of trailer scales have been purchased by four co-operatives in the county for the use of the club and Future Farmer members. The scales are used for weighing the projects.

scale is so built that it can be moved from place to place. It is built something like a trailer and can quickly be set up for use. new scales have up to 2,000 lb. capacity and they break down on a basis instead of larger ones. The scales will be used in county livestock shows, the county fair show, the Lockney fair show and other shows in the county.

gedy Strikes mily Gathering

gely struck a family reunion and celebration early last morning when 9-year-old Tillma Poteet, son of Mrs. Curtis Poteet of Floydada, drowned while at Lake Texhoma.

boy, with a number of children of the families, was swimming along the edge of the lake in water about waist deep. Although several adults were watching them, Otis disappeared without anyone seeing him under the water. They plan to spend some \$2,500 to \$3,000 in repairing the roof, repainting inside and outside, installing aluminum windows, putting new steel cabinets in the kitchen and installing a wainscoting inside. The Post hopes to eventually build a new building but plans on that are indefinite as yet, Porter said.

Slow Rains Fall Tuesday Morning

A rain that fell "just right" covered most of Floyd county with varying amounts of moisture Tuesday morning of this week. The rain began falling here about 3 a. m. and continued up until mid-afternoon in showers.

The moisture here was measured at 1.08 inches by Weather Observer Joe Holt. It was lighter up Providence way with .60 of an inch reported by Ted and Charlie Boedeker. At Aiken the rainfall was measured at about one inch.

Heaviest fall in this area was in the Pleasant Valley community. Ray Aston reported 2 inches and Chester Mitchell reported 1.3 inches. At Irick Farrel Dollar has 9 of an inch.

Up South Plains way Bryant Higginbotham reported 1.90 inches while A. P. Sanders had 1.65. Alvin Nichols reported 1.70 inches at Cedar Hill. All of that area received a good general rain.

Most farmers were needing rain and the moisture will be of considerable benefit to cotton and feed. One farmer reported that "feed has grown a foot" since the rain fell.

The only area not needing rain was the Lone Star area where two to two and a half inches fell last week. Rainfall in that area was 78 of an inch Tuesday, B. Phillips said.

Mrs. Seale Takes Over Flower Shop

Mrs. J. B. Seale assumed management of the Plains Floral Shop here effective July 15. She has owned the shop for several years but has leased it the past year to Mrs. Revis Harris.

Tom, his wife and their three-month-old son, Blane, moved into the house adjacent the flower shop on Southwest First Street Saturday.

Tom is a 1940 graduate of Lockney High School, spent four years in the Air Force and then took extensive training in floral design and arrangement. He is the son of Charles Simpson of the Irick community.

The shop will offer a complete floral service including pot plants, cut flowers and corsages, Mrs. Seale said.

Mrs. Harris, in giving up the lease on the shop, expressed her appreciation for the patronage given her during the year she operated it.

Lockney Variety Re-opens After Remodeling Job

The Lockney Variety Store is holding its re-opening Friday and Saturday of this week after an extensive remodeling job and installation of new fixtures. The store is offering many special items and in addition will give favors to both the women and children. Mrs. M. E. Shipp, manager, said.

The remodeling job included enlarging of the store and taking into its floor space an area previously unused. Lighting fixtures have been re-arranged, a cooling system installed, and new fixtures put into the store. Counter space is almost twice as much as previously, Mrs. Shipp said. The floor and interior has been refinished.

Mrs. Shipp said in discussing the remodeling, "The fine patronage of the people of this area has made our remodeling and enlarging possible. We certainly appreciate their patronage and we hope that we are now better able to handle their needs than ever before."

Workers have been busy on the remodeling for the past month.

NEW ARRIVAL

Mr. and Mrs. Albert S. Golden Jr. of Pueblo, Colo., are parents of a baby daughter born July 19. She was named Debra Sue. Aunt of the new youngster is Mrs. Luther Fowler of Lockney. Mr. Golden formerly lived here.

Five from Lockney, four chapter members and the agriculture instructor, will be honored with Lone Star Farmer degrees, the highest state award, at the 27th annual convention of the Texas Association of Future Farmers of America being held this week in Houston.

Vocational Agriculture Instructor MacLee Brewer will be given an honorary Lone Star Farmer degree in ceremonies Thursday night of this week at the annual Lone Star Farmer banquet. Also receiving Lone Star Farmer Degrees because of their outstanding records in agriculture will be the following members of the Lockney Future Farmer Chapter: James Morris, Bobby Brown, Dee Nix and Royce Carthel.

Mr. Brewer, James, Royce and Dee along with Don Hollums left early Tuesday morning for Houston. Bobby Brown is working in Fort Worth and his parents were not sure the past weekend that he would be able to attend the meeting. However he will receive his award by mail if he is not present.

Only about 20 adults are honored each year with the Lone Star Farmer degree. These are given to instructors or other adults who are outstanding in vocational agriculture.

The boys who win the coveted degree must have an outstanding record in agriculture for a three year period and must have cleared at least \$500 in their various farm projects during that time.

The annual convention opened Wednesday of this week and will close Friday. More than 4,000 Future Farmers in 1,000 chapters from every section of Texas are expected to be present. The meetings are being held in the Sam Houston Coliseum.

Awards totaling more than \$5,000 will be given in different fields of work. Also a tractor operators contest was held Tuesday in which the winner was given a new Ford tractor.

Highlight of the convention will be the election of new slate of officers and the choosing of a new state FFA sweetheart.

Rain Postpones Tuesday Games

Rain caused postponement of the Tuesday night games in the Lockney Softball League with the result that only four games were played during the week. South Plains spread their lead to 119 points over their nearest opponents, Golden Spread and Silverton.

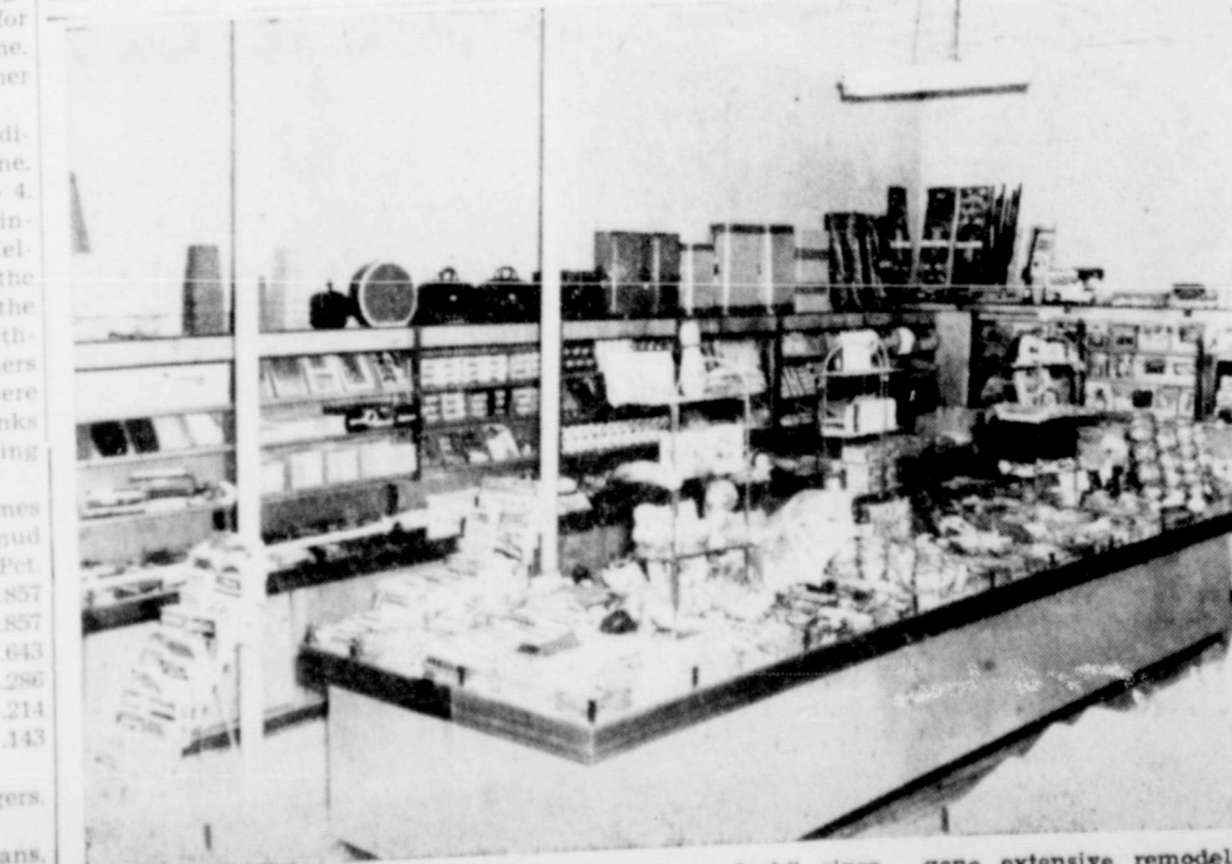

On last Thursday night Silverton defeated Hammond & Co. 14 to 4 in the first game of the evening. The second game was forfeited by Floydada to Golden Spread of Lone Star because not enough Floydada players showed up to field a team.

On Friday evening Hammond & Co. scored their first win of the season by defeating Golden Spread 13 to 6. Davis was the winning pitcher and Pat Frizzell was on the mound for Lone Star. Errors in the field contributed to the score. In the second game of the evening South Plains defeated Gulf Service 10 to 4. Wilson was the winning pitcher and Vaughn the loser.

Here's the league standings:
Team— W L Pct.
South Plains 9 2 .818

If a man say, I love God and hateth his brother, he is a liar; for he that loveth not his brother whom he hath seen, how can he love God whom he hath not seen? — I John 4:20.

THE BEACON MAN. noted for his short patience, gets a little unhappy at times when he tries to place a long distance call with Mr. Southwestern Bell. As you know the long distance operator for Lockney is sitting on a stool in Plainview, a situation we don't particularly like, and we must call her to place the call. Sometimes she answers right up and we get the call made without much ado. But when the phone rings 23 times, as it did the other day, before the operator answers, then we start to boil under the collar. Not that we're mad at the operator. And we're not mad at J. C. Oakley either. We don't know who we're mad at but we're sure unhappy. We don't really blame the operator. She's surely not sitting there twiddling her thumbs and deliberately refusing to answer the phone. We suppose that she just has more calls than she can handle at the moment and therefore has to postpone answering our ring. Looks like Mr. SW Bell could put on another operator or two in rush times to alleviate the situation. We'd sure like 'em better if they did.

football, much like the old age pension used to be in Texas, is the minimum wage law in the national congress. Now there is a move on to move the minimum wage under the law to \$1.25 per hour. We think every man ought to be paid a just wage, and we realize that there are some firms who won't pay anybody any more than they are forced to pay. But these are in the minority and we just don't think pushing the minimum wage sky high is the proper way to handle the situation. There are some people, regardless of how hard they work, that just couldn't be worth \$1.25 per hour for anything other than mining diamonds or some such work. Then too the high minimum wage will cut the business of training apprentices in a trade. We can't afford to take a young fellow into our business and pay him \$1.25 per hour to learn the business. In the first place it takes three or four years to train a boy to be a good printer and that's a lot of hours.

SECOND POLIO SHOTS are due within a few days in this county. It will be harder to get the last term first and second graders together this summer and therein comes the responsibility of the parent. Certainly everyone wants their children immunized from polio. Watch closely for announcements concerning these shots and be sure that your child is present for them if he is in the age group.

PEOPLE SHOULDN'T be so careless with names. Last week a group which called themselves "Conservative Democrats" met in Dallas to denounce the movement to desegregate students at the University of Texas. The writer has generally considered himself to be a Conservative but he doesn't especially join in with this group in their thinking and he wishes they wouldn't be so liberal with that Conservative name. It might get a lot of people involved who weren't actually involved, if you get what we mean.

FARM SAFETY WEEK is July 24-30. This week is set aside to remind farmers and farm workers of the necessity of being careful and avoiding accidents when and if possible. Last year 14,500 people lost their lives in farm accidents and 1,250,000 were injured. Economic loss totaled about a billion dollars. Almost every week we see stories in the newspapers where someone lost his life in a farm accident. We need to be safety conscious about farm work even as we have been taught to be about auto traffic.

FARM BUREAU MEMBERS probably could have learned a lot about farm bureau if they had been present last Friday night at the queen contest in Floydada. Those young ladies not only excelled in beauty but they had garnered a lot of information about farm bureau that would enlighten most anyone. It was a good selling job and we bet no one went away without the conviction that farm bureau was doing a good job for the farmer.

SHARING THE SHAME
The whole nation is shocked by the story of the Iowa farmhand who kidnaped and beat to death a 2-year-old baby girl.

The American public that is so shocked, however, must share the farmhand's guilt. This same public has refused to demand an end to the laxity in law-making and enforcement that permits child-molesters to repeat their offenses time after time.

Look at the record of the Iowa farm hand. Fined \$100 and spent 30 days in jail in Laporte City, Ia., in 1947, on a charge of molesting children in theatres.

Arrested for investigation on morals charges in Lincoln, Neb., in 1944, and again in Des Moines in 1949; released both time without action.

Arrested last April 24 in Waterloo, Ia., on a charge of child molestation; released without action.

Here is a man known by the police of a dozen cities as a sex pervert whose specialty was molesting children. Yet in three cases out of four he was released after being arrested, and the fourth time he was "rut away" for only 30 days.

There are known to be thousands of such potential murderers prowling our towns and cities. They should, of course, be rounded up and institutionalized.

The police know who most of them are and where they are. Files in big city police stations bulge with their records. But the police and prosecutors say they can do little without stricter laws.

Only through pressure from an aroused public can such laws be obtained. And if the public doesn't demand an end to this looseness and laxity, it must continue to share the shame and the guilt for such cases as the slaying of Donna Sue Davis up at Sioux City. —Amarillo Daily News

MUST BE AN ANSWER

The dark spectre of Desegregation is breathing down the backs of South Plains School Boards as is witnessed by the story coming out of Lamesa this week. Dawson County school men have submitted a tentative plan for gradual desegregation that will start next year by admitting the Negro first grade to the white schools, and then a grade a year until in twelve years the entire schools would be integrated.

The bargaining agent for the negroes indicated that he didn't think such an arrangement would be acceptable, and added that Lamesa Negroes weren't so enthusiastic for desegregation, but they do require equality of opportunity by way of school buildings. On the other hand Prince Edward County, Virginia has built a splendid school plant for its Negroes at a cost of \$840,000 which same is admittedly superior to the facilities maintained for the whites.

But the Negroes are insisting that they don't want equality of opportunity, they want desegregation. There must be an answer somewhere. — You Be The Judge in Crosbyden Review.

A DIFFERENCE
One of the most impressive descriptions of advertising's power was made recently in Galveston by the head of a leading advertising agency. He said two blind men stood in the same block holding their cups to those who passed. Each man had a placard secured by a string around his neck. One placard said: "I'm blind," but the other placard where people stopped to open their purses, said: "It is spring, and I am blind." —Trail Dust in Matador Tribune.

AMERICA'S NEW RAILROAD

Quarter-mile lengths of welded steel rail curve around a foothill like wire cable.

Not a "clickety-clack" in a carload

It's Santa Fe's new continuous welded rail... Fewer joints mean a smoother ride for you

An occasional little click—that's all you'll hear of the old "clickety-clack" as you glide over stretches of new continuous welded rail on the Santa Fe.

And these stretches will be growing longer and more frequent on Santa Fe. For we're laying more all the time—103 miles of it this year.

In fact, we're using a new electric welding process (for the first time by an American railroad) to help bring Santa Fe's new smoother ride to more people, more goods.

But that's only part of the story. Just as a railroad is no better than its track, track itself is no better than what's underneath it—the roadbed, the ties, the ballast. So we've been busy

with new improvements here, too. For instance, our own specially-devised ballast "dry cleaner." This unique machine cleans our ballast, keeps it more resilient so the track lies flat and even.

And today we're replacing old ties with longer and stronger new ones—specially treated to stay strong and sturdy for 30 years and more.

Day after day, something new is being done to make "America's New Railroad" even newer and better. Santa Fe is spending many millions of earned dollars every year for new roadway and new equipment. And not one penny comes from the taxes you pay.

SANTA FE SYSTEM LINES

What about expansion in these quarter-mile rails? Near Newton, Kansas, where yearly temperatures vary from 20° below to 114° above, we laid a 5-mile experimental stretch of welded rail. How we found that anchoring the rail to every other tie restricted expansion to the extra between anchors. Thus, overall expansion was reduced to the merest fraction of an inch between rail ends. In other words, expansion is no problem whatsoever.

TOWARD A MORE PROSPEROUS COMMUNITY...

All margins from the operation of the Plains Cooperative Oil Mill are refunded to the South Plains cotton producers who send their seed to the mill.

This year \$10,754.17 in cash, and stock that will be redeemed for cash, has been refunded to Floyd County cotton producers.

This sum represents the increase in value of Floyd County cottonseed after it has been processed by the Plains Cooperative Oil Mill. Every dollar of this increase in value is refunded to the farmer who produced the cottonseed.

This money, after income taxes have been paid on the entire amount, will be spent by Floyd County farmers for Floyd County goods and services.

This \$10,754.17 will help build a more prosperous community.

IN CASE OF EMERGENCY

Have enough gas for where you're going, Mister?
Well, little matter. You can always get more at some service station.

The same goes if unexpected guests drop in at home. You can buy bread, meat, or eggs at a nearby store . . . or you can borrow from a neighbor.

But this is not possible when a serious emergency strikes. You have to be prepared beforehand. You can't buy *strength of spirit*. Nor can you borrow it. It grows within you, little at a time.

So be prepared when disappointment, discouragement, trouble, or grief strike.

Through worship at Church fortify yourself with faith and courage. Get acquainted with God's love and wisdom.

Come what may, you'll be ready for any emergency.

THE CHURCH FOR ALL . . . ALL FOR THE CHURCH

The Church is the greatest factor on earth for the building of character and good citizenship. It is a storehouse of spiritual values. Without a strong Church, neither democracy nor civilization can survive. There are four sound reasons why every person should attend services regularly and support the Church. They are: (1) For his own sake. (2) For his children's sake. (3) For the sake of his community and nation. (4) For the sake of the Church itself, which needs his moral and material support. Plan to go to church regularly and read your Bible daily.

BUGS ARE BUSY!

There are most all species of insects except the Weevil infesting this area and doing their evil. And if you need a plane we suggest that you Dial 2109 and get it P. D. Q. We have the promise from Jeff, the company's boss. That even though our demand may cause him a loss. He will furnish Stearman planes, all we need. To eliminate the bugs from your cotton and feed. We have the same pilot we had last year. And concerning his ability you need not fear. Since World War I he has been in the air. And it's our desire that he stay up there. It's Cliff's propeller that takes the bugs breath. He don't depend on the poison to cause their death.

Floydada Club Slates Opening-Day Activities Thursday

Floydada. — The Floydada Country Club will hold its annual picnic and open the new golf course to members for play Thursday, according to President Aaron Carthel.

Entertainment will be a day-long offering and special events are scheduled for the afternoon and evening. Assisting Carthel with plans are J. R. King, Gene Collins, Lom M. Davis Jr., B. K. Barker, Buck Hickerson and Lane Decker, directors.

A box supper to raise funds for club furniture will be the feature of the night and will be conducted by Carl L. Minor, starting at 7:30 o'clock.

Billy B. Henry heads the refreshment committee. Bob Copeland is in charge of entertainment. Mrs. J. A. Arwine is chairman of the ladies bridge tournament with Jim Word and Billy Tad Probasco arranging swimming and diving events and a horseshoe pitching contest.

Ed Johnson will have the pitching, putting and driving contests at 6 p. m. and Bruce Biggers heads the committee in charge of grounds, lights and sound system.

The course is nine holes with grass greens and an excellent irrigation system for both greens and fairways. Officials hope to make it one of the most beautiful in the area within a few years. A total of \$18,948.44 has been spent on the course this past year.

As of June 1 there were almost 150 members in the club, with another 100 associate memberships.

A man who takes pride in his cockery uses two different dish-cloths: one for sudsing glass-ware, china and table silver — the other for greasy pots and pans and for scouring the sink. After each meal, he washes both cloths with hot soapsuds and rinses and hangs them to dry.

Insect Report

(Note: Following is a report on a cotton insect survey for the South Plains as released by Walton H. Jones, district extension agent, of Lubbock. The report was compiled by G. T. Davis Jr. and W. L. Owens Jr., both connected with the Extension Service.)

While weather conditions continued favorable for growth and fruiting of cotton, such conditions were also favorable for activity of most cotton insects. A considerable additional acreage of cotton reached the fruiting stage, which made plants more attractive to fleahoppers and bollworms.

Aphids were reported in light infestations in some fields throughout the area. Heavy infestations were reported in a few fields in Hale County and in 12 fields in Lamb County.

Thrips were found in light infestations in most fields, with heavy infestations reported in a few fields in Crosby and Lubbock counties. The heavier infestations were generally found with sufficiently heavy fleahopper populations to warrant control of both.

Fleahoppers occurred in damaging infestations in many of the earlier planted fields where insecticides had not been applied. The insects also increased rapidly in numbers in many later planted fields as cotton reached the fruiting stage. Such fields should be checked closely and insecticides applied when 15 to 20 fleahoppers are found on 100 terminal buds. Older cotton, which has set considerable fruit, should be watched for both fleahopper infestation and small square shed. Additional insecticide applications may be necessary to insure maximum early fruit set.

Eggs and scattered small bollworms were found on cotton in fields in Borden, Lynn, Martin, Mitchell and Terry counties. All fruiting cotton should be checked every 4 to 5 days for eggs and small worms. Where eggs and 4 to 5 worms are found to 100 plants, insecticides should be applied for effective control. Lygus bugs were found in small numbers in Crosby, Floyd, Hale and Lubbock counties. Grasshoppers moved from grasslands, which had not been treated with insecticides, to cotton in a few instances in Swisher County. False wireworms continued to cause damage to roots of cotton plants in Howard County.

For specific information regarding the control of the insects mentioned above, one should consult the 1955 Cotton Insect Control Guide. Counties covered by this survey are: Bailey, Borden, Briscoe, Cochran, Crosby, Castro, Dawson, Deaf Smith, Floyd, Gaines, Garza, Hockley, Howard, Lamb, Lubbock, Lynn, Martin, Mitchell, Parmer, Randall, Scurry, Swisher, Terry and Yoakum.

Information contained in the cotton insect situation release has been compiled from reports received from county agents, vocational agriculture teachers, personnel of the Texas A & M College System, various branches of the U. S. Department of Agriculture Commercial Cotton Inspectors, Chemical companies and others.

Custom Built Furniture Made by Draper Manufacturing Co.

The Draper Furniture Mfg. Co., located at 510 E. 9th St., operates one of the most complete furniture and upholstery plants to be found in this area. This company builds furniture on special orders and rebuilds old furniture and antiques. It is owned and operated by Laurence E. Draper, who has had many years experience in this type of work. Mr. Draper is an expert at designing and building furniture and has built thousands of pieces of furniture for customers in this vicinity.

Only the newest and best fabrics are used in upholstery work in this plant and the customer can select his fabric from

a large assortment. The work is done by skilled mechanics and the customer's wishes are catered to in every detail.

Old furniture can be rebuilt and refinished so that it looks like new and is actually as good as new. New springs, cushioning materials and fabrics can be added and the cost will be less than new furniture of the same type.

This business also rebuilds and refinishes antiques so that they will last for many years longer and assume their original appearance. With the prices of new furniture going up, now is a good time to have your old furniture rebuilt and refinished by

Draper Furniture Co. You can get many more years of useful service out of your present furniture after an overhauling in this plant. The cost is reasonable, too, much less than buying new pieces.

Mr. Draper is always glad to discuss furniture problems with customers and advise them how to have their furniture built to the best advantage. He is well versed in interior decorating and knows what colors and fabrics harmonize best with other furniture and drapes. Take your furniture problems here and they will be quickly and satisfactorily solved.

TABLECLOTH-SAVER

When your youngster is a "guest" at your dinner party, here is a suggestion for you. To protect that special tablecloth, slip a gringed terrycloth guest towel under your child's plate. It's the right plate-mat size, and will catch most stains even though it's not actually spill-proof. Wash it in hot soapsuds and presto-it's a towel again.

STAIN PREVENTION

Even though the range finish is acid resistant, quick action is desirable to prevent milk, some fruit juices, vinegar and other acid foods from marking the porcelain. Accidental spillovers should also be wiped up with a paper towel before the food has a chance to harden.

BEDSPREAD WASHING

If you have a large crocheted bedspread, here is a few tips on taking care of it: after thorough washing in hot soapsuds and rinses, hang the spread across two parallel clotheslines until it has finished dripping. Then put the spread back on the bed, over a large sheet of plastic; smooth it out, let it dry, and it will need no further shaping or blocking. Place fan nearby to hasten the drying.

TO COLORADO
Several families from the Lone Star community were in Colorado last weekend on vacation. They were Mr. and Mrs. C. H. Parish and Donald, Mr. and Mrs. Howard Mosley and family, Mr. and Mrs. Kenneth Wofford and family, Mr. and Mrs. Lowell Jarrett and family, David Frizzell and Johnny Hanst.

Land Terracing

Recent heavy rains in the Floyd County Soil Conservation District have caused considerable erosion and damage to unprotected farm land.

Even though the land may have been "bone dry" when the rains fell, the runoff was greater than the amount of penetration into the soil. The heavy clay soils predominant in this area just cannot take water into the soil as rapidly as rains normally fall.

To control erosion and runoff

an rainfall, level terraces can be built. Terraces constructed under the supervision of SCS technicians are of such height and width that they can be farmed with any type equipment and will fit all farming operations.

Assistance for building terraces is provided on a cost-share basis by the federal government. Applications for assistance on terraces can be made through the local ASC office. Assistance for layout and design will be provided by the Soil Conservation Service.

Increased production on terraces

to super cent. The increased production coupled with the protection given by terraces to prevent damage to our agricultural lands indicates the desirability of initiating this conservation practice.

Mrs. Hugh Carroll has been in Goldthwaite and other towns in that area during the past two weeks visiting with her brothers and sisters. She will return to Lockney Sunday.

George Washington's first employer was Lord Fairfax, whose lands he surveyed.

Library Notes

"Songbirds of America" in color, sound, and story was given to the Library this week by Mrs. Hollis Bond. "Songbirds of America" is recorded, photographed and written by world-famous Cornell University authorities. Dr. Arthur A. Allen and Dr. Peter P. Kellogg, with a foreword by Roger Troy Peterson. It was used first for the Junior Book Review Club Tuesday morning, when Mrs. H. F. Jackson brought a program on birds.

Miss Pearl Cowan gave a large number of magazines to the library this week. Hardly a week passes that the library does not receive some gift from interested friends of the library. All of these gifts, consisting of books, magazines and money, are helping to build a better library for Floyd County.

New books continue to arrive. Among these are several of the Landmark books, which are real thrillers for young readers. The following will be ready for circulation this week: "Dolly Madison," by Jane Mayer; "The First Overland Mail," by Armstrong Sperry; "Pocahontas and Captain John Smith," by Marie Lawson; "Hawaii, Gem of the Pacific," by Oscar Lewis; "Mr. Bell Invents the Telephone," by Katherine S. Shippen; "The F. B. I.," by Quentin Reynolds and several others.

Also new in the Library is "Uranium, the World's Expanding Frontier," by Dr. Armand Eardley. This is a fifteen year forecast; the future of Uranium, its economic stability; uranium in industry, how to judge your stock and complete answers to all logical questions about uranium.

Thirty-eight attended story hour Saturday morning. Mrs. Kinder Farris entertained the children with stories and songs. She was assisted by Mrs. J. D. McBrian.

In spite of the rain Tuesday morning, a large crowd attended both Clubs at the Library. The Junior Book Review Club heard Mrs. H. F. Jackson with a very interesting program on birds. The Hobby Club enjoyed a travel film showed by Mrs. Hershel Carthel of Lockney.

Next Tuesday morning at 10 o'clock the Hobby Club will hear Mrs. Ted Rutherford on "Song Birds in Your Garden." The Junior Book Review Club will hear Mrs. Kinder Farris review "Freedom Train," by Dorothy Sterling.

Mr. and Mrs. J. H. Barnard are giving "Around the U. S. A. in 1,000 Pictures," by Melton A. Runyon, in memory of Pike Reece Hanna, B. T. 2 U. S. Navy.

Here's a broiler meal that's good for summer suppers: Put one package frozen peas and carrots and one package french fried potatoes into the broiler pan. Cook under the broiler flame for about 20 minutes. Then place the pan rack on top with chicken that has been marinated in French dressing. Place the rack three inches below the broiler flame. After one turning, baste with French dressing and place tomato halves topped with bread stuffing on the rack. Finish broiling, letting the juices from the chicken drip down onto the pan below to give added flavor to the vegetables.

Farm Safety To Be Stressed Next Week

College Station. — The week of July 24-30 should be for every Texan on and off the farm a practice period in prevention of accidents. The period has been designated as Texas and National Farm Safety Week.

The Texas Farm and Ranch Safety Committee believes that accidents on farms do not occur because farmers and their families are more careless than other citizens. But with excess work and fatigue they often neglect necessary precautions in working with power equipment and edged tools, and in keeping in good repair articles which are used frequently.

Prevention of accidents has a deeper importance than merely keeping people fit to do their work. The waste of human lives, the pain and sometimes permanent crippling resulting from accidents, and the disruption to family life when a member is injured are of even greater consequence. The distressing thing, points out the committeemen, is that so large a part of accidents which are happening daily could be avoided by caution and common sense safeguards.

Hazards to life and limb in homes and farm buildings are many and obvious. A systematic check will reveal them, and knowledge of them is an urge to remove them. Falls cause

more injuries in the home than any other type of accident. Looking before stepping could reduce such accidents, suggests the Safety Committee.

Finally, the Committee suggests that these seven days should take on special significance. It is time that farmers and their families and neighbors pooled their efforts toward making their industry as safe as any other in the nation. And as stated in the theme for Safety Week . . . "Your Safety is in Your Hands."

Engine Wear Reduced 40% with Trop-Artic Motor Oil

(THE DIFFERENCE IN WEIGHT IS A DIFFERENCE IN WEAR!)

In an engine test equal to 2500 miles of driving, piston rings lubricated with ordinary oil lost weight, showing extensive wear.

In an identical test piston rings lubricated with Phillips 66 Trop-Artic Oil showed scarcely any wear at all.

ITS PERFORMANCE THAT COUNTS!

The difference in piston ring wear illustrated above proves an important point about the performance of motor oils:

Most engine wear occurs when you first start your car or under stop-and-go driving conditions with an engine that hasn't warmed up. It takes a very special kind of oil to flow quickly and protect your motor when you start, and then to protect moving parts from sludge and varnish after the engine heats up. TROP-ARTIC All-Weather Motor Oil gives you this double protection. Compared to older types of oils, it can even double engine life.

In a motor oil it's performance that counts. And TROP-ARTIC gives super performance! You'll get easier starting . . . save gasoline . . . and you can save 15% to 45% on oil consumption. Get TROP-ARTIC from your Phillips 66 Dealer.

She had just left the meeting and was returning to her car when she failed to notice a step-down from one floor level to another. She fell with most of her weight on the knee. She limped back to her car and drove home but x-rays at the Lockney General Hospital here revealed the crack in the knee cap.

Mrs. G. A. McClelland accompanied her to Amarillo and return.
