JAMES R. BRADLEY

James R. Bradley assumed the duties of director of the Texas Engineering Extension Service on December 1, 1973.

"Jim Bradley had done an excellent job in developing the Engineering Extension Service's concept of regional centers around the state," said Fred J. Benson, dean of the College of Engineering at Texas A & M University.

"He has been responsible for organizing and implementing the first of these centers at Floydada, and we have high hopes that this will be a real benefit to the people of the area," Benson added.

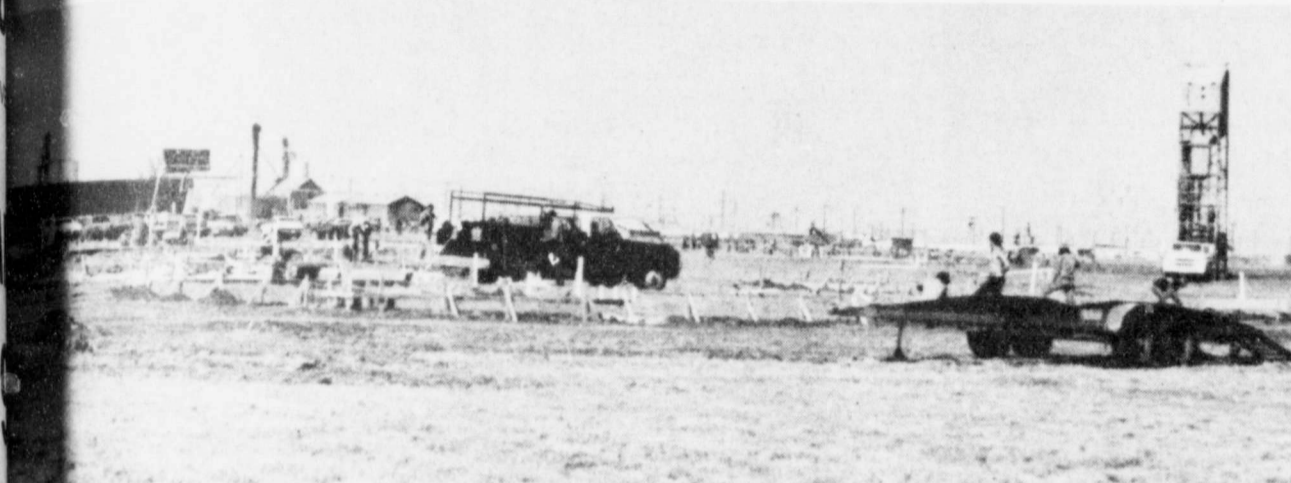

Born in Galveston, Bradley received a B.S. degree in marketing and finance from Texas A&M University in 1947, following four years of active duty in the Army. He was in the U. S. Army Reserve from 1946 until 1974, when he retired with the rank of colonel.

Bradley continued his education at Texas A&M University and received a master's degree in economics and business administration in 1954. He did two years of additional post graduate work in economics and agricultural economics.

His experience in industry and as a consultant in economics, marketing, and finance have netted Bradley numerous honors and awards. He has been included in Who's Who in the South and Southwest and Who's Who in the World in Commerce and Indus-

Crime Prevention Program Tuesday Night

Crime is reminded of the Crime Prevention program to be presented Tuesday evening, April

12th, in the chapel of the First Methodist Church. The program gets under way at 7:30 rather than 7 o'clock

as previously reported. That's at 7:30, First Baptist Church chapel. Everyone is invited to attend.

Sponsoring the program are the four Floydada Study Clubs, 1929, 1934, 1950 and 1956 Jr., in keeping with one of the TFWC required programs, "Hands Up."

J. C. Coats, who is with the South Plains Association of Government, will present a lecture and show films. Just a few of the topics he will cover includes what can be done to prevent a residential burglary, how to form a neighborhood watch and what will stop a house burglary?

The goal of every law enforcement agency in the nation is the reduction of crime. The hope of every American is a secure home, a protected neighborhood and safe streets. Working together citizens and law enforcement officials can become successful partners in fighting crime.

Caprock Chat By Wendell Tooley

OVERLOOKING some of the best fishing in the Silverton area. This information from the Lunker Stark:

This scenic lake out in Canyon State Park is in excellent condition, and the water level is well below spillway level. The water is still clear, but the crappie run is due ANY DAY NOW, and the best bass fishing will probably be later this month. Until then, plan is developed for the Park NO OVERNIGHT fishing will be allowed, but fishing is FREE to the public.

Quitaque Lake—Gerald Springs lake four miles from Quitaque is now almost full. The water has been running down the tube most of the week. The Graham Lake farther up the creek keeps all the underlings recharged, and a FRESH STREAM of pure spring water flows into the lake. As a result the largest catches in this area are recorded there, and Mr. [Name] started it all off this year with a good bass.

Quitaque Lake—This popular lake is located in some of the best fishing in West Texas, and it has been one of the best fishing spots in years past. A few years ago, a 3 1/2 lb. crappie was caught there, and it is still the largest crappie ever landed under the name of Quitaque fishing is ALWAYS a winner.

Quitaque Lake—This is the second best fishing spot in the area for public use. It is in a setting on the edge of the lake, and its owner, Walter Graham, has it primarily for irrigation. The water is of all kinds, and the Canadian geese stop on their journeys to the lake each year.

Quitaque Lakes—For many years the resort off Highway 256 at Quitaque has been a favorite spot for sportsmen from over a mile away. There is a cafe, several

cabins, a tackle shop, boat dock and swimming area, and some FINE STRINGS of fish are taken from the lake each week.

(6) Bill Lane Lake—In the rolling countryside northeast of Turkey there is a relatively new lake on the Bill Lane place that has provided CONSISTENTLY GOOD FISHING the past few years. It is a long narrow lake, with two main channels that come together at the dam, and when the lake is full the channels wind back in two directions for nearly a mile.

I HOPE EVERYONE in this community will take time to attend Easter services in some church this Sunday. ...and I heartily recommend the TV production "Jesus Of Nazareth" ...three more hours of this at 7 Sunday evening. If you missed the first three hours of the production last Sunday, the most important is yet to come...the Resurrection.

If you can't attend church...or see the TV production, perhaps you can take a few moments of meditation, to reflect upon His message of the season which inspires us all with renewed spirit of brotherhood and love...showing us the pathway to inner peace and contentment...filling our heart with renewed hope.

Let's all enjoy the experience of Christ's resurrection in reverent prayer and joyous triumph. Sing praise...and give praise, for all the blessings of this truly special time of the year.

TO OUR QUESTION of last week about country western singer Don Williams...we received a phone call that his home was Ralls instead of Floydada.

BAND BOOSTER MEET

Floydada Band Boosters will hold a covered dish supper meeting Monday night, April 11 beginning at 7 o'clock at Lighthouse Electric. Those attending are asked to bring a covered dish and all band boosters are urged to attend. Don Chesshir, president, said new officers for 1977-78 will be elected at this time, and new projects for the year will be presented.

Older citizens and those living alone will find this program very beneficial as will those who leave their home frequently on trips. You will learn simple steps to take to reduce the possibility that your house will be burglarized or vandalized while you are away, and what to do if you're at home and you realize your home is about to be burglarized.

Burglary is not just a "big city" crime. Each year burglary has been increasing in rural areas more than in large cities. This program Tuesday night will show you what possibly can be done to prevent a residential burglary.

Commissioners Court Meets Monday

The public is reminded that the regular monthly meeting of the county commissioners court is Monday.

On the agenda is canvassing of the school elections, an interview with librarian Nita Hull and discussion of jail standards.

At 1 p.m. the commissioners will adopt the revenue sharing budget and is expected to set the equalization board hearing at 9 a.m. June 8, 1977.

A discussion of the county canneries is also planned at the meeting.

Homemaker Service Aid Program Popular In Floydada

Some six persons are now enjoying the new Homemaker Service Aide Program sponsored by the Community Action Multi-Purpose Community Center in Floydada.

Kathy Green reports that there are more applications for the service now being processed.

Pictured with this story is Mamie Gray, 528 W. Missouri, who has employed Belen Torrez to come in one day a week to help her with personal grooming, meal preparation and home management.

The service is also available in Lockney by calling Molly Gonzales at 652-2639.

ABOUT THE PROGRAM

The program is administered through Texas Tech University College of Home Economics (Model Rural Project for Homemakers Service Aide Program to the Elderly).

The Homemaker Service

Aide Program provides quality, in-home care services of meal preparation, personal care, home management, escort service, visitation and companionship for the elderly.

The services and various other duties provided enable persons over 60 years of age to function in their own homes with limited assistance.

As well as providing much needed services for persons over 60, the Homemaker Service Aide Program provides employment and para-professional training opportunities for mature, under-employed homemakers.

Those with a number of years' experience in managing a household are given preference in employment. Homemakers will receive pay for 12 weeks of on-the-job training as well as for scheduled full or part-time work with elderly clients.

HOW IS IT FUNDED?

The Homemaker Service Aide Program to the Elderly is Federally funded through a grant to the Texas Tech University College of Home Economics from the Administration on Aging (AOA) of the Department of Health, Education and Welfare.

WHY

Many, older citizens want to keep their independence and seek alternatives to hospital or institutional care. With limited in-home services, it often is possible to remain at home, satisfying personal preference and usually at a cost saving.

WHO PARTICIPATES?

Persons over the age of 60 are eligible to receive Homemaker services, based on their ability to pay.

WITHIN WHAT AREA?

The program serves a 15-county region of the South Plains. Persons eligible to participate must live in any of these counties: Bailey, Cochran, Crosby, Dickens, Floyd, Garza, Hale, Hookley, King, Lamb, Lubbock, Lynn, Motley, Terry, Yoakum.

Homemakers provide in-home care services to the elderly in the community where both live.

WHEN ARE SERVICES AVAILABLE?

Homemakers are available on an hourly or daily basis, according to the client's needs.

Mrs. Bobby Dartland Carthel

Friday Evening Vows Unit McCormick, Dart Carthel

Double ring wedding vows, recited in First United Methodist Church of Lockney Friday evening at 7 o'clock, joined in marriage Miss Cynthia Joann McCormick and Mr. Bobby Dartland Carthel.

Mrs. Carthel is the daughter of Mr. and Mrs. Bobby McCormick of Lockney, and the groom's parents are Mr. and Mrs. Bobby Carthel, also of Lockney.

Rev. Frank Oglesby, minister of First United Methodist Church of Tahoka, directed the wedding service. The altar area of the church was centered with a kneeling bench and a "unity" candle. Flanking the kneeling bench were heart and tree candelabras holding white tapers, and formal baskets of blue and white flowers. The bridal aisle was marked with hurricane lamps tied with greenery, gypsophila and blue satin bows.

Mrs. Jim Price of Plainview, sister of the groom, registered guests, who were then assisted in being seated by ushers Sam Fortenberry, Larry Cunyus of Lubbock, Steve McPherson of Canyon and Martin Stoerner. Gary White of Tahoka was organist for the pre-ceremonial music program of traditional wedding songs, and also accompanied Mrs. Ray Ford as she sang "Wedding Song" and "One Hand, One Heart."

Lighting of candles by Misses Jerri Ann McCormick, cousin of the bride, and Cheryl Perry marked the beginning of the wedding service. The young ladies were dressed in long white polyester knit fashions trimmed with blue lace. The full skirts were accented by sashes. They wore blue picture hats trimmed with white ribbons. The groom's cousin, Mrs. Keisha Carthel of Plainview, was flower girl, and wore a dress identical to those of the candlelighters. Her small blue hat was accented with blue and white flowers.

Bridesmaids were Mrs. Mike Ferguson and Miss Connie Bradley, both of Plainview, and the groom's sisters, Misses Jackie Carthel and Tammie Carthel. Serving as groomsmen were Joe Martin of Portales, New Mexico, David Brotherton of Lubbock, J. H. Lane and Glen Graves. Ring bearer was Lance Price of Plainview, nephew of the groom.

The wedding reception was held in the church fellowship hall. The serving table was covered with a blue knit cloth and an overlay of white lace. A formal arrangement of flowers on a silver candelabra, which held white tapers, graced the table. The triple-tiered wedding cake set on a base of four large heart-shaped cakes. The design was trimmed in two shades of blue icing and was topped with wedding bells. Crystal appointments were used to

flowerets fell to form peaks at the bride's wrists. A full, bell-shaped skirt of silk organza fell in graceful folds from the flowerets encircling the crescent shaped, high-waist line, and swept to form a full chapel train. The full skirt was enriched with medallions of appliqued Point-de-Paris lace and venise lace garlands. The entire hemline was etched in garlands of venise lace edging.

The bride wore a petal white French chou of imported Point-de-Paris lace which held her bouffant tulip veil of imported silk illusion edged with matching Venise lace appliques. The former Miss Carthel carried a cascade bouquet of white piny carnations surrounding phalenopsis orchids softened with gypsophila. Tied in the bouquet was her "something old"—a gold wedding band which had belonged to her great-grandmother Hill. For "something new," she carried a silk handkerchief from China which was given to her by her former employer, Lester W. James Sr. of Plainview. She borrowed diamond earrings from her sister and wore the traditional blue garter. In her shoe were pennies commemorating the birth years of both the bride and groom.

Honor attendants for the bride and groom were her sister, Mrs. Jack Fisher of Brownwood, and Louie Bybee. Mrs. Fisher and the bridesmaids wore floor-length blue and white dresses of polyester crepe acetate. The dresses were designed with Empire waistlines, high stand-up collars and elbow-length puffed sleeves. They wore blue picture hats trimmed with white ribbon. Their bouquets were of blue carnations, white cushion poms and gypsophila tied with lace and arranged in crescent shapes.

Bridesmaids were Mrs. Mike Ferguson and Miss Connie Bradley, both of Plainview, and the groom's sisters, Misses Jackie Carthel and Tammie Carthel. Serving as groomsmen were Joe Martin of Portales, New Mexico, David Brotherton of Lubbock, J. H. Lane and Glen Graves. Ring bearer was Lance Price of Plainview, nephew of the groom.

Folk Tell Of Recent Trip To Mexico City, Taxco, Acapulco

Several students traveled to Mexico City, Taxco and Acapulco recently and published their comments from the trip. From the Messies, L.C. Bertrand, Fred Lipman, R.G. Dallas was secretary from Ruisaco, Betty Miller and Mrs. Dunlap.

menal, thanks to being blessed by nature in having ideal winter climate, beautiful sunsets, nice beaches, tropical plants and an abundance of fresh fruits and fish. We enjoyed staying at Holiday Inn, the private beach was so convenient and food was good.

We took a four hour boat cruise around the bay—looking at the huge elegant homes. (Lenton and Lea Pruitt found just what they wanted if they can get the architect to design an irrigation ditch on north side of home.)

We took a tour to the fabulous Princess Hotel. The hotel has a panoramic view of the bay. The campus and golf course are spacious and beautiful. Strolling through this luxurious place, my thoughts turned to Howard Hughes. How could he lock himself in a dark room and watch an old movie in the midst of all this beauty? (R. G. Dunlap volunteered to stay awhile to see if he could answer the question!)

We continued on to Las Brisas to visit the "Cross of Peace" and admire the gardens and elaborate homes on mountain sites.

We watched the world-famous divers perform at La Quebroda. Virginia Dyson took the exciting parachute flight. (We took pictures of her departure feeling she might never return.)

Wendell Tooley discovered a fast way to gain weight. He was standing on the beach, dressed in his tennis shorts, a large wave rolled in. The under-tow pulled him under. When he came up his clothes were filled with small rocks.

It was interesting sitting on the beach, under a palm shade, listening to Lorene Newberry, Helen Lipham and Lea Pruitt "bargain" with the natives for shoe-string bikinis (they said for their granddaughters??) However, Mary Tom Tooley was at the head of the class in "beach-bargaining." She just smiled that sweet smile, stated her price and got it!

We enjoyed many things while in Mexico. A special treat was the abundance of fresh fruits, pineapples, oranges, grapefruit, limes, cantalope, watermelons, papaya etc.—also the beautiful flowers.

By Lorene Newberry The Mexico tour was a wonderful tour and with friends that were always ready to prowl, made it an exceptional tour.

Mexico City with its beautiful churches, a university that costs so little that anyone can attend from a financial point, but if they don't have passing grades and aren't there for their education, out they go.

The pyramids are something to wonder about—how the people could have built them so well hundreds of years ago and to see them being uncovered over such a big area...

Never did we see so many Volkswagens, buses and taxis. There were very, very few bigger cars, very few pick-ups and we saw two campers and they were the pick-up type. The more beautiful homes might have three or four cars in the driveway but they were always small cars.

To see the farmers trying to farm a hillside and to see oxen pulling the plow! And Orval was impressed with the man riding the burro with his wife and kids walking behind! To see women washing their kids and clothes in the stream and there weren't many streams. To

see children carrying squirming iguanas tied together. They are huge lizards. We asked the guide what they did with them and he said they made awfully good "chicken" for Mexican food!! To see hay stored up in the trees so animals couldn't reach it.

Squatters are plentiful everywhere. It seems that if a family can throw up a shack on government land and spend the night in it they cannot make them move, but to see a family of them between two huge hotels in Acapulco was hard to believe, but there they were with no water; the girls carried buckets on their heads after filling them from faucets that watered shrubbery. They had an out house and hens with baby chicks that seemed to live in the house with them.

The vendors peddled their wares and we bargained for them. Betty Battey said she always bought first, then everybody else got on the bus and told how much less they had paid than she had.

And then Virginia Dyson was the only one of the group brave enough to ride the parachute that was pulled by a boat as she went high above the bay before they brought her back to land. The rest of us cheered her all we could—we told her we would use her vacant seat on the plane for our purchases and Helen Dunlap took her picture telling her, "I'll tell your kids this was the last I saw of your mother."

It was a fun trip.

by Fred and Helen Lipham What interested us was the country, the way some of the people still preserve their food, the roller coaster roads, and the churches. Also, their food was very good.

By Mary Tom Tooley There was a stir on the beach near the water, and looking toward the commotion we could see someone dressed in "the original swimsuit" complete with pantaloons legs, a tie belt over a long blouse featuring puffed sleeves, all in a dark navy. The suit was completed with a matching bonnet from which flowed locks of wavy black hair. With a guffaw of spontaneous laughter we glanced to see the face belonging to all this and it was none other than our own Betty Battey, of course. She actually got it wet and discovered to her dismay that the old fabric wasn't dye-fast.

By Wendell Tooley Only two of the group had the intestinal fortitude to attend the bullfights in Mexico City...William Bertrand and Virginia Dyson. William came back to the hotel with a little blood on his cap...he seemed very tired and would make no comment. Was he the back-up man for the Matador?

"Until such time as there is a successful boll weevil eradication program in the Cotton Belt east of us, we on the High Plains are looking at a never ending, every-year control program to protect ourselves."

So spoke Donald Johnson, Executive Vice President of Lubbock-based Plains Cotton Growers, Inc., March 30 before the House Appropriations Subcommittee on Agriculture and Related Agencies. Appearing at the request of the National Cotton Council, Johnson testified in favor of a requested \$1.7 million appropriation to fund a trial boll weevil eradication and integrated pest management program in parts of North and South Carolina.

Further explaining the intense interest of the Texas High Plains in the eradication trials for the Southeast, Johnson detailed the costs incurred and the benefits received in PCG's own 13-year-old High Plains Boll Weevil Control Program.

The High Plains program since 1964 has seen an aggregate of about 11 million cotton acres sprayed with ultra low volume malathion at a cost of almost \$13.5 million. Some were Federal and State funds and about \$6.5 million came from area producers. The program, Johnson pointed out, has confined weevil infestation to about ten percent of the cotton acreage in PCG's 25-county territory.

"The success of our program, both as to physical containment of the weevil and the economic benefit derived therefrom, is without question," Johnson stated, citing the conclusions drawn from a joint study by the National Science Foundation, the U.S. Department of Agriculture and Texas A & M University.

That study showed about \$40 in benefits for each \$1 cost in the High Plains effort, it was noted, "meaning that spending \$13 million has saved our producers over \$500 million in control costs, yield and quality losses."

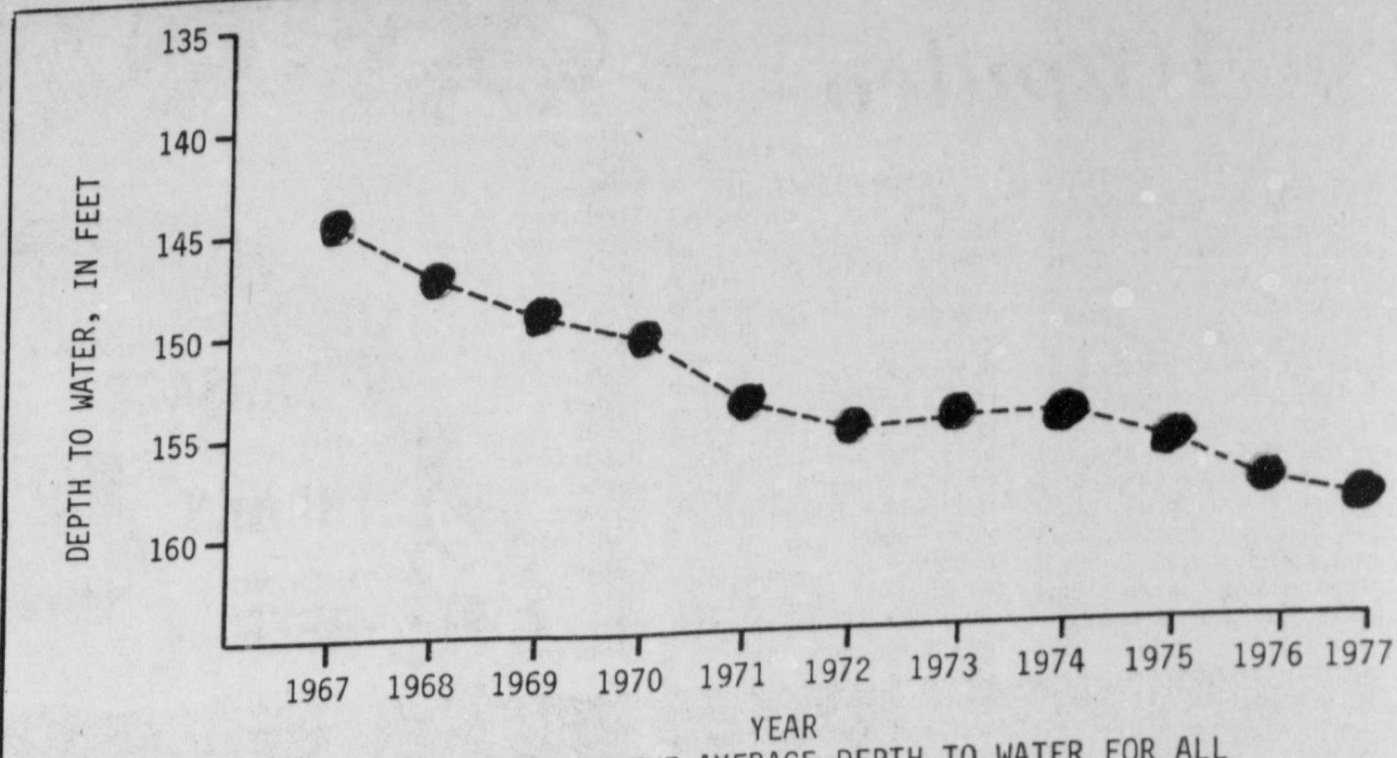

The PCG official also referred to the fact that Texas is now successfully conducting integrated pest management programs in 20 small areas of the state, five of them in the High Plains area. The objective, he said, is to achieve a statewide management program that will reduce the overall cost of pest control and achieve a reduction in the total insecticide requirement.

Johnson emphasized that integrated pest management programs should be an integral part of, and would be an invaluable supplement to eradication. The two "go together like peaches and cream," he said.

Floyd Irrigation Water Declines 3.42 Feet

by Don Smith

A preliminary evaluation of the data obtained from January 1977 measurements of the depth-to-water values in the 800-plus water level observation wells within the District has been completed. The overall direction of change continues to be a decline or drop in the water table; this trend became apparent soon after the introduction of groundwater pumpage to the area and has continued without reversal to date.

The rate of decline (feet per year or percent of reduction to the aquifer) has a direct relationship to the amount or volume of water removed from the aquifer through pumpage. Year-to-year and area-to-area pumpage extractions have normally been highly variable and closely aligned to such factors as the thickness of the aquifer, soil type of the land surfaces, intensity of well development, crop type patterns, distribution of precipitation and other criteria of varying importance. For these reasons, the validity of observed data becomes more meaningful when viewed in perspective to established long term trends with the annual changes serving as a comparison to overall averages.

The table "Average Decline of

Water Table"—serves to depict the changes within each county, or that portion of the county contained within the District's boundaries.

Comparison of the one-year change to the ten year average annual change clearly illustrates the areas where an extremely dry Spring and early Summer necessitated extensive pumpage. By contrast, Lynn County data reflects the more than adequate rainfall received during the growing season.

The Table "Summary of Water-Level Measurements", presents data for the District on the number of wells measured, the minimum, maximum

and average depths to water for each county in January 1968 and January, 1977.

While numerical statistics may lend themselves to a variety of interpretations, it would appear that the calculated values for the average-to-water within the District have not experienced as large an incremental change from year-to-year as was noted in the past. In retrospect, a marked change in the yearly overall increase in average depth became noticeable in 1972 and subsequent years' data have helped to validate this change in the

facilities on the campus of Texas A&M University, its research and extension centers, and locations throughout the state, the Texas Engineering Extension Service affords an opportunity for all Texans to participate in training programs which are not available through local resources," said James R. Bradley, director of the Texas Engineering Extension Service.

"Our goal at the West Texas Regional Training Center is to provide training for the rural electric cooperatives and municipal and county governments of the West Texas area in water and wastewater treatment, law enforcement and security, fire protection, and electric power utilities," Bradley added.

In its role as a service organization of the state, the Engineering Extension Service provides training programs on a statewide basis for industry, municipal government, utilities, and other trades requiring vocational or industrial training.

These programs are developed and conducted by the 13 specialized training divisions which include building codes inspection, construction equipment, electric power utilities, and electronics.

The program in Loss Control Training covers procedures for identifying, comparing, and evaluating specific areas of potential occupational accidents, illnesses, and injuries.

Training is also provided by the Texas Engineering Extension Service in the areas of oil and hazardous

material control, telecommunications, and vocational industrial teacher education.

The Supervisory Training Division offers programs of knowledge and technique development for all supervisory/management personnel.

A relatively new division of the Engineering Extension Service is Public Works Training. Programs are conducted in six major areas of public works: solid waste, construction and maintenance, engineering, lighting, airports, and garages.

A Public Works Resource Center was established in May 1976 to serve as the focal point of public works technological analysis, organization, and dissemination throughout the state.

The Water and Wastewater Training Division offers courses ranging from basic water chemistry to equipment maintenance for water and wastewater treatment personnel.

In addition to the year-around programs, the Texas Engineering Extension Service organizes and conducts special courses requested by industry, such as a surveyors short course, a crane inspectors seminar, and a structural drafting program.

Through its 13 training divisions, the Texas Engineering Extension Service provides supplemental training in vocational and indus-

trial trades to employed persons so they can upgrade themselves, be promoted within their organizations, and become overall better citizens," Bradley said.

Breezettes Dominate Dual Meet

By Doug Simpson
The 8th grade Breezettes of Jackie Chadwick swept the dual track and field meet with Frenship at the Floydada track on March 30, by placing 17 participants in 7 running events, enroute to a 120-point performance. Floydada, as true with the seventh grade, competed against the Tigers under no point-total conditions, in spite of its obvious controlled pace of the entire meet.

The Breezettes placed a total of eight times in the field events, for a total of 42 points. In the shot put, Debra Alfaro and Belinda Sosa took first and third notches, while Alfaro and Davis captured first and third also, in the discus throw. Sheryl Johnson landed third place in the high jump, and Susan Turner netted in the triple jump, while Terry Pleasant took third in the long jump.

In the running events, it

was Turner capturing third in the 100-yard dash, while Teiss Coleman took the top award in the 220-yard dash.

In the 330-yard run, Yolando Medrendo and Sosa netted first and third notches, while Mary Soliz landed the second spot in the 660.

The 440 relay team of Terry Pleasant, Coleman, Regina Baker and Turner netted second place as with the 880 foursome of Alfaro, Coleman, Pleasant, and Turner took first.

In the final event of the afternoon, it was Johnson, Turner, Alfaro, and Pleasant taking second in the 1320 relay.

Leading the Breezettes point-wise were Susan Turner, whose impressive 5 events accounted for an incredible 62 points, Debra Alfaro, with 4 ribbons and 52 points, Sheryl Johnson with 3 events and 30 points, and Terry Pleasant, with 4 awards and 54 points.

Eighth Breezettes Take Six Seconds In Dual Meet

By Doug Simpson
Jackie Chadwick's 8th grade Breezettes, by taking second place a total of six times, along with thirds, turned in an excellent 108-point performance in a dual track and field meet with Frenship on Wednesday, March 30, at the Floydada track. In spite of the effort, no point totals were kept, therefore a winner was not determined.

Floydada contributed 58 of its 100-plus total in the field events, as Kelly Ward captured 1st place in the shot put, followed by Sheron Weeks in 2nd, while Sylvia Coleman and Carrie Woody placed 2-3 in the long jump. Coleman also landed a top medal in the triple jump, and Amy Jones netted the runner-up spot in the high jump. Ward also captured first place in the discus.

In relay competition, the 440 relay foursome of Sheron Weeks, Carrie Woody, Le Shay Chandler, and Sylvia Coleman nabbed second place, while Woody, Coleman, Weeks, and Jones also took second in the 880 relay.

It was Bonnie Johnson, Jones, Weeks and Woody capturing still another second place showing in the 1320 relay.

Jones netted the runner-up spot in the 660 while Coleman and Woody finished 1-2 in the 220-yard dash. It was Weeks taking third place honors in the 80-yard low hurdles, marking her fourth award of the afternoon. Also netting 4-ribbon totals for the hosts were Carrie Woody, Amy Jones, and Sylvia Coleman.

The Breezettes, whose 4th place finish was due primarily to its low total in the field events, closed out their 1977

First Baptist Church Media Center/Library
Many people can testify as living proof that Jesus Christ makes a difference in their lives. You will be hearing on the television and radio, testimony from many well known people about how their lives were changed when they allowed Jesus Christ to become the center of their existence. This is a good time to remind you that about three years ago the library staff made a loose-leaf notebook containing the personal encounters that members of First Baptist Church shared with us. This book is available for circulation. We would be pleased to add your testimony to this collection if you so desire.

UNDER THE SS SHADOW by Traugott Vogel is the fascinating story of the son of an SS Major, member of the Hitler Youth. Bitter about the death of his father and Germany's defeat, he vowed to seek revenge against the Allies and the Jews. Because of his Nazi past he found himself unable to get a job until the American military offered employment. While working on base someone invited him to a meeting sponsored by the Youth for Christ Organization. Traugott Vogel moved from total despair to become living proof that Jesus Christ gives meaning to life and is now pastor of a Baptist Church at Sterling City, Texas.

Out of great hardship come many stories of victory through personal faith in Christ. Such is the story of Maria Zeitner Linke in **EAST WIND**. She is a German citizen imprisoned in East Germany by the Russians following World War II. This book begins with the childhood experiences of a German girl, banished to Siberia during the Russian Revolution with her family. Maria's mother and father were Baptist missionaries from Germany to Russia who sought God's will and depended on Him in every extremity. They required their children to memorize the Scriptures and the security of their love sustained Maria through great danger and their example made it natural to look to her heavenly Father for sustenance and hope. God's miraculous intervention during the nine years she spent in the prison camp will remind you of Corrie Ten Boom's experiences. Maria Linke is living proof of the difference faith will make under the most difficult circumstances.

In the field events, Debra Alfaro landed first place with a 26'9 1/2" toss, followed by Belinda Sosa in 2nd at 24'7". Alfaro also captured top honors in the discus throw with a 75'5 1/4" hurl.
