# I can dream . . . can't l?

Sure, I'd like to have a vacation like anyone else, but this is the busiest time of the year for me.

You see, during the extreme heat of midsummer, I have to work longer and harder than ever providing folks with the air conditioning and refrigeration they need to keep cool. Fans and window coolers are in use many more hours per day. And refrigerators and home freezers work overtime furnishing extra refrigeration and extra quantities of ice cubes, cold drinks and frozen desserts.

Quite naturally, this extra work is reflected in my monthly pay. But the difference is small compared to the comfort I bring. I'm still the lowest-cost servant you can hire-and the more hours I work the less I cost you per hour.
