BANNER-GOODS

Miss Jewel Goode, daughter of Mr. and Mrs. M. H. Goode, became the bride of C. Wills Banner, son of Mr. and Mrs. W. J. Banner, in a pretty wedding ceremony at Thursday morning, January 25, at the Presbyterian Church. The Rev. J. A. McMillan read the impressive ceremony before an improvised altar, banked with a profusion of carnations, ferns and palms.

The ushers, Ervin Grigsby and Lynn H. Bell, entered first, followed by the bridegroom and his best man, Buck Dale. The matron of honor, Mrs. John Yates, sister of the bride, and the bridesmaid, Miss Jack Banner, sister of the groom, then entered, followed by the bride on the arm of her father who gave her away in marriage. Mendocino's Wedding March was played for the processional of the bridal party. W. H. Cobb played the violin accompanied by Mrs. Clyde Mills at the piano. Mr. Cobb and Mrs. Mills played "I Love You Truly" during the ceremony.

Lovely white duchess satin was chosen by the bride for her nuptial gown. It was combined with real lace and pearl trim. The bridal veil was of real lace with orange blossoms. She carried a shower bouquet of carnations.

Mrs. Yates wore a frock of rose chiffon with accessories to match and carried an arm bouquet of pink carnations. Miss Banner wore a green flat crepe with accessories to match. She carried an arm bouquet of pink carnations.

The bride is the attractive and youngest daughter of Mr. and Mrs. M. H. Goody Sr., prominent ranchman of this county. Her pleasing personality and charming ways have endeared her to many.

Wilson, the son of Mr. and Mrs. W. J. Banner, comes from one of the oldest and most prominent families of this city. He was reared here and has made good in the ranching business.

Immediately following the ceremony the happy couple left by motor for a wedding trip to San Antonio and other points east. The bride's going away costume was of rosewood ensemble with accessories to match. The Times joins with their many friends in extending to them congratulations and best wishes. They will make their home here.

Dejarian Chapter Meets

The regular meeting of the Alpha Delphian Chapter was held Wednesday, January 25, at the Kerr Hotel.

Mrs. John Stovell, as leader, conducted a most interesting lesson on Egiptonia. Mrs. D. A. Pollard gave a resume of the previous lesson. Those on the program for the afternoon were: Mesdames Joe Kerr, Len, Laurence, Lewis Lemoss, Clyde Griffith, Jim Kerr and Gayle Mussey.

—Reporter.

DISTRICT COURT PROCEEDINGS

The regular term of the District Court adjourned Thursday following a ten day session.

The grand jury reassembled Monday and adjourned Tuesday after finding no bills.

The first of the week several civil cases were disposed of.

Tuesday, the case of Clyde Mills and E. F. Howard vs. J. Q. Carter, Attorney in fact, et al., went to trial. The jury was selected and testimony was begun that day. Wednesday afternoon the case went to the jury who rendered in favor of Clyde Mills and E. F. Howard. In this case Messrs. Mills and Howard were suing for commissions alleged due them for the sale of land.

Immediately following the rendering of the verdict the defendants made motion for a new trial which was denied. They then filed an appeal.

Jury Commissioners selected were: D. J. McLymont, Jim Kerr and E. F. Howard.

EAGLES MAKING BID FOR DISTRICT CHAMPS

The Sanderson High School Eagles split a pair of games this last week-end, losing a game to the Sul Ross sub-college team and winning from Fort Davis. The local high school has not lost a high school game this year, and is endeavoring to keep its slate clean. With the proper moral support from Sanderson, the Eagles have a chance to again win the district meet.

The sub-college team is composed of old, experienced basketball men, most of whom would not be eligible to compete on a high school team. It is with no loss of confidence that the Eagles find themselves twice defeated by the Sul Ross boys, for on both occasions they forced them to their utmost before they were able to put over a win. In this last game the score was 13 to 21 for Sul Ross. But even then the Eagles made one more goal from the field than did the sub-college, and the superiority of the victors was only seen in their ability to shoot from the foul line. The local boys were considerably off form in shooting and were only able to throw three goals out of fourteen chances from the free throw line. But this cannot be said of the college boys, for they made thirteen points out of a possible eighteen by the free route. The game was spirited and consequently many fouls were called. Younger of Sul Ross College called 26 personal fouls during the game. He handled the game in a most satisfactory manner.

It is hard to pick out the stars in this game, but if they must be chosen, it seems that Cavender and Miller were outstanding for the Eagles, and Carter and Skevington for the visitors. Miller played the best game he has ever played for the Eagles, and it was only through his efforts that Carter, the scoring ace of the college, was kept low. Cavender was everywhere on the offense and on the defense. Hall, Ogle and Kercheville were indispensable to the play of the Eagles. Landers played a good game, showing up better on the defense than in any previous game this year. He was heavily guarded, since he accounted for thirteen points in the first game with Sul Ross, and consequently was unable to make more than two points. Qualtrough played a good game, but was handicapped by a sore leg. Miller was high point man for the Eagles with four points, and Skevington and Carter tied for high point honors for the visitors with 8 points each.

In the Davis game Landers and Cavender starred on the offense with Miller and Hall dividing the honors on the defense. Qualtrough played a fine offensive game. Kercheville played a good game also, and is improving every game in which he participates. The Eagles won the Davis game 26 to 16. Out of the 26 points Cavender and Landers accounted for 15, with the latter holding high point honors with a total of eight.

Fort Davis has the strongest high school team the Eagles have met this year. Although the Sanderson team has met and defeated them three times this year, the Davis boys will bear watching in the district meet.

665 Poll Tax Receipts Issued

At the close of the tax collector's office late Tuesday evening the following were the voting poll receipts that were issued for the various precincts: Precinct 1, 499; No. 2, 90; No. 3, 25; No. 4, 49.

This is a considerable increase over last year, and increased interest was shown in paying poll tax. Also quite a few polls were assessed that were not on the rolls.

The rolls showed that 651 polls were assessed, however, many that were assessed failed to pay.

Mr. and Mrs. S. C. Harrell and daughter and Mrs. F. N. Harrell visited relatives in El Paso last week.

Mrs. C. F. Haass has returned from a trip to Del Rio.

SHE WENT FROM BAD TO WORSE

Down to 98 Pounds—Finally Restored to Health by Lydia E. Pinkham's Vegetable Compound

Cleveland, Ohio.—"After having my first baby, I lost weight, no matter what I did. Then a doctor told me I would be better if I had another baby, which I did. But I got worse, was always sickly and went down to 98 pounds. My neighbor told me about Lydia E. Pinkham's Vegetable Compound, as it helped her very much, so I tried it. After taking four bottles, I weigh 116 pounds. It has just done wonders for me and I can do my housework now without one bit of trouble."

—Mrs. M. RISSINGER, 10994 Nelson Ave., Cleveland, Ohio.
If some good fairy should appear, and offer to grant your heart's desire, what would you choose? Wealth? Happiness? Health? That's the best gift. Health is riches that gold cannot buy and surely health is cause enough for happiness.
Lydia E. Pinkham's Vegetable Compound may be the good fairy who offers you better health.

TODAY'S WINNERS

GASES ONCE WASTED TURNED INTO MONEY

Industry and Public Benefited by Chemistry.

East Pittsburgh, Pa.—Modern chemistry is demonstrating that even odors can be turned into dollars and cents.

Gases that have polluted the atmosphere are now being captured and converted into the liquids from which they originated, to the profit of both industry and the public.
Experts of the materials and process engineering department of the Westinghouse Electric and Manufacturing company decided that too many smells were going up the chimney in the process of treating insulation with resinous materials. So they trapped the gases as fast as they were generated, mixed them with water and then distilled this liquid, recovering from 80 to 90 per cent of the solvents used in the formula.

How far chemical engineers can go in eliminating and using fumes by liquefying them before they are discharged into the air has not yet been determined, but experiments now under way suggest that far-reaching results are possible. The saving already effected by the capture of used solvents is said to be considerable.

Chemists point out, however, that recovery methods might be too well perfected, for it is possible that some of the agents recovered from gases would themselves be difficult to destroy.

Seeks to Make Blend of Light and Music

Philadelphia.—A basic patent for an invention to blend light with music has been granted to Mrs. Mary Hallock Greenwalt. Mrs. Greenwalt has been conducting experiments in the blending of light and sound for 27 years. She believes that her patent is the first granted for a new means of expressing human emotions in rhythmic form.

While music is being rendered by singer, violinist, pianist or orchestra, Mrs. Greenwalt's apparatus floods the performer with lights of varying intensity. The fluctuations in light are intended to enhance the emotional and intellectual appeal of the music. The apparatus may be operated with a keyboard.

Years of training in music, of professional experience as a concert pianist, of study of physics, mechanics, physiology and psychology went into the achieving of the results now recognized by the granting of the basic patent.

Mrs. Greenwalt was born in Beirut, Syria, the daughter of Samuel and Sara Tabet Hallock. She came to the United States when a girl of eleven. After she left school she took up the study of music.

Mystery Blasts Being Studied by Scientists

White Plains, N. Y.—Residents of northern Westchester county are searching to find a solution to the mysterious blast which rocked buildings and spread terror over several miles of the countryside. The heavy, dull roar and the quiver of the earth kept the county police busy answering telephone calls for hours.

Similar blasts have occurred at intervals of exactly six months within the last two years. They always come at night. The ground was shaken and the noise of the explosion was heard, but on each occasion it was unaccompanied by any flare or light such as would have been the case had the explosion been due to powder or gasoline or other known explosives that are set off by friction or heat.

Scientists have been asked to study the terrain in the vicinity and ascertain if the blasts are being caused by some disturbance deep under the earth.

To Stop Dress Snobbery

Atlantic City, N. J.—With special approval by the principal some 50 high school girls are wearing middie blouses and blue skirts in an effort to stop dress snobbery.

"Lifer" Sues Woman; Charged Cruel to Cat

Boston.—Jesse Pomeroy, "lifer," who entered the state prison at Charleston a seventeen-year-old boy, nearly fifty-one years ago, is the plaintiff in a \$5,000 action in which he denies charges that he has been cruel to animals while in prison.
Pomeroy remains in his cell while two attorneys represent him before the Suffolk Supreme civil court.

The defendant is Alice Stone Blackwell of Dorchester, publisher of a magazine for women, who told the court that "she felt it a public duty to write a letter to a Boston newspaper in 1925 in opposition to a pardon for Pomeroy. The letter described his crime as much worse than that of Leopold and Loeb and repeated a rumor that Pomeroy, when permitted the companionship of a kitten, "had skinned it alive."

Counsel for Pomeroy told the court that the suit was brought to "spite a lie" and said that animals had been Pomeroy's only friends in prison.

Journalism the Mainstay of Liberty of Thought in the United States

By JOY ELMER MORGAN, Editor N. E. A. Journal.

AMERICAN journalism is largely responsible for the freedom of thought enjoyed in this country. It supplies the raw material for thought and action with clocklike regularity and with a speed of manufacture that is one of the marvels of modern times. It makes the whole world one and helps to raise the standards of living by encouraging people to dress well, to live in better homes, to drive finer automobiles, to eat a more wholesome variety of food, and to let their interests go out to a wider range of affairs.

While the educational value of the daily newspaper is beyond calculation newspapers have been made possible only by universal education, and as schools improve the press likewise will grow better.

For example, newspapers made a most significant gain during 1927 by refusing to play up scandals as extensively as in former years. They are giving more attention to education, health, science, politics and geography.

Those who follow the reporter's beat, or write against time in editorial offices know not sleep, nor distance, nor fear, nor fatigue, in their heroic search for news. To this faithful army of news writers, the great English author, Bury, well might have dedicated his "History of the Freedom of Thought," for the American newspaper, with its annual distribution of 20,000,000,000 copies, makes thought more nearly free than it has been at any time in all history.

Administrative Authorities at Fault in Application of Income Tax Law

By PROF. THOMAS SEWALL ADAMS, Yale University.

Application of the income tax law to the larger and more complicated cases has been characterized by vacillation, delay, and demoralizing uncertainty. There are now more than 19,000 undecided cases before the board of tax appeals, and these cases involve aggregate deficiencies of approximately \$550,000,000. At the rate petitions are being filed with the board they exceed by more than 200 the cases disposed of in a month.

This situation, in my opinion, is largely—but not wholly—the product of a misplaced and legalistic ideal which led our administrative authorities to pattern their work on the model of American court procedure.

They have assumed, almost unconsciously, that there is in each tax case a precisely determinable legal liability, and that every disputed point, to be decided rightly, must be finally decided by the Supreme court of the United States.

In tens of thousands of cases there is no precisely determinable legal liability; and the income tax turns up new questions in such volume that no system of courts could ever possibly decide them. We need to see that the application of a complicated direct tax, calling for the annual assessment of millions of taxpayers, is a wholesale job and cannot be conducted after the manner of a lawsuit.

Skepticism Never Yet Has Prevailed Against Simplicity of Faith

By DR. S. PARKES CADMAN, Church of Christ.

The moment a man or a woman feels that he or she is superior to their surroundings, that they have that in them, explain it as we may, which elevates them above the clod, they are on the angelic ladder. Grasp the first round, as I know many of you do. But you cannot stay there, suspended between heaven and earth. Choose what you shall do. To return to the mire again, however freely the gay flowers of illicit passion and ambition blossom there, is unworthy of a human soul.

Then upward we must climb. And as we make the venture, the ladder itself turns out to be a moving agency. It carries you onward as you step out. Skeptics will tell you that what you trust is absurd and self-contradictory and that your soul will presently react from it with disillusionment and chagrin. So they told the Apostles, the prophets, the martyrs and your pious ancestors, Jew or gentile. The dismal chorus of unbelief and defeatism has always echoed around this ladder. Nevertheless in simplicity of faith millions have ascended it and found at the summit of their trust the Christ of the Lord.

Increase of Centralization and Bureaucratic Authority Alarming

By GOV. ALBERT C. RITCHIE, Maryland.

America has swung so far from a government of law toward a government of men that its citizens often do not know whether they have any rights at all. Because of the rise of an extraordinary social interest in the moral conduct of the individual and the exploitation of this by the uplifters, our government has become the most regulatory in the Western world, outside of Russia and Italy.

Inspectors and spies and official regulators follow the 100 per cent American from the day he draws his first nourishment from his inspected mother's breast.

The result of all this has been to vest in the federal government a power that often approaches tyranny and to produce a degree of centralization and bureaucratic autocracy that has no place with a free people. In an age of money-getting and jazz men become indifferent to what a government of law demands of them.

Year Opens With Excellent Prospects in All Lines of Business

By CHARLES M. SCHWAB, Steel Magnate.

I have enjoyed every day of my life, and I wouldn't change a minute of it if I had to live it over again.

I believe the world is going on with ever accelerating speed and progressiveness. I want to live 20 years longer and see the great advancement that is surely coming within that time.

Business is picking up, and soon it will be still better. Prospects are excellent. Everybody knows we have been having a slack period, and business has not been good despite what some may insist, but we're coming out of it. There is a general advancement in all lines. Fifty years ago the demand of 1,000,000 tons of steel during a year was considered extraordinary. Now, if 42,000,000 tons are not used, it is considered a poor year. Prosperity should continue with ever-increasing speed.

SPREADS SUNSHINE AMONG SHUT-INS

Carolinian Has Given Away 80,000 Bouquets.

Greenville, S. C.—Spreading sunshine is the hobby of A. O. Gower, Greenville bookkeeper—figuratively, that is.

For eight years he has made and presented 80,000 bouquets to Greenville shut-ins, persons who are ill, and others.

Gower estimates that he cuts 250,000 blossoms annually from his garden, all of which are given away. The monetary return is nothing, but he says "It is spreading sunshine wholesale, and my reward is so tremendous that it is boundless. I have a treasure house without limits."

He began his flower mission in a small way about 20 years ago. It was not until just after the World war in 1919 that it began to assume its present large proportions.

At that time he was asked to teach a Bible class in the United States Army Hospital No. 26, at Camp Sevier. "I'll teach the class," he said, "if you will let me bring the boys flowers every Sunday morning."

Then the work of spreading sunshine began in earnest. His flower garden became larger and larger, until today it occupies every nook and cranny of the half-acre plot around his house.

For 48 hours each week Gower is engaged with long columns of figures. But early mornings, late afternoons and evenings, find him in his garden caring for the flowers that have brought happiness to him and the persons who receive them. Saturday afternoons until dark he gathers the flowers for his baskets of bouquets.

Kills Three of His Brothers and Ends Own Life

Bakersfield, Calif.—Albert Villard, fifty years, hanged himself from his own automobile and then shot himself to make death doubly certain after he had killed three of his brothers and wounded a fourth, according to reports brought here. Walter Rice of Tulare said he found the slayer's body hanging by a rope from Villard's car on a road nine miles from Tulare.

Joe Villard, suffering from bullet wounds inflicted by his brother, walked two miles to a neighbor's ranch to notify the authorities.

The three brothers who were killed—August, Eugene and Gabriel Villard—with Joe and their parents were at breakfast and did not know that Albert was in the room until he began shooting, Joe said.

Ranchmen say that for several years Albert has held a grudge against his brothers, claiming he was deprived of his share of the Villard ranch.

5,000,000 Italian Born Living in United States

Rome.—Latest statistics here show that there are 9,118,503 expatriated Italians living in different parts of the world. The figure is probably even greater than this, as the consular returns from some countries are confessedly incomplete.

The greatest number of emigrated Italians live in the American continent. Between North and South and Central America 7,674,583 Italians are accounted for.

The United States alone has more than 5,000,000 of them, while there are 150,000 in Canada, 800,000 in Mexico, 87,000 in Costa Rica, 800,000 in Brazil, 1,000,000 in the Argentine, and 21,500 in Chile.

In Europe there are 1,267,841 exiled Italians, more than half of whom are living in France. In Africa there are 190,100 Italians, while Australia has 28,000 living under its flag.

Think Farm Children Superior to City Bred

Wellington, New Zealand.—Farm children are superior to city reared children, says a national report on a survey of the physical growth and mental attainment of the boys and girls of New Zealand. Superiority of farmers' children was most pronounced at the age of thirteen.

The survey included 20,000 town and country children ranging in age from ten to fourteen and was carried out by Dr. Ada Paterson, director of the health department's division of school hygiene, and Dr. E. Marsden, assistant director of education.

Will Written on Egg Shell Termed Valid

Brooklyn.—Wills have been written on eggshells, coalbins and bedposts, and might possibly be tattooed on the shoulder of an heiress and remain valid. Crema Skellers told of these among other unusual legal documents in a talk on "The Power to Make a Will," given at the Academy of Music.

Among surprising provisions in wills of historical people, Miss Skellers announced that Gouverneur Morris willed that his wife's income be doubled if she married again. Thomas Paine, she said, although commonly considered an atheist, bequeathed his soul to God. Many Southerners, including George Washington, she revealed, freed their slaves in their wills.

DEMAND

BAYER

ASPIRIN

The whole world knows Aspirin as an effective antidote for pain. But it's just as important to know that there is only one genuine Bayer Aspirin. The name Bayer is on every tablet, and on the box. If it says Bayer, it's genuine; and if it doesn't, it is not! Headaches are dispelled by Bayer Aspirin. So are colds, and the pain that goes with them; even neuralgia, neuritis, and rheumatism promptly relieved. Get Bayer—at any drugstore—with proven directions.

Physicians prescribe Bayer Aspirin; it does NOT affect the heart

Aspirin is the trade mark of Bayer Manufacture of Monacoelectrolyte of Balleysleiedt

Unjust laws can neither regulate the fools nor the thinking men; so what is the use of passing them? Personal liberty has been harped on a good deal, but so has religion. They're both indestructible.

MOTHER

A Cross, Feverish Child is Bilious, Constipated

Every mother realizes, after giving her children "California Fig Syrup," that this is their ideal laxative, because they love its pleasant taste and it thoroughly cleanses the tender little stomach, liver and bowels without griping.

When cross, irritable, feverish, or breath is bad, stomach sour, look at the tongue, mother! If coated, give a teaspoonful of this harmless, "fruity laxative," and in a few hours all the foul, constipated waste, sour bile and undigested food passes out of the bowels, and you have a well, playful child again. When the little system is full of cold, throat sore, has stomach-ache, diarrhoea, indigestion, colic—remember, a good "inside cleansing" should always be the first treatment given.

Millions of mothers keep "California Fig Syrup" handy; they know a teaspoonful today saves a sick child tomorrow. Ask your druggist for a bottle of "California Fig Syrup," which has directions for babies, children of all ages and grown-ups printed on the bottle. Beware of counterfeits sold here, so don't be fooled. Get the genuine, made by "California Fig Syrup Company."

A man who likes to meditate and philosophize doesn't mind going fishing where the fishing is poor.

Sometimes a man is unable to make both ends meet because he keeps them headed in opposite directions.

Cascara is Your Doctor's Choice

When physicians pronounce cascara the PERFECT laxative—why experiment with things that lack the system into action? Cascara, you know, is the bark of a tree. A natural and normal stimulus to the bowels.

Perfect regularity is possible today, and to all of us. We have cascara in ideal form; the very delightful-tasting candy cascartet gives us pure cascara. It has helped at least a million people to habitual regularity. Millions of others, unfortunately, have stuck to stronger things and acquired only the laxative habit.

Your first cascartet will demonstrate how THOROUGH this gentle laxative is, after all. Your next surprise will be the length of time before you need another. Eventually, you'll see that cascaring tends to make the bowels move thereafter of their own accord!

CASCARETS
They Work While You Sleep

A modern drugstore must stock many laxatives, but for your own good the druggist would rather have you ask for the inexpensive little box of cascartets than anything else.

WATCH YOUR HORSES NOW!!!

Spohn's Distemper Compound

Should be given at the first sign of a Cough or Cold. Watch them carefully during these bad months when Influenza, Distemper, Straggle, Spotted Fever, Ringworm, Shipping Fever, Catarrh of the Glands and Colds are prevalent. Keep them working with "SPOHN'S" sold for 25 years. Give "SPOHN'S" for Distemper 50 cents and \$1.50 at drug stores. Write today for free booklet.

SPOHN MEDICAL CO., Dept. 27, GOSHEN, IND.

The Green Cloak

By
YORKE DAVIS

WIND Herald.
Copyright, 1934

STORY FROM THE START

Dr. Ronald McAllister, psychologist, undertakes to solve the mystery of the murder of a reclusive, Henry Morgan. The dead man's papers reveal that he had been in New Zealand, where McAllister had lived in his youth. Will Harvey testifies to seeing a woman in a green cloak at the Morgan home the night of the murder. Doctor McAllister is asked to see a young woman patient in a hospital. In her delirium she mutters in a strange language which only McAllister understands. He suspects she may know something of the murder. A carefully hidden map is discovered by McAllister and Assistant District Attorney Ashton in Morgan's home. While they are searching a young woman enters the house in the darkness and escapes, leaving behind a green cloak. In response to an advertisement of the finding of a green cloak, a young woman, giving her name as Jane Perkins, housemaid at The Meredith, claims it. McAllister takes two laboratory instruments to The Meredith for an undisclosed purpose. The head waiter, Wilkins, admits Jane Perkins is employed at the hotel.

CHAPTER VI—Continued

"I was sent up here to do up the bedrooms, sir," she said. "Was there any mistake about it, sir?"

I realized now how "face" and "nice" had suggested a rhyme to Harvey. She pronounced the word, "mistake," in the vilest cockney.

"No, it's quite right," said I. "Come in."

Doctor McAllister let her go straight through into the bedrooms with no more than a glance at her, and a nod in her general direction.

"Well," he said, "how about it? Does the resemblance strike you?"

"I don't think it would have struck me had I not been looking for it. But I imagine if we could get silhouettes of those two faces and put them side by side, they'd look a good deal alike."

He looked at me rather oddly, turned away and paced the length of the room a couple of times. It was one of his incongruous and unexpected characteristics that he liked to whistle or hum popular tunes to himself when he was thinking in an abstracted way. He began to do it now, though it was no popular tune which his fancy alighted on. Indeed, it took me a minute or two to identify the queer, haunting cadence which he hummed over and over again. I did not identify it. In fact, until he left off humming and began to sing, and then the guttural words he used gave me the clue. It was that ghastly death chant we had heard the girl in the hospital droning and mumbling to herself.

Presently he strode over to the mantelpiece. There was a large ornamental, narrow-necked vase at the end of it, and the doctor began tapping idly enough upon the side of it with a little pearl-handled pocket knife. I turned round in some surprise.

"That sounds as if it were full of water," said I.

"It is."

"Well, who in the world can ever have thought of putting water in that vase?"

"Who, indeed?" he said.—"Oh, look here, will you, Phelps? I've dropped my knife into it."

It was curiously unlike him to do an idle, clumsy thing like that, quite as unnatural as that the vase, which had never held a flower, should be full of water. But suddenly something in his face told me that the thing he had done was part of a carefully calculated trick.

The next moment he called out, "Perkins—"

"Yes, sir," came the chambermaid's voice from the next room. "Coming, sir."

As she entered the room he turned to her and indicated the vase. "I've just dropped my penknife in there," he said, "and my hand is too big to go in through the throat of it. Do you think you can fish it out for me?"

"My hand isn't as small as some, sir," she said with fat good humor "but, anyway, I can try."

"Hold on!" the doctor cried as she moved her hand toward the vase. "The thing is full of water. You'll get your sleeve wet."

I was standing close by waiting to see what would happen, still utterly at a loss for a guess as to the doctor's purpose.

The girl slipped back her sleeve and plunged her arm into the vase.

And I, unable to believe what my eyes had seen, watched the doctor's shoulder and stared, astounded, into his thoughtful face. For high up on the girl's forearm, just inside the elbow, was a tattoo mark in red and blue—a mark that I had not forgotten.

CHAPTER VII

It was fortunate that she did not once look into my astonished face, because for the first few moments I had

no control of it at all, and to any eye, even a stupid one, it would have betrayed strange matters. At first I simply stared at that mysterious little tattoo mark in red and blue; it seemed as if I could not pull my eyes away from it. But at last, rubbing my hands over them, I looked up at the doctor, astonished, questioning, incredulous, and yet convinced.

Of any such momentary turmoil his own face showed absolutely no sign. It was calm, almost to the edge of indifference, but his bright old eyes met mine for just an instant with a flashing look that admonished me of the necessity for self-control.

I pulled myself together, turned away for just the space of one deeply indrawn breath, then turned back again for a look at the girl. She was bending over the vase, her hand plunged down to the bottom of it, where she was fishing about for the doctor's knife. She was evidently a good-humored sort of person, easily pleased. The doctor's pretended misgiving and her own efforts to retrieve it, seemed to be providing her with genuine amusement. She smiled and giggled and chattered all the while she was groping round for the knife, and uttered a triumphant exclamation when she found it.

All of that I barely saw, for I was searching, too, searching her face with a concentrated gaze that would have astonished her had she encountered it. As I looked, in the light of my new knowledge of her, the physical identity of her features with those of the wild girl became steadily more apparent, until I was forced to marvel at my previous blindness to it. Physically the face was the same; but everything of bone and flesh, every infinitely subtle muscular strain or relaxation about lip, eyelid and brow, everything which makes of the human face a window through which the soul looks out—all of that was different. Her movements were different. Sensory and motor nerves must be keyed to an altogether different pitch. The deep, stable color in her cheeks told of a pulse that beat at an entirely different rhythm. I remembered the poise of her body the last time we had stood face to face with her there in Henry Morgan's study, her attitude of frozen alertness, the deep breath drawn in through the dilated nostrils. She had caught our scent then and, recognizing it as something strange and perilous, had fled like a shadow.

The doctor was standing close beside her, and now again he began humming the weird cadence of the death chant which I had heard for the first time

myself—Wellington, New Zealand, but I never heard that language."

"No," he said; "you'd have to go a matter of a thousand miles or two from Wellington to hear that; it's Maori."

"I never heard of him. Is that all, sir? Shall I do up the rooms?"

He nodded; but as she turned to leave the room he called her back.

"You're rather near-sighted, aren't you, Perkins?" he said.

"Oh, no, sir; quite to the contrary, in fact. I can see farther than most people."

"Did you ever have your eyes tested?"

"Measured for glasses, do you mean, sir?" she asked. "No, sir. I shan't never come to them."

"Sit down in that chair a minute," said the doctor, with an easy assumption of authority. "No, not that one; this big chair here. I want to see if your eyes are as good as you think they are."

The chair he indicated, and in which she rather reluctantly seated herself was deep and soft and heavily upholstered. Neither the doctor nor I enjoyed sitting in it, however, because the curve at the back thrust one's head forward at an unnatural angle.

"Lean back," commented the doctor, "all the way—so."

When she was seated to his satisfaction, he wheeled the chair around with its back to the table, and then adjusted the powerful electric reading lamp so that it shed a beam horizontally above the girl's head.

She surveyed these preparations a little uneasily. "It's like having a tooth pulled," she said.

"Not a bit," said the doctor cheerfully. "It's not going to hurt. I only want you to look into this little mirror and tell me what you see."

He held it up before her eyes as he spoke. It was circular, slightly concave and was adjusted upon a long ivory handle. He held it above her head so that she had to strain her eyes upward to see it at all, and at such an angle that it reflected the light of the reading lamp straight into her eyes.

"I don't see anything at all but a spot of yellow light."

"You only see one?" questioned the doctor.

He pulled out his watch and glanced at it. "Don't mind what I'm doing," he admonished her. "Look steadily at the little mirror. Let me know how long it is before you begin to see two of those spots."

(TO BE CONTINUED.)

"I Was Sent Up Here to Do Up the Bedrooms, Sir," She Said.

from the girl's own lips. He hummed it through once in a reminiscent sort of way, and then began singing the words.

The girl looked up at him and burst into a peal of laughter.

He stopped abruptly. "What's the matter?" he asked.

"I beg pardon, I'm sure," she said. "I couldn't help laughing. That was such a funny lot of noises."

"Is my singing as bad as that?" he asked good-naturedly.

"Not the singing, sir; the noises that went with it."

"Oh, you mean the language. Didn't you ever hear that language before? Do you call that a language sir? Does it mean anything? Do people talk like that?" Then she went on, without a pause, "I beg your pardon for being such a rattle, sir. And here's your knife."

Famed in History as Warrior and Builder

Among the most important monarchs who governed a mighty civilization centuries before Athens came into fame was Seti I, a great warrior and a great builder, who ruled Egypt not long after the death of Tut-Ankh-Amen. Ramses I, founder of the nineteenth dynasty of Egypt, ruled only two years and was then succeeded by his son, Seti I. The young ruler took up the task bequeathed to him by his father of leading his conquering armies into Asia. He marched to Lebanon and compelled the Syrian princes to cut down some of the famous cedars for his triumph. He overran the Philistine country, marched through Palestine and shattered the Amorites. He also had conflict with the Hittites of Asia Minor, but little is known of his wars with them. Seti's military achievements,

She wiped it on her apron and laid it on the center table; then wiped her hand and started to pull down her sleeve.

"That's a curious bit of tattooing on your arm," the doctor commented. "How did you come by it?"

"I don't know," she replied indifferently. "It's always been there, I fancy; ever since I was too small to remember anyway. I hope your knife won't get rusty, sir. And I hope you don't mind my laughin' at that bit of song you sang."

"Not a bit," said the doctor. "I don't wonder the language struck you as queer. Yet it was common enough down in the quarter of the world where I was born."

"And where might that be, sir?" she asked.

"Oh, I meant the South Pacific generally. Where I lived was in New Zealand."

"Fancy now!" she said, obviously pleased. "That's where I come from."

Dr. Herbert Woodrow of the University of Oklahoma, who reported this experiment before the American Psychological association, said that after 2,000 trials the female monkey, A, responded correctly in 92.5 per cent of instances, and after 3,000 trials monkey P, the male, made a record of 90 per cent. The experiment was conducted for a short time each day for more than a month.

Scolded into Knowledge.

The monkeys were discouraged from making the wrong response chiefly by scolding and being told "No." Doctor Woodrow said. After about five days monkey A began to bat with her paw on the screen which covered the can while the time interval was sounded. This batting, Doctor Woodrow stated, was quite irregular, but it developed into a habit, so that she batted once or twice during the shorter interval and much oftener during the longer interval. As a result of being scolded when she reached for the food at the wrong time this monkey developed a vacillating type of behavior, reaching out and fingering the rim of the can even when she finally decided correctly not to try to take the banana.

Monkey P, toward the last days of the experiment, began to pull at the brown felt on which the food can rested, and after that pulling at the felt became his regular procedure. If the correct response was to take the food he would pull at the felt and then quickly seize the banana and eat it. If the signal was not to take it he would pull at the felt and then rest his paws on the bars of the cage.

New Test for Spellers.

The old-fashioned spelling bee at which supremacy in spelling was fought over and proved by reciting out triple-jointed words can now be replaced by a much simpler ordeal. A new scientific test to measure spelling ability devised by Dr. J. E. W. Wallin of Miami university was described before the association.

A child who possesses marked spelling ability ought to be able to spell phonetic words of increasing difficulty without much instruction after he has mastered the simple mechanics of spelling, Doctor Wallin said, but he might not be able to spell unfamiliar words that are spelled quite differently from the way they sound. Reasoning along this line, he selected a list of 450 words that are spelled just as they sound and had them tried out on more than 5,000 school children from the second to eighth grades.

A child who can spell correctly all the words in the test that children of his grade usually get is an average speller. If he can spell more difficult words he is a superior speller, and his degree of superiority can be gauged by the extent to which he applies his simple knowledge of spelling to working out the phonetic spelling of longer and unfamiliar words.

General intelligence tests are useful in predicting a child's capacity for general education, Doctor Wallin said, but special tests are needed to diagnose a child's possibilities in each type of learning, and such tests should be given early in the child's school career.

"I Don't See Anything but a Spot of Yellow Light."

however, were not as great as his building ability. His temple at Abydos and his galleried tomb in the Valley of the Tombs of the Kings stand out as among the most amazing architectural triumphs devised by mind of man.—Detroit News.

SHOWS MONKEYS CAN LEARN TO JUDGE TIME

Scientist Tells of Interesting Experiment.

Columbus, Ohio.—Two little monkeys, whose names for publication are abbreviated to A and P, have assisted a psychologist to demonstrate that monkeys can judge time. They have also shown that if they are typical examples of their kind the feminine monkey has a little better sense of time than the masculine.

The two monkeys learned not to reach for a piece of banana displayed in a tin can when a sound hammer measured off a second and a half interval just before the can was shown. And they learned to take the banana out of the can when four and a half seconds were sounded off just before the food appeared.

Dr. Herbert Woodrow of the University of Oklahoma, who reported this experiment before the American Psychological association, said that after 2,000 trials the female monkey, A, responded correctly in 92.5 per cent of instances, and after 3,000 trials monkey P, the male, made a record of 90 per cent. The experiment was conducted for a short time each day for more than a month.

Scolded into Knowledge.

The monkeys were discouraged from making the wrong response chiefly by scolding and being told "No." Doctor Woodrow said. General intelligence tests are useful in predicting a child's capacity for general education, Doctor Wallin said, but special tests are needed to diagnose a child's possibilities in each type of learning, and such tests should be given early in the child's school career.

Although he was running as a Whiz at a time when Andrew Jackson was President and the Democrats were the "furiously intolerant majority" in Illinois, as in other parts of the nation, Lincoln made no reference to national politics in his announcement. Most of his statement was confined to a discussion of plans for improving the navigability of the Sangamon river, then a pet topic in his district. As Nicolay and Hay, his biographers have pointed out, however, Lincoln's announcement was a "well-written circular, remarkable for its soberness and reserve when we consider the age and limited advantages of the writer." Its conclusion is especially interesting.

Upon the subjects of which I have treated, I have spoken as I have thought. I may be wrong in regard to

any or all of them; but holding it a sound maxim that it is better only sometimes to be right than at all times wrong, so soon as I discover my opinions to be erroneous, I shall be ready to renounce them. Every man is said to have his peculiar ambitions. Whether it is true or not, I can say, for one, that I have no other so great as that of being truly esteemed by my fellow-men, by rendering myself worthy of their esteem. How far I shall succeed in gratifying this ambition is yet to be developed. I am young and unknown to many of you. I was born and have ever remained in the most humble walks of life. I have no wealthy or powerful relations or friends to recommend me. My case is thrown exclusively upon the independent voters of the county; and, if elected, they will have conferred a favor upon me, for which I shall be unrepentant in my labors to compensate. But if the good people in their wisdom shall see fit to keep me in the background, I shall be very familiar with disappointments to be very much chagrined.

Before the prospective legislator could begin campaigning, however, Governor Reynolds of Illinois called for volunteers to drive Chief Black Hawk's Sac and Fox warriors back across the Mississippi and one of the first to respond to the call was Lincoln.

He was chosen captain of one of the volunteer companies but his military career was a short one and comparatively uneventful. Upon his discharge from the army and his return to New Salem he found that he had only about ten days before the August elections in which to carry on his campaign.

His first speech in the campaign, made at Pappesville, 11 miles west of Springfield, was a very brief one, consisting of exactly 65 words. He said: "Gentlemen and fellow-citizens: I presume you all know who I am. I am humble Abraham Lincoln. I have been solicited by many friends to become a candidate for the legislature. My politics are short and sweet; I am in favor of the internal improvement system and a high protective tariff. These are my sentiments and political principles. If elected I will be thankful; if not, it will be all the same."

Evidently, at that time the good people did see fit to "keep him in the background" as his announcement had phrased it for he was defeated for the only time in his life when it lay with the people to decide. He received only 657 votes (the highest among the four winning candidates received 1,127), but what must have been adequate compensation for his defeat was the fact that among his friends and neighbors of the New Salem precinct he received 277 votes out of the 280 cast.

Discouraged by this reverse, Lincoln was again a candidate in August, 1834, and this time he won, receiving the highest number of votes (1,376) of any of the four successful candidates. "During his first session Lincoln occupied no particularly conspicuous position," write Nicolay and Hay. "He held his own respectfully among the best. One of his colleagues tells us he was not distinguished by any external eccentricity; that he wore, according to the custom of the time, a decent suit of blue jeans; that he was known simply as a rather quiet young man, good natured and sensible. Before the session ended he had made the acquaintance of most of the members, and had evidently come to be looked upon as possessing more than ordinary capacity. He introduced a resolution in favor of securing to the state a part of the proceeds of the sales of public lands within its limits; he took part in the organization of the ephemeral 'White' party which was designed to unite all the anti-Jackson elements under the leadership of Hugh L. White of Tennessee; he voted with the majority in favor of Young against Robinson for senator, and with the majority that passed the bank and canal bills, which were received with such enthusiasm throughout Illinois and which were only the precursors of those gigantic and ill-advised schemes that came to maturity two years later, and inflicted such incalculable injury upon the state."

Lincoln was re-elected in 1836 and during this session of the legislature was one of the "Long Nine," the nine legislators from Sangamon county, noted in the history of Illinois party for their stature and partly for their influence in legislative matters. Their average height was over six feet and their total "altitude" was said to have been 53 feet. Their most noted piece of legislation was that of getting the state capital removed from Vandalia to Springfield and it is said that this was accomplished by the "adroit management of Lincoln."

In 1838 Lincoln was again elected to the legislature by a greater majority than ever before. By this time he was such a prominent figure that he was the candidate for speaker, but the Democrats having a majority of votes elected their man. Again in 1840 he was elected to the state assembly for the fourth and last time. By now he had proved his ability in state affairs and the stage was being set for his entrance into a greater arena, that of national and international fame.

Independent. One pupil was detailed to greet the entering guest, conduct him properly to each member of the school; those to whom he was introduced were taught to respond in the etiquette of the day. It is not recorded how Lincoln acquitted himself in these formalities. It is known, however, that he was very tall and awkward. He had shot up almost overnight and had reached his full stature, six feet three and one-half inches, before he was seventeen years old. He weighed about one hundred sixty

Trained in Etiquette.

The second school that Abraham Lincoln attended in Indiana was conducted by Andrew Crawford, a neighbor of the Lincolns. Crawford did more than teach the contents of books; he conducted a school of good manners. He would send one student out of the room, and bid him or her to re-enter as a lady or gentleman should, enter a drawing room or parlor, William E. Barton wrote in the Dearborn

Wolves Eat Girls.

Vienna.—Neue Freie Presse publishes an unconfirmed report that 11 peasant girls of the Czechoslovakian town of Maramoras Sziget were devoured by wolves when returning from a neighboring village through the forest.

Shows Monkeys Can Learn to Judge Time.

Columbus, Ohio.—Two little monkeys, whose names for publication are abbreviated to A and P, have assisted a psychologist to demonstrate that monkeys can judge time. They have also shown that if they are typical examples of their kind the feminine monkey has a little better sense of time than the masculine.

The two monkeys learned not to reach for a piece of banana displayed in a tin can when a sound hammer measured off a second and a half interval just before the can was shown. And they learned to take the banana out of the can when four and a half seconds were sounded off just before the food appeared.

Dr. Herbert Woodrow of the University of Oklahoma, who reported this experiment before the American Psychological association, said that after 2,000 trials the female monkey, A, responded correctly in 92.5 per cent of instances, and after 3,000 trials monkey P, the male, made a record of 90 per cent. The experiment was conducted for a short time each day for more than a month.

Scolded into Knowledge.

The monkeys were discouraged from making the wrong response chiefly by scolding and being told "No." Doctor Woodrow said. After about five days monkey A began to bat with her paw on the screen which covered the can while the time interval was sounded. This batting, Doctor Woodrow stated, was quite irregular, but it developed into a habit, so that she batted once or twice during the shorter interval and much oftener during the longer interval. As a result of being scolded when she reached for the food at the wrong time this monkey developed a vacillating type of behavior, reaching out and fingering the rim of the can even when she finally decided correctly not to try to take the banana.

Monkey P, toward the last days of the experiment, began to pull at the brown felt on which the food can rested, and after that pulling at the felt became his regular procedure. If the correct response was to take the food he would pull at the felt and then quickly seize the banana and eat it. If the signal was not to take it he would pull at the felt and then rest his paws on the bars of the cage.

New Test for Spellers.

The old-fashioned spelling bee at which supremacy in spelling was fought over and proved by reciting out triple-jointed words can now be replaced by a much simpler ordeal. A new scientific test to measure spelling ability devised by Dr. J. E. W. Wallin of Miami university was described before the association.

A child who possesses marked spelling ability ought to be able to spell phonetic words of increasing difficulty without much instruction after he has mastered the simple mechanics of spelling, Doctor Wallin said, but he might not be able to spell unfamiliar words that are spelled quite differently from the way they sound. Reasoning along this line, he selected a list of 450 words that are spelled just as they sound and had them tried out on more than 5,000 school children from the second to eighth grades.

A child who can spell correctly all the words in the test that children of his grade usually get is an average speller. If he can spell more difficult words he is a superior speller, and his degree of superiority can be gauged by the extent to which he applies his simple knowledge of spelling to working out the phonetic spelling of longer and unfamiliar words.

General intelligence tests are useful in predicting a child's capacity for general education, Doctor Wallin said, but special tests are needed to diagnose a child's possibilities in each type of learning, and such tests should be given early in the child's school career.

Although he was running as a Whiz at a time when Andrew Jackson was President and the Democrats were the "furiously intolerant majority" in Illinois, as in other parts of the nation, Lincoln made no reference to national politics in his announcement. Most of his statement was confined to a discussion of plans for improving the navigability of the Sangamon river, then a pet topic in his district. As Nicolay and Hay, his biographers have pointed out, however, Lincoln's announcement was a "well-written circular, remarkable for its soberness and reserve when we consider the age and limited advantages of the writer." Its conclusion is especially interesting.

Upon the subjects of which I have treated, I have spoken as I have thought. I may be wrong in regard to

any or all of them; but holding it a sound maxim that it is better only sometimes to be right than at all times wrong, so soon as I discover my opinions to be erroneous, I shall be ready to renounce them. Every man is said to have his peculiar ambitions. Whether it is true or not, I can say, for one, that I have no other so great as that of being truly esteemed by my fellow-men, by rendering myself worthy of their esteem. How far I shall succeed in gratifying this ambition is yet to be developed. I am young and unknown to many of you. I was born and have ever remained in the most humble walks of life. I have no wealthy or powerful relations or friends to recommend me. My case is thrown exclusively upon the independent voters of the county; and, if elected, they will have conferred a favor upon me, for which I shall be unrepentant in my labors to compensate. He received only 657 votes (the highest among the four winning candidates received 1,127), but what must have been adequate compensation for his defeat was the fact that among his friends and neighbors of the New Salem precinct he received 277 votes out of the 280 cast.

Lincoln the Legislator

Resolved, that the Committee on Education be instructed to inquire into the expediency of providing by law for the examination, as to the qualifications of persons offering themselves as school-teachers, and that no teacher shall receive any part of the salary of such examination, and that they file papers and examinations, and that they file by Hall & Simmons—

By ELMO SCOTT WATSON

ABRAHAM LINCOLN, the "Honest Abe" Litterer; "Honest Abe" Lincoln, the New Salem store-

keeper; A. Lincoln, the circuit-riding lawyer and orator of Lincoln-Douglas debate fame; and most of all Abraham Lincoln, the President of the United States—all are familiar figures in American history and well known to most Americans. But there is another Lincoln which is comparatively unknown and that is Lincoln, the legislator.

That little known period in Lincoln's life has been recalled recently in the discovery by Miss Margaret C. Norton, superintendent of the archives of the Illinois state library at Springfield, of the original manuscript of a piece of legislation sponsored by Lincoln, a resolution (reproduced above) which he introduced into the lower house of the Illinois state assembly on December 2, 1840. It reads as follows:

Resolved, That the Committee on Education be instructed to inquire into the expediency of providing by law for the examination, as to their qualifications of persons offering themselves as school-teachers, and that no teacher shall receive any part of the Public School Funds who shall not have successfully passed such examination; and that they report by bill or otherwise—

In view of the astounding rise of Lincoln from the obscurity of the Illinois backwoods to the Presidency of the United States and his subsequent deathless fame, it is interesting to note that his first attempt to win an elective office met with failure. On March 9, 1832, there had appeared on the streets of the little town of New Salem, Ill., a crudely-printed handbill circular announcing the candidacy of A. Lincoln, the clerk in Ofutt's store, for the legislature from Sangamon county.

Although he was running as a Whiz at a time when Andrew Jackson was President and the Democrats were the "furiously intolerant majority" in Illinois, as in other parts of the nation, Lincoln made no reference to national politics in his announcement. Most of his statement was confined to a discussion of plans for improving the navigability of the Sangamon river, then a pet topic in his district. As Nicolay and Hay, his biographers have pointed out, however, Lincoln's announcement was a "well-written circular, remarkable for its soberness and reserve when we consider the age and limited advantages of the writer." Its conclusion is especially interesting.

Upon the subjects of which I have treated, I have spoken as I have thought. I may be wrong in regard to

Evidently, at that time the good people did see fit to "keep him in the background" as his announcement had phrased it for he was defeated for the only time in his life when it lay with the people to decide. He received only 657 votes (the highest among the four winning candidates received 1,127), but what must have been adequate compensation for his defeat was the fact that among his friends and neighbors of the New Salem precinct he received 277 votes out of the 280 cast.

Discouraged by this reverse, Lincoln was again a candidate in August, 1834, and this time he won, receiving the highest number of votes (1,376) of any of the four successful candidates. "During his first session Lincoln occupied no particularly conspicuous position," write Nicolay and Hay. "He held his own respectfully among the best. One of his colleagues tells us he was not distinguished by any external eccentricity; that he wore, according to the custom of the time, a decent suit of blue jeans; that he was known simply as a rather quiet young man, good natured and sensible. Before the session ended he had made the acquaintance of most of the members, and had evidently come to be looked upon as possessing more than ordinary capacity. He introduced a resolution in favor of securing to the state a part of the proceeds of the sales of public lands within its limits; he took part in the organization of the ephemeral 'White' party which was designed to unite all the anti-Jackson elements under the leadership of Hugh L. White of Tennessee; he voted with the majority in favor of Young against Robinson for senator, and with the majority that passed the bank and canal bills, which were received with such enthusiasm throughout Illinois and which were only the precursors of those gigantic and ill-advised schemes that came to maturity two years later, and inflicted such incalculable injury upon the state."

Lincoln was re-elected in 1836 and during this session of the legislature was one of the "Long Nine," the nine legislators from Sangamon county, noted in the history of Illinois party for their stature and partly for their influence in legislative matters. Their average height was over six feet and their total "altitude" was said to have been 53 feet. Their most noted piece of legislation was that of getting the state capital removed from Vandalia to Springfield and it is said that this was accomplished by the "adroit management of Lincoln."

In 1838 Lincoln was again elected to the legislature by a greater majority than ever before. By this time he was such a prominent figure that he was the candidate for speaker, but the Democrats having a majority of votes elected their man. Again in 1840 he was elected to the state assembly for the fourth and last time. By now he had proved his ability in state affairs and the stage was being set for his entrance into a greater arena, that of national and international fame.

Independent. One pupil was detailed to greet the entering guest, conduct him properly to each member of the school; those to whom he was introduced were taught to respond in the etiquette of the day. It is not recorded how Lincoln acquitted himself in these formalities. It is known, however, that he was very tall and awkward. He had shot up almost overnight and had reached his full stature, six feet three and one-half inches, before he was seventeen years old. He weighed about one hundred sixty

Trained in Etiquette.

The second school that Abraham Lincoln attended in Indiana was conducted by Andrew Crawford, a neighbor of the Lincolns. Crawford did more than teach the contents of books; he conducted a school of good manners. He would send one student out of the room, and bid him or her to re-enter as a lady or gentleman should, enter a drawing room or parlor, William E. Barton wrote in the Dearborn

A resolution in Lincoln's handwriting which he introduced in the Illinois House of representatives December 2, 1840. From a photostat of the original in the Illinois archives and never before published.

Discouraged by this reverse, Lincoln was again a candidate in August, 1834, and this time he won, receiving the highest number of votes (1,376) of any of the four successful candidates. "During his first session Lincoln occupied no particularly conspicuous position," write Nicolay and Hay. "He held his own respectfully among the best. One of his colleagues tells us he was not distinguished by any external eccentricity; that he wore, according to the custom of the time, a decent suit of blue jeans; that he was known simply as a rather quiet young man, good natured and sensible. Before the session ended he had made the acquaintance of most of the members, and had evidently come to be looked upon as possessing more than ordinary capacity. He introduced a resolution in favor of securing to the state a part of the proceeds of the sales of public lands within its limits; he took part in the organization of the ephemeral 'White' party which was designed to unite all the anti-Jackson elements under the leadership of Hugh L. White of Tennessee; he voted with the majority in favor of Young against Robinson for senator, and with the majority that passed the bank and canal bills, which were received with such enthusiasm throughout Illinois and which were only the precursors of those gigantic and ill-advised schemes that came to maturity two years later, and inflicted such incalculable injury upon the state."

The BABY

No mother in this enlightened age would give her baby something she did not know was perfectly harmless, especially when a few drops of plain Castoria will right a baby's stomach and end almost any little ill. Fretfulness and fever, too; it seems no time until everything is serene.

That's the beauty of Castoria; its gentle influence seems just what is needed. It does all that castor oil might accomplish, without shock to the system. Without the evil taste. It's delicious! Being purely vegetable, you can give it as often as there's a sign of colic; constipation; diarrhea; or need to aid sound, natural sleep.

Just one warning: It is genuine Fletcher's Castoria that physicians recommend. Other preparations may be just as free from all doubtful drugs, but no child of this writer's is going to test them! Besides, the book on care and feeding of babies that comes with Fletcher's Castoria is worth its weight in gold.

Children Cry for Fletcher's CASTORIA

There are too many people who don't care whether you like them or not; that is, don't care enough.

For Colds, Grip or Influenza
and as a Preventive, take Laxative BROMO QUININE Tablets. A Safe and Proven Remedy. The box bears the signature of E. W. Grove, 30c.—Adv.

African Locusts
In South Africa swarms of locusts fifty miles long by ten miles wide have been seen to darken the sun by their flight.—American Magazine.

Mothers, Do This—Just Rub Away Danger

When the children cough, rub Musterole on their throats and chests. No telling how soon their symptoms may develop into croup or worse. And then when you're glad you have a jar of Musterole at hand to give prompt relief wherever. As first aid, Musterole is excellent. Keep a jar ready for instant use. It is the remedy for adults, too. Relieves sore throat, bronchitis, tonsillitis, croup, stiff neck, asthma, neuralgia, headache, constipation, pleurisy, rheumatism, lumbago, pains and aches of back or joints, sprains, sore muscles, chilblains, frosted feet and colds of the chest (it may prevent pneumonia).

K-R-O KILLS RATS ONLY

CLOTH COATS LEAD FOR SPRING; TOTS' STYLES TAKEN FROM DOLLS

OF WHAT material, color, fur or no fur, straightline or flare? This quartette of questions once settled and the buying of a spring coat becomes a very simple matter.

As to the first query on the list, for travel, motor, sports and general utility wear, new mode places emphasis on loosely woven weaves, especially basket cloth and tweeds which are not of the smooth-faced types.

Navy blue receives sweeping endorsement. Aside from black, navy, also marine, the movement is toward light

It happened this wise—a certain famous Italian designer began his career by making dolls—both themselves and their clothing—entirely of felt. Their success was instantaneous. Nothing in recent years in the way of dolls has created more of a sensation than these felt masterpieces, and they are in much demand.

The amusing part is that these dolls are "dressed" as smartly as if they had stepped out of the pages of the latest fashion magazine. They wear chic coats or capes with hats to

TWO CHARMING SPRING COATS

shades, beige, biscuit tan, grege tones and particular stress is being given to gray.

In regard to the furred coat versus the furless there is a decided difference of opinion among stylists. Certain it is, however, that the coat sans fur is making a prominent place for itself in the mode. More especially since it is introducing distinctive details which bespeak a new movement, such as for instance, cape effects, also scarf collars which bring the streamers through finished slots cut in the cloth of the coat. Many of the very recent types exhibited by couturiers are exploiting velvet ribbon smashes through the openings. Regardless of the altitudes of the furless coat, fur trimmings, not lavish, but smartly effective, appear on many of the spring models in direct competition to the unfurred. A noted couturier solves the problem cleverly by designing cloth types with detachable fur collars.

If the fur trimmings be as handsome as that of the beige astrakhan which appears on the collar and at the pockets of the brown and tan check travel coat shown in the picture to the left there will be no possibility of a desire to "detach" it. Astrakhan is increasing in favor at every move of the mode. Note that the hand bag which the lady carries is made of the selfsame material as the coat itself.

And now what about the flare versus straightline? Both are presented in the illustration, for fashion shows

match or perhaps ensemble costumes which are carried out perfectly, even to the slightest detail, in color combinations and artful design such as only felt of gay hues can make possible.

Now comes the climax to this interesting doll episode. This same Italian genius, inspired by the success of his enterprises, in this season designing clothes for children typical of those worn by his famous character dolls.

The picture shows a tiny Parisienne clad in a cunning all-felt frock created by the well-known Italian designer of quaint dolls. This little tot's doll wears a dress made of the same material as that of her wee mistress. It seems that it is part of the plan to complement these felt costumes for children with matching dolls. Some sets include hats with school bags to match.

Interest at this moment, is especially focused on coats of felt in fascinating blues, roses, tans, mauve, green and other likable tones. These are enlivened with appliques, stitching and insets in multi-colored effects. A hat, tam or bonnet to match accompanies each coat. Specialty shops are also displaying organdie frocks of American design, stressing the ensemble idea with felt trimmings matched to the accompanying coats and hats.

Among the most attractive felt imports reaching American shores is a

TAKES INSPIRATION FROM DOLL

no partially. Loose-woven basket cloth is the medium for the chic coat to the right and it combines plain with plaided, the solid color forming the flare.

How often do we hear it said of this or that cunning tot, "She looks just like a doll." According to fashion's program for this season, youngsters will be dressed to look more like dolls than ever. It is a fact, certain new styles have developed, the inspiration for which originated with a dollmaker.

tan felt coat which has cut felt flowers appliqued on the front panel. The hat is related to the coat in that it is of identical felt, inset with contrasting color.

All sorts of fantastic designs and colorings feature in these unique felt garments. For instance a most attractive coat of a grayish light green has rows of "pinked" felt stitched down to form a multi-colored border on all edges.

Daddy's Evening Fairy Tale

By Mary Graham Bonner

GRANNIE TREE TOAD

"Tell me the news," said Grannie Tree Toad.

"We were the news," said Teddy Tree Toad.

"What?" squealed Grannie Tree Toad. "Are you telling me the truth, my little grandson?"

"I am," said Teddy Tree Toad. "I am telling you the real truth."

"That's a good grandson," said Grannie Tree Toad. "Well, how were we the news?"

"In this way," said Teddy Tree Toad.

"Which way?" asked Grannie Tree Toad, blinding her eyes.

"In the way of my explanation, not in any direction you can see with your eyes."

"But you're telling me the truth? Grannie would be very angry if you weren't."

"I am," said Teddy. "I am telling you what really happened, but you can't see it with your eyes, for it isn't around here—or they aren't around here, I should say."

"I am very much confused," said Grannie Tree Toad.

"I will tell you and then you won't be," said Teddy Tree Toad.

"Tell me, my grandson, tell me at once."

"In a newspaper they had pictures, lots and lots of pictures."

"In fact I'm told they often have pictures in papers—pictures of beautiful ladies, pictures of clever school

"I Am Very Much Confused."

children, pictures of big ships, pictures of far-away places and places near at hand.

"Well, they had pictures of us—of animals and queer, interesting creatures."

"Is it a compliment to be queer?" asked Grannie Tree Toad.

"I think so," said Teddy, "so long as we are interesting, too."

"Of course I am not quite certain if it is always a compliment to be thought queer, but it is always a compliment to be thought interesting."

"I am quite sure of that."

"So at least being queer and interesting would make half a compliment, and, maybe, as long as they're together, hand in hand, so to speak, they may both be compliments."

"At any rate," continued Teddy, "they had pictures of a number of animals."

"But we were there, too."

"There was a picture of me showing how I could almost be mistaken for the leaves and the trees, and that I was very clever to know how to hide myself by wearing such a suit."

"They had a picture of a spiny porcupine from Madagascar."

"The children who saw it thought it looked like a great big burr from a chestnut tree until they read under the picture that it was a."

"They had a picture of a rat from the Sahara, showing his great, long skinny legs."

"They had a picture of a marmoset monkey and an owl monkey with his great eyes looking out from the picture."

"They had a picture of the ocelot cat, and of the great long-necked giraffe."

"They had two pictures of the ugly old wart hog, showing his string-like tail in back and crooked tusks in front—a picture for each."

"They also showed the picture of the biggest bear in the zoo."

"But the greatest honor of all," said Grannie Tree Toad, "was that they printed a picture of my fine grandson."

Wrong Right of Way

Little Bobby loves to ride in the front seat when his father is driving. One day another motorist ran past the red light and bumped into them.

When he got home, Bobby told his mother about the affair. "It wasn't daddy's fault. The other man had the wrong right of way."

Truck With a Cough

Little Danny rushed from the window where he had been watching a large truck effect a turn in the parrow street.

"Oh, mummy," he cried, "go get some medicine for that poor truck! Him has a terrible cough."

Kids Suffer, Too

Foreigners are suffering some in China, but think of the poor school kids who must remember how to spell "Yangtze."

Rubber Walls the Latest

Rubber walls in office buildings to decrease vibrations, and streets and sidewalks paved with rubber, are among the recent uses chemists have found for the product, says Popular Mechanics Magazine. They have also adapted the material to the making of interior decorations and for coating silk and other fabrics so that scarcely a trace of the resilient substance can be detected. The rubber for use in buildings is in the form of blocks or slabs, which are built up vertically on the wall face.

If Back Hurts Begin on Salts

Flush Your Kidneys Occasionally by Drinking Quarts of Good Water

No man or woman can make a mistake by flushing the kidneys occasionally, says a well-known authority. Too much rich food creates acids which clog the kidney pores so that they sluggishly filter or strain only part of the waste and poisons from the blood. Then you get sick. Rheumatism, headaches, liver trouble, nervousness, constipation, dizziness, sleeplessness, bladder disorders often come from sluggish kidneys.

The moment you feel a dull ache in the kidneys or your back hurts, or if the urine is cloudy, offensive, full of sediment, irregular of passage, or attended by a sensation of scalding, begin to drink soft water in quantities; also get about four ounces of Jad Salts from any reliable pharmacy and take a tablespoonful in a glass of water before breakfast for a few days and your kidneys may then act fine.

This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to help flush clogged kidneys and stimulate them to activity, also to help neutralize the acids in the system so they no longer cause irritation, thus often relieving bladder disorders.

Jad Salts is inexpensive and cannot injure; makes a delightful effervescent lithia-water drink, which everyone can take now and then to help keep the kidneys clean and the blood pure, thereby often preventing serious kidney complications.

Retort Courteous

During a reception which followed the performance of a French troupe in Berlin, a comedienne found herself sitting next to a German officer who offered her a glass of Rhine wine.

"This wine is excellent," he said, "but of course I am sorry that it isn't champagne." Then he added: "The German army hopes to have the pleasure of drinking some in France, some day."

Quick as a flash the French girl retorted: "We don't serve our prisoners champagne, M'sieu."

TRY THESE MEAT CAKES

The next time you make Hamburger Meat Cakes, add 2 level teaspoons of Calumet Baking Powder to each pound of meat and see how much lighter and tastier they will be. Neither do they become heavy or hard upon cooking.

His Guess

"What Is Wrong With This Picture?" was the title of a sketch showing a man and woman walking down the street. Junior had read the funny section and the title of this picture intrigued him. He tried to figure it out and bent his head puzzling over it for some time. At last he looked up.

"Dad, I bet I know what's wrong with this picture."

"What?"

"I bet it ain't his wife."—Boston Globe.

"It affords me great pleasure" is the way an after-dinner talk used to begin.
