

NORMAL DEDICATION FRIDAY, 21st, WITH INTERESTING PROGRAM

April 21, 1916, will long be remembered in Canyon and in the Panhandle as one of the greatest days in the history of this section.

The dedication of the new building of the West Texas State Normal College is the greatest event from an educational standpoint ever held in the western portion of this state.

It is the greatest building in the state, excepting only the capitol, said President Sam Sparks, of the Board of Regents.

The weather was ideal—a typical Panhandle spring day.

The crowd was immense. Every seat in the big auditorium was occupied long before the hour for the program to begin.

The special train from Amarillo brought nearly two hundred people. The campus was literally covered with automobiles.

After the preliminary remarks and announcements, President R. B. Cousins turned the program over to President Sam Sparks of the Board of Regents.

The program was carried out in full as outlined elsewhere in this issue.

The new building which was dedicated April 21, 1916, takes the place of the one which was burned on March 25, 1914.

The Normal was located in Canyon in 1909 by act of the legislature, the locating committee selecting Canyon in September.

At once there was doubt and fear in the minds of many people regarding the fate of the school. There were many rumored organized attempts to move the school.

But the Board of Regents were not satisfied with the building which the insurance money and the deficiency warrant of \$57,000 would construct.

from the original contract, owing to a fact of funds.

The fight then was on for the wings. Governor Ferguson, having come into the executive office, was counted upon as a friend of the school.

The regular session of the legislature ended without the necessary appropriation bill for the completion of the wings. Work was held up awaiting action in the legislature.

In the senate there was little difficulty, as Senator Johnson had the situation well in hand. Finally in the free conference the wings were included in the bill.

Work on the building has been delayed on account of the difficulty in getting material on time.

The principle item which was cut from the appropriation bill by the legislature, was the heating plant building.

Throughout the long struggle for the rebuilding of the school the members of the Board of Regents, to a man have stood firmly by the school and put in much of their valuable time to see that the new building should be the greatest in the state.

Governor Ferguson has been gracious with the school and can truly be called a friend of education.

Governor Colquitt has a warm place in the hearts of the Canyon people for allowing the work to begin as soon as the plans of the Regents could be made.

To President R. B. Cousins is due the greatest honor for the magnificent new building which stands on the campus today.

(Continued on page 6)

PRESS ASSOCIATION IN BIG MEETING IN AMARILLO

From Thursday until Saturday night the members of the Panhandle Press Association were given splendid entertainment by the members of the Amarillo press and the Board of City Development.

A number of the members arrived Thursday night. A considerable number from the South Plains came to Canyon on the Friday morning train, and stayed here until the special arrived from Amarillo.

The attendance was one of the largest in the history of the association. The program for Saturday was interesting while the entertainment by the Amarillo members was unique and full of pleasure for those attending.

Amarillo was chosen as the permanent meeting place of the association, subject to change by a vote of the association at any meeting.

The following officers were chosen for the coming year:

President—L. G. Waggoner, Miami Chief.

Vice President—B. F. Smith, Lockney.

Secretary-Treasurer—Miss Ida M. Farrell, Glazier Review.

Last Book Club Meeting.

The last meeting for the year of the Woman's Book Club was held yesterday at the rest room, Mrs. Stewart, leading and discussing present day problems as revealed in modern literature.

During the summer, on the first and third Wednesdays from 5 to 6 o'clock, the library will be opened. It will not open Saturday afternoons during the summer months.

NO CHANCE FOR NEW PHONE SYSTEM IN CANYON NOW

Flash Light System Would be Unprofitable in Canyon, So the Authorities Say.

According to information received from the headquarters of the Southwestern Telegraph and Telephone Co., there will be no new system installed in Canyon, as desired by the Canyon Business Men's Association.

The business men in particular are very sorry that the company feels this way about the telephone situation and are anxious for the better service which the new system would guarantee.

REGENTS ENTERTAINED AT FISH FRY SATURDAY P. M.

The members of the Board of Regents were entertained Saturday afternoon at the Palo Duro club grounds by a number of the citizens who hold shares in this club.

The annual meeting of the board will be held on May 10th, or as soon after that date as possible. At that time it is expected that the final arrangements will be made for furnishing power for the Normal.

TRY A WANT-AD IN THE NEWS

SENATOR JOHNSON PLEASED WITH NORMAL DEDICATION

Senator W. A. Johnson, of Memphis, states to the News that he is extremely well pleased with the fine exercises of the dedication of the new Normal building.

The Senator takes great, and just pride in the part he played in the passage of the appropriations necessary for the new building.

"The Loreley" Pleases.

The Normal auditorium was filled to capacity Saturday night when the Normal chorus and Canyon Choral Club gave the unfinished opera "The Loreley."

The musical program was preceded by a reception by the members of the faculty.

Gross Leaves This Week.

The Gross Construction Company has completed its work set forth in the contract for the Normal building.

Ellerd Here Tuesday.

Hon. R. M. Ellerd of Plainview was in the city Tuesday in the interest of his candidacy for congress.

Miss Rose Fry of Tulia was in the city Friday.

PANHANDLE TEACHERS WILL COME BACK NEXT YEAR

Interesting Meeting Held Friday and Saturday in New Building—Large Number Here.

The meeting of the Panhandle Teachers Association in this city Friday and Saturday was pronounced to be the most interesting and instructive of recent years.

The following officers were chosen: President—C. A. Gilley, Canadian.

Secretary—Miss Annie McDonald, Amarillo.

There were more than one hundred present at the meeting. From the time of the address of welcome by Supt. E. F. King to the close of the reception and entertainment Saturday night, the teachers were shown a fine time by the faculty of the Normal and high school.

The high school had an exhibit in one of the rooms of the first floor which attracted much attention Friday among the hundreds of visitors and throughout the meeting from the teachers, who were anxious to find out how a school that had no regular domestic science teacher could turn out such wonderful work.

CAPT. T. J. TILSON PLEASED WITH NEW NORMAL HOME

Captain T. J. Tilson, representative from the 123rd district, was an interesting visitor at the dedication of the new Normal building Friday.

Capt. Tilson is one of the able members of the house who stood firmly by the Normal during those months of fight when the appropriation for the wings hung in the balances.

Capt. Tilson greatly enjoyed the trip to Canyon and thinks the new building a magnificent home for the school.

Canyon is the educational center of Northwest Texas. Come here to live.

**Don't Ignore Fly Menace This Season**

Many persons do not realize what a serious menace the fly is to the health of this community. It is characteristic of the average man to ignore this kind of danger until it threatens his own family. "Oh, the fly may be the means of carrying a fatal disease to some puny person," you reason, perhaps, "but there's no danger of his bringing it to me—I'm in pretty good shape. I eat three square meals a day and sleep all right."

That is a characteristic attitude of soldiers. Rather, it used to be so. Doubtless you remember the awful toll of life taken among the soldiers encamped at Chickamauga during the Spanish-American war. If you do not you can easily look it up. Those boys in blue "died like flies." Flies caused the death of most of those stricken with typhoid and dysentery.

It came about in this way. Human excreta carries the bacteria of typhoid fever, cholera, dysentery, summer complaint, tuberculosis and intestinal diseases of other varieties. Flies feed on human excreta, as you know if you have kept your eyes open.

**The Lesson of 1898.**

Not a great deal about the value of camp sanitation was known in 1898. The American army medical corps was not organized as it is now. The mobilization place at Chickamauga was not clean. Garbage and sewage were not destroyed as they are now. In that large body of men it was inevitable that some should be disease carriers. The waste matter which they threw off acted as an incubator for the bacteria which it carried. Flies and other insects, but especially flies, swarmed around the filth sinks and fed. They were a frightful annoyance at meal time, and they were the army's most deadly enemy for they distributed dangerous germs among all the men. As a result fever and bowel diseases became almost an epidemic. As a nation we were taught a solemn lesson about the menace of insects. Our army medical men learned more in the Philippines, in Cuba, in Porto Rico and in the Canal Zone about the relation of flies, mosquitoes and lice to the spread of disease than had previously been learned in two or three thousand years.

**Cleaner Than Homes.**

Visit any of our army encampments today. They are kept cleaner than the average housekeeper keeps her premises. Special attention is given to the sanitary disposal of garbage, of sewage and of other waste matter coming from the camp hospital. Elaborate means of protection against flies, mosquitoes, lice and bedbugs are taken—but flies are considered the most filthy and dangerous from the medical point of view.

**Value of Mother's Stories.**

It is safe to say that if this community should co-operate and act at once so as to clean up the town thoroughly, with special attention given to the breeding places of flies, the average of serious illness here would be reduced 50 per cent for the months of June, July, August and September.

Such a clean-up campaign is not impossible. It means the spraying of manure piles with a simple kerosene solution every day or so, frequent removal of manure piles, screened toilets, covered garbage cans and the use of fly swatters and fly paper by everyone.

**LECTURING ADAM AND EVE**

Somewhat Humorous Painting in German Church, Work of Artist of the Middle Ages.

In the Church of Saint Sebaldus at Nuremberg there is a delightful mural painting which makes one merry even to recall it. The subject is the Garden of Eden. Adam and Eve are being lectured by an elderly man in flowing robes with a long white beard. His beard alone would more than supply Adam and Eve with the covering they lack.

In as easy attitude, with neither haste nor anxiety, he is pointing out to them the error of their ways. He is as detached in manner as though he were a professor lecturing at Leipzig on the fourth dimension of space.

Adam is somewhat dejected and reclines upon the ground. Eve, unashamed, with nothing on but the apple she is munching, is evidently in a reckless mood. She looks like a child of fifteen, with her hair down her back; the defiance of her attitude is that of a naughty little girl.

The world-old problem is under discussion, but with an air of good humor and cheerfulness on the part of the lecturer, as though there were still time in the world, as though hurry were an undiscovered human attribute, as though possibly the world would still go on even if the problem were left unsolved, and this first parliament adjourned sine die.—New York Telegraph.

**BARRED FROM HALL OF FAME**

Painters of Humorous Pictures Unjustly Treated, Is the Assertion Made by Writer.

In literature a man has every chance, if he can, to be as hilariously unbridled as Mark Twain and still take his place unchallenged on the shelf with the greatest; on the stage he may be as essentially a humorist as Joseph Jefferson, and yet go down in history with a halo around his memory; even in the uncorporeal sphere of music he may be as light and brilliant and impish as fancy will permit, without in any way jeopardizing his artistic dignity.

But let him attempt any such gala-hearted display in terms of paint and the most staid academician and the most perfunctory Futurist bang their door with equal vigor in his face, writes Louis Bayly in the Bookman. Which in this day, when there is more talk than ever before of the development of a really national art, seems just a trifle rash.

That a brilliant spirit that without mission or message or school craves only the privilege of making holiday with facts and pelting impartially with their own gay inimitable, irreverent confetti every head that bobs up in the carnival of civilization seems too thoroughly American to be consigned always to the lighter, more ephemeral pictorial avenues.

Whenever you need a general tonic take Grove's. The Old Standard Grove's Tasteless Chilli Tonic is equally valuable as a general tonic because it contains the well known tonic properties of QUININE and IRON. It acts on the Liver, Drives out Malaria, Enriches the Blood and Builds up the Whole System. 50 cents.

Aside from the literary and artistic value of stories there is no greater force than they for the preservation of the purity of a child. Fill his mind with their rich imagery, their stirring deeds, their ideals—set his fancy going about the mysteries of nature, let him follow the adventures of great heroes, and there will be little room left in his life for sordid or evil things.

The best way to banish darkness is to let in the light. To tell stories to your children is your duty and your privilege.

**Cosmopolitan Nation.**  
The Roumanian is a lover of the mountains and the woods. It is, indeed, to the peaks and forests of the Carpathians that he owes his national existence.

Isolated in them, the Roumanian has clung more tenaciously to the ways and customs of his ancestors than any of the Latin races, and it is said that today his language contains more pure Latin words than the Italian. He is a composite nationality, however. About twenty towns and villages of Roumania have been positively identified by archeologists as of Roman origin, but there were Dacians in the land before the Romans and other racial stocks have left their mark on the language and character of the people.

**Exercise and Health.**  
Take exercise. Take daily exercise. Have a hobby that gets you out of doors. Walk to your business, to your dressmaker's, walk for the sake of walking. Join a walking club and keep your weekly score of miles. Keep chickens, make a garden, wheel the baby or play golf or any other game, but take two hours outdoor exercise every day. Gymnasium work is good for those who like it and can afford it, but avoid heavy athletics. Don't try to be a "strong man," the champion athlete often dies young. Be a moderate, persistent, daily exponent of exercise. You may not burn the family carriage, as Benjamin suggested, but at least, as he advised, walk, walk, walk.

**FAMILY AVOIDS SERIOUS SICKNESS**

By Being Constantly Supplied With Theford's Black-Draught.

McDuff, Va.—"I suffered for several years," says Mrs. J. B. Whittaker, of his place, "with sick headache, and stomach trouble."

Ten years ago a friend told me to try Theford's Black-Draught, which I did, and I found it to be the best family medicine for young and old.

I keep Black-Draught on hand all the time now, and when my children feel a little bad, they ask me for a dose, and it does them more good than any medicine they ever tried.

We never have a long spell of sickness in our family, since we commenced using Black-Draught."

Theford's Black-Draught is purely vegetable, and has been found to regulate weak stomachs, aid digestion, relieve indigestion, colic, wind, nausea, headache, sick stomach, and similar symptoms.

It has been in constant use for more than 70 years, and has benefited more than a million people.

Your druggist sells and recommends Black-Draught. Price only 25c. Get a package to-day. N. C. 123

**Thinking and Speaking.**

I think a lot of things each day, but what they are I will not say. His thinking seldom gets a soul in any sort of awkward hole, if he has sense enough to keep his dark reflections buried deep. I think old Kickshaw is a bore, and when he talks he makes me sore, but when I meet him on the street my manner's mild, my smile is sweet; I listen to his blooming rot, pretending that it hits the spot. And so old Kickshaw swears by me, and he would take his snickersnee and carve trudecers if they tried to tan a sample of my hide. I do not say the things I think, if they would make some neighbor shrink, and so I get along in peace, and have no use for the police. The man who always "speaks right out" such thoughts as he may have about, must walk nine miles to find a friend, and he is lonely to the end. And oftentimes, to crown his woes, he has a dislocated nose, and wears a beefsteak on his eyes until the inflammation dies. —WALT MASON.

**A Thought for the Week.**

What seems to grow fairer to me as life goes by is the love and peace and tenderness of it; not its wit and cleverness and grandeur of knowledge, grand as knowledge is, but just the laughter of friends and the cozy talk by the fireside and the sight of flowers and the sound of music.—John Richard Green.

**SCHOOL WORK MOVED TO THE NEW BUILDING**

Monday and Tuesday were moving days at the Normal. There were no classes on Tuesday, all of the day being devoted to moving from the shacks to the new building.

It will take several days to get adjusted to the new building, but the faculty wished the students of this year to have an opportunity to do work in the new building, as this will be the last year for many of them in the school.

**Calendar for the Summer Session 1916**

The summer school opens June 6. The Summer Normal opens June 6. Classification and enrollment, June 6 and 7. Examinations for entrance, June 8 and 9. Class work begins June 7. National holiday, July 4.

First series examinations, July 10, 11, 12, and 13.

Second series examinations, July 24, 25, 26, and 27.

Summer Normal closes July 27.

Summer School closes August 7.

The regular session opens September 5, 1916.

## CANYON, TEXAS, IS BIG STOCK CENTER

C. O. Keiser, One of the Leading Dealers, Has Heavy Interests.

From Wichita Beacon — Between fifty-five and sixty thousand cattle are annually handled at Canyon. At the present time there are about fifty thousand within a radius of twenty-five miles of here, exclusive of this year's calves.

As to the markets: Most of the beef cattle are marketed at Kansas City and Chicago, but this immediate vicinity is annually covered by buyers from all over the country looking for breeding cattle. For example, within the past year C. O. Keiser has shipped from Canyon around 900 head of bulls, part of these bulls coming from Iowa, Illinois and Missouri, the rest of them being of his own breeding and raising. These bulls were shipped to various points in Texas, New Mexico and Arizona. One lot of 300 head was purchased by an El Paso man. Another carload was shipped to Kansas.

### Sold 2,000 Head

He also sold around 2,000 head of his pure bred range cows and yearlings, these being scattered over a territory from New Mexico to Missouri. For example, 950 "wet" cows were sold to nine different persons at Miami, Texas, and were probably the highest-priced wet range cows sold last fall in the territory west of the Mississippi, 550 of them selling for \$100 each after the calves had been weaned, and 400 seven-year-old cows bringing \$75 each. He also sold to parties at Independence, Mo., 150 head of the seven-year-old cows at \$75 each.

Among his other sales of range cattle were 400 head of pure bred but not registered yearling heifers at \$75 each, 200 going to Tucumcari, N. M., and 200 to a wealthy ranchman at Amarillo. Earlier in the summer last year he sold 100 head of range cows for \$125 each, to go to Plainview, Texas.

Mr. Keiser's herd of registered Herefords is probably the largest and best known of any where in the entire Southwest. His first purchase was a herd of some 200 registered cows, very rich in Anxiety blood lines, some of which were direct descendants of cows imported from England by the late Senator Hershey of Iowa. The eagerness with which the ranchmen and farmers of the Southwest grasped the opportunity to buy such registered Herefords so close to home became so pronounced that Mr. Keiser was compelled to meet this demand with new purchases and he has had two buyers on-the-road practically all the time since the first of November, selecting and shipping the best he could find in Iowa, Illinois and Missouri.

### Territory is Vast

The following facts give an idea of the territory in which he is improving the grade of cattle by the sale of registered Herefords: A carload of bulls went to Hope, N. M., to be used on a ranch about 60 miles from a railroad. Other carloads have gone to Deming, Fort Summer, El Paso, Carlsbad, Encino and Albuquerque, N. M., and bulls and cows in lots of one to ten have been distributed over various other points in New Mexico. Two carloads of bulls were shipped to Red Rock, Arizona, last fall, and about two weeks ago he shipped 104 head to Douglas, Arizona, this last shipment being a mixed lot of cows, heifers, calves and bulls. Twenty-four cows were shipped to Gageby, Texas. Twenty cows were sold to go to Lubbock, Texas. Twenty-five two-year-old heifers were shipped to Miami, Tex. Another lot was shipped to Eureka, Kan., on the order of Miss E. Hammond of New York City. Various other bunches in lots of from one or two to ten or twenty have been sold and shipped to dozens of other points in these states. These cattle are sold at reasonable prices in comparison with their quality and breeding.

Cattle have wintered extremely well in this part of Texas, there having been no loss from lack of feed.

### Has 64,000 Acres.

Mr. Keiser has in the neighborhood of 64,000 acres under ownership and lease, besides a number of highly improved places which are being farmed. His ranches lay in different directions from Canyon, his feed and show yards being located on the Palo Duro Creek, about five miles from town. He has about 2,500 head of registered and pure bred but not registered cattle on hand a present, having disposed of his grade cows last fall.

He has bought some 200 head of registered bulls and cows in Illinois and Iowa, about one hundred of which are now in feed yards at Florence, Kans., being held there until they can be brought into Texas, which will be in about ten days. The others are now in transit to Florence. These cattle are the top individuals out of the best herds in Iowa and Illinois, are royally bred, and are probably the best lot of cattle ever brought into the Southwest.

### Live Stock Center.

Mr. Keiser's 2,500 head of cattle

with his 64,000 acres of pasture proves that Canyon is a live stock center of much importance, but the man who imagines that the country around this city is wholly given over to cattle raising is in error. Many fine farms in all directions from the town are making their owners wealthy in the production of wheat, kafir and other grains. In fact, the raising of such crops make it possible to keep the big herds of cattle in good condition during the winter.

### Editors Thank Canyon.

The following resolution of thanks was passed by the Panhandle Press Association in Amarillo Saturday night:

We wish to thank the Canyon Commercial Club and Editor Warwick for the splendid entertainment furnished us yesterday, when we had a chance to see the grandest educational building in the south in that little city of push, where a celebrated New York

opera singer had been imported for our special delectation; and an old-fashioned chuck feed by one of the best cow-boy cooks in the state was provided for the editorial stomach.

J. F. Smith of Mobeetie transacted business in the city his week.

R. A. Terrill was laid up a few days this week, having suffered a badly strained back while lifting the piano and seats in the auditorium.

## Such tobacco enjoyment

as you never thought could be is yours to command quick as you buy some Prince Albert and fire-up a pipe or a home-made cigarette!

Prince Albert gives you every tobacco satisfaction your smoke-appetite ever hankered for. That's because it's made by a patented process that cuts out bite and parch! Prince Albert has always been sold without coupons or premiums. We prefer to give quality!

# PRINCE ALBERT

the national joy smoke

has a flavor as different as it is delightful. You never tasted the like of it! And that isn't strange, either.

Buy Prince Albert everywhere tobacco is sold in tappy red bags, 5c; tidy red tins, 10c; handsome pound and half-pound tin humidor—and that corking fine pound crystal-glass humidor with sponge-moistener top that keeps the tobacco in such clever trim—always!

Men who think they can't smoke a pipe or roll a cigarette can smoke and will smoke if they use Prince Albert. And smokers who have not yet given P. A. a try-out certainly have a big surprise and a lot of enjoyment coming their way as soon as they invest in a supply. Prince Albert tobacco will tell its own story!

**Hurrah for the Normal!**

Friday's Amarillo News—The Panhandle Press Association, with badges of green bearing letters of gold, will mingle freely this afternoon with the general throng at Canyon, witnessing with joy and pardonable pride the formal opening of the elegant new fire-proof home of the West Texas State Normal.

No people within the whole Panhandle and Plains Country of Texas will rejoice more fully over the permanent housing of this great institution than will the representatives of the Panhandle Press Association. The newspapers of the territory feel that this is their school, as well as it is the possession of those in other lines of endeavor. The newspapers have told of the institution since before the time it was planted in the Panhandle. They led the agitation for its creation and then following that its location occupied space, and when its home was swept away by fire sympathy was expressed and agitation again carried on for a building of an even grander, better and more enduring home. The result of this work as a part of the

activities leading to the present superb structure, has not been a small one.

Long after the present generations shall have past from the field of earthly endeavor, branching into the realms of higher and nobler possibilities unrestricted and unrestrained, the beneficent influences of their work will be evidenced in the product of the West Texas State Normal. A child of the great state of Texas, freighted with all of the possibilities of a world, the West Texas State Normal is the object of much love among the people of all the object of much love among the people of all this territory. It would be impossible to think of it as possession of the lovely little city of Canyon, of spreading, fertile and productive country of Randall, for that would be too limited. It is considered the property of all this vast Plains of Southwestern, Middle Western and Northwestern Texas.

Expressive of their love for the institution, of their pride in its worth and beauty, of their hope for its glorious future, the Panhandle and Plains Country Editors and their representatives will be presented today. They will be there with renewals of their vows of loyalty, backed by records of unselfish devotion to the school. They will be there believing everything, hoping everything, "knowing" everything for the good of the institution.

Although not unmindful of their own worth to the country, the newspaper people are not unmindful of the fact that they have no monopoly upon the good work of the section, and they claim only to be a part of all that which is good and wholesome. On this basis too, they recognize their dependence upon their fellows in other lines of endeavor.

This day will mark an epoch in the history of the Plains Country of Texas, and it is considered particularly fortunate that the dates are so arranged that all of the newspaper workers of this section of the state are available for the expenses today. Each and everyone of the papers represented will be able to carry first-hand impressions to their readers of the West Texas State Normal.

Friday was a great day for Canyon. Canyon people responded gratefully in the entertainment of the hundreds of visitors and they all went away feeling well pleased at having made the trip to Canyon.

Relations between Germany and the United States are everything but hopeful. However, the News believes that the difficulties will be settled without precipitating this country into the war.

The Panhandle Press bunch enjoyed their visit to Canyon. They are a live bunch and enjoyed seeing what the state is doing in an educational way for the boys and girls of west Texas.

It seems that ex-Governor Colquitt is making a grand stand play for the benefit of the Germany-American voters, whom he hopes to land in July.

Dr. Robert E. Vinson has been selected president of the state university of Texas.

Sudan Grass a Good Pasture and Hay Crop.

Progressive farmers of the Southwest are looking for a good pasture and hay crop that can be depended upon. There is no crop known to this section at present that promises more along this line than Sudan grass.

Sudan is a new crop belonging to the sorghum family. It is a close relative of Johnson grass, but never becomes a weed or a pest in the same way. Its root are like kafir or milo and are not underground stems as Johnson grass. This crop requires seeding every year. Sudan will stand as much dry weather as milo or feterita, in fact it will make a crop in spite of weather conditions if it once gets started.

Starting the Crop:—Good cultivation, such as is required for the grain sorghums, will pay in connection with Sudan. This crop adapts itself better to surface cultivation than kafir or milo and is very seldom planted in furrows. Fall or early winter plowing insures better results not only with Sudan but with many other crops as well, the deeper this early plowing is done the better. To insure good results, even during the driest years of the Southwest, this crop should be planted in rows about thirty-six inches apart and these should be cultivated about the same as the grain sorghums such as kafir and feterita. For average seasons Sudan will make good, when sown broadcast with a grain drill the same as wheat or oats at the rate of from ten to fourteen pounds of seed per acre. When this crop is planted in rows and cultivated, equally good returns are insured from planting two to two and one-half pounds of seed per acre. Like milo and feterita, this crop should not be planted before the ground is warm, or until all danger of frosts is past, usually about May first to May tenth is

Block Number Six. Mr. and Mrs. Wm. Boehning and family and John Downing visited at the E. Edmonds home Sunday.

George Barton of Lone Tree, Iowa, is visiting with Mr. E. Edmonds and family.

Reverend Smith of Hereford conducted services at the Keenan school house Sunday.

Mr. and Mrs. T. C. Jennings are entertaining their son and daughter, Mr. and Mrs. T. C. Jennings Jr., of Chillicothe.

Mr. and Mrs. E. Edmonds accompanied by E. J. Godwin transacted business in Amarillo Monday.

Henry Meyer and wife held open house Sunday. The guests were Mesdames Studenrath, Lesebery, Meyer, Miller, Deeke, Michael, Albers and Messrs. Studenrath, Leseberg, Meyer, Miller, Deeke, Michael, Albers, Wendelken, John and George Dinkle and Rev. Smith.

Easter was celebrated by Easter hunts at the different homes in the community, in which are still to be seen chickens, rabbits and gayly colored eggs.

A satisfactory time. In buying seed, be sure that it is not mixed with Johnson grass seed or anything else that will contaminate the land.

A Pasture Crop:—Successful farmers of the Southwest who have tried out Sudan last year have found it to be an excellent pasture grass. It furnishes a fine pasture crop for fully six months out of the year. There are no cases of bloat or poisoning coming from this crop as far as the writer has been able to find. The crop makes good pasture for dairy cows, hogs, horses, sheep and beef animals. It is especially adapted to dairying and hog raising under limited rainfall conditions. An acre of this crop under ordinary conditions will furnish sufficient grass for one full grown cow for the entire season. For a hog pasture, this crop is next in importance to alfalfa.

A Hay Crop:—Sudan grass is better than Johnson grass hay. In chemical analysis it stands between Johnson grass hay and alfalfa hay. This crop will furnish two good cuttings and often three cuttings an average year without any irrigation. For extra fine hay, Sudan should be cut when the first heads begin to show. It should not be allowed to continue growth until it gets fully matured before cutting, as it gets too woody and coarse and will not make as much tonnage as when cut earlier and more often. It will make from one and one-half to three tons of good hay per acre.

**Clean The Town.**  
(By E. A. Chambers.)  
Is our town what it should be? I don't know. Then look and see; And many things may come in view, That can be mended by me or you.

Let's clean the alley, street, and walk, Then our neighbors can make no talk; And those who come to town for a while, Will always greet us with a smile.

When summer comes so pleasant and warm, Mr. Marquis' flies, about won't swarm; The filth with fire, we will consume, And by the screens keep them out the room.

If the Civic Club should enter our shop We won't be tempted to bid them stop! But have it all so clean and neat, We can say, "Come in and have a seat."

When the Club Ladies meet at the close of day, They need not look to God and say, "Help us to better those who are so mean," But offer thanks for the town being clean.

**Picking the Winners.**

Louis Seibold is one of the most interesting of all the Washington correspondents. He represents the New York World at the capitol of our country and political forecasts are very reliable. He predicts the nomination by acclamation of President Wilson and Vice President Marshall and that the temporary chairman of the national convention will be either John Sharp Williams or James Hamilton Lewis. Mr. Seibold classifies Williams as the ablest Democrat in congress and Lewis the most impressive Democrat. He makes the prediction that if the Republicans refuse to accept Theodore Roosevelt as their candidate there will be a third ticket, as in 1912. This veteran correspondent is cocksure that Hughes sentiment is dwindling and that there is little chance for Root. George W. Perkins is greasing the way to make the Oyster Bay colonel swallow a reactionary platform made by the old guard Republicans. Should Roosevelt be the Republican nominee, wise politicians are predicting that he will be buried out of sight in November.

**Posted.**

I have charge of the premises of my father, W. E. Bates, which includes the west part of section 30 and all of section 29, Block B5. I positively forbid any intruding on this place by people, fishing, hunting, gathering grapes or even passing through. Please heed this notice that you may save both you and I trouble. R. R. Bates.

**DRINK SIX GLASSES OF WATER DAILY**

An Interesting Statement by One of the Big Men in the Drug Business

A. E. KIESLING of Houston, Texas, says: "If you have a muddy complexion and dull eyes, you are constipated. Six glasses of water daily and one or two Rexall Orderlies at night will correct this condition and make you 'fit as a fiddle.' Rexall Orderlies, in my opinion, are the best laxative to be had, and can be taken by men, women or children."

We have the exclusive selling rights for this great laxative.  
**CITY PHARMACY**  
THE REXALL STORE

**CANYON H.S. NOTES**

The high school turned out Friday and Saturday in order that the teachers might attend the Panhandle Teachers Association which met in Canyon. All report a good and valuable meeting. There were about 200 in attendance from the several Panhandle schools. The Domestic Science department was well represented by both the high school and the grades. Everyone that saw it complimented it very highly. Mr. Duncan, superintendent of the Amarillo schools praised it very highly, and said it was better than the work done in his school, where there is a regular domestic science department.

The pipes for the giant strides are up and will be ready for use by Saturday. The Sophomore class went on a picnic Monday. All the class did not go, but those who went report a fine time. Mrs. Thompson chaperoned the crowd. The debate in the auditorium Tuesday morning was interesting and entertaining. The Senior girls showed how housework was harder than a man's work, while the boys refuted the statement. The girls won the debate by a unanimous vote.

**Wayside Items.**

Rev. Bell and wife were with us Sun morning and at night. Gave the Fairview people a sermon in the afternoon. Left appointments at both places for next 4th Sunday. They proceeded to Amarillo on Monday where they will visit with Mrs. Bell's sister a few days.

Fine open weather prevails, with a good season in the ground the farmers are forging ahead with their work.

After a stay of 12 days among friends and relatives Bishop Bradley left Monday for his home in Lalande, New Mexico.

M. L. McGehee has lately treated himself and family to an elegant seven passenger Buick car.

Miss Goodwine closed school for the primary department last Thursday. R. S. Kelley's school continues another week, closing Friday.

Edward Wilson is in Tulia under treatment for stepping on a nail which penetrated his foot.

Election Saturday at Wayside for voting on special school tax resulted in 11 for and 10 against.

Mrs. Lon Gillham has been quite sick with erysipelas of the face. Some improvement in her condition.

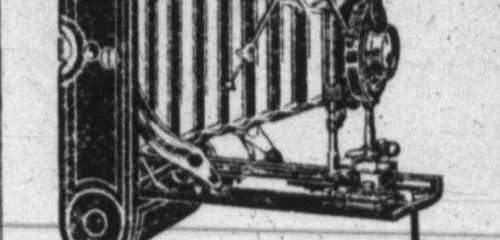

Hereford Brand—On Friday, of this week, the West Texas State Normal, at Canyon, will be dedicated, and not Canyon, alone, but all west Texas takes a personal pride in this great institution with its unsurpassed facilities and equipment, and rejoices that this part of the state has at least been granted this much consideration. The building is magnificent, and will be adequate for all requirements for years to come. But now, we want an A. & M. College situated in near enough proximity to our homes that its experimental and demonstration work may have the greatest practical value for the boys and girls in this part of the state. Much that the pupils receive in A. & M. is worthless, owing to different conditions of soils climate, etc. We would not discredit the work of this worthy and efficient institution, but we want one just like it.

 Several dates set for letting of the contract but changes for the betterment of the new building caused postponement.  
 Dec. 12, contract let for new building.  
 Jan. 1, 1915, clearing away of the ruins of old building begun.  
 June 4, appropriation for the wings of the new building approved.  
 Sept. 15, laying of the corner stone of the new building.  
 April 21, 1916, dedication of new building.  
 The total attendance since the school opened has been as follows:

1910-1	582
1911-2	794
1912-3	1115
1913-4	980
1914-5	1041
1915-6 (Regular session)	537

FACULTY.

- R. B. Cousins, President

Kill 10,000 Flies.

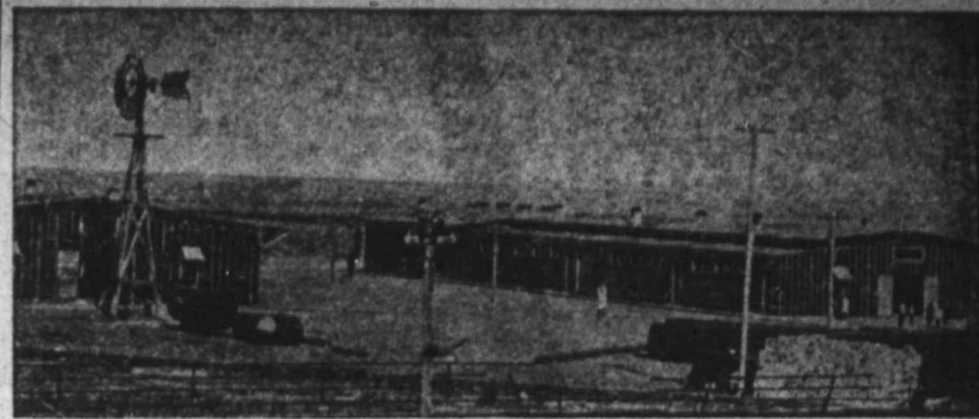

The boys and girls of Canyon have killed 10,000 flies during the past three weeks, bringing them to the News office where they were paid 10 cents per hundred by the ladies of the City Federation.

The funds have been exhausted and no more payments will be made by the ladies.

They certainly appreciate the efforts of the boys and girls in killing the early flies and hope that the children will keep on with the killing in order that there may be fewer flies around the city this year than ever before.

Cures Old Sores, Other Remedies Won't Cure  
 The worst cases, no matter how long standing, are cured by the wonderful, old reliable, Dr. Foster's Antiseptic Healing OIL. It relieves Pain and Heals at the same time. 25c, 50c, \$1.00.

COME TO CANYON TO LIVE.

THE SHACKS WHERE THE SCHOOL HAS BEEN CONDUCTED.

WEST TEXAS STATE NORMAL COLLEGE

Canyon, Texas

ADVANTAGES OFFERED FOR THE SUMMER SESSION OF 1916

FACULTY—A faculty composed of men and women of scholarly attainments, teaching ability, and progressive spirit.

CLIMATE—A climate unexcelled anywhere in Texas. Canyon is on the caprock of the plains, 3,300 feet above sea-level, and is as "cool as Colorado." Light wraps are necessary on mornings and evenings; people coming for the summer should not forget to bring them.

THE NEW BUILDING—The new home of the West Texas State Normal College is a massive structure of steel, concrete, and brick. It is absolutely fire proof. It is 300 feet long, almost 200 feet deep, four stories high, and contains 85 rooms. The building is equipped with all the modern conveniences for the comfort of the student, and the auditorium has a seating capacity of 1400 people.

GYMNASIUM AND SWIMMING POOL—The gymnasium is well equipped with modern apparatus for healthful exercise. The exercises are directed by competent instructors in physical education.

The swimming pool is 70 feet by 35 feet by 8 feet. It is kept filled with sparkling water in which one may take a plunge after the day's work is over. In connection with the swimming pool are both hot and cold shower baths.

LIBRARY—The library, well supplied with books for collateral reading, is administered by a trained librarian. Many periodicals and daily newspapers are available for the free use of the students. The library and the reading rooms occupy one-fourth of the third floor.

LABORATORIES—There are six well equipped, separate laboratories; namely, (a) Domestic Science, (b) Manual Training, (c) Agriculture, (d) Physics, (e) Chemistry, and (f) Biology.

THE TRAINING SCHOOL—For the benefit of those students whose course requires it, a school of observation in the primary grades is conducted by teachers. All students are at liberty to visit the Training School at any time they desire.

NINE WEEKS' SESSION—The sessions of both the Summer School and of the Summer Normal will open June 6, 1916, and continue nine weeks. The Summer School has heretofore been continued for twelve weeks. In order that this school shall offer its work in the summer on the same basis as the other Texas Normal Schools, we have changed from twelve weeks to nine weeks for this summer, and will give a full unit of credit for all work satisfactorily completed.

CREDIT COURSES—Credit courses are offered in all of the departments of the College. The Department of Manual Training, The Department of Spanish, and The Department of Expression, all will offer courses this summer, as well as those departments that have regularly offered courses heretofore.

SUMMER NORMAL REVIEWS—Review classes in all work upon which the State Superintendent of Public Instruction requires examinations for the various certificates will be maintained. Any person who wishes to review for any examination for certificates in Texas may get the work suited to his desires.

SERIES OF EXAMINATIONS—Those who wish to take the examinations for certificates may enter either or both series of examinations under the regulations of the State Superintendent.

FEES—The enrollment fee is \$10 for either the Summer School or the Summer Normal. The incidental fee is \$1. The book fee is \$2. No fee is returned, except \$1 of the book fee, which is returned upon withdrawal if all books taken from the library are returned in good order.

REDUCED RAILROAD RATES—Reduced railroad rates on all railroads will be offered, the details of which will be announced in Bulletin No. 12, which will be issued about February 15, 1916. This Bulletin will give full information as to the faculty, courses, programs, etc. If you are interested, write to President R. B. Cousins, Canyon, Texas, for a copy of the bulletin.

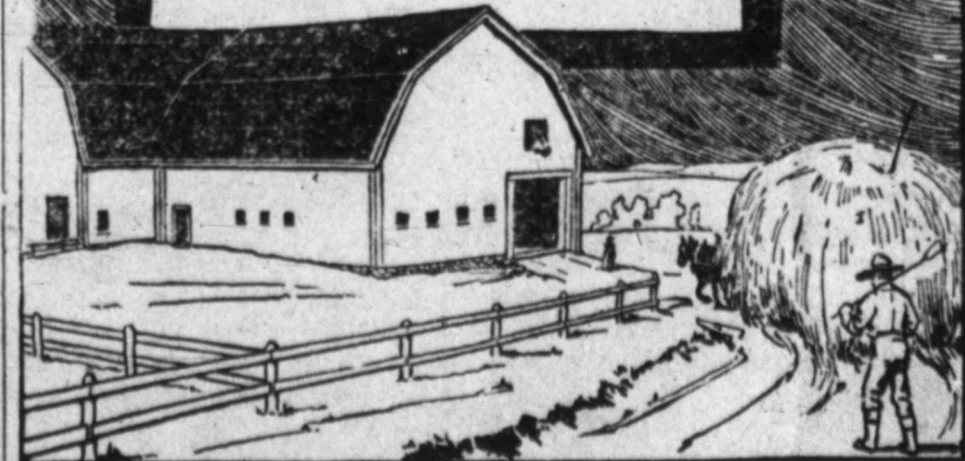

Protected

ANYTHING that is under a Texaco roof is protected. It makes no difference whether the roofing was applied ten days or ten years ago. It is made to wear and it does.

is always water-proof because it is heat-proof and cold-proof. It is not affected by smoke or acid fumes. Furthermore it is as nearly fire-resisting as it can be made. It is a good form of fire insurance.

You should use Texaco Roofing. If you are not familiar with it ask us about it.

**JULIA HEINRICH PLEASURES VERY LARGE AUDIENCE**

The recital of Julia Heinrich Friday night was one of the most pleasing features of the dedication program. Miss Heinrich is one of the younger singers of the Metropolitan Opera of New York who is making good in recital work wherever she has gone. She is an American girl and her future career will be of great interest to the people of the Panhandle who believe she has a great future. The recital Friday night pleased all who heard it.

While there was considerable disappointment over the failure of Julia Culp to come for the recital, yet the attendance was good and the expenses were more than met.

This is the second great artist to be brought to Canyon, and the committee hopes to each year give the people a music treat of this nature.

The attendance from Hereford, Tulsa, and Plainview was good at the recital.

Editors for Western A. & M. College.

The following resolution was passed by the Panhandle Press Association Saturday at the meeting in Amarillo:

We endorse the movement recently inaugurated by representatives of all parts of West Texas at convention held in the city of Sweetwater for the creation and establishment of a full A. & M. College in West Texas. We believe the vast growth, development and enterprise of West Texas, and its vast agricultural possibilities, now based upon proven successful methods, demand the establishment of such an institution, and we pledge our full cooperation and support to such movement. We consider it a paramount necessity, and feel that the next legislature of the commonwealth of Texas cannot afford to further delay the realization of the aspirations of West Texas, with its million people, and this great movement.

**Mass Convention.**

The Republicans of Randall county are called to meet in Mass Convention at the Court House in Canyon, on May 9th for the purpose of selecting delegates to the State Convention to be held at Fort Worth on May 23rd, also delegates to the Congressional Convention to be at Wichita Falls on May 13th and to transact such other business as may properly come before the convention.

J. D. GAMBLE,  
Chinn Rep. Ex-Committee,  
Randall County.

**The Quinine That Does Not Affect The Head**  
Because of its tonic and laxative effect, LAXATIVE BROMO QUININE is better than ordinary Quinine and does not cause nervousness nor ringing in head. Remember the full name and look for the signature of E. W. GROVE, 25c.

**CLASSIFIED ADS FOR SALE**

- For sale—1½ blocks near Normal for \$500. W. H. Lewis. 513
- For sale—Two 3 year old bulls and one 2 year old. R. L. Campbell, Canyon, Texas. 613
- For Sale—Sweet potatoe plants. Mrs. B. T. Johnson, phone 186. tf
- FOR RENT**
- For rent—My pasture will be for rent beginning May 1st. W. E. Bates.
- LOST**
- Taken up—Any one having lost a nineteen fifteen (1915) calf can secure same by giving full description to Frank Watson, City. 11f
- Lost—Cap or compression cup off bus yesterday. R. E. Foster.

**Dan**

A dark bay graded Percheron coming 4 years old, weight 1650 will make the season at my farm 5 miles south and 1 mile east of Canyon.

**TERMS:**

\$10 to insure colt to stand and suck, will not be responsible for any accidents. Mares sold or removed from county, service fee becomes immediately due.

**Henry Schroeder**

**Democratic Convention.**

By direction of the Democratic State Executive Committee, of the State of Texas, a county convention is hereby called, to meet in the city of Canyon, May 9, 1916, at the district court room at three o'clock p. m. for the purpose of electing delegates to the Congressional convention, the State convention and to transact such other business as may properly come before said meeting.

Precinct conventions must be held on Saturday, May 6th, to send delegates to the county convention.

D. A. PARK,  
County Chairman.

**Baptist Sunday Services.**

Sunday School 10 a. m.  
Preaching, 11 a. m. by Rev. E. L. Farmer.  
Sunbeams 2 p. m.  
Junior B. Y. P. U. 4 p. m.  
Senior B. Y. P. U. 7:15 p. m.  
Song service 8:15 p. m.  
Preaching by the pastor 8:30 p. m.  
Subject: Parental authority, home government and obedience.  
The several services will begin promptly at the time given above.  
B. F. FONABARGER, Pastor.

**Cousins Visits Lockney.**

President R. B. Cousins was in Lockney to speak Monday night. He reports that the schools in that city are in excellent condition and that the people take an active interest in educational matters.

Lawrence Hill is superintendent of the schools and on the faculty are a number of Normal graduates.

**Special Notice.**

The doors of the HAPPY HOUR Theatre will be thrown open FREE to the people of Canyon to see the greatest CIRCUS picture—PEG O. RING Thursday, May 4th.

**Normal Commencement in 2 Weeks**

The commencement exercises of the Normal will begin two weeks from today. The final exercises will be held two weeks from next Monday morning.

**Dog Kills Himself.**

A large yellow dog was found dead west of the city Friday, killed while chasing a rabbit. The rabbit ran into an old piece of stove pipe with the opposite end stopped up. The dog was so close behind the rabbit that he chugged himself in the pipe up to his shoulders and stuck there. When the dead dog was found and removed two rabbits were found in the pipe.

**Democratic Precinct Convention.**

A precinct convention of the democratic voters of precinct number one, Randall county, Texas, is hereby called for Saturday, May 6, 1916, at three o'clock p. m. for the purpose of electing delegates to the county convention to be held May 9th.

C. W. WARWICK,  
Precinct Chairman.

**Movie Pictures of Crowd.**

L. B. Payne had motion pictures taken Friday of the large crowd that attended the dedication exercises at the Normal. He is having the pictures developed in Chicago and will have the films within a short time to show in the city.

**Block Number Six.**

(Too late for last week.)  
Mr. and Mrs. Herman Meyer and family visited with Mr. and Mrs. Gerdson Sunday.

Tom Slack and family spent Sunday at the T. C. Jennings home.  
Mr. and Mrs. Emil Albers and Mr. and Mrs. Wm. Michael picniced in the canyons Sunday.

Wm. Boehning and family took supper with Mr. and Mrs. W. L. Deek Sunday evening.

George and John Dinkle, Albert and Henry Meyer, and Donald Edmonds spent Sunday exploring the canyons. Henry Meyer and family visited at the home of Mr. and Mrs. Fritz Ragge Sunday.

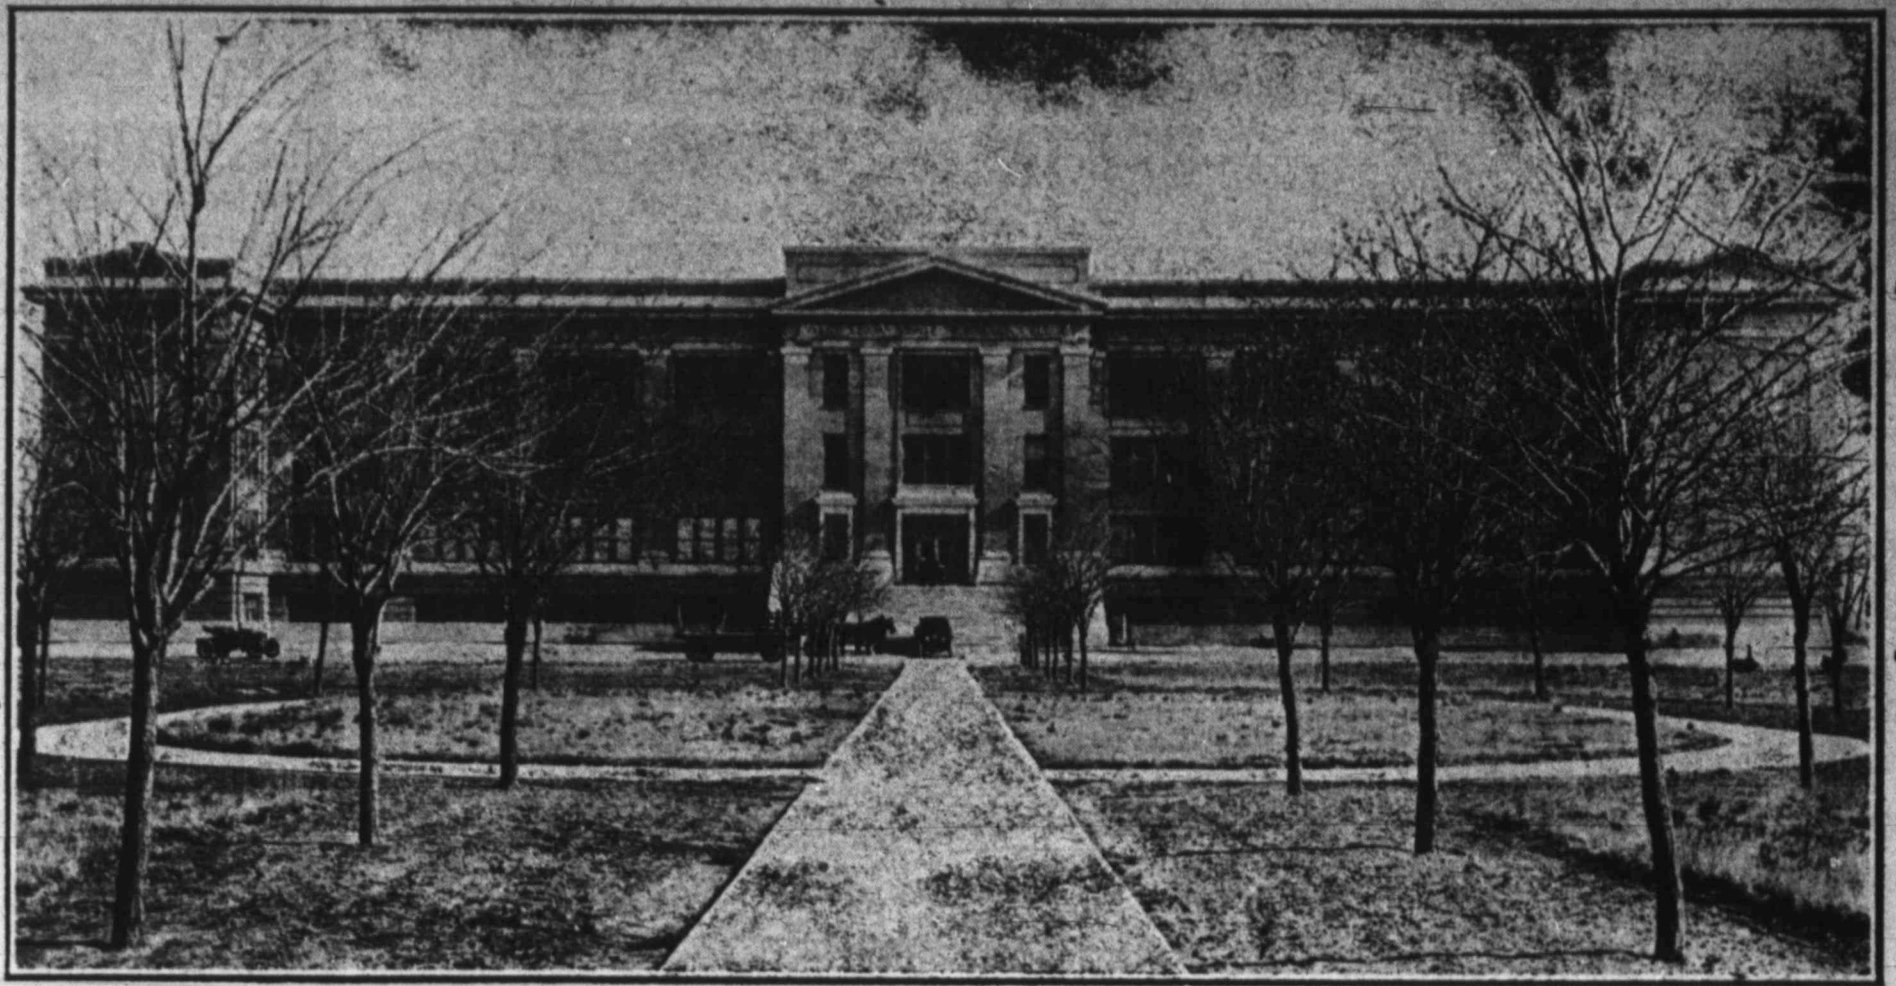

Mr. and Mrs. Wm. Younger of Canyon visited at the Keenan school Tuesday afternoon.

Field work is on in full swing this week. The farmers are taking advantage of the fine rain of Friday to get the ground in good shape for the summer's crops.

**Free Prizes for You.**

A \$950 REO touring car—1916 model—etc. etc., to be given away absolutely free by The Daily News and the Daily Panhandle on July 3rd. Write them at once for full particulars. pl

Canyon is the educational center of Northwest Texas. Come here to live.

THE NEW STEEL FRAMED, FIRE PROOF BUILDING OF THE NORMAL.

ON THE CAMPUS OF THE SHACKS

**THE NEW NORMAL BUILDING AND WHAT IT HAS**

From an architectural standpoint the new building of the West Texas State Normal College is one of the most complete, if not the most complete in the state.

R. A. Terrill has been in charge of supervising the work in the absence of Architect George A. Endress and kindly furnishes the News with the following data concerning the new building: The building stands on a campus of forty acres.

The building is 308 feet east and west and 168 feet north and south, exclusive of the steps.

The style of the building is a combination of Grecian and Roman. It faces the south with the main entrance on the south, and east and west supplementary entrances.

The building has semi indirect electric light, with local gas plant. No student or teacher will face the light in the class rooms.

The curtain walls are of brick, stone and terra cotta. The brick are of dark gray, with white stone and terra cotta are used.

It is estimated that the building will carry eight times the weight that would be upon it if every floor was filled with men standing as closely together as possible.

The building is constructed in a T shape, the auditorium, swimming pool and gymnasium occupying the stem portion of the building.

**The Basement.**

The basement floor contains the swimming pool, gymnasium, boys and girls locker rooms, toilets, shower baths, office of Director of Physical Education, girls lunch room, manual training machinery shop, office of Director of Manual Training and bench woodwork room.

The swimming pool room is 40x100 feet. It is tiled floor. The 28x82 foot pool is tiled, and water stands from 3½ to 8½ feet deep when filled. It is the latest in style, with rings, spring boards and trapeze. Marble steps lead up to the landings. Water may be heated to any required degree.

The shower bath rooms are in marble with nickel plated fixtures, having both hot and cold water at the disposal of the students.

The toilet rooms are finished in marble with numerous wash basins, etc.

The locker rooms contain one thousand steel lockers, having independent locks for each.

The general gymnasium is 40x100 feet, with a 24 foot ceiling. It has a maple floor and is equipped with all the latest apparatus, including steel lockers for the smaller apparatus.

A corrective gymnasium 22x70 feet for the treatment of special cases

among the students and for the use of the training school.

In the basement is also the fan room, containing two suction air cleaners for general use in the building, a large fan and heating apparatus for furnishing pure fresh air to all the class rooms and a smaller fan for a similar service for the auditorium. These fans are sufficiently large for changing the air throughout the building in fifteen minutes.

The electrical switch board room contains three large slate base switch boards from which are controlled all electrical current used in the building.

The manual training machinery shop is to contain the principal portion of the machinery for that department which will consist of a surface planer, jointer, tool grinder, double arbor saw bench, mortiser, tenoner, band saw, sanding machine, besides other smaller machines for cabinet making and wood working.

The bench woodwork room contains seven wood turning lathes and benches for bench wood work and joinery.

**The First Floor.**

The main or administration floor contains the offices of the President, Secretary, Stenographer to the President, the enrolling committee, the faculty room, together with offices of some of the faculty and recitation rooms. There is also a small assembly room 22x68 feet, five rooms set apart to the training school, three to the department of mathematics and two to the department of manual training, being the printery and the mechanical drawing rooms.

**The Second Floor.**

The second floor is largely set apart to the auditorium and class rooms, with offices for the heads of the departments. The history department occupies two rooms, expression one room, Latin one, German and Education one, the library and stack room three, English three, auditorium one, art one, music one.

**The Third Floor.**

The third floor is largely for the sciences and contains a physics and chemistry lecture room, physics and chemistry laboratories, agriculture and biology lecture rooms and laboratory, commercial room, two laboratories for domestic science, a dining room, sewing room and general class room. On this floor is also located the offices of the heads of the departments working on the floor, and the balcony of the auditorium.

**The Library.**

The library on the second floor oc-

cupies the south east portion of the building and contains two reading rooms, one 28x40 feet, the other 22x50 feet. It also contains the librarian's work room and office and a stack room for text books, this room being 22 feet square.

**The Auditorium.**

The auditorium is the show place of the building, being 80x100 feet, with inclined floor, seated with 840 opera chairs on the main floor, with large aisles. There are two dressing rooms, one at each side of the stage. The stage proscenium is 50 feet wide and 25 feet high while the stage itself is 26 feet deep. It has foot lights and concealed overhead lights with dimmer control for the amount of light from either the footlights or overhead lights. A curtain has been ordered for the stage. One hundred and twenty people can easily be seated on the stage and 200 additional seats could be provided on the main floor easily. The balcony will hold at least 300 people. The lighting is semi direct and has beautiful hanging fixtures for lights. Twelve Cathedral windows provide light during the day. The room has a special ventilating system when the auditorium is in use.

The inside walls of the building are of hollow tile. Drinking fountains are placed at convenient distances along the walls in all of the halls.

Halls run through the length of the building, 15 feet wide. There are two side halls on each floor with stair ways, on either side of the auditorium wing of the building.

The walls are finished in white, making a beautiful appearance.

While the building is fire proof, to provide against emergencies the building is equipped with twelve reels of hose, each 75 feet long with nozzles attached and hung in the main halls.

In all there are 85 rooms in the building.

The main entrance of the building is 50 feet wide with large promenade at

the top of the steps. The roof is of concrete, with combination on top of it.

The building is heated by a separate plant, which stands north of the main building.

The school has its own water plant, standing to the east of the building.

The campus is well lined with concrete walks, and excellent drives have been made over the grounds.

Hundreds of trees are making a good growth on the campus.

**C. O. D. Law Killed.**

Washington, April 24.—The Texas statute of 1907 imposing a tax of \$5,000 a year on each place handling c. o. d. was held invalid today by the supreme court as an interference with interstate commerce. The decision so announced by the supreme court in delivering it arose before the passage of the Webb-Kenyon law and did not involve it in any way.

New York Commerce and Finance—“For the first time in history investors seem to be seeking Texas bonds. The securities issued in the Lone Star state have been under the ban largely on account of the freak legislation enacted at Austin. It is rather notable to record therefore that an issuance of city bonds of \$500,000 for the city of Houston recently sold for 108.”
