

Bank Deposits Top \$6 Million

Friona residents possess more money than ever before in the history of the county, according to the April report from the Friona State Bank. Deposits have increased almost one million dollars since Jan. 1 to set a new all-time high. Total deposits at present are shown as \$6,307,398.91. Deposits on Jan. 1 were reported as \$5,447,336.28 which allows an increase of \$860,062.53 in three months. The report of April 12, 1961 showed only \$4,070,190.81 as total deposits.

Of the present total, \$434,659.13 are in savings and time deposits. Total assets are reported at \$6,732,731.98.

Good wheat crops followed by good grain and cotton crops in the fall and fair prices for all commodities were cited by Frank Spring, president of the bank, as partially responsible for the increase.

Government payments under the agriculture stabilization programs and the production of more cattle in the area were also noted as contributing to the growth in capital for the area.

Many of the farmers are receiving payments for land lay-out under the feed grain and wheat program as well as final payments under the cotton program to add to their income. Another reason for the rapid rise in deposits

practice of some farmers of holding grain and other commodities until January or February before selling.

"We look for the percentage growth in deposits this year to be about the same as last year," Spring said. The yearend report for 1961 showed a 17.5 per cent growth over the same period in 1960. If the percentage growth stays the same, the actual increase in deposits will be appreciably greater than in the past.

"Outstanding loans remain at about the same as during the past year but are less in relation to deposits," Spring reported.

"Bad officials are elected by good citizens who do not vote." ... C.G.P.

Friday night, I witnessed the most flagrant disregard of law, safety and just plain good sense, that I have ever heard of.

When the fire whistle blew, I grabbed my camera and started out to try and catch a few pictures of the blaze--which I later found to be a burning barn at Eric Rushing's farm.

I didn't think that I had wasted any time in getting started but I was not quite as fast as about 20 other loaded vehicles not counting the firemen and fire trucks. When I reached the junction in the road at the west side of town, one of the local policemen was stopping cars and trying to keep the area clear so that fire-fighting operations could be carried out without the interference of spectators.

The next thing I noticed was a long string of cars cutting across the Balmun Butane lot and avoiding the roadblock. It seemed that a number of people were more interested in getting a close look at the fire than in their own safety or in obeying the law.

When I finally got around the log-jam of cars and reached the scene of the fire, youngsters, and adults alike, were crowding around the firemen, standing on the hoses and generally adding to the confusion.

It is a wonder that the firemen were able to do such an excellent job of putting out the fire with all the interference.

I would like to remind all the adults, youngsters, and parents that it is very dangerous to gather within the warmth of a fire when the contents of a building is not known. If a tank of gasoline, butane, or other explosive material had been in the barn, there would, in all likelihood, be several new graves occupied by young and adult Friona residents today.

As for the firemen--and a few other people--they are aware of and accept the danger as part of their job. But, it is their job and not a whim of the moment.

In addition, it is -- in all cases -- against the law to follow a fire truck unless authorized to do so.

There have been other fires recently, but I have not seen the Lemming-like migration in the past that was so glaring Friday. Two Department Of Public Safety patrolmen and two city officials were on the scene, but some 50 cars jammed into the area during the fire.

Possession of good equipment and efficient fire department will not be of any benefit if spectators get in the way and hamper fire fighting.

Help our firemen protect property and lives. Stay a safe distance from fires--at home. Unless the fire is in your own home.

--TH--

It seems as if several people in Friona wasted a lot of time during the first part of the year.

I know that at least 50 people who devoted several hours to the 'pay your poll tax' campaigns. At the time, it looked as if their efforts were proving to be very successful.

After the city and school elections, it would seem as if the time was wasted. It is useless to sell a poll tax unless the citizen will take the time and effort to go to the polls.

The 76 voters appearing at the city election was bad--I thought. But, after only 69 persons cast ballots in the school board election, I can no longer use the Friona citizens as an outstanding example of political apathy (except that they are also included in the school district).

There are slightly over twice as many voters in the district as there are in the city. Yet, seven more ballots were cast in the city election where there was no competition whatsoever on the ballot. There was competition for one office in the school election.

Since there were only 69 voters, only 69 people need be considered by the new member when the proposal to raise taxes comes around. After all, the office holder is duty bound only

(Continued on page 2.)

SHERLEY BESTS FORTENBERRY

Tatum, Mabry Seated As Friona Trustees

Ellis Tatum (left) and Walt Mabry, winners of the Friona District trustee election Saturday, prepare to sign the commission and oath of office at the board meeting Monday night. Tatum was elected to fill the spot vacated by John L. Ray and Mabry was re-elected for another three-year term.

Ellis Tatum and Walt Mabry were elected to the Friona School Board in the lightest voter turnout of any district in the county Saturday.

A total of 69 residents of the district cast ballots in the Friona District election. An estimated 1,100 qualified voters reside within bounds of the district. A large number of those voting in the election were not parents of children now in school according to Superintendent Alton Farr.

In the race for county trustee-at-large, Paul Fortenberry received 68 votes and Bill Sherley received one vote in the Friona District. But, Sherley was

elected with a majority of 310 to 157 for Fortenberry when the results of the other three districts were compiled.

Mabry and Tatum took the oath of office at the board meeting Monday night in the superintendent's building. Mabry was re-elected while Tatum filled the spot vacated by John L. Ray.

A canvass of the Friona election results showed 68 votes cast for Mabry, 67 for Tatum, 2 for Curtis Murphree, 1 for Andy Hurst, 1 for Clyde Hays, and 1 for O. J. Beene.

Results of the trustee-at-large race by district were, Lazbuddie -- Fortenberry, 32;

Sherley, 87; Bovina -- Fortenberry, 43; Sherley, 180; Farwell--Fortenberry, 8; Sherley, 42; Friona--Fortenberry, 68; Sherley, 1.

Joe Wilson and Cloys Stanberry each received one write-in vote each in the county race.

D. C. Herring was chosen president of the Friona board for another term and W.M. Massie was elected vice-president. C. W. Weatherly was re-elected as secretary at the Monday meeting.

In other business Monday, Dan Ethridge, tax assessor-collector, reported tax collections during March of \$1,801.27. Delinquent taxes re-

maining on the rolls were reported at \$6,423.46 as of April 1.

Farr reported the condition of the cafeteria, activity, transportation and general budget funds and the report was accepted by the board. Payment of March bills was approved.

The board voted to allow the Friona FFA Chapter to farm the 27 acres of school land west of town in return for keeping the land free of weeds and preventing it from blowing.

The land carries some cotton and grain allotments. Proceeds from the farm project will go to the Chapter.

NEAR FRIONA FRIDAY

Firemen Quench Blaze, Save Part Of Barn

A raging fire consumed approximately two thirds of a 16 by 100 foot barn on Eric Rushing's farm one mile west of Friona at 10:30 Friday night.

Firemen arrived in time to extinguish the inferno and save part of the structure.

Flames were leaping several feet into the air and were visible from the city when the alarm was sounded. All three fire engines were utilized in fighting the blaze.

The fire was discovered by Bobby Traylor who lives in quarters a few feet north of

the barn. Two trucks and the department pickup answered the call. The main truck was emptied and returned to the station. The third truck was dispatched with its full tanks of water before the fire was quenched.

Spectators crowding into the area around the barn and lining the road near the scene tended to hamper the movements of the firemen and fire fighting equipment and created a needless hazard, according to fire department officials.

The barn was reported to have contained some hay, sacks of feed and brooder house for sows.

Damage was estimated at approximately \$700 by Rushing, owner of the barn.

Approximately 60 feet of the west end of the barn was consumed by the flames.

Black Community Schedules Rally

Black Community is sponsoring an "old fashioned" political rally and pie supper in the Community House at 8 p. m. tonight.

Nine candidates for county and state offices have indicated that they will be present, according to Mrs. Johnny Mars. Candidates have been asked

to briefly state their platforms and participate in a question-and-answer period after candidates have presented their brief summaries.

Indicating that they will be present are Dorothy Quicquel, Farwell, candidate for district clerk; Loyde Brewer, Friona,

county judge; Mabel Reynolds, Farwell, county treasurer; Bonnie Warren, Farwell, county clerk;

State representative candidates Bill Clayton, Springlake; W. T. 'Bill' Millen, Muleshoe; J. Frank Ford, Jr., Hereford; Pat Boone, Jr., Littlefield, dis-

trict judge candidate and Mrs. Edward McKay, Amarillo, State Board of Education candidate. Marshal Formby, candidate for governor, has indicated plans to campaign in the area April 16 and 17.

Residents are invited to attend the rally.

Good Fire Record Credit Increased

Friona's good fire record credit was increased from 5 to 10 per cent April 1, according to State Board of Insurance.

The credit is a percentage reduction of a given fire insurance premium because of a favorable fire record during the past five years. Under the new credit, fire insurance premiums are five per cent lower than during 1961.

The credit is determined through a complicated system involving the ratio between fire losses and amount of premiums paid during the past five years.

According to present regulations, the fire credit record cannot change more than five per cent each year.

In 1956, fire losses totaled

\$57,527 while premiums paid amounted to \$32,018. These figures were dropped and 1961 figures used to arrive at the additional credit. (1961 losses and premiums have not been received.)

Very good fire records were reported for 1957 and 1958 with only \$342 and \$552 fire loss respectively. The \$17,705 paid in 1959 was the least amount paid in premiums for any one year from 1956-60. There were \$2,794 fire losses reported in 1959 and \$1,503 in 1960.

For the 10 per cent credit, losses may equal 38 to 45 per cent of premiums. It is possible that losses are even lower in relation to premiums but the credit cannot charge more than five per cent each year.

RESOLUTION

BY THE CITY COUNCIL OF THE CITY OF FRIONA, TEXAS ESTABLISHING A CITY CLEAN - UP WEEK

WHEREAS, it has been determined that a city-wide clean-up week is in order for this time of the year,

WHEREAS, such said clean-up week would enhance the beauty of the city by removal of accumulated trash and debris,

WHEREAS, the clean-up activity would materially assist in the reduction of fire hazards, fly and mosquito breeding habitats and the general sanitation of the city,

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF FRIONA, TEXAS, THAT:

The week of 23-28 April 1962 be designated CLEAN-UP WEEK for the City of Friona and all citizens are urged to participate by gathering trash and debris from their private property and place same in alley ways where the city may remove same.

PASSED AND APPROVED THIS THE 9th day of April, 1962.

[Signatures]

Two Friona firemen are nearly lost in the swirling smoke and steam as they battle the fire in a barn west of Friona

Friday night. The two faces in the lower left of the picture are two of the spectators who crowded around the fire.

Baseball Team Sought Here

Local baseball fans will gather in the community room at the First State Bank Friday at 8 p. m. to organize a non-professional, adult baseball team to compete in the Irrigation Belt League.

Eight other teams are presently members of the league. Each team will play 27 games during the year, according to Cotton Renner.

Managers and sponsors of the 1962 Little League or persons interested in participating in the program are asked to attend the meeting so that preliminary plans for the season may be completed.

Plans are being made to play several games under the lights.

Jr. Variety Show Starts

Friona High School Junior Class will open their variety show Friday night at 8 p.m. in the High School Auditorium.

Billy Don Thomas will serve as Master of Ceremonies for the show which will follow a "Hawaiian Luau" theme. A wide variety of numbers will be presented by local and out-of-town performers.

Admission will be \$1 for adults and \$.50 for children.

Dry Cleaning Plant Opens

A new automatic dry-cleaning plant will open Friday morning at the location of the old Patton laundry west of Friona lanes.

One dollar refund will be given all customers bringing two dollars worth of cleaning on the opening day. Westinghouse cleaners with a capacity of eight pounds of clothes per load have been installed. Free coffee and donuts will be served.

The opening of the new plant will mark the second Friona business offering automatic dry-cleaning. Gib's Cleaners, south of the City Park on Main Street, began operation of an automatic machine last month.

Editorial Comment:

Let's Brighten Up Our Town With Spring Clean-Up

Spring Clean-Up, which has been observed in many communities in the United States for nearly 50 years, is here again.

Citizens of Friona are being asked to join in our local Spring Clean-Up campaign and brighten up their homes.

Cut all weeds along alleys and in yards and pile them in the alley so that city employees can reach them. Two trucks will be operating April 23 through 28 in an effort to carry all trash to suitable dump grounds. Trees and bushes should be trimmed and readied for another year's growth.

Take an hour or two to go over the things in your attic and basement or storage areas, and throw out any combustible trash that has accumulated. If you have old magazines and newspapers that you no longer need, throw them out. If there is a broken rocking chair or other piece of furniture which you will never use again, throw it out, too.

The same goes for old clothing, old mattresses, old pillows and other articles which have been gathering dust for years. Combustibles of this type feed fire.

Give your basement the same kind of inspection. Throw out old paint cans, old paint brushes, and oily rags. The National Board of Fire Underwriters reminds that by so doing you will not only clear your home of trash, but eliminate potential fire hazards.

We owe it to ourselves to reduce the possibility of fire.

11,700 Fire Fatalities in 1961

Last year in the United States there were 11,700 fire fatalities, compared with 11,350 the previous year. In addition to the fatalities, thousands last year were injured in fires.

Fires in the United States in 1961 cost \$1,209,042,000 in property damage alone. It was the highest dollar loss in history and an increase of 9.1 per cent over the preceding year.

It was the fifth year in a row in which fire caused more than \$1 billion in property damage. During the last five years our total property fire losses aggregated a staggering \$5,500,000,000.

Think what we could have done with five and one-half billion dollars if we could have halted fires altogether.

For instance, with this amount of money we could have built 10 Hoover Dams, 30 Empire State Buildings, and 50 Golden Gate Bridges, and still have a few dollars left.

It is more than we will spend during the next fiscal year for Federal aid to veterans, space exploration, and foreign economic and military aid combined.

It is more than our Federal Government will spend during the coming year on natural resources, commerce and transportation, including highway aid, and housing and community development.

With five and one-half billion dollars, the people of the United States could have purchased 3,000,000 compact cars.

A sum of this size could have provided tuition for complete four-year college educations for more than 900,000 young people.

Only by reducing fire hazards, can we hope to slow down the mounting toll in lives and steady upcreep in fire property losses.

Make Spring Clean-Up Bang-Up Job

The citizens of our town are asked to make Spring Clean-up a bang-up job. We can beautify our community by cleaning up backyards, empty lots, alleys, and our streets, parks, shopping centers, business districts, and civic buildings.

We will all profit by having made our community spic and span and safe for the coming summer.

The Man For Governor

Will Wilson is waging a hard-hitting campaign for Governor. He has come out for reducing the sales tax to 5% across the board by correcting the exemptions which make the sales tax practically impossible to administer.

He strongly endorses the present right to work law in Texas. Wilson advocates improving educational standards in Texas and equal rights for women. Wilson has taken a firm stand for a balanced State budget and he has been outspoken in his opposition to

a fourth term for any Governor. Wilson advocates limiting the Governor to one four-year term.

Wilson has done an outstanding job as Attorney General for Texas. Wilson's qualifications as a former District Attorney and Supreme Court Judge have served him well as Attorney General and eminently qualify him for the Governor's job.

We need a Governor who has proven his ability and independence in State Government. We need Will Wilson for Governor. W. H. Graham

Reeve Is High Man At District Meet

Floyd Reeve emerged as high point man in the district track meet in Canyon last weekend. In overall points for the meet, Canyon gathered 138, Tulla 127, Dalhart, 109, Friona 95, and Dimmitt 32.

Reeve won first in the 100 yard dash with a time of 10:1 seconds and first in the 220 yard dash with 22:6 seconds. He also placed third in the broad jump and helped win third in the 440 relay.

Tommy Sanders tied the field record of five feet, nine inches in the high jump to win first in that event. He and Reeve will participate in the regional track meet at Texas Tech College this weekend.

Tommy Baxter and Gary Snead tied in the pole vault and were given third and fourth place spots. Bobby Daniels tied for fourth in the high jump and placed sixth in the shot put.

Angel Aleman won third in the discus throw. Evert Gee, Larry Anthony, Tommy Baxter and Floyd Reeve carried the baton for third in the 440 relay. Dwight Bates placed seventh in the 880 yard run.

In the high hurdles, Tommy Sanders was second and Gary Snead placed sixth. Snead also placed sixth in the 180 yard low hurdles.

Larry Anthony was fourth in the 220 yard dash.

Dwain Phipps, Lynn Phipps, Dwight Bates and Cary Jackson teamed up to win fifth in the mile relay.

Jaycees Plan Easter Hunt

Children of ages from 1-12 will invade the Friona Jaycees' grounds west of town at 3 p.m. Easter Sunday in a scramble to find the prize eggs.

The Jaycees are sponsoring the Easter Egg hunt and will have special prizes for the finders of three special eggs. The hunt will be divided into three divisions and areas for each division will be marked.

Divisions are determined by ages with one for ages 1-4, one for ages 5-8 and one for ages 9-12. The hunt will begin promptly at 3 p.m. near the Rodeo arena west of town on U.S. Highway 60 and is open to all eligible children.

With smoke pouring out of all cracks of the burning barn, a young spectator ignores the small tongue of flame leaping through a crack near his left shoulder and mugs the

camera. A section of this wall was later pulled away to gain access to the fire.

This reminder from the Texas Farm and Ranch Safety Council. One of these days every farm and ranch will be a beehive of activity—don't forget your safety manners.

The coed queried a chum she hadn't seen for awhile, "Did that course in English help your boyfriends?" "No, he still ends every sentence with a proposition."

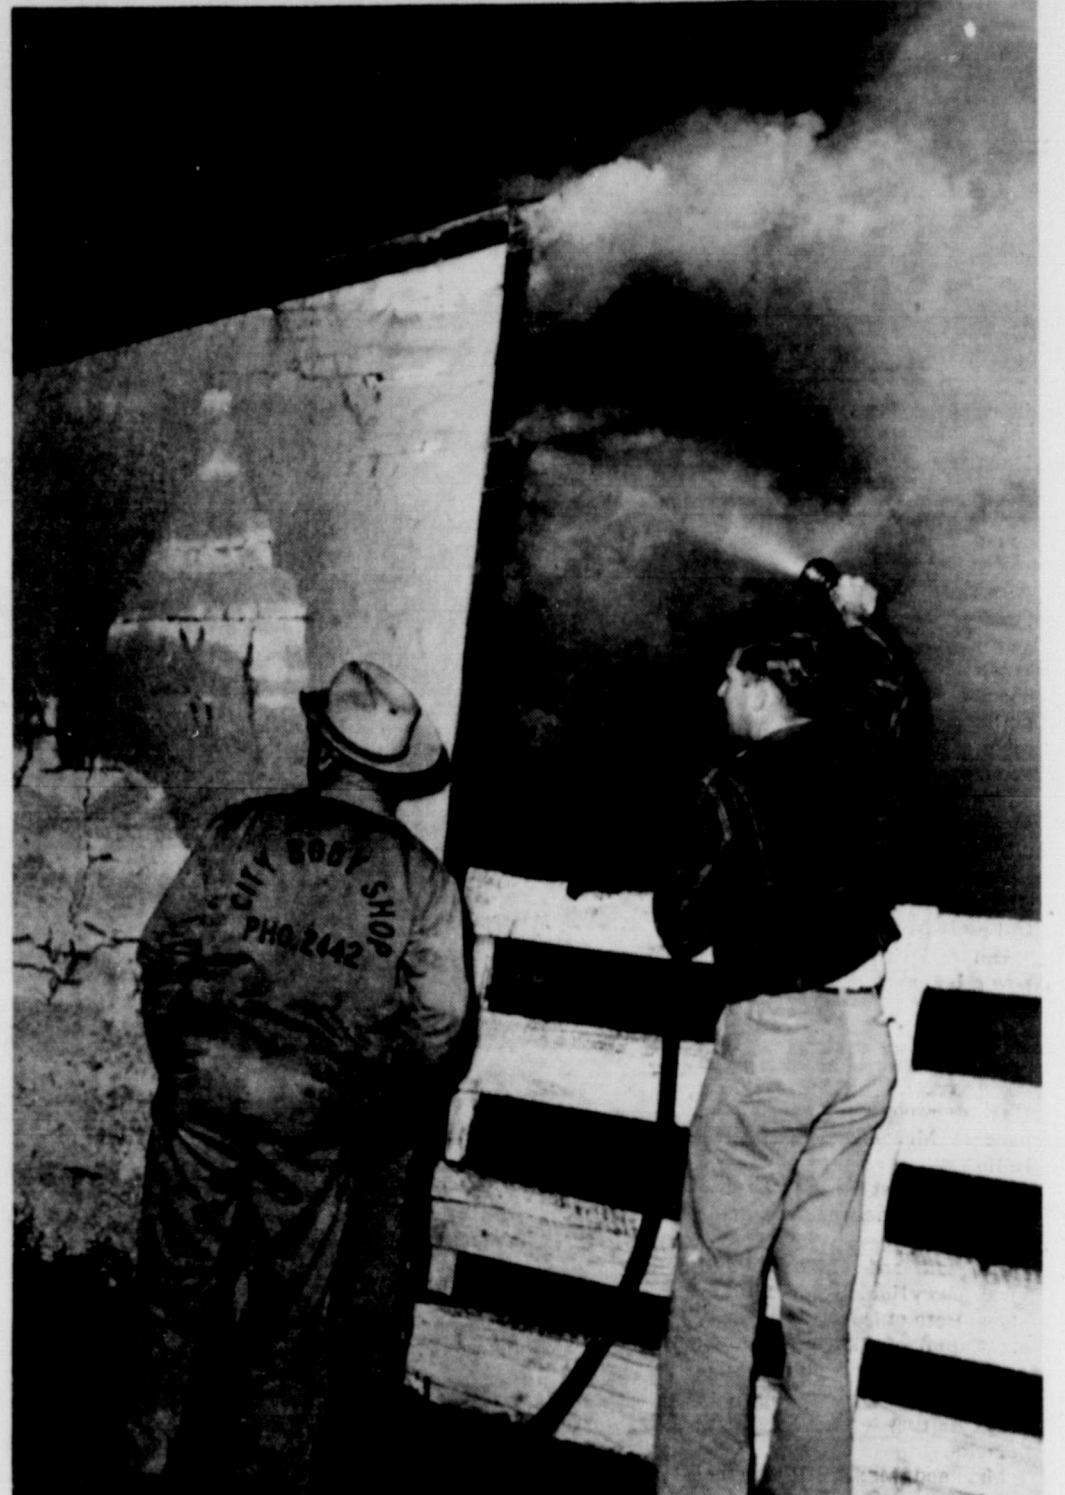

Doctor: "You're coughing more easily today," Patient: "I should be, I've been practicing all night,"Santa Fe Magazine

Auto Rams Semi-Truck

An automobile driven by Roy Leal, 27, of Lamesa, rammed into the rear wheel of a semi-truck and drove the rear axle from under the truck at 7:30 April 2 near Lariat.

Sheriff Charles Lovelace who was first to reach the scene but was joined by Noel Carter of the Highway Patrol, reported that Leal and a passenger, Alexander Gonzales, were thrown from their smashed car but were not seriously injured.

R. L. Russel, Midland, driver of the truck, also escaped injury. Leal was cited for driving on the wrong side of the road was jailed and released the next morning. He was fined \$ 0,50. The vehicles were approaching each other when the car darted across the line and caught the rear wheel of the truck, according to investigating officers.

Directing a spray of water into the smokey interior of the barn which caught fire Friday night on Eric Rushing's farm west of Friona is Fireman J. C. Blankenship. Leonard Coffey is shown with his back to the camera.

PARTY PRETTY—The tunic takes on new crispness in white-iced woven cotton over airy batiste. Claire Brooke frosts the confection with val lace at the neck, bottom, and cap-over puff sleeves.

The least significant difference for the years 1959, 1960, and 1961 were 1,195 pounds; 540 pounds; and 993 pounds respectively. There must be this much yield difference between any two hybrids before one would be considered superior to the other.

Baptists Begin Work On Camp Building

The First Baptist Church will conduct ground-breaking ceremonies Sunday at 2 p.m. at the Assembly Grounds, located six miles west and three miles north of Canyon.

This is preparatory to the building of a church cabin of some 2,200 square feet, constructed of concrete tile blocks, and to be used for youth encampments, and church gatherings. The Amarillo Baptist Association, of which the local church is a member, owns 3 1/3 sections of land upon which this development is being built.

Plans call for dining hall, administration building, swimming pools, tabernacles, track, baseball diamonds, individual church cabins, and a nine-hole golf course.

The Building Committee for the cabin is George Taylor, Chairman and builders, Weldon Dickson, Ed Hicks, Mrs. Lee Renner, and Mrs. Johnny Mars. The Finance committee is Junior Renner, Pete Buske and

Gene Wright Graduates

Black News

By MRS. GENE WELCH
There will be a political rally and pie supper held Thursday night April 12 at 8 p.m. in the Black Community Center. All interested persons are cordially invited to be present and hear the candidate's speeches. Candidates for county, district and also state offices are expected. They are; Dorothy Quicquel, district clerk; Loyde Brewer, county judge; Mabel Reynolds, county treasurer; Bonnie Warren, county clerk; W. T. Millen, state representative; J. Frank Ford Jr., state representative; Pat Boone Jr., district judge; Mrs. Edward McKay, state board of education from Amarillo, and Jack Seale representative of Congress, and possibly one of the candidates for governor. Don't forget. Thursday night, 8 p.m. Black Community Center.

Several families attended the Chamber of Commerce Banquet in Friona on Friday night.

Helen Fangman is at home now after spending three weeks in the hospital in Hereford, following a heart attack.

Mr. and Mrs. Bryl Fish and boys recently spent a week end in Brownwood visiting with her parents Mr. and Mrs. R. R. Holloway.

Visiting last week in the Ellis Tatum home were her mother and brother, Mrs. Mollie Dillingham and Joe of Albany, Mrs. Jerry Houlette, Debbie and Mary Beth of Dumas and Pamela Tatum of Canyon. They all returned to their homes on Sunday except little Debbie who is still visiting with her grandparents.

Mr. and Mrs. Bill Carthel and family made a business trip to Plainview Saturday.

Mr. and Mrs. Travis Stone and family were supper guests in the Gene Welch home on Thursday night.

Charles Meyers, student at West Texas State, spent the weekend with his parents, the Charlie Meyers.

Mr. and Mrs. Bryl Fish visited in the home of his sister and family, Mr. and Mrs. Carl Johnson of Amarillo on Sunday.

Loyd Prewett is at home again after having spent several days in the hospital in Amarillo following a fall on Saturday. Mr. Prewett has his feet in a cast and will use a wheel chair for possibly the next six weeks.

Mr. and Mrs. Bruce Parr are to be congratulated on the arrival of their new granddaughter recently in Lubbock.

Fern Barnett, J. R. Nazworth and W. F. Buske left Tuesday morning for a few days fishing at Lake Brownwood.

Mrs. Gene Welch and Veveca spent Saturday afternoon in Clovis.

Visiting in the K. E. Deaton home over the week end were Mr. and Mrs. Charles Buck and Mrs. Jim Howard all of Artesta, New Mexico and on Sunday Mr. and Mrs. Keith Duderpadt and girls of Hereford. Mrs. Buck and Mrs. Duderpadt are daughters of the Deatons.

Mr. and Mrs. Wesley Barnett and boys, Judy and Betty Barnett of Lubbock spent the week end in the home of their parents, Mr. and Mrs. Fern Barnett. Dianne Gibson and Connie Stone modeled in the Spring Style Show in Friona on Friday night.

Gene Welch and Kevin spent Monday night in Amarillo visiting his parents Mr. and Mrs. W. H. Welch.

Sunday guests in the Bill Carthel home were Mr. and Mrs.

Preston Smith Gives Platform

Senator Preston Smith of Lubbock is again seeking the office of Lieutenant governor of Texas.

The veteran West Texas lawmaker campaigned for the office of lieutenant governor in 1950. He placed third in a field of 12 candidates and led the ticket in 68 counties.

The "man with a plan" has drafted the platform for his campaign for Texas' second highest office.

His plan calls for simplification of the general sales tax; correcting the auto insurance merit plan; economical government without waste; correction of the inequities in Texas' women's rights; better schools; safe, efficient highways and farm - to - market roads; vigorous water and soil conservation projects; providing hunters and fishermen with an improved game and fish program; and better recreational facilities for our parks and lakes.

He is for small loan regulation and adequate care of the aged, the needy and the blind, he says.

"I firmly believe that a strong program of progress designed to bring new industry, new tourists, new businesses, and

Wayne Carthel and Jimmy of Hereford, Mr. and Mrs. Bob Carthel and family, Mr. and Mrs. Joe McCollum all of Amarillo, and Mr. and Mrs. Terrell Hodges of the Jumbo Community south of Hereford.

Travis Stone is at Nacogdoches at the bed side of an uncle who was seriously injured in a car wreck on Sunday.

Mrs. J. K. McKenzie of Miami, Texas and Mrs. H. V. McCabe of Dawn visited in the Bill Carthel home on Tuesday.

The Black Home Demonstration Club met Thursday afternoon in the home of Mrs. Clyde Hays for a regular meeting. In the absence of both the president and vice president Mrs. Fern Barnett presided over the business. Mrs. Ralph Price had charge of the program "Happy Vacationing." She demonstrated how a suitcase should be packed and many time saving tips were given. Refreshments were served to Mesdames; Rosco Ivie, Fern Barnett, Ralph Price, Johnny Mars, Bill Carthel, J. R. Braxton, Les Gibson and the hostess Mrs. Clyde Hays. The next meeting will be April 19 in the home of Mrs. Rosco Ivie and each member is to bring an apron parade.

new investments to Texas, will enable our state to grow soundly, without increasing tax rates," Senator Smith has stated.

"If I am elected Lieutenant Governor," he adds, "I will work hard to help build a program of progress whereby Texas can attract new industry, new tourists, and new income that will mean better jobs, and more jobs, for all Texans."

He is a graduate of Texas Tech in Lubbock, where he has been in the theater business and an active civic worker since 1936.

-- A recent study of crime in Texas, conducted by Dr. Rupert C. Koeninger, Director of the Department of Sociology, Sam Houston State College, shows rate of commitment of persons to the state prison for each county in the state for the years 1920 to 1960.

The sociologist and criminologist doubts the political significance of one of his findings, but admits it is interesting in view of the international situation. Kennedy county Texas did not show any commitments to prison during the 40 year period, while commitments for Castro County increased 600 per cent in the ten year period just ending.

"Well, well, Mrs. Jones," said the high school principal "and how is our George doing in the army?"

"Just wonderful," replied the beaming mother. "He has already made AWOL, and he expects to get a court martial next."

TAX-MAN SAM SEZ:

The County Agents will help again this year with the Internal Revenue Tax Education Program. They will have copies of the tax booklet designed especially for farmers -- "The Farmer's Tax Guide" -- for the farmers in their county early in December. Many of the

County Agents, in cooperation with Internal Revenue and Texas A & M Extension Service Farm Management Specialists, have worked out short schools in their local communities to help promote a better understanding of our Federal tax laws.

Our American tax system depends upon the voluntary compliance by taxpayers. The Extension Service people are to be commended on doing their part to promote a better understanding of the tax laws. When a taxpayer understands the law he can pay all the tax he owes but he won't pay more than he owes.

THE AMERICAN WAY

Depends On Who Does the Fixing.

THE GEHL MIX-ALL

- GRINDS
- MIXES
- DELIVERS

LET'S YOU BE YOUR OWN BOSS

The Gehl Mix-All with the swinging auger and optional crusher-feeder gives you the fastest, finest grinder-mixer in the field. You can lower your feed costs by doing your own feed formulating, grinding, and mixing and do it cheaper and in far less time than it takes to haul it back and forth.

Control the quality of your mixture with your own grain, antibiotics and other additives. You can own a PTO Feedmaker that mixes the exact amount of feed you need, when you need it... then hauls it where you want it and unloads it into bunks, bins or bags.

The four-speed auger lets you select the speed to keep the mill full... provides positive delivery of feed to the crusher. The optional crusher-feeder with sure-grip action speeds grinding of ear corn, bale slices or small grains. And continuous circulation gives you a uniform formula and top quality mixture every time. It's the perfect way to lower feed costs and increase profits on every type of livestock feeding.

SWINGING AUGER FEEDER. Operates at any angle, adjusts vertically to any height, with four auger speeds and handy shift lever.

OPTIONAL CRUSHER-FEEDER HEAD. For the 15" Gehl Mills and Mix-Alls. Acts as both crusher and compression feed roller. Feeds roughage and ear corn into grinder at a steady flow.

GEHL More than a century of service.

Name Spelling Bee Winners

Sherry Roberts, eighth grade student in Farwell Schools, is champion speller of Farmer County.

She earned the title in county spelling bee conducted at Bovina Schools Wednesday of last week and will represent the county in regional bee which is slated to be in Amarillo April 28. Ten students from Friona, six from Farwell and two from Bovina participated in the bee. Miss Grace Paul, Bovina

teacher, was in charge. Mike Crissom of Bovina was winner of the junior division. Students participating are sixth, seventh, and eighth graders.

Winners at regional will compete on national level.

The Amarillo Globe - News sponsors the contests in this area.

He satisfieth the longing soul. —(Psalms 107:9).

Ask God to lead you to the human companionship you desire. Ask not how to receive, but how to give and where to give. God has a perfect place for you, where your talents and abilities are needed and appreciated.

Listener-in-ers to coffee cup conversation this week may have gone away with the idea that a lot of Frionans were planning a trip to Hawaii. Talk of grass huts, palm trees, monkeys and coconut trees came up just about any where you happened to go. Plans are being made and some work has been done on decorations for the eighth grade banquet, which is scheduled for April 14. There are about 100 eighth graders and about the same number of mothers are actively engaged in affairs pertaining to the banquet.

Third grade students crowded around Mrs. June Rhodes, teacher, and Matt Brown, at the Benger Air Park last Thursday while Brown briefly explains the operation of the aircraft. Each member of the class was permitted to sit in a plane and move the controls.

Steve Hargus, Mgr.

Kay Struve On ACC Honor Roll

Kay Struve, daughter of Mr. and Mrs. Steve Struve of Friona, is listed on the Dean's Honor Roll at Abilene Christian College for her outstanding grade point average last semester.

Miss Struve, a 1961 graduate of Friona High School, is a freshman English major at ACC.

Byron Beckman, Route 3, Texarkana, set a new dryland record in 1961 in the Texas Hybrid Corn Production Program—224 bushels an acre. He planted Texas 30 and used plenty of fertilizer to set the new record. The State's corn producers also set a new record for average yields an acre—30 bushels. About 88 percent of the State's 1961 corn acreage was planted to corn hybrids.

BEACH COVER-UP—Ideal for slipping over a swimsuit and rolling on the beach is this all-cotton knit shift. It buttons at the shoulders and has deep side vents for comfort. Horizontal stripes give a clean look to the Jantzen Jr. design.

Doctor: "Find out that injured man's name so we can tell his relatives."
Nurse (a few minutes later): "He says his relatives know his name."

Jerry, six years of age, was getting ready for the first day of school. He wasn't very anxious to start and his mother's tear-filled eyes only added to his reluctance. As they drove toward the school and his mother's tears continued to flow, he said consolingly, "Aw, Mom, don't take it so hard. Just as soon as I learn to read comics I'll quit."

Something To Think About

6th. Street Church of Christ Box 515 -- Friona, Texas

An AP release dated December 1, 1961 at Los Angeles, described the results of a poll of ninth-graders at a Los Angeles junior High School. While nearly HALF of these ninth-graders answered "Yes" when asked if they would cheat if

they had a chance -- most of them said that they were basically honest. A student-conducted anonymous poll of 1,174 students asked if they were in a position to see test papers on teacher's desk, would they check the answers. Their answer indicated that "anyone given a chance to cheat and not get caught would take it." And yet 94% of these students represented themselves as "basically honest" and as unwilling to "compromise ideals for power, money or prestige." Naturally there are many influences that contribute to this questionable attitude, we shall mention only one. Statistics indicate that 85% of the young people of America have no church connection. Only 15% of each one hundred young Americans go to church -- regularly. This is deplorable, and for emphasis sake, consider this: When a tornado struck Waco, Texas one-tenth of one percent of the cities population was killed, and it was considered a major calamity; yet when the majority of our young people are suffering from "spiritual malnutrition" to the extent that they consider cheating basically honest, we look upon it with indifference and apathy. None are so blind as those who will not see!!!

THE MAN ON A DONKEY

Next Sunday our attention will be fixed on a man very much like ourselves. To be sure, He lived in a different part of the world and in a different period in the history of the world. . . . long before automobiles and radios and therefore, the circumstances of His life are often quite different from ours.

But as far as His human nature and personality are concerned He was very much like we are. He was the same strange mixture of body, mind and spirit that you and I are. He had a home, a family, friends, and enemies; He had a conscience and a dream. This is the principal stuff of every human life. Yet in many ways how different He was. He so loved God and others that He completely forgot Himself. He walked straight into danger because He felt God had chosen Him for this particular task. His mission was to save people from destruction. That was, and is still, a large order.

This man on a donkey, riding right into the face of danger and death, in Him I see something unqualifiably good and around Him I see gathered together the forces of Goodness. I believe in him. Granted that arranged against Him are tyranny, cruelty, disloyalty, violence, corruption in high places; nevertheless, I Take My Stand With Him.

Wallace H. Kirby

The New Granular Systemic Insecticide that "Pre-Controls" APHIDS • MITES LEAFHOPPERS THRIPS • FLEA BEETLES

One of the most effective ways to apply Di-SYSTON is by drilling at planting time. Roots absorb Di-SYSTON, protect entire plant up to 7 weeks after emergence.

Advantages of Granular Di-Syston

1. Protects plants up to 7 weeks after application.
2. Easy to handle and apply.
3. No measuring or mixing.
4. No water to haul.
5. No nozzles or strainers to clean.
6. No drift of dust or spray.
7. Harmless to predators.

Start At Planting Time To Cut Cotton Costs PRE-EMERGE With

Dwight B. Troutman
Aberdeen, N. C.

With Karmex DL, we save approximately \$7.50 per acre in chipping costs and eliminate two to three cultivations.

For More Information On These Chemicals---See

PHONE 9111 CUMMINGS FARM STORE

FRIONA, TEXAS

CHEMICAL WEED CONTROL cuts cotton costs—Some growers and agricultural authorities say by as much as \$60 per acre, in some cases.

IT STARTS RIGHT AT PLANTING TIME with Du Pont "Karmex" DL. When you pre-emerge with "Karmex" DL, cotton rows stay clean up to 8 weeks; and there's no rush to cultivate the middles. "Karmex" DL is excellent insurance, particularly in a wet season.

GET YOUR COTTON OFF TO A GOOD START. Avoid costly skips and replanting by using seed treated with Du Pont Ceresan*. At the same time, pre-emerge with "Karmex" DL to control weeds without costly hoeing—weeds that would otherwise rob young cotton of fertilizer, moisture and sunlight.

General Telephone Co. Annual Report Shows \$35 Million Income

During 1961, General Telephone Company of the Southwest gained 19,304 telephones, increased the percentage of dial operated telephones from 95.1 to 97.3 per cent and increased plant investment to a record-breaking total of \$128,868,450, according to the Company's 1961 Annual Report just released.

Total telephones in the Company's five state area of operation at the end of 1961 was 334,250, with approximately 18,600 of the total having access to Direct Distance Dialing (DDD) which permits customers to dial their own station-to-station long distance calls.

Total operating revenues during 1961 amounted to \$35,666,000, a 7.22 per cent increase over 1960 revenues, while total operating expenses and taxes in 1961 amounted to \$29,451,000, a 6.08 per cent increase over 1960. Operating taxes per average main station during 1961 amounted to \$29.56 compared to \$28.19 in 1960.

Expansion during 1961 included the conversion of 11 exchanges from manual to dial operation, replacing dial equipment in 13 offices, establishing one new dial office and one new microwave system, and construction or modeling of 20 buildings of various types.

Gross plant additions for 1961 totaled \$15,436,000.

The report pointed out that salaries and wages for the company's 3,274 employees during 1961 totaled \$14,193,755 and that employees and retired employees received employment benefits and pensions totaling \$1,343,858.

Continued expansion and im-

Frionan Makes High Grades At University

Charles Alvin Wagner, son of Mr. and Mrs. Melvin Sachs, Route 2, Friona, was recognized today at the annual Valparaiso (Ind.) University spring honors convocation for superior grades during fall semester, 1961-62.

Wagner, a senior in the College of Engineering, earned a 3.00 average out of a possible 3 points.

Reuben Frodin, American Universities Field Staff visiting lecturer and specialist on Africa, addressed the convocation after which 207 honored students were guests of Dr. O. P. Kretzmann, VU president, at a luncheon.

A 1,000-pound dairy cow can eat enough alfalfa to maintain herself and produce nearly 19 pounds of milk with four per cent butterfat daily.

\$5 Banknotes Enter In Race For Lt. Gov.

Facsimile \$5 Republic of Texas banknotes, printed on parchment so crinkly and genuine looking that Sam Houston would have accepted it at face value without a second glance, made their appearance throughout the state this week as part of Senator Robert Baker's race for Lieutenant Governor.

On the reverse side of the bank - notes is printed, in appropriate formal language, the bearer's certificate of membership in the "Be for Baker Club," declaring that this is "the currency of good and progressive government in the State of Texas."

An announcement from Baker's Dallas headquarters said 100,000 of the unique banknotes will be distributed during the next six weeks, being offered to Baker supporters through county campaign headquarters and chairmen throughout Texas.

Baker confidently predicted that he would be in the run-off election with "the candidate who has already committed himself to a state-wide special interest group," and that he would win the run-off because he has made no commitments to any group or organization and will be free to serve the voters to the best of his ability and his 10 - years' experience in the Legislature.

Mr. and Mrs. Calvin Martin recently returned from Campo, Colo., where they visited in the home of Mr. and Mrs. Eugene Nidey.

The mountaineer found a small mirror, the first he'd ever seen. He looked into it and said with surprise: "By cracky, it's a pitcher of my old pappy." Sentimentally, he hid the mirror under the bed. His wife saw him hiding it, and when he left the house, she took the mirror, looked into it, and snorted: "So that's the old hag he's been chasing."

Methodists Plan Easter Cantata

On Palm Sunday night, April 15 at 8 p. m., the Friona Methodist Church choir under the direction of Mrs. Bob Coleman,

will present their Easter Cantata "My Redeemer Liveth," compiled from works by Handel and Mozart.

The adult and youth choirs have combined for this presentation. The Cantata will be complimented by an impressive film strip depicting the life of Christ.

Featured in solos or ensembles are P. L. London, Mrs. J. K. Anthony, Lowell Bynum, Mrs. H. L. Outland, Jimette McLean, Wayne Cason, Sharon Reeve, Floyd Reeve, Kay Johnson and Marca Lynn Massie. The public is invited to attend.

KNOW HIS CAPACITY

At the end of an examination, the teacher in a mountain school told her pupils to write a pledge that they hadn't received or given any help. One gangling youth, who had suffered throughout the test, wrote: "I ain't received no help. And God knows I can't give none."

Local Style Show

Reflects Easter Fashions

Lovely formals were also modeled at the style show event. Pictured here are Linda Castleberry and Cynthia Guinn. Directing their entrance is Mrs. Ralph Wilson.

A white background accented with large yellow flowers decorated the stage for the Easter Parade Spring Style Show presented by Friona Federated Clubs Friday night. Included in the setting was an old fashioned ice cream table and chairs and a white iron lattice-work bench.

Eighty models appeared before a large audience. They were sponsored by the following merchants: Hurst's Department Store, Foster's Dry Goods and Ready-to-Wear, Lu Nora's Children Shop, Jarrell's Variety Store, Allen's Jewelry, Ruthie's Flower Shop and Mary Lou's, Charm and Patti's Beauty Shops.

Committee chairmen for the show were Mrs. Tom Jarboe and Mrs. J. T. Gee. Chairmen of the decorating committee were Mrs. Sloan Osborn and Mrs. J. C. Claborn. Mrs. Newman Jarrell Jr. was narrator for the event.

During the first intermission, original comical hats were modeled by Mrs. Flake Barber, Mrs. Otho Whitefield, Pat Burton and Janell Daniel, with Mrs. Charles Allen, narrator, Mrs. Wm. Beene presented vocal selections, accompanied by Mrs. Roy Miller, during the other intermission.

Jan, Gay and Holly, daughters of Mr. and Mrs. Louis Welch are wearing identical dresses designed and made by their mother. Materials were purchased at Jarrell's Variety.

Mrs. Dale Williams and her small daughter, Tammy, make their appearance together on the stage at the High School auditorium. They are modeling spring costumes for the Easter Parade show.

Miss Janet Buckley demonstrates the advantages of having a three piece outfit for the spring and summer days. The sports costume was one of all types of clothing modeled.

A last minute check is made by models before they make their stage appearance before the spotlights at the style show.

Ricky Johnson, son of Mr. and Mrs. Truett Johnson, wears a swim suit as he strolls across the decorated platform, proving that spring is here and it is time to prepare for the swimming season.

Bridal Shower Courtesy To Miss Robbie Boggeos

Miss Robbie Boggeos, bride-elect of Guy Welch, was guest of honor at a miscellaneous shower Saturday afternoon in the home of Mrs. Paul Smith. Assisting Mrs. Smith with hospitalities were Mesdames Johnny Hand, Rene Snead, James

Procter, Kirby Williams, Mayo Phipps, Raymond Fleming, L.R. Hand, David Carson, D. L. Carmichael, John Hand, John Hays, Hardy May, John Blackburn and Ella Faye Holcomb. Guests calling from 2:30 to 5 were greeted by Mrs. Fleming and registered by Mrs. May, who presided at the bride's book.

Floral arrangements were used in room decorations and a white miniature bride was the adornment on the register table.

The serving table was laid with a handmade white organdy cloth and centered with a bouquet of orchid flowers arranged on a white milk glass stand. Other decors included orchid candles and orchid floral napkins. Mrs. Procter and Mrs. Hays presided at the punchbowl. Assorted cookies, mints, nuts and punch were served to forty-four guests.

Mary Dorcas Class Meets Saturday

Mrs. W. M. White was hostess to members of the Mary Dorcas Sunday School Class of the First Baptist Church April 7 in her home.

Mrs. Bulah Massey opened the meeting with a prayer and Mrs. White gave a devotional.

Mrs. Lucy Jones, class teacher, presented the lesson following the reading of Ephesians, chapter 1.

The hostess served angel food cake, cookies, coffee and tea to Mesdames Sarah Vernon, Florence Buske, Bulah Massey, Sally McFarland, Florence Day, Alpha Baker, Rosa Anderson, Leona Wolfe and Lucy Jones.

Of Interest To THE WOMEN

Global Neighbors Is Program Theme

Sixteen members of the Friona Woman's Club were present for an interesting program, "Hemispheric Neighbors" given March 28 in the club house. A quotation by Abe Lincoln, "with malice toward none, with charity for all, with firmness in the right, as God gives us to see the right", accented the program theme.

Mrs. F. L. Rogers led the club collect and roll call was answered with a current event. Mrs. Roy Slagle, president presided at the business session. "South America Trends" was a film shown and narrated by Carl Maurer, and Mrs. Wesley Hardesty spoke on "Republic of Panama." A film, "Unchained Frontier", was presented by Jay Sanders.

Hostesses, Mrs. Bert Shackelford and Mrs. Floyd Schlenker, served refreshments to those attending.

Miscellaneous Shower Honors Bride-Elect

A recent bridal shower honored Miss Peggy Taylor in the Fellowship Hall of the First Baptist Church.

Pink and white floral arrangements decorated the entertaining room and serving table. Refreshments were served by hostesses, Mesdames Gary Hicks, James McLean, R. B. McKee, O'Neal Greeson, Glynn Don Hughes, O. B. Moyer, Ronald Smiley, Charles Allen, Lewis Smith and Philip Weatherly.

Attending and sending gifts were Mesdames Charles Burkett and J. D. Burkett, Canyon; Arley Bailey, Ardmore, Okla.; Floyd Coker and J. L. Brooks, Hereford; James Taylor, Bovina and J. D. Carpenter, Roy M. Miller, Earl Miller and Jimmy Briggs, Lazbuddie.

Also Mesdames A. A. Crow, Glen Williams, C. S. Crow, G. D. Coker, J. R. Coker, Ralph Smith, W. A. Foster, Bill Turner, Cecil Bass, Pete Hollis, M. C. Osborn, Hoyt Smith, Billie Fairchild, Mae Stubbs, Russell O'Brian, Linda Chesser, Elroy Wilson, Lela Gilmer, Gene Bracken, C. L. Bracken, J. P. Wilson, Raymond Adams, Thomas Gibson Jr. and Walter Cunningham.

Also Mesdames John Wright, Dan Ethridge, Lee Renner, Bill Baxter, Cayson Jones, Lucy Lewis, J. W. Baxter II, Paul Spring, Waymon Wilkins, J. L. Taylor, M. L. Howard, L. D. Taylor, Ethel Adams, Wright Williams, Henry Lewis, Frank Spring, Bill Burton, Jack Nelson, James Cunningham and Joe Douglas.

Also Mesdames Paul Strickland, Kenneth McLellan, Monroe White, W. B. Fulgham, Larry Fairchild, Leon Massey, Ruben Taylor, Donn Tims, Leo Bails, Richard Perkins, Sloan Osborn, John Bengner, W. F. Buske, Billie McKee, Jerry Loflin, Fern Barnett and E. R. Day.

Also Mesdames Raymond Jones, J. V. Houser, Orville Houser, Frank Truitt, J. T. Gee, Allen Stewart, Tom O'Brian, Tom B. Mason Jr., T. E. Lovett, Irene Gee, Pete Buske, David Moseley, Hazel Weir, Kenneth Williams, Mary Moseley, Mae Magness, J. E. Knight, Charles

Scales and Lee Campbell. Also Nelda Douglas, Gayle Knight, Lola Goodwine, Jane Fulgham, Sallie Sue Howard, Jere Buske, Betty and Judy Barnett, Martha Wages, Lila Gay Buske, Mary and Martha Knight, Adelle Smith, Jo Ann Altman and Dale Smith.

Society Honors Mabry Couple

Jimmy and Betty Mabry, Texas Tech seniors, were initiated into Phi Kappa Phi in ceremonies Thursday at the college.

Texas Tech National Honorary Society consists of graduating students ranking in the upper 10% of the senior class. Jimmy is the son of Mr. and Mrs. James Mabry of Lazbuddie, formerly of Friona. He is a graduate of Friona High School.

PTA Elects Officers

Officers were elected at the business meeting of the PTA assembly March 29 in the High School auditorium. Re-elected were Mrs. Doyle Cummings, president; Mrs. I. T. Graves, treasurer. New officers were Mrs. Curtis Murphree, vice-president and Mrs. Lee Renner, secretary.

The program was a panel discussion of the athletic problems existing in the Friona schools. The panel consisted of coaches, Baker Duggins, Ver-

non Scott, Kenneth Miller, Tom Jarboe, Kenneth Livingston and Jay Wilson. Andy Hurst was moderator.

Hostesses Mesdames Carl Schlenker, Leonard Nettles and Wes Long served refreshments in the cafeteria following the program.

Spring Luncheon Fetes Tech Exes

The annual spring luncheon of the Texas Tech Home Economics Ex-Students, will be held in the New Ballroom of the Student Union Building on April 14 at 12 noon. Traditionally, this luncheon is planned to coincide with the Annual Open House of the School of Home Economics, Texas Technological College.

The program will be "The Lucky American" as given by Mr. Tom Hart, of Southwestern Public Service, Amarillo. Mr. Hart has served the Lubbock area in the past as Utilization Manager.

The Scholarship Committee will give a report on the Margaret W. Weeks Scholarship Fund and officers for the coming year will be elected.

All former students and faculty eligible to attend the luncheon. Graduating seniors of the School of Home Economics are invited.

Price of the meal and dues will be \$2.25, payable at the door. Reservations may be made by contacting one of the following ex-students by April 11: Mrs. David M. Hansen, 2312 - 28th Street, telephone SH 4-8836 or Mrs. Bill K. Henry, 3816 - 26th Street, telephone SW 9-4544.

Officers serving this year are: Mrs. J. G. Keyes, Jr., Miss Joy Parnell, Mrs. David M. Hansen; Mrs. Bill K. Henry.

Mr. and Mrs. J. T. Gee are in Austin this week attending the Texas Elementary Principals meeting. They left Friday and will return Friday.

Relatives Visit In Hyde Home

On April 3, Rev. and Mrs. Haskell Bolding, Jan and Mark flew from Corbin, Kentucky to visit in the home of Mrs. Bolding's parents, Mr. and Mrs. H. A. Hyde.

Other guests on that same day were Mr. and Mrs. Truell Hyde and sons, Trean and Brad of Lubbock.

This was a surprise occasion, for the Hydes, Mr. Hyde was observing his birthday and he was presented with a decorated cake and large Bible.

Rhea 4H Girls Meet Recently

A group of Rhea 4-H girls met recently at the home of Mrs. Cordie Potts to note demonstrations of 4-H favorite foods given by Mrs. Potts and Mrs. Ray Martensen.

Mrs. Martensen and Mrs. Potts discussed kitchen tips for 4-H cooks and demonstrated "Easy-do chocolate fudge" and sandwiches and banana milk shakes, followed by the girls preparing these recipes.

Members present were Greta Mears, Ruth Armstrong, Sharon Martensen, Shirley Schueler and Terry Schueler.

LOCAL
George Grant has recently moved to the Veteran's Hospital in Fort Lyon, Colo.

4-H Boys, Girls Present Program

The lunch room at Lazbuddie school was the scene for a regular meeting of Lazbuddie Home Demonstration Club members March 29.

Mrs. Joe Briggs conducted the business session and 4-H boys and girls presented method demonstrations they are to give at the county meet.

Refreshments were served to six members and three guests, Miss Ettie Musil, Mrs. Gerald Ramage and Mrs. Ned Foster.

Next meeting will be in the home of Mary Reardon April 12. The program will consist of making smocked pillows. Visitors are invited to attend.

A floorwalker, tired of his job, joined the police force. Several months later, a friend asked him how he liked being a policeman.
"Well," he replied, "the pay and the hours are fair, but one thing I like is the customer is always wrong."
.....Santa Fe Magazine

Auxiliary Discusses Convention Races

Members of Friona Fireman's Auxiliary met April 9 at 8 p.m. in the community room of the Friona State Bank for a discussion of beginning practice for the Water Polo and Pumper races that will be conducted for the semi-annual Fireman's convention at Boys Ranch May 12.

The business meeting was conducted by Mrs. Ralph Shir-

ley, president. Mrs. Shirley and Mrs. J. P. Sims, hostesses served refreshments to Mesdames Lewis Wheeler, J. C. Blankenship, Robert Zetsche, Dan Koeler, Joe Mann, Tommy Jones, L. D. Taylor, Lee Campbell and Luben Taylor.

Mrs. Joe Mann won the door prize, a planter.

HEART-TO-HEART PILLOW TALK—Smocked decorator pillows have created such a stir in sew-it-yourself circles that a new heart-shaped pattern has been developed. Penne Percy, the 1962 Maid of Cotton who's also a do-it-yourself fan, is shown with three of the new pillows made of red cotton satin by Everfast. The pillows are included in the Maid's special wardrobe made from McCall's patterns.

(By Pat Adams)

If anyone asked me if I believed the old adage, "misery loves company," my answer would be a definite "No." However, it does give me a lift to have Star readers call and remind me that we don't make all the mistakes.

Recently several people called my attention to an error in the Amarillo News. Apparently the society staff of that paper received pictures and engagement stories of two Frionans, then switched them before they got in print.

Couples involved in the mix-up were Lila Gay Buske of

Friona and Don Max Vars of Tulla and Leona Maria Venhaus of Happy and Arnold Fangman of Friona. The last report I had was that the error had been corrected, so guess "all's well that ends well."

Our telephone difficulties took a new twist Monday evening. When attempting to call the office from home, I discovered that by simply dialing the number 7, which ordinarily means you are on the line, I could get the Flake Barber residence and Thomas Parson residence at the same time.

Blaming the trouble to the high wind, I decided to wait a few minutes before attempting to dial anyone. Upon my second try, the same thing happened, so I gave up and waited an hour. By that time I could get through to the office by normal procedure.

dern automatic dry cleaning plants in this section of the country will open in Friona in the very near future.

Mr. and Mrs. M. M. Elder, who formerly farmed in the Hub community, are opening the dry cleaning plant in a new building located where the coin operated laundry collapsed a few months ago.

Construction of the new building for Friona's first Drive In restaurant is going quite rapidly and before very long this will be another link in the growing chain of retail business men in town.

Would it surprise you to learn that there are more than 120 retail merchants operating in Friona at the present time.

A large number of farmers are having wheat fields sprayed for insects. It is real interesting to watch an airborne spray crew work in methodical fashion across a field. This type spraying for insects is growing in popularity and seems to be most effective.

As the end of school draws near, more and more activities are scheduled each week. Some of the homemaking classes hosted a tea for all students who will be freshmen next year and their mothers Wednesday afternoon.

It seems that just about every girl in the eighth grade class plans to enroll in a homemaking class this fall.

Editor Travis Harrell has been the target of a lot of good natured ribbing during the past few weeks. Every mistake he makes is discounted as being the direct result of his impending wedding. All of us know that a prospective bridegroom is just naturally supposed to be off on a cloud, so we refuse to let him be different.

After he was awarded first place in the column writing bracket of contests at Panhandle Press Convention in Amarillo last weekend, we just had to give him credit for being able to think.

Those of us who work with him were almost as proud of his plaque as he was, and even though he doesn't say so, we know he is proud of it, too.

Anyone having furnished apartments to rent during summer months shouldn't have any trouble getting them rented. Several local couples will be needing a place to live in the near future.

It is much better to tell people how to get on than to tell them where to get off.

Early hours and speed don't mix; most deaths occur twixt one and six.

Don't Forget Your W-2's

That W-2 tax form is a mighty important document! According to John J. Sloan, Administrative Officer, Internal Revenue Service, Lubbock Texas, refunds cannot be paid without required W-2 withholding tax certificates; credit cannot be given for taxes withheld; and failure to include the certificate with your tax return will mean return of the incomplete form to the taxpayer.

Mrs. O'Brian Is Guest Speaker

An interdenominational meeting of local churches was at the Assembly of God Church Friday with Mrs. Russell O'Brian from the Methodist Church as the speaker for the program.

Members of the Calvary Baptist Church presented the music and devotional. A special musical selection was sung by Mrs. Belle Maynard.

Next meeting will be June 29 at the First Baptist Church. Roll call will be answered by naming a favorite hymn, and the speaker will be from the Congregational Church. Subject for the year's programs is "People of the Bible". Refreshments were served to those attending by the host Church.

Hospital Notes

Admitted to Parmer County Community Hospital April 4, 1962 to April 9, 1962. Mrs. Fred Lookingbill, Friona, OB; Pedro Madrigal, Jr. Friona, Med; Lola Goodwine, Friona, Med; Connie Stanberry, Bovina, OB; Billy Charles

A lot of blade—and a low, low price!

Here's a utility blade priced within the reach of anyone who owns a light tractor. We state flatly, this will be the largest selling light blade in the country, because it is the greatest value. All welded, sturdy, 240 lb. construction. 13" mouldboard plus 6" replaceable cutting edge of 1/2" grader-blade steel. 8 adjustments for angling and reversing.

If you need a larger, more versatile blade for specialized ditching and terracing work, Servis makes big tough ones that tilt, angle, and pitch in more directions than the average man can think of. But for simple utility work, this Lone Star blade is it!

Plan to see it this week at ...

Parmer County Implement Co.
Friona

Members of the Junior Class are sponsoring a variety show at the auditorium Friday evening. This show has met with great success in the past and many of the acts are most entertaining.

Anyone desiring to spend an evening filled with laughs should be on hand when the curtain rises.

This same class is also sponsoring a salad supper at the cafeteria Friday evening. Although I haven't checked starting times of these events, I'm sure those who planned it were thinking of making it possible for persons desiring to eat before going to the show to do so.

A good slogan for the two affairs might be, "Eat with the juniors then attend their variety show."

BLACK NEWS

BY MRS. GENE WELCH

The Black Home Demonstration Club met Thursday afternoon in the home of Mrs. Les Gibson. Mrs. T. J. Presley, club president, presided over the business meeting then turned the meeting over to Betty Barnett who had charge of the program. Betty is an instructor at Jessie Lee's beauty school in Lubbock. She gave pointers on hair styles, coloring, and also on make up. Two of her students were present as models for hair styles. They were Kathleen Harris, and Le-cetra Hyde both of Lubbock.

Next meeting will be April 5 in the home of Mrs. Clyde Hays. Refreshments were served to mesdames; George Frye, Fern Barnett, Roscoe Ivie, Clyde Hays, Dick Rockey, Ellis Tatum, Ralph Price, T. J. Presley, Johnny Mars, Buryl Fish, Bill Carthel, Gene Welch, three visitors, Betty Barnett, Kathleen Harris, and Lecetra Hyde all of Lubbock, and four children.

H. V. Rockey, a teacher at

Mesa, Ariz., flew home to spend the week end with his parents the Dick Rockeys. He flew back to Mesa, Sunday afternoon.

Mr. and Mrs. T. J. Presley were Sunday dinner guests in the Woodrow Whitaker home. It was David's third birthday and his grandparents helped him celebrate it.

Mrs. Ralph Price, Mrs. Fern Barnett and Mrs. Bill Carthel attended a hat making course in Clovis on Thursday.

Mr. and Mrs. Travis Stone and family spent Saturday night in the Ralph Guthrie home in Lubbock and then went on to Slaton on Sunday to a family-reunion observing Mrs. Stones' grandmothers' eighty fourth birthday.

Pat Meyers of Amarillo spent the week end in the home of her parents, Mr. and Mrs. Charlie Meyers.

Helen Fangman is reported to still be in the Deaf Smith Co. Hospital in Hereford after a heart attack recently.

Mr. and Mrs. Les Gibson and family visited her sister, Mr. and Mrs. Ray Fowler and Vicki in Amarillo Sunday.

Mr. and Mrs. Dick Golden and family of Dawn, Mr. and Mrs. Gene Welch and family,

Mr. and Mrs. Travis Stone and family and Mr. and Mrs. Charlie Meyers attended a forty two party in the home of the Bill Carthels on Saturday night.

Mr. and Mrs. Truett Boothe and family, Mr. and Mrs. Harland Frye and Mr. and Mrs. M. L. Hardy were Sunday dinner guests in the George Frye home.

Kathy Jones, Judy Shirley, Judy England, Debbie Hayes, Susie Carmichael, Vickie Moorman, and Becky Turner spent Friday night in the Les Gibson home celebrating Dianne's thirteenth birthday.

Mr. and Mrs. Othie Smith of Hydro, Oklahoma, Mr. and Mrs. F. B. Harkins of Plainview and Mr. and Mrs. Earl Harkins and family of the Easter community were Friday dinner guests in the Gene Welch home.

Mr. and Mrs. Everett Bales and family, formerly of this community now of Aiken visited in the Bill Carthel home Sunday afternoon.

Steve Stone was honored Friday afternoon with a party on his eighth birthday in the home of his parents, the Travis Stones. Some of the boys spent the night with Steve.

Routine Business Fills City Council Meeting

Sale of the old fire truck to Friona Battery and Electric and the tabling of a proposal to raise the speed limits in parts of the city highlighted the City Council meeting Monday night.

The Texas Highway Department had submitted a proposal to raise the speed limit on parts

of the main thoroughfares in the city as the result of a recent survey of traffic and road conditions. The proposal was tabled until a later date but will probably be rejected.

The feeling expressed by the council members was that the speed limits were high enough

now. The stripped fire truck was sold to Friona Battery and Electric for their high bid of \$275.

In other business, payment of \$162 to Parkhill, Smith & Cooper, consulting engineers, for their work on plans and specifications for a mainte-

nance building for the city was approved. City Manager Jake Outland was authorized to attend the Texas City Managers' spring meeting in Abilene on June 10-12 if he so desired. A policy letter limiting the amount of sick leave with pay for city employees to 15 days per year, except in special cases which may be considered, was approved and adopted by the council.

Outland presented a summary of city activities during the past month which included, in part, the following:

Sixty-four delinquent tax notices amounting to \$4,100.51 were mailed on 29 March. Response to these notices has been less than expected.

There were sixty one (61) delinquent water service bills as of noon 12 March. All came in, with the exception of one by the end of the period.

There were approximately 819 water service bills mailed on 31 March.

Ten building permits issued with an estimated cost of \$131,300 involved.

A conference was held on 15 March with the city health officer. Visitation of fly breeding habitats were made and it was concluded that mosquito spray and fly control measures be started early this year in order to preclude prolific breeding of the pests.

A. L. Outland, City Tax Assessor and Mrs. Geneva Williams, Deputy City Tax Assessor attended a two-day in-service tax training school at Lubbock, Texas on 16-17 March.

Records show that 9,781,300 gallons of water were pumped and distributed to the 819 customers. 6,249,000 gallons of water were accounted for in sales, indicating approximately 65% efficiency in the distribution system. This low divergence may be partially attributed to a freeze-up break in the Catholic church line on 28 February which resulted in a loss of a considerable amount of water.

Approximately 1,400 feet of water main ditching was completed 27-28 March in preparation of water extensions within the Drake addition.

Three fire hydrants, ordered from M. B. McKee Co., Lubbock, Texas arrived in Friona 21 March.

Clyde Fields, Howard Love and P. C. Aragon attended the regional water training school in Dumas, March 8. Records show that approximately 3,173,736 gallons of sew-

age were pumped for an average of 102,378 gallons per day during the month. 722 kilowatt hours of electricity were consumed for a cost of \$14.44.

Fencing on the east side of the sewer plant area was completed on 9 March. Weed and mosquito control measures have been started.

There were six fire calls made during the month for a total estimated loss of \$6,770. Two of these were within the city limits for an estimated loss of \$250.

The fire siren arrived on 8 March to complete the order of fire equipment that was ordered last December. The pole has been installed and the siren will be put into service as soon as remote control voltage regulator arrives.

There were 35 arrests made during the month. Six of these for drunkenness, 3 for vagrancy-investigation and there were 26 traffic citations.

A 1962 model Ford Galaxie Sedan police patrol car arrived March 23. The radio was installed the following day and put into service for the city on March 25.

Cross walks were painted at all school crossings on 5-6 March.

Three days were utilized in painting angle parking lines at city churches. The white paint supply was exhausted and this project will be continued as time and weather permits.

A new 1962 GMC 2-ton truck arrived on March 14, and was put into city street service on March 15.

Newsman Quiz Candidates For Lieutenant Governor

Capital newspapermen quizzed candidates for lieutenant governor at a Sigma Delta Chi dinner and found wide variety in the answers.

At a prior meeting the professional journalism society had quizzed the gubernatorial candidates.

Big news of the session was the unanimous opposition to legalizing pari-mutuel betting on horse races, Texas voters will have an opportunity to express their own views on this subject at the May 5 primaries.

Rep. V. E. "Red" Berry of San Antonio got this issue listed on both the Democratic and Republican primary ballots by presenting both political party headquarters with petitions signed by more than 200,000 persons. Petitions asked the legislature to give the people an opportunity to vote on pari-mutuel betting.

Further questions to the candidates at the newsmen's dinner revealed diverse opinions on repeal of the poll tax as a prerequisite for voting. Four favored repeal; two opposed it. Senator Preston Smith and Bill Hayes were the opponents.

Candidates present at the meeting were Senators Preston Smith, Jarrard Secrest, Crawford Martin and Robert Baker, all democrats, and Bill Hayes and Kellis Dibrell, republicans. Speaker James A. Turman, the seventh candidate, was absent.

Former Lt. Gov. Ben Ramsey moderated the discussion. He closed the session with a comment that most people underestimate the importance of the job of lieutenant governor. Because all state policy is made by the Legislature, the lieutenant governor is of prime importance. He presides over the Senate, names the Senate committees, and decides which committee will handle bills. Thus he has almost absolute control over the course

of legislation -- which is state policymaking.

POLL LISTS HIGH--It seems like there's a record number of candidates running for state and national office this year. There also appears to be a record number of potential voters.

A recent count showed 2,373,857 Texas paid poll taxes or filed for exemptions this year. That's 218,212 more eligible voters than last year.

With 15 county totals still due at the State Comptroller's office, including some big cities, the list may exceed the record-setting 2,594,254 who paid to go to the polls in the 1960 presidential election.

All poll-tax payers who show up at the May 5 primaries will answer the big question: Do they want to keep the poll tax as a voting requirement?

Their answers on primary tickets of both parties should be a representative decision on the long-battled subject.

ATTORNEY GENERAL RULES -- Angelina County Attorney Dan Brazil asked Attorney General Will Wilson whether a precinct chairman who is elected in a May primary can take office immediately.

He was told that even though a man becomes precinct chairman without a run-off, he must wait until the Saturday after his county run-off election before he assumes his new duties.

Attorney general also ruled that the "banking escheat" law calls for bankers to advertise for missing depositors in May of this year.

He also interpreted the criminal code to read that a justice of the peace cannot collect a \$4 trial fee if the case at hand is dismissed.

EGG STANDARDS UPGRADED -- Benefits of the crackdown on egg grade violations in 1958 were reaped by Texas housewives. Number of below-quality or inedible eggs reported for the last quarter of 1961 was only 1.2 per cent. Agriculture Commissioner John White said this incidence is "the lowest in history for Texas and probably as low a level as ever attained by any state."

When the Egg Law became effective in 1958, violations were uncovered at the rate of 16 per cent. State Department of Agriculture spent \$39,902 in fiscal 1961 to see that the law was enforced.

At a meeting of the Texas Egg Advisory board, White commended the state's egg industry for its cooperation in the egg "clean-up."

Board includes G. F. Stebel of Burton; Marvin Gilbreath of Weimar; Jack Dubose of Gon-

LEGAL NOTICE

CONTRACTORS NOTICE OF TEXAS HIGHWAY CONSTRUCTION

Sealed proposals for constructing 39,505 miles of asphaltic concrete pavement, and seal coat from New Mexico State Line to Deaf Smith County Line on Highway No. US 60, covered by C 168-1,2,3,4-6,11,12, & 7 in Parmer & Castro County, will be received at the Highway Department, Austin, until 9:00 a.m., April 25, 1962, and then publicly opened and read.

Plans and specifications including minimum wage rates as provided by Law are available at the office of Rhea Bradley, Resident Engineer, Littlefield Texas, and Texas Highway Department, Austin. Usual rights reserved. Published in The Friona Star April 12 and 19, 1962.

PTA Members Attend Meet

Three local PTA members, Mrs. Ross Ayers, Mrs. Doyle Cummings and Mrs. J. C. Claiborn, attended the District 8 conference in Dumas April 5. Theme for the program was "Effective Learning Through the Home".

During the business session, Mrs. Killingsworth from Dimmitt was elected new president for this district and Mrs. Ayers was elected one of the new vice-presidents representing Farmer and Deaf Smith counties. About 300 attended the conference.

LEGAL NOTICE

THE STATE OF TEXAS
To: Clark M. Foreman, et al Defendants, Greeting:

You are hereby commanded to appear by filing a written answer to the Plaintiff's Petition at or before ten o'clock A. M. of the first Monday after the expiration of forty-two days from the date of the issuance of this citation, same being Monday the 28th day of May 1962, at or before ten o'clock A.M. before the Honorable District Court of Farmer County, Texas, at the Court House of said County in Farwell, Texas.

Said Plaintiff's Petition was filed in said court, on the 6th day of April A.D. 1962, in this cause, numbered 2280 on the docket of said court, and styled, **IDA MAY WHITE, ET VIR Plaintiffs, vs CLARK M. FOREMAN, ET AL Defendants.** The names of the parties to the cause are as follows: Ida May White, and her husband, W. M. White, are Plaintiffs, and Clark M. Foreman, also known as C. M. Forman, and his wife, Mrs. Clark M. Foreman, also known as Mrs. C. M. Forman, and James Pritchard, and his wife, Mrs. James Pritchard, if living, whose places of residence are unknown to Plaintiff, and if dead, the legal representatives of each of said named Defendants, and the unknown heirs of each of said Defendants, if the unknown heirs of said named Defendants are dead; the unknown heirs of the unknown heirs of said named Defendants are dead, whose places of residence are unknown to Plaintiffs, are Defendants.

A brief statement of the nature of his suit is as follows, to wit: Plaintiff's suit is in Trespass to Try Title to recover possession and fee simple title to two tracts of land, described as follows: TRACT NO. ONE: All of Lot Number Three (3), in Block Number Sixty-five (65) of the Original Town of Friona, Farmer County, Texas; TRACT NO. TWO: All of Lot Number Four (4) in Block Number Seventy (90) of the Original Town of Friona, Farmer County, Texas; and alleges that Defendants entered upon said property and evicted Plaintiffs therefrom on or about the 4th day of April, 1962, and unlawfully withheld from Plaintiff the possession thereof; and Plaintiffs also allege the three, five, ten and twenty five year Statutes of Limitation of the State of Texas; as is more fully shown by Plaintiff's Petition on file in this suit.

If this citation is not served within ninety days after the date of its issuance, it shall be returned unserved.

The officer executing this process shall promptly execute the same according to law, and make due return as the law directs.

Issued and given under my hand and the Seal of said Court, at office in Farwell, Texas, this 6th day of April A.D. 1962.

Attest:
Hugh Moseley Clerk,
District Court, Farmer County, Texas.

MOLINE BUILT
Engines Deliver
MORE TORQUE
On The
CRANK SHAFT

There are two ways to build tractor engines: One way is to build for high rpm. The theory here is that even a small and light engine will do the work if it's run fast enough. Because they are not under heavy loads continuously, modern automotive engines are built in this manner.

Moline's way is to build for high crankshaft torque at moderate engine speeds. That means big piston displacement, husky crankshafts, large bearing areas, heavier, costlier construction throughout to withstand continuous heavy load operation. Moline heavy-duty industrial engines are examples of this type of construction and so are the engines designed and built by Moline for Moline tractors.

Highway Dept. Accepts Bids For U. S. 60 Seal Coating

Bids for the application of seal coating on Highway 60 from New Mexico State line to Deaf Smith County line are being accepted by the Texas Highway Department this month.

Application of the tar and gravel seal coat is expected to begin this summer but the exact date will not be known until bids are opened April 25 in Austin and the contract is awarded.

The seal coat will complete the construction of the highway according to the original specifications. The final coat was postponed at the time of construction because of a shortage

of funds, according to reports. Funds for the application of the seal coat and construction of a four-lane, divided highway from Farwell to the Farmer County line on U.S. 84-70 were provided by the state this year.

Construction of pavement between Lazbuddie and Hart is now underway and is expected to be completed in the near future. The contract for the 14.6 miles of pavement called for completion in 160 working days but construction personnel report that the road may be finished in approximately 90 days. Work on the road began during the first week in March.

County commissioners approved a contract Monday which set forth the terms of agreement between the county, state and electric and telephone cooperatives for the movement of the utility poles along U.S. 84. The poles must be moved a few feet to provide right-of-way for the second set of lanes in the expansion.

According to the contract--which must be approved by the Co-Ops, and sent to Austin, the county will deliver a check for \$726,74 to the Co-Op when the poles are moved. The state will then reimburse the county for 50 per cent of the sum.

Poles belonging to Southwestern Public Service Co. have already been moved and the county has received a check from the state for \$7,507.08 which represents 50 per cent of the cost of moving the poles. Preliminary plans for constructing the four lane road will be programmed this summer, according to reports.

THE HIGH PLAINS FARM AND HOME

Cotton Blight Poses Serious State Problem

Bacterial blight occurs throughout the world wherever cotton is grown. It is one of the most damaging plant diseases in Texas, and during recent years has caused an estimated \$37 million yearly loss to Texas growers.

Several races and varieties of this pathogen are known, but only two are widely distributed. The organism enters the plant through open stomata and wounds in the leaves, bolls and stems. The bacteria breakdown the cell wall of the spongy tissues, releasing cellular juices. Infected leaves soon turn yellow and are shed, and excessive leaf shedding reduces the yielding ability of the plant. Boll lesions provide ports of entry for boll-rotting fungi, thus bacterial blight is one of the principal causes of boll rots.

The blight organism may overwinter in the soil on undecomposed plant debris, but more commonly is carried from season to season within and on planting seed. Once in a field the disease is spread from plant to plant and from old to new tissues by wind-driven, splashing rains. The disease may also be disseminated from field to field by whirlwinds, running water, equipment and gin trash.

Bacterial blight can be controlled by a combination of four practices: rotating cotton with other crops, planting disease-free seed, growing resistant varieties and spraying with nitrogen.

No chemical control for bacterial blight is now known, so cultural practices are very important to the grower. For more information on this disease and on preventive cultural practices, ask your county agent for a copy of MP-534, "Bacterial Blight of Cotton."

Plastic plow covers aid in soil shedding machinery laboratory began using this soil for tests nearly 25 years ago.

Later tests of the plastic-covered plows were conducted at Plains, Ga. A rye cover crop was completely turned under with six inches or more of soil by a Teflon-covered moldboard. In an adjacent field, an uncovered moldboard failed to shed the soil, which was merely broken loose and pushed over. The soil in these fields was a very sticky clay.

The plow covers are not yet commercially available. Manufacturers will have to determine, on the basis of potential demand, whether production of these items is economically feasible.

Plastic Plow Covers Aid In Soil Shedding

--Ever have trouble with soil sticking to your plows? U. S. Department of Agriculture agricultural engineers may have found an answer to this problem. In tests conducted at Auburn, Alabama, moldboard plows covered with sheet plastic did an excellent job of shedding soil. Two plastics, Teflon and H. D. polyethylene, were effective in turning sticky, difficult-to-plow clay soil.

The plow covered with Teflon required 23 per cent less pulling power than a conventional steel moldboard plow. The USDA engineers say this is the first time the Davidson clay used in the test has been satisfactorily plowed with a moldboard since the tillage

Seedsman Meeting Is Friday

The USDA proposes to compensate to some extent producers and processors of hybrid corn and grain sorghum seed for the loss of sales incurred as a result of the 1961 feed grain program.

Complete information concerning this program within the next few days," says Prentice Mills of the ASC. A meeting will be held in the district courtroom in Farwell at 7:30 p.m. Friday, April 13 at which time the program, payments, eligibility,

requirements etc. will be explained. All persons interested in producing, processing and marketing hybrid corn or grain sorghum seed in 1959-60-61 are urged to attend, says Mills.

It's later than you think

Dirty, defective stoves and heaters cause the deadliest dwelling fires. They take about 2,000 lives yearly. National Fire Protection Association figures show. Put your home heating and cooking equipment at the top of your Spring Clean-Up list for thorough cleaning and servicing.

Finishing touches are being applied to a 10 foot fill in the Farmer County end of the paving addition to FM 145 between Lazbuddie and Castro County. Work on the extension of the

pavement began during the first week in March and is expected to be completed before the September deadline. Most of the grading and filling has been completed in Farmer County.

Flaming Increases Onion Production

Tests in weed control with transplanted onions was conducted in 1961 by the staff of the High Plains Research Foundation. The highest yield was 176 fifty-pound bags per acre. This was obtained where parallel burners were used for each double row of ammonia. Transplanted onions with no weed control produced only 40 fifty-pound bags.

Eighteen and one-half hours of hoeing per acre was necessary to remove weeds where no flaming was used. This method pro-

duced 160 fifty-pound bags per acre.

Cross flaming onions was not as successful as the parallel method. The yield using this method was 5,350 pounds or 107 fifty-pound bags per acre. The first flaming was done with four burners per row set in a parallel position side by side directly over the row at a 45 degree angle to the ground.

The report issued to Foundation supporters stated that additional flaming can be made

if necessary after the onions are 10 to 12 inches high with 3 or 4 burners per row set parallel without damaging the plants or slowing growth. Tractor speed is determined by the size of the weeds. For example, one and one-half to two miles per hour when the weeds are 3 to 4 inches high; three and one-half miles per hour when

the weeds are small. The report also emphasizes the importance of flaming when the weeds are small. The one-half inch weeds can be easily killed by operating the flame cultivator at speeds of 5 to 6 miles per hour. At these speeds the flame is not on the onion plants long enough to harm the onions.

Large Crowd Attends PCA Annual Meet

Martell LeVeque and Mrs. Thelma Watkins of Friona were among the more than 1,200 farmers and ranchers from across an eight-county area of the High Plains attended the 27th annual stockholders' meeting of the Plainview Production Credit Association, March 31, in the Plainview High School Auditorium and cafeteria.

Guest speaker at the home-owned and operated agricultural credit organization's meeting was W. H. Calkins, vice president of the Federal Intermediate Credit Bank of Houston. Calkins urged all people engaged in agriculture to "be proud of your ability and capacity to produce as you do."

Calkins said any nation on earth would be thankful to be able to provide sufficient food and fiber with only 10 per cent of its population engaged in agriculture, as does the United States.

In other business meeting activities, L. R. Durham of Plainview was reelected to the association's board of directors for a three-year term. Stockholders elected Durham over John Norfleet of Hart.

In a board reorganization meeting, held following the stockholders' meeting, Durham was reelected president, Henry Hayes of Plainview reelected vice president, Olan Alexander of Plainview reelected general manager and secretary-treasurer and Fred Conner of Plainview reelected assistant gen-

eral manager. Holdover directors are Hayes, D. S. Anderson of Muleshoe, Grady Shepard of Hale Center and Don Garrison of Silverton.

In other activities at the stockholders' meeting, Vice President Hayes, in his directors' report, pointed out that cooperation between stockholders and association personnel enabled the association to hold its position as the nation's largest Production Credit Association, with a 1961 total loan volume of more than \$37,000,000 highest in the Production's history.

Assistant Manager Conner gave the association's financial report. He said the association's assets totalled \$15,994,095 with capital and reserves of \$4,292,183.

PHOSPHORUS RESULT DEMONSTRATION ON GRAIN SORGHUM

CONDUCTED BY: Harold Carpenter--Oklahoma Lane

1. Variety and planting date - Asgrow Coastal planted May 10 and Texas 601 planted June 2.
2. Irrigations - one preplant irrigation and three irrigations during the growing season
3. Fertilizer - all plots had 125 pounds of anhydrous ammonia applied with two plots having 104 pounds of phosphoric acid applied. Phosphoric acid was figured at 7¢ per pound.
4. Soil type - Sandy loam
5. Remarks - plots one and two were planted to Asgrow Coastal and plot three and four were planted to Texas 601. Harold said he did not know why plot two paid and plot four did not pay. It could be due to land variation.

Mechanization Spurs Cotton Production

More High Plains cotton growers are benefitting from mechanization -- including use of herbicides to control Johnson grass and other weeds -- in producing top-notch, profitable cotton year-in and year-out.

This is the report from growers who have combined effective chemical weed control with similar advanced technical practices over the past few years.

Many resourceful cotton growers again are planning a complete program of Johnson grass control for 1962, aiming their efforts at the principal sources of new infestations of this persistent perennial, seedlings and rootstalks. Both seedlings and sprouts are highly productive, propagating not only in the spring but throughout the growing season.

In Texas alone this aggressive perennial grass infests over five million acres of cropland -- nearly one-fourth of total harvested acreage.

An effective low-cost method of chemical treatment is with a recommended herbicide, such as C-56. It penetrates heavy wax coatings of mature plants, enabling the chemical to destroy the leaves and seep into the plant and extinguish rootstalks. Cost for four or five applications during the year runs between \$6 and \$9 per acre. In controlling heavy growths, the cost will be slightly higher.

Recommendations call for one or two percent herbicide mixed with kerosene or diesel oil. Even with such light concentrations, research point out, it is highly effective, killing not only the leaves, but root systems as well.

Louis Havran of Terry County points out that he has Johnson grass in his cotton "pretty well whipped down" after two years' success with this herbicide program. Another Terry County farmer, Joe Skaggs, says that he's reduced his Johnson grass infestation with herbicides from 80 percent to about 20 percent in a two-year period. He plans to continue using herbi-

cides in 1962 to "wipe out Johnson grass."

Authorities note that repeated applications, up to three or four during the eight-week period after sprouting, give the most effective control of Johnson grass. Initial treatment usually is made when young shoots are four to six inches high, since the older the plant becomes, the more resistance it develops to herbicides. Generally, with applications on mature plants, there is more "top" kill and less complete control because of plant hardness.

Many successful growers have found that application practices vary during the growing season. Scattered seedlings and new shoots up to six inches high receive treatments at the crown. Plants approaching boot stage or nearing bloom receive applications on the lower eight inches of grass stems. Blooming plants should

be cut to eight inches, with treatments covering the stems and crowns.

Since cotton is susceptible to injury, researchers point out that use of gravity flow sprayers cuts back risk of damage to the growing crop, while at the same time effectively checking Johnson grass infestations. Heavier growths can more readily be curbed with tractor mounted equipment. One or two drums can be mounted to the rear of the tractor. Growers with a limited weed problem employ knapsack sprayers to pinpoint applications.

Effective weed control with herbicides is considered an essential step in full mechanization of cotton. Growers who develop a program are in a better position to move ahead in their mechanization programs.

WITH THE COUNTY AGENT

DERYL COKER

At this time of the year, we hear a lot about pre-emergence chemicals to be used as weed control materials. For the last two or three years several experiment stations have been doing some research and at the present are coming up with some answers.

There are several things a farmer should know about chemicals before he uses it. (1) How effective is the chemical and what can we expect from using it. (2) Will the chemical work under varying weather conditions. (3) Will there be any harmful effects to the soil. (4) Does the rotary-hoe or other cultivating equipment affect the purpose of some of the things you would want to know the answer to and you might have some other questions, you would want answered before any pre-emergence chemical was used on your farm.

We do know that some pre-emergence chemicals, that are sprayed on the surface of the soil at planting time will loose some or most of its effectiveness if a rotary-hoe has to be used to establish a stand of cotton or grain sorghum. In this country you can expect hard rains or hail, and you might have to use a rotary - hoe. Also, some pre-emergence chemicals may persist in the soil for long periods of time

and thus some sterility may be expected or if you are rotating your crops around it could affect the crop you plan to grow next year.

Also, some pre-emergence chemicals are not recommended on dry land. If a farmer should use a pre-emergence chemical, directions should be followed because excess amounts could have some harmful effects.

The cost of pre-emergence chemicals should be considered. If the cost is too much, you might hoe the weeds at a lesser cost.

Because cost of hand labor has risen sharply, or in instances labor may be hard to obtain it may be desirable to evaluate other methods of weed control.

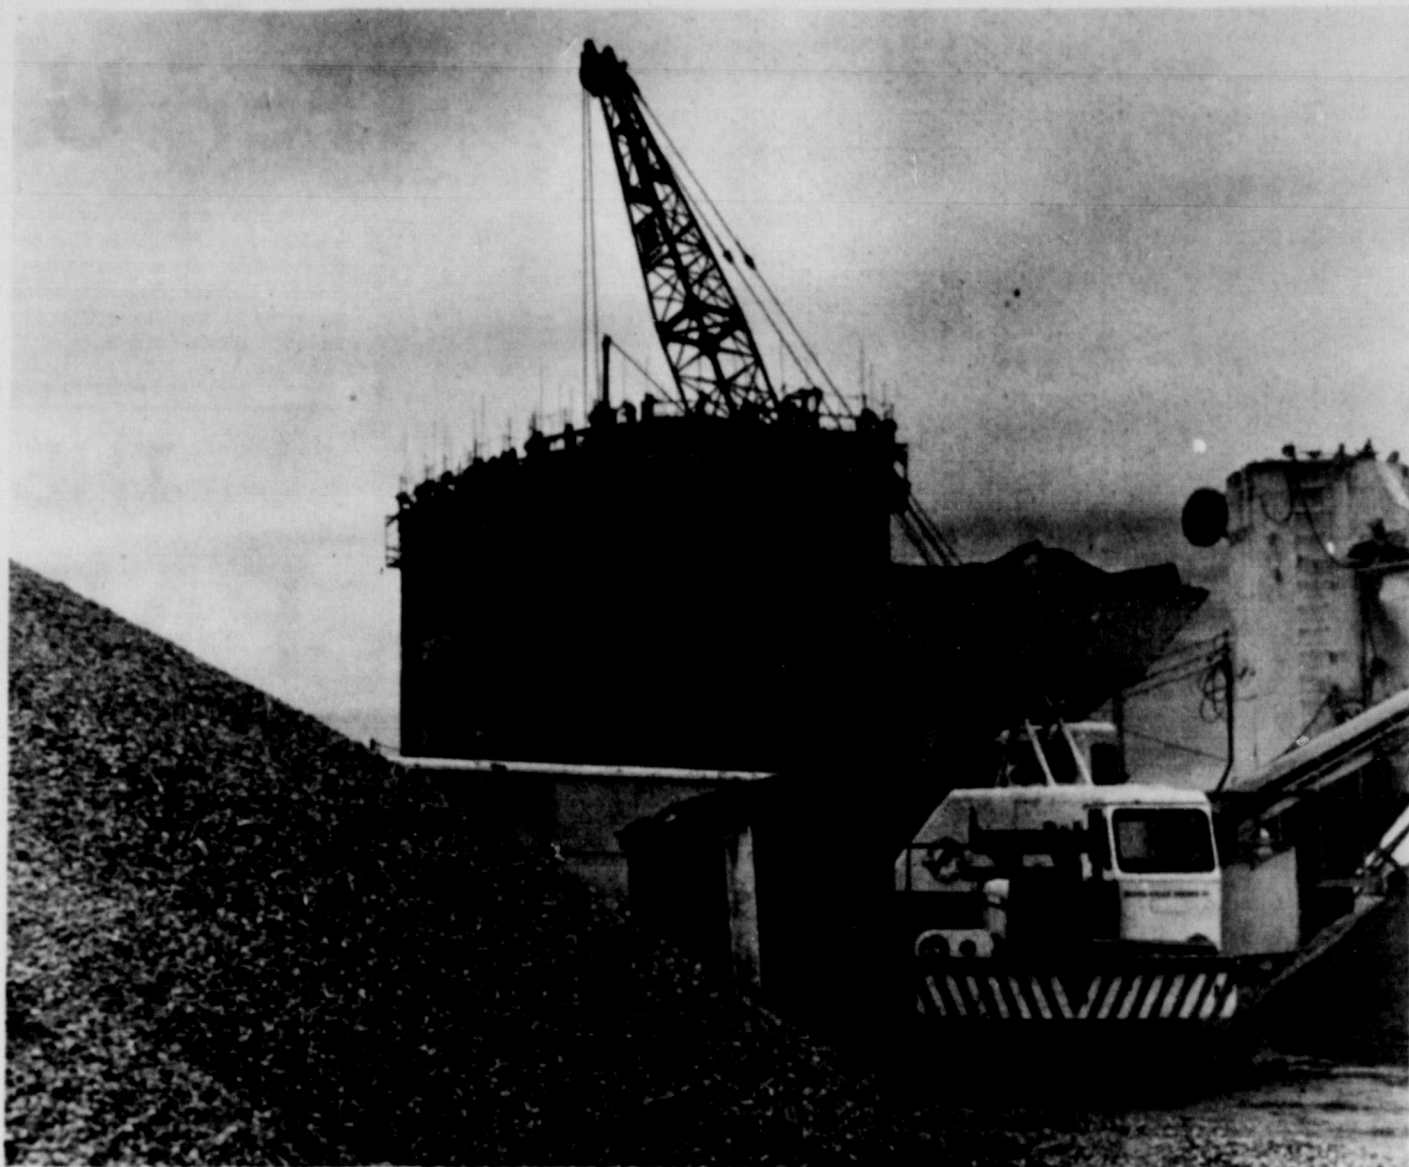

Below I am listing the recommendations of Mr. A. F. Wiese, Weed Specialist at the Bushland Experimental Station. Cotton: In fields where annual weeds are a problem and hoeing costs have exceeded \$3.00 per acre, Karmex DL applied pre-emergence, lateral oiling, or both offer a possibility for reducing hoeing costs.

Apply Karmex DL pre-emergence to a 10-inch band over the cotton row at approximately 1/12 gallon per acre. On 40-inch rows this is equivalent to 1 pound per acre broadcast. Cotton should be planted flat or in very shallow lister furrows. Best results will be obtained if rain occurs within 2 weeks after chemical application.

If rain crusts the soil, rotary hoe to aid cotton emergence. Care should be taken not to move soil from treated band. After cotton emergence, proceed with normal cultural practices; however, do not throw much soil over the treated band until late in the season.

Lateral oil 3-to-10-inch cotton with an oil containing approximately 25% aromatic compounds. Five to 10 gallons of oil per acre will be required to kill small weeds. If required, applications may be made at 5 to 7 day intervals. For proper operation of oiling shoes, cotton should be planted flat or in very shallow

Unique Elevator Rises Near Lazbuddie

First of its kind--a concrete elevator located some distance from a railroad--is being constructed at Lazbuddie by Sherley-Anderson Grain Co. The one-half million bushel structure is expected to be ready for operation by June 1.

A new and probably unique structure is rising above the skyline at Lazbuddie.

Sherley-Anderson Grain Co. is building a one-half million bushel concrete elevator less than one mile from the Lazbuddie Schools. The structure is thought to be unique because it is believed to be the only elevator of this kind which is located in open country away from a railroad. The elevator which is now about two-thirds completed is approximately 15 miles from the nearest railroad at Muleshoe.

The Lazbuddie elevator will be operated in conjunction with the Sherley-Anderson elevator at Lariat, according to G.D. Anderson Jr. The eight-bin structure is expected to be completed and ready for use by June 1.

The mass of concrete and steel will stand 182 feet high and will sport a dumper for both semi and short-bed trucks.

Most elevators or grain storage structures situated away from the railroad are constructed in a manner allowing dismantling and removal to another area should the need arise. When such structures are not needed for storage, they can be sold or used for other purposes.

A concrete elevator is much different. It cannot be moved and is good only for storing grain. Once it is constructed, it becomes a permanent part of the landscape with the single purpose of storing grain.

"It may become a monument to the grain program in a few years," Anderson commented. "The overall grain picture doesn't look too good now but we had been considering building an elevator at Lazbuddie for several years and decided to build a good one when we did," he added.

All the other elevators owned by the company are constructed of concrete.

Lister Furrows

Unless rains force rotary hoeing to insure cotton emergence, lateral oiling should precede cultural operation after each rain which causes weed germination. Lateral oiling can be used until the bark on the cotton stem cracks. Bark usually cracks when cotton stems are about as large as a lead pencil. Lateral oiling can be used to supplement weed control obtained with pre-emergence herbicides.

Grain Sorghum: Good seedbed preparation prior to planting, along with cultivation, rotary hoeing or harrowing the crop, is the cheapest way to control weeds in sorghum.

In cotton-producing areas, where the use of 2, 4-D is hazardous or where grass weeds are a problem, pre-emergence broadcast applications of propazine at 2 pounds per acre will control all weeds for the entire season. Band applications of propazine will control weeds in the drill row.

Because propazine persists in the soil for long periods, use on dryland is not recommended, unless the field is to remain in sorghum the following year.

Screwworm Areas Not Quarantined

Individual premises on which screwworms are found will not be quarantined, advises Dr. R. G. Garret, executive director of the Texas Animal Health Commission in Austin.

State and federal animal health authorities must have reports on all suspected screwworm infestations to conduct the eradication program properly. Livestock owners who make such reports will get the earliest and most thorough relief, Dr. Garret said.

A screwworm transport patrol line has been established by the Commission across Texas from Del Rio generally east to Columbus and south through El Campo and Bay City to the Gulf of Mexico. This action was taken to contain known infestations in the southern part of the State, where their presence has been confirmed, and to prevent their transportation by truck or

rail to the free area north and east of the patrol line.

Dr. Garret requests that all animal handlers be especially watchful for animal wounds. He suggests that, where possible, such wounds be treated immediately with screwworm remedies and fly repellents so they will not become infested.

If worms are found in animal wounds, their identity should be established as quickly as possible, Dr. Garret said. Free mailing kits may be obtained from county agricultural agents, livestock inspectors and others. Samples of the worms found will go to Screwworm identification, ADE-USDA, Box 969, Mission, Texas, identity

of the worms will be made known to the owner immediately.

Sing a Song of Profit - Asgrow Seed is What You Need!

YOU NEED LESS SEED--vigorous Asgrow grain sorghum seed gives you more plants. YOU CAN GET A STAND THE FIRST TIME. YOU HAVE CLEAN FIELDS. YOU GET HIGH YIELDS WITH IDEAL MATURITY. Choose AMAK R-12 for top yields anywhere on the Plains, Red Raider A for those short, sturdy plants. AMAK R-10 for dryland or late planting. ASGROW HAS THE RIGHT GRAIN SORGHUM FOR YOU

Phosphorus Result Demonstration On Cotton

CONDUCTED BY: A. L. Black - Friona, Texas

1. Variety and planting date - Gregg - planted April 27
2. Date of irrigations - One preplant irrigation, and irrigation every other row in July and irrigated every other row the middle of August. The July and August irrigations were alternated.
3. Fertilizer applied - 80 pounds of anhydrous ammonia was applied in fall of 1960 and 160# of 11-48-0 was applied in March. The 11-48-0 was banded in, four inches to each side and four inches below the seed. Nitrogen as well as phosphorus was figured at 10¢ per pound for simplification of figuring the results.
4. Remarks - This is not a true phosphorus test, due to the fact that plot two had some additional nitrogen, but probably most of the increased yield can be contributed to phosphorus.

Lbs. of N-P-K	Lint Yield	Fert Cost	Value of Net Increase	Per Acre

Vote Bill Clayton--Your Voice In State Government

FOR STATE REPRESENTATIVE, 91st DISTRICT

Protect Windbreak Trees

Protection of young windbreak trees is essential. Winds, sandstorms, and animals can cause serious injury to the young trees for the first five years.

According to Extension Agents, Miss Ettie Musil, shingles, stakes wrapped with sacks, old license plates, boards, nail kegs, buckets with bottoms out will provide wind protection for the small trees in their permanent rows. Wind protection during the late fall, winter, and early spring should be provided at least two years.

Even though red cedars, ponderosa pine, and Austrian pine are adapted for this area

of the state, they do need to be cared for. For best results in good growth of small seedlings ordered from the Texas Forest Service each winter they should be planted in gallon cans in a tree bed for the first year.

One gallon cans confine the root system in one small area making it easy to transplant in permanent locations later. Punch small holes in the bottom of the cans before planting for drainage. Fill cans with fertile soil. When filled make a hole in the center of the soil with a stick. Plant the seedlings in the hole and pack the soil around the plant. Make sure to avoid exposing the roots

directly to the air for even one minute. Water only when the soil is dry.

These containers can then be set side by side in the ground on the south side of a building for a year. The tree will then appear to be growing out of the ground.

Growing trees in a protected bed such as this the first year makes care of the seedling much easier. Watering once every week or ten days is easier and is not forgotten. It takes up little space and it is easier to protect the trees from the wind. Most important reason for the tree bed is that it insures you a live healthy tree that will live when set out.

Many red cedars and ponderosa pine were started last year that will be ready to set in their permanent locations. Trees grow just as fast if not faster in containers the first year as in the tree row. For the tree bed dig a bed the depth of the cans. Set the cans side by side, then cover between the cans with soil until the bed is the same level as the ground.

In planning windbreaks be sure to leave room between the house or barns for any remodeling or additions that will be made later. It usually takes at least two rows of trees to make a good windbreak. First row should be 75 to 100 feet from the house. Windbreaks give the greatest protection to the house and barns on the north, northwest, and west sides.

Windbreak rows should be spaced wide enough apart to provide for convenient cultivation with farm equipment. Rows should seldom be less than ten feet apart. Sixteen to twenty feet apart for the rows

SOIL CONSERVATION DISTRICT NEWS

OUR SOIL ★ OUR STRENGTH

The Farmer County Soil Conservation District will again sponsor a Land Judging contest for the High Schools in the County.

The team from each High School in the County will meet at the County Courthouse for a short session and from there go to the field and judge four sites in the Farwell area. After judging each site the teams will turn in their score cards and then the correct answers will be given so that the contestants may ask questions.

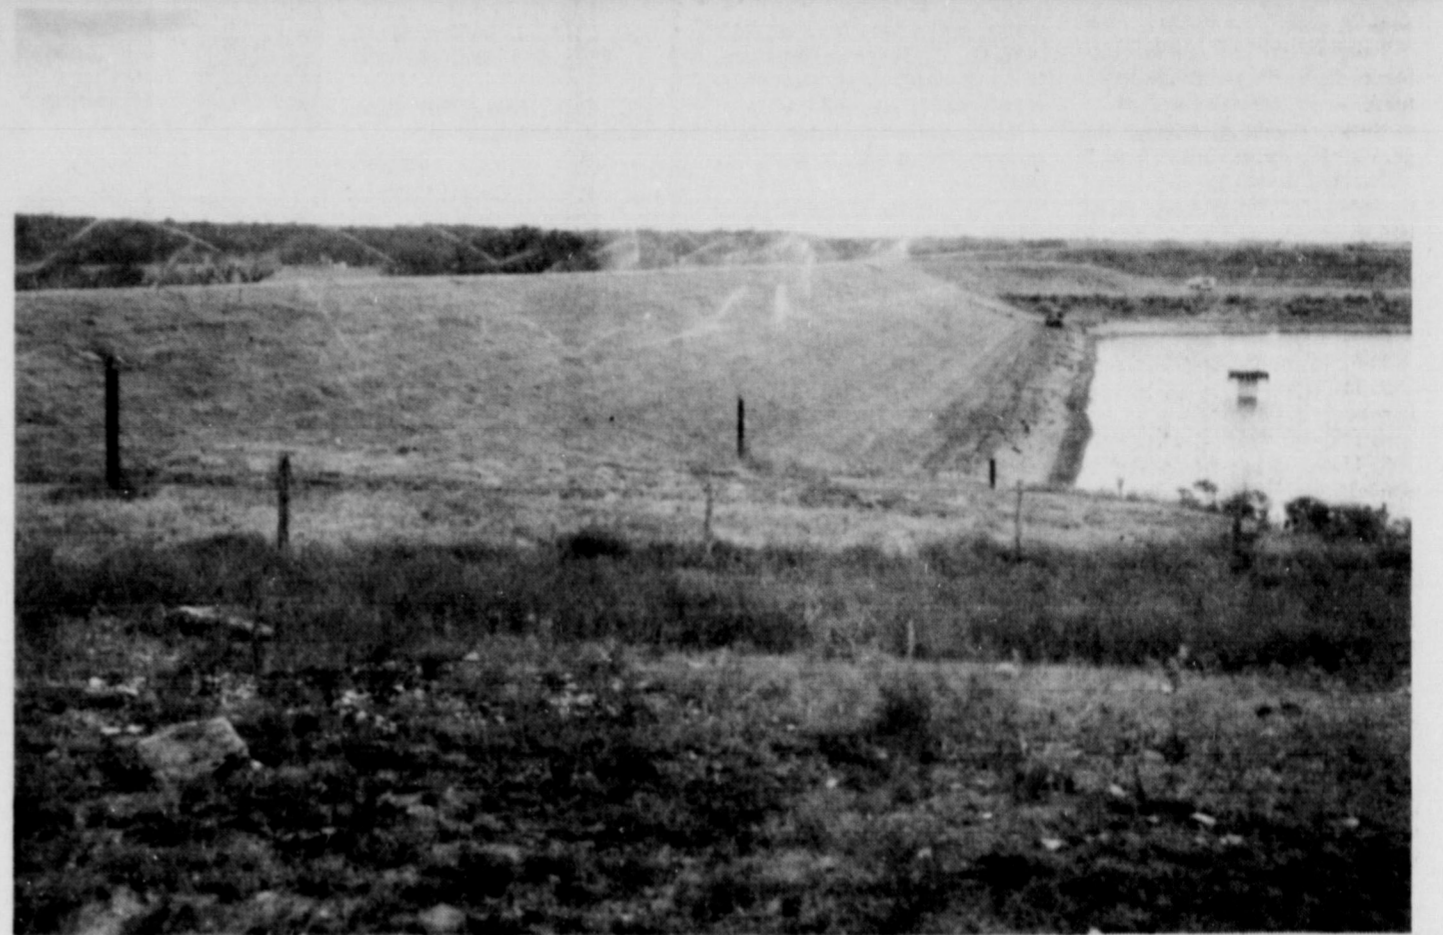

We feel that this type of contest will be more instructional for the boys here in the District rather than an invitational meet.

Anyone that would like to come along and watch the contest may do so.

is better to insure a healthier windbreak with a longer life.

Trees should be spaced eight to twelve feet apart within the row. This seems far apart when the trees are small, but spacing should be permanent for the fully mature evergreens. The trees in the adjoining rows should be staggered in spacing for better wind protection of the house or barn.

After planting in the permanent windbreak rows be sure to protect the small trees from the wind, sand, animals, and fire. Regardless of the moisture available at planting time the evergreen trees should be watered liberally immediately after planting. This serves to settle the soil around the roots. Normally the seedlings should become well established with the one initial watering of one gallon for each tree. Additional waterings may be necessary in the summer and winter if the season is dry. Allow trees to limb out close to the ground for greater windbreak effectiveness.

Irrigating Bermuda grass on a floodwater retarding structure by use of a sprinkler system pumping water from the lake area. This is the type of structures that are proposed for the Running Water Draw project. Note the draw-down tube to maintain a

safe water level and also an emergency spillway at the other end. This particular structure is near Muenster, Texas in the Elm Creek Watershed, a tributary of the Trinity River.

Farm Facts

Fish farming is getting to be a profitable venture, especially in the South. The Alabama Experiment Station has been one of the pioneers in this development.

H. R. Swingle, fish culturist at the station, stocked a pond in February with 2,587 red catfish and 500 golden shiners. The pond was fertilized four times during the spring and summer and the fish were fed a special feed developed at the station.

The pond was opened to public fishing in August and permits were sold for \$1 apiece. When the pond was drained in December, it yielded 500 pounds of catfish which sold for 50c a pound locally. Demand for dressed

Many farmers now raise fish.

fish exceeded the supply. Net income from fishing permits, shiners, and dressed catfish amounted to \$321 per acre.

Rice growers in Arkansas have been rotating their crops with fish for a number of years. They flood their fields and grow channel catfish and buffalo for three or four years. Then the fields are drained and rice is planted. Most of the fish are sold locally but a cooperative has been formed to sell to fish merchants in big cities.

PACKSADDLE MOUNTAIN BATTLE
Packsaddle Mountain, south-east of Llano, in Central Texas, was the site of the last Indian battle in that region.
A highway marker nearby reads, "In a battle fought August 4, 1873, Captain J. R. Moss, Stephen B. Moss, William B. Moss, Eli Lloyd, Arch Martin, Pink Ayers, E. D. Harrington and Robert Brown routed a band of Indians thrice their number."

AN EDITORIAL

Farm Labor Squeeze

Not since the early thirties have government planners had such a field day. By comparison the old crowd was a bunch of pantie waists - pickers of a primitive order. Brain-Trusters, yes, but none of the urgency and haste so apparent in present-day reformists.

Take for example the Administration's push for complete control of the domestic farm labor force. At the recommendation of the President's Committee on Migratory Labor (Goldberg, Freeman, Ribicoff, Udall and Weaver) the Labor committees of both the House and the Senate are rushing for early passage a whole series of bills, authored by Senator Harrison A. Williams, Jr. (D.-N. J.) and Representative Herbert Zelanko (D.- N.Y.).

These bills range from one establishing a council of "advisors on migratory labor" (S.1132) to one which would have the Secretary of Labor regiment the lives of American citizens who are now free to come and go as they please. This latter, S.1129, seeks to minimize the embarrassing unemployment situation by granting the Secretary of Labor the right to entice unemployed industrial workers into agricultural work.

It also empowers the Secretary to regiment all seasonal farm workers, collect them in camps, and move them about from state to state as the Federal Government sees fit.

The rest of the social reform program is included in other bills. These include:
S. 1122 would establish a minimum wage of 75¢ per hour in agriculture, increasing each year until it reaches the industrial minimum wage in the fourth year.

S. 1123 prohibits the employment in agriculture of anyone less than fifteen years old.

S. 1124 and S. 1125 authorizes \$3 million for studies and grants to states for summer and regular schools for migrant children and adults.

S. 1126 provides for Federal registration of crew leaders.

S. 1127 would provide for mortgage insurance up to 90 percent of the value at 6 percent interest for the construction of farm labor housing so well as direct loans for the same purpose.

S. 1128 includes farm workers under the National Labor Relation Act. It authorizes pre-season contracts between farmers and labor unions to provide (1) compulsory union membership; and (2) union preference when filling jobs.

S. 1130 authorizes \$3 million a year to provide health services to migrants and their families.

S. 1131 authorizes \$750,000 a year to aid states to establish day-care centers for the children of migrant workers.

In opposing S. 1129 at committee hearings in Washington, growers declared that the bill would fail to achieve the purposes for which it was written; rather it would create new problems for the very people it is designed to help; that it will be expensive to the public; and that it will cripple U. S. agriculture in world competition or perhaps eliminate it entirely as a factor in world trade.

The bill grants discretionary authority to the Secretary of Labor and specifically states that he could "issue such rules and regulations as he determines necessary to carry out the provisions of this title." In testifying for the bill, Secretary of Labor Arthur M. Goldberg declared "I do not want any extraordinary dictatorial powers in administering this or any other law." Are we to assume, then, that he would be satisfied with ordinary dictatorial powers?

From the standpoint of numbers affected and overall cost to farmers and the public, this measure can be downright frightening. During the peak month of July, 1961, USDA places the number of employed on United States farms at just under 3 million. This does not include non-working members of the family who are included under the Secretary's authority to be concentrated in centers along with workers and to furnish them subsistence, temporary housing, and emergency medical care.

Many of those who strongly support this bill know absolutely nothing about farming or the requirements of agriculture, and apparently are not interested in finding out.

Government planners all too often overlook the economic factors of competition in agricultural production. They never seem to realize that anything which adds materially to the cost of production automatically reduces competitive strength.

The United States today exports approximately \$4 billion worth of agricultural products annually. A substantial portion of that business will be subject to increasing competitive pressure as the European Common Market establishes its protective tariffs. European farm labor wages are substantially below those being paid in the U.S. today.

Passage of the Williams bills would increase production costs for American farmers -- without a commensurate increase in production -- and thus further enhance the competitive advantage of the foreign producer.

Farmers are fearful of pricing themselves out of the market at home and abroad. They are afraid of being caught even more tightly in the mounting cost-price squeeze.

It is also true, however, that labor can price itself out of the market. The large number of foreign cars on our highways testifies to this. Efforts to artificially increase farm wage costs might result in even more unemployment rather than less.

We submit that prices paid by American consumers for food and clothing are going up -- way up -- if government officials persist in more and more restrictive laws and regulations.

We submit that such arbitrary actions by government will destroy this nation's ability to meet foreign competition.

We submit that it is both a patriotic duty and an economic necessity to curb inflation at home.

Finally, we believe that defeat of these Williams proposals is the next step in the fight to retain some of our traditional freedom.

NEWS FROM THE

FARM BUREAU

BY RAYMOND EULER

Meetings of Rhea Farm Bureau people are still interesting and inspiring.

We visited with them Friday night and enjoyed it just as we always did when we were able to meet with them regularly. And they get things done. They have, for some time, combined the 4-H boys and girls meetings with their regular meetings and this saves time and accelerates interest.

Among other things, they set up a date for their community noxious weed poisoning work. The date is May 10, a time when the blooms should be easily detected. It is refreshing and encouraging to see people in a community like this meeting, working out their problems and solving them. This, we believe, is the American way of doing things.

President Harry Hamilton has contacted all the candidates for state office and made arrangements for a county wide meeting with them before everyone interested in their views. The date is Thursday, April 26.

They will all be asked to express their views on the same questions and given just two minutes to reply. Further information will be published in the near future, and we hope there will be a good turnout out to this "Meet the Public" meeting. We are sure you will be better informed and can better decide who to vote for, if you are not sure already.

We notice in "Facts for You," that the U. S. corn crop of 1961 was one half the world total production. Red Russia's share was 7% of the world total. Even though this seems a little small for accuracy as large as Russia is, it is way above their percentage of production of other good things.

Frank Hinkson was elected to complete the term of Dee Chitwood as a Farm Bureau Director. Mr. Chitwood resigned because of other commitments interfering with his duties as director.

Mr. Hinkson, along with Grady King, represents the community of Lazbuddie. Talk to him about Farm Bureau, or come with him to a directors meeting on the first Monday night of the month.

CONSIDER THIS: The spirit of man is the candle of the Lord, searching all the inward parts of the belly, Proverbs 20:27

Some British cows are more than contented. They're delighted with a farm innovation-- foam rubber mattresses. After a very good night's sleep, the grateful cows are said to give more than the usual amount of milk.

Knox County Farmer Named Rural Hero

A Knox County farmer who pulled his 7-year-old son from an iced-over farm pond and saved his life with artificial respiration today received the Texas Rural Heroism Award.

Alonzo (Al) Cartwright, who farms five miles from Munday in northwest Texas, was presented the Texas Farm and Ranch Safety Council plaque in ceremonies at the annual meeting of the Texas Safety Association. Bud Fichte, assistant editor of The Progressive Farmer and chairman of the Council awards committee, made the presentation.

Calvin Pigg, farm director for WBAP, Fort Worth, and president of the Texas Farm and Ranch Safety Council, said there were 12 nominations from over the state for the third annual Rural Heroism Award.

Cartwright received the award for the bravery he exhibited Jan. 27, 1961, in saving the life of his son, Pat. The elder Cartwright was mending fences when he heard screams from his son who had fallen through thin ice in a nearby stock tank. The boy tried to swim to shore, but was prevented from doing so by the ice which had formed in the sub-freezing temperatures.

Rushing to the boy's aid, Al Cartwright saw his son couldn't make it to shore, so he plunged

into the icy, 20-foot deep water in an effort to rescue him. Prevented by heavy clothing from reaching his son, Cartwright returned to shore and shed his boots and heavy coveralls, then leaped into the icy water once more to pull the now-unconscious lad to safety.

The father applied mouth-to-mouth artificial respiration until his son showed signs of life. Then, he drove the boy to Munday and a doctor.

Dr. D. C. Eiland, who credited

the father's quick actions with saving the boy's life, worked for about four hours on young Pat before the youngster regained consciousness. Pat was then taken to the Knox County hospital. He was released in three days after recovering from a slight case of pneumonia.

Following the rescue, clothing on both Pat and his father, who was in a state of shock, was frozen and had to be cut away. Hospital attendants showed as much concern for

the father as for his son since the elder Cartwright had previously under gone lung surgery. While serving in the Air Force, Cartwright volunteered for high pressure tests which resulted in 90 per cent collapse of one lung. Since then, one lung has collapsed once and the other twice.

Cartwright, his wife, and son Pat were invited to Dallas as special guests of the Texas Farm and Ranch Safety Council.

GRAIN SORGHUM FERTILIZER DEMONSTRATION

CONDUCTED BY: Donald Watkins and Southwestern Great Plains Field Station at Bushland

1. Variety - Asgrow R-12, planted with 9 pounds of seed per acre on May 13
2. Fertilizer - was applied on April 18
3. Irrigation - pre-plant and 3 during growing season
4. Soil type - Sandy loam
5. Remarks - 2 rows to the bed - Harvested October 19. As you can see fertilizer payed some dividends on this demonstration, the 2 most important columns in this demonstration is the fertilizer column and average per acre column.

Farm Facts

Farmers are big buyers.

Farmers buy the same things city folks buy-- food, clothing, drugs, furniture, and other items. These purchases amount to more than \$15 billion a year. But farmers spend from \$25 billion to \$26 billion annually for goods and services to produce crops and livestock.

Furthermore, says the U. S. Department of Agriculture, farmers are expected to be even better customers. Their gross income in 1961, after all totals are in, is expected to be about \$11 billion more than in 1960.

Equipment and machinery purchases may be from \$100 million to \$150 million higher. Farmers will spend more for other production items: fuel, oil and other petroleum products, pesticides, fertilizer and containers. Some will improve their homes or build new ones. Others will make capital investments in new or better farm service buildings.

Farmers also will use a part of their increased incomes for appliances, clothing, medical care, education for their children, and other things.

This creates and maintains non-farm employment and makes labor's buying power more stable. Farmers, in turn, will have a steadier demand for their products.

FRYING EGGS on a sidewalk is old hat. On Venus, you could broil a steak. Temperature there is estimated at 600 degrees F., 50 degrees hotter than your oven broiler.

PURPOSE OF FARM BUREAU

FARM BUREAU IS A FREE, INDEPENDENT, NON-GOVERNMENTAL, VOLUNTARY ORGANIZATION OF FARM AND RANCH FAMILIES UNITED FOR THE PURPOSE OF ANALYZING THEIR PROBLEMS AND FORMULATING ACTION TO ACHIEVE EDUCATIONAL IMPROVEMENT, ECONOMIC OPPORTUNITY, AND SOCIAL ADVANCEMENT, THEREBY PROMOTING THE NATIONAL WELFARE.

FARM BUREAU IS LOCAL, NATIONAL, AND INTERNATIONAL IN ITS SCOPE AND INFLUENCE, AND IS NON-PARTISAN, NON-SECTARIAN, AND NON-SECRET IN CHARACTER.

HD Agent's Notes

BY MISS ETTIE MUSIL

How well do you manage your bank account? You might say, "Just fine, as far as I know." Then let's just review a few points.

During the past two weeks I have been visiting family economic demonstrators in the county. Many of the demonstrators have a very good start in organizing farm and home record keeping. I was amazed how well several farm records were kept in a definite location in the home, with a definite time to keep the farm and home expenses up to date.

Maybe you would like to check your bank account to see how well you are using it. The checking account in a bank can be of greater use to your family if it is carried in the name of both husband and wife, or any other two people. With a joint account, either person can use the money when needed. Either will have access to the funds in the case of death to the other.

The joint checking account signature card should be signed to read, "Mary Smith Brown or John Brown, either or the survivor to draw." A joint account should be managed by working together. One person should be in charge of it. Each person who checks on the account needs to report to the one in charge when a check is written. Check books with stubs are a big help in remembering the exact amount of the check that was written.

A check should always be written in ink for your safety. Always date each check and number checks consecutively carrying numbers from one check book to the next. Begin writing at the extreme left of each line. If the entire line is not used, draw a bold line in the blank space. No additional writing can be used without your knowledge.

Do not make corrections on checks. Simply destroy the check and make a new one. Be sure that the amount written in words is the same as the amount written in figures. If these differ, the amount in words is the one considered legal by the bank.

How many times have you signed a blank check? If it were

lost, the finder could fill in any amount, and the signer would be liable. In other words never sign a blank check. But do sign each check exactly as you signed your original signature card.

For more information do ask us for the free bulletin, "Managing Your Bank Account." There are several drawings in the bulletin explaining deposit slips, writing checks, and endorsing checks.

Recently I discussed studies that had been made recently concerning the life time expected income of people with different levels of education. Now, have you wondered how much it would cost to finance your son or daughter in college? Before high school graduation students and parents become concerned in a decision of which college or university would provide the best education for a particular major or career.

Parents become concerned about cost differences of living conditions. On an average it costs \$1,000 to pay for a student who lives at home and commutes back and forth to college. It would almost be almost impossible for students in Farmer County to commute to Texas colleges.

On the average a college student will need \$1,350 to live in a college dormitory. If students plan to live in fraternities or sororities the cost will be an average of \$1,650. Living expenses usually are the most costly of all expenditures.

However, there are many factors that influence the cost of obtaining a higher education. Spending habits the boy and girl form at home before going to college are important. Of course, the pressures of campus customs and mores will vary with the different colleges and locations.

Many times the size of the family income will influence the choice of college that is made. In a study made in 1960 by the Bureau of Labor it was found that total expenditures of college costs in public institutions was \$1,300 in comparison with private colleges costs of \$2,100 per year.

Home Freezer Value Determined By Use

A home freezer can be a great boon, that is if you need it and use it right. The freezer that you need is one that can be used to capacity. A freezer that is not used to capacity, or that is used inefficiently, may not be a good investment.

"Whether or not a freezer can save you money will depend entirely on how you use it," notes Miss Ettie Musil, County Home Demonstration Agent. "We are told that the family that uses the freezer extensively is usually the one that gains the highest financial return on the investment." The best practice, as cost figures indicate, is for a rapid turn-over of food in the freezer.

In other words, the more you use a freezer, the less is the cost per pound of storing frozen foods. Also, the more you use the freezer the more you offset the fixed costs of depreciation electricity and repairs.

A study was made recently that showed how the cost per pound of storing frozen food decreases and the use of the freezer increases. The study was made using a 360 pound capacity freezer at a cost of \$360.

On a 12-year expected life of the freezer the depreciation per year was \$30.00. The annual return on investment of the freezer at 3 percent interest was \$12.88. Repairs were figured at 2 percent of the purchase price which was \$7.20, for an average annual cost for repairs. Fuel or electricity cost for maintaining the freezer at 0 degrees Fahrenheit for a year was \$27.38. Total cost of operating, repairing, depreciation, and investment return was \$77.46, for the 360 pound capacity freezer.

Now in figuring the operating cost with no turn-over of frozen food or only 360 pounds of food stored annually, the cost per pound of the food would be twenty-one and a half cents.

Then if you used and replaced one-half of the frozen food, or

had a 50 percent annual turn-over, the cost per pound would be reduced. With a 50 percent turn-over of the 360 pound capacity freezer the cost per pound of food stored would be only 14 cents. This is on the basis of 540 pounds of food stored.

But if the freezer is used and frozen food restored for future use more often, the cost becomes still lower. If 900 pounds of food are stored annually the cost per pound would decrease to a low of eight and one-half cents. This cost is figured on a 150 percent annual turn-over. That is, that the freezer supply was consumed and more food restored three times during the year.

This study was prepared by using the figures for storage costs only. The total cost of foods that you prepare and freeze at home would also have to include the expense of wrapping supplies and cost of food if grown at home or purchased from truck gardeners or wholesale outlets.

From this study of storage costs of frozen foods in a home freezer the homemaker can determine the kind of investment she has in her home. The more you use the home freezer the lower the storage cost of operating.

Other costs include freezing food supplies as paper, containers, bags, jars, lids, rings, freezer or masking tape, cost of food, and time or convenience in freezing foods. Of course, good, recommended methods of freezing should be followed to avoid spoilage of food.

For recommended methods of freezing according to trials and errors of research, a bulletin "Frozen Foods - How to Freeze, How to Cook" is available free in the office of the home demonstration agent in the Courthouse in Farwell. For freezer meals recipes and hints get a copy of "Quick Meals" for much help to make the most of your freezer.
