LISTEN TO LUKE

Only a few more days and the children will again be in the school buses. To some that is an event accompanied with great joy while to others it is just one of those things which must be endured.

It is hoped that all the citizens in this area will begin now to think about the danger in driving on the school grounds. Every parent has been taken to keep the children informed of the danger crossing streets, but they are often careless and some might get killed and dart out in front of passing motorists.

While driving past the school grounds, especially let's remember to look closely and drive slowly. Children should be seen and not heard.

Only eight more days in which to have your car inspected. There are possibly some cars which will require more work to make them pass the inspection than they are actually worth. This law is based on the belief that it will remove some of the road hazards which may cause serious accidents. Other we think it is a good law that makes little difference. It is a law nevertheless.

Highway patrolmen have stated that it will be their duty to pick up cars which do not have the inspection sticker on the windshield. If you haven't that certificate it will be unwise to attempt to drive your car.

While thinking of school opening we can't help but think of the political fight which is being discussed regarding the federal steal of our tidelands. This is a vital factor in the maintenance of our Texas school system.

Price Daniel, U. S. Senator-elect, made his stand clear on the issue. He campaigned for the issue on that issue in particular. He received an overwhelming majority of the votes. Now, he is if the people of Texas vote the Democratic presidential ticket, they will be giving sanction to the stealing of that source of income which rightfully belongs to the school children of Texas.

Sevenson made it clear that he would continue to follow the path set by Harry Truman in taking the valuable lands from Texas. He can't believe that any Texan conscientiously go to the polls in November and vote for such flagrant theft.

This column thinks that every man who has any connection with a school system should do as Price Daniel has done and let the people know that he will oppose the man who will steal our property to make us like it.

Every man in public office can't support his constituents unless he has the intestinal fortitude to assert himself on these important matters.

Price Daniel believes that Governor Stevenson is an honorable man and we believe that he honestly believes.

Cooke Named JP In Light Write-In Vote Here Last Saturday

In one of the lightest run-off primaries to be held in Terrell County, Marshall Cooke was elected as Justice of the Peace for Precinct 1. There were no contested places on the ballot for any of the county or district offices and the office of Justice of the Peace had to be filled because the first primary ended with the present incumbent, E. B. Litton, in first place but not with a majority of the three names written in, Judge Litton refused to let his name be placed on the ballot in the run-off and stated that he would not accept the office for another term. Marshall Cooke and J. W. Happle were written in for the run-off. Cooke received 48 votes and Happle got 22.

There were only 77 votes cast in the county and there was only one box open for voting.

Martin Dies, high man in the first primary but failing to get a majority, had to be placed on the run-off ballot unopposed since the second high man withdrew. Dies got 76 of the 77 votes cast here.

Spurgeon Bell of Harris County carried this county with 37 votes to 36 for Frank P. Culver of Tarrant County for the office of Place No. 1, Supreme Court.

Roger Rose was election judge for the primary.

Daniel Puts Texas' Welfare Above Party

PRICE DANIEL

"In view of Governor Stevenson's agreement with President Truman against the State of Texas on tidelands ownership, I cannot and will not vote for him for President of the United States.

"Governor Stevenson's statement is an endorsement of the means and manner by which the tidelands have been stolen by the Federal Government from the Texas Public School Fund. It indicates that he would follow the means by which one man, the President of the United States, has twice prevented a majority of Congress from returning these lands in accordance with the solemn agreement by which Texas entered the Union.

"Under these circumstances, a vote for Governor Stevenson would be a vote against our own Public School Fund. I cannot and will not cast such a vote, and I do not see how any loyal Texan can do so.

"The Texas tidelands were won at the Battle of San Jacinto. They were retained under the Annexation Act.

The barbecue that was announced for next Saturday afternoon at the Chandler ranch for those interested in the Sanderson Roping Club has been indefinitely postponed according to an announcement received from the officials of the club.

Herman Chandler, president of the club, had invited the group to his ranch for a free barbecue next Saturday but the club officials stated that at this time there were many who would be busy with ranch work and it would be impossible to get a representative group together at this time.

It is planned to go forward with the plans at another date when conditions will be more favorable.

OPS TO SUSPEND MUTTON, YEARLING CEILING PRICES

In a telegram received Wednesday by John T. Williams, president of the Texas Sheep and Goat Raisers' Association, from Lyndon B. Johnson, U. S. Senator, Williams was advised as follows:

"Pleased to report Office of Price Stabilization will soon take action to suspend ceiling price on yearling and mutton while retaining present ceiling on lamb. Understand this will result in the elimination of compulsory classification. This should go far toward solving problem which you recently contacted me."

Williams stated that it would probably be a week or ten days before the law went into effect, and that it was thought this would be of great benefit to the feeders and ultimately result in an advantage to the producer.

He stated that heretofore the classification was by conformation rather than age and resulted in a loss to many of the feeders.

IMPROVEMENTS AT SCHOOLS NOTED

Announcement has been made by Superintendent Matt Bader that everything is in readiness for the opening of the school term on Tuesday, September 2. The faculty is complete for the term.

Varnish has been added to all floors in the high school and elementary buildings. The Dryden school has been re-painted on the inside.

Additional bleachers and steps have been built at the football field and the grass has been kept well during the summer with the playing field in good shape for the coming season. Through the compliments of McKnight Motor Co., a radio has been installed in the bus used for extra-curricular trips.

A telephone has been installed in the elementary building and the number is 254. In case of fire or other emergency, the telephone would be of inestimable value.

DOVE SEASON OPENS MONDAY

Dove season opens in Terrell County Monday, September 1, but there is little likelihood that many hunters will get their fill of the game birds this year because of the noted lack of birds in this area. Drouth and the resulting lack of feed is the main reason.

 tion Agreement between the United States and the Republic of Texas and we dedicated to our Public School Fund. For over one hundred years the Federal Government recognized that the property belonged to our state. After it became valuable, President Truman directed that a suit be filed against our state, and a divided Supreme Court (by a vote of 4 to 3) refused to admit evidence and decided against Texas on a new theory of law by which the Federal Government can seize private property as well as state property without compensation.

"I have fought against this seizure in the courts and in the Congress for nearly six years. To work for restoration of these lands and confirmation of our Annexation Agreement is one of the principal reasons that I announced this year for election to the United States Senate. It was one of the main planks in my platform, and it received the approval of 940,770 Texas Democrats. "There is no need for me to go to the United States Senate or for anyone else to go to Washington and expect to win the tidelands for this state if a majority of the people of Texas vote for a Presidential candidate who in advance says that he favors the use of a presidential veto to prevent a majority of Congress from restoring the property and the principles of law.

"In other words, if a majority of the people of Texas vote for Mr. Stevenson, he will take it as a mandate from 'Texans' themselves that we do not really believe that this property is ours or that we really do not object very strenuously to it being taken away from our public schools.

"The time has come for Texas Democrats to let it be known just how strongly they feel about the tidelands issue and whether they are willing to continue the fight or give it up as a sacrifice on the altar of party loyalty.

"As for me, I think it is time for Texas Democrats to revolt against domination and control of the national party by those who are against our State, who ignore our views, and who trample upon our Annexation Agreement.

"Too long the national leadership of the Democratic Party, dominated by the CIO-PAC and the ADA, have taken Texas Democrats for granted. They steal our school lands and ignore our views on national issues because they do not believe we will do anything about it except vote for them because they are running under the Democratic label. They look upon us as slaves to the name of the Democratic Party, and we shall never again have any real influence in the party unless we declare and assert our freedom.

"In response to Governor Shivers' request that Texas Democrats let him know what they want to do, I am writing him today that I hope some arrangement can be made so that Texas Democrats can vote for a set of electors under the Democratic column who will be pledged to cast their votes for a Presidential candidate who will uphold the Texas Annexation Agreement and permit Congress to restore the tidelands to our Public School Fund. This arrangement should permit separate Stevenson-Sparkman electors also to be listed on the Democratic ticket so that no one will be denied the right to vote for national party electors if they so desire. I hope that all like-minded Texas Democrats will write or telegraph Governor Shivers and express themselves on this important matter."

 and the annexation agreement of Texas and the United States gives the ownership of the tidelands to the state of Texas and in view of that fact, the U. S. government is guilty of stealing from the people of Texas as much as if they would come down here and take our favorite hunting gun, or family automobile, our best suit of clothes or our own privately-owned lands for the use of the nation as a whole. Some things are right and some things are wrong, and party or no party, loyalty should come first to those things that are right.

A reader of this column from another town has sent us copies of telegrams he sent to Gov. Shivers and Attorney General Daniel in which he commends their stand in the interest of Texas' rights and in their fight to clean-up at all governmental levels. More such encouragement should be forthcoming from those of us who have for the first time in many years, had state officials who would work tirelessly for the benefit of the people and would stand up fearlessly for the things they believed to be right for the majority and just for all.

The country is tired of this socialistic trend that has brought this country out of the constitutional government which has prospered this nation for so long. Voters are going to see that people who put party above the welfare of the country are removed from office. That move should begin at the very bottom and go all the way to the top. There is no room in America for anti-Americans who seek public office.

his stand on that question is right. We believe he did the honorable thing in letting his views be known. But while he is honest in his belief, he could still be wrong

Gonzales Foundation Offers Hope For Crippled Children

Every year, with seemingly increasing intensity, thousands of Texas youths are struck down by disease and accident. These bewildered children, and their stunned families as well, must pick up the shattered pieces and rebuild their lives. When disease or accident results in neuromuscular involvement — as in many cases of polio, for example — many of these children turn to Gonzales Warm Springs Foundation. For there, with a medical program born in the wonders of medical science and made possible by the contributions of the generous people of Texas, these children are given the opportunity to fight their way back to strength and usefulness.

The treatment program at Gonzales Foundation seeks to treat the whole child. Physical therapy is of course the core of the treatment, and physical improvement is the greatest goal. But close attention is also paid to the psychological, educational and social rehabilitation of each patient.

Under the direction of two physiatrists, the children receive physical therapy in and out of the treatment pools in this fully recognized hospital of physical medicine and rehabilitation. In addition there is an extensive occupational and recreational therapy program. Children of school age go to a state-accredited school so as to keep abreast of their former classmates academically. They also go to church. A brace shop on the grounds produces braces and appliances made exactly to the meas-

ure of tiny limbs and the doctor's prescription.

Treatment at the hospital is open to any child who can be benefited by the treatment program. All patients are referred by their own physicians. Treatment costs are financed in several ways, and if no other source is available, by the Gonzales Foundation's welfare fund. In the history of the foundation, no child has ever been denied treatment for financial reasons.

The Gonzales Foundation is neither a part nor a competitor of the March of Dimes, nor does it accept polio patients exclusively. Many of the patients are sponsored by March of Dimes funds, but the treatment center receives this money only as payment for services rendered, just as any other hospital would.

Texas love has built Gonzales Warm Springs Foundation and Texas love sustains it. Every Texan can be well proud of his part in this great work because only the contributions of generous Texans made possible Gonzales Warm Springs Foundation. By the same token . . . only their continued support will keep it in the forefront of the battle against the ravages of disease and disaster.

**HEALTH FOR ALL—
TB — Arrested or Cured**

Let's suppose you have tuberculosis. It's not impossible, you know. About 400,000 people in the United States today have active TB, and they are of every age and station in life. If one of them is you, will you be cured?

When you go to the TB hospital, someone, probably a nurse especially assigned to this duty, will teach you about the disease. Your doctor or a public health nurse may already have told you and your family a good deal about the disease. You will learn that treatment can almost certainly arrest the disease. After what may be months of bed rest, and possibly the use of drugs and surgery, the TB germs will become inactive. They will be walled off in some part of your lungs. Whether they will stay that way and not break out again, will depend largely on

That may seem like a big responsibility. You may fear that it means a future of living like a semi-invalid. But it doesn't. There is a whole team of people ready to help you get well and stay well. These include the hospital doctors, social workers, therapists and vocational counselors both within and without the hospital. With their assistance you can look forward to the day when you will again live a useful and normal life.
