### Corn After the Good Rains of this Week .- Wheat Good Quality.

Good rains have certainly blessed Randall County the past week. The soaker of Saturday being followed by a good rain Sunday night, has made crops look fine. Corn is going to be excellent this year. Alfalfa has been good, and while the wheat crop was some what short as in nearly every state, the quality is excellent.

A review of the crop conditions of Texas for this year is summed up by a correspondent of the Manufacturer's Record as follows:

This year every part of Texas seems to be in an ideal condition. The northeast has never looked finer, and throughout the length and breadth of the vast empire the outlook for every kind of a crop has never been more excellent. Rains have been abundant everywhere, and there is no spot droughth-stricken. There have been no disastrious floods and no untoward conditions at any place outside of some little temporary damage done by the late spring frosts. Wherever necessary, replanting of corn and cotton was done, although most of

The missionary collection was taken which amounted to over \$75.00.

In the evening two addresses were given, one by W. D. Scott and the other by G. A. F. Parker of Hereford.

The two meetings of, the day were very helpful and voted by all to be a grand success.

The program of the day was as follows:

### **Other Good Rains.**

Wednesday night a good rain set in about 8 o'clock and continued for about two hours. Everything was looking at its best yesterday morning. The crops could not be in better condition. While the rains of the first of the week were somewhat local, this rain was quite general over the Panhandle country.

Last night another good shower fell to aid in the good work.

A Cargo Hard "to Handle. Asphalt is said to be the most diffi cult cargo for a vessel to unload. The asphalt is taken out of the asphalt lakes in Trinidad in a semifluid state and by the time the vessel reaches a northern port has hardened, so that to unload it it is necessary for the men to go into the hold and dig it out with pick and shovel. This takes time, and a vessel carrying such cargo always has to arrange for a considerable stay in port.

cotton annually: the United States except Texas produces 9,600,000 bales and the world except the United States 6,400,000. The United States produces 67 per cent of the cotton of the world hit when we want to know what cotton is worth we wire England's factories for prices. If we doubled our production without home factories we would have even less to say about fixing prices of cotton: but, on the other hand, if we had 67 per cent of the cotton factories of the world, we could fix prices ourselves and take our rightful place as master of the world's commerce. English manufacturers located a thousand miles from the cotton field fix the prices. We have but one alternative: we must manufacture cotton and other staple articles in Texas or forever pay tribute to outside manufacturers, and governments,

are invigorating. The framework of nerves in the human being is like a delicate electrical apparatus, the nerves being the wires and the brain centers. Every one knows that a telephone

works better on a clear, dry day than on a wet, muggy one. The moist atmosphere lessens vitality. The nerve wires grow fleccid and heavy. The messages become confused. Hence spirits, melancholia, distorted low mental outlook,' faulty assimilation. and disease.

The opposite effects flow from the northwest winds. The west and northwest winds keep the mucous membranes of the body in good working order. The coating of moisture which is always present with the east wind disappears. Absence of any wind if long continued has a bad effect on the human body and mind. A prolonged calm means lack of ven-

A Vicious Fish.

In South America there is a small fish that not only attacks its fellows of the sea and river, but is greatly dreaded by the natives, who during certain seasons have to ford the streams in which the carbitos are found. Bathers are often attacked by them, the sharp. chisel shaped teeth taking a bit from the desh wherever they attack. They are perfect scavengers, eating the animals that float down the river-dead or alive.

THE RANDALL COUNTY NEWS.

# SAY! Don't You Want to Make Some Money?

Don't you want to have a home in a country of flowers and sunshine? Would you like to live where men and women are healthy, where the babies grow to manhood and womanhood without the care of doctors and nurses? Would you like to live where there are few extremes of heat or cold, where the winters are mild, and where the summer nights are delightfully cool and pleasant, and where it is a joy to live? - 1 - 70-

Would you like to live in a country where you can raise a greater variety of farm products more successfully than in almost any other place in the Union? Would you like to buy some land where it is bound to double in value in a short time, where you can get the purest, sweetest, softest well water that you can find any place? Where you have a soil of surpassing fertility and of great depth, underlaid with a clay sub-soil? Where you can raise wheat and corn, oats and barley,

kaffir corn and Milo maize, cotton and

alfalfa, cherries, grapes, apples, peaches, pears and the finest and best melons in the World?

If you would like to do a few things like these, come to the Panhandle of Texas, come to Canyon City, and see Keiser Bros. & Phillips, they own broad acres of land they would like to sell to actual settlers.
