

BRYAN VISITS CITY TWICE SPEAKING BOTH TIMES

Great Orator Here to Discuss the Preparedness Question—Opposed to National Movement.

William Jennings Bryan likes Canyon. He likes the entire Panhandle and says that he is coming back here often.

He was invited by President Cousins to speak before the students at the Normal Friday afternoon, while passing through the city, but owing to the lateness in arriving, he spoke at the court house for a few minutes on the question of preparedness, taking issue with the principle of the question.

Monday he was going back to Plain, new and sent word to Mr. Cousins that he would be glad to speak to the school Monday afternoon at 6 o'clock until the 6:53 train. Mr. Cousins advertised the fact and the auditorium was nearly filled when he arrived.

Leading up to his general theme of speaking against the preparedness program, Mr. Bryan discussed the power of pictures on the thoughts and lives of men.

He stated that four pictures had had great influence on his life and his thought.

The first was the Madona. To this he ascribes his belief on the question of woman suffrage, of which he is an advocate. The woman invests more in the life of the child than the man. The mother's influence is more over the boy than the father. The mother is anxious over the influence that shall be thrown about her son, and that he shall not be beset with snares set by unscrupulous men who control the ballot box. The mother argument was the one which converted Mr. Bryan on the suffrage question.

The second picture was breaking home ties. The young man is going out into the world where influences are at work. The first thing that attracts him is the saloon, and thus, Mr. Bryan states he derived his prohibition views from this picture. He allowed no canteen in his camp while a colonel in the army. He stated that if the voters were made legally responsible for the saloon rather than only morally responsible, there would be no saloons.

The third picture was that of a pile of skulls, representing the results of war. He then when into the peace plan that he had worked upon for ten years as a result of having seen this picture. He stated it was his mission to keep this country from going into war, and that it would be a crime to be drawn into the European war. He wishes to appeal to the nations at war to make peace.

The fourth picture Mr. Bryan mentioned was Christ before Pilot. He then went further into his arguments against preparedness, discussing the pictures as a question of force and peace. He declared that this was America's opportunity to take its place by the side of Christ for peace.

Ira Burnham Died Monday.

Ira Burnham, who has been one of the Keiser real estate agents for a number of years, died Monday night in Nebraska very unexpectedly.

In fact Mr. Keiser received a letter from him only the day previously, written on Saturday, outlining his work for this week, and making no statement as to his health.

The word of his death is a distinct sorrow to those with whom he has been associated with in this city.

Mr. Burnham has brought many splendid farmers to Randall county, all of whom are grieved at the news of his death.

New Toll Line

A new toll line is being run through the city by the Southwestern Tel. & Tel. Co. The line has very large poles, which will extend from Amarillo on to the south plains. A large gang of workmen have been in the city all week.

The company is having the poles on the square, which stand in the middle of the street, painted white.

NORMAL NOTES

Mr. Cris Brown, a former student, is now visiting our school.

Miss Graham, Secretary of the Y. W. C. A. of Texas, Oklahoma, and New Mexico, has been visiting our school. Her speech in chapel last Saturday on the "possumist" was unique.

William Hale of Lipscomb spent last Saturday visiting our school. William assures us that he will be in school next year.

Mrs. Moore of Amarillo spent Monday with her daughter, Miss Rosalie Moore.

Mr. and Mrs. Cousins, Misses Rambo, Ritchie, Lamb, Mr. Shaw, Mr. Reid, Mr. Marquis, Mr. Stilwell and Mr. Allen accompanied by sixty-four students heard the address of Hon. William Jennings Bryan in Amarillo April 28.

Monday night at the college auditorium, Mr. Blaine's class of girls in gymnasium work, assisted by a dozen boys, gave a gym show for the benefit of the athletic department.

Mr. Jesse Wilson, Secretary of the Y. M. C. A. of Texas, spoke in chapel Wednesday morning concerning the work of the association.

On last Monday afternoon at the new college auditorium, Hon. William Jennings Bryan addressed our students and the citizens of Canyon. His subject was "The Power of Pictures."

Miss Hettie Poe, a former student who has been teaching near Stratford spent Tuesday with us.

Cut-School Slides.

As stated in the News several times, a committee of ladies of Canyon are responsible for some excellent apparatus on the public school grounds. It has taken much time to raise the funds for the playgrounds, and over \$300 has been expended.

The apparatus was only completed last week. All of the children of the school had taken a great interest in the new apparatus. The several classes had worked, selling candies, popcorn, cakes, etc., in order to assist with the funds, especially in the installation of the same. It was with great delight that they saw the completion of the apparatus only last week.

Imagine the rage and furor that was to be found among these little folks Tuesday morning when it was discovered that some low down scoundrel had during the previous day or night gone onto the grounds and with a knife or other sharp instrument cut deep gashes in the slides, attempting no doubt to ruin them!

A funds was at once raised and offered as a reward for the conviction of the parties. It is hoped that not many days will pass until the party or parties will be brought to justice.

What the idea of the person or persons was, no one can guess. Certainly there is no one in this town who does not wish to see the children enjoy themselves on all occasions. What could be more joy to the child heart than those beautiful slides?

No matter what the culprit had in mind at the time, it was the child life of Canyon that he struck when he put his knife into those slides.

While the damage is not irreparable, the principle of the act was the same as if the slides were wiped from existence.

Normal Debate Tonight.

Tonight the Cousins and Palo Duro literary societies of the Normal will discuss the question: "Resolved, That The Philippine islands be given self government in not less than two nor more than four years."

The Palo Duro society will affirm the question, being represented by Norman Clevenger and Oscar Huddleston. The Cousins will deny, Lawrence Fuller and Will Taylor, speaking for the society.

Saturday night the Guenther and the Palo Duros will debate the Military training question. The Palo Duros will affirm the question, Walter Hardin and Paul Bell being the debaters, while the Guenthers will be represented by John Renfro and Ray Pinson on the negative side of the question.

COME TO CANYON TO LIVE.

COLQUITT COMING MONDAY SPEAKING AT NORMAL 2 P. M.

Ex-Governor O. B. Colquitt will be in Canyon next Monday afternoon at 2 o'clock to open in the Panhandle his campaign for the U. S. senate. Mr. Colquitt has many friends and admirers in this county who are pleased that he will visit the city.

Being closely affiliated with the Normal for four years, and signing the bill which gave the new building the main part, President Cousins has invited Mr. Colquitt to use the new auditorium for his address to the people.

He will speak at 2 o'clock, going from here to Amarillo where he will speak at night.

Mr. Colquitt is mentioned by politicians as one of the leading candidates in the race, and the people generally will be glad to hear him.

FREE TRACK AND FIELD MEET SATURDAY P. M. AT NORMAL

Athletic Director D. A. Shirley invites all of the people of the city to attend the track and field meet Saturday afternoon at the Normal grounds. There will be no admission charges, and the people are urged to come and see what the boys are doing in an athletic way.

The meet starts promptly at 3 o'clock.

A loving cup and two medals will be given to the winners of points in the meet.

J. O. Cook resigned his position with Rdfearn & Co., and left Saturday for Huntington, Ark., his former home.

George Barton of Lone Tree, Iowa, is visiting at the E. Edmonds home east of the city.

ALL NIGHT LIGHT SERVICE FOR CANYON AFTER JULY 1

At a meeting of the City Council Monday night an order was passed instructing the Canyon Power Company to install all night service as quickly as possible.

The council will also buy 500 feet of new fire hose, as the old hose will soon be unfit for use.

Manager Arnold states that it will take until July 1st to put in the new equipment which will be necessary for the new service. The lines of the city will be straightened up and much new equipment put in by the company.

In order to procure the additional service, additional street lights were ordered put in. The Santa Fe has also ordered five lights at their crossings in the city limits, and these will be turned on when the all night service starts.

Canyon now has only 15 street lights. When the new service is inaugurated, the city will have 48 lights, including those on the square, which are given free to the city, two at the Normal and the five to be installed by the railroad.

It is expected that the council will hold another meeting soon to determine just where the new lights shall be located.

Canyon has needed lights for a long while. If it is now possible to work up enough business to obtain all day service the city will be in the first class in an electrical way.

CanFon Moving Pictures.

Mr. Payne, manager of the Happy Hour, says that he thinks that he will have the moving pictures of the dedication and the streets of Canyon ready to be shown Monday, so you will get to see yourself as others see you.

CANYON H.S. NOTES

Clarendon College cancelled the two games scheduled in this city for Monday and Tuesday and asked that the season be closed with the two games next Monday, which will be played on the Normal grounds.

The fate of the season will be determined by next week's games. If the Normal can win both games, they stand a chance at the championship as one of Wayland's pitcher's eligibility is under question, and if he is determined ineligible, the Normal would win. If his record is not thrown out, and the Normal does not win next week Seth Ward will be the associational winners.

The season has been very unsatisfactory to the schools. Owing to bad weather, none of the schools played more than half of the scheduled games.

Miss Pauline Burnett of the Senior Class who recently moved to Plainview reports good work there and says she will make the Senior class there. The class regretted very much to lose one of their most worthy members, but hope she may find good work there and that she may graduate there. Dave has found good work there, but would like to be with the High School pupils again.

- Solo. Vocal. Maytime.....Dvork  
Margaret Guenther
- Solo. Valse.....Chopin  
Selma Dittberner

### A Bell Telephone

Always a Friend in Need

In case of sickness or accident, the doctor can be summoned by telephone in less time than it takes to harness a horse. If he is some distance away, he can give instructions over the telephone that may save a life.

It is a time-saver when time is most valuable.

The Southwestern  
Telegraph &  
Telephone Company

### Star Barber Shop

- FOUR CHAIRS—NO WAITS

Blanch and Helen Crossen, Carl Hensley
- Solo. Goodnight.....Nevin  
Mrs. Dunn

espoused by Mr. Bryan. — Evening Journal.

The quartermaster's department at El Paso, Texas, sent 3,000 pounds of lemon and peppermint candy, 2,000 pounds of chocolate and 4,000 pounds of mixed candies to the front for the troops, who are demanding sweets with their rations instead of pastries and other delicacies.

#### "The Old Red Hen." (Tommie S. Montfort)

When turnip-greens begin to grow,  
And lettuce leaves are sprouting too,  
When we the onion's perfume know,  
Oh, what that old red hen can do!

In with her mothy brood she stalks,  
Serenely happy and content  
As tho' my well made beds she walks,  
On her ravaging errand bent.

Then out I rush with stick in hand  
Ready to slay this savage hen  
Along with all her peeping band  
For whom she committed such a sin.

She flutters and flits over bed and path  
Evading my stern, angry blows,  
Till at last free from merciless wrath,  
Out the gate with her terrified brood she goes.

Now into the house exhausted I go,  
But a new thought did on me dawn,  
For collecting her forces, my vanquished foe  
Headed for my neighbor's new-mown lawn.

Long may she live and happy be,  
With her mischief making ten  
So long as she leave my garden to me,  
She's a perfectly nice old hen.

#### The First Volunteer.

Mr. Bryan announces that he is going to Washington in order to prevent war if possible. Thus, he volunteers before volunteers are called for. Quite evidently he is laboring under the belief that he owes some duty to the country over and above that owed by other citizens. He seems to forget that it is Woodrow Wilson that the people of the United States chose for this highest service, and that thrice before when he (Bryan) volunteered, the people excused him. Also, he seems to be unmindful of the fact that he abandoned the post where he would have had a right to share this higher duty with the President.

Doubtless, Mr. Bryan means well, but the course which he is pursuing must be more comforting to the other side than it is to the chosen representative of the whole people. And, seemingly, his views upon the subject are not popular with the Democrats of Nebraska, for he failed of election as delegate at large to the national convention on last Wednesday. It is true that prohibition was an issue in the campaign, but Mr. Bryan's defeat is not to be ascribed alone to this. Rather it would seem that the policies of Wilson to the policies so vigorously

### FAIR EXCHANGE

A New Back for an Old One.

The back aches at times with a dull indescribable feeling, making you weary and restless; piercing pains shoot across the region of the kidneys, and again the loins are so lame that to stoop is agony. No use to rub or apply a plaster to the back if the kidneys are weak. You cannot reach the cause. Follow the example of this Canyon citizen.

Mrs. J. A. Wallace, W. Houston St., Canyon, says: "I was troubled by a weak and lame back and irregular action of my kidneys. Doan's Kidney Pills, procured at the Holland Drug Co., cured me."

Price 50c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that cured Mrs. Wallace. Foster-Milburn Co., Props., Buffalo, N. Y.

**WHAT CATARRH IS**

It has been said that every third person has catarrh in some form. Science has shown that nasal catarrh often indicates a general weakness of the body; and local treatments in the form of snuffs and vapors do little, if any good. To correct catarrh you should treat its cause by enriching your blood with the oil-food in Scott's Emulsion which is a medicinal food and a building-tonic, free from alcohol or any harmful drugs. Try it. Scott & Bowser, Bloomfield, N. J.

**Resolutions of the Panhandle Teachers' Association, April 21 and 22, 1916.**

To the Panhandle Teachers' Association:

We your committee appointed to draft the usual resolutions of meetings of this kind beg to make the following report, recommending the adoption of these resolutions:

1. Whereas, The Citizens of the State of Texas are to vote this year upon the adoption of House Joint Resolution No. 30, providing an amendment to the state constitution authorizing that Independent School Districts may raise their school tax limit from fifty cents to one dollar, and

Whereas, We believe that the adoption of this amendment means the rapid development of Texas Schools,—Therefore be it

Resolved, That the members of the Panhandle Teachers' Association give the amendment their support by actively agitating the public mind in their communities in its favor.

2. Whereas, The Panhandle Teachers' Association has been honored in a unique manner this year by having with it President C. E. Evans of the San Marcos Normal College and Mr. W. King of the State Department of Education; therefore be it

Resolved, That we extend to these distinguished gentlemen our thanks for their interest in our meetings and for their delightful and instructive speeches during our sessions.

3. Whereas, The Citizens of Canyon have given us evidence of their appreciation of our convention in their city, and have extended to us their well-known hospitality; therefore be it

Resolved, That we extend to them our sincere thanks for their hospitality and interest in our meetings.

4. Whereas, The faculty of The West Texas State Normal School, and the members of the Glee Clubs among the student body, have contributed to our pleasure by their speeches and their songs, and have particularly arranged for our entertainment a formal reception and a recital of the Loreley—Therefore be it

Resolved, That we express our love for the Normal, and our interest in its great future, and extend to those who have actively labored for our pleasure our thanks for their services.

5. Whereas, The railroads of the Panhandle have this year, as heretofore, given us convention rates to our annual meeting,—therefore be it

Resolved, That we express our thanks to the Panhandle Railroads for their unfailing courtesy to the teachers of this district.

6. Be it further resolved, That our incoming officers make the necessary arrangements to have these resolutions sent to the daily and weekly newspapers of this district and to the

Mid-Week prayer meeting, Wednesday evening, 8:00 o'clock.

Choir Practice, Friday evening.

You are cordially invited to attend the services of this church. A special welcome to strangers.

DAVID H. TEMPLETON, Minister.

**Panhandle Track Meet.**

The annual track and field meet of the Panhandle Interscholastic League held in Amarillo Saturday, April 29, was the best in the way of number of schools entered that has ever been held in this district since the organization of the League. There were entries from Amarillo, Channing, Clarendon, Lelia Lake and Hereford, the meet going to the combined teams of Clarendon and Lelia Lake representing Donley county. Points won by the various teams were as follows: Hereford 45, Clarendon 33, Amarillo 22, Lelia Lake 21 and Channing 18. Individual point winners of the meet were Judge Clark of Hereford who won first place in Hammer, shot put, Discus throw, high jump and second in the broad jump, making a total of 23 points. Second place went to Hardy Jackson of Clarendon who won first place in 100 yard dash, 220 yard dash broad jump, and third in high jump, making a total of 17 points.

In tennis doubles the teams from Amarillo, Claude and Clarendon were represented the team from Clarendon winning.

The events and places were as follows: 100 yard dash—Clarendon first, Lelia Lake second, Hereford third, Channing fourth. Time 10 2-5 seconds. 12 pound shot—Hereford first, Amarillo second, Hereford third and fourth. Distance 46 feet 6 1-2 inches. 50 yard Dash—Clarendon first, and second, Hereford third, Channing fourth. Time 5 2-5 second.

Broad Jump—Clarendon first, Hereford second and third, Clarendon fourth. Distance 20 feet 10 inches. Mile Run—Lelia Lake first, Hereford second and third, no fourth. Time 6 minutes 4 seconds.

12 pound Hammer—Hereford first, Amarillo second and third, Hereford fourth. Distance 99 feet 3 1-2 inches. Discus Throw—Hereford first, Amarillo second and third, Hereford fourth. Distance 101 feet 1 inch.

440 yard Run—Amarillo first, Lelia Lake second, Channing third, no fourth. Time 1 minute flat.

220 yard dash—Clarendon first and third, Channing second and fourth. Time 24 1-5 seconds.

Pole Vault—Channing first and second, Clarendon third, Amarillo fourth. Height 7 feet 10 inches.

880 yard run—Lelia Lake first and third, Amarillo second, no fourth. Time 2 minutes 22 seconds.

High Jump—Hereford first and second, Clarendon third and fourth. Height 5 feet 7 inches.

Relay Race—Clarendon first, Hereford second, Channing third, no fourth on account of fouling.

Judges—J. W. Reid, Clyde Wright, W. S. McClintey, Lin Fertsch. Timers—R. A. Terrill, R. A. DeFee. Starter—R. L. Buckner. Clerk of Course—Dave Duncan. Inspectors—Ralph Smith and W. A. Wilson. Referee—D. A. Shirley.

For next year the Normal has offered inducements in order to secure the meet and most of the schools that were entered have expressed a preference for Canyon.

The success of the meet this year is largely due to the untiring efforts of W. A. McIntosh of Amarillo who deserved much better support financially than was given him in Amarillo.

**To Drive Out Malaria And Build Up The System Take The Old Standard GROVE'S TASTELESS CHILL TONIC.**

You know what you are taking, as the formula is printed on every label, showing it is Quinine and Iron in a tasteless form. The Quinine drives out malaria, the Iron builds up the system. 50 cents Official Yard.

London—A yard of cotton cloth, as measured by English manufacturers, will hereafter measure thirty-six instead of thirty-seven inches, as for many generations heretofore. The thirty-seven-inch yard is said to have had its origin in the habit of spinners in measuring "from the further side of the thumb," thus adding about an inch "for good measure."

|        | 21-23,000  |

**COMING UNDINE??**

The Local Paper.

The rural press, the pulpit and the school are a trinity of powerful influences that the farmer must utilize to their fullest capacity before he can occupy a commanding position in public affairs.

These gigantic agencies are organized in every rural community and only await the patronage and cooperation of the farmers to fully develop their energy.

Every farmer in Texas should well as: farm periodicals and such other publications as he may find profitable, but he should, by all means, subscribe to his local paper, and no home should be without it. The local paper is part of the community life and the editor understands the farmer's problems. It is the local press that will study the local problems and through its columns deal with subjects of most vital importance to local life of the community.—Peter Radford.

**SEVERE PUNISHMENT**

**Of Mrs. Chappell, of Five Years' Standing, Relieved by Cardui.**

Mt. Airy, N. C.—Mrs. Sarah M. Chappell of this town, says: "I suffered for five years with womanly troubles, also stomach troubles, and my punishment was more than any one could tell."

I tried most every kind of medicine, but none did me any good. I read one day about Cardui, the woman's tonic, and I decided to try it. I had not taken but about six bottles until I was almost cured. It did me more good than all the other medicines I had tried, put together.

My friends began asking me why I looked so well, and I told them about Cardui. Several are now taking it.

Do you, lady reader, suffer from any of the ailments due to womanly trouble, such as headache, backache, aches, sleeplessness, and that everlastingly tired feeling?

If so, let us urge you to give Cardui a trial. We feel confident it will help you, just as it has a million other women in the past half century.

Begin taking Cardui to-day. You won't regret it. All druggists.

Solely by Chattanooga Medicine Co., Ladies' Specialty Dept., Chattanooga, Tenn. For Special Instructions on your own and 24-page booklet, "Treatment for Women," in plain wrapper, S. O. 124

**SOCIETY NOTES**

Misses Kline and Rambo entertained a large group of guests at a charming Kensington between the hours of three and five Monday afternoon; the ladies came ostensibly to spend an afternoon with Mrs. Hillery before her departure to her home in Kansas, but a surprise developed when little Miss Margaret Bell "let the cat out of the bag" and Miss Brown announced the engagement of Miss Virgie Thomson to Mr. William Odell Hopper of Abilene, Texas. The workers then discovered that the towels on which they had spent their time were to be divided between the two guests of honor.

Ice cream and cake and mints in pink and white, together with pink and white carnations carried out a very pretty and appropriate decoration. Those present were Mesdames Shirley, Shaw, Stilwell, Morelock, Guenther, Cousins, Terrill, Allen, Blaine, Marquis, Stafford, Keller, Hillery and Reeves, Misses Ritchie, Hudspeth, Malone, Brown, Thomson, Billingsley, Graham, and Lowrance.

Mrs. W. G. Word entertained the Merry Maids and Matron Club Thursday afternoon at the usual game of 42. Refreshments were served of kisses and ice cream, ice tea and cake. The guests of the club were Misses Lowrance, Billingsly, Ritchie Gober and Mesdames Word, Hood, Goggans, Battle, Oldham, Winkelman, Warwick-Cousins, Stafford, Myers, Grundy, Gober and Stewart.

**Posted.**

I have charge of the premises of my father, W. E. Bates, which includes the west part of section 30 and all of section 29, Block B5. I positively forbid any intruding on this place by people, fishing, hunting, gathering grapes or even passing through. Please heed this notice that you may save both you and I trouble. R. R. Bates.

**A College Education an Asset.**

A few years ago the results of a survey of Kansas farmers conducted by the college would have been more valuable than at present. They demonstrate that a college education is a real business asset to a farmer. This was generally disbelieved half-century ago. It was vigorously denied a quarter of a century ago by those who maintained that "any fool can farm." More recently the crowded halls and laboratories of the agricultural colleges afforded abundant proof that such views were dissolving in the bright light of modern experience.

Along come the investigators now with something more than the "one swallow which does not make a summer." They looked over seven counties and found that about 500 farmers with a common-school education made an average labor income of \$499. The high schools turned out 126 farmers whose income averaged \$631, while eleven farmers who had finished a four-year college course demonstrated an average labor income of \$1,452. The counties surveyed are among the richest agriculturally in Kansas. Other surveys in other sections or states might produce somewhat varying figures, but the proportions would perhaps hold measurably with those established by this inquiry. It is this vastly increased reward of toil added the higher satisfactions of life which come from vistas opened through the training of the mind, a general understanding of the situation would dot the landscape with the agricultural colleges, until the liberal uplift of its teachings would reach all the farm boys of the land.—Breder's Gazette.

**Tomorrow's Tangle.**

"Tomorrow's tangle to the winds resign," old Omar said, and thus in one brief line, set forth more wisdom than most poets spring, in all the years through which they live and sing. With present griefs man fearlessly combats; he pulls their ears and kicks them in the slats; and, like a knight in armor gone afield, he quite enjoys the tilting that they yield. But, having whipped the dragons of today, with manner bold and debonair and gay, he feels the ardor in his breast expire; "Tomorrow's dragons and chimeras dire," he mutters low, "will seize me by the throat, remove my scalp and bear away my goat." Tomorrow's dragons may be one inch tall; tomorrow's troubles may not come at all. If you today have fought, forget your fears, and sleep in peace tonight, and when you wake the good old sun will shine; tomorrow's tangle to the winds resign. WALT MASON.

The Mystery. "What's so awfully mysterious about that new detective story of Penmen's?" asked Myrt. "How he sold it," answered Bert.

**Invigorating to the Pale and Sickly**

The Old Standard general strengthening tonic, GROVE'S TASTELESS CHILL TONIC, drives out malaria, enriches the blood, and builds up the system. A true tonic. For adults and children. 50c

**Feed Cost of Beef Cattle.**

For nine years the Missouri Experiment Station has been investigating the cost of maintaining beef steers at a constant weight. It has been found that this varies with different conditions. The grain fed in all the tests has been a mixture of eight in parts corn and cop meal to one part old process linseed oil meal, and 2 1/2 pounds of this mixture has been used to each pound of alfalfa hay. The following is a brief summary of the results:

One 11-month-old steer weighing 607 pounds needed 4.7 pounds of grain and 1.9 pounds of hay daily to keep at constant weight during one year. A second animal of the same age, weighing 736 pounds needed 5.6 pounds of grain and 2 1/4 pounds of hay daily during one-half year. A two-year old steer weighing 767 pounds kept at constant weight for one year on an average daily feed of 5 1/2 pounds of grain and 2 1/2 pounds of hay. Another steer of the same age weighing eight pounds less needed daily 6.1 pounds of grain and 2.7 pounds of hay to maintain body weight. This steer was quite active. A three-year-old steer weighing 837 pounds needed 6.8 pounds of grain and about 3 pounds of hay daily during the five months.

Two other steers one year old, the first weighing 934 pounds and the second weighing 1,081 pounds, needed only 6 1/2 pounds of grain and 2 2-3 pounds of hay daily during two years. A two-year-old steer weighing 1,212 pounds was kept at constant weight for four years on the same daily weight of grain and hay as used by the last two steers. Another steer weighing 1,065 pounds was kept for over two years at constant weight with a daily ration of 6.1 pounds of grain and 2 1/2 pounds of hay. This last animal was kept confined in a stall while the others had the run of a small lot. The last three steers were very fat at the beginning.

The results when studied with reference to the varying conditions show:

1. The cost is proportional to the amount of active protein—lean muscle and organs—in the steer and not to live weight.
2. It costs less to keep eight 1,200-pound steers than to keep twelve 800-pound steers.
3. The season influences the cost. It is highest in the winter and in very hot weather.
4. Previous high living greatly increases the cost.
5. Age and inactivity decreases the cost.

**SEE THE CROWD?**

7. A long time on maintenance decreases the cost.
8. Fatness may decrease the cost since the steer can save feed by using its body fat.
9. Thrifty steers need less feed than poor feeders and those lacking in thrift.

The gymnasium classes of Mr. Blaine gave the most successful gym show that has ever been given in Canyon at the Normal college last Monday night. The program was varied, the work of the girls with Indian clubs being particularly interesting and difficult. The excellent team work shown in the numbers by both girls and boys gave proof of Mr. Blaine's ability to keep students interested in this work.

The Rev. O. P. Kiker, pastor of the Methodist Church, tendered his resignation to the Presiding Elder of this district at a special session of the conference at this place last Wednesday evening. Mr. Kiker has been here as a pastor about six months and as presiding elder a number of years. He goes from here to points in a higher altitude where he expects to take his wife who is just being released from a sanitarium in Denver where she has been under treatment for about a year, the physicians recommending that she remain in a higher altitude than this. Another pastor will be secured at once to take up the remaining part of the year's work, and the Rev. Overton will occupy the pulpit regularly in the meantime.—Lubbock Avalanche.

Every school child in Chickasha, Oklahoma, will raise a home garden this year if the teachers of the public school system are successful in a plan recently inaugurated. Through the assistance of O. C. Cooper, county agent in Grady county, and Mrs. Nettie R. Coryell, woman agent, each child will plan and care for his own garden. There are numerous schools in Oklahoma that maintain a school garden in connection with the boys' and girls' club work, but the movement at Chickasha is one of the most ambitious ever attempted in the state in the way of getting each child interested in "farming" the back lot at home.

COME TO CANYON TO LIVE.

## Practical Economy

Baking powders made from alum or phosphate may be bought for a trifle less than Dr. Price's Cream Baking Powder, which is made from cream of tartar, derived from grapes.

Alum powders are not only cheap, but they differ greatly in leavening power.

If a cheap baking powder is used for a fine cake and the cake turns out a failure there is a waste of costly materials worth more than a whole can of the cheap baking powder.

Dr. Price's Cream Baking Powder produces the finest food, and its use, therefore, results in an actual saving.

**DR. PRICE'S CREAM BAKING POWDER**  
MADE FROM CREAM OF TARTAR  
DERIVED FROM GRAPES

### LOCAL NOTES.

Harbison is better equipped than ever to handle your piano. Get the new truck to do the work.

John Sims of Missouri, is visiting his brother, T. C. Sims west of the city.

Lewis and Everett Sims left Monday to attend an auto school in Sansas City.

All kinds of plowing, garden and trees. R. E. Foster.

Austin King visited with his parents Saturday night and Sunday.

Mr. and Mrs. K. E. Bain were Amarillo visitors Saturday.

W. H. Balkney, formerly a student of the Normal visited yesterday with friends in the city. He is on his way to Los Angeles, California, for a pleasure trip.

Mrs. K. E. Bain visited in Amarillo yesterday.

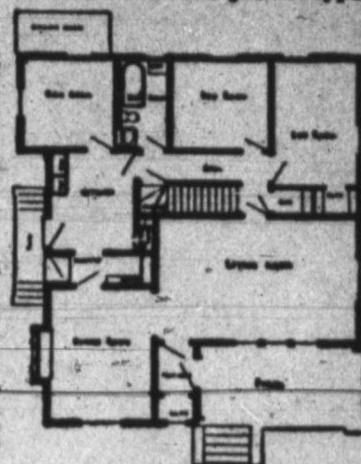

## BUILD A QUALITY BUNGALOW

THE most popular type of home today for town or country is the Bungalow. It is compact, convenient, comfortable, beautiful. The only trouble is that it usually costs a little more than planer types of houses.

However, here is a Quality Bungalow, a beautiful, modern, up-to-date home of seven rooms and finished attic, that you can build for from \$3,000 to \$3,400. And that means total cost.

Furthermore, we have the architect's working plans and estimates showing you can build for that price and still use throughout, durable dependable

## The THOUGHT STARTER

By ALBERT LEE

DO you eat coarse vegetables, whole wheat bread, skins of baked potatoes?

Did you ever notice how moist the ground was underneath the carpet of leaves when strolling through the forest and a dead branch or stick happened to turn up a wad of the decaying mulch?

Did you note how the bottom layers were wet and slippery?

Did you ever see a farmer spread the forest mulch or straw over his potato field in order to conserve the moisture?

One of the important reasons why you should eat coarse foods, fruit and potato skins, the coating of grains in whole wheat and other cereal foods, roots such as parsnips and onions, salads such as celery, spinach, etc., is for the sake of getting the almost vitally important mineral food content of the skins and near the skin parts of these articles, but another very important reason for the ingestion of these fibrous parts is the necessity for a "mulch" to carry bulk and moisture, with the refuse, through the colon or large bowel after the food elements have been extracted therefrom.

If you will follow the regimen outlined above, your constipation will disappear and robust health will follow just as surely as you live, if other conditions are normal.

## Daddy's Bedtime

Story—A Chalk-Mark on Some Gates.

[Adapted from Hans Christian Andersen.]

ONCE upon a time an enchanted dog that used to belong to an old witch brought a princess from her great copper castle to visit a soldier who loved her; daddy told the children. "When her lady in waiting followed the princess and saw the dog carry her into a big house she chalk marked the gate and went back to tell the king, the princess' father. But the sly dog had seen the lady put a mark on the soldier's gate. So he carefully went about and chalked every gate in town."

"The king would have a merry time finding which house it was," Jack understood.

"Then the clever dog waited till morning, when the king, the queen and the lady in waiting set out to find the house where the princess had made a visit."

"Here it is," cried the king when he saw the first gate with a chalk mark.

"No, my dear husband, it is there," said the queen, pointing to another gate with a mark on it.

"There's another!" cried the lady in waiting. And they all saw how hopeless it was to try to find the right house.

"Now, the queen was almost as clever as the dog. She knew more than how to ride in a carriage. So she took her big gold scissors and cut a large piece of silk into small pieces. Then she made a little silk bag, which she filled with grains of buckwheat. She tied this bag on the princess' back and then cut a little hole in the bag, so that grains would drop out all the way wherever the princess went."

"That night the soldier wanted to see the princess, so he sent his enchanted dog to fetch her from the castle. He was so fond of her that he longed to be a prince that he might have her for his wife."

"Now, clever as the dog was, he did not notice that grain dropped all the way along the road from the castle to the soldier's window. So up the wall he ran, with the princess on his back. Soon as daylight came the king and queen easily saw where the princess had been. So they seized the soldier and threw him into their dungeon."

"There he lay. Oh, how dark and thresome it was! Then one day they said to him, 'Tomorrow you will be hanged.' It was not nice to be told that, especially as he had left the old witch's enchanted tinder box back at his hotel. The next morning through the bars of his dungeon window he could see all the town people hurrying along to see him hanged. He heard the drums beat and the soldiers marching along the street. They were making a holiday of it."

Ex-Governor O. B. Colquitt

Will speak at the Normal auditorium in Canyon Monday afternoon, May 8, at 2 o'clock in the interest of his candidacy for the United States Senate.

### City Treasurer's Report

Annual Report of C. R. Flesher, Treasurer of Canyon City, Texas, of the Receipts and Expenditures From April 1, 1915, to April 1, 1916, Inclusive

**TWO MORE DAILY TRAINS OVER SANTA FE IS RUMOR**

There is a persistent rumor, coming from several sources, but yet lacking official sanction, that a new train service will be established on the Panhandle and Santa Fe Railway lines, being about May 6. It is stated that the receipt of time tables alone will verify the report.

The new service, it is understood, will give Plainview another train each way daily. The trains now operating will run on the present schedule, while the train from the north will arrive in Plainview about 6:15 p. m. The second train from the south will arrive about 4 p. m. No new service for the Floydada branch has been mentioned, except the possibility of a Sunday train.—Plainview Herald.

The managing editor wheeled his chair around and pushed a button in the wall. The person wanted entered. "Here," said the editor, "are a number of directions from outsiders as to the best way to run a newspaper. See that they are carried out." And the office boy, gathering them all into a large wastebasket, did so.—Washington Life.

A movement is in progress for the formation of a Missouri Woman's Society for National Preparedness.

**Piles Cured in 6 to 14 Days**  
Your druggist will refund money if PAIN OINTMENT fails to cure any case of itching, and, depending on Proctored's Piles in 14 days. The cost 25¢—union price. Sold by Druggists.

**A Psalm of the Shacks.**  
(Hillard Fatheree)

Tell me not in scornful numbers,  
That the shacks will pass away,  
During all our peaceful slumbers,  
They stand forever and a day.

They are immortal! I'm in earnest  
When I say your judgment lacks!  
Dust thou art, to dust returnest  
Was not spoken of the shacks.

On the plains' broad field of battle,  
In the common walks of life,  
May say they shelter cattle  
From the snows of winter's strife.

Trust no such rumor; 'tis but prattle,  
Nothing here is done by halves,  
And though we're charged with being cattle,  
We have never "camped with calves"  
We have never "camped with calves"

Our lives spent in the shacks remind us  
We can make our lives sublime,  
And, departing, leave behind us,  
The shacks as monuments through time.

The shacks have served us long and faithful,  
And deserve our truest thanks.  
For their sheltering walls, we're grateful,  
Though they're made of common planks.

And our thanks and appreciation  
Is their destined end and way:  
We act that morrow's new creation  
Find us farther than today.

And we forth into life's battle;  
We'll be heroes in the strife.  
The world shall know dumb, driven cattle  
Were not the fruits of their noble life.

Then let us all be up and doing  
With a vim that never slacks,  
Still achieving, still pursuing—  
Children of those walls—the shacks.

**Crops that are Dependable.**

It has been rightly said, "In sections of limited rainfall, success comes through farming for dry to do towards insuring success as the cultural methods that are practiced.

**Corn:**—The dependable corn crops for the Southwest are the grain sorghums such as kafir, milo and feterita. It is true that Indian corn does produce good crops, some years, and is a fine crop to handle and feed. It is a crop that was perhaps a leader in the state or locality from which you, as a farmer, came and it may appear to be a hard matter to get along without it. But successful farmers of the Southwest do not "pin their faith" to corn, they often plant a small acreage and are not dependent too much upon it. The very successful corn crop of 1915, throughout the Southwest, may be a "corn year" long to be remembered.

**Dwarf Kafir:**—Kafir is one of the most dependable grain, fodder and silage crops known for limited rainfall conditions. This dwarf variety matures in fully twenty days less time than the common kafir and can be depended upon to produce fodder and some grain, even during the driest years, if good cultural methods are adapted. Some of this dwarf kafir should be planted on every farm every year.

**Dwarf Milo:**—The red or yellow dwarf milo, sometimes called "the dry farmer's friend" will make grain and fodder every year. At least one-third of the acreage planted to the grain sorghums on each farm should be of this crop. The standard red milo is not as dependable as the dwarf milo.

**Feterita:**—This is strictly a dry year crop and does not make the showing during good years, of kafir or milo. But on account of its extreme drought resisting qualities, every Southwestern farmer should plant some of it every year. Like milo, one-third of the acreage planted to the grain sorghums should be of feterita. Feterita makes an excellent grain crop, about equal to kafir or milo, but the fodder is not as good as kafir.

**Sudan Grass:**—For sections of limited rainfall, sudan promises to be the best pasture and hay crop. This is a good drought resister. When planted in rows and cultivated like kafir it is certain to mature. As a pasture crop for hogs and dairy cows or as a hay crop for all classes of livestock, sudan does not have an equal, especially when moisture is limited.

**Beans:**—Some of the most dependable beans for limited rainfall conditions are the New Mexico Pinto and the California Brown varieties, both of which are good yielders and have excellent market demands. From 500 to 800 pounds of threshed beans can be counted upon per acre and the market price runs from 2½ to 4 cents per pound. The varieties named are considered as field and not garden varieties, although they are often used as string beans.

AGRICULTURAL DEMONSTRATOR  
Santa Fe System.

# SOME BASEBALL STARS of 1916

The Farm and Small Town furnish Best Material for Big League Timber

Looking over the roster of the Big League ball teams you will find names after names of men who only recently were boys on the farm or in the village or small town. On the other hand, surprisingly few hail from the big cities. And yet, this is not so surprising after all. Even laying aside our knowledge of the big part that the so-called country boy has always played in the great affairs of business and the nation, the country is the place to lay the foundation necessary for athletes.

The photographs shown are familiar to all lovers of the great National game. It is rather interesting to note that in addition to their being representatives of their type in the baseball world all of these stalwart athletes are great endowers of that beverage you know and like so well—Coca-Cola.

**Short Histories of the Players.**

There follows short life histories of the ball players whose pictures are shown, their achievements on the diamond and their present affiliations and positions.

**JONES, Fielder Allison, Manager of St. Louis Browns.** Born August 13, 1871, at Shingle House, Pa. Active playing member of the famous Brooklyn team of 1898 to 1900, inclusive, managed by Ned Hanlon.

During the war between the American and National leagues, he went to Chicago during 1901, but did not play until 1902. Continued as player in 1903, and on June 8, 1904, he was appointed manager, winning pennant and world's championship in 1905.

Was elected president of Northwestern League, December, 1911, and remained at head of league, 1912-13-14, resigning to take charge of St. Louis Federal League team, August 27, 1914. Last season he came within one-half game of winning Federal League pennant, finishing nearer the top than any team in major leagues since the Browns in 1889.

He says, Coca-Cola is his favorite beverage.

**ALEXANDER, Grover Cleveland, Pitcher Philadelphia Nationals.** Born in St. Paul, Nebraska, February 25, 1887, and lives on a farm there now.

Alexander is one of the greatest pitchers in the game today, being practically responsible for the Philadelphia

**LOCKER, Joseph B., Shortstop and Manager of Chicago Cubs.** The talk of the country for the past two years, as the first player of real merit to jump to the Federal League, and as manager of the Chicago club in that league, won the pennant for 1915. Born July 27, 1880, at Muscotah, Kansas. In 1901, was secured by the Chicago Nationals to play shortstop, which he did from 1902-1912, inclusive. A member of the famous Chicago Cubs when they were at the height of their glory. Released to Cincinnati in 1912, where he managed the Reds and played shortstop that year. Sold to Brooklyn for \$25,000, but did not join team, jumping to the Federal League, which he added to a great extent in organizing. Tinker is a brainy ball player and a clever manager—no wonder he likes Coca-Cola.

**TINKER, Joseph B., Shortstop and Manager of Chicago Cubs.** The talk of the country for the past two years, as the first player of real merit to jump to the Federal League, and as manager of the Chicago club in that league, won the pennant for 1915. Born July 27, 1880, at Muscotah, Kansas. In 1901, was secured by the Chicago Nationals to play shortstop, which he did from 1902-1912, inclusive. A member of the famous Chicago Cubs when they were at the height of their glory. Released to Cincinnati in 1912, where he managed the Reds and played shortstop that year. Sold to Brooklyn for \$25,000, but did not join team, jumping to the Federal League, which he added to a great extent in organizing. Tinker is a brainy ball player and a clever manager—no wonder he likes Coca-Cola.

**BAKER, John Franklin ("Home-Run") Third-baseman, New York Yankees.** Born March 12, 1886, at Trappe, Md., and lives on a farm near there at present.

Started to play ball with a semi-professional team at Ridgely, Md., and is said to have been offered his first job by Charles Herzog, now manager of Cincinnati, for \$5 a week and board. This was in 1906, when Baker was only 19 years old. With Sparrows Point and Cambridge, Md., in 1907 and 1908. However, was released to Reading later part of 1907, and drafted by Athletics, which he joined towards the close of the season.

Baker is a terrific hitter, and will prove a tower of strength to the New York Yankees, with which team he will play this season, and incidentally will make them build a bigger fence around the Polo Grounds, where the Yankees play when at home in New York City.

It was during the World's Series of 1912, with New York, that Baker gained the name by which he is now known—"Home Run" Baker.

"Coca-Cola, he says, makes a home-run hit with him.

**DOYLE, Lawrence, Captain New York National League Club.** Born at Caseyville, Ill., July 31, 1886. Second baseman.

Started to play ball with Mattoon semi-professionals in 1906. With Springfield, Ill., in 1907 and later sold to New York Nationals, July 22, 1907, for \$4,500, considered a very high price at that time. He has since played with the New York Nationals and was appointed Captain in 1912, which position he has since held with them.

Leading hitter of the National League for the season of 1915. Like all the best of them he is a staunch believer in Coca-Cola.

## PAIGE

The Standard of Value and Quality

The Fairfield  
"Six-46" 1295 FOR DETROIT

### Power!!

Few of us have the need or desire for a racing car.

We are quite content to let the "other fellow" take his chances at 70 miles an hour—while we spin along comfortably and safely with the speedometer needle registering 25 or 30.

But every man wants Power in his automobile—and particularly the man who tours.

It is good to sit behind a motor which responds eagerly—bouyantly—to the slightest touch of the throttle.

It is good to know that you need only "step on" the accelerator—and the steepest hills will flatten out like smooth boulevards.

It is good to realize that you command a vast store of reserve power which will easily take you through the heaviest sand roads "on high."

It is good to know that your automobile is a staunch, sturdy, dependable help-mate—not a treacherous weakling that will lay down when the real work begins.

In a word, it is good to own just such a car as the Paige seven passenger "Six-46".

This car is a thoroughbred—every inch of it.

It is just as handsome as an automobile could possibly be, and easily capable of going 60 miles per hour if you desire so much speed. But—first and last—it is made for work—consistent work—day in and day out work.

"Fairfield" owners don't have to make apologies or "offer excuses". Their cars are out of commission at one time only—when they are locked up in the garage at night.

And—best of all—you can readily establish these facts for yourself.

This car is by no means an "experiment". It has been put to the gruelling test of more than a full year's road work by thousands of owners.

All that you need to do is get in touch with the nearest Paige dealer.

Let him prove his case. Let him introduce you to men who have invested their money in the "Fairfield". Listen to their experiences—ask for their honest opinions.

Do this—while the Dealer can still make immediate deliveries.

74 YEARS OF KNOWING HOW

THE WORLD'S TWO BEST  
TWO-ROW CULTIVATORS

BACKED BY AN UNQUALIFIED GUARANTEE

The P. & O. Two-Row Cultivator covers every essential feature for perfect work, ease of adjustment and adaptability of all conditions of soils. The simplest and strongest Two-Row Cultivator made. "It's the way we build them". Frame as strong as a bridge. Axles of improved construction prevents wheel widening in front; make light draft. Fine depth adjustment; each gang controlled independently. Four levers do the work of six on other styles, as the inside levers control the inside gangs independently, and also raise or lower the gangs in pairs. Easy working adjustable foot levers. The wheels can be pivoted alone or in connection with the lateral gang movement. The pressure springs are center hung, insuring proper tension in all conditions of the ground and in any position of gangs. The parallel movement of gangs insures each shovel cutting the proper width and depth. Furnished with any style gang.

### No. 27 2-Row Lister Cultivator

We make a complete line of DRY-FARMING tools, prominent among which is the No. 27 Lister Cultivator, which has many superior features, consisting of two sets of gangs mounted slidingly on a trussed spreader pipe. Turn table construction evenly distributes weight on the gangs, holding them level and preventing one side from going in deeper. Each gang follows its own row. Roller connection between the gangs and spreader pipe. Gangs can be raised as a unit, or shovels can be raised separately. Frame balances with tongue when raising gangs. Easy change from first to second cultivation. Extra high clearance for large corn, with long shield for small corn. Eight shovel attachments can be furnished when ordered.

If your dealer will not supply you it ONLY TAKES A POSTAL to get our new 1916 catalog and special introductory prices.

## LILITH NOT A BIBLE NAME

Figures in Jewish Legends as a Destroyer of Infants—Also as Adam's First Wife.

Lilith is not a Bible name, but a Hebrew word, used to designate an imaginary being referred to in the Bible, but not by name. An authority gives Lilith as "the name of the first wife of Adam, according to rabbinical tradition," and says: "She was made of the earth as was Adam himself, and would not submit to be ruled over by her husband. Seeing no possibility of an agreement between herself and him, she fled away to the sea, where she became the mother of a race of demons and as a punishment for refusing to return to Adam, one hundred of her children were to die every day. Lilith became noted in Jewish legend as a destroyer of infants and for this reason they adopted the custom of writing the names of three protecting angels on slips of paper or parchment, and binding them upon the infant, to prevent the evil influence of Lilith." This refers to an ancient custom and we do not know that any trace of it survives. Another authority says that the Hebrew name Lilith attaches to the passage in Isaiah 34:14, which says, "The night monster shall settle there and shall find her a place of rest." Popular superstition named this imaginary night-monster Lilith, and the Jewish encyclopedia says, "The superstitions regarding her and her nefarious doings were, with other superstitions, disseminated more and more among the mass of the Jewish people. She becomes a nocturnal demon, flying about in the form of a night owl, and stealing children. She is permitted to kill certain infants and if a child smiles during the night of the Sabbath or of the new moon, it is a sign that Lilith is playing with it." The Jewish encyclopedia treats as unworthy of notice the idea that Lilith was Adam's first wife, but adds, "She is a clear instance of the persistence of popular superstitious beliefs." The word undoubtedly is Hebrew, but as it does not appear in the Bible its connection with the passage in Isaiah about a demon-of the night seems to be purely arbitrary.

## LOOK TO WORKERS' SAFETY

Elaborate Precautions Taken to Prevent Accidents in Plants Where Gunpowder is Made.

Workers in gunpowder plants, whenever a storm comes up, adjourn to the watchhouses surrounding the plant proper and enjoy themselves till the storm is over.

Lightning is not the only danger dreaded in gunpowder plants, however. Metal is dreaded—its hard surface may cause explosions—and hence on the workmen's clothes the buttons must all be of bone.

The workmen's clothes must be pocketless, so that they may not carry matches or knives, and a workman, no matter how dandified his tastes, must not wear turned-up trousers, since in turn-ups grit is harbored, and grit in a gunpowder mill is as dangerous almost as fire.

In all the buildings of these plants not a nailhead or any sort of iron material is exposed. The roofs, too, are made very slight, so that in the event of an explosion they will blow off easily. The doors all open outward to make escape easy, and the plant is usually surrounded with a stream of water, into which the hands are trained to dive at the first sign of danger.

### His Specialty.

A certain man of New York, known familiarly as "P. C.," admits that his early school record was not deserving of academic reward. But he got one medal. He grew up in Louisville and there attended a small school presided over by a lady of the old regime, a tender and kind-hearted soul. Each year, when the last day of school came around, the scholars and their parents gathered for the award of prizes, and the gentle schoolmistress could not bear to let any child go disappointed. When commencement day came P. C.'s name also was read out for a special medal. It was awarded "For cheerfulness during the recreation hour."

### Stodious Girl Neglects Her Hair.

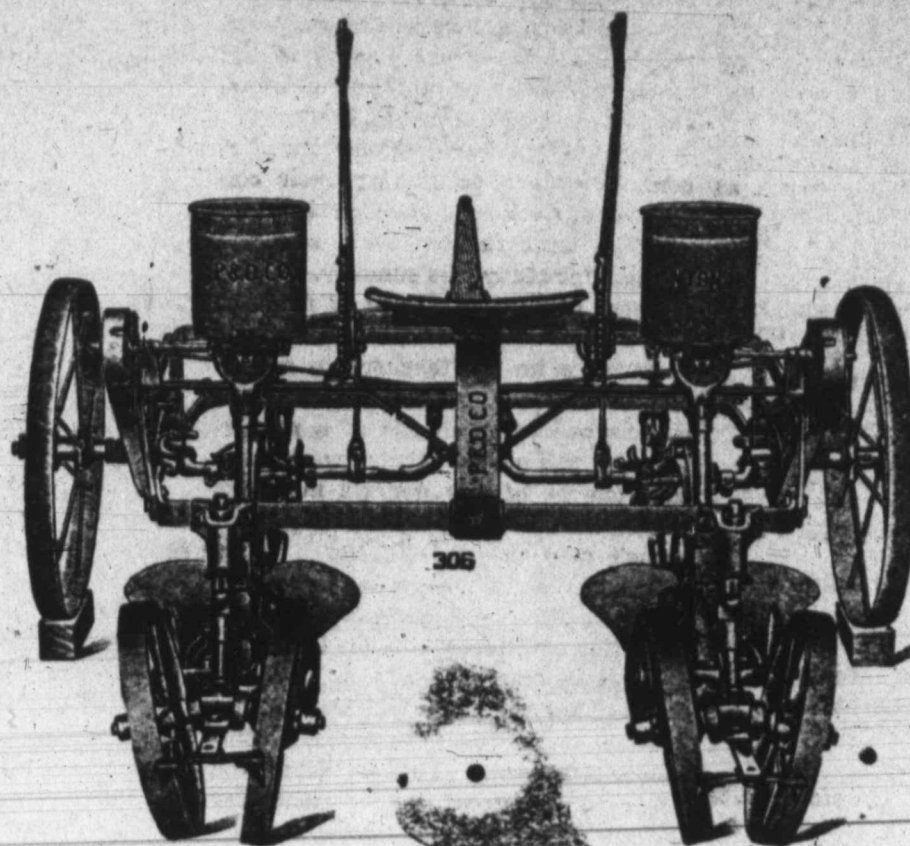

I heard Max O'Rell once tell the story of a young lady who acquired three languages while doing her hair, said a prominent London man. Then she trotted her three languages round, and found to her surprise that no one seemed particularly anxious to engage her. They really could not stand the look of her head. She discovered the cause of her failure at last, when one very irritable old gentleman she called on told her that he would prefer one language to three. If a brush and comb were thrown in with the one. She had sacrificed habits of tidiness to the attractions of irregular verbs.

### Serving in Tennis.

Tennis is no game for a lackadaisical person.

A girl who attempts to serve the first time she holds a racket and works all afternoon trying to get one ball in the right place is not likely to become enthusiastic over tennis.

Emphasis should be placed on the position of the feet, with the left foot in front, outside the court. For general use a sort of chop with a downward pull of the racket, started a little above the head, training for accuracy rather than for severity, is advised.—Optima.

## P. & O. One and Two-Row Listers

That will work perfectly in all kinds of land, latest improved, easy to handle, light draft, equipped with shovel or disc covers, well represented everywhere and repairs can easily be had for these well known and reliable implements.

## Thompson Hardware Company

About \$50,000 worth of onion seeds are imported yearly by the United States from the Canary Islands.

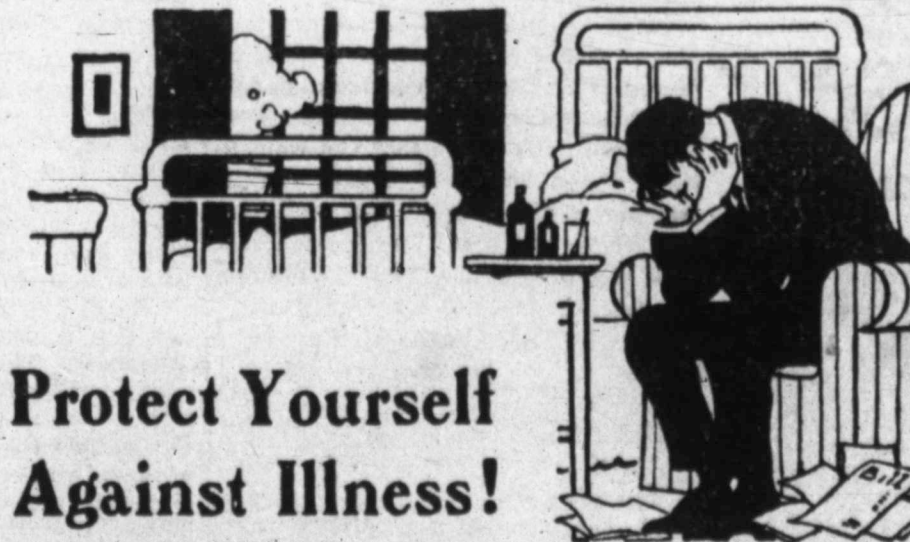

In the United States we have 935,000,000 acres of arable land, of which only 400,000,000 are under cultivation.

### Whenever You Need a General Tonic Take Grove's

The Old Standard Grove's Tasteless Chill Tonic is equally valuable as a General Tonic because it contains the well known tonic properties of QUININE and IRON. It acts on the Liver, Drives out Malaria, Enriches the Blood and Builds up the Whole System. 50 cents.

## Plainview Nursery

has the largest and best stock of home grown trees that they have ever had, propagated from varieties that have been tested and do the best. We make a specialty to grow the kinds that seldom get killed by late frost. We are agents for Warnock's Tree Paint, which is guaranteed to protect trees from rabbits and disease, also for arsenate of lead in 50 and 100 lb. cans only and spray pumps. PLAINVIEW, TEXAS.

## Protect Yourself Against Illness!

You may be enjoying the best of health today. There may come a siege of illness. ARE YOU PREPARED FOR IT?

Doctor's bills and enforced idleness are expensive. When you have a bank account you are prepared to combat illness.

Can you conceive of anything more tragic than a long period of illness without any funds?

Therefore, if You Haven't a Bank Account, Start One Today  
**FIRST NATIONAL BANK**

**Sufferers from Backache, Rheumatism, Lumbago and Kidney Trouble.**

Before an Insurance Company will take a risk on your life the examining physician will test the urine and report whether you are in a good condition. Your kidneys get sluggish and clog, you suffer from backache, sick-headache, dizzy spells, or the twinges and pains of lumbago, rheumatism and gout. The urine is often cloudy, full of sediment; channels often get sore and sleep is disturbed two or three times a night. This is the time when you should consult some physician of wide experience—such as Dr. Pierce, of the Invalids' Hotel and Surgical Institute, Buffalo, N. Y. Send him 10 cents for large trial package of his new discovery—'Anuric.' Write him your symptoms and send a sample of urine for test. Experience has taught Dr. Pierce that "Anuric" is the most potent agent in dissolving uric acid, as hot water melts sugar. 50c. at druggists.

**FOR SALE**

For Sale—Nice Jersey heifers, now fresh. T. J. Cochran. 7p3

For Sale—Share of stock in the Canyon City Club. Call at News office.

See C. T. Word for Hereford bulls. 3tf

For sale—22 acres adjoining the Normal campus, \$1650. W. H. Lewis.

For sale—1½ blocks near Normal for \$500. W. H. Lewis. 5t3

For sale—Two 3 year old bulls and one 2 year old. R. L. Campbell, Canyon, Texas. 6t3

For Sale—Sweet potatoe plants. Mrs. B. T. Johnson, phone 186. tf

For Sale—1 span of mules. Goes to the first man coming, for only \$250. Good terms. J. A. Harbison.

**FOR RENT**

For Rent—Six room modern house near Normal. \$25 per month. D. E. McIntyre, 1700 Johnson, Amarillo, Texas. 7p3

**The Quinine that Does Not Affect The Head** Because of its tonic and laxative effect. LAXATIVE BROMO QUININE is better than ordinary Quinine and does not cause nervousness nor ringing in head. Remember the full name and look for the signature of H. W. GROVE, Inc.

**Gasoline.**

Detroit Free Press. I've had in mind to write a song Of praise to gasoline To loud its worth throughout the earth How useful it has been! But Oh, I should have sung my song At that departed time When joy was high, and I could buy A gallon for a dime.

I could have sung its praises then, Sincerely, had I tried, Its labors fine, in may a line I could have glorified. I should have hailed that precious stuff In deathless verse and rhyme When I could get (Oh vain regret!) A gallon for a dime.

Were I to sing of gasoline Considering its rate I fear today, my epic lay Would be a song of hate, At nineteen cents I find no thrill Ecstatic or sublime, I've just one thought. 'Tis once I bought A gallon for a dime.

If you intend to have a sale get our prices

We are fixed for turning out work of this kind in double-quick time.

**Siftings.**

The state department of education has compiled data showing that 154 school districts in Texas are now providing homes for teachers. Of this number 150 are for white teachers and four for negro teachers. The movement to build teachers' homes in rural districts is adding greatly to the teaching efficiency in these districts, says State Superintendent Doughty.

About 60 farmers in one Missouri community are petitioning their college of agriculture at Columbia to send its farm management students to them for study this summer. These farmers offer their farms of from 20 to 90 acres each for study, and will themselves be the teachers to a considerable extent, although the college classes will be in charge of a professor who will direct their work and take charge of any general meetings which the interest of all parties concerned may make desirable.

A portable telephone, made of aluminum and weighing 2½ pounds, the invention of a forest officer, R. D. Adams of Missoula, Montana, will be part of the regular equipment of patrolmen on national forests the coming field season. This instrument is regarded as a great improvement over the set formerly used, which weighed 10 pounds. It is said that a field man equipped with this telephone, a few yards of light emergency wire, and a short piece of heavy wire to make the ground connection can cut in anywhere along the more than 20,000 miles of forest service telephone lines and get in touch with the nearest centers of a supervisor district ranger.

Cheaper gasoline may become an issue in the politics of the United States. It has now reached the stage of getting into the party platforms, Maine's progressives leading off with a demand that something be done to protect the consumers, and, if in no other way, by a prohibition on exports. That will be a last resort, in case other devices for gaining equity shall fail. Moreover, the country will not wait until next autumn for a decision at the polls. It wants relief sooner than that, and, if relief is not obtained, it will insist on knowing why.

A famous Cherokee Indian declared that "Oklahoma" was a Greek word which meant "red man's land;" and Colonel Van Horn, who was chairman of the committee at the time of the introduction of the bill for the organization of Oklahoma territory, believed that this Cherokee Indian knew the correct name of the territory. But a gentleman of Oklahoma City, who lived for years among the Creek, Choctaw and Cherokee Indians in the Indian Territory, and who became familiar with their languages, asserts that "Oklahoma" is made up of two Choctaw words, "oklo," which means people, and "home," which means "red." This would make the meaning of the name of the present state "people red," or "red people," a very pretty and appropriate name.

One of the proposed memorials to the late Mrs. Woodrow Wilson is the "Ellen Wilson Chair of Rural Nursing" at Peabody College, Nashville. For this worthy cause an endowment of \$100,000 is being raised by the country life committee, woman's department, National Civic Federation. This endowment will provide a course for nurses who wish to receive training for rural service. It is practically an unoccupied field in the South; and with the present facilities at Peabody College, which already provides courses in rural sociology, rural sanitation and hygiene, and many related subjects, the proposed endowment will enable the institution to provide a comprehensive course of training. While Eastern friends have offered to contribute a considerable part of this sum, and that offer has been accepted, it is hoped that the womanhood of the South will cooperate in the raising of this sum. The movement is actively supported by the Red Cross and the Southern Woman's Conference.

**Water.**

Drink it. And eat it. You need it. Foods prove it. Cabbage is 89 per cent water. Mushrooms are 90 per cent water. Asparagus is 89 5-10 per cent water. Cauliflower is 90 7-10 per cent water. Tomatoes contain 89 8-10 per cent water. Delicious celery is 93 3-10 per cent water. Cucumbers are a zatter of 96 2-10 per cent water. Spinach is 90 per cent water and radishes 90 2-10. Even our good old friend, the potato, is 75 per cent water. On the other hand, peas are 83; lentils 12.5; while beans are 14 per cent water. Even the solid earth is three-quarters water.

**GARTER SNAKE MOST COMMON**

Classification Embraeus Eleven Species of the Best-Known Creatures of the Reptilian World.

The garter snake, genus *Crotalus*, is our most numerous variety, embracing eleven well-defined species, including the beautifully-marked ribbon snake. This group defies extinction even in the most populated regions, being plentiful in city parks, writes Arthur H. Fisher in the Philadelphia Record. They are viviparous, bringing forth as many as sixty living young each year. They feed entirely on cold-blooded prey, tadpoles and frogs being their main diet. The variation in color is frequent in the same species, but they are easily recognized by the general scheme of their markings. Thriving for years in captivity, they make the most interesting study specimens. The common variety, *Crotalus sirtalis*, is numerous.

Their nearest relatives, the water snakes, genus *Tropidonotus*, so gracefully stoned by the country boy, are very numerous and are found in large numbers sunning themselves along the banks of creeks and ponds. They are nearly always dark brown in color, with transverse markings. They feed on frogs and fish and show wonderful dexterity in capturing their quarry. The large brown water snake, *Tropidonotus taxipilotus*, grows to great size, and is much confused with the poisonous moccasin, *Ancistronodon piscivorus*, owing partly to the fact that it is found basking on the same logs with the deadly "cottonmouth."

**LEARN TO TELL GOOD STORIES**

Writer in Philadelphia Newspaper Gives Some Excellent Advice to the Young Mother.

So many mothers say, "I can't tell stories. Besides, I don't know any." Well, you can tell them and you should learn them. To read them is not the same. The book and the words are between you and your child. You can never give yourself in the same way through reading print as when you let your own appreciation of the story speak through your voice and eyes straight to your child. Absorb your story. Make a part of yourself all its beauty, its message, and then free yourself from mere words. See the pictures and reveal them to your listening child.

As for knowing stories, learn them. If you can't find them for yourself besiege the editors of your magazines and newspapers for them until you are supplied. Insist on having the best. There are no stories so good as the old, old ones which sprang from the heart of the race in ages past. These old tales meet the child's need because they correspond to his stage of development. They were primitive man's effort to explain himself, nature and God. The child will recognize his kinship to them. He will find in them the great truths which answer his own wonder and longings.—Philadelphia Ledger.

**Japs Work All the Time.**

Literally the Japanese work all the time. It is not at all uncommon to find Japanese men and women at work in their shops at two, three and four o'clock in the morning. They must work like this or starve. They live directly in the rear of their places of business. Their entire household equipment comprises a few mats, a few cushions and a little tableware. They go at their job—whether it consists of making clogs or inlaid cuff buttons—and work and work and work until they are exhausted. Then they sleep a little and go back to work. It does not take a Japanese ten minutes to eat his meal of rice and fish. He has his festivals, of course, and a good many of them; but he works the rest of the time; and in many households it must be a special and personal festival, connected with some individual or family gods, to lure him from his occupation. He needs the money.—Samuel G. Blythe in the Saturday Evening Post.

**Proper Home Influence.**

"The boy who is taken out for a stroll on a Sunday afternoon by his father," says Judge Scully, formerly of a juvenile court, "is seldom the boy who gets into trouble." Judge Scully finds, and social workers will agree with him, that the lad who is tempted to follow the downward path is the lad who is deprived of proper home influences. The tone of a family depends largely on the mother, but the father should not restrict himself to the humble though necessary position of breadwinner. In the opinion of many observers, too many boys, whose homes are fairly good in most respects, suffer from the fact that they know little about their father, and he knows little about them.

**Evil in Cheapness.**

All works of art must bear a price in proportion to the skill, taste, expense and risk attending their invention and manufacture. Those things called dear, are, when justly estimated, the cheapest; they are attended with much less profit by the artist than those which everybody calls cheap. Beautiful forms and compositions are not made by chance, nor can they ever, in any material, be made at small expense. A composition for cheapness, and not for excellence or workmanship, is the most frequent and certain cause of the rapid decay and entire destruction of arts and manufactures.—Ruskin.

**Make War on Flies: Ward Off Disease**

In order to make this community a better place to live in, we must declare war on the house fly at once. If we do not slip up on him and strike the first hard smashing blow, he is going to come at us in overwhelming numbers.

How may we successfully fight the fly? By destroying or removing his breeding place, the manure pile, removing all garbage and making the privy vault fly-proof, and by keeping your yards and alleys clean. We must screen our houses and use the swatter and sticky fly paper without let-up.

Where is the fly born? In filth, generally in horse manure and outhouses, sometimes in the flesh of dead and rotting animals—never in any clean, wholesome place. The life cycle of the fly's birth runs about ten days from the time the egg is laid until the mature insect is born. A maggot is hatched from the egg. The maggot becomes a pupa (a state corresponding to the tadpole state in frog life), and the pupa becomes the mature fly that helps to make life miserable for us in warm weather.

**Flies Live in Filth.**

Where does the fly live? Where there is filth, and there is nothing too filthy for the fly to eat. He eats clean food also, but his special delight seems to be wallowing in filth, then buzzing into the house and wiping his feet and wings on substances you are about to eat. Watch him and see for yourself.

Think of the most sickening, disgusting places where you have seen flies. Think of them until your palate is light and the pit of your stomach ticklish. For if you think hard enough about this dangerous, nasty insect pest you will help fight his whole tribe with all your might.

The fly's favorite place of residence is in the manure pile, the privy-vault, the garbage can and the spittoon. But he is a restless insect and unless he can wander more or less freely he is unhappy. So when the fly tires of the manure pile, the privy-vault, the garbage can and the spittoon he makes an excursion into the kitchen, dining room and bedrooms of the nearest residence.

**He Breeds Disease.**

What does he do in these places of exploration? He wipes his feet on the food, bathes in the milk, or drowns in it, and annoys the sleepers. If there is a sick person around, a consumptive or instance, he alights on the patient's lips or invades his sputum cup and takes on a load of deadly germs. This he distributes on the food, on the baby's lips or on your own if you are not very careful to shoo him away.

A busy death's head is the house fly. He killed more American soldiers in the Spanish-American war than the bullets of the Spaniards, and was the direct cause of much of the typhoid fever in the United States last year. He cannot be ignored safely.

The only way this town can effectually exterminate flies is to make an organized effort. Our municipal authorities and health officers should map out a campaign immediately and enlist the active aid of everybody in the community.

**McCombs Resigns.**

Washington, April 24.—William F. McCombs, chairman of the Democratic national committee, notified President Wilson he will be unable to continue in his present position after the Democratic convention in St. Louis and will be unable to conduct President Wilson's campaign for re-election.

Replying to McCombs' letter, the President expressed regret. Fred B. Lynch, national committeeman from Minnesota, is expected to succeed McCombs.

Fred B. Lynch, suggested for the chairmanship, is at present chairman of the executive committee of the national committee, and is in active charge of preliminary. Cummings of Connecticut, vice chairman of the national committee, and Joseph P. Tumulty, secretary to the President, have also been mentioned as possible successors to McCombs.

India produces 50,000 tons of native grass each year for manufacture into paper.

An acre of good fishing grounds at sea will yield more food in a week than an acre of the best land will in one year.

It is probable that less than one-third of the earth's population get what the Americans call a "square meal" three times a day.

Once upon a time George Washington expressed a wish to see the whole world at peace, with all the inhabitants thereof loving brothers. It was a magnificent dream.—Bonham (Tex.) Favorite.

Come to Randall County This Year.

**AUTOMOBILE FOR SALE**

One 5-passenger Case automobile for sale. New top, newly painted; tires in first-class condition; electric light and starter. Good as new. For information see

**FRANK BUKOVINY, At Bukoviny's Garage**

**Pleasant View Items.**

Quite a number of young people of Pleasant View attended the picnic at the Johnson school house Monday. L. C. Crowley closed his term that day. A ball game between Pleasant View and Happy the score was 13 to 27 in favor of Pleasant View.

H. G. Breckenridge went to Amarillo Friday to hear Bryan speak.

Misses Louise Hare and Ethel Crowley had a narrow escape Monday going to the picnic. Their horses ran away, overturning the buggy, throwing both to the ground. Neither were seriously hurt. Miss Hare was slightly bruised.

Miss Rowana Gibson went to Amarillo Tuesday to attend the bed side of her sister, Edith who is in the Sanitarium for treatment. She is steadily improving.

Mr. and Mrs. F. A. Crowley arrived Sunday from Greensville, Iowa where Mr. Crowley has been teaching. They will make their future home here.

**Block Number Six.**

Mrs. T. C. Jennings Sr. is confined to her bed with an attack of grippe.

The following were visitors at the T. C. Jennings home during the past week: Mrs. Chas. W. Keirse and daughters of Childress, Mrs. Ed Guleke and Miss Hattie Howington of Amarillo, Mrs. Fred Woodruff of Childress, Mr. and Mrs. Boehning and family, and Mr. and Mrs. F. A. Crowley of Iowa.

Mr. and Mrs. Henry F. Miller spent the week end with Mr. and Mrs. Paul Fluegel northwest of Canyon, returning home Monday evening.

Wm. H. Boehning has bought the Ford truck formerly owned by Ed Hyatt and will use it for delivering produce.

Mr. and Mrs. A. W. Blough attended the lecture given by W. J. Bryan, Monday evening in the Normal auditorium.

**Three. Count 'Em, Three.**

The crusty old bachelor, with the self-winding twenty-four-hour grouth settled down into one of the club arm chairs.

"I've just spent an hour talking with some young married ladies," he growled, "and not once did their conversation deviate from the great feminine trilogy."

"What's that?" came from the depth of another arm chair.

"Babies, servants an dibabies."

Why pay 75 cents for typewriter ribbons when you can buy them for ONLY 60 cents at the News office?

**Daughter Born to Mr. and Mrs. Hill.**

A daughter was born to Mr. and Mrs. J. A. Hill at their home in California. Mr. Hill is head of the history department of the Normal and has a leave of absence to study in the university of California. On May 17th he will receive his master's degree. The family is expected to arrive in Canyon about the first of June.

**Correspondent Courses in the University of Texas.**

Teachers, Lawyers, Business Men, Students; Home Makers, and many others are profiting greatly by the courses now offered through the University Extension Department. High school graduates and applicants for state teachers' certificates will find the University courses particularly helpful. In the new correspondence catalog which is just coming from the press there are announced over two hundred courses in English, Mathematics, Foreign Languages, History, Economics, Education, Law, Bookkeeping, etc.

If you are interested in preparing yourself better to do your work in life, why not consider these courses, by means of which, in your spare time, you can accomplish so much toward bettering your condition? Fill out and mail the blank below, and full information will be sent you free.

**THE CORRESPONDENT DIVISION, UNIVERSITY OF TEXAS, AUSTIN, TEXAS.**

Gentlemen: Please send me a copy of your latest correspondence catalog.

Name \_\_\_\_\_ Address \_\_\_\_\_

**Dan**

A dark bay graded Percheron coming 4 years old, weight 1650 will make the season at my farm 5 miles south and 1 mile east of Canyon.

**TERMS:**

\$10 to insure colt to stand and suck, will not be responsible for any accidents. Mares sold or removed from county, service fee becomes immediately due.

**Henry Schroeder**

—the only sure and successful way to advertise a business is to plan an advertising CAMPAIGN of that business—not an advertisement scattered now and then, but a definite, well-organized plan—good, clean copy, helping the readers with suggestions.

—every selling point should be taken advantage of and brought to the readers' attention—nothing should be left to the imagination.
