THE VERSIONS OF THE BIBLE

Last week in discussing "The Writing of the Bible" mention was made of a change in the language of the Jews. After Alexander the Great had conquered the world, the Jews under his rule had to speak the Greek language, and it was necessary to give them the law in Greek. This version was made in Alexandria, the work of seventy Jewish scholars, six taken from each tribe. They were divided and placed in individual cells and when their translations were compared the results were so identical that some even thought that these men were inspired. This version was used by the Jews during the time of Christ, and all quotations in the New Testament were from the Septuagint.

COGITATIONS and APHORISMS of Jodok

I had the very great pleasure of listening in on George Young's radio program, "A Trip down Panhandle Main Street," Sunday morning, and must say that I truly enjoyed it throughout.

His program, as I understand Mr. Young, comes on each Sunday morning from 8 to 8:30 o'clock, and, as I understand it, Mr. Young has as his guest during these programs, some editor or newspaper publisher, who represents, as he says, the "home-town" newspapers of the Panhandle area; but on this occasion, Sunday morning, instead of having an editor he had quite a number of young people, of whom various high schools and colleges of this Panhandle area, who are members of the Panhandle High School Press Association, and who had been attending the annual convention of the Association at Canyon.

These young people—mostly young ladies, editors or assistant editors of the high schools and colleges which they represented. And Mr. Young called them one at a time to the microphone and asked them a number of questions, including their names, the schools from which they came, their part in the editorial work of their respective papers, and their liking for newspaper work.

It was surprising how many were delighted with the work and how many of them were planning to make newspaper work or journalism their life profession. And as they responded, one after another, it at first occurred to me that a large percent of our high school and college students were planning to enter the field of journalism when they graduate from college. But my later cogitations on the matter, however, were different.

Through Grade School in One Year

It took 14-year-old Nicholas Catranis (right) just one year to catch up with his grade school work—all eight grades of it! He's shown receiving the American Legion Medal for Scholastic Achievement from Edward Clamsage (left) for progressing from the first through the eighth grade at Chicago's Alcott School in one year. The war straddled him in Greece for eight years. Mr. and Mrs. Theodore Catranis, his parents, look on.

Parmer County Water Users to Hold Annual Meeting Saturday

There will be an annual meeting of the Parmer County Water Users Conservation Association held in the Grade School auditorium at Friona on Saturday afternoon, March 27th. At this meeting there will be two new directors elected, and matters concerning what has taken place during the past two years will be discussed. There will, also, be a discussion as to what we want passed by the legislature and the matter decided.

At this time there seems that there will be some sort of legislation passed on water control this year, and we want to get in on the ground floor and get this passed as we think it should be. This will be a very important meeting. All members of the association and others who are interested in the matter of water control, are urged to attend this meeting.

Friona Business Men Organize Chamber of Commerce Monday

The Friona Chamber of Commerce was revived and re-organized at a meeting in Friona Monday night when Fred Phelps, secretary-manager of the Portales (New Mexico) Chamber of Commerce addressed a group of Friona business men.

A temporary board of directors was formed with W. L. Edelman as chairman. Members are Nelson Welch, C. W. Wilkison, Dan Ethridge, C. W. Dixon, Hoyt Smith, Weldon Dickson, Otho Whitefield, and Ray Landrum.

A study of a "good roads" program featured the Monday night meeting. Parmer County Commissioner Bill Pippitt called attention to the possibility of additional hard-surfaced roads for Parmer county.

Visitors present included Sam Aldridge and Walter Sykes from Fairview, and W. O. Cherry, Bedford Caldwell, and Mr. Armstrong from Baldwin.

A special meeting of the newly appointed Board of Directors will be held next Monday night, March 22, at 8 o'clock at the offices of the Santa Fe Grain Company in Friona.

The Chamber of Commerce organization will be completed at that time, and plans laid for the future work of the group.

Permanent officers and members of the Board of Directors will be elected at a meeting of the membership campaign formulated.

Names were decorated on the Hostesses "Friendship" quilt, and dresses were hemmed during the afternoon.

The next club meeting will be in the home of Mrs. Julia Fairchild. It will be an all-day meeting of the club membership now consists of fourteen members.

Names were decorated on the Hostesses "Friendship" quilt, and dresses were hemmed during the afternoon.

WAILS FROM THE "WAILING WALL"

It has seemed rather incumbent on us for the past several weeks to enter just such a column as this when all the city's rubbish is dumped in the city's rubbish dump.

A few weeks ago one of our business men stopped us on the street and said: "Uncle John I wish you would mention something in your paper about the practice of many people of dumping their trash and all sorts of junk along the highway while it is being taken to the 'junk' ground as the place is usually called when the city's rubbish is supposed to be deposited. It is unsightly and does not speak well for our city.

And besides that it is a miserable nuisance when the county road workers are trying to grade the road leading into the city.

It seems that such a practice is a fact, and the county officials have previously had notices in the Star calling the attention of the public to this very obvious practice. It is said to be an offense against the law and punishable by fine or imprisonment if said parties are overtaken in the act or convicting evidence can be secured against them.

Now we have said it and this is "wail" No. 1.

Other parties have been in to see us complaining about the keeping and raising of hogs within the city limits in such a manner and such places as to become very offensive to their neighbors. Well, in our opinion, if there is anything that smells worse than a foul hog pen, it would be two foul hog pens. We have told these parties that we are not the city officials, and have no authority to enforce the city's ordinances. But we happen to know that there is or is to be an ordinance regulating the keeping of hogs within the city limits, and if such an ordinance is enforced as written, there will be little cause for complaining from foul hog pens. But it is not our place to enforce that or any other ordinance. True, we have not seen the city's ordinance book for many years, and that particular ordinance may have been repealed or torn out of the book. This is "wail" No. 2.

There have been complaints brought to us regarding the non-enforcement of City Ordinances, but we have failed to make particular note of them. They have been brought to our attention, but we will let them stand for "wail" No. 3.

Then, there is the obstruction which exists on the viaduct at the junction of Main Street with Highway "60", which makes it practically impossible to see a car approaching from the west. We do not know who is to blame for this, and it is none of our business, since we never drive a car, but it is a fact just the same and it makes it dangerous for any one turning south when driving onto the pavement. A driver driving his front wheels into the gutter at that point before he can see along the highway looking west, it is not quite so bad when turning east. We will let this go as "wail" No. 4.

Then there is the complaining of people driving their cars inside the High School grounds and disfiguring the grounds in their wheel tracks. In one place they have driven around in the bed where those pretty canna's have been blooming each summer for the past several years, until there is a fairly well beaten track around it, to say nothing of the disfiguring tracks to be seen in all parts of the grassy lawn. To the casual observer that looks like just pure mud, but it is a real mess, and, for there is surely plenty of room for such idle driving outside the school grounds. Yes, that is a little of our business, for it is the business of everyone in the world and the city, to see that our school grounds are not disfigured. But, again, we are not the School Board nor the City Commission, and we are not doing this with any disposition to butt in.

Then last but not least is the fact that although the Main Street crossing of the Santa Fe Railroad has been an open crossing for about 40 years, and no fatal accident had occurred there until two weeks ago when the lives of two of our good citizens were lost there, and nothing had been said about any sort of preventive appliances there are now many people deeply interested in having such preventive means placed there that will positively prevent any car from driving onto the tracks when there is a train approaching. Regardless of the fact that the railroad company has placed such warnings there as should be necessary to halt any car, the railroad people have apparently complied with the law in placing such devices there, but never-the-less a tragedy has occurred. "Wail" No. 5.

Well, we do not know just why these complaints are brought to us. Other than that we are supposed to be an agency for disseminating information.

Dinner guests in the Forest Gaines home, Sunday, were Mr. and Mrs. L. D. Pope, and family and Mr. and Mrs. Bob Wyley.

Mr. and Mrs. Jim Baxter and daughter and Mr. and Mrs. O. B. Trigg were dinner guests in the Lloyd Shuk home, Sunday.

AMERICAN LEGION TO STAGE PIE SUPPER AND BEAUTY CONTEST ON MONDAY EVENING

The American Legion is sponsoring a Pie Supper, Monday night, March 29, at 7:30 p. m., at the Grade School auditorium. The public is cordially invited to attend. Proceeds from the sale of the pies will go to the American Legion building which is now being remodeled.

Soil Conservation District Supervisors Are Elected

H. L. Black was named supervisor for sub-district 3 of the Parmer County Soil Conservation Association, at an election held at the Friona Grade School building, Tuesday, March 16. Supervisors named for Hoving district which is District No. 1, was Henry Reynolds, and the Star was not able to secure the name of the man chosen for Lazduvsky, District No. 5.

This completes the board of supervisors, with W. L. Edelman in District No. 2, the Friona District, and Oswald Jones for Farwell or District 4, the latter two having been appointed at an earlier date.

Organization of the Board will be completed at an early date, so that the writing of a program and plans for the District can be completed for work to be started in the county, beginning after July 1. "It is hoped," said Mr. Edelman when discussing the program.

Last Rites for Guadacanal Hero Are Held

Willis Parker of this city received word last week that his obsequies and homeland burial of his son, Arthur T. Parker, who fell in the battle of Guadalcanal, would be held at the National Cemetery at San Antonio on Friday of last week at 11 o'clock, and he and his family drove to San Antonio to be present at the ceremonies.

It was a graveside service and was conducted by a minister from the San Antonio Methodist Church and a Methodist Army Chaplain and was a most beautiful and effective service.

The body of the young soldier arrived in the States from Guadalcanal on February 11th, and arrived at San Antonio on February 19th, accompanied by his brother, Oscar Parker of Friona, and other relatives attending the service were Mr. and Mrs. Alton Berry, Mr. and Mrs. James Berry, Rex and Ewing Norton of Comodo; Mrs. Roy Hawkins, Oregon; Mrs. Louis Wood, San Francisco; Mrs. L. E. Truck, Aduland, Bovina; It was a military funeral with these rites performed by a military detachment from Fort San Houston, of San Antonio.

Band Concert Is Scheduled Tues. Night, March 23

The Friona High School Band is scheduled to give a concert in the Grade School auditorium on Tuesday night, March 23, at 8 o'clock. Refreshments were served by hostesses Mrs. Valeris Osborn and Mrs. Robert Seago.

Junior Music Festival To Be Held at Hereford

The Junior Music Festival, sponsored by the State and National Federation of Music Clubs will be held in Hereford, Saturday, March 20th, at 1:30 o'clock in the First Methodist Church.

Excellent judges have been provided for judging the various events and awards will be made to the entrants at the close of the performance, according to Miss Mattie Mae Swisher, Director of Junior Festivals.

Entrants from Friona will include Betty Joyce Agee, Lila Gay Buske, Phyllis Mae Buske, Katherine Dorn, Davis Jane McFarland, Joy Crow, Ardith Rolan, Wayne Jones, Joan Agee, Deann Buske, Gay Ann McFarland, Denisee Magness, Don Edwin Lewis, Sus Cranfill, Pat Cranfill, Sally Osborn, Marie White, Joyce Miller and Ed Vrl Talbott.

All who are interested are cordially invited to attend this festival.

CHAMBER OF COMMERCE DIRECTORS ATTEND CLOVIS ROAD MEETING

Messrs. J. Wilkison, Nelson Welch, Weldon Dickson, Ray Landrum and Dan Ethridge, directors of the recently organized Friona Chamber of Commerce, represented Friona at Clovis in the Highway "60" meeting, Wednesday, March 18th. The meeting was aimed at the advertising of Highway "60", as a Southern route to California.

A discussion of lateral roads from towns off the Highway was added to the advertising program.

CONGRATULATIONS

Born to Mr. and Mrs. W. E. (Bill) McClothlin, at the Memorial Hospital at Clovis, on March 10th, a daughter, Tera Gail. Weight 6 1/2 pounds.

MRS. PESCH DIED

Mrs. J. P. Pesch, of near Bovina, passed away at 1:30 o'clock Wednesday morning. She had been seriously ill for many weeks.

MRS. PESCH DIED

Mrs. J. P. Pesch, of near Bovina, passed away at 1:30 o'clock Wednesday morning. She had been seriously ill for many weeks.

IN THE BEGINNING

In the beginning God created the heavens and the earth. Then He created the editor and the liberal advisor, and prompt paying subscribers, and it was good. The next day a blizzard set in and He created a man who didn't believe in advertising and another who didn't take his home paper, then He rested. The devil then got into the mounding press, and He created the fellow who takes the paper for years, then fails to pay for it. The devil then rested, but the editor hasn't had any rest since. Contributed by J. M. McAdams.

The latter part of the above contribution does not apply to the Friona Star. Our subscribers all pay up. U. J.

COLORADO PEOPLE VISITED

Mrs. Everett Harry and two small daughters, Betty Lou and Judy, of Salida, Colorado, spent a part of last week here visiting Mrs. Harry's parents, Mr. and Mrs. C. M. Jones, and other relatives and friends. They departed for their home Saturday.

Singers leaving Friona several years ago, Mr. Harry has been employed in the post office at Salida. They recently purchased a farm near LaGrande, Oregon, and he has resigned his position with the post office, and they plan to leave Salida on March 20th, for their new home in Oregon. Their address will then be Rt. 2, LaGrande, Oregon.

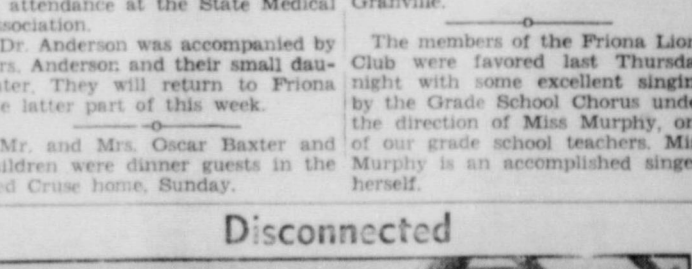

IT WAS A GOOD SHOW

A large audience gathered at the Grade School auditorium last Friday night in response to the invitation of the Parmer County Implement Company, to witness a tree show given by Granville McFarland, proprietor of the Implement Company.

It was a good show and all who attended were well repaid for their trouble in attending. Lots of innocent fun and merriment and nothing coarse or rude. Thanks, Granville.

The members of the Friona Lions Club were favored last Thursday night with some excellent singing by the Grade School Chorus under the direction of Miss Murphy, one of our grade school teachers. Miss Murphy is an accomplished singer, herself.

Disconnected

Forced off the road when two other trucks crashed head on, this truck and trailer bit off a telegraph pole before coming to a stop. The driver was not injured.

Parmer County FFA and 4-H Club Show To Be At Farwell

Parmer County's annual 4-H Club and FFA Pat Stock Show will be held at Farwell on March 20. Parmer county agent Ollie Limer announced this week.

Cattle entered in the show should be in the barn by 10 a. m. on the morning of the 20th, Limer said.

The show will be held in the Henderson Barn at Farwell. County agent Raymond King of Castro County will judge the show. Judging is slated at 1 o'clock in the afternoon.

Stock will be sold at auction

following the judging. Each boy reserves the right to reject any bids for his calves, and each boy may take his stock to the Lubbock show on March 22-23-24 if he desires, Limer said.

All interested buyers are invited to attend the show.

Plans are underway, Limer said, to hold the annual Parmer County Dairy Show in Friona on April 9.

Experiments With Long-Range Crop Rotation Planned

LUBBOCK, March 15—Texas Technological College has set aside 100 acres of land, previously used for pasture, for a long-range series of crop rotations and soil treatments, part under irrigation and part dry land, it has been announced by Dr. A. W. Young, head professor of plant industry.

A 60-foot Pacific land leveler with a nine-foot blade is now being used to level two 60-acre plots, preparatory to irrigation. This equipment is being provided in this territory for the first time, Dr. Young stated, and any person interested in renting a similar leveler will probably be able to secure further information about it from his county agricultural agent.

A 12-year period of crop rotation is planned for one of the 60-acre plots, the professor stated, with the land being planted to alfalfa, cotton, grain sorghums and small grains. The other irrigated plot will be seeded with cotton, grain sorghums, small grains and clover. Chemical tests will be run each year to determine soil fertility changes caused by the crops and by various fertilizers.

Forty acres will be farmed dry land with cotton, grain sorghums, and small grain. One portion will be fallow each year. Chemical tests will also be run on soil in this plot to determine soil fertility changes following each crop, but no fertilizer will be used on dry land.

Principal purpose of the rotations will be for class instruction, Dr. Young stated, but information derived from the work will be available to all interested persons.

He's Got Democrat Politicians Worried

Leo Isacson, the Henry Wallace-American Labor Party candidate who scored a surprising walkway victory in the special congressional election in New York's Bronx, drives home a political point as he stands before Wallace's picture in ALP headquarters. Isacson's triumph is causing Democratic politicians considerable concern. The district was considered a "sure thing."

G. S. Nelson to Make Field Trip With A&M Group

College Station, March 12—(Sp)—Approximately 45 Agricultural Engineering students at Texas A & M College will leave by automobile March 21 for a five-day trip to the Rio Grande Valley region.

Roy C. Garrett, assistant professor and S. D. Martin, instructor, both of the Agricultural Engineering Department, will be in charge of the trip. Visits will be made to the U. S.

ges. Colorado potatoes and Louisiana sweet potatoes moved in light demand at about steady prices.

The group will make headquarters at Weslaco.
G. S. Nelson of Hereford will be among the students making the trip.
Agricultural Engineering students who will graduate in June, July or August, 1948, and January, 1949, are eligible for the trip since all will have had or will take courses in irrigation methods in San Benito.

SYSTEMS REFLECT

Has your system been adapted to your business so as to furnish a comprehensive picture of each phase as well as your entire business operation? Or, has your business outgrown your system?

Your system should provide sufficient explanations without unnecessary duplication, adequate protection in handling of cash, systematic billing and collecting, timely paying to take advantage of discounts, and stock control to reflect which merchandise is low and which is overstocked.

In addition to the historical value of keeping a permanent record for tax purposes, your accounting system should clearly reflect not only the Results of Operations as a whole, but should reflect the effect of the income and expense of each source and/or department of your business.

SUFFICIENT SYSTEMS SAVE

A person to practice Public Accountancy shall hold a permit from the State Board of Public Accountancy.

MARKETS

(USDA)—Hogs and eggs furnished weak spots at mostly steady to strong southwest farm markets last week, according to the Production and Marketing Administration, U. S. Department of Agriculture.

Southwest grain markets experienced moderate up and down movements in light trading during the past week, and net gains ranged generally from one to six cents a bushel. No. 1 wheat closed Monday around \$2.54 in bulk carlots at Texas common points with No. 2 white corn \$2.95 to \$2.96, and oats \$1.43 to \$1.47.

Rice held barely steady last week, as distributors placed few orders and mills appeared unwilling to lower quotations. Sharply reduced hay offerings sold about unchanged. Feed prices varied little from a week earlier. Demand for shelled peanuts dragged. A severe break in foreign wool prices slowed southwest buying.

Steadily climbing cotton prices recovered most of the loss sustained in the sharp break last weekend. Dallas quoted spot middling 15/16 inch Monday at 33.95.

Seasonally increasing egg sales forced prices down mostly two to

Barely Walks, but She Can Skate

Casey Streeger is only 18 months old, but she's right at home on ice skates at a Chicago rink. Also enjoying the fun is Casey's mother Judy, who says Casey only recently learned to walk.

four cents a dozen during the past week. Current receipts ranged from 37 to 40 cents a dozen at most south-west markets. Poultry sold firm to stronger. Heavy hens brought 25 to 27 cents a pound at Fort Worth and Dallas, and 35 to 39 at New Orleans.

South Texas cattle markets scored gains up to \$1 a hundred for the week, while other terminals showed uneven trends with no major changes. Houston paid \$18 to \$24 for common to medium steers and yearlings Monday. Medium and good grades of shorted yearlings brought \$25 to \$26.50 at San Antonio as steers yearlings and heifers sold at \$22.50 to \$26 at Fort Worth, shorted steers \$25 to \$25.50 at Oklahoma City, and light heifers \$19 to \$24 at Wichita.

Southwest hog prices opened the week mostly 50 to 75 cents a hundred lower than a week earlier, but Texas markets paid \$22.50 to \$22.75 for good and choice medium weight butchers Monday, while Oklahoma and Kansas gave \$23 to \$24 and Denver \$24 to \$24.50. Sows ranged largely from \$17 to \$18 with San Antonio \$1 more.

Lambs sold around 50 cents higher at San Antonio and Denver for the week, but other southwest markets lost mainly 50 cents to \$1. Ewes ruled steady to strong, with best grades bringing \$11 to \$12.50. San Antonio paid \$17 for common lambs, as Fort Worth took good shorn lambs at \$19 and Denver gave \$21.25.

First shipments of Texas Ruby Red grapefruit sold readily in San Francisco at \$6.50 for 80's and larger and \$6 for 96's. Citrus fruits in the lower Rio Grande Valley continued about unchanged. South Texas carrots sold stronger and spinach firmer, and cabbage higher in unsettled trade. Denver paid higher prices for broccoli, carrots, and onions, but Texas markets paid \$22.50 to \$22.75

FRICTIONEEZE

CARBON CONTROL

USE IN MOTOR OIL AND TRACTOR FUELS

NO OTHER PRODUCT LIKE IT ON THE MARKET

Where other similar products remove carbon or keep it loose, FRICTIONEEZE slowly dissolves it so filter can pick it up; then by continuous use in oil, there will be NO MORE CARBON.

Stops Sticking Valves in 60 Seconds - - -

And if used in oil all the time, WE GUARANTEE valves will never stick again; also adds more lubrication value to motor oils, as it is made from PURE WHITE MEDICINAL TYPE MINERAL OILS. This type oil has no carbon, and has 25% MORE LUBRICATING VALUE than the best motor oil.

When added to motor fuels, it will clean tops of pistons, valves and top oil ring of all carbon or lead deposits, and provide POSITIVE TOP CYLINDER LUBRICATION. If ever used and results checked, no tractor or car owner will run his engine without it.

Sold on Money Back Guarantee - - -

If customer is not satisfied, just return the bottle . . . we ask EVERY ONE of our friends and neighbors to TRY this wonderful product at our risk. A single pint or quart will convince you—COME IN AND ASK US ABOUT IT!

NO MORE "TEAPOT DOME" SCANDALS CRIES TEXAN Price Daniel Flays Federal Tideland Control As Step Toward Nationalization of Industry

WASHINGTON, March 10.—Action by the federal government to take control of tidelands was condemned by Texas Attorney General Price Daniel here today as another step to bring about nationalization of the oil industry.

Daniel cited the coal industry in England and declared experience has taught that nationalization of natural resources results in a drop in production and critical shortages.

He branded arguments of federal officials that tidelands are needed for national defense as "double talk."

"What they are actually proposing is nothing entirely different,"

Daniel declared. "It is a cover-up for efforts of the government to take control."

He also refuted statements that federal ownership would mean greater income from tidelands as he made the closing argument in a two-week congressional hearing. Representing Texas and the national association of Attorney General, the Texas attorney general appeared before joint subcommittees of the House and Senate Judiciary Committees. The states are seeking congressional action to recognize states' ownership of sub-

merged lands.

Recommendations by the subcommittees to their main bodies are not expected for some weeks. The joint group recessed until Monday.

Also appearing on the closing day of the hearing were Senator Tom Connally of Texas and Burton K. Wheeler of Montana. Sen. Connally described the Supreme Court's decision on California tidelands as unsatisfactory because it did not decide the principal issue of ownership. He cited legal support for states' ownership.

Wheeler, attorney for applicants for federal mineral leases in California tidelands, opposed both bills—state and federal.

He labeled the federal bill vesting ownership in the federal government an "oil company" bill. This measure has been recommended by Secretary of the Interior J. A. Krug and approved by United States Attorney General Tom Clark.

Wheeler charged oil companies have been in Washington for several months conferring with Interior and Justice department officials to get a bill which would shut out the little man in the leasing of submerged land for oil development.

"It is a case of heads the oil companies win, tails the little man loses," Wheeler declared.

He also opposed the states' bill, contending that the federal government owns the land and should use authority under the present mineral leasing act for control.

Atty. Gen. Daniel cited figures to refute charges that the federal government obtains more through leasing than the state of Texas. Some 11,360 leases now in effect on about 8,512,087 acres of federal land, he said, bring in 25 cents per acre rental and 5 per cent royalty generally. The federal government got only 5 per cent or a one-twentieth royalty on one-third of the 62,000,000 barrels of oil produced from the land last year, he continued.

Texas, on the other hand, he pointed out, has a minimum rental of \$2 per acre and a minimum one-eighth royalty. Under the present method of leasing, the state is getting almost \$20 per acre, he stated.

Now pending in the Department of the Interior are 1,021 applications for mineral leases on 1,175,000 acres of tidelands in California, Texas and Louisiana.

Another rebuke was leveled by Daniel against "propaganda being brewed by the federal government to influence inland states and states which have no oil lands."

He referred to press releases by Secy. Krug stating that under the federal bill, states would receive 90 per cent of the mineral lease revenue. What Krug failed to point out, charged the Texas attorney general, was that the oil-producing states would get 37.5 per cent of the revenue and 17 reclamation states would get 52.5 per cent. Ten per cent would go into the federal treasury to administer the law.

Even in the case of the 17 reclamation states, including Texas and Oklahoma, the money would be subject to congressional appropriation, he continued.

"What the Interior Department is now collecting from oil produced from federal lands stinks compared to what the states are getting from administration of state-owned lands," Daniel declared.

Other arguments were directed against the government's proposal that the president be empowered to

One Killed, Four Injured

One child was killed and four critically injured when a truck trailer, loaded with logs hit a school bus overcrowded with 70 children, near Anniston, Ala. Two of the logs are shown smashed through windows. Bus door is splattered with blood.

Plainview Young People to Present Easter Pageant

In response to the many requests made by West Texas citizens and their whole hearted acceptance of last year's production, the Plainview Association of Christian Youth will present its third annual Easter pageant in Plainview on Sunday morning, March 28, at 5:30 in the High School football stadium.

The first years pageant drew an attendance of approximately 400 people, last years attendance was estimated to be over 5000. The success of these first two productions and the fact that the Pageant was acclaimed one of the best non-professional performances ever presented in West Texas, has prompted Plainview sponsors to anticipate an overflow attendance this year.

This year's Pageant will be much more complete than last years. The Christ will again be portrayed by Royce Peterson, a McMurry student, and the son of Rev. and Mrs. W. E. Peterson of Plainview. Royce has received wide praise and recognition for his portrayal of this difficult role.

Scenes to be portrayed in this year's production are: "The Nativity," "The Sermon on the Mount," "Christ Blesses the Little Children," "The Triumphal Entry into Jerusalem," "Christ in the Temple," "The Last Supper," "Christ's Farewell Sermon."

Inspired by the morning glory, this brocade and buckram checked suit has a taut waist, smooth hips and swirling skirt. Note the flapped pockets and flat buttons.

Learning Traffic Laws by Accident Is the Hard Way

(Eighth of a Series)
If you insist upon learning traffic laws by accidents, the best place is an intersection.

The most frequent law violation in business and residential area traffic accidents is failure to yield the right-of-way at an intersection, according to W. J. Elliott, Chief of the Texas Highway Patrol.

The Texas Highway Patrol is cooperating with a nationwide "Learn and Obey Traffic Laws" program in an effort to familiarize the public with traffic regulations and how they save lives.

Of the traffic accidents which involve two vehicles occurring at intersections, Captain Polk Try of the Amarillo District emphasized the law concerning right-of-way at stop streets. The points to remember are:

1. The octagonal sign that says "stop" means just that.
2. After stopping at the sign, you must yield the right-of-way to vehicles on the through street, unless they are far enough away that you can safely cross.
3. When you are on the through street, you must yield the right-of-way to a car which has stopped at the stop sign and then started to cross in the gap in traffic ahead of you.

From where I sit... by Joe Marsh

How to Keep 'Em Down On the Farm

The other day Pete Swanson's nephew, Bud, allowed as how he was fed up with farm and country life... and was going to the city where there was a lot more opportunity and excitement.

Some folks might have tried to stop him. But not Pete. He even advanced Bud carfare for the trip... figured that when he'd had a good look around, he'd come back where he belonged.

And what happened? After seven days of big-town bustle and excitement, Bud was back behind the

wheel of a tractor, with color in his cheeks again. And he'd traded the night life of the city for a quiet glass of beer with Dad.

From where I sit, that's how it goes. Try to prevent some one from getting what he wants—and he'll go on wanting it. But give him his head, and he'll settle for the sensible thing—whether it's country life, or a temperate glass of beer!

Joe Marsh

Houston Co-op Bank Stockholders to Hold Annual Meeting in Amarillo

A meeting of stockholders in the Houston Bank for Cooperatives will be held in Amarillo, March 29, according to an announcement from W. N. Stokes, Jr., the bank's president. The meeting will be held in the Herring Hotel and will begin at 9:00 a. m. Directors, managers and interested members of farmers' cooperatives are invited to attend the meeting.

"There are 69 of these farmers' business organizations in the Panhandle counties," Stokes said. "Among this number are some of the most successful farmers' cooperatives in the state. Of the total number, cooperatives purchasing farm supplies for their members lead in numbers with 27. There are 26 grain cooperatives, 9 cooperatives gin associations and 8 other organizations providing a variety of services for their members.

"The stockholders in the Houston Bank for Cooperatives are these business organizations of farmers and ranchmen. Few farmers operate on a scale large enough to justify individual ownership of a grain elevator or a cotton gin. Such facilities as are needed to furnish these off-the-farm services can be owned cooperatively by 100 or 200 farmers," Stokes pointed out. "These cooperatives have played an important part in the farmers' job of feeding and clothing the people of America and millions of less fortunate people in other lands."

Politics, Says Folsom

Questioned by Washington reporters about a paternity suit filed against him, Alabama's Gov. James E. Folsom just gave them this dry wink and said "I'm in a political campaign." At Cullman, Ala., a suit is on file in the name of Christine Johnston Putman, 30, accusing Folsom of being the father of her son, nearly 2 years old.

Wrong Turn

Traffic was tied up 10 hours on U. S. 30 west of La Grande, Ore., while workmen with ropes and timbers pulled this Consolidated Freightways truck back on the Grande River bridge. The driver, Reid Blacker, narrowly escaped death when the skid dangled him in the cab a hundred feet in the air.

Cottonseed Treatment Proves Good Form of Crop Insurance

COLLEGE STATION, March 12—If Texas cotton growers are wondering about the advantages of cottonseed treatment, E. A. Miller, extension agronomist of Texas A & M College, has the answers.

Cottonseed treatment is an inexpensive form of crop insurance that costs only a few cents a bushel of seed; it kills the disease germs on seed, protects seeds and seedlings from disease which may be in the soil and gives a better stand of cotton.

Texas' worst cotton seedling killers are angular leaf spot and scorch. In the Blacklands of Texas, angular leaf spot ranks next to root rot as the number one hazard in cotton production. It is found in nearly all parts of the state.

Angular leaf spot generally shows up first on the seed leaves, and if a damp spell sets in after the seedlings come up, lots of them will die unless the seed was chemically treated before planting. This disease can also destroy some of the early buds on cotton plants, and thereby may prevent growth of early fruiting branches. Result: a reduced yield.

Angular leaf spot also carries through to the older cotton plants, where it appears as angular spots on the leaves and as bacterial rot on the bolls.

The other serious cotton disease causes brown spots on the plants either below or near the ground level. While many plants may recover from scorching, they are often late in developing—again causing a reduced yield.

Cotton growers have found that seed treatment prevents much of the trouble resulting from these diseases says Miller. Furthermore, the chemical treatment of the seed also helps to produce a sturdy, vigorous seedling, which gives producers a chance for earlier and better cultivation.

At the Temple Agricultural Experiment Station, fuzzy cottonseed treated with either two or five per cent ceresan, gave 25 to 30 per cent better stands than untreated seed. The plants had one-third to one-tenth less angular leaf spot infection, and made an average of over 50 pounds more lint per acre than the untreated seed. Over long periods, experiment station tests have shown that chemically treated seed gave four-year average yield increases of 25 per cent at College Station, 10 per cent in the Brazos Bottom near College Station, 15 per cent at Temple, and 4 per cent at

Lubbock.

Results such as these show that the treatment of cottonseed is definitely a part of cotton production, says Miller. USDA leaflet 198, "Cottonseed Treatment," can be obtained at the Extension Service at College Station, or from any local county agent.

Extension Service Director to Tour Japan and China

COLLEGE STATION, March 12—Dr. Ide P. Trotter, director of the Texas Extension Service, will leave around April 1 for Japan and China, to make a survey of future demand for American cotton on the part of Asiatic countries.

Dr. Trotter was granted six months leave of absence by Texas A & M College.

The survey will be made for the USDA Office of Foreign Agricultural Relations and is one of several foreign marketing studies being carried on by USDA under the Research and Marketing Act. Dr. J. Norman Efferson, rice specialist of Louisiana State University, has already been assigned by OFAR to study markets for rice in several Far Eastern countries and in Europe.

USDA officials are reported to have asked President Gibbs Gilchrist to allow Dr. Trotter to undertake the survey because Texas has the largest stake in cotton exports to Japan and China. In prewar days 90 percent of Texas cotton was exported and the bulk of Japan's imports came from Texas. West Texas and Plains cotton is said to be especially well suited to the needs of textile mills in the Orient.

Little is known of the postwar status of Asia's textile industry or of cotton production there, and OFAR has pointed out that definite information on this export market is vital to future plans for U. S. cotton production.

Dr. Trotter will leave College Station on Monday, March 13 for Washington, D. C., where he will receive instructions on the type of information desired before going abroad. He plans to return to the United States in time to take part in the annual statewide conference of Texas county agricultural and home demonstration agents scheduled for the latter part of August.

WHERE ELSE WOULD YOU WANT TO LIVE?
Other than in the Texas Panhandle and at Friona? Answer: "Nowhere else." Then let us all get busy to make this the best city in the best community in the state by supporting and promoting our Chamber of Commerce, our Lions Club, our Schools, our Churches, our Home, our Hospital and our Home Business Institutions.

Junior Fat Stock Friona Squaws Show Opens In Lubbock Monday

The Fifteenth Annual South Plains Junior Fat Stock Show opens in Lubbock Monday morning, March 22, to continue for three days at the Panhandle South Plains Fairgrounds.

More and bigger fat steers, barrows and lambs than ever before will be competing for bigger prizes, according to Superintendent of the show, Dave Sherrill, and secretary M. D. Fanning.

Highlights of the three-day program include sifting of steers, barrows and lambs at 8 o'clock Monday morning, with judging of steers starting at 10 a. m.; judging of lambs at 3 p. m. Monday; a theatre party Monday night; judging of barrows Tuesday morning; open house Tuesday afternoon and Wednesday morning and the auction sale at 1 o'clock Wednesday afternoon.

Premium checks will be presented to the winners at a barbecue at 6:30 o'clock Tuesday night in the Judging Pavilion at Tech. The barbecue will be given for all exhibitors and their parents, county agents, vocational teachers, judges, superintendents and assistant superintendents of the civic clubs of Lubbock. Vernice Ford, general chairman of the Executive Committee for the show, will preside at the Tuesday night meeting.

Junior Fat Stock Friona Squaws Fail in Fourth Try for Crown

The Friona Squaws, perennial contenders for the state championship, reached the semi-finals last year. They have been runners-up in the state tourney, but have never won the championship crown.

Friona defeated Aledo in the opening round of play at Hillsboro.

The Friona Squaws, making their fourth try for a state basketball championship at Hillsboro last week, were balked in the quarterfinal round of the state girls tournament by a dazzling scoring spree staged by the Maydelle sextette.

Maydelle whizzed by the Friona girls last Thursday with a whopping 52-27 victory.

The Maydelle sextette was led by Letha Nell Loper, sharpshooting forward who racked up 29 points in the game.

The Friona girls were out in front all the way, and the outcome of the game was never in doubt. Maydelle let at the half 13 to 15.

Robason of the Squaws was high scorer for the losers with 10 points.

The Panhandle's other entry in the tournament, the strong Gruver girls team, was dumped also in the quarterfinal round when Stanton defeated Gruver 31-23. Leading the Stanton team to victory was a whirlwind attack on the basket by forward with a picturesque name, Betty Bizzard who accounted for 23 of her team's 31 points.

Plenty Room For All Texas War Dead At Nat'l Cemetery

All the Texas dead of the past war, returned for permanent burial, could be buried in the national cemetery at Fort Sam Houston and still leave plenty of space, officials of the American Graves Registration Division at San Antonio declared today.

The statement was prompted by recurrent rumors in various sections of South Texas that the national cemetery at Fort Sam Houston is now filled to capacity and that no more war dead can be buried there.

American Graves Registration Division officials estimate that approximately 7,000 Texans, killed during the past war, will be returned to this country for reburial. The national cemetery at Fort Sam Houston is undergoing an expansion program that will provide space for about 10,000 graves.

Better Heating

A forced-air central furnace gives you all the advantages of low-cost natural gas heating. It provides clean, constant, automatic heat, evenly distributed throughout the rooms by means of a blower. With it there is no stratification of heat, no cold floors, no cold corners. This excellent type of equipment is always vented. A basement is not necessary.

The floor furnace, while not as desirable as the forced-air central furnace, is a splendid piece of equipment, very popular in West Texas. It is always vented. When thermostatically controlled it provides fully automatic heating, clean and healthful. Suspended beneath the floor, it occupies no "in-the-room" space. Naturally it can be used only in ground-floor rooms.

Similar in operation to a floor furnace, but built into the wall rather than beneath the floor. Although relatively new, a number of these units have been installed in West Texas homes. The panel wall heater is always vented, and may be thermostatically controlled. May be used either in ground-floor rooms or second-story rooms. Dual units are available for heating adjacent rooms with one installation.
