### Texas Industrial Week

By Wendell Tooley

Although industry doesn't cloud the skies over Floydada with its factory smoke each day, there is a sizeable yearly payroll that feeds into the community's economy by several smaller industries.

This week is recognized as Industry Week in Texas and Floydada's mayor Jimmy Seay has officially proclaimed "Industry Week" in Floydada.

It has been estimated by the Floydada Chamber of Commerce that over 100 persons are employed in the following

industries: Blanco Offset Printing Inc., Bennett Building Materials, Shorty's Bakery, Hammond Sheet Metal, Ponderosa Meat Company, Russell's Shop & Equipment, Morckel Hobby Shop, Don Hardy Race Cars, Stewart Printing and Hollums Mining.

The annual payroll is estimated at over a million dollars for these industries and the service industry of United Auto Transport who operates out of Floydada.

HOLLUMS MINING  
This industry activity centers around a rock and caliche pit about five miles north of Floydada, operated by Duncan Hollums. At peak times when rock and caliche are being processed and hauled from the pit as many as 50 men are employed in operating the machinery and trucks.

### Man Injured, Lies In Car Ten Hours

Clifford Melvin Chandler, 32, year old Lubbock insurance man and son-in-law of Mr. and Mrs. C.A. Breeding, Floydada, remained under medical observation in Caprock Hospital yesterday after lying unnoticed in his wrecked vehicle some ten hours near Floydada.

The extent of his injuries, sustained in a one-car mishap at approximately 2 a.m. Wednesday, were not known at press time. Chandler, who was inside his vehicle evidently unconscious, went unnoticed until noon yesterday when the car was spotted some 50 feet east of Highway 62 in Blanco Canyon by J.W. Day Jr.

Day told investigating officer, Bud Rainey, highway patrolman, that he noticed the top of the vehicle in the dry lake bed as he was traveling north on the highway some six miles south of Floydada. Day stopped Joe Jones as he drove by after which Jones notified officials and summoned an ambulance.

"Chandler appeared to be dead at first, Jones said, but before the ambulance arrived we noticed he moved his head."

Rainey said Chandler told him upon being questioned that he had left the home of a sister, Mrs. Rex Lackey in Floydada about 1:30 a.m., enroute to his Lubbock home. He was traveling south on highway 62 in a 1969 Firebird.

The car left the highway, veered across the oncoming lane east, crossed the gravel drive of the road side park, knocked down two guard rails turned, then veered back across the highway west, knocking down a fence post and coming to a stop in the lake bed. The car was only slightly damaged, according to officials.

Rainey said Chandler was still under sedation at mid afternoon yesterday and further questioning of the injured man as to the cause of an accident, would be impossible until last night.

### Caprock Chat

By Wendell Tooley

LIKE it will be a big night at Lockney tonight as the Chamber of Commerce banquet begins at 7:30. I'll be in room for a few more, so why not take time to attend like good food and fellowship....and entertainment.

DON'T believe that putting 10¢ on a postage stamp is better to getting needed funds to keep the post office going. It seems to me that more postage charges are put on all this junk mail that fills our mail boxes, the backs of our city carriers and fills the wastebaskets of our homes and offices.

Isn't it right for us tax payers to have to subsidize junk that we simply do not want.

WRITER AND ADDING machine repairmen are getting fewer. We have a man who picks up our machines for from Lubbock. He usually comes by on Tuesdays, takes machines for repair and brings them back the following

riter and adding machine repair charges go up and up. I contacted other repairmen for a better price and there's such thing. The man at Lubbock guarantees his work, his charges are plenty high.

imes people bring in machines that aren't worth the repair, cleaning, oiling and adjusting. Consequently sorta unhappy when they pay the high cost of getting it in shape again.

ays, I wish we didn't even take office machine service seems that we have enough problems with people who happy when we misspell their name in The Hesperian, taking on the added worries of picking up, delivering, about the high cost of office machine repairs. er, we feel, this is a service the Floydada trade represents, and I suppose we'll continue to offer it.

ying to find a family now, who has moved to Lubbock, off one of our rent machines. I have another family rented a machine for five or six months and haven't rent. I offered to let them keep the machine for the was against it.

all this is to say, we want you to know that office repair is expensive, yet, we can get the job done for you, you a machine to use in the meantime, guarantee the and the service charges won't go down, until more enter this vocation.

OUGH it has been almost two years since we were in talk by Mrs. John Haenosh brought the country back memory yesterday at the Rotary luncheon.

ment Mrs. Haenosh made was really typical of the situation today. Although there is war along the borders, continue to work and go about their business with little

don't get the feeling of being in a country at war.

HINTON jokingly mentioned that one of the fishing ladders O'Pines was ready to hire Howard Drysdale as fisher. Howard seems to be able to go down there and get bass every year. Doris, Howard's wife, says it's no Howard was offered a guide job.

Howard can't be fishing now with warm weather coming and grain sorghum to plant. . .but think Doris has how to catch the big bass. . .and she might just take that

caught one over five pounds. . .so did James Hinton. the R. D. Hollis caught any big ones?

WORKING on the Floydada industry story this week reviewing Johnny Harris I learned that here's a local that really pulls people into Floydada.

## Hold Your Census 70 Questionnaire

District Manager, B. L. McCasland, reports good progress in this area of the 1970 Census of Population and Housing. Census takers started the house-to-house canvass April 1 to pick up the filled-out questionnaires distributed earlier by the Post Office. The District Manager pointed out that residents can speed up the big count by having their questionnaires filled out and ready for the census takers. This action will save time for both the householder and the census taker, the District Manager said. Answers should be made in pencil so that if a mistake is made, it can be erased. Most answers are to be made by blacking in a tiny circle beside the right answer. This makes a black dot which can be read by an electronic device at the Census Bureau, which will, in turn, speed up the processing of the information. At every fifth household, the census taker asks additional questions covering population and housing characteristics which are being asked of a 20 percent sample of the population. The District Manager emphasized that all information about individuals and their homes furnished to the Census Bureau is held in absolute confidence under Federal law. It is used only to provide summary figures such as totals, averages, and percentages. The information about individuals cannot be examined by other than census takers who are sworn to secrecy and thus cannot be used for investigation, taxation, or other purposes.

## The Missing Day In Time

Did you know that the space program was proving that what has been called "the Bible is true?" Harold G. Curtis, president of the Curtis Engine Company in Baltimore, Md., and a consultant in the space program, relates the following development:

"I think one of the most amazing things that God has for us today happened to our astronauts and space scientists at Green Belt, Md. They were checking the position of the sun, moon, planets out in space, where they had been 100 years and 1,000 years from now. We have to know this so we don't have a satellite up and have it bump something later on in its orbits. We have to lay out the whole orbit in advance of the satellite, and where the satellite will be so the whole thing will log down!

They ran the computer measurement and forth over the centuries and came to a halt. The computer stopped and put up a red signal, which meant there was something wrong either the info fed into it or with the standards as compared to the standards. I called in the service department to check it out and they said, "It's not." The IBM head of operations said, "What's wrong?" The IBM man said, "What's wrong?" Well we found there is a day missing in the elapsed time. They scratched their heads and tore their hair. There was no answer.

The religious fellow on the team said, "You know one time I was in Sunday School and they talked about the standing still." They didn't believe it but they didn't have any other answer. They said, "Show us." So he got up and went back to the book of Joshua where they found a pretty ridiculous statement for anybody who had common sense." There they found the Lord saying to Joshua, "Fear them I have delivered them into thy hands. There shall not a man of them stand before thee." Joshua was confused because he was surrounded by the enemy and if darkness fell they would

over power them.

So Joshua asked the Lord to make the sun stand still That's right! "The sun stood still and the moon stayed and hastened not to go down about a whole day!"

The space men said, "There is the missing day!" Well, they checked the computers going back into the time it was written and found it was close but not close enough. The elapsed time that was missing back in Joshua's day was 23 hours and 20 minutes - not a whole day. They read the Bible and there it said, "about (approximately) a day." JOSHUA 10: 12-13.

These little words in the Bible are important. But they were still in trouble because if you cannot account for 40 minutes you will be in trouble 1,000 years from now. Forty minutes had to be found because it can be multiplied many times over in orbits.

Well, this religious fellow also remembered somewhere in the Bible where it said the sun went backwards. The space men told him he was out of his mind. But they got out the Bible and read those words in II Kings, chapter 20, Hezekiah, on his death-bed, was visited by the prophet Isaiah who told him that he was not going to die. Hezekiah did not believe him and asked for a sign as proof.

Isalah said, "do you want the sun to go ahead ten degrees?" Hezekiah said, "It's nothing for the sun to go ahead ten degrees, but let the shadow return backward ten degrees." Isalah spoke to the Lord and the Lord brought the shadow ten degrees backward! II King 20:10-11.

Ten degrees is exactly 40 minutes! Twenty-three hours and 20 minutes in Joshua, plus 40 minutes in II Kings, make the missing 24 hours the space travelers had to log in the logbook as being the missing day in the universe! Isn't that amazing? Our God is rubbing their noses in His TRUTH!

## Census Takers Easy To Identify

Householders will not have any difficulty identifying enumerators for the 1970 Census of Population and Housing, District Manager, B.L. McCasland pointed out today. Enumerators, or census takers (most of whom are women), started making their rounds in the area on April 1 and are expected to complete their work in three to five weeks.

Each census taker will wear a red, white and blue identification card. This card bears the seal of the Department of Commerce, and the words "Census Enumerator, Official Credential" are printed across its face. It bears the census taker's signature and certifies that she is authorized to perform the duties of a census enumerator and has sworn to keep confidential all census information you provide.

Persons purporting to be census takers who do not have this identification card should be reported immediately to the local police or to the census district office.

Census takers will be further identified by the portfolio containing their supplies. The portfolio is blue and bears the legend, "1970 Census." In the portfolio, the census taker carries her supplies of report forms, maps, pencils, and other tools necessary for her work.

BY PEGGY MEDLEY

S. YEARY had a birthday one day last week. Nothing unusual about that, but what was unusual was that all the patrons at Mildred's Cafe where he lunches, sang "Happy Birthday" to him. Jean Jarrett, who is cooking while Mildred is still recuperating from a broken wrist, tipped everyone off that it was his birthday when she brought out a little cake square with one candle. Actually the day before was his birthday and Jean had his cake ready then, but wouldn't you know it, S. didn't show up. If a stranger had walked into the cafe and heard all of us singing he would have probably thought we were kooks, not so though. We just a bunch of good 'ole friendly Floydada people.

SEVERAL from this area were in Crosbyton Sunday to honor a real pioneer, Nellie Witt Spikes. I was sorry I couldn't make it, but I know Nellie didn't miss seeing my face, with all her hosts of friends there. She used to write "As A Farm Woman Thinks", a column The Hesperian used for a number of years. In fact she wrote the column for 30 years before she retired. We usually see her just once a year now, when she comes over for the county reunion.

IF you missed seeing "This Land Is Mine" Monday night, a documentary of our beautiful country, you missed the best TV special ever filmed. The characters were people who love our country, a rancher, a wrangler, a photographer, a scientist, a river boat captain, a farmer, a sculptress,

Whirlwind track star Steve Puckett set a new broad-jump record at the Amarillo Relays Friday, pacing the 'Winds to a third-place finish in the 28-team field. Mike Burk added to the scoring with a fifth-place discus throw.

Saturday's events were cancelled because of snow at Amarillo Dick Bivins Stadium, but places awarded on the basis of Friday's qualifying times gave the Whirlwinds a projected 43 points for the third-place finish.

Places awarded on the qualifying-time basis include the following: Mike Burk, third in the 880-yard dash; Steve Puckett, third in the 330-yard dash; Stan Pierce, fourth in the 440-yard dash; Joe Thurston, sixth in the mile run; mile relay team (Puckett, Kirby Pierce, Mike Moore, and S. Pierce) third place; and 440-yard relay team (Dirk Campbell, K. Pierce, Puckett, and S. Pierce) sixth place.

## Chadwick Takes On Candies Hughes Sunday

Professor Kelly Chadwick, the former Floydada school teacher - turned-professional drag racer, attempts to extend his Amarillo Dragway winning streak here Sunday in match race competition with the car which claimed this year's Gatornationals Funny Car Championship.

The Candies and Hughes Barracuda, driven by Leonard Hughes of Houma, La., will oppose Chadwick's Camaro in a best of three match race.

Hughes drove the car to overall honors at the Gatornationals at Gainsville, Fla. after fighting his way to the semifinals two weeks earlier in the Winternationals at Pomona, Calif.

Ironically, Hughes faced the other Candies and Hughes team car, driven by Larry Reyes, in the Gatornationals Final.

Chadwick's match race Camaro is unbeaten at Amarillo Dragway since 1968 and already owns a convincing victory over Gene Snow's "Rambunctious" challenger this year.

Chadwick who was girl's basketball coach at Floydada High School until 1968, currently serves as high performance consultant for Steakley Brothers Chevrolet in Dallas.

Also scheduled Sunday is the year's first open competition for the wild, 220 mile per hour Double-A fuel dragsters. More than 16 cars are already pre-entered.

## National FHA Week

By Kim Campbell  
FHA Vice President  
Rosebud Chapter

Most people look upon FHA as an organization that girls join because they're interested in cooking and sewing. This is not altogether true. Through FHA we arouse youth interest and participation in solving the world's problems. We work toward eliminating prejudices and inequalities involving differences in culture, race, and creed.

One objective of FHA would be to strengthen bonds within the family and between the family and community. FHA is a way we learn about our heritage. Not only the heritage of our nation, but the heritage of Floyd County.

Also this organization seems to provide a closer relationship between the girls themselves, and FHA and the community. We can be something different and something more. We can move on with Future Homemakers of America.

"How we live together in families and what we are taught

to live by influences the kind of people we will become. The kind of people we are, influences the kind of nation we shall have." This is not a written goal in the FHA handbook, but it is the individuals goal.

Patrick, Program; Era Cox, Reception; Inez Chitty, Registration; Lillian Hollister, tickets; Estha Zimmerman, Food; Thelma Philpott, Door; Ina Thornton, Serving; Fay Newell, Parade; Anna Frances, Float; Adella Drew, Concessions; Lou Ella Scarborough, Dance and Jo Ann Clements, Publicity.

FHA is an organization with so much to offer. It can play a part in anyone's future if he is willing to use it.

Today is the day of opportunity, yesterday is a dream, and tomorrow is a vision of hope. "We are the futurehomemakers of America. We face the future with warm courage and high hope."

parade will roll at 3 p.m. The Saturday evening's program will begin at 6 when the chuck wagon supper will be served in the large assembly room at the Agriculture Center and the program to follow. A square dance will conclude the day's activities.

All local and area people are invited to this Pioneer Round-Up to honor those pioneers who came to this country many, many years ago.

# Letters To The Editor

Mr. Tooley,  
I want to bring to the attention of the people of Floyd County that April is Cancer Control Month. This is something that should be of great concern to all of us. Cancer is no respecter of persons. It hits whoever it pleases. One out of every two families will have a personal experience with cancer this year.  
If Floyd County had an epidemic of diphtheria or polio or spinal meningitis, people would fall all over themselves trying to do something about it and to find the cause. Cancer has already reached the epidemic stage, but what are we doing about it? What can we do about it? Here are a few things we could do: Have check-ups regularly, know the 7 warning signals and be on the look-out for these, donate your time to help in the crusade. Give your money for the furtherance of research.  
Is it asking too much for the people of Floyd County to give at least 40¢, or the price of one package of cigarettes, for each member of their family?  
This month volunteers will be calling on you in order to help the fight against Cancer. Won't you be courteous to them and accept and read the literature they give you. This crusade is not only to raise money but to inform the public about cancer symptoms. Please help us and be concerned about this dreadful disease. People are being cured from cancer everyday. We have hope that even tomorrow will be the day they discover the cure for all kinds of cancer.  
I prayerfully hope you are not the next victim of cancer.  
Sincerely,  
Mrs. Max Harrison

## FLOYD PHILOSOPHER Gives Some Real Concentrated Thought To The Strike Problem

Editor's note: The Floyd Philosopher on his Johnson grass farm considers the strike situation this week.  
Dear editor:  
According to all the newspapers I've seen out here lately, everybody is in a turmoil over strikes and what to do about them, and I'll get to that later, but first I'd like to point out that things are not all bad.  
For instance, when a neighbor asked me why I wasn't at work, I told him I keep up with the news and was fully aware everything was at a standstill on account of the New York mail strike. My hands were tied.  
They were tied again when the air controllers fouled up the airplane schedules and by the time this gets into the Hesperian they may be tied by half a dozen other strikes. If I miss any, let me know.  
However I realize everybody isn't as adaptable as I am to work stoppages and I notice that the politicians across the country are attacking the problem from every angle you can manage with a speech without ever getting around to an answer.  
I have thought the problem over carefully and have a suggestion.  
Like things are now, nobody knows when the next strike will break out. Nobody knows in the morning whether his entire activities will be paralyzed by nightfall. If the airlines aren't struck, it could be the post office, the trucking industry, the railroads, the tractor companies, the public schools, the fire department, the police department, the sanitation department, newspapers, television stations, the long-skirt designers, the kindergartens, the colleges, and maybe even, right in the middle of the season, baseball itself.  
Therefore it seems to me what Congress ought to do is to establish a National Strike Week. Set aside one week out of the year, probably in the spring when the sap is rising, when everybody who's going to strike, strikes. During that week everybody ought to throw his hat in the air and quit, and the last one off the job is a rotten egg.  
Yours faithfully,  
J. A.

**YARBOROUGH NEWSLETTER**  
**A VICTORY FOR THE COLD WAR GI BILL**  
There is good news for the hundreds of thousands of Veterans of Vietnam and the Cold War in Texas, for the 7 million Veterans of the Vietnam and Cold War in the United States. We have scored a major victory for them in Congress. Congress has passed my bill to increase very substantially vocational training and educational allowances under the Cold War GI Bill.  
We won an increase of nearly 35 percent, in these allowances for Veterans going to college or taking vocational training under my Cold War GI Bill. This means a single veteran will get \$175.00 a month instead of \$130.00 — an increase of \$45.00 a month. A veteran with one dependent, in school, will get \$205.00 a month instead of the present \$155.00 a month and a veteran with two dependents will get \$230.00 a month instead of \$175.00. Under my bill, these new rates are retroactive; they will be figured from the first day of February 1970.  
The bill also includes an increase of nearly 23 percent for veterans taking vocational rehabilitation. These Veterans will get \$135.00 a month instead of the present \$110.00.  
**REMEMBER:** The Cold War GI Bill is for every veteran, who was inducted into service after February 1, 1955, and was honorably discharged after months or more service. You do not have to have been overseas to qualify for the Cold War GI Bill.  
If you are a Veteran of Vietnam or the Cold War, consider taking advantage of the opportunities offered in the Cold War GI Bill. If you know a Veteran who qualifies for the Cold War GI Bill, tell him of these new rates approved by Congress.  
It was a long hard struggle to get this Bill through Congress. There was strong opposition to these increases from some members of the House of Representatives. The President personally wrote a letter last October urging Senators to vote against this bill. The need was so great that there was not one vote cast against my Bill in the Senate when it first passed in October, 1969, by a vote of 77 to 0. It was nothing new to have to overcome strong opposition on the Cold War GI Bill. It took me 8 years to get the first Cold War GI Bill passed in 1966.  
We ask these young men to serve their country. Many risk their lives; many have lost their lives. We have placed in the Cold War GI Bill a provision making schools open to qualified widows of servicemen. It is only fair and just that we help these young men who come back after they leave military service. I am happy for our veterans that we got this bill passed.

**SCRIPTURE LESSON**  
The Lesson - Sermon to be read in all Christian Science churches on Sunday, April 12, asks the question, "Are Sin, Disease, and Death Real?"  
Answers are given from the Bible in accounts of the way Jesus healed a mentally deranged boy and a man unable to walk for thirty-eight years. His injunction, "Heal the sick, cleanse the lepers, raise the dead, cast out devils," is included in the Bible readings.  
The unreality of sin, disease, and death is explained in one of the citations from "Science and Health with Key to the Scriptures" by Mary Baker Eddy, which reads: "Since God is All, there is no room for His unlikeness. God, Spirit, alone created all, and called it good. Therefore evil, being contrary to good, is unreal, and cannot be the product of God."

**ROADS FROM PAGE 1**  
1970.  
Sam Fowler, Senior Resident Engineer of the Texas Highway Department in Floydada, explained that traffic will be routed through the construction. Fowler pointed out that adequate barricades and warning signs and signals will be prominently displayed, but motorists should be extremely cautious in the car as it will be heavily traveled by large highway construction equipment. The construction area will be zoned for a maximum speed of 45 miles per hour for the protection of motorist and workmen alike. The entire length will be patrolled to minimize inconvenience to motorists. Cooperation of the public is requested in obeying all traffic signals, warning signs and speed zones. The first work shall be the lengthening and adding of additional culverts. The work shall start at the Floyd-Briscoe County Line and continue south to Lockney. The

contract also includes the reconstruction of Erick road which begins at US 70 at a point a little over a mile east of Aiken and going south and west for a distance of 6.7 miles.  
On Monday, April 6, at the Resident Engineer's conference room a Pre-Construction meeting was held for the purpose of formulating plans and establish lines of communication between the contractor, Texas Highway Patrol, local police and news media and the Texas Highway Department with emphasis directed toward promoting greater safety to the traveling public. The meeting was well attended. Judge J. K. Holmes, W. C. Plumlee and Sheriff, Walter Hollums, represented Floyd County; Mr. Abel Anzaldua represented Lockney; Henry L. Stafford, the contractor was represented by Bob Brown, Jim Alexander and Ronnie Johnson; Bud Rainey represented Texas Highway Patrol; James Huggins represented the Floyd County Hesperian; and the Texas Highway Department was represented by

Sam A. Spence, J. W. Gooch, Martin Burkhardt, Bud Newell and Sam Fowler; also C. W. Nall, District Office and Rhea Bradley, Littlefield.  
Fowler wishes to express appreciation to all who attended the meeting and also Brown announced that Henry L. Stafford, contractor, complies with Federal Equal Employment Opportunity regulations.

**Jehovah's Witnesses Meet**  
Nearly 800 of Jehovah's Witnesses, including 35 from Plainview, will meet in assembly in Memphis, Texas this weekend, April 10-12, according to Mr. Hall, local presiding minister.  
The convention is the first of three conventions the Witnesses will hold in 1970. According to Hall, "The objects of our conventions is to equip each of Jehovah's Witnesses to use the Bible in a practical way as a help in fortifying the spiritual morale of people in our community."  
Vic Arnold, Virgil Lowery and C. W. Hall, local members of the Witnesses, have been assigned parts on the program that will include Bible talks, dramas and discussion of ministerial activities, all centered on the theme, "Sacrifices that Please God."  
Hall said that the Witnesses have enjoyed substantial increases in the last 16 months. They not only had a numerical increase of 120,905 to their ministerial ranks in a 12 month period, but during the last 4 months of 1969 added another 55,000 dedicated, baptized ministers. Several from this area plan to be baptized, according to Hall. They will participate in an ordination ceremony for new ministers that includes immersion under water.  
Another feature of the convention will be a special one hour Bible lecture on Sunday at 2 o'clock entitled "Understanding the Pressures of Our Day." It will be delivered by the main speaker, L. M. Dugan, district minister from Brooklyn, New York.

## PURCELL SPEAKS OUT Farm Coalition Lashes Nixon 'Foot Dragging'

ST. LOUIS, Mo. — A major confrontation with the Nixon administration over farm legislation was indicated Monday by a 32-group coalition which says American agriculture is in danger in losing gains already made.

Rep. Graham Purcell, D-Tex., told more than 500 National Farm Coalition members that Congress itself is fed up with what he called administration foot dragging on new farm legislation.

Purcell's statement was greeted by a standing ovation. The farm leaders, including those from the National Farmers Union, National Grange and National Farmers Organization, support bills which would liberalize and make permanent the present food and agriculture act due to expire this year.

Purcell said he will continue to press for a compromise in the House Agriculture Committee.

"Democrats and Republicans are sick and tired of trying to be nice to the administration," he

said. "And we are moving toward a confrontation that we can only hope will be effective from the farmers' standpoint."

The administration has asked a "set aside" program under which farmers would take a share of their cropland from production and be free to plant whatever they wished on the remainder.

But one of the main coalition objections is a provision to eliminate minimum price support loan guarantees which now are specified under the law for certain crops.

The coalition for the first time since it was formed about 15 months ago also took a stand on making more food available.

"Hunger must be ended," the statement said. "Food stamps must be available to all who need them in order to work toward a goal of a balanced diet for every American."

He said the American farmer has become a forgotten man, neglected by consumers, cities, Congress and the administration.

## DR. J. G. PRUITT CRITICALLY ILL

The C. L. Berry family have received news from Durango, Colo., that Dr. J. G. Pruitt, former Floydada resident, is not expected to live. Dr. Pruitt, suffering from emphysema, has been a patient in the Durango Hospital for some time. The Pruitts have made their home in Farmington, New Mexico, since moving from Floydada a number of years ago.

President Nixon has signed a bill authorizing \$172-million for continuing the community mental health centers program. He felt, however, the bill would raise false hopes in certain areas of the country.

the final outcome of the legislation.

First, there must be action by the House Agriculture Committee, then by the House itself, then by the Senate Agriculture Committee and the Senate itself. Thereafter differ-

ences between the House and Senate bills must be resolved in conference.

"There is a long road ahead," Mahon said, "but action within the next few weeks on the House version of the bill should shed some light on what the final version of the new farm law will be like."

Mahon states that the new farm program will continue to be top priority with him. He says that the Committee which he heads plans to present to the House in late May the annual appropriation bill for the finan-

cing of the USDA and all farm programs.

He feels that it is highly desirable that the bill for the new program pass the House before the appropriation measure is considered.

## Congressman Mahon Reports On Farm Legislation

Congressman George Mahon reported that the most frequent question which comes to him from Texas farmers is: Will Congress pass a bill and what will it be?

In question, Mahon said the new farm program has a vital effect not only on farmers but the entire economy. Mahon has been

working in close contact with farmers and farm groups and with members of the House Committee on Agriculture in an effort to make progress toward a new farm bill.

The House and Senate Committees on Agriculture have conducted extended hearings with officials of the Department of Agriculture and others. Some progress has been made but details of the new program

are still unpredictable. The prospect is that the House Agriculture Committee will present a bill to the House for action in April or no later than May.

Mahon says that he and many other members are continuing to strongly oppose payment limitations in the new bill but he believes that the bill presented by the House Committee for action will contain some kind of

sliding scale limitation on farm payments.

Members of the House Committee do not favor limitations but they feel that the House would reject any bill which did not contain payment limits. Officials of the Department of Agriculture are on record in favor of payment limitations.

Mahon says that a permanent bill is widely favored by farmers and that he prefers

this course but that at this time it appears that a program of three years duration is most likely.

The trend is toward a program financed at about the same general level as the present program. Many technical provisions of the bill which nonetheless affect the producers in a very direct way are being debated in the House Committee but there is no way to predict

## NEWS FOR HOMEMAKERS

by Sherry Mullin  
Floyd County H. D. Agent

When it is time to store electric blankets, blankets should be stored clean. Never dry clean an electric blanket because some cleaning materials will damage the wiring system.

Measure the blanket before laundering so you can block it back to its original size. For automatic laundering, place 1/3 cup of mild soap or detergent in the machine and fill with warm water, about 100-110 degrees F. Run the machine for two minutes to mix the detergent, then add the blanket.

For an agitator type washer with two wash action speeds, wash for 1 - 1/4 minutes with slow wash action and fast spin. For agitator and tumbler type washer with single wash action speed, soak the blanket for ten minutes then agitate or tumble for 15 seconds.

To rinse the blanket, use cool water, about 70 degrees - 90 degrees to remove detergents, and then rise twice (one minute each time) for best results. For hand laundering, mix 1/3 cup of mild soap or detergent with lukewarm water, then add the blanket. Soak the blanket for about ten minutes, then squeeze suds through by hand for about two minutes.

Use a soft brush and solution of mild detergent to remove stains and heavily soiled spots from the blanket binding. Remove from sudsy water by gently squeezing the fabric. Rinse two or three times in cool water.

To dry in an automatic dryer, place four to six dry bath towels in the dryer with the blanket. Do not use good towels as buffers, as blanket colors may transfer to the towels. Check instructions to see if blanket can be dried in dryer.

Set the automatic dryer control on the high heat. Time the drying cycle for fifteen minutes. The blanket will be damp and steaming after drying cycle. Allow the blanket to cool, then finish drying on a line. This will permit the blanket to be blocked to size as it dries.

For line drying, place the blanket lengthwise over two parallel clothes lines about 18

inches apart. As the blanket dries, keep stretching to block it back to its original size. Dry the blanket in the shade, never in direct sunlight, as sunlight may harm fabric.

The blanket should look soft and fluffy. If the nap becomes matted, it may be brushed in one direction with a clean, stiff brush to raise the nap.

The nylon binding may be ironed if necessary. Use low iron temperature setting.

*"Peace Be With You"*

It was all too much and they fled to a room where they could lock out the world and together try to make sense of the turmoil and the turbulence. Back and forth they went, up and down, round and round the same events and incidents. Darkness and light, confusion and noise, when suddenly, He was there; Jesus was with them, "Peace be with you." The wind dropped, the waves subsided, the boat rocked gently and their fears vanished. "Peace be with you."

It was such an ordinary greeting. "Hullo" we would say, or "Good evening." But on the lips of the resurrected Christ, it bore a power and authority that has sustained its repetition whenever Christians have met. The peace it brought those distressed disciples was that which came from understanding and truth. The storm of the past week was stilled, the stress within themselves rolled away, they now possessed the key that would enable them to look back with understanding. For here was the truth. For the first time they knew the peace of God, the peace given to all who rely on him alone, the peace which is not the absence of suffering but serenity within it. On the evening of Easter Day the disciples knew that the cross had not been the end, death was not the last word, for, in that disaster, God was present and active, changing defeat into victory and death into life. So now, their confusion was changed to order, their sorrow to joy, their Armageddon to peace.

In the other business conducted the rule regarding wether lambs was changed and Ewe lambs will be permitted to show in the market lamb classes. Also the September birth date of steers was dropped and each steer will be toothed for age limits. This will permit older steers to be shown in the local show and keep in line with practices being followed in area and major shows in the state. The rule regarding toothed in the local show will be the same as the Amarillo show, where they permit steers to be shown if their permanent incisors are not in wear.

This means that calves that have shed their baby teeth incisors and their permanent teeth have come in but are not up to the level or above the other baby teeth are eligible to be shown in the local show.

A crossbred steer class was added to the show on a permanent basis. This past year this class was tried on a temporary basis and it proved to be successful.

## TUBAL CAIN FAMILY IN CAR WRECK

After having a successful band clinic at Elsinore, Calif., the Tubal Cain family were recently involved in a car-truck crash on the freeway between Long Beach and their home town.

Mrs. Cain was driving, following behind a dump truck, when a car behind the Cain vehicle, hit the rear end. The impact threw the Cain car into the truck. The family said the car behind the Cain vehicle was traveling at a high rate of speed. The Cain car was demolished, according to Mrs. Cain's parents, Mr. and Mrs. C. L. Berry of Floydada.

Mrs. Cain sustained a neck laceration and is now wearing a neck brace, and the youngest son, 12 year old Charles, received a head injury, however both are recovering satisfactorily.

Berry said that his son-in-law's band won all top honors in the band clinic held at Elsinore and that a grandson, Calvin Cain, 15, won a coveted honor, a chair in the California All-State Band.

3. Where may this verse be found?

## Answers To Bible Verse

1. To Thomas, one of the disciples, who had not been present when Jesus had appeared following his resurrection.
2. After the crucifixion of Christ, when he appeared to the disciples, when Thomas was present to prove to him the reality of the resurrection.
3. John 20: 29.

In making the announcement, Cox said, "Since the company is involved primarily with uranium, we felt that the name Amarillo Minerals, Inc. was not really descriptive of the company's operation. Pioneer Nuclear will continue to have interests in other mineral development, but this new name will not only be more descriptive of the principal activity, but also tie Pioneer Nuclear's name more definitely to the parent company."

"I REMEMBER, I REMEMBER".....

## Lady Bugs Scarce

In the battle between man and insect, which has been going on, I am told, since mankind was charged to take over and "have dominion over every living thing," - in this conflict it seems at times the insect is gaining ground. Has it come down to man or insect?

It is interesting to speculate that our problem may be that we have sprayed and poisoned until we have killed out our natural allies, the "good bugs," while the bad ones have learned to live with and adapt themselves to the poisons we keep spraying out.

If you were here in that wonderful wheat year of 1937 and happened to be at an elevator when a load from the field was being dumped, you must remember the pretty little pink polka dot lady bugs that spilled out of a truck along with the wheat.

The year of 1969, in contrast, I am sure you saw very few if any lady bugs at the elevator dump. Prompts one to think about the wheat man's best friend about given up the battle? And does the old-fashioned green bug have a cousin with wings who came to visit and decided to stay? And is there no escape from the midge, the

maize grower's nightmare, or the cotton grower's nemesis, the boll weevil?

Time was when none of these made problems for the Floyd County producer. Have we exercised our "dominion" wisely? Just asking.

**DISLIKED THE PEN**

Norbert Williams, the retired postal worker, lived through that era when the principal job of a law enforcement officer was to capture and convict bootleggers. If you bootlegged and didn't get caught it was rather lucrative. Accordingly, there was considerable temptation for a person having a hard time to engage in the traffic.

Norbert had a friend, a young fellow, got the business in his blood and just couldn't quit. He was an admirable boy in many respects and "they" hated to send him to the pen. Finally it came to just that and he "went up" for a couple of years.

After the young fellow had served his time and came home he was asked how he liked it in the penitentiary. "I sure didn't like it," he said. "The next time they send me up it's going to be for singing too loud in the choir."

## SOYBEAN REFERENDUM APRIL 13

Eleven meetings are slated on the High Plains for the week of April 13 to explain a soybean referendum to producers in 11 counties. These meetings are required prior to a certification by the state commissioner of agriculture for the Texas Soybean Association to conduct such a referendum.

Purpose of the referendum is to raise funds with which to conduct programs of education, research, disease and insect control and marketing relating to soybeans. The referendum calls for an assessment of one-half cent per bushel of soybeans produced, according to County Agricultural Agent Joe Wilson.

An educational program will be conducted at each of the meetings to explain the provisions of the referendum and to give a brief rundown of the soybean industry in the area, state and nation, points out Wilson.

For soybean producers in Floyd County, the meeting will be held on Monday, April 13, at 2 p.m. in the Agricultural Building at Floydada.

Other meetings scheduled in Extension District 2 are as follows: April 13 - 9:30 a.m., Hale County Agriculture Center, Plainview; 2 p.m., Agriculture Bldg., Floydada; and 7 p.m., First State Bank, Silverton; April 14 - 9:30 a.m., District Court Room, Tulia, 2 p.m., Community Center, Springlake; and 7 p.m., District Court Room, Muleshoe; April 15 - 9:30 a.m., South Plains Electric Cooperative, Lubbock; and 2 p.m., Production Credit Association, Ralls.

Also on April 15, meetings in Extension District 1 will be at 9:30 a.m. in the Community Center in Hereford, at 2 p.m. in the Hub Community Center 8 miles south of Friona and at 7:30 p.m. in the County Courthouse at Dimmitt.

Speakers at each of the meetings will be W. B. Tilson of Plainview, president of the Texas Soybean Association and John Stephens, field representative of the American Soybean Association. Ed Garrett of Amarillo, area farm management specialist with the Texas Agricultural Extension Service, will also speak at the meetings in District 1. Marvin Sartin of Lubbock, Extension area farm management specialist, will be on hand at the District 2 meetings and Dr. Bob

## TAXES & CHILDREN

Sen. Robert W. Packwood (R-Ore) has introduced legislation that would limit to two the number of children that can be declared as income tax exemp-

tions. If passed the legislation would go into effect Jan. 1, 1973, with children born before that date still eligible as personal tax exemptions.

Metzer, also of Lubbock and Extension area agronomist, will speak at the meetings in Hale, Floyd and Briscoe Counties.

Wilson urges all soybean producers in Floyd and surrounding counties to attend the upcoming referendum meeting so that they will be able to make a knowledgeable choice when election time for the referendum rolls around. A two-thirds majority vote will be required, and producers will also be selecting a nine-man governing board to administer the proposed program.

Soybean producers on the High Plains estimated at about 4,000 grow about 75 percent of the state's total crop, adds Wilson. So it's important that all producers understand the referendum.

## U.S. AND RESEARCH

Dr. John S. Foster, director of defense research engineering, says the U.S. must lose its world technological leadership in research and development if it is to remain a major power in the 21st century. He said leadership is being challenged by Russia in atomic and space fields and by Japan and West Germany in civilian products.
