Nudge the accelerator beyond the 34 mark and you "call out the reserves"! The J-2 Rocket then operates on three dual carburetors! J-2 js available now at a modest extra cost. Try it!

It's the most exciting engine development since the first Rocket was launched!

Engineers have dreamed for years of an engine that combined exceptional horsepower and torque potential with outstanding fuel economy in normal operation. The first big step towards this goal came from Oldsmobile when the first Rocket Engine ushered in the modern highcompression era.

And today, Olds is ready with the new J-2 Rocket. You'll find that in operation, it's like two engines under the hood!

In your day-to-day driving, you enjoy the

smooth, alert action of the Rocket - with the fre economy of dual-jet carburetion and a 10-to-1 compression ratio. But beyond all this there's a "second stage" in J-2 operation to meet the exceptional driving situation. Just open the accelerator beyond the 34 point and two additional carburetors automatically jet into action. There's an instant boost in torque and power. You'll appreciate the immediate response as another Olds contribution to your safets.

Be our guest for a J-2 test now!

Here's another dependable MM power unit designed to furnish low-cost, trouble-free performance. Smooth, 6-cylinder high turbulence power and counter-balanced crankshaft reduce tosional vibration for longer engine life.

Newly designed heat exchanger base plan keeps oil at proper operating temperature, greatly increases engine life and lengthers period between oil and filter cartridge changes. Pan acts as a cooler as well. Sight oil glass provided in base pan can be converted to oil-flow control valve for adding oil directly to crankese from a barrel of oil, thereby keeping oil at a constant level. Pan attaches directly to an SAE standard flywheel housing and provides a rigid mounting of the power take-off for heavy belt drives, etc. Double-disc clutch and power take-off are of heavy-

FORD IS AMERICA'S WINNINGEST CAR!

For 1957, Ford's off to a flying start on the NASCAR Short Track, Convertible and Grand National Race Circuit—with more points than all other cars combined!

And now-just in from Daytona-seven more Ford firsts!

- A 300-hp 1957 Ford V-8 out-accelerated all other low-priced cars in the standing mile competition.
- A 1957 Ford Sunliner outclassed all other low-priced cars in the 160-mile National Convertible Championship Race.
- A modified Ford Thunderbird, running in the Experimental Class, outaccelerated every other car in NASCAR history.
- A modified Thunderbird topped every American Sports Car, finished first in its class and placed second to Europe's fastest sports car at the National Amateur Sports Car Race.
- A standard production Thunderbird took first place in the flying mileoutperforming all sports cars made in America.
- A modified Thunderbird won the flying mile in the fastest time made by any car at Daytona this year.
- And a Ford Thunderbird topped the field in acceleration from a standing start in Modified Sports Car Class B.

It was Ford Thunderbird power that set a new stock car record at Indianapolis, too ... and powered the '57 Ford to 458 world endurance records at Bonneville, Utah.
