Local Government Costs Above Average

★★★

A FACE LIFTING, but more like a face lifting, is the work being done on the Cochran County courthouse pictured above. The object of the operation is to plug the holes in the decorative material fronting the building on the east and west in

efforts to cut down the huge bird population that has been inhabiting the holes. The above shows the west face of the building with the north half completed and workers just beginning work on the south half.

Survey Shows \$51 Over Texas Counties

The financial predicament in which New York finds itself and the repercussions that it is having in many directions has led to second looks being taken at the spend-patterns in Cochran County and elsewhere.

Are local residents paying a high or a low price for the conduct of their government? How much does it cost them per capita in state and local taxes compared with what the cost is in other communities of its size?

Size appears to be an important factor in the cost of governmental operations, both for counties and for municipalities, according to recent reports by the Department of Commerce and others.

"Surprisingly," states Robert Brown, director of the Tax Foundation, "the figures covering 1973 show that the smaller cities are the most economical with the taxpayers' funds."

"Cities under 50,000 population spend an average of \$158 per year per capita for services. But in cities over a million the average is \$682 per capita."

Among counties, also local expenditures vary widely, ranging from \$421 per capita for those under 25,000 to \$680 for those over 250,000.

In Cochran County, based upon the latest figures, general expenditures for local services amount to approximately \$495 per capita.

By way of comparison, the average in other counties of its size in the United States, under 10,000 population, is \$437 per capita. The overall national average for all counties, irrespective of size, is \$575 and, in the State of Texas, \$444.

In most counties, the services covered by these expenditures include education, highways, public welfare, health, fire and

4-H HONOREES—Cochran county 4-H Gold Star Boy and Girl Gene Lynskey and Suzanne Gillespie will be honored at the District 2 4-H Gold Star Awards Banquet in Lubbock Monday night. The two were selected for outstanding achievement in 4-H work over the past year and awarded their gold stars at the annual county awards banquet here last week.

District Banquet To Honor County Gold Star Winners

Two outstanding 4-Hers from Cochran County will be special guests of honor at the District 2 4-

H Gold Star Awards Banquet at Coronado High School Monday night (Nov. 24) in Lubbock. The program begins at 6:30 p.m., in the high school's cafeteria.

Suzanne Gillespie and Gene Lynskey are the Cochran County 4-Hers who will be honored. They were named Gold Star Boy and Girl recently at the 4-H Achievement Banquet.

Announcement of the event was made by Billy C. Gunter and Catherine B. Crawford, district agents with the Texas Agricultural Extension Service.

A boy and girl from each of the 20 counties in District 2 are eligible to receive this highest county award each year. The award is based on outstanding achievement, leadership and contribution to the county 4-H program.

The event is sponsored annually by the following 12 member-owned electric

1976 Upland Cotton Programs Announced

Major provisions of the 1976 upland cotton and cotton seed programs were announced recently by the U.S. Department of Agriculture.

John W. Hall, County Executive Director, said there will be a preliminary upland cotton loan rate of 37.12 cents per pound, applicable to Middingling one-inch (micronaire 3.5-4.9) net weight, at average locations in the U.S., according to a recent announcement from Washington D.C.

Texas' base acreage allotment is 4,679,430 acres for upland cotton. The national base allotment is 11 million acres, Hall said.

Loans on 1976-crop seed of both upland and ELS cotton will be recourse loans, as in the past, while lint cotton loans are nonrecourse. Program provisions will be similar to those for the 1975 program.

Hall said the preliminary upland cotton loan rate of 37.12 cents per pound compares with the 1975 crop loan rate of 34.27 cents per pound. It reflects 90 percent of the average price of American cotton in world markets for the 3-year period

were not the worst team in the league. Their 2-7-1 record earns them a notch above Friona with its 2-8 tally. If there is little room for comfort in that, it can be said that Morton was a young team this year and will retain a substantial amount of talent to build on next year. Only seven squadmen are being lost to graduation this year.

The game statistics give it all to the Chieftains Friday night with a total of 229 yards rushing and 70 yards passing for a total offense of 299 yards.

This compares with 67 yards rushing and no yards passing by the Indians for a total offense of 67 yards.

Sam Johnson led the rushers with 7 attempts for 23 yards and a 3.3 average. Tino Sabala rushed 8 times for 20 yards and

Legion Meeting

There will be a called meeting of the members and other interested persons of the American Legion Friday, November 21 at 7:30 p.m. in the county court room.

Discussion will be held on possible re-activation of the local post, a possible membership drive, plans for a bi-centennial celebration, and any other subjects of interest.

All Legion members and other interested persons are urged to come-and bring your own ideas for discussion.

NEW CHIEF TAKES OVER—Ken Burke, veteran Morton police patrolman, moved up into the police chief's chair upon the retirement October 31 of Chester Miller. Burke is a native Mortonite and "Kind of grew up with the town," as he describes it. Burke is in charge of a four-man police force, including Patrolmen Travis Kelly, Lee Hooper and Leroy Sandifer. All four men were sworn in at the November 10 City Council meeting.

America's First 'Intelligence Operations' Began 200 Years Ago This Month

Two hundred years ago this month the Continental Congress first action that might be classified as an intelligence activity. This is not a day that Congress created an intelligence agency or engaged in espionage activities. It did create a secret committee, however, to look after American interests abroad.

On November 29 Congress appointed a five-man committee of Secret Intelligence with wide powers to contact "our friends" abroad, especially in England,

Ireland, and France. Admittedly this was not an intelligence operation to harm the enemy; instead it was a secret operation to seek out those in other countries that might be helpful to the American cause.

Members of the committee were Thomas Johnson, Benjamin Harrison, Benjamin Franklin, John Jay, and John Dickinson.

At this point the Committee had very little to work with since our diplomatic and intelligence operations were virtually nonexistent. Even so, on December 12 the Committee contracted

Arthur Lee, at the time the agent of Massachusetts in London, to see if he could find out the attitude of European powers toward America. This was probably not the best possible choice since Lee proved to be a rather abrasive man.

Later in December a French agent, Archard de Bonvouloir, appeared before Congress. He unofficially stated that American ships would be welcome in France and that if all went well with the American cause France

might be persuaded to provide material assistance.

Although it was far from sophisticated the American effort to gain friends had begun, and it would improve with time.

In the meantime the Spanish Southwest struggled to create a safe and secure life. Unfortunately, however, the quality of such life was dependent upon forces that the Spanish settler could not control—the weather and the Native Americans.

The livestock, discussed last week, that was so crucial to

survival was often stolen or scattered by raiding bands of

plains Indians. In addition, other food supplies were not always abundant.

Corn and pinto beans were the staple in the diet of Spanish Texas. If the weather were bad, the yield was reduced to the point that real suffering might result. Attempts at irrigation were sometimes successful, but even then the yield was never sufficient to produce enough food to provide for a very large population.

Therefore, the day-to-day life was never very secure.

before applying to ASCS for low yield consideration. "The application form can be filled out any time between now and 15 days after harvest and production figures supplied later, at which time the final eligibility determination will be made," he said.

between pounds harvested on the farm and the aggregate yield established for the farm by ASCS. There are variations from county to county, but "normal" generally speaking, means from 55 to 60 percent of the farm's established payment yield.

The mid-September cold spell makes accurate forecasting of cotton yields more difficult this year, and according to PCG officials there is a danger that some producers may not apply for program benefits, then find later that their yields were low enough to qualify for either a yield adjustment, a payment or both.

There are crop substitution rules under the program and other details that virtually require an individual explanation for each farm, Johnson says, "which makes it important that every producer discuss his farm situation with ASCS officials at an early date to prevent losing eligibility for any benefits that may be due."

The established cotton yield for each farm is figured by ASCS on the basis of the farm's actual production record for the previous three years. But the yield used for each year in this calculation, on request of the farmer, may be adjusted upward if abnormal weather reduces production below 90 percent of the yield established for the previous year.

The elevator isn't a smoking car, so observe the no-smoking rule (No butts about it).

Producers whose total production falls below two-thirds of "normal" for the farm allotment will be eligible for a disaster payment. The payment will be equal to 12.7 cents per pound times the difference

Cotton producers on the High Plains are being advised to contact without delay the Agricultural Stabilization & Conservation Service (ASCS) offices in their respective counties to discuss the disaster section and other provisions and regulations of the current farm program as they relate to low yields from the 1975 crop.

responsible for the section of the law which provides supplemental income to partially offset crop losses or extremely low yields that result from conditions beyond producer control.

The advice comes from Donald Johnson, Executive Vice President of Plains Cotton Growers, Inc. PCG is the 25-county High Plains organization

Also, there is provision for a weather adjustment in production records used for 1975 by ASCS to establish each farm's future payment yields. However, neither disaster payments nor yield adjustments are automatic, Johnson warns producers.

family issues. I would suggest that you have a long conversation about the matter with the most understanding of the three boys, and perhaps he could then let his brothers know that you, at these later years, need the home to yourselves. And I wish you good luck.

"Producers must make application at their county offices for a yield adjustment and/or payment," he states, "and the application must be made no later than 15 days after completion of harvest."

Johnson points out that it is not necessary for producers to complete ginning and have production records in hand

DEAR JACLYN CLAYE: There is something interesting going on around here. I think my home is being used as a feeding station. The problem is to let our sons know how my husband and I feel about this matter without ruining some otherwise very important relationships. Signed MOM & DAD.

URGENT-IMMEDIATELY

Dekalb is already sold out on most nos. of green bug resistant maize. We still have a small supply left for booking. If you want some of this resistant maize, see us now, because we will not have it at planting time.

Considering Corn We have lots of information on corn & represent most all of the major companies on seed corn. Come by and let us show you how you might make more money by planting corn. Normally corn will produce from 2-3000 lbs more per acre, than milo. You might have a place on your farm that corn would work. It is paying real well in other areas & we think it will work here

cooperatives serving district 2: Bailey, Dickens, Lamb, Deaf Smith and Swisher counties, and Lea County, New Mexico. Also, Caprock, Lighthouse, Lone Wolf, Lyntegar, Midwest and South Plains electric cooperatives.

Speaker for the special occasion will be Charles W. Stenholm, general manager of Stamford Electric Cooperative, Inc., Stamford, Texas, and past president of Texas Electric Cooperatives, Inc., Austin, Texas.

Mrs. Gail House, Department of Home Economics instructor at Texas Tech University, will be master of ceremonies, and Mrs. Aubrey W. Russell, District 2 Extension Agent (retired), Lubbock, will narrate the presentation of awards.

Special guests will include parents, adult leaders, Extension Service officials, representatives of electric cooperatives and other supporters of the 4-H program.

To qualify for the special award, a 4-H'er must be at least 13 years of age, have completed at least three years club work and be currently active in 4-H.

According to County Extension Agents Roy Jones and Gail Gladden, the Gold Star Award is intended to stimulate winners through higher achievements and to encourage other young people to participate in the county 4-H program.

Grades 41, 32 and 42 were redominate qualities in this week's classings. Grade 41 was 5 percent, grade 32 - 17 percent and grade 42 - 37 percent. Bark reductions were assigned to 3 percent of the samples classed.

Staples 28, 29 and 30 were redominate lengths accounting for 29 percent, 36 percent and 25 percent respectively.

Mike readings 3.5 through 4.9 amounted to 34 percent of the total. Mike group 3.3 through 3.4 accounted for 16 percent, 3.0 through 3.2 range 34 percent, 2.7 through 2.9 was 14 percent, and mike 2.6 and below 2 percent.

Pressley tests indicated breaking strengths at Welland averaged 88,000 pounds per square inch.

Ginning increased throughout South Plains and about 2,300 samples were classed by the Welland Classing Office during the week ending November 14.

This seasons total stands at 3,100 samples compared to 82 on the same date a year ago.

police protection, sanitation and urban renewal among others.

The high rates in certain communities are attributed to special local conditions, such as unusually large welfare costs, housing problems and the like.

As for the revenue to finance these outlays, close to \$439 per capita was collected in Cochran County in local taxes and charges, the rest coming from Federal and state payments.

ending July 31, 1975.

The law provides that if the calculated loan rate is higher than the current level of acreage world prices for American cotton, the loan rate may be established at 90 percent of the current average world price. A further evaluation of cotton prices will be made before the beginning of the 1976 cotton marketing year, August 1, 1976.

Hall noted that loans available to program cooperators for different individual upland cotton quantities will be based on the Middling 1-inch rate, after adjustment to the quality Strict Low Middling 1-one-sixth inches - the base quality now applicable to spot market and futures price quotations.

The producer allotment does not limit the amount of cotton he can plant, but is computed only for the purpose of making payments should a payment be required. Failure to plant at least 90 percent of the farm allotment will result in a reduction in any payment due and could result in a reduction of up to 20 percent in the 1977 allotment.

paid trip to the National 4-H Congress in Chicago, Ill., Nov. 30-Dec. 4. Her trip will be sponsored by Transco Companies, Inc.

Miss Glassford's state-winning 4-H record book will be entered at the national level to compete for six educational scholarships of \$800 each provided by Thomas E. Wilson Foundation and friends of

Kenneth H. Anderson.

A 1974 graduate of Henrietta High School, Miss Glassford, 19, is a sophomore student at McMurry College, Abilene, and a daughter of Mr. and Mrs. Bill Glassford of Henrietta, former co-owners of the Morton Tribune.

During the past summer, she served as a tour guide for state capitol building and governor's mansion in Austin, and has been a sergeant-at-arms in Texas House of Representatives.

She attended Texas Farm Bureau Citizenship Seminar in 1972 and 1973, and participated in a United Methodist Church Christian Citizenship Seminar in New York City and Washington, D.C., in 1972.

Miss Glassford participated in district and state 4-H leadership laboratories, attended Bluebonnet Girls' State in 1973, and served as Wichita Falls District United Methodist Youth Fellowship president.

She was named Clay County's

GoldStar 4-H Girl in 1973 and was recipient of the Danforth Award last year. She was a county dress revue senior division winner in 1972 and 1973, and participated in a "share-the-fun" group at State 4-H Roundup in 1972, 1973, and 1974. Her group placed sixth and fourth the last two years.

Miss Glassford has served as president of her local club, Henrietta Community 4-H Club, and Clay County 4-H Council.

At McMurry College, she is a member of Pi Delta Phi and assistant editor of the campus War Whoop. Last year she was member of Indian Drum Corps and business manager for the college newspaper.

a 2.5 average and Larry Moore rushed 9 times for 20 yards and a 2.2 average.

Steve Polvado attempted 7 passes, completed none and was intercepted three times.

Rusty Lamar was 0 for 6 and had one intercepted.

Lamar punted four times for a 33.2 average.

In what had to be a loosely played contest, Morton won only one category in the final statistics - they lost only 105 yards on penalties while the Chieftains were giving up an astronomical 150 yards to the officials.

As they pack away the pads and jerseys for another year, the Tribesmen can look back on a somewhat disappointing year because their natural enthusiasm and self confidence caused them to expect more, but also a year in which there was nothing to be ashamed of in their performance. Their parents, friends and fans are confident that they will be right back in there digging when the 1976 season rolls around.

The Tribune hopes to publish the final statistics for all of District 3-AA in next week's paper.

Morton Shares In Large Tax Rebate

Morton received \$5,013.26 as Comptroller Bob Bullock mailed checks totaling \$14.5 million to 670 cities and towns Friday, rebating their October city sales tax.

Bullock said his office has rebated a total of \$223.7 million to cities collecting the sales tax so far in calendar 1975. During all of calendar 1974, he said, a total of \$233.7 million was rebated.

With a normal November and December, Bullock predicted city budgets will enjoy \$25 million to \$30 million more revenue from the sales tax this year over 1974.

The Comptroller said 154 of the total 824 cities collecting the sales tax will not receive their rebate until the end of the December quarter, because they fell below the \$500 cutoff for monthly rebates.

IS THE CHURCH PART OF YOUR LIFE?

Many of us grew up with pictures of caravans crossing the sands of the Sahara. Those in the West know that the desert has many faces. One of our common mistakes in life is to assume that trees make a forest, flowers a garden, clothes a man — that appearances promise reality. One of the invaluable influences of Christianity upon society has been its distinction between the facade and the truth. Christ taught that men must be known by their faith. Lack of spiritual concern is the surest way to make the world a desert of trees — a society of people without a sense of responsibility. Wastelands cry out for reclamation. The Church Christ founded is reclaiming our society for Him. You need His Message.

Panhandle, South Plains Deer, Turkey Forecast Good

Dry weather is predicted to be the only factor that might slow down the November deer and turkey opening in the Panhandle and on the South Plains of Texas.

An excellent crop of young deer and turkey along with ample food and cover should furnish Texas hunters with ample opportunity as the season opens Nov. 22 and continues through Dec. 7 in the Panhandle regulatory district and Nov. 15 through Jan. 4, 1976 in the South Plains district.

"We recorded the best deer harvest on record in 1974," said Weldon Fromm, Amarillo district supervisor, "but 1975 looks better with excellent deer antler growth and an abundance of wild turkey."

Fromm stated that the bag limit of one mule deer buck and one white-tailed deer buck and one wild gobbler or bearded hen is possible this fall in the Panhandle.

Hunts coming at the right time on the South Plains of Texas have brightened the hunting picture for deer and turkey hunters according to Bill Pratt, Lubbock district supervisor.

"The mule deer in the caprock country of the Lubbock district are in excellent shape and all areas recording turkey in past years seem to be holding good flocks now," Pratt said.

A limit of two bucks and one turkey of either sex has been set for the Permian basin - South Plains district Pratt commented.

Both district supervisors are suggesting that hunters use caution this fall while hunting due to the very dry conditions on most of the ranches. Several prairie fires have already been reported and the use of vehicles in the field could be dangerous due to hot tailpipes, mufflers or even the careless use of cigarettes or matches.

Deer hunters in the field for the first time are reminded that legal firearms for deer include all calibers of rifles except a .22 caliber jet gun or rocket or any firearm using rimfire ammunition.

Legal shooting hours for deer and turkey are one-half hour before sunrise to one-half hour after sunset daily with roosting areas for wild turkey protected by law.

MR. AND MRS. JAMES C. SNITKER

Bates-Snitker Vows Read In Double Ring Ceremony

Miss Beverly Gay Bates and James C. Snitker pledged double ring vows Friday, November 7, at 7 p.m. in the Assembly of God Church. The Rev. Frank Estes, pastor, performed the ceremony before an archway of greenery accented with wedding bells, white flowers and blue bows.

Parents of the couple are Mr. and Mrs. Lindel Bates and Carolyn Snitker and J.C. Snitker.

Given in marriage by her father, the bride wore a formal gown of peau de-soie fashioned with an empire waistline, high neckline and full bishop sleeves gathered into petal point cuffs. The gown was accented with lace and pearls.

Her veil of bridal illusion fell from a Juliet headpiece and she carried a nosegay of white and blue pom pom mums.

Pamela Drennan, sister of the bride, served as matron of honor and Tona Coker served as

bridesmaid. They wore light blue gowns and carried blue nosegays.

Jerry Sowder was best man and Sam Del Arosa served as groomsmen. Guests were seated by Ronnie Gilbert, brother-in-law of the groom, and Ellis Grimes.

Cindy Tanner and Mitzie Scoggins played traditional wedding music and Gay Waters sang "Hand in Hand" and "The Twelfth of Never".

Gary Scoggins and Mike Scoggins were candlelighters. Kim Fred registered the guests.

The couple will have a reception in the Levelland Savings and Loan Party Room. Rita Scoggins and Becky Jones served at the bride's table and Brenda Watts and Betty Jones served at the groom's table. Others serving in the houseparty were Mrs. Margie Collier and Mrs. Shirley Daniels.

After a brief wedding trip, the couple will reside at 506 West Garfield. Snitker is employed with Windom Oil Company.

Good News for Cotton Growers

We Have the Means For Getting Your Cotton To the Gin Quicker, Safer and At Lower Cost

Star Route Co-op Gin has a substantial number of these 40'x10'x10' portable containers with which to haul your field-stored cotton to the gin or to park on your turnrow to store as you harvest and later pick up.

Our equipment includes a loader for transferring your ground-stored cotton into these containers for a quick trip to the gin.

Let Us Help You...

*Eliminate higher trailer costs

*Eliminate the road hazards of trailer operation

*Cut down on gin yard time by delivering much larger amounts per trip. These containers will store or haul up to eleven bales per load making it easier for you to schedule your crop through the gin.

*Cut down on time lost to weather due to less time waiting in the gin yard.

Everyone is asked to bring a vegetable or salad and a White Elephant for bingo.

State Parks Set 14-Day Camping Limit

Increasing popularity of fall and winter camping in state parks has led the Texas Parks and Wildlife Commission to decree a fairer apportionment of occupancy time. At a recent meeting the commission adopted a new regulation making the summer occupancy limit of 14 days applicable year-round.

In order to insure more equitable use of the parks, the TP&W Commission now rules that campers must vacate overnight facilities after 14 days for at least a minimum weekend period before being able to return providing all facilities are occupied and an incoming visitor requires a facility.

Until now the 14-day limit has applied from May 1 to September 15, with a flexible 28-day limit during the rest of the year, depending on demand.

State parks have been experiencing a significant increase in trailers and other camper vehicles, many people using the parks as a winter home, especially in the southern part of the state. This has led to complaints by working residents in adjacent regions, who are only able to camp on weekends, that there has not been room for them.

Winterization Topic At CCCAC Meeting

John Gildersleeve of Lubbock spoke to the Board of Directors of the Cochran County Community Action Committee on the Winterization program November 11 at the Center.

He stated that twenty-five houses in the area will be included in the program and listed the qualifications necessary for approval.

Mrs. W.G. Freeland reported that eight are now enrolled in the A.B.E. class and ten are enrolled in the Office Occupation class.

Reporting on the Social Services Activities, Mrs. Thelma Lewis stated that 349 contacts had been made. She also reported on other activities at the center.

Mrs. Sylvia Soliz, Family Planning Director, listed the number of participants in the program, as 186 active and 43 inactive.

Luis Perez explained the Three Year Funding Plan and the areas it covers.

A recommendation was made to begin plans for a Cochran County Day Care Center.

Mrs. Bessie Green, president, presided at the meeting and Mrs. Solomon Hamilton gave the roll call.

STYLISH SHOW — Mrs. Steve Crockett shows off the latest in evening wear as she modeled for a newcomers tea sponsored by the Emlea Smith Junior Study Club and held in the Community Room of the Levelland Savings and Loan building Thursday. The tea was for the purpose of welcoming newcomers to Morton, Mrs. Sue St Clair, club president, told the Tribune.

County ASCS News

By John W. Hall, CED
Cotton and grain producers in Cochran County stand to lose up to \$1,000,000 of much needed income. Why? Because they filed inaccurate or late reports. This figure covers operations through today and it is increasing.

It is too late to do much about the acreage report, but you can prevent the loss caused by late reports of disaster. How? — Contact the County Office by phone or in person.

Cotton Producers — Contact the office if you estimate that your production will be less than 90 percent of the farm yield.

Grain Producers — Contact the office if you estimate that your production will be less than 48 percent of the farm yield.

Note:
A report (ASCS-574) filed more than 15 days after the completion of harvest on the farm is late. We can wait for your production evidence, but we cannot wait for a report of disaster. Gins, warehouses, etc. are asked to show the date of last delivery on all production evidence.
