It will be a great pleasure for you to compare Mr. Hooker with your ownself-if you are a father, or to your father or husband.

You will be thrown into transports of laughter and delight over the clumsiness of Ted Stone, and the manner and words of Professor Alosius Bar-

Dairy School at Zita Success; Jowell Community Next Place

The first of the one-half day dairy schools which is to be given by the College Departments of Agriculture and Home Economics was held at Zita school house Wednesday evening. The school was more of a demonstration

Prof. F. R. Phillips told the object of the meeting and gave a short talk on Dairy Farming which was illustrated by a large chart with many pictures. He was followed by T. C. Thompson, who gave a demonstration with the latest model cream separator. Mr. Thompson gave the most approved methods of taking care of dairy equipment; however, he stressed the fact that he came only at Mr. Phillips' invitation to show the people the latest dairy equipment and not for the purpose of trying to pursuade them that his line of utensils were the only line one should buy.

Makes Fireless Cooker

Miss Burton of the Home Economics Department of the College told about the importance of milk in the diet. She talked about school lunches and illustrated her talk with a few things that have been found helpful in preparing hot lunches at the school houses She gave a demonstration in making a fireless cooker using a bushel basket, a two gallon bucket, a brick and Mrs. Ball, were Tulia callers Sunday. day at the Amarillo sanitarium.
