CISCO WILL BE well represented when they call the roll for the annual convention of Lions International in New York City on July 26.

THE WESTFALLS, who will be viewing the East for the first time, plan to go via New Orleans, Atlanta, and Washington.

HOPE THEY LIKE New York better than we did on the few trips we've made there.

THE OLD SAYING that you can take man out of the country but you never can take the country out of a man fits us pretty well.

MR. WAYNE SELLERS, who writes a column of comment from country newspapers for the Fort Worth Star-Telegram, was a visitor in Cisco today.

ANOTHER NEWSPAPER man was a visitor here over the weekend. He was Stuart Doss, whose dad fills prescriptions at the Dean Drug Store.

MR. ROY DAVIS, publisher of Back in the Saddle Magazine, leaves early Thursday for Ohio to judge a horse show.

WONDER IF horse show judges, after all their hard work, please all the people.

FREDERICKSBURG, Va. (UP) — Excited residents of King Co. telephoned police a report of an "invasion" by troops trying to take Washington.

By PETER EDSON NEA Staff Correspondent.

PHILADELPHIA, July 14. — Most significant thing to come out of this Democratic convention may be elimination of the party's two most embarrassing elements — its extreme reactionaries and radicals.

They will probably take a licking in November and the Democratic party will then have two to four years in which to rebuild as a minority party.

Governor Laney is an oil man and banker, rich by Arkansas standards. He was mayor of his home town of Camden for one term.

First national attention Laney ever received has been here at Philadelphia as head of the Southern revolt caucus. He loved it and lapped up the dubious honor shoved on him as sacrifice Presidential candidate.

Condition of Crops Improved By Rains

Drought breaking rains improved growing conditions of crops in all areas of the state according to a report released by the Department of Agriculture Tuesday.

Cotton made rapid progress and continued fruiting rapidly but increased insect activity caused by the rains was noted.

Feed crops continued to improve over most of the state. Late corn was in good condition but early corn was too far gone to be aided by the moisture.

Ranges were vastly improved with grasses and pasture feed green and making new growth everywhere except the Trans-Pecos country.

Kilowatts Trim Independents by Score Of 17-4 in Softball League Contest

The third place position in the City's commercial league was being disputed no more today, at least not between the Cisco Independents and the West Texas Kilowatts.

The tie was settled in last night's softball tilt at ABC park when the Kilowatt team, back with extra hitting power and a full string lineup, trounced the Independents to the tune of 17-4 in a seven inning bout.

In the first inning, softball fans saw the Kilowatt nine, led by Sledge, cross home plate with six counts before an Independent defense could be set up to stop the raming "light globes."

A solo score made by Posey, Independent pitcher, who slid in home after getting a one base blow,

was the only count for the Independents in the first.

A three count rush home boosted the Independents' score as Mitcham and Tipton played havoc with the bases.

Only in the sixth were the Westex teamsters able to load the bases with potent runs, after hitting a downfall in the 4th and 5th. Hits by Cooper and Burrows cleaned the bases.

Crushed Rock Is Being Applied As Paving Foundation

Re-routing of U. S. Highway 80 between Cisco and Abilene was a step nearer completion today as T. V. Cage and J. C. Snowden, contractors, had begun applying crushed rock to the road base preparatory to hard-surfacing operations.

The crushing operation is in charge of V. C. Smith and employs 10 men in addition to truck operators. The crusher is turning out 1,000 yards of crushed stone per day and furnishes the finished product to nine trucks of four yard capacity.

Operators estimated that 45 days would be required to place the rock base on the Eastland county section of the road. An estimated 30,000 yards of crushed rock and 15,000 yards of sand will be used to complete the base.

When work is completed on all the sections now under construction motorists will have access to a four lane highway from Cisco to Abilene.

American Enterprise Abroad.

In some minds, the activities of American companies which do business abroad are viewed suspiciously. In that connection a statement of policy, made by one of the largest American oil companies, which is engaged in helping develop the petroleum resources of the Middle East, is of exceptional interest. It said: "We recognize that international trade relations involve political considerations of the highest order. Policies governing such considerations are, of course, the responsibility of our government acting in the interests of all its citizens.

"We do not expect, and have never sought greater protection for our foreign interests than is normally afforded by the United States Government to any private citizen engaged in overseas trade. We inform interested agencies of Government regarding any contemplated foreign agreement or activity of ours that could in any way affect the policies or interests of this country.

"When we do business in other countries we try to be good citizens there. We do not make foreign commitments if we cannot do that and still be in harmony with the foreign policy of the United States."

That is typical of free enterprise in oil and many other fields. American industry abroad fully realizes its tremendous responsibilities — and it works in complete cooperation with our government in advancing the interests of all.

What Competition Does.

One of the standard left-wing criticisms of the capitalist system is that it promotes monopoly, and permits the small operator to be ruthlessly squeezed out by the big.

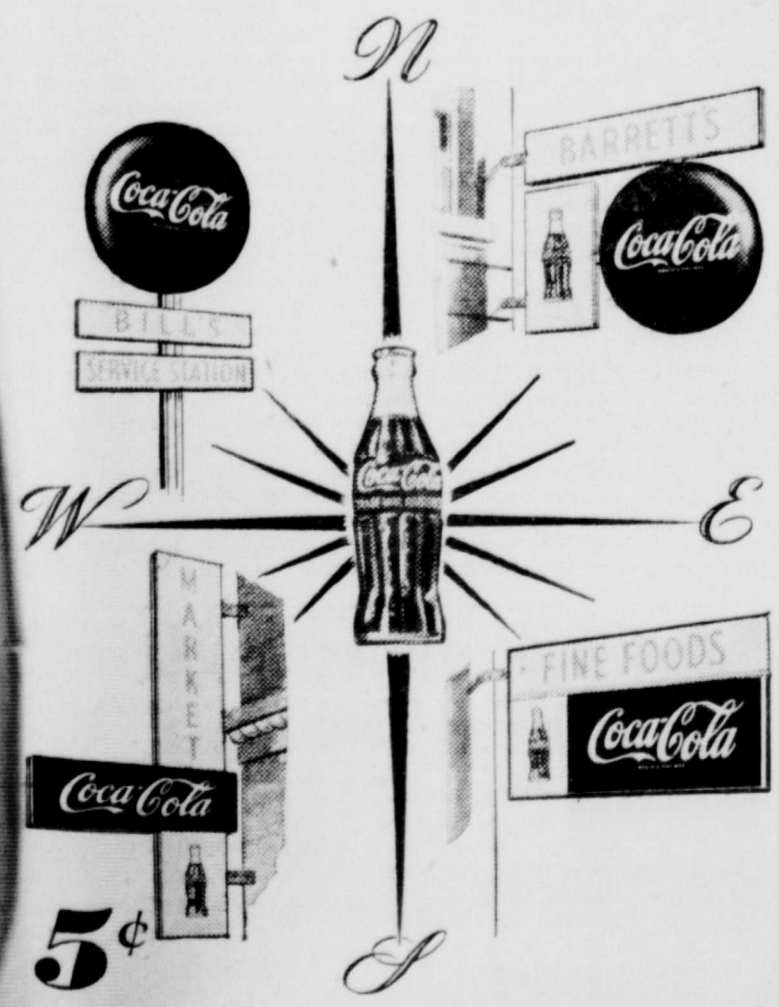

The only way that can gain credence is on Hitler's theory that a lie, often enough repeated, will seem to be the truth. For the whole tendency of American capitalism has been away from monopoly, toward more intense competition — and toward giving the small, ably managed enterprise a better chance to grow and prosper.

An interesting example of that, which is close to all consumers is the retail store. The nearest thing we had to a retail monopoly was the old-time country general store. Whether it was good, bad or indifferent, the customers could take it or lump it — competition was frequently non-existent.

Then the automobile made it possible for people to go considerable distances to do their shopping, and a change set in. Storekeepers had to meet both price and service competition if they were to keep their trade. The result was a constantly better deal for consumers — and good times for any kind of store which was on its toes. Every store had a competitor down the block or in the next town.

Now the consumer is offered an amazing choice when he shops — and the retailers' margins of profit on each transaction are at an extreme low. That is what competition does — and it is the underlying principle of the capitalist economic system.

Warm Springs Aid Given By WAA

War Assets Administration in Texas has been scraping the bottom of its war surplus barrels to find critically needed items for the National Foundation and the Warm Springs Foundation for Infantile Paralysis in the fight against the spread of polio, it was disclosed today by Col. Karl E. Wallace, WAA regional director at Grand Prairie.

Following a conference in the Rio Grande Valley with Warren T. Kingsbury, Southwest regional director, C. O. Bishop, Tyler, Texas representative, and John J. Laughlin, San Antonio, director of the National Infantile Paralysis Foundation, the WAA launched a region-wide search for interior pipe urgently needed to complete expansion of the crowded facilities of the Grandview Hospital, Edinburg. Although iron pipe is now one of the scarcest materials remaining in dwindling WAA inventories in the southwest, more than 800 feet of the desired type, together with a quantity of fittings, were located at a Houston installation and rushed to the project by motor freight. In Houston, meanwhile, the Hedgeroof Clinic, 4817 Montrose,

was seeking additional space for polio patients. The WAA surplus building which will nearly double the institution's bed capacity.

At the polio hospital near Gonzales, the Warm Springs Foundation reported a lack of two high pressure pumps. Again, WAA extended priority so as to provide the pumps from inventory being assembled for a competitive bid sale.

HIS I. Q. RATES HIGH

CHICAGO, (UP) — Anthony M. Adams, who didn't attend a day of high school, was awarded a bachelor's degree in mechanical

engineering by the Illinois Institute of Technology. Adam's high score on an air corps flight test convinced school officials to let him take the entrance examination. He ranked in the upper five per cent, taught himself several high school subjects and was graduated with a "B" average.

BOSTON NOT BACKWARD

BOSTON, (UP) — Metropolitan Boston leads all communities of 1,000,000 or more residents in proportion of homes equipped with the combined conveniences of electric lighting, radio, running water and modern plumbing, a survey by the U. S. Commerce Department shows.

FOR OR AGAINST.

BRUNSWICK, Ga. (AP) — Voters in Glynn County, Ga., apparently have found the way to take personalities out of politics. When the election comes up July 22nd, citizens will get ballots with no names. Rather they will be given two choices: "For the city court judge to stay in office" or "Against the city court judge staying in office."

SMOKE SCREEN FAILS.

PROVIDENCE, R. I. (AP) — A quahaug dredger used a naval battle tactic, a smoke screen, trying to elude a state fish and game patrol boat. When caught, the dredger was found to have been

equipped with smoke bombs. The vessel had zig-zagged behind the smoke screen for 45 minutes.

5 CENT OUTFIT WINS.

DUBLIN, Ga. (AP) — A complete ensemble which cost only five cents

to make won first prize in the local fashion show. Mrs. C. E. Fountain, of the Harmony home demonstration club, made the garments out of feed sacks. She intends to enter her creations in the state dress revue.

Not So Very Long Ago - - -
... most abstracters were wondering where the next order would come from. Then came the gradual rise in the price of petroleum products, release of more building materials, and increased inflation which swelled the price of lands out of all reason. These factors and others contributed greatly to the demand for title work. But thru good times and bad—for more than 25 years — we have never thought it wise to sacrifice quality for quantity. And that's our business platform today!
