A mighty head of tension which had built up at the state capitol eased as the Houston federal court agreed to postpone effect of its congressional redistricting order until the next elections.

Top Democratic officials and members of the Legislature kept close watch on the news wires out of Houston as they sweated out the decision following four days of hearings and arguments

Their optimism had wilted in the last 24 hours before the ruling was announced. More than one legislator reportedly had his bag packed ready to return to Austin for a special session.

Gov. John Connally apparently had indicated he would call the session immediately if the court stuck by its original October 19 order for at-large (statewide) elections in all districts unless the Legislature adopted a redistricting bill.

As it is, athough the court postponed effective date of its ruling, it kept the case on its docket and will take further action if a constitutional districting bill is not passed by August 1

Major officials applauded the

Republicans, who brought the inal suit, were disa that the "equal-population for each district" order will not take effect until Congress after next. But they took comfort in the fact that their principal goal was achieved

Governor Connally said redisricting will be given "highest" priority in the 1965 Legislature and "every attempt will be made to have a thorough redistricting consistent with the opinions of the Supreme Court and (the Houston) federal court."

Frank C. Erwin Jr., State Democratic Executive Committee Chairman, said redistricting will be the main plank in the State Democratic platform this

Democratic Congressman-atlarge candidate Bob Looney, an intervenor in the action, didn't agree and promised a new appeal to the U.S. Supreme Court for redistricting this year. He also called on Texans to petition Governor Connally for a special legisative sesison on the subject.

For all practical purposes, the judicial chapter on redistricting is closed for the year. Congressmen will run in their old districts one more time.

Major surgery must be performed on the districts next year. And while they are carving, state legislators in all probability will have to re-divide their own districts. Another suit is pending to force state egislative reapportionment. For law-

All the family loves an ELECTRIC DISHWASHER

As a household convenience from which the entire family benefits, nothing can match an electric dishwasher. It relieves Mother of a monotonous three-times-a-day chore and gives her more time to spend with the family. It lets Father read the paper or watch TV after dinner with a clear conscience. There are no more squabbles among the children as to who's going to help with the dishes. And everyone enjoys the health benefits of cleaner, more sanitary dishes — washed in water too hot for hands and dried

Strokes Cause 1 in 10 Deaths

Call it stroke, apoplexy or cerebrovascular accident. By any name, it causes one of every 10 deaths in the United States and one of every 9 deatns in Texas) taking approximately 200,000 lives each year. Stroke is the third leading cause of death in the U.S., outranked only by heart attacks (500,00 deaths annually) and cancer (about 275,000). The figures above are on the negative side of the ledger.

But there is also a positive side of the stroke ledger, one that grows brighter all the time The Texas Heart Association points out that from 1950 to 1960 the death rate from stroke declined by 22 per cent among men aged 45-64.

There are several causes of stroke. As in heart attack, the underlying process which sets the stage for a stroke is atherosclerosis, the condition in which arteries are clogged or narrowed by fatty deposits. In heart attack the clogging blocks the flow of blood to a part of the heart muscle. In stroke, the artery clogging impedes blood flow to the

Although the brain is only about two per cent of the body weight, it receives 20 per cent of the heart's total output of blood. When a part of the brain is deprived of oxygen-laden blood, its nerve cells cannot function. Depending on which cells are knocked out, we may not be able to remember a telephone number or tie our shoes -because the brain calls the signals that make our minds and
