

General Nelson A. Miles Coming to Adobe Walls Next Spring

Mrs. Olive K. Dixon, of Miami, returned home the first part of the week from a visit to her old home in Virginia to see her aged mother, and while gone visited in Washington, D. C., also many other places on the trip.

While in Washington she was accorded an interview with Gen. Nelson A. Miles, of the United States Army, who had charge of the military forces in the Panhandle in the seventies, and from him gained much valuable information to complete her records of early Panhandle history. "Billy" Dixon was a government scout under General Miles. When Mrs. Dixon was in Washington Gen. Miles was on the eve of leaving for a trip to Europe, but he was glad to give Mrs. Dixon two hours of his time and retell early Panhandle history. He stated that if possible he would attend next year the fiftieth anniversary of the Adobe Walls fight. Nothing could be more pertinent to making the anniversary a complete success than the presence of this distinguished officer.

Mrs. Dixon, accompanied by her youngest son, Hugh, left the Panhandle in the middle of July for Rome, Va., her old home, to see her mother, who is ninety years old. They made the trip by way of Chicago, and at that city went for a boat ride on Lake Michigan, also visited Lincoln Park and the Chicago Theater, which theater is said to be the finest in the United States.

They visited many places of interest in Washington, D. C.—Canadian Record.

BROUGHT HIM INTO PICTURE

Jenkins was substituting for a day or two during the temporary absence of the regular society editor. He is a detail man, quick to notice omissions and call attention to them. So when Miss Daisy Blank came in with a long story about the wedding of her dearest chum, Jenkins took his pipe out of his mouth and studied the delicate missive. He grunted at the adjectives about the bride's costume, frowned over the elaborate decorations and the lengthy description of the music and the singing and then said to Miss Daisy:

"Who was the unhappy man?"
 "You mean the groom?"
 "Yes. There has to be a groom at a thing of this sort, doesn't there?"
 "To me sure," and Miss Daisy blushed a bit. "It was Mr. William Smith—didn't I have him in?"
 "Not that I can see."
 "Well, put him in somewhere, please. Of course he was present, all right."
 So Jenkins wrote at the bottom of Miss Daisy's exquisite little sketch: "Bill Smith was also present."

The Federal Reserve Board announces that ample credit to meet this year's seasonal requirements of the farmers of the country is assured, but it emphasizes in its report the fact that "credit cannot make a market where none exists." It points out that the rate of return to the farmer, which has been proportionally less than the rate of his expenditure for the commodities he requires, has been the direct outcome of the world supply and the world demand. For the ultimate consumer in the United States the result of relatively low food prices has been to increase the margin available for other commodities. Thus the selling price of the farmer's products has been out of line with the prices of the things he buys.

Peanut oil is one of the prime necessities of the average Chinese in South China. As a cooking oil and foodstuff it means to the Chinese what olive oil does to the Spaniard, or Italian and lard to the American. Large stocks of peanut oil are always maintained in Hongkong. Most of the local oil is crushed from nuts grown in the colony, South China and in North China.

BILL BOOSTER SAYS

QUARTER DON'T AMOUNT TO MUCH AROUND TOWN BUT THE AVERAGE GUY, HE THINKS IT'S SOME PUNKINS IN THE COLLECTION BOX!! BE LIBERAL WITH YOUR CHURCH! THERE AIN'T ANY PLACE IN TOWN WHERE MONEY WILL GO AS FAR!

OPEN SEASON

The Mail Order Houses are going to knock the smaller town merchants for home runs just as long as they can. That time will stop, however, when these same merchants stiffen their backbones long enough to fight back with the weapon of 3 per cent newspaper advertising and thus stop the flow of dollars that are now going for catalog purchases with firms hundreds of miles distant. To set around with a "my-Gosh-Ain't-It-Awful" look on their faces, waiting for relief from this situation is not a manly practice, to say the least, and if these fellows had a spark of fight left in themselves they would be ashamed to be walked on in this manner. These mail order firms flood with their catalogs those communities whose business men are "piker" advertisers while, in contrast, converted 3 per cent newspaper publicity would have a tremendous influence in driving these monsters into the holes which they came. The open season has arrived and you may now shoot on sight. May we help to load your gun?—Quahh Tribune-Chief.

School children all over England are playing the races, deserting their books for lookies. Testimony given by a woman school teacher at the government's inquiry into betting revealed that out of a class of forty-two boys, averaging eleven years old, nineteen admitted they backed horses. She also suspected others in the class of playing the ponies with their pennies. She said they talk about form, the size of the horses and the abilities of the jockies. The youth of the land hardly get off their rocking horses before beginning to back the real thing.

At the Institute of Politics, at Williamstown, Massachusetts, Mr. Bakmeteff, former Russian ambassador to the United States, predicted the ultimate fall of the soviet government. He based his prediction on the fact that the communists are waging a losing fight against the growing demand of the peasants for individualism and ownership of their lands. He looked forward to a new Russia in which individualism and equality of opportunity, operating as they do in the United States, would bring prosperity and happiness. Social revenge has run its course, he thinks; and the peasant is becoming an independent farmer.

DOLLAR NOW COMPARED TO PRE-WAR DOLLAR

The American dollar today is worth fifty nine cents in terms of pre-war purchasing power, according to a survey of retail prices by the Department of Labor. In the survey covering all principal cities of the country, living costs were found to be above the national average in cities east of the Alleghenies, while westward from the Mississippi the cost of living tends to fall below the average for the country. The Pacific coast cities are the most favored in reduced living costs while in the Middle West, prices tend to fall below the average, however, some of the necessities of life are higher than the country average.

Taking the country as a whole, the average family today spends approximately 70 per cent more for the major necessities than in 1913. The largest item of expense for the family food, which takes approximately 45 per cent of the income of the average head of a family, is closer to pre-war levels, being 63 per cent above 1913, which reflects an upward movement during the last twelve months, even though there has been a nation-wide activity in building homes and apartments. Inasmuch as construction work has slackened in many cities a downward movement in rent is not to be expected in the near future.

Clothing prices, likewise, due to the prosperous conditions in all lines of work have advanced in the last twelve months; buying, however, is careful and conservative. Present prices are 75 per cent higher than in 1913 which is a 60 per cent decline as compared to prices in 1920 when the average family paid 187 per cent more than the pre-war period.

Fuel costs for the average family this year are 81 per cent higher than 1913, according to the survey, while furniture heads the list of major necessities with a price level 122 per cent higher than in 1913.

Morris Gest has succeeded in extricating from Bolshevik Russia his father and mother, his two sisters, and their children—twenty-one of his kin, in all. A Paris dispatch states that it is doubtful if he would have been successful in obtaining passports for his people but for the aid of officials of the American Relief Association. He will bring the twenty-one to America as soon as the necessary arrangements are made for their admission.

Harding Memorial Stamp Printed in Black is Planned

Postal officials state that the Postoffice Department is about to issue a special 2c postage stamp, printed in black ink, bearing the portrait of the late President Harding, to be known as the Harding memorial stamp. The stamp is to be issued for a limited period only, probably not to exceed ninety days. All stamps sold will be valid for postage unless used. The description of the new stamp is as follows:

"It is the same shape and size as the current 2c stamp and bears the portrait of Warren G. Harding within an oval and partly inclosed in a panel which is supported on either side by Acanthus scrolls. Above the portrait within a curved panel appear the words: 'United States Postage' in Roman capital letters. On a ribbon below the oval is the name, 'Harding,' and at the bottom of this appears the word 'cents.' In both lower corners within the ovals with dark background is the white numeral 2. In the upper left-hand corner appears the year of birth, '1867' and in the upper right-hand corner the year of death, '1923'. The entire stamp is inclosed within a black border. The stamp is printed in black ink."

The new Harding memorial stamp is to be first placed on sale at Marion, Ohio and at the philatelic agency Division of Stamps, Postoffice Department this week.

Canada, troubled by a shortage of labor, is making plans to promote the immigration of a million youths from Great Britain, who are now suffering from unemployment. Montreal will be the distributing centre. An effort will be made to put the young immigrants on Canadian farms.

Capt. E. T. Pollock, governor of American Samoa, reports the finding of a turtle that had been left in the Tonga Islands by Capt. James Cook in 1773. According to Captain Pollock's report, the turtle exhibited signs of extreme age; it was blind and when walking creaked like an oxcart.

Knowledge runs in streaks. A man may be able to give a lecture on the lunar crater Copernicus and yet approach a mule from the wrong end.

To add yesterday's load to what you already carry makes a heavy burden. Put tomorrow's load on top of that and you cannot support it.

Lightning Struck Ward Home Monday Night; Does Little Damage

Lightning struck the home of Mr. and Mrs. S. F. Ward, north of the city, Monday night and tore off a patch of shingles and damaged the wall paper in two rooms, but otherwise did no particular damage.

The bolt hit the chimney and ran down the side.

The family was at home, but all escaped injury.

Foreign newspapers seem to be disturbed because the American army of tourists this year did not scatter its gold with prodigal hand. Perhaps the most amusing lament is that the Americans called for much less alcoholic liquor than the hotel keepers had been led to expect. Most of the visitors were content to eat at inexpensive grills and drink mineral water instead of wine.

The French committee for the Olympic games, which will be held next year in Paris, has announced that besides the athletic events there will be competitions in literature, architecture, music, painting and sculpture. The works entered in those contests must have some form of athletic achievement for their theme, and the winners will receive medals as if they were athletes.

In China more new roads have been built in the past five years than in any previous five decades. Over the new roads American motor busses are running. Fares are cheap, and the Chinese people after their first alarm are enthusiastic customers. When the cost of building dirt roads and of transportation is as low as it is in China a new industrial order for a quarter of the human race may come quickly.

Jean Vigoroux, formerly New York manager for a well-known Parisian antiquarian and art dealer who now has had him put on trial on charge of diverting funds and art treasures, declared in the course of the trial that the United States is full of antique art fakes, that the Metropolitan Museum in New York had bought \$600,000 worth of spurious objects, and that his former employer is the world's greatest antique faker.

But for Prohibition it wouldn't be safe to drive on the streets and highways. On the other hand, if we had the saloons, as in the old days, there would be fewer automobiles on the streets and highways.—Toledo Blade.

Uncommon Sense

YOUR GRIEVANCES

BEFORE you complain, analyze your complaint. The chances are you will find that it isn't really a complaint at all. For example, many men feel aggrieved because others, doing apparently the same work, are better paid. Watch them a while, and you are pretty sure to find that they are either doing more work or better work than you are.

EASY

By WILL M. MAUPIN

I BOUGHT my wife a meerschmum pipe And kept it hid away; Until I could hand it to her Upon last Christmas day.

For me she bought a collarette— A saskin beauty, too. She hung it on the Christmas tree And said: "Dear, it's for you."

That evening, when 'twas time to dine, We both sat down to sup. She with the pipe, I with the fur— And traded, even up.

FOOD FOR THE FAMILY

WE TIRE of the sameness of food, no matter how well prepared and served. "Variety is the spice of life." Let us remember this and vary the menu.

Tip Top Omelet. Boil one-half cupful of milk, add a tablespoonful of butter and mix with one cupful of bread crumbs. Season well, add the yolks of three eggs well beaten, stir in slowly the stiffly beaten whites and brown in a well-buttered frying pan.

Grape Juice. Cook a kettle of grapes with a very little water until the juice has been well drawn from the fruit. Drain and add one cupful of sugar to each quart of the juice. Boil, skim and pour into bottles boiling hot. Seal with paraffin. Apple Juice or the juice of any fruit may be bottled in the same way and will be nice to use not only as drinks but for padding sauces and in various other dishes.

BIRD FEASTS ON LIVE SHEEP

Species of Parrot is the Most Formidable Enemy of the New Zealand Farmer.

There is no other parrot like the kea. The power centered in its neck, beak and talons is so great that the kea is the most formidable pest with which the New Zealand sheep farmer has to contend. While soaring overhead it selects its prey, and swooping downwards, settles on the sheep's back and proceeds to tear away the wool with its beak, then digging deep into the flesh, holds on to the wool with its talons until thoroughly gorged.

When the first settlers came to New Zealand the kea was mainly a vegetarian, the animal part of its diet being confined to insects and grubs. It has been suggested that it acquired its taste for sheep flesh from the offal which the farmers left exposed after slaughtering a sheep.

And speaking of sheep in New Zealand, in the mountain districts there flourishes a plant known as the Raoulia, or vegetable sheep—a mass of closely packed twigs thickly covered with white, woolly leaves. Seen from a distance the Raoulia so closely resembles a sheep, or a group of sheep, resting on the hillside that shepherds are often led to make a long trek in its direction, mistaking it for lost members of their flock.

WERE BARBER AND SURGEON

Centuries Ago, Members of the Present-Day Guild Embraced the Two Avocations.

A reminder of the survival of the ancient trade guilds in London, long after their members have ceased to have any connection with trades they ostensibly represent, is provided by the recent election of a chairman of the Company of Barbers.

The new chairman never was a barber, and if any of his ancestors were he has forgotten it. And the same is true of all the members of the company. But they are very proud of the old traditions of the company and get together on stated occasions to eat a generous dinner, washed down with good wine, and listen to speeches about the good old times.

The company was incorporated in 1461 and fifty years later an act was passed which prevented any persons not members of the company from practicing surgery within seven miles of the city of London, unless they had been licensed by the bishop of London.

Barbers were versatile folk in those times, combining the avocations of surgeon and dentist with the work of trimming hair and beards.—From a London Letter to the New York Evening Post.

Owl Preys by Night.

The habits of animals are developed and regulated chiefly by their surroundings and by the sort of prey on which they live. Sea-gulls, for example, can dive a considerable distance under water and catch the fish which form their principal article of diet, while a chicken would starve to death if forced to depend upon this method of securing food. So it is with owls, which generally make their appearance only after dark. This species of birds feeds mainly upon mice and other small creatures which are active at night. Therefore, the owl, which has developed a soft plumage that makes its flight almost noiseless, comes out after sunset in search of its food. It is also because of this habit that the owl's eyes, like the cat's, are so made that the pupil can be dilated until the bird is able to make use of every particle of light available and, while owls cannot see in absolute darkness, they are able to utilize the faintest of light rays to such an extent that they can spot and catch their prey unerringly.

Wholesale Human Mutilation.

Forty thousand pairs of ears and 40,000 noses, the war trophies of that famous and painfully thorough Japanese General Hideyoshi, lie beneath the plain stone marker and grass-grown mound of the "Mimi-Zuka," or Ear tomb, a short distance from one of Kyoto's main streets.

They were deposited there as evidence of the valor and success of Hideyoshi's expert carvers, and also to serve as emphatic warning of the fate all who crossed that determined warrior might expect.

The ears and noses are not, however, the bounty of any recent exploit. Hideyoshi was the strong man of Japan more than three centuries ago, and his gruesome trophies were once the valued property of 40,000 Koreans who had foolishly resisted the Japanese general's invasion of their native land.

His Name.

A Washington man, visiting Richmond, took a great fancy to a bright-eyed little ducky who polished his shoes. Shortly after he became interested in the little chap, the Washington man asked his name.

"Gen, soh," was the reply. After a few moments of silence the Washingtonian continued, "I suppose that is an abbreviation for General?" The word "abbreviation" stumped the little fellow for a while, but he recovered himself. "No, soh," he said, "it ain't exactly that. My shore-enough name is Genesis xxx, 33. So shall my righteousness answer for me in time to come Washington Jones, but they jest calls me Gen fo' sho't."—Philadelphia Ledger.

The machete is the universal implement in Costa Rica and other Caribbean countries, and it is carried by every country laborer. It is used for chopping brush and trees, clearing ground, cutting grass and sugar cane, killing and skinning animals, for offense and defense, and for almost every conceivable purpose. Two types are used: The machete de suelo which has a long blade rounded at the end with the cutting edges sloping toward the handle, the end being much broader than that part near the handle; the other simply a long straight knife.

When the sea birds gather on the isles of the Pacific Northwest in Alaska and British Columbia, in June, the Indian follows the white-winged flocks for his summer harvest of eggs. He takes only the first and fresh-laid clutches, allowing the later eggs to hatch. But international law must be rigidly observed and the migratory birds are protected in their nesting. There may be some excuse for the Indian in gathering these eggs, for his forebears did so thousands of years ago. However, there is none for white men or Japanese, who would sell these eggs in bakeries and restaurants of the coast cities, and it is with these nest pirates that the law is operating most.

Physical Health means Beauty!

HEALTH and beauty go hand in hand. Where the system is run down—the face drawn and fagged—the body limp and lifeless—beauty is missing. Looks of pity glance those that might have been gazes of admiration. Restore your health and beauty will take care of herself. S. S. S.—the rich blood builder—rekindles the spark of health and lights the blaze of beauty by building red blood cells. The nerve power of your system finds life in these very blood cells. Build more red blood cells and your nerve power will increase. S. S. S. builds them. Rich blood will tingle through your system. That lost charm will return. Your entire system will be repaired. You will be ready to cope with the impurities and blemishes that handicap beauty. As physical health means beauty so, too, does S. S. S. mean beauty. For S. S. S. means systems that are free from impurities—pimples, blackheads, acne, boils, eczema, rheumatism. S. S. S. and good health go hand in hand. S. S. S. is made of pure vegetable ingredients. It is sold at all good drug stores. The large size bottle is more economical.

New Type of Ford Car Shown by the Ford Dealers Here

The first of the new type Ford cars which recently arrived in this city are now on display at the show room of Kuehn & Farlow, local Ford dealers.

The higher radiator, now standard in all Ford types, has brought a general improvement throughout the entire line and the new radiator apron blending with similar apron effects on the fenders gives the front of the cars a highly finished appearance.

The Touring Car shows a decided improvement having a more streamline effect. It is lower in appearance, a feature adding much to the attractiveness of the slanting windshield and one-man top.

The Ford Runabout is likewise much improved and looks more sturdy.

The Coupe is entirely new in body design and construction. There is a more trim exterior appearance, more comfortable seating arrangement and greater luggage carrying capacity. From the dash there is a graceful sweep in the cowl to the radiator. The doors are wide and heavily framed. A larger compartment at the rear gives increased room for luggage and the new type rear fender is more secure. Ventilator in the cowl and the visor over the windshield add to the exterior appearance, effecting a high quality aspect.

Interior arrangement is most convenient and the upholstery is choice. The seat is deeply cushioned and the cushions are divided making it easy for filling the gasoline tank which is under the seat. A small recess shelf at the rear of the seat is handy for small parcels. The door windows are equipped with revolving type window regulators permitting any desired ventilation. Doors are provided with locks.

The higher radiator has greatly enhanced the beauty of the Ford Four Door Sedan. This car, highly popular since its introduction a year ago because of its low, graceful lines, now presents a more sturdy appearance.

Another feature coming as the result of the change made in the front of the car, including larger cowl, radiator and hood, is that occupants of the front seat are afforded more space, thus insuring added riding comfort.

Many other little improvements and refinements are noticeable including revolving type window regulators for all door windows and a dome light for illuminating the interior.

The new honeymoon cars made by the Pullman Company insure daytime as well as nighttime privacy to passengers. The cars already are in operation on most of the transcontinental roads. When the berths are made up, a new style partition going from the seat to the ceiling gives the occupants absolute seclusion. Newlyweds hail the innovation with joy.

Stately Japanese cedar trees line both sides of the 30-mile boulevard leading from the imperial summer palace at Nikko, Japan, to a near-by village. The trees tower 200 feet or more in the air. The legend has it that several hundred years ago the emperor summoned all the noblemen to his summer palace, each one being requested to bring a gift. An impoverished nobleman carried with him a sack of tree seeds, and planting the seeds on both sides of the highway caused his name to be remembered long after the gold and silver offerings of his colleagues had vanished.

The Desert Touring Club of Alexandria, Egypt, has fifteen members, including Albanian, British, French, Greek and Italian. With three cars they tour thousands of miles over the Sahara Desert.

ALL WORN OUT

Does morning find you with a lame stiff and aching back? Are you tired all the time—find work a burden? Have you suspected your kidneys? Canyon people endorse Doan's Kidney Pills. Ask your neighbor! You can rely on their statements.

Mrs. Claunch, Canyon, says: "There was a dull ache through the small of my back and my back was so sore and lame I could hardly bend over or do my work. When I stooped, a sharp, stinging pain caught me, making it hard for me to straighten. I was worn out and could scarcely get around at times. I became dizzy and had headaches and my kidneys didn't act right. I used Doan's Kidney Pills and three boxes cured me entirely."

Price 60c. at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Claunch had. Foster-Milburn Co., Mfrs., Buffalo N. Y.

Clem Friemel had some oats that made over 70 bushels to the acre.

FAREWELL PARTY

A farewell party was given in honor of Mr. and Mrs. H. J. Kraemer, and a big dinner was served down on the creek in picnic style. The guests were Mr. C. Sullivan and family of Amarillo, Mr. Davis and family of Amarillo, Mr. and Mrs. Green of Childress, Mr. and Mrs. Sutherland of Amarillo and her sister of Kansas City, Bob Stratton and family, Chas. Stratton and family, Miss Winnie Jones of Whitesboro, Texas, O. S. Brown and family, J. Tuck and family, and every body reported a good time.

In case of a bite from a venomous snake far from hospitals and doctors: Grasp the limb above the bite. Tie tightly and knot strings. This will localize the poison. Make ten deep incisions with sharp knife or razor crisscross over the snake punctures, five each way at right angles which will result in a checkerboard effect directly over the fang marks. Suck out poison that does not come out with flowing blood. In thirty minutes loosen string but if poison effects follow tighten string again. This must all be done quickly.

A wild rubber plant, resembling slightly the Texas greasewood bush, grows in Texas. It is the only rubber-producing plant known to grow uncultivated in North America. It is found in the Big Bend country of both Texas and Mexico. There is a rubber factory located in Brewster County, Texas, which manufactures rubber from this plant.

HUSH MONEY

He was a great practical joker, and never lost a chance. A few days ago he stopped a friend on Main street and said confidentially:

"I never would have believed it, but I believe it my duty to make it known, Mr. —, the alderman for our ward, has been taking hush money."

"Impossible!" said his friend. "I tell you it's true, for I overheard the conversation and actually saw it handed over to him, and he put the money in his pocket."

Then he went on without explaining any further, and the thing got talked around considerably for a day or two.

He forgot all about it until one day he met the alderman and was the alderman's goat to the extent of two black eyes and a coat split up the back.

And then he had to go all around and explain that what he meant was that he had seen the alderman's wife give him a dime to buy some paregoric for the baby.—Houston Post.

A gross profit of \$379,000 was made by the Leviathan on her maiden trip, according to figures issued at Washington. Receipts on the outward voyage from New York to Europe were \$411,000 and those on the return trip \$368,000. The actual operating expenditures, not including capital cost and other overhead, for the round trip totaled \$400,000.

Edward W. Bok will pay \$100,000 for the best practical peace plan. The Schlosspark Theater in Stglitz, a suburb of Berlin, is taking farm produce in lieu of money. For the best theater seats the price is a pound of butter, or the equivalent in marks at that day's butter quotation. The cheapest seats are sold for two eggs, or their value in paper marks.

Grass is growing luxuriantly on the tops of thousands of freight cars lying idle in the railroad yards of the Ruhr Valley. Most of them are filled with merchandise and have not turned a wheel since the Belgians and French marched into the industrial area last January.

During a debate in the South African Assembly relative to an appropriation of a quarter of a million pounds for the relief of the unemployed, two radicals from Johannesburg chained themselves to the rail of the public gallery, and from there insisted on addressing the House. It required half an hour to unchain them. General Smuts and the Speaker of the House refused to prosecute the offenders.

They are turning tin cans into copper in Arizona. In many of the mining centers carloads of tin cans as well as scrap iron are put through a process to extract the copper from water seepage pumped from the mines. The water contains a small quantity of copper and the scrap iron and cans go into the solution and the copper is deposited in the bottom of the sluices containing the scrap. A very low expense is involved in this process.

Child-birth

Here is a wonderful message to all expectant mothers!

When the Little One arrives, you can have that moment more free from suffering than you have perhaps imagined. An eminent physician, expert in this science, has shown the way. It was he who first produced the great remedy, "Mother's Friend." Mrs. C. J. Hartman, Scranton, Pa., says: "With my first two children I had a doctor and a nurse and then they had to use instruments, but with my last two children I used Mother's Friend and had only a nurse; we had no time to get a doctor because I wasn't very sick—only about ten or fifteen minutes." Use "Mother's Friend" as our mothers and grandmothers did. Don't wait, start today, and meanwhile write to Bradford Regulator Co., B. A. 46, Atlanta, Ga., for a free illustrated book containing information every expectant mother should have. "Mother's Friend" is sold by all drug stores—everywhere.

College Giving Correspondence Courses for Regular Credit Work

The West Texas State Teachers College is starting Correspondence Courses this fall for the purpose of allowing teachers to increase their standing in the College during their regular work. Correspondence study has proven to be very popular in the large school, and the demand has been insistent that such courses be offered in this College.

The Correspondence Instruction is given under the head of the Bureau of Public Service of which Mrs. T. V. Reeves is director. The committee on correspondence instruction is composed of Dean I. G. Allen, R. P. Jarrot, Associate Dean of the College and Head of the Department of Education; J. F. Shetty, Dean of Men and Head of the Department of History; Jennie C. Ritchie, Dean of the Sub-Collegiate

Division and Professor of English; D. H. Munson, Professor of English and Head of the Department; Barathula Walker, Associate Professor of Geography and Acting Head of the Department.

The News is completing 1,000 bulletins on this work to be distributed to students anxious to increase their standing in the College.

Leave it to a Leverless

IF YOU have a tractor, you don't want to be bothered with a horse harrow unless you have a real good one that is still serviceable.

The International Leverless Disk Harrow is designed especially for tractor operation. It is operated entirely from the seat of the tractor—and without levers. To secure the proper angle, the operator merely backs his tractor, which automatically determines the angle of both the front and rear harrows. The gangs remain at whatever angle they are set. To straighten them it is only necessary for the operator to pull a cord which is tied to the tractor seat. This simple operation automatically straightens the gangs so that the harrow will roll like a wagon. Consequently, when you come to a piece of ground that you don't care to cultivate, it's the simplest thing in the world to straighten the gangs and drive right over—you don't have to go around.

International Leverless Disk Harrows are very rugged in construction, being built for tractor work, so if you want a durable disk harrow and want your harrowing done efficiently, leave it to a Leverless. We sell them.
