

Cotton Harvest Hits Faster Pace In Area

Floyd county gins yesterday morning at 9 o'clock had taken nearly a 10,000-bale bite into the 1954 cotton crop.

Actual figures on ginnings, given County Agent W. G. Rodgers by the ginners, showed a total of 9,125 bales turned out by the 19 gins.

But at that, the ginning season has only begun to steam up well. Two or three gins have just put on crews for round-the-clock operations. Most of the runs up to Tuesday had been late afternoon and night runs.

County Agent Rodgers did not re-hauls or pays for hauling and lease figures for individual gins but his figures for the county north of Floydada and Barwise showed 5,969 bales, with 4,056 bales ginned in the south part.

This is the truth. E. G. Dunlap reports that he thought he had a good crew of Spanish Americans to pick his cotton this week. But he lost them. They liked his cotton. They liked his price and housing. But the crew didn't stay. There was no place to put up their television set.

help is not so urgent as last year. This appears to be due to two reasons:

(1) Unless cotton pullers are available on reasonable terms a good many farmers with storm-proof types of cotton will get all their crop mechanically. Last year's experience was extremely costly, and made up a good many minds. Some are getting as good grades with strippers as with manual labor.

(2) Many are waiting for defoliation applications to have their effect before making any effort to get their cotton manually or otherwise.

A new development at several of the county gins lies in the fact that these gins are making burrs available at no cost to farmers to return to their land. The farmer

Thomas, Smith New Directors Producers Coop

Ernest Lee Thomas and G. W. Smith are new directors of Producers Cooperative Elevator, succeeding A. H. Kreis and Tom Porter.

They were elected at the annual meeting of the members of the elevator, held Tuesday night. Hold-over directors are Henry Willis, R. G. Dunlap and R. M. Battey. The election of these new directors and the transaction of the business of the annual meeting came after a John Snider barbecue had been served 630 persons, including members, their families and guests. Snider hailed from Amarillo. He is widely acclaimed.

Frank Triplett, also of Amarillo, was the featured speaker of the evening. Triplett, a producer, declared that there is ample grain storage available now in the southwest and nation-wide. He advised the organization not to add to their present facilities at this time. There has been agitation in the membership to build more storage.

Triplett was one of the collaborators who made the nation-wide survey of grain storage needs for USDA. Following a report his group made the government withdrew further guarantee of occupancy for storage this summer. "There is plenty of storage space to meet all needs for now," Mr. Triplett said. He is manager of Producers Grain Corporation at Amarillo.

Reports of officials showed the elevator concern in good financial position with all debt on installations retired. The last building done by the coop was at Dougherty in 1951.

The evening was not all given over to business. A pretty ensemble of high school girls, nine in number, sang for the group, and Dale Smith also sang for them. The girls ensemble was composed of Sammy Copeland, Joy Porter, Louise Prichett, Jerry Owens, Gladys Breeding, Freida Jarrett, Nadeen Bow, Gaynell Holladay and Nava Johnson. The group was under the direction of Mrs. L. H. Christensen.

Food Sense—Not Nonsense

Food Processing in a Nut Shell

Man has no corner on processing food. Look at the squirrels and look at the birds. They always have shelled nuts and luffed seeds to find food to their liking and which they could digest.

Few foods, as they are grown by nature, appeal to man. Eggs must be shelled, the shell discarded, although its calcium could be used to build teeth and bones. Grains as harvested, must be ground and cooked. The rough coat of bran which protects the wheat kernel, is not to man's taste and the germ causes flour to become rancid, so they are removed in milling. This is despite the fact that nature stocked these parts with many necessary vitamins. It is not as wasteful as it might seem, for this processing of wheat makes available the endosperm—that tremendous part of the wheat which is a veritable mine of protein, energy, minerals and vitamins in a form which can be used in an endless array of good foods.

The miller and the baker take care of the loss of B vitamins—thiamine, niacin and riboflavin—and the important mineral iron by retaining them to the flour or bread. This is known as the enrichment program. In a recent report, "Role of Wheat and Wheat Products in Human Nutrition" from the Harvard Medical School, Drs. D. M. Hegsted, Martha F. Trulson and Fredrick J. Stare, indicate that in some respects the use of enriched flour products may contribute more to the nutrition of man than that of whole wheat products.

The report points out that by removing the bran and the germ, a substance known as phytic acid is eliminated from the diet. This substance binds calcium and iron so tightly that these minerals are not absorbed by the digestive system of man. Furthermore, by removing the bran, the indigestible cellulose is removed. It is because of part of the food we eat—bran—interferes with the absorption of part of the food we eat. Although the processing of wheat, thru refining, may cause a loss of its total nutrient content, in reality, this processing increases its nutritive value. It makes its nutrients more available as well as those of other foods eaten.

Twenty-Two Study Club 'Adventure' Program is Heard

The usual greeting of "How are you?" was replaced by "What d'ya think of the way the World Series is going?" Utter strangers, whose only tie was that they had watched, or listened to, the same little box, talked as easily as old friends when the bases were loaded and a hitter struck out.

Everyone adopted himself a team. He may never have seen either the Giants or the Indians play, may never have visited Cleveland or New York. Still he chose, and rooted for one of the teams as eagerly as though it were from his hometown.

Reasons for these choices were interesting to check. A man had seen the Indians play once upon a time, so that was his team. "Of course I'm for the Giants," one woman said, "they used to train in my hometown." But by and large, the rooters in our town were divided among those who are naturally for the underdog, and those who love to be on the winning side.

We confess to being an underdog backer in most cases, often without a real reason. Yet sometimes we wonder if this is true sportsmanship. This doubt was brought home to us the other day when several women were talking baseball. Most of them, like ourselves, were for the low man. But one woman spoke up stoutly on the other side. "I'm always for the best team. If they're best, they deserve to win!" That we'd say, is 14-karat sportsmanship.

W. Calcate, Dalhart, Mrs. Tom Oliver, Denver, Colorado, W. L. McClure, Amarillo, J. T. and Austin McClure, Plainview.

Out of town guests from Lockney included Mr. and Mrs. C. J. McClure, Mr. and Mrs. F. R. McClure and Mr. and Mrs. T. V. McClure. Those attending from Floydada were Mr. and Mrs. Monroe Moseley, Mr. and Mrs. H. R. Cage and Mr. and Mrs. Dennis Taylor. Several other Texas towns were represented at the anniversary, also Arkansas and New Mexico.

"Willie," said teacher, "can you name the principal river of Egypt?" "It's the Nile, ma'am."

"That's right. Now can you tell me the names of some of the smaller tributaries?" Willie hesitated, then smiled. "The juveniles!"

After the warm days of the summer, the cold days of last week remind us that winter is not far away.

Sunday night at BTU meeting, Junior Calahan showed the religious film, "Go Forth," after the classes of the evening.

Talent show a success.
The talent show given at the South Plains school auditorium on Tuesday night, October 5, under the auspices of Mrs. Ray Smith, Mrs. Sylvia Yearly and J. B. Thames, was a great success, with a fine program given during the evening.

Talent of many different kinds was presented and the judges had a difficult time proclaiming winners of the different divisions. Entrants came from Raika, Floydada, Lockney, and other surrounding communities.

The square dance team of Jills and Jeans, under direction of Raymond Rucker, was very good, and the many piano solos, singing, guitar, accordion, violin, readings, and tap dance selections made a fine evening's entertainment.

In the junior division 1st place went to 4 tap dancers, from Lockney, Marcia McClelland, Tony Webster, Cherry Chattham and Linda Carter. 2nd place went to Addie Atkins, with a reading; and 3rd went to a junior boy from Raika, with a guitar solo.

In the high school division, Louise Pritchett won first with her excellent piano playing; 2nd went to tap dancers, cute Patsy Ashton and Jimmie Holt, from Lockney; Kendis Julian was 3rd, with his song, "In the Chapel in the Moonlight."

In the adult division, 1st place was won by Martha Sanders with a violin selection; 2nd place went to a group of singers, The Lone Star Quartette; and 3rd place was won by Johnny Wilson, with his piano selection, "Down Yonder."

Proceeds from the talent show are to go toward the purchase of a piano to be used in the auditorium, and for the music pupils.

Friday Accidents Take No Lives

In a series of accidents, all happening on Friday of last week, no one was injured, but four cars and two pick-ups received from light to heavy damage.

The first accident occurred at the intersection of Main and Missouri. Carl Nelson was traveling north on Main and E. B. Barnes (colored) was on Main going south. Barnes was attempting to turn east on Missouri, when his 1940 Ford rammed into the left front fender of the Nelson 1951 Ford. Little damage was done to either vehicle.

The second accident happened on the "Y", southwest of town. J. E. Jones, driving a 1950 model Ford, was crossing the Matador highway after stopping and was entering South 3rd, when a 1941 Ford driven by R. N. Wallace, going east, hit the side of the Jones car. Estimated damage was not available.

In the third collision, heavy damage was done to the 1954 Chevrolet driven by Walter O. Wossum of Lubbock, when the Ford pick-up driven by Larry White, son of Mrs. Jack Lackey, plowed into the left side of the Wossum vehicle.

The accident happened at the intersection of Main and Houston. Wossum was driving east on Houston and Larry was crossing the intersection, going south.

Reports this week on Mrs. Flynn Thagard, who is in an Austin hospital, are that she is not improved. Mr. and Mrs. Clyde Harmon returned home last Wednesday from Austin, where they had been at the bedside of Mrs. Thagard.

News of Harmony

(By Mrs. Mather Carr)

HARMONY, October 11—Several from this community attended the funeral of Weldon Boyd Monday at the Main Street Church of Christ at Petersburg. Weldon was killed in a jeep accident near Roy New Mexico, on Friday, October 1.

Robert Krebs, son of Rev. and Mrs. Horace Krebs, who was operated on October 4 for ruptured appendix, is not doing so well, was the report given Sunday afternoon by his father. We do hope and pray that Robert will soon recover. Rev. Krebs was unable to attend the devotional Wednesday night and the church did not have services Sunday night due to the illness of his son. Mrs. R. G. Morris was in charge of the devotional Wednesday night.

Mrs. Wes Carpenter made several business trips to Plainview last week. On Monday, she was in Amarillo, also on business.

Mr. and Mrs. Glen Pool were visitors at Boys Ranch Wednesday. H. A. Krause isn't well this week. He was unable to attend church Sunday.

We had a little shower Wednesday, four-tenths of an inch fell. Due to the foggy and cloudy weather, farmers have been kept from their maize and cotton fields.

Mr. and Mrs. E. W. Turner left Thursday for Arkansas where they will spend a vacation.

Tragedy struck close again late Saturday, when Joe Mack Dunn, son of Mr. and Mrs. Joe Dunn, was killed instantly when his car went out of control and hit a culvert between Sandhill and Barwise. Joe Mack was a cousin to Chloma Williams.

Mr. and Mrs. Max Brady of Lubbock and Francis Graham of Petersburg spent Saturday night in the Wes Carpenter home. Mrs. Brady visited her people Saturday night and they all attended a family reunion of the Brady family in Plainview Sunday.

Steve Trowbridge, Sherry and Melba Jo Ramsey, Charles Mather and Bill Carr, Mr. and Mrs. Chloma Williams and Lajuana Sue were in the Mather Carr home Sunday afternoon.

Mr. and Mrs. Sherwood Ramsey and children were dinner guests in the M. D. Ramsey home.

As One Hayseed Sed

(By Larry Glassmoyer)

Well, hello again, because here I am with another up to date report on the Floydada Ag chapter.

I do hope you have been reading our column because there has been something in each that I think would interest you.

The last week and the one before, have really been busy ones, because of the six-weeks test and the homecoming. Speaking of homecoming we want to extend our appreciation to those who showed up at the get-together of the present and ex-aggies. Real swell, wasn't it?

Well, the past week two boys from the chapter have been in Kansas City at the National PFA convention. These boys were chosen from the chapter because they met the certain requirements such as grades, attendance, etc. The two boys were Elton Turner and Johnny West. I haven't had a chance to interview them since their return trip but will bring you up to date on the event next week. I'm sure they had a wonderful time.

In last week's column I said the results of the chapter sweetheart vote would be announced this week, but the chapter has not decided yet, although I can give you the nominees. They are Darlene Bryant, Fontaine Fowler and Linda Clark. Who ever the sweetheart is, she will receive a wonderful honor.

In closing my column, let me remind you to look for a better and more interesting write-up in the coming weeks. My thanks to you for reading this.

MOTHER OF MRS. GLOYNA PASSES AT VERNON HOME

Don't Put Off Defrosting Of Home Freezer

COLLEGE STATION, October—When your home food freezer needs defrosting, don't put the big job off. A clean box actually leads to more economical operation and longer life of the unit.

It's difficult to set up a regular schedule so defrost when the size of the box become frosted with one-half inch of ice or more, says Roy W. Snyder, extension meat specialist.

Snyder explains that ice acts as a blanket over the refrigerating coils. The heavier coating, the longer the machinery must run to produce a zero degree temperature, the best temperature for keeping frozen meats, vegetables or fruits.

With the contents of the freezer supply is low. During hot weather, defrost in the early morning, the specialist says. Take care not to let the food stuffs begin to thaw. This will lower their quality.

Two corrugated boxes placed one in the other with the outer box packed with newspapers for insulation will keep foods several hours. A wool blanket spread over the boxes gives even more ideal holding conditions.

When the contents of the freezer removed, disconnect the electricity and open the door or lid. On warm days the ice will melt quickly, but an electric fan blowing into the box will speed up the process. Use only water from the faucet for cleaning a defrosted freezer, never warm or hot water.

When the frost is melted, clean, dry the box, start the motor, allow the freezer to cool about an hour, replace the food and the job is done, Snyder says.

Winds Fall Before Abernathy in Comedy of Errors

Antelopes Tie It Up
The game quickly went back to tie the game Jimmy Lewis charged through into the Wind backfield to take a hand-off from Walker which no one else seemed to want, and went 38 yards to pay dirt before anyone could stop him. Lawrence Barron's kick was blocked and the score was tied 6 - 6.

In the second period Abernathy hit pay dirt twice. The first score started from a fumble they recovered on their 40 yard line and was climaxed by an 18-yard gallop by Roy Sons who carried over the double stripe. Barron kicked the point after. The next counter was somewhat easier when they recovered Stephen's fumble on the Floydada 15 and covered the distance in one play when Freddy Apperson hit Mannie Connell with a perfect strike for the counter. Barron kicked again and the score Abernathy 20 - Floydada 6.

Drive Shows Class
Opening the third quarter Abernathy tried an on-sides kick which Carmack handled nicely on the "Winds 45. From this point Floydada put on the only drive of the game which showed much class as

they drove in to the Abernathy 20 where J. E. Waller passed to Jack Womack for the remaining distance. Joiner made the kick good and brought the score to 13 - 20.

Before the period ended Floydada drove in to the Antelope 8 on another occasion but ran out of gas at that point to end the threat.

Almost the entire fourth quarter was played on the Abernathy end of the field, but the hapless "Winds could not muster a single scoring thrust. On one occasion the drive carried to the Antelope 4 where Covington fumbled and Abernathy recovered. The next drive carried to the Abernathy 10 and this time Stephens fumbled to end the threat. On the third attempt Barron intercepted a hastily thrown pass on the Antelope 25 to take over at that point, and on the final attempt battling against time the "Winds missed a fourth down pass try on the Antelope 10 to see the ball go over on downs. The game ended two plays later with the 13 - 20 still on the score board.

15 Downs To 11
In the statistics it was 11 first downs for Floydada and 15 for the Antelopes. Net yards rushing was 181 for Floydada and 199 for Abernathy. Penalties were 40 yards for the "Winds and 45 for the "Lopes. Passing yardage showed 84 for Floydada and 48 for Abernathy.

In the fumbleless department it was nip and tuck with the "Winds losing the ball five times on a fumble and once on an interception while the Antelopes went them 2 better losing the pig hide seven times on bobbles.

Making recoveries for Floydada were Vickers with 4 and Norman Carmack and Henry with one each. Individual yardage gained at rushing showed Roy Sons of Abernathy in the lead with 95 yards net on 16 runs. Jackie Jarrett led the "Winds with 77 net on 12 tries.

On the stop-em side Antelope guard Dale Powell was credited with 11 tackles while three team mates Monk at tackle, Wolf at end, and Manley at center made 7 each. For the "Winds Rucker led the parade with 10, followed by Carmack with 8, Henry, and Crawford with 6 each.

MULESHOE IS LONE DISTRICT 2AA WINNER

Last week lowly district 2AA salvaged but a single victory in inter-sectional play and that at the expense of class A New Deal which fell before the Muleshoe Mules. Leaders Olton and Floydada both fell before district 5AA opponents, Spur and Abernathy, who had little respect for the highly rated ball clubs. Tulia suffered another defeat at the hands of Childress, but is continuing to improve. Tulia has played one of the roughest schedules in the circuit.

Jane Wyman Stars in Capada Feature

Jane Wyman calls herself "the girl who was discovered 25 pictures after becoming a star." The Academy Award winning actress, co-starred with Rock Hudson and Barbara Rush in Universal-International's Technicolor production of Lloyd C. Douglas' "Magnificent Obsession" which opens Sunday at the Capada Drive In theatre, today ranks among Hollywood's ten top favorites. But she had to play a series of wisecracking roles before she could affect the stoutest hearts with her exceptional emotional range.

Magnificent Obsession, billed as the story of woman's need for a man is considered an all time great by most critics and is scheduled to run Sunday through Wednesday, October 17, 18, 19 and 20. Doyle Mount at the Capada marks the film as a picture of the month. One, local movie goers will not want to miss.

VIEWS AND COMMENT

A Propaganda Sheet. This newspaper is a sort of a propaganda sheet. We go for those who are trying to do something, especially those who do whether they can or not. At the moment we'd like to say how we appreciate the oil people—refiners, distributors, retailers, and all the allied folk, like the garage people, the automobile dealers, the accessory men, who dish petroleum out as liquid gas. How big they are in the lives of our community! What they mean to us in convenience, how vitally necessary they are to our present way of life. We hand them all the bouquets that ordinary words can possibly convey. They work for us and they work hard. If they complain they keep it to themselves. They are geared to us, too, and must have our patronage to survive. They make up such a big component of the community which is so much taken for granted. Also, they make about as good customers as you could ask for. Why not plug for a guy like that!

All too often, the oil industry is thought of as a group of perhaps a dozen or more companies. The Oil Industry Information Committee knocked this myth on the head not too long ago by making an actual count of the number of businesses engaged in petroleum; and it used only accredited government figures for its tallying. This count showed there were more than 42,000 oil companies, ranging all the way from one-man firms to multi-million dollar organizations. That there are so many of them is proof in itself of the competitive claim for how could it be otherwise in this land of ours, where any enterprising man or company can set up shop and challenge the field?

As to the service, what better example can we cite than the service stations and L-P gas jobbers who take care of our cars and stations in particular do an outstanding job, for in addition to filling our tanks and handling lubrication jobs, the busy attendants wipe our windshields, check our tires and batteries, make minor mechanical adjustments, give us reports on highway and route conditions, free road maps, and innumerable other things—all with a smile, because it's part of the job to keep ahead of the competition.

Love Thy Neighbor! Also, we wonder why our people do not take to CROP better than they do. We mean farmers in particular and people in general. CROP is another enterprise we go for. Different in nature altogether to the oil folks we boost but a combination of helping others while you help yourself that seems unbeatable. The Christian Rural Overseas Program is the full name. Give to it and you multiply yourself by 20. Because the government's bins are bursting at the seams and the Christian rural people are making such a good job of distribution at the other end of the line, it has been worked out that the government gives of its surplus—only 20 times as much as you give. And while the government thus works

through the people of the various and sundry religious beliefs it helps to remove the surplus of grains and cotton fibers that have a tendency to hurt the markets the accumulation was intended to help. Every bin or warehouse emptied and put on the backs or in the stomachs of the hungry of the world takes another argument out of the mouths of those who look askance at the policy of supporting the farm markets. So that if you give to others in this way you also help yourself. And you know that somebody across the seas who is Christian in belief is doing for you what you cannot do for yourself, what the government can't do, distributing your gifts. The government must make its moves in channels, officially. Your Christian overseas people do in the name of sweet charity from the hearts of the American people. Great thing. How better to do missionary work?

A Small Matter. The Hesperian is noted for an aptitude to pick on the gov'mint folks. So you can discount the things we say, crediting them to pique. But it happens so regularly and so often we doubt you'll blame us for calling attention to the most recent: Here we have on October 10 a "release" (gov'mint folks don't give you a piece of news, a yarn or whatever, it must be a release) relating something that is going to happen on October 4. It is a story that would have fitted into our plans nicely had we received it two weeks ago—September 27. But that's pretty good for the gov'mint—only two weeks late. We have had "releases" two months late. In fact, we are waiting for one now that is overdue three months. You be patient. We'll get it and probably put it in print—after changing the tense. It will be history instead of news. But country newspapers do things like that all the time—to the horror and disgust of the city brethren.

We'd Not Vote to censure Mr. McCarthy, though we are glad he has had to take some of his own medicine. We have not thought, nor do we think that you can handle the type of investigation he was making, and at the same time use white cotton gloves with lace trim. We do think, however, the senator was far wrong in his attitude toward most of his witnesses. He was playing into the Communists' hands when he used his committee to foster his own ego and make himself into Mr. Big in the eyes of the nation. He was discrediting by inference his own president and party leader. He was doing a job that needed to be done but doing it for Mr. McCarthy, not for his country. Or so it seems to us. After we say all of that we would not also say censure him officially. We'd not like to give the army brass that much satisfaction. After they explain how a known Communist can be elevated in rank when he is separated from the service and given an honorable discharge we'd take up the matter of censuring the senator from Wisconsin.

ANIMAL LOSSES
 Chickens and pullets, pigs and shoats, are the average losses that the average farmer annually loses. The knowledge and practice of good feeding and management programs will help reduce these losses. High production per hen, per cow and per sow is no longer a goal in Texas—it is a necessity if you intend to make money farming.

Petroleum Power Adds Greatly To Farmers Producing Ability

With one-third less manpower than they had 15 years ago, U. S. farmers are now producing 41 per cent more than they did before the war—and all from the same amount of cropland.

One of the principal reasons for this vast increase in output is the abundance of petroleum for power and chemicals, and the wise use of both by the men who keep America's food basket filled to the brim.

A good illustration of what petroleum means to farmers is this comment from the U. S. Department of Agriculture:

"With tractors and modern machines and equipment, it now takes about six hours of man-labor in the central corn belt to grow and harvest an acre of corn for grain.

"This is only 40 per cent of the labor needed to grow and harvest the same acre with horse-drawn machines and equipment, and hand-harvesting. In other words, power farming is a 60 per cent saving in man-hours and energy.

"When corn was harvested by hand from the standing stalk, it required as much labor for this one job as is now used for all pre-harvest and harvest work with tractors and adapted equipment."

Modern Efficiency
So efficient is modern farming that one farmer can produce enough now for himself and 17 other persons. This, too, represents a marked increase, because in the old days of horse-drawn equipment the farmer

had his hands full producing enough for himself and five other persons.

The amount of mechanical horsepower being used by modern farmers is staggering. All told, it is in excess of 750 million horsepower. That is more than all other American industries combined, according to the USDA.

Last year, farm trucks, automobiles and tractors accounted for 178 million barrels of liquid petroleum and petro-chemicals used up another 75 million gallons of petroleum fractions for solvents and bases alone.

As A Farm Woman Thinks

A MISER IN AUTUMN

(By Mary Dean Waters)

A miser am I when cold winds blow

As they shriek and cry of the coming snow.

I hurry without and gather flowers.

That I may keep them a few fleeting hours.

I gather pink roses and leave not a one.

Cut spicy marigolds shining as the sun.

Soft velvet dahlias as gay as red wine.

Gather bright blossoms from each bush and vine.

And then my home glows with rainbows of light.

I gloat over my treasures while dark the night.

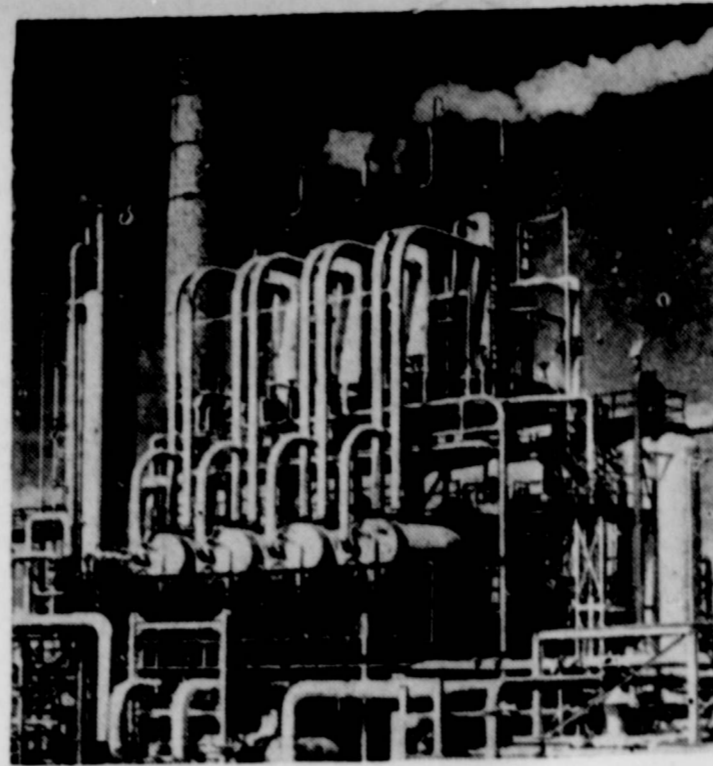

A miser am I as autumn must leave.

So I grant my blossoms a short reprieve.

Mary Dean Waters expressed my views in her lovely poem. I go from bush to bush, now that the long hot dry days are gone, cutting flowers here and there hugging the beauty of each different kind.

The big purple dahlias, the small white ones growing by the tiny yellow.

At my rest time I piece my quilt, making purple flowers that hold the beauty of the outside dahlias. Some of my blocks are soft pink, as the Radiance and Doctor roses. The gold of the lantana, I piece away and find peace and comfort.

Night and day, refineries work unceasingly to keep the American people supplied with petroleum products. This is a hydrogenation unit which converts light naphthas into high grade base stock for high octane gasolines, for your driving pleasure.

Quilt making is one of the most picturesque of all American arts. The women of yesterday used basic designs. There is a living reason for all that human fingers create. We see the women of early America as they piece by candle light, in high back chairs that cut off the chilly draft a little. We see women in log cabins, patiently sewing together the precious scraps left from their materials which were very scarce. These women had names for their quilts. As they polished their pewter and brass, women in powdered wigs covered with a mob cap. These andirons and spoons they did not make. Men ruled. All personal and real property belonged to the men, even the bride's dowry. Men laid down the law. Girls were warned by parents to marry a good provider.

But in needlework the women had full sway. They saved scraps of goods that came from far over the sea, every finger wrapping was brought from Europe in sailing vessels, even the scraps were worth as much as the equivalent itself. Then the crazy pattern came to save all. In 1870, no woman that took pride in her home did not have one of these quilts. They made them elegant with featherstitching. Every little girl was taught this art the first thing, the art of quilt-making. Women exchanged pieces from their scrap bags. Quilting bees became a social activity, seven wo-

men invited. Betrothals were announced at the quiltings. Every bride had a baker's dozen in her dowry chest, twelve for every day, the thirteenth a piece of elegance, elaborate in quilting and design, only the best quilts invited to this quilting occasion.

Then the scraps were more plentiful. Names of the quilts are very intriguing—winged square—Golden Gates—in 1850 Wheel of Fortune—in 1860 Road to California—Young Man's Fancy—Dolly Madison's Star—Drunkard's Path—Bear's Paw—Ducks In The Mud—Robbing Peter to Pay Paul—Hand of Friendship—how these names fascinate us. They cut their patterns from old letters, paper was scarce.

"If you don't have to work to feed your body" was said, "work to feed your soul." I find this is still true. Women must do something to feed their souls as well as to make comforts of quilts.

No bride would have the patterns. Wanderfoot—Turkey Track—her husband would have a wandering foot, was her superstition.

Pineapple was the domestic emblem of hospitality. These are some of the fabrics the women had scraps of—fine cambrie—India chincies—very fine imported from India—printed linens, Scotch cloths—German Duck—White and colored dimities—Flowered and plain Fustians—seersucker-

bird's-eye-peacock-flowered calicoes—and many more.

Greece, India and China made patchwork centuries before Christ. What a fascinating history of this art. I think of all of this as I sit and sew each short seam with patience and even love. I feed my soul as I sit quietly and rest.

Ralls lost three fine citizens last week. Shocked and sorrowful its citizens are over their loss.

Butler Adams was part of the history of Crosby County. He came when a young man and worked on the Z-L Ranch owned by Major Buck Watts. He married and reared his family of fine children in this community. He went quietly about doing his work well. Crosby County is a better place because of the faithfulness and taking part in the better things of men like these three. For the families of the Adams' and McHams are these lines. I hope they will be like beautiful flowers of living faith:

I Have Faith

I have faith that God will keep His own
Thru' these dark days. And they who wait
In quiet, humble faith before His throne
Will find new strength, and soon or late,
Will triumph over fear and the sharp pain
Of loneliness. And when the storm has passed,
They shall be stronger as the trees bent by rain
Lift strengthened arms to meet the sun at last.

● Reports from behind the Iron Curtain say that there are only 5 "service" stations for all of Moscow's 5 million inhabitants. And even at these few filling stations, service is non-existent and gasoline is rationed. That's what you can expect when all industry is controlled by the state and there is no competition for the motorist's business.

Compare this with the kind of service

OIL IS AT YOUR SERVICE

Oil and natural gas supply power for industries.
 Cars burn gasoline, use tires of synthetic rubber.
 Homes are heated by oil or gas-burning furnaces.
 Printing inks, paints and plastics are petroleum derivatives.
 Natural gas is the fuel for millions of kitchen stoves.
 Oil powers the U.S. transportation system.
 Petroleum fuels the machines of national defense.
 Synthetic fabrics are made from petroleum hydrocarbons.
 Detergents and a hundred other items of daily use are derived from petroleum hydrocarbons.
 Schools are substantially supported by oil industry taxes.

THE products of the petroleum industry are literally everywhere. Every hour of the day, oil or natural gas serves you and virtually every other American. Oil is indispensable to our way of life; it makes the United States a better, safer country to live in.

You may wake in the morning in a room warmed by a furnace burning fuel oil or natural gas.

You drive to work, and your car burns gasoline, uses petroleum oils and greases for lubricants, rolls on tires of synthetic rubber which had their beginning in an oil refinery.

The plant where you work may depend on oil or natural gas as the source of its power. The oil and gas industry supplies 65% of the nation's energy requirements.

Meanwhile, if you live in Texas, your children are attending schools to the support of which the oil industry pays heavy production and ad valorem taxes. And your U. S. Army, Navy and Air Force plan the national defense with confidence that the oil industry has developed the proven reserves that can fuel their machines of war. Oil also supplies munitions — TNT for instance.

Finally, the lady of the house may prepare dinner on a stove fueled with natural gas, and you may go to bed in pajamas laundered with a petroleum detergent, after reading a newspaper printed with ink made from oil, in a room decorated with a paint manufactured from petroleum.

... And that's only a beginning.

The products of the petroleum industry, oil and natural gas, head the list of our most useful resources. A progressive, competitive oil industry, encouraged in the future as in the past, will undertake the further development that will keep them there.

Exes of Floydada High Recall Other Days, Events of School

More than 100 ex-students registered Friday for the homecoming events at the Floydada high school, dimmed only by the Abernathy Antelopes upsetting the Floydada Whirlwinds.

Miss Betty Blum, daughter of Mr. and Mrs. L. H. Blum, was crowned Homecoming queen by co-captains of the football squad, Princesses were Christine Brinta, Darlene Bryant and Gerry Graves. Mrs. Fannie Green of Center community was recognized as student from the earliest class present. She enrolled in 1907.

The class of 1930 had the largest number of ex-students represented. Two of the exes were Oliver Allen and Walter Newell. Both men spoke at the Quarterback club meeting at 3 o'clock at which G. E. Mayo, president, presided.

The club and present coaches entertained the ex-coaches and players. Past coaches present were L. T. Barksdale of Dallas, J. C. Wester and L. F. Oresham of Floydada.

After the welcome was given by Superintendent I. T. Graves, Kenneth Rimmer gave a history of the Whirlwinds back to 1912.

Mr. Allen recalled playing football here in 1908 and Mr. Newell told of playing in the first exhibition game ever held here, which was in 1911.

A gala affair was held in the Vernon Witkowski home when the present sponsors and cheerleaders entertained the ex-cheerleaders and sponsors of the days before. High light of this gathering was the talk given by the first cheerleaders, Mrs. Jack Rosson and Mrs. Jack Henry, both from classes of 1918-19. The two ladies discussed the differences in to-days uniforms and those of yester years. Representing the 1930-31 class were Mrs. Doyle Oswald and Mrs. Helen Hays Holt. Mrs. Blanch Hilton Grundy, class of 31-32 and Mrs. Wanda Terry, class of 32-33. Approximately 22 exes were present.

Plenty Excitement But Little Blaze

A gasoline fire at Camp Copes Sunday afternoon caused little damage but lots of excitement when a Consumers truck was pumping gas into an underground tank.

The blaze started from an undetermined origin. Quick thinking of the owner, Mr. Copeland, probably saved the entire place and truck from blowing up.

Mr. Copeland said that advice from a fellow a few days ago proved worthwhile when he told him in case of fire while pumping gas, never turn the pump motor off, to keep it running. This, Mr. Copeland said, keeps the fumes out of the tank.

Volunteers had the blaze under control before firemen arrived.

BOLLMAN FAMILY GATHERS

Mrs. Lucy Bollman visited last week in Lockney with a son, Henry Bollman and family. Other visitors were Mr. and Mrs. Hamilton Jarman and son, Charles, of Denver, Colorado.

Mrs. Morris Graham and daughter of Petersburg and Otis Jarman of Denver, Colorado, were among the other visitors. Mr. Jarman is a brother of Mrs. Lucy Bollman. It had been 21 years since the two had been together.

LIBRARY NEWS

(By Ivy Pearl Reber)

"When God says 'No': Faith's Starting Point" is the title of a new book on our library shelves this week. This is the autobiography of a Congregational minister, and a very unusual one because she's a woman, wife and a mother. The story is vital, warm, and inspiring. "The Know-It-All Years", "Sin, Salvation, and a Sense of Humor", "Some of the chapter headings are "Everybody's Clothesline Breaks", and "Faith Is What You Go On When You Don't Know". Recent additions to the best-seller table are "I'll Cry Tomorrow", "Call to Greatness", "McCarthy and the Communists," and "The Roosevelt Family of Sagamore Hill." Other

new books include "Me and My Russian Wife," "Man Against Nature," and "our Everest Adventure." Halloween is coming, and our game and party books are much in demand. Magazines, too, offer ideas and plans for the occasion. They offer suggestions, favors, refreshments, as well as games to be played.

The 1929 Study club has given a book in memory of G. D. McKibben. Bobby McGuire and Mr. and Mrs. Q. D. Williams and family gave books in memory of Ed Holmes.

With what ten books would you most like to be stranded on a desert island? Is it hard to decide? Be thinking about it, and we'll discuss it more next week. Right now I have to find some Halloween games to send to Norfolk, Virginia. Did you know our library has influence that far away?

The First!

Phillips 66 brings you the first All-Weather Motor Oil which has proved it meets the most exacting standard ever established for automobile lubrication . . .

Mil-0-2104, Supplement I level.

The toughest standard ever set up for automobile lubrication is the Mil-0-2104 Supplement I test. New TROP-ARTIC is the first all-weather motor oil to meet the requirements of this test. It is an oil which will serve you winter and summer. . . an oil so good it can double the life of an automobile engine!

Compared to ordinary motor oils, new TROP-ARTIC reduces ring wear 40% or more. It cuts oil consumption 15% to 45%. It keeps pistons and bearings cleaner . . . longer-lasting. It saves you money by increasing gasoline mileage. This has been demonstrated in tests representing over 150,000 miles of driving.

TROP-ARTIC is truly an all-weather oil . . . S.A.E. 10W through S.A.E. 30. Therefore it flows instantly for easy starting at sub-zero temperatures, and yet it retains the film strength necessary to prevent engine wear under high temperature driving conditions. It isn't just heavy duty. It's double duty.

Any car, in any climate, at any time of the year will perform better with Phillips 66 TROP-ARTIC. It is a worthy companion product to Phillips 66 FLITE-FUEL, the new high performance gasoline recently introduced by Phillips. It pays to stop at the station where you see the Phillips 66 Shield.
