result, arrests to be made only for fighting or greater violations. The result was there was no trouble, and the merchants and business people generally reaped a great harvest.

LOST—Between stock yard and court house Thursday evening about 6:30 a pair of cuffs with gold cuff buttons, monogram L. V. N., engraved. Finder will be rewarded for returning them to Farmers and Mechanics National Bank.

How Scissors Are Made.

Though no complexities are involved in the making of scissors or much skill required, yet the process of manufacture is very interesting. They are forged from good bar steel heated to redness, each blade being cut off with sufficient metal to form the shank, or that destined to become the cutting part, and bow, or that which later on is fashioned into the holding portion. For the bow a small hole is punched, and this is afterward expanded to the required size by hammering it on a conical anvil, after which both shank and bow are filed into a more perfect shape and the hole bored in the middle for the rivet. The blades are next ground and burnished with oil and emery, after which the pairs are fitted together and tested as to their easy working.

They are not yet finished, however; they have to undergo hardening and tempering and be again adjusted, after which they are finally put together again and polished for the third time. In comparing the edges of knives and scissors it will be noticed, of course, that the latter are not in any way so sharply ground as the former, and that in cutting scissors crush and bruise more than knives.

Eating Nightingales.

As exemplifying the pitch to which Roman epicureanism was carried and indicative of a truly barbaric nature, a dish consisting of the tongues alone of some thousands of the favorite songsters of the air was requisitioned at immense cost to satisfy the inordinate cravings of one of the emperors. One can hardly avoid the reflection that such a being must have been extremely unattractive. The liver of a capon steeped in milk was thought a great delicacy, and of solid meat pork appears to have been most relished.

The stanch Roman who did not take his pleasure homeopathically reclined during dinner on a luxurious couch, his head resting on his left elbow, supported by cushions. Suetonius draws attention to a superb apartment erected by the extravagant Nero, in which his meals were partaken, constructed like a theater, with shifting scenes changing with every course.

The Lightninglike Loon.

The loon is the quickest living creature. A loon that has had experience can dodge the flash of a gun. You see a loon on a lake, but long before you see him he sees you and has taken a mental inventory of you and your belongings. If you have no gun, you may perhaps approach within 100 yards before he laughs at you with that horrid shriek which gives him his name and disappears under the water, but show a gun and he does not stop to laugh—he goes instanter. When in a sportive mood, he sometimes waits until he sees you about ready to fire, when, at the flash, he dives, and you see the shot spatter the water where he has just gone down.

Diamond Fields of India.

Diamond fields in India were known from the very earliest times. In the sacred books of India eight localities are mentioned as yielding diamonds, and of these three have been identified at the present day—Matanga (Kistna and Godavery), Pauda (Chota Nagpur) and Vena Gunza (Wairaghar). The diamondiferous area of India, so far as is known, is perhaps more extensive than that of the rest of the world, and nine-tenths of the famous jewels are Indian stones.

Cooking Ham.

Ham is frequently too salt to fry without previous preparation. Put the slices in tepid water and let them stand on the back of the range to soak out the salt, not to boil, for about half an hour. Drain dry between towels, then fry in a hot spider.

When a whole ham is to be baked or boiled, let it stand overnight covered with cold water.

ARIZONA SHOULD BE MADE A STATE

By Governor M. O. MURPHY of Arizona

ARIZONA today should be admitted to statehood. AS A MATTER OF FACT, THE TERRITORY HAS NOT ONLY MORE MONEY, BUT MORE PEOPLE, THAN TWENTY-TWO OF THE STATES HAD AT THE LAST CENSUS PRIOR TO THEIR ADMISSION TO STATEHOOD.

The political aspirations and possible affiliations of Arizona after admission to statehood may act as a drawback. Suffice it for me to say that there is a larger majority in the senate today than there has been for twenty years, and in the event of the majority granting statehood to the territory of Arizona the people will naturally feel very kindly toward the administration.

THE MATTER SHOULD NOT BE MADE A POLITICAL ISSUE, AND THE FACT THAT ADMISSION TO STATEHOOD OF ANY TERRITORY MIGHT INCREASE THE MINORITY SHOULD HAVE NO WEIGHT. I shall do everything in my power to have the present congress accord the territory of Arizona justice, for that is what I call it.

WHY YANKEE TRADE LAGS IN THE EAST

By ALEXANDER RUSSELL WEBB BEY, Honorary Consul General of Turkey in New York

ETHER THE AMERICAN WORKMAN MUST DO MORE WORK FOR HIS MONEY OR GET LESS MONEY, FOR HIS WORK IF HIS EMPLOYER IS GOING TO WIN THE TRADE OF THE EAST, THAT MAY BE VERY UNPALATABLE, BUT IT IS SOUND AND TRUE, AND I HOPE IT WILL PROVE WHOLESOME.

The bar to American trade progress with the eastern people is that the labor cost of the articles desired by them is greater in America than in the competing European countries. It is idle to argue that the American workman's superior efficiency, more than makes up all along the line for the wage difference. That may be so in the case of a few articles, but in general it is not true.

I have seen a big American clock company fail to compete in Bombay with a German-Swiss house because it could not make the clocks as cheaply owing to the higher pay of the American mechanic. Again, in India I saw English cloth drilling win the market from American competition by reason of greater cheapness, aided by the little trick of stamping it "American drilling." The help that the stamping gave to the victor in this trade competition illustrates the fact that THE AMERICAN GOODS, GENERALLY SPEAKING, ARE MORE DESIRED THAN ANY OTHER ON THE MARKETS OF THE EAST. They have a better finish and a finer appearance than the goods competing, but they are also dearer, and that kills their chance with poor people, as all those orientals are. THE FILIPINOS WANT LITTLE OF THE WHITE MAN'S GOODS. There are millions of them, but it is only possible to trade with the mere civilized ones who inhabit the towns on or near the coast. These will buy American condensed milk and perfumes—they did so when I was there. The semibarbarians will still be content with the milk of the cariboo.

Look Out for a Chill.

However slight, at this time of year and in this climate, it is a forerunner of Malaria. A disposition to yawn and an out feeling comes even before the chill.

Herbine kills the Malaria germ in its very first stages, or cures the disease at any stage. There are no narcotic poisons in it—a purely natural remedy and absolutely harmless. At druggists, 50 cents per bottle.

HOT WEATHER WEARINESS

This misery is caused by bad digestion which has clogged the system with impurities. The liver is overworked, the bowels irregular, producing low spirits, tiredness, poor appetite, unrefreshing sleep, loss of energy and ambition. And, what is worse, it breeds diseases that are serious.

PRICKLY ASH BITTERS

IS A THOROUGH SYSTEM CLEANSER.

This great purifier exercises its reviving influence in every part of the body. Relaxes the bowels and urinary organs, drives out badly digested food, cleanses the system of impurities, sets the whole internal organism to working smoothly and harmoniously thereby creating new life and energy. It is the best known remedy for removing that dull bilious feeling so common in hot weather.

Senator Bailey's Texas constituents are giving him an ovation and crowning him with wreaths of victory.

It is understood that cable communication has been again established between Kansas City and Topeka.

The Texas negro who was killed by a stroke of lightning, while eating a watermelon, undoubtedly died happy.

Herr Most says there is no free speech in this country. He ought to have been at the Galveston convention.

Some children never care to play a game unless they can be "it." That's the way with Mr. Bryan. His idea of Democratic harmony is that he shall be "it."

The dead shot cowboy who never misses his aim can learn of a situation by addressing the Seattle peace officers, who are trying to keep away from Tracey.

Senator Mason talks of coming to Texas for a visit. Texas and Senator Billy, both being big, can form a mutual administration society each admiring the other because of size.

Twenty-six years ago yesterday the Texas and Pacific railroad opened Fort Worth to the outside world. The celebration of the anniversary of the happy day by a fatal accident on the road is a regrettable occurrence.

Merrill, the man who escaped from the Oregon "pen" along with Tracey, the daredevil who has whipped the states of Oregon and Washington both, has been captured by the officers of the law. He had been dead, however, several days when captured.

A telegram to the Mail-Telegram from Austin declares that "trouble is brewing," thus casting reflection upon the industry that makes Milwaukee famous and is doing something for Fort Worth as well. "Trouble is distilling" would be nearer the truth. Whisky not beer is the boss trouble maker.

The long suffering public, the third party in strike proceedings, will some day wake up to the fact that it is being imposed upon and will rise in its might and compel stiff-necked and avaricious employes and turbulent and lawless laborers to come to terms without any "killing or burning" of the innocent. "The public be d—d" policy is not a good one for any man or set of men to pursue.

People who have lived for years in an atmosphere of danger become reckless and careless. If their actions affected only themselves it might be allowable, but when the lives and property of others are involved carelessness in dangerous situations becomes criminal negligence. A careless workman carried a lighted candle into the powder magazine at the Daly-West mine at Park City, Utah, and caused an explosion that killed two score people.

Another thoughtless workman struck a match in the Cambria mine at Johnstown, Pa., ignited the fire damp and the resultant explosion snuffed out 114 lives. Both these sad occurrences in one week emphasize the necessity of greater caution. The average workman these days allows some one else to be the keeper of his conscience and as a result does not feel the responsibility that he should where the lives of his fellow-workmen and the property of his employers are concerned.

Sharps are ever going about like a roaring lion seeking whom they may devour. The latest grafting scheme, and one that is being worked on Oklahoma farmers extensively, is to vaccinate cattle to keep them from taking Texas fever. If the farmer who gives up good money to have his cattle vaccinated would spit on their tails himself and save his money he would be better off, for he would still have the money and would be in no more danger of Texas fever after the one operation than the other.

General Bragg, the first consul-general of the United States to Havana, Cuba, talks too much with his mouth and writes too much with his pen. Statesmen in his position should be seen and not heard. He will likely be recalled for the best explanation he can make of the matter leaves him in a bad light. The Cubans naturally resent his insinuation that Uncle Sam would find it no job at all to make a whistle out of a pig's tail compared with the task of making something out of a Cuban.

Not So Bad. (San Antonio Light.) In a humorous way the Fort Worth Mail-Telegram says: "Princess Josephine Rospiogliosi's second marriage is not acknowledged by the Catholic church authorities. She ought to have been smart enough to have known that something awful would happen when she married a man with a name that looked like a 'pi' line of type." The Roman Catholic church by its laws may not recognize the princess' marriage, but the world will, and it will no less esteem the princess.

PRESS COMMENT. Perhaps the North Texas base ball league can get along best without Waco, but it would be a safe wager that in the organization of a league for 1920 Waco will be among the first to be consulted.—Waco Times-Herald. The caption of an editorial in a recent number of the Fort Worth Mail-Telegram reads, "Are Bibles Becoming Extinct?" We don't believe they are; and if all other means fail we would suggest that the editor advertise.—Houston Post.

Fort Worth elected a mayor and city council pledged to pay all the interest due on the bonds of the city and to refund the latter at a low rate of interest. Now that city has been sued on a number of overdue bonds and for a large amount of defaulted interest, politicians will promise anything to get into office but what they do and do not do afterwards is different. The great need throughout the United States today is men at the head of municipal governments who are both honest and capable.—Terrell Transcript.

Newspaper men will remember that the Fort Worth Mail-Telegram changed hands on April 1 last, having been purchased by a number of Kansas City men, headed by C. W. Hutchinson. The new company, however, was not organized until the first of the current month. The new company has been chartered by the secretary of state, and is now fairly launched under most favorable conditions for making the Mail-Telegram brighter and better than ever. The Post congratulates the new company on its acquisition and wishes it all prosperity.—Houston Post.

Judge W. P. McLean of Fort Worth was fittingly honored in being made the permanent chairman of the state convention at Galveston. He has been the campaign manager for Congressman Lanham in his contest for the gubernatorial nomination. As Mr. Lanham at no time had any opposition there was but little to make, but had there been even a close contest, the coming governor could not have selected a better or more capable man to work for him than Judge McLean. He is the Chesterfield of Texas politicians, commands the respect of the whole party and it is pleasing that he was given the place of permanent chairman of the convention.—Terrell Transcript.

Poisoning the System. It is through the bowels that the body is cleansed of impurities. Saves A Woman's Life. To have given up would have meant death for Mrs. Lois Cragg, of Dorchester, Mass. For years she had endured untold misery from a severe lung trouble and obstinate cough. "Often," she writes, "I could scarcely breathe and sometimes could not speak. All doctors and remedies failed till I used Dr. King's New Discovery for Consumption and was completely cured." Sufferers from Coughs, Colds, Throat and Lung Trouble need this grand remedy, for it never disappoints. Cure is guaranteed by Guthrie & Guthrie, 502 Main street. Price 50c and \$1.00. Trial bottles free.

TEXAS STATE SIFTINGS. The Texas state fair advertising car is at Colorado City. Charles Taylor was killed in a sawmill at Shepherd. Seven negro convicts escaped from a Kaufman county farmhouse. Electrical workers at Galveston are on a strike for union recognition. James B. Speer has been detailed as special pension examiner for Texas. Mrs. George Walters of Hillsboro died of dropsy while taking a bath. Four sub-stations of the San Antonio postoffice have been opened in that city. Rumbold Lehmann, a Marlin farmer, aged 58, was murdered in Hopkins county. North Texas Gun club will open a two days' tournament at Gainesville July 29. Denison will have a big blow out September 23 to celebrate its 30th birthday. Charles Brazil, a bridge carpenter, aged 23, was killed by the cars near Palestine. Ex-Congressman Hawley of Galveston lunched with President Roosevelt yesterday. Mark Sullivan, a railroad laborer, was killed by a steam shovel at Rock Hill, near Texarkana. nor has been asked to offer a reward for their arrest.

Locating Smokeless Guns. The English war office has many schemes for training their soldiers, and which are generally followed up by practical demonstration. The latest is a device for locating guns firing smokeless powder, and its success will mark a new era in military progress. It is also interesting to consider the wonderful advancement in medicine during the past 50 years. It was about that time that Hosieter's Stomach Bitters was first introduced, and during those years has made such a wonderful record of cures of such ailments as indigestion, heartburn, dyspepsia, belching, constipation and liver and kidney troubles, that today it occupies the foremost position as a family medicine. Don't fail to try it. Our Private Stamp is over the neck of the bottle.

THEY LIKE SLOW WAITERS.

Folks Who Would Rather See and Be Seen Than Eat. "That woman will make a kick before her order is filled," said a head waiter at an uptown restaurant one evening, pointing to a well dressed woman who sat with an elderly man at one of the small tables in the palm garden. "How do you know?" the guest asked. "Well, you see, she comes here to 'rubber,' and she came too early. The only way she can fill time is to find fault with what is being served. We have lots of customers of that kind. They dress up in their very best clothes and come here just before the theater crowd arrives. They come to see and to be seen and care mighty little about what they have to eat. "It is fun to see the way they kill time when they come early. An old trick is to get a table and then say: 'We won't order yet. We're waiting for some one.' Some one never comes, and finally the order for some raw oysters or a salad is given, and if we serve them quickly the waiter gets a small tip. If the waiter loafs and serves all the others first, his tip is larger. They nibble and fuss over their little luncheon, and the man in the party usually smokes his cigar to the bitter end before the 'rubber party' breaks up. There, I told you that woman would kick. Do you see the club sandwich going back? It is probably too cold or too hot, but it's neither. It is simply too soon. The 'rubber guest' is a great find for the slow waiter. He is the only guest who puts a premium on slow service."—New York Tribune.

The Domestic's Side of It. "I would much rather work for a family in moderate circumstances than for a rich family," confided a parlor maid. "In a house where there are three servants one gets much better treatment than in one where there are a dozen. Do you know what you eat in a great big millionaire establishment? Why, corned beef and cabbage, chuck roast, beans and potatoes, foods that are good fillers, and for dessert you get boiled rice and for a treat Waldorf-Astoria pudding. Don't you know what Waldorf-Astoria pudding is? That is bread pudding. In a smaller house, where the servants don't number more than two or three, you get ice cream, chicken, rib roasts, fresh vegetables and strawberries. You eat, you see, exactly the same fare that your master does. But in the big place, where the servants number a dozen and where very expensive foods are served every day, it is impossible to let you fare as the head of the house does. It would cost too much money."—Kansas City Journal.

CANCEROUS ULCERS

Are in many respects like other ulcers or sores, and this resemblance often proves fatal. Valuable time is lost in fruitless efforts to heal the sore with washes and salves, because the germs of Cancer that are multiplying in the blood and the new Cancer cells which are constantly developing keep up the irritation and discharge, and at last sharp shooting pains announce the approach of the eating and sloughing stage, and a hideous, sickening cancerous sore begins its destructive work.

No ulcer or sore can exist without some predisposing internal cause that has poisoned the blood, and the open discharging ulcer, or the festering sore on the lip, cheek or other part of the body will continue to spread and eat deeper into the flesh unless the blood is purified and the Cancer germs or morbid matter eliminated from the circulation.

S. S. S. cleanses the blood of all decaying effete matter. It has great antitoxin and purifying properties that soon destroy the germs and poisons and restore the blood to its natural condition. And when pure blood is carried to the ulcer or sore the healing process begins, the discharge ceases and the place heals over and new skin forms. S. S. S. is a strictly vegetable blood purifier containing no mercury or minerals of any description.

If you have an ulcer or chronic sore of any kind, write us about it, medical advice will cost you nothing. Books on Cancer and other diseases of the blood will be sent free.

YESTERDAY'S WRECK OUT NEAR MINEOLA

IT WAS AS BAD AS AT FIRST REPORTED, THOUGH COULD HAVE BEEN WORSE.

Miraculous Escape of Day Coach Passengers—Number of Fort Worth People Included in the List of Injured.

The wreck on the Texas and Pacific railroad yesterday near Mineola was fully as disastrous as was indicated in the brief report given in the Mail-Telegram. The middle portion of the train went through a trestle instead of a bridge, and the structure spanned what is known as Sabine river at a point five miles west of Mineola. It is supposed that the recent high water weakened the approaches, and the tender passed safely over, and when the crash came the sleeper was left on the western approach and the passengers in this coach were safe. Among the Fort Worth people in the sleeper were Mrs. Captain Tom West and her little daughter Allie. There were several Fort Worth people in the other coaches, but the wounds received were not of a serious nature.

The first report that only one man was killed on this night corroborated by later particulars. This unfortunate was the express messenger, Hiram M. Peck of Texarkana, who had been in the service 21 years. He leaves a wife and five children in Texarkana. His remains were interred at that place today.

Following is an nearly a complete list of those who received injuries as could be obtained.

Court Secord, Shreveport, La., hurt internally; W. H. Tucker, Indian Territory, face, head and neck badly hurt; Charley Fenwick, Fort Worth, leg badly mangled; Stuart Nelson, New Boston, very badly bruised; Lulu Wursteane, colored, Dallas, painfully bruised about the head; Valley Wursteane, colored, Dallas, badly bruised about the face; J. A. Warren, Texarkana, slightly injured; J. B. Hammack, Fort Worth, slightly injured; Jim Frederick, Maud, Ok., slightly injured; Mail Clerk Rateriff dangerously hurt on face and head, may die; Sam Floyd, colored, Jonesboro, seriously bruised on head and body; Benette Holston, colored, Reagan, seriously hurt on head and face; Mrs. W. B. Mason, Amite, La., slightly injured; Mrs. J. D. Mayer, Mayer, La., slightly injured; William Burley, St. Louis, seriously bruised; Bristo Young, colored, train porter, badly cut in several places about head and body; Mrs. L. G. Norwood, Kaufman, head seriously hurt and leg broken, may die; her little girl was also painfully cut on forehead; S. R. Bloom, Clarksville, slightly injured; S. W. Smith, Fort Worth, slightly injured; Mrs. C. E. Tolley, Dallas, slightly injured; B. F. Gleason, Plain Dealing, La., slightly injured; J. H. Wilhite, Pecos, slightly injured; A. G. Herford, Needles, Cal., slightly injured.

Judge L. N. Cooper of Cooper, Tex., brother of James L. Cooper of this city, was on the train en route home from a visit to his brother here. He was injured, but not seriously.

SMALL BOY'S TRIP TO PHILADELPHIA

Went from Fort Worth Unaccompanied and Arrived Safely—Incidents of His Tireome Journey.

Master John Key Hardison, an eleven-year-old boy has just made a trip from Fort Worth to Philadelphia and arrived safely, notwithstanding unexpected difficulties. It was a personally conducted tour. He went by himself and relied upon himself.

He is the son of Mrs. Tom Hardison of Mangum, Ok., who accompanied him to this city, where she is making a brief visit with her sister, Miss Louise Hardison. Master John is booked for a school term in Philadelphia where his grandfather, John F. Key, lives.

He started from here last Thursday, expecting to have one change of cars, at Memphis, and his grandfather was to meet him at the station at Philadelphia. As it turned out he had to change cars three times, at Memphis, Atlanta and Washington City. Then when he arrived at Philadelphia his grandfather missed him and waited at the station all day Sunday only to return home to find the boy already there, safe and sound. Master John is evidently made of the right kind of stuff, as should be expected, being a nephew of ex-Postmaster-General D. M. Key.

His mother and relatives here were very much relieved to receive a letter from him this morning, as they were anxious lest something had happened to him. He forgot to telegraph his safe arrival, as he had been instructed to do.

Used by Millions of Mothers. Mrs. Winslow's Soothing Syrup for children teething, soothes the child, softens the gums, reduces inflammation, allays pain, cures wind colic, soothes the child.

LET FARMERS READ.

Judge Terrell Advises the Planting of Milo Maize at Once.

To the editor of the Mail-Telegram: Last spring you published my advice to farmers to plant some northern corn. Emboldened by the result, after full investigation I advise them to immediately plant Milo maize. Plant two quarts to the acre in drills, 3 1/2 feet apart. It yields seventy-five bushels of seeds to the acre and weighs fifty pounds to the bushel. It is non-chaffy sorghum. Top or straw to feed—better than any other. You only gather the heads as a rule. Good for stock, especially for hogs. Makes fine meal for people. Nothing better for poultry. It comes from a dry country—India.

I am not a practical farmer, but give you the facts and most respectfully urge you to follow my advice. Plant this useful article of food, and thus reap upon the loss of your corn crop.

VALUABLE WORK FOR NORTH TEXAS

Government Report on the Geography and Geology of the Black and Grand Prairies of Texas.

The United States Geological survey, department of the interior, has issued for public use part of the 21st annual report of that office which is entitled, "Geography and Geology of the Black and Grand Prairies of Texas." The area described comprises about 5000 square miles. The report contains detailed descriptions and maps of the formations and especially describes the sources of artesian waters. It will be of especial interest to all citizens of

Texas and will be of material and immediate value to residents within the area treated.

The volume is for gratuitous distribution and will be sent to any reputable person indicating his need for it, application being made to the director, United States Geological survey, Washington, D. C. Those desiring the work should send for it at once before the edition is exhausted by applications from non-residents of Texas.

MUCH BUSINESS ON FOR COUNCIL TONIGHT

WILL INCLUDE UNFINISHED BUSINESS FROM LAST MEETING.

Indications Good for a Long Session Though Nothing of Unusual Importance so far Announced—Brief Resume.

The last council meeting was held on the night of July 4. Only such business as was called up by the aldermen was considered because of it being a holiday night. By reason of this curtailed action much unfinished business was left on the secretary's desk. Included in this batch are the following petitions and reports:

Twenty-nine property owners along Houston street petition the council to have the work of paving Houston and side streets with asphalt inaugurated, representing that they preferred to have the work done this summer so as to interfere as little as possible with the fall and winter traffic. Among the signers to the petition were G. Y. Smith, Bergin & Bowman, Hyde Jennings, R. W. Flournoy, Wm. Anson, D. T. Bomar, Morgan Jones, Noah Harding, K. M. Van Zandt, Wm. Capps, W. B. and John C. Harrison, Sidney Martin, R. F. Millam, Wm. Bryce, R. L. Carlock, F. B. Herd, E. D. Farmer, J. C. Ingram and J. M. Vincent.

City Engineer Hawley reports that the cost for a new wooden viaduct over the various railways at Annie street will be about \$4,000.

City Attorney Williams reports that the damage case of Mary Moore against the city and others had been dismissed as against the city.

City Engineer Hawley also reported that a culvert on Lipscomb street, between Pennsylvania avenue and Cochran street will cost \$1,400. He suggests that the situation could be greatly relieved by thoroughly cleaning the existing ditch and paving it with cobble at a probable cost of less than \$100.

Wm. W. McVeigh proposes to donate to the city 125 trash cans, seven inches in diameter for refuse, to be placed at convenient intervals along the streets.

A communication is on file from a committee from R. E. Lee Camp of Confederate Veterans on the condition of the old cemetery. The committee states that the cemetery is overgrown with weeds and grass; that there are no walks between the lots to show where they are; that the hand of vandalism can be seen in many places, flowers having been cut from the vines and rose bushes having been dug up and carried away.

An estimate on the Jennings avenue viaduct is filed for \$10,100.91, showing that Leversedge & Co. had done \$3,357.37 in work and that the bridge company had delivered since the last estimate \$4,928.54 in material. The Texas Anchor Fence company has delivered and has in storage on the grounds material to the amount of \$1,785. Additional estimates for the past two weeks will be included tonight.

City Engineer Hawley submits that repairs and additions to the amount of \$4,610 are necessary for the respective public school building of the city as follows: High school \$530; First ward school \$205; Second ward \$150; Third ward \$25; Fourth ward \$195; Fifth ward \$150; Sixth ward \$185; Seventh ward \$90; Eighth ward \$60; Ninth ward \$170; colored school (Ninth ward) \$130; colored school (Seventh ward) \$20; total repairs \$1,910. With two additions as follows: Two new rooms Third ward \$2,200; two new closets Third ward \$500.

Included in the new business will be a petition to the council from John Bates for \$4,000 for his home and contents destroyed about two weeks ago by fire, alleging lack of water power sufficient to cope with the flames.

Additional accumulation of July business, added to the above, will make tonight's meeting one of much importance.

A GREAT GRAFT ON THE RAILROADS

MINNESOTA ATTORNEY HAD A SCHEME TO COLLECT DAMAGES

Made Claims for Injuries to Persons that Are Believed to Be Straw Men. Came to Grief and Is Under Arrest by Federal Authorities.

A Minnesota attorney who is charged with attempting to bleed the railroads on damage claims for personal injuries to fictitious personages has come to grief, being now under arrest by the Federal authorities on a charge of using the United States mails to defraud.

E. E. Empey is the lawyer, having offices at Excelsior and Waconia, Minn. The arrest was made at Minneapolis at the instance of W. S. McCaull, claim agent at Kansas City for the Quincy, Omaha and Kansas City railroad, commonly known as the "O. K." road. Empey's hearing was set for tomorrow.

Last fall an Omaha and St. Louis train was ditched about five miles from Council Bluffs and several passengers and the conductor were injured. Two weeks afterwards W. S. McCaull, as claim agent for that road, received a letter from Empey as attorney for two men named Rutter and Durken claiming damages for personal injuries sustained in that casualty. Rutter having \$200 worth of injury done to his scalp and Durken needing \$500 to mend a broken finger and dislocated shoulder.

After some correspondence McCaull concluded the claims were not regular, and the matter so stood when the Omaha and St. Louis was sold to the Wabash, which road, although not satisfied as to the justice of the claims, in order to clear up old accounts settled them for \$75 each. The Omaha and St. Louis had been a part of the Quincy, Omaha and Kansas City, and after the sale of the former road McCaull was made claim agent of the "O. K." road. In a short time he received another letter from Empey on behalf of one Plestwood S. Spruce, claiming \$300 for a broken rib obtained in the same accident that Rutter and Durken benefited by. None of these names were on the lists of injured compiled by the officers of the road and this third demand aroused still greater suspicion. Furthermore, it was claimed Spruce was riding on a through ticket from St. Louis to Council Bluffs. On that train, as it happened, there was but one such ticket, and the officials knew where that one was held.

Claim Agent McCaull has a brother at Minneapolis to whom he wrote asking him to call on Empey and ask for further information regarding the claim. The letter partly explained the situation and partly gave misinformation in order to direct the brother's procedure. J. S. McCaull, the brother, called and this letter was shown to Empey on his asking about its contents. The letter among other things asked that an affidavit be obtained from Spruce regarding details, including a description of the conductor and brakeman, the former a tall thin man with maimed left hand who manipulated tickets with a patent device, and the latter a lank negro. As a matter of fact the conductor was a short fat man with two good hands and the brakeman a short thick set Irishman. In due time, however, the affidavit purporting to be signed by Spruce was received and the description of conductor and brakeman corresponded to that in the misleading letter. The matter was then laid before the federal authorities and the arrest followed.

Other railroads which are said to have been made subject to similar claims by Empey are the Wabash, Southern Pacific, Boston and Maine, Illinois Central, Chicago, Northwestern, Minneapolis and St. Paul and the Great Northern. The two cases of Rutter and Durken, however, are believed to be the only ones in which he succeeded in collecting damages.

RECENT RULING ON REVENUE STAMPS

Time Extended in Which Those Unused May Be Redeemed—Tax on Old Documents.

Col. P. B. Hunt of Dallas, internal revenue collector, has been furnished with copies of a recent act of congress by which the time for the redemption of internal revenue stamps has been extended to July, 1904. Col. Hunt has advised all deputy revenue collectors under his jurisdiction of the extension. The law reads as follows: "Be it enacted by the senate and house of representatives of the United States of America in congress assembled, that the act entitled 'An act authorizing the commissioner of internal revenue to redeem or make allowance for internal revenue stamps, approved May 12, 1900, be amended by adding to the second proviso the following: 'Excepting documentary and proprietary stamps issued under the act of June 13, 1898, which stamps may be redeemed as hereinbefore authorized, upon presentation prior to the last day of July, 1904.'

The following ruling on the stamp-

ing of revenue bearing instruments which were executed before the stamps were called in has been issued by the commissioner of internal revenue:

"Replying to your letter relative to the purchase and use of documentary stamps for post stamping instruments executed prior to July 1, you are advised that under the provisions of Section 7 of an act to amend the war revenue law, approved March 2, 1901, any person who has not affixed to an instrument the stamp required by law at the time of executing or issuing the same, should present the instrument to a collector of internal revenue, who shall, upon the payment of the tax due, and penalty, if any is required, affix the proper stamp and note the date when affixed upon the margin of the instrument.

"When instruments are thus presented for post stamping, collectors should retain them and make order upon this office by letter for such documentary stamps as are needed. Stamps will be forwarded upon such orders and collectors will affix the same and make note thereof in the manner provided by law.

"ROBERT WILLIAMS, JR., Acting Commissioner."

AGITATION ON THE QUARANTINE LINE

HAS BROUGHT IT INTO POLITICS IN SOUTHWEST TEXAS.

If Present Line Is Abolished the Federal Government Will Quarantine the Entire State—Would Result in Little Benefit and Great Disaster.

The agitation in south and southeast Texas against the present cattle quarantine line as established by the state and agreed to by the Federal government has resulted in its getting into politics. Candidates for legislative offices in those sections are forced to come out and squarely announce whether they favor the maintenance of the line or are against its continuance. An attempt was made last March to inject it into the convention of the Cattle Raisers' association, but a majority of the members, believing the abolishment of the present line to be a widespread disaster, succeeded in suppressing it.

It has been decided by the higher courts that the Federal government has no right to maintain a quarantine line except along state boundaries. The northern part of Texas is not subject to splenic fever and in order that this section might be free and open the present line was established a few years ago during Governor Culberson's administration, and was approved by the Federal authorities after urgent solicitation on their condition that a rigid system of inspection be maintained. Should this line be abolished the old line along the state boundary will be re-established by the Federal government and the entire state will be quarantined.

Since the establishment of the present line the cattle industry has flourished in northwest Texas as it has never done before. The cattlemen below the line are irritated because they are cut off from pastures in this section, but conditions are changing. Pasturage cannot now be obtained as it was six or eight years ago and cattlemen above the line devote greater attention to breeding and raising their own stock, being less dependent upon the lower country to replenish their ranges. They are likewise shipping fewer stock cattle to Wyoming and Montana.

The abolishment of the quarantine line would allow the southern stockman to invade the Panhandle, but owing to the changes mentioned it would benefit him but little now and in the future still less, as these changes are increasing rapidly. To the stockman above the line it would be an unmitigated disaster. The entire state being quarantined it would cut off his market in the northwest and force that section to breed its own cattle. The Panhandle country is making great strides as a breeding section and this profitable feature of the industry would be crippled if not destroyed as its surplus young stock could not be shipped. And no cattle could be shipped across the line except for immediate slaughter.

The general consensus of opinion among intelligent cattlemen and those who are viewing the agitation with disinterested eyes is that the present line should not be tampered with. It is a dangerous proposition, but it is for any benefit to those below the line and fraught with positive disaster to those above the line.

COLONEL LANHAM RETURNS HOME

THE DEMOCRATIC CANDIDATE FOR GOVERNOR WAS HERE.

Fort Worth Delegation Also Arrives—Executive Committee Holds Meeting in Austin in September.

Col. Lanham, Democratic nominee for governor, arrived on the Santa Fe last night from Galveston and left this morning for Weatherford.

Judge W. P. McLean, who was the state convention's permanent chairman, and others of the Fort Worth delegation also returned last night.

Col. Lanham had nothing to say save to express his gratification at the convention's action in conferring the chief honors upon him.

Q. T. Moreland, the new committee man from this senatorial district, said this morning that Chairman Wells had called the committee to meet in Austin early in September.

Col. Lanham has several addresses announced for the month of August. He will be in Fort Worth attending the entertainment of the Texas, Oklahoma and Indian Territory editors to be given by the Fort Worth Stock Yards company.

QUIET AT COURTHOUSE.

But Little Doing in the Courts Today—Two Orders Made.

Judge Dunklin, in the Forty-eighth district court, made two orders this morning, and aside from this there was nothing doing in any of the courts.

Judge Dunklin overruled a motion for a new trial in the case of W. A. Shelton vs. the Northern Texas Traction company, action for damages for personal injury.

In the matter of the estate of W. L. Huff, assignor, with Messrs. Bogart and Childress as assignees, the latter's application for distribution of funds and that they be discharged as assignees was granted.

PARthenia LEWIS SHOT BUD ABNEY

IN A SCUFFLE FOR THE GUN SHE THEN SHOT HERSELF.

Both Badly Wounded, and Will Have to Answer for Assault to Murder—Brought to City Hall This Morning.

Some more pistol work was done over in the bottom on east Thirteenth street this morning, and there were both a man and a woman in the case.

The parties to the difficulty are colored, and are best known as Bun Abney, sometimes called John, and Mrs. Parthenia Lewis.

Bud has a bullet wound very prominent about one inch below the left nipple, and the bullet must have ranged around under the arm to have missed his heart—ana, he declares he has a heart as big as anybody's.

Parthenia has a bullet wound about two inches above the left knee joint and also has numerous other wounds, inflicted by being pummeled by Bud and finally struck over the head with the gun, a .38-calibre weapon.

Bud's wound is rather a serious one, while Parthenia's is bad, though not nearly so serious.

Neither of the bullets had been located up to noon, though Dr. McElroy, the acting city physician, probed for them.

There were three shots fired, following which Patrolman Powell arrived on the scene and placed the participants under arrest and called up the patrol wagon.

Parthenia, being less seriously wounded, talked to a Mail-Telegram representative. She said she and Bud were good friends, and Bud took her to task for the slight irregularity of associating with a rival last night, and for this slight deviation from what he thought was not the proper consideration for his affections, beat her up a bad way.

He pursued her, she says, with a huge butcher knife, Bunk Tribreau and Ed Cole got the knife away from Bud, and then the latter made another run for Parthenia.

She in the meantime had secured the gun and was leaving the yard gate in an effort to get out of his reach. Some one called out for her to run, as Bud was after her. She said she realized that she was no sort of a match for him in a sprinting game, and turned upon him and pulled down the ball striking him as above indicated.

At about 8:30 o'clock this morning the fire companies were called to the corner of South Main street and Terrell avenue, where a house belonging to Hank Miller and occupied by R. L. Trivell and W. W. Rhodes was on fire.

The fire had gained such headway before an alarm was sent in that all that could be done was to save adjoining property and keep the flames of the burning building confined to their quarters.

Very little of the contents of the building were saved, and what was once a fairly good story and a half frame structure now stands in a badly charred condition.

Neither of the occupants carried insurance on their household effects. Mr. Miller was out of the city, and it is not known if he carried insurance on the building. He is a conductor on the Denver.

The fire started from coals blown from underneath a wash kettle, igniting paper and trash under the house. When discovered the flames had burned through the floor and were climbing the walls pretty well all over the interior.

The first alarm was sent in by telephone, and a general alarm given over the transmitter from central station.

The house was valued at about \$1000, and the contents at about \$800.

The new phone of the Houston and Texas Central's city ticket and commercial office is 488.

RETURNED FROM AN OUTING IN DENTON

A Camping Party Reports Having Had a Delightful Ten Days' Stay, Hunting and Fishing.

Messrs. Paxton and Kinkle of the fire department and Adam Harder, Charley Smith and Charley Jones returned today from a ten days' outing near Rantoul in Denton county. They declare they had great success in fishing, besides killing quite a quantity of game.

The citizens in the vicinity where they were encamped treated them royally, bringing vegetables, chickens, milk and horse feed to their camp. One farmer presented the boys with a fat 60-pound goat. They roasted it and had quite a feast.

DISCHARGED A PISTOL.

W. C. Ballew Fined in Corporation Court on Plea of Guilty. Some little excitement was occasioned at McBride & Ballew's place of business on Main street, between Fourth and Fifth, about 7:30 o'clock yesterday evening by three shots from a pistol in rapid succession.

DEATH ROLL.

Mrs. A. A. Brown. Mrs. A. A. Brown, wife of J. W. Brown, a railroad man, died this morning at the family home, 425 North Harding street. The funeral will be at the house tomorrow morning at 8:30 o'clock, and burial will follow in the old cemetery. Deceased was 25 years of age.

Notice to Taxpayers.

THE BOYS ENJOYED IT.

Members of the St. Andrew's Choir Back from Their Outing. The members of the boys' choir for St. Andrew's Episcopal church, and their rector, Rev. Barton B. Ramage, and others who accompanied them on their week's outing in Henderson's pasture, broke camp this morning and returned home. Nothing occurred during their stay in any way mar their pleasure, and the boys are busy telling their friends of the enjoyable time they had.

M. A. SPOONTS TO MAKE ADDRESS

Captain Paddock Cannot Attend Reception to Editors—Turney of El Paso Added to List.

The program for entertaining the editors by the Stock Yards company on August 4, has been changed slightly. Capt. B. B. Paddock, who was billed for the address of welcome, will, unavoidably, be absent on that day, and the chief address has been assigned to M. A. Spoonst. Also Lieut. Gov. Browning of Amarillo cannot be present.

His place will be filled by W. W. Turney of El Paso, state senator and first vice president of the Cattle Raisers' association.

"There will be a large attendance," said Secretary Matthews of the yards, "and they will be given a great treat. One paper in the Panhandle said the editors are to be entertained in Fort Worth on August 4, on which day the packing houses are to be erected. It will be a big job but we'll try it."

MILK BREAD.

The finest bread on earth. There is more substance in one loaf of Dillin Bros' Milk Bread than in half-dozen made by any other process. We have a French baker who has studied the baker's trade in foreign countries and is the only baker in the United States who knows this process of making Milk bread. Try one loaf of Dillin Bros' Milk Bread and you will never eat any other kind. We put this Milk Bread in nearly all the groceries in the city, but if your grocer should not have it, telephone Dillin Bros. and we will have one of our wagons call on you. We also have fine Cakes and Pies and everything kept in a first-class bakery.
