FRIONA, PARMER COUNTY, TEXAS, FRIDAY, NOVEMBER 1, 1929.

\$1.50 PER YEAR

GOOD RAINS OF PAST WEEK OF GREAT HELP TO WHEAT: FARMERS ENCOURAGED

The nice, gentle shower which fell here Sunday afternoon and night seems to have met the approval of everybody in Friona and all directions surrounding.

The rain began falling shortly after noon in a very light sprinkle not much more than a mist, and continued all the remainder of the day and into the night, gradually gaining in amount until it reached a steady, gentle shower, allowing time for it all to be absorbed by the ground without beating it to a crust.

It is pronounced just the thing for the growing wheat and for that just planted—just the thing to bring it up and give it a start. It is estimated by all to have been about half an inch and seems to have covered the entire Friona territory with practically the same amount.

TELEPHONE LINEMEN HERE

A group of linemen with the State Telephone Company arrived here Wednesday for the purpose of connecting the lines of the old system with those of the new system recently purchased from Roy Bailey.

This work will be pushed rapidly as possible and the workmen hope soon to install all the phones called for on both the town and rural lines.

The work being done here has been held up for the past few weeks on account of the vast amount of work the company had on hand to do before the workmen could get here.

Friona's combined town and rural telephone system promises to be one of the best in the Plains country when fully completed.

CHAMBER OF COMMERCE NEXT THURSDAY NIGHT

At the last meeting of the Chamber of Commerce it was decided to change the regular meeting night from the first Monday night of each month to the first Thursday night, and according to this arrangement Thursday night of next week will be the next regular meeting night.

Considering the fact that there are now over 370 members, there should be at least 300 present, and such a sized gathering should be able to propose and to put over some very worth while measures for the general good of the entire territory in the way of roads, markets, crops and other public helps.

A few good musical and literary numbers are planned and a number of good talks are expected. Make it a point to be there if you can.

FRIONA YOUNG MAN AT C. M. T. C.

A communication from Lieut. Col. E. M. Offley to E. F. Lokey of Farwell, county chairman of the Citizen's Military Training Camp at Fort Logan, Colorado, states that Edward C. Spring was the Parmer county representative at that camp during the past summer.

Edward is one of Friona's most promising young men and we of Friona are proud of his good record at the camp.

STAR OFFICE BUILDING COMPLETED

J. W. Parr, who has been erecting a building to be used as the new home of the Friona Star, announces that the building will be completed by Saturday of this week.

This is a pretty fire-proof building, constructed of concrete blocks with brick and plate glass front and concrete floor, and is located on Fifth Street adjoining the west end of the Ford garage building. Just when the printing plant will be installed is not definitely known but is supposed to be in the very near future.

APPOINTS SANITARY OFFICER

At a meeting of the city council last week Dr. A. P. McElroy was appointed as city health officer with full power to act within sanitary code of the state.

The commission also levied a tax of \$3.00 each on every able bodied male citizen between the ages of 21 and 60 years for the purpose of creating a fund to be spent in repairing the streets of the city. The commission also levied a tax of fifty cents on each \$100 valuation of property within the city limits.

MAIN STREET PRIDE

By Dorothea Benger

The appearance of Main Street determines what kind of reports are carried to other localities about it. All citizens must recognize this truth. People naturally love to be near the attractive things of life—and it is equally true that they have a distaste for unsightly things. No one is tempted to stop in a place that is slipshod.

Friona is a good example of a town that has no Main Street pride. The streets are covered with trashy papers and decayed fruits. Yes, and there are even weeds growing along Main Street. In front of business houses, too! Weeds in Main Street—what a reproach to Friona! Friona would be one of the most attractive towns of its size on the Plains if it would give these matters attention.

There are many ways in which Friona could be improved with little or no expense. How long would it take for everyone to clean his part of the street? Ten minutes of each merchant's time, and Friona would start the day a clean town.

There are signs that could be repainted, or, if they are of no good, why not tear them down? It would take only a small amount of money to level sidewalks and to smooth the streets.

So why drag along with an untidy town when we can make Friona a clean and progressive one? Let us show some Main Street pride! Let people go away and say: "Friona is neat—we like her."

The above is the prize editorial from the civics class of Friona high school. It is concrete and timely.

AN ANNOYING CIRCUMSTANCE

Last Saturday afternoon Clyde Goodwine started in his truck to Bovina in search of a heifer that he had lost. Just before reaching Bovina one of the connecting rods in his engine broke and knocked a large hole in the side of the engine housing.

As soon as Clyde ascertained the extent of the damage he walked to Bovina and phoned a Friona garage for help and a car was taken to the disabled truck and tied to it and the truck was towed in to town, where the lost animal was found and loaded into the truck and was then towed by the car back to the Goodwine farm.

Mr. Goodwine says several other fine Jersey heifers are missing and has not been able to locate them.

BAPTIST W. M. U.

Program for November 4:
Subject, Money and Missions.
Leader, Mrs. Wedel.

Doxology.
Prayer, Mrs. Massie.
Scripture reading, II Cor. 9:1-5.
Mrs. Wimberly.

Talk, Fundamental Truths, Mrs. Wimberly.

Talk, My Possessions, Are They Mine or God's? Mrs. Katherine Parr.

Talk, The Separated Portion in Financing the Kingdom, Mrs. G. W. Baker.

Talk, The Law and the Tithe, Mrs. Meade.

Talk, The Law and Love, Mrs. Short.
Hymn, Have Thine Own Way, Lord.

This meeting will be held at the home of Mrs. Short. A good attendance is desired. Do not forget to read our advertisement on another page.

REPORTER.

TO BUILD HOUSE IN FARWELL

E. R. Furlong has the contract for building a dwelling in Farwell for J. W. Magness, county assessor. Mr. Furlong had building contracts at Friona, but as they were to be done at the same time as the Farwell building, he released them. He will be assisted by L. G. Simpson, also of Friona, who will do the plumbing. Mr. Magness will also have a big granary built on his premises at Farwell.

RETURNS TO FORT WORTH

Mrs. Elsie Hovencamp, who has been here the past five weeks visiting her parents, Dr. and Mrs. McElroy, returned to her home near Fort Worth this week. Mrs. Hovencamp was well pleased with the Plains country and Friona and fully enjoyed her visit here.

SALES DAY COMMITTEE IS ACTIVE

Monday afternoon members of the sales day committee of the Chamber of Commerce met and discussed at some length several plans for the continuance of the Friona sales day program.

This committee was appointed following the membership drive of the Chamber of Commerce a few weeks ago and seems to have taken the place of the former sales day committee, which had served so long and faithfully that its duties seemed to be becoming irksome.

The new committee proposes to continue the program in much the same manner as the old has done, with a few minor changes to begin with, which will probably be broadened and varied from month to month. A new lot of sales tickets were ordered which will arrive within a week or ten days and be distributed among the various business concerns of the city to be given away with each one dollar cash purchase.

Then on a set day to be named later a number of articles will be given to holders of these tickets. The grand prize, however, instead of being a cash sum, will be a registered male pig of high merit, of what breed the donor may choose. This pig will be given with the understanding that should the one receiving not care for it the Chamber of Commerce shall have the refusal of it at the original price paid for it.

It was also planned that the merchants shall be consulted as to making a special price of various articles of merchandise on that day so that each one who attends the sales day may be able to receive some special benefit from it. The committee also plans to have some entertainment in the form of stunts of various kinds.

SCHOOL TRUCK TURNS OVER

Monday morning while Arthur Baker who drives one of the big school trucks, was on his way to school with a load of pupils, the truck was upset. The accident occurred while crossing a stretch of bad road and where the road was slippery from the rain which fell Sunday afternoon and night.

None of those in the truck were able to tell just how it happened, but it appears that the hind wheels of the truck slid into some ruts and in cutting the front wheels in order to climb out of the ruts the buss was turned over on its side.

Fortunately no one was hurt and but little damage done to the truck, so Mr. Reeve was able to have all in shape and roadworthy by the time school was dismissed in the evening, and it was able to take his load of pupils to their homes again.

COTTON CROP IN COUNTY IS EXTRA GOOD

A drive out through Homeland and thence west toward Bovina, then southeast and back again by way of Homeland was sufficient to convince the writer that some mighty good cotton has been produced and is now being gathered in that locality. It appears that the cotton has opened earlier and more evenly than in any other previous season. The opening bolls are showing a gleam of white all over the fields and it is reported as producing from a third to half bale per acre.

It also appears from viewing the fields that the picking season has barely begun, notwithstanding the fact that truck loads and wagon loads have been steadily coming into town to be ginned.

Many large fields of wheat in that section are up and look promising and some of them are covered with green, rich growth, while other fields the wheat is making its appearance above ground, while in still others the drills are still at work planting the crop.

There are many fields of ripe corn and other row crops that were yielding a profitable harvest. In many fields wheat had been planted between the rows of cotton or corn and showed beautifully green between the rows.

Taking all appearances into consideration there was nothing to be seen in that locality that would indicate hard times for those farmers.

CITY HEALTH BETTERED BY NEW ORDER

The city commission met last week and passed an ordinance for the installation of a system of sanitary toilets to take the place of the present unsanitary open toilets in use throughout the city.

This system, when installed, will do much to remove the present unsanitary conditions of the city and will go a long way toward eliminating the common fly nuisance and will reduce to a minimum the danger of the spreading of pestilential diseases.

These toilets will automatically pay for themselves with a small rental fee, which will be less and much more satisfactory than the price and services of a scavenger.

MORE NEW HOUSES NOW IN EVIDENCE

O. G. Turner stated in the presence of a Star representative recently that he had purchased a half block on the east side of town and will at once begin the erection of a number of dwelling houses of five or six rooms each, one of which, it is reported, is already under construction.

These houses, according to Mr. Turner, will be either for rent or sale, should any one wish to buy. E. B. McLellan states that he has purchased the other half of the same block and will build at least two houses thereon within the near future.

FORMER FRIONA COUPLE CELEBRATE GOLDEN WEDDING

According to an article in the Lawler, Iowa, Dispatch received by the Star as a favor of Mrs. George Treider, living several miles south of Friona, two former Friona citizens, Mr. and Mrs. John Treider, now of Lawler, celebrated their golden wedding anniversary Sunday, October 13.

According to the account, the celebration was held at the home of their son-in-law, John Natwig, and that there were married on October 14, 1879, and lived at Cresso for a year, five years in North Dakota, sixteen years in Friona Texas, and the remainder of the half century in a town in Utica township, in Chickashaw county, Iowa.

The members of their family are Mrs. C. O. Natwig, Utica; Mrs. John Natwig, Howard county; Otto and George, Friona, Texas, and Christian of Utica township. They have fifteen grandchildren and four great grand children.

A banquet was served at noon and repeated in the evening. The beautiful and excellent viands were furnished by the lady guests who certainly are to be complimented.

In the afternoon the wedding ceremony was performed by the Rev. Tjernagal, of Saude and Jerico Lutheran churches. He gave an eloquent lecture and presented the venerable couple with a gift of coin as a souvenir of the occasion.

These two splendid elderly people are well known by all the older residents of Friona and surrounding territory, they having been among the first of the real settlers of this locality, and their splendid and upright character as neighbors and citizens have endeared them to all these old settlers, who join in wishing them many more happy and prosperous years of their happy wedded life.

Mr. and Mrs. Carl Pierce have moved to Friona from Oklahoma City. Mrs. Pierce is a sister of Mrs. Frank Sylvester. We are delighted to have this charming young couple in our midst.

FRIONA BAPTIST CHURCH BEGINS ERECTION OF NEW BUILDING IN THIS CITY

NAVY DAY

It is perhaps true that last Sunday, October 27, was celebrated throughout the United States as Navy Day, this particular day being selected on account of it being the birthday of Theodore Roosevelt, who is known as the Patron Saint of the American Navy.

The day was set apart for the purpose of bringing before the American people the owners of the navy, a better realization of what the navy is, what it does and its activities in the preservation of peace. Naval ships were sent to every port on the coast line to participate in exercises betting the day, and on that day were on dress parade, and asked its stockholders—the American people—to come aboard and see how it works and how it plays.

To the people of Friona and all others living far inland, it is hard to get a mental picture of these stately battleships, cruisers and destroyers, the grayhounds of the sea, lying at anchor or moored in long columns with all flags flying and in full dress.

We are unfortunate in the fact that we were unable to see these wonderful sights, but we cannot be lacking in our appreciation of the part the navy plays in our national life, since our navy is primarily concerned with the defense of our nation by protecting our wonderful extent of exposed coast line from attack or invasion by foreign powers or warlike enemies. It also protects our shipping on the high seas and affords many other means of service to the people of the entire country.

This year's Navy Day message was: "There is need of centering the attention of our citizens on our great foreign commerce, its carriage and its protection."

HEALTH HINTS

(State Department of Health)
Knowing how important is the role of food, I want to know what food stands for what and the meaning of calories.

You should have complete and authoritative information from a nutritionist who knows individual needs. There are books which tell how to feed the family from babies to normal adults. Milk is rich in phosphorus and calcium; eggs contain phosphorus, calcium and iron; lamb chops contain phosphorus and iron, and the vegetables contain varying amounts of the various salts. The liberal use of fruits, vegetables, whole grain and milk insures the necessary vitamins. A calory is the unit of measure which represents the fuel value of the foods to the body.

Diphtheria Prevention.
Unless your children are protected against diphtheria by toxin anti-toxin, this disease may appear in your home at any time without warning. Diphtheria always strikes terror to the parents' heart, causes needless worry, expense and sometime desolate homes. The treatment is simple, safe and sure. The method: three injections of toxin anti-toxin given one week apart.

The time: As soon after reaching six months as possible.

The place: At your home or office of your family physician. But do not delay or you may be a prey to further regrets.

JUNIOR B. Y. F. U. PARTY

Members of the Junior B. Y. F. U. were entertained at a party given by Mrs. L. R. Dilger at her home last Friday evening, when the house was very beautifully decorated in Halloween colors. Many different games were played.

At ten o'clock refreshments were served, carrying out the Halloween colors, and at ten-thirty the members returned to their homes, declaring Mrs. Dilger a real hostess.

GUESTS AT LIVINGS HOME

Rev. and Mrs. W. B. Gilliam and children of Bovina, Mr. and Mrs. O. G. Turner and children, Mr. and Mrs. Will Osborn and children, and Mr. and Mrs. George C. Messenger and children were the guests of Mr. and Mrs. G. L. Livines and family Sunday.

Rev. Mr. Gilliam is pastor of the Methodist church at Bovina. It will be remembered that he preached here two years in connection with Bovina, giving half half his time to each charge.

Contract for building the new Baptist church building here was let last week to J. O. Jones of Clovis, who began the work early this week.

The basement of the building was completed about two years ago, and was roofed and has been in use as a meeting house since. This roof will be removed and the beautiful new structure erected upon the present foundations.

Plans and specifications, it is said, show that this will perhaps be the most beautiful house of worship in town. Members of the congregation have been patient and persevering in their efforts to secure their new house of worship and it is with a feeling of satisfaction and deep gratitude that they are now able to push their work to completion.

MORE ABOUT ROADS

The Star is in receipt of a communication from some one who signs the name "Subscriber," and the theme of the communication seems to have been prompted by reading the letter from Leo Potishman in last week's Star.

The letter was mailed at Lazzbuddle, but its contents do not indicate that it was written by a citizen of that community, owing to the fact of his intimate acquaintance with the conditions of the road just south of Friona as well as that of Main Street.

The author, however, seems sincere in his or her attitude and there is no doubting or denying the correctness of statements made and we would be pleased to quote them in the Star, but for the fact that it is not considered good policy to quote any writer who hesitates to sign his own name to his writings.

He agrees with Mr. Potishman that we need more good roads, but feels it our first duty to place the ones we already have in first class condition, including Main Street and that part of Seventh Street leading east to the gin. He says they do not know who to ask for help in this road improvement, since the county commissioner has been asked and no help has been received.

The communication has been read by several citizens of Friona and a few of them have given the Star a written statement of their view of the road proposition, as they see it, some of which are here given:

"The communication above referred to brings out some very pertinent points to be considered. No one is satisfied with the condition of our streets. Getting our streets in good condition should have the most serious consideration. Let's get busy."—Dr. A. P. McElroy.

"I am glad to see agitation for better road conditions. The subscriber above referred to surely is right in his idea of the needs of the roads south of Friona. There are also some roads in other directions from Friona that are not even opened. It seems to me that all good friends of our community should boost for a better roads program. It is a sure thing that school transportation would be helped."—Floyd Reeve.

OKLAHOMA MEN HERE

Messrs. Hancock of Anadarko, Oklahoma, and Henry, of Kiowa, Oklahoma, arrived in Friona Monday morning, having come out to view the country with a view of buying land.

While in town they called for a few minutes at the Star office, apparently seeking information as to this locality. They appeared, however, to take any "boosting" information with some degree of suspicion, but the Star man could never look himself in the face again if he gave out any other kind of information concerning the Friona country.

NEW THEATRE HAS FIRST SHOW

The new theatre on Main Street which is under management of H. P. Eberling, was ushered into service on Friday and Saturday nights of last week when a traveling troupe of musicians and jugglers and comedians came into town.

This was the first show of any kind to be held in this splendid new building and was greeted by a well filled house of appreciative spectators each night of the performance.

H. A. T. E.

BY ARTHUR D. HOWDEN SMITH
Copyright, 1928, Arthur D. Howden Smith WNU Service

CHAPTER VII—Continued

"A fair story," Fellowes applauded. "And where were you, muggin'?" She regarded him gravely. "My duenna was quite ill of the sea-sickness, and called me from the cabin."

Fellowes remembered the duenna's face at the cabin port as he left the True Bounty, and his impression of her education in English. He wheeled upon the stolid creature. "Is it true?" he snapped. "She eyed him with imponderable calm, gabbling a phrase in Portuguese."

"She has no English," said Miss Inglepin. "You must know that." "I am not so sure," returned Fellowes. "There is a deal of misinformation abroad in this room." Ben Inglepin seemed to think the time had come to assert himself. "You are entitled to a sense of justice, Captain Fellowes," he said courteously; "and I hold myself to blame that you should have been pressed from my ship. But indeed, sir, you'll not find us backward in making amends, and I assure you the whole sorry affair was founded upon misunderstanding." Captain Collshawe confessed himself in the wrong tonight in this very room.

Fellowes stared at him with a contempt that set twitching the wattles under the merchant's chin. "Frankly, sir, I do not believe you."

"Tush, Captain Fellowes, as one gentleman to another—" "What has gentility to do with it, sir? I am an American—who has been wronged. And I have yet to ask you to explain Captain Collshawe's presence here. This poor old man—" he nodded to Cuffee's burden—"gave his life to thwart the treason you plotted."

Inglepin changed color. "Treason! 'Tis a strong word." Chater exclaimed angrily: "No man can't say that 'bout me! I'm as good as ye by any day, Fellowes."

"Doubtless you'll have no difficulty in so convincing the Federal authorities," Fellowes observed. "It can be explained, sir," Inglepin protested eagerly. "The thoughtless deed of a rash young man."

"Acting upon his admiral's instructions," "No, no! A personal matter," Mr. Inglepin became ruddier, a thought short of wind. "Most unfortunate, most unfortunate! My daughter—you see, the fact is—"

He glanced toward her appealingly, and she made a little gesture of resignation. "He came to see me, Mr. Fellowes."

"I question it not, ma'am." She hesitated, blushing rosy-red, and Chater interjected: "Collshawe's daft over her."

"A lover's tryst," sneered Fellowes. "That's the tale, now!" "Need we dispute over it, sir?" she asked with dignity. "We seem all to forget that death is present with us, and deserves somewhat of respect."

"Even a dead American, who was sacrificed for a nest of traitors?" he queried sarcastically, turning to assist Cuffee.

"Does it matter for what a man dies, if it be only what he believes—Oh!" Her voice shrilled in a scream. "Your back! Your back!"

One hand flew to her mouth as if to contain the sobs that rattled in her throat; the other was extended shakily toward Fellowes, who, in turning, had exposed his striped back and flanks to the glare of the candles in the wall-sockets. The agony in her face was unmistakable.

"Oh, Father!" she wailed. "How dreadful! That was what he meant—when he spoke of punishment!" Fellowes frowned her again, stirred, despite himself, by the genuineness of her emotion, provoked that he should be.

"'Twas only a hundred lashes," he said. "Is it so much worse than you looked for?" She shuddered.

"How you must hate me!" There was no trace of belligerence in her manner. "I am proud, too. A hundred lashes! I should hate—But words are cheap, sir."

"They have their price," Fellowes agreed coldly. "'Tis lamentable a lesser injustice should breed a greater, but those who deal in injustice may not complain if their victims rebel against the larger portion."

"Nonsense, Captain Fellowes!" Inglepin abandoned his daughter to the capable attentions of the duenna. "We must remove this girl to her bedroom."

"Not for the present, sir. None of you leaves this room without being searched—or until after the house has been searched."

"Mighty high-handed, ain't ye?" whined Chater. And Inglepin slammed a plump fist into a plump palm.

"By Heaven, young man, you go too far! I may be a Federalist in a state governed by Democratic banditry, but you'll learn I'm not without either friends or influence. Search, and be d—d to you!"

"Ye'll find nothin'," jeered Chater. Footsteps sounded in the hall, and Tom leaped Cuffee's musket against the parlor wall, hefting his ax expertly.

"Strange craft in the offin', mess mate," he reported. "Boarders in the companionway." He pecked around the lintel. "Sink me, if 'tain't that milshy cap'n."

Chater bared yellow fangs to greet Nimrod Sopher, who stalked in the dragon's skin in hand, a slightly sheepish air of bravado on his long face.

"Well, now, Sopher, this is real neighborly of ye, overrunning my farm with yer Fenchie! I s'pose ye're fixin' to rid me of Squire Fellowes 'n' all this crazyfoot talk o' his'n'?" Sopher was taken aback.

"I wouldn't go so far as to say that," he denied. "You know, you are subject to suspicion, Chater—oh, not in any atrocious or, let us say, invective sense—No, no, nothing libelous! Merely, that you have—ah—whether of your own volition or not, been in communication with the enemy."

"How can I help it if some young scoundrel of a Britisher wants to come ashore to see a gal?" demanded Chater.

Fellowes found the form and tone of the question as unpleasant as did Inglepin.

"That will do," he ordered sharply. "Are your men outside, Nimrod?" "Most of them, I—ah—thought best to rally them after—we—ah—parted company."

"If they hadn't had to—rally—we should have taken Collshawe, and poor old Peirt wouldn't have died by himself."

"Oh, quite a rash statement, my dear fellow, quite a rash statement," objected the lawyer-militiaman. "I'm certain you couldn't prove it. And green troops always require blooding, you know. 'Tis the rule. And as for Peirt—a worthy fellow, very—splendid soldier—a veteran, to be sure, forever talking of battles. But fortunately a widower—and no children. I confess I shouldn't know where to turn if we'd lost a man with a family. I must have left the village. Actually, I assure you!"

A sneeze from Miss Inglepin—under whose nose the duenna was turning feathers—attracted Sopher's attention to the coach. "I trust the lady is uninjured?" he asked, with a suspicious glance at Fellowes' companions.

"She fainted. An excess of—shall we say contrition, Mr. Inglepin?" "An excess of abominable misusage," flared her father. "What woman wouldn't faint after such a night? A pitched battle outside her windows—a mangled body before her eyes—mangled men forcing themselves into her presence!"

"You overlook a period of captivity in the hands of her country's enemies," remarked Fellowes. "And I must add still another to your list of outrages. 'Twill be necessary to search her, as I have said."

"You'd miss no chance to humiliate her," returned Inglepin. "'Tis to be expected, sir."

(TO BE CONTINUED)

Wig of Gold
Recent excavations in Ur of the Chaldees have resulted in many finds richer than any which have been heretofore uncovered. Many beautiful specimens in gold have been taken from tombs which were built centuries before the Christian era. It has long been known that the kings of that time in that part of the country shaved their heads and wore wigs and false beards, and among the treasures referred to is a wig of gold. It is a beautiful piece of metal work made to fit the head and the exterior engraved with minute care. The hair is beautifully tooled, as is also the band about the forehead. Ears of gold show between the locks worked in repoussé and pierced with a hole.

Finer Than a Hair
To study wind velocity and direction the United States Department of Commerce has its own tunnel of winds where various tests are conducted. One of the latest is that of measuring wind velocity by means of an electrical wind wheel and a five-tube amplifier. The wire is about one-fifth of a human hair in diameter. The experiment was designed to reproduce the condition of flow around airplanes which move in ripples and waves. Quantitative methods of measuring the amount of these disturbances are now made available for the first time.

NO LIMIT ON FUR TRIMMINGS; HATS TAKE ON NEW INTEREST

ELABORATELY FURRED CLOTH COAT

FASHION places no limit on the amount of fur one may have on the cloth coat—It is simply a matter of expenditure. Furthermore there is no reason to expect to see one fur play a more important role than another. So far as fur trimmings are concerned an all-star cast is performing.

It is impossible to overdraw the picture of this season's fur trimmed cloth coats. In them the extreme of luxury and display is attained. This applies not only to fabric and fur, but the manner of styling has arrived at a point of accomplishment which makes even the most sophisticated style connoisseurs "sit up and take notice."

It is evident from the mode in the picture that not even a most extravagant use of adjectives and phrases can do justice to that which we are seeing and which we will be seeing to an increasing degree in coat fashions this season.

Among the legions of furs which are in immediate favor, beaver registers as one of outstanding vogue. Like all furs which enter into the scheme of this, it is handled in a very designful way, a point aptly demonstrated in the picture. Not only has the luxurious collar on this coat genius into giving full play to imagination, but the generously wide fur border also places emphasis on artful design. To this matter of hem lines furred in a novel and conspicuous way, fashion gives much attention.

As if to flaunt the fact of their brevity ever so many of the very new shorter coats outline their hemlines with massive fur borderings, these borderings featuring diverse and erratic manipulation.

A point which attracts in regard to fur collars is their immensity, also the fact that they follow no particular silhouette indulging in freedom of "lines" which acknowledges no arbitrary rules.

As to sleeve treatments where fur is concerned all one might say of them would be merely touch upon the subject. The eccentricities of cuffs and below-the-elbow effects has brought

in the conjuring of modish millinery, the employment of lace and of fur unfolds an endless vista of possibilities to the designer. From hat to coat, frock and ensemble the idea of enlivening black with touches of white fur wins appeal. To wear with a dressy black velvet a broadcloth or perhaps suede-finished cloth coat or jacket suit where white fur appears at neck and wrists modistes are creating hats of the type of the little emerald-trimmed hat pictured below at the top of the group to the left.

The two other fur-touched models in the illustration employ black broadcloth for the toque in the lower left corner, and leopard skin for the scarf-and-hat set shown next to it. In the instance of the black broadcloth snugg hat with its bow and flat cuff of broadcloth again is seen the tendency to match the hat to the costume. This ensemble theme is resulting in all sorts of fabrics entering into the list of hat media, such as broadcloth, tweed and novelty woolsens. In fact any material used for the dress or suit is apt to be duplicated in its accompanying hat. It follows also, what with the observance of complementing the costume with a matching hat that women who keep pace with the mode, will find it necessary to buy many more hats than they have in some other seasons.

Three of the sketches herewith demonstrated that lace is being as effectively worked by milliners as fur. Lace treatments may be said to be approached from two different angles,

SOME OF THE NEW HATS

into the coat situation so much of novelty that the field of design in this particular respect is presenting a continuous program of style-revealing events.

There is no doubt about it, hats are far more interesting than they have been for many and many a season. In fact all indications point to a revival of the real art of millinery. One feebly viewing the autumn and winter displays, that hats are no longer just hats, rather are they "creations" which tell of an era in head wear where the touch of the "milliner's hand" becomes absolutely imperative in the scheme of things.

one is the use of insets as shown in the brimmed hat centered at the top of the picture, also in the sketch to the right; the other is the adding of an ornamental veil, such as gives such a piquant air to the concluding model in the group.

When motifs of etched lace are inset into felt shapes, which they so frequently are, emphasis is placed on their being a perfect color match. These matched lace effects are developing into one of the most fascinating themes offered in millinery fashions this season.

TESTED GOOD THINGS

For those who enjoy poppy seed in cakes and fillings, an easy way to use it is to stir a half-cupful or less into any cake; it is especially effective in a white cake.

Brown Sugar Cake.—Take one-third of a cupful of melted fat, one and one-third cupfuls of brown sugar, two well-beaten eggs, one-half cupful of sour milk, one-half pound of chopped dates or one-half cupful of raisins, one and three-fourths cupfuls of pastry flour, three teaspoonfuls of baking powder, one-fourth teaspoonful of soda, one-half teaspoonful of cinnamon and one-half teaspoonful of nutmeg. Put all the ingredients into a bowl and beat hard for three minutes. Bake in two layers or in a loaf. Frost with confectioner's sugar, melted butter and flavor with coffee.

Fruit and Ginger Ale Salad.—Soak two tablespoonfuls of gelatin in two tablespoonfuls of cold water and dissolve in one-third of a cupful of boiling water. Add one cupful of ginger ale, one-fourth cupful of lemon juice, two tablespoonfuls of sugar, and a pinch of salt. When the mixture begins to set fold in one-third of a cupful of malaga grapes skinned, halved and seeded, one-third of a cupful of celery, one-third of a cupful of cubed apple, two tablespoonfuls of crystallized ginger cut into small pieces, and four tablespoonfuls of pineapple. Mold and serve with cream dressing.

Corn Sticks.—Mix and sift one cupful of flour, one-half cupful of corn meal, two teaspoonfuls of baking powder, one tablespoonful each of sugar and fat, one-fourth teaspoonful of soda, one-half teaspoonful of salt, three-fourths of a cupful of scur milk and one beaten egg. Add the melted fat last and pour into bread pans to bake. Bake until crisp.

Before the frost destroys the delectable mushrooms which may be gathered so abundantly in most fields, woods or pastures, try such good things as this:

Concordia Croquettes.—Peel and chop one-half pound of field mushrooms, stew five minutes in two tablespoonfuls of butter and one-half teaspoonful of salt—add a little cream if needed. Add two hard-cooked eggs (chopped), one cupful of thick white sauce. Spread on a plate to cool, then shape and fry in deep fat. Serve with a green salad. If there seems too much moisture in the mushrooms, pour it off and use as a flavoring for soup.

Cocktails.

We enjoy the fruit cocktail at any season, but as the cooler weather comes on, the heavier cocktails will come into use more freely.

Oyster Cocktail.—Clean and chill 16 small oysters; mix with three teaspoonfuls of horseradish, one teaspoonful of tabasco sauce, two tablespoonfuls of vinegar, five tablespoonfuls of tomato juice, three tablespoonfuls of Worcester's sauce, three tablespoonfuls of catsup and one and one-fourth teaspoonful of salt. Serve in glasses or lemon cups.

Sardine Cocktail.—Serve sardines cut into small pieces in a lemon cup set in ice with the above or any approved sauce.

Cream Cocktail.—For every cocktail required take a teaspoonful of lemon juice, one teaspoonful of vinegar, a quarter teaspoonful of walnut sauce, one-half teaspoonful of mushroom catsup, a dash of tabasco, and a pinch of salt. Pour this mixture over eight little-neck clams and serve in a well-chilled glass. This cocktail finds favor for suppers or luncheons.

Grapefruit With Bar-le-Duc Currants.—Cut a chilled grapefruit into halves, remove the seeds and membrane, cut round the edges and cut out the center, then lift out all the membrane leaving the pulp in place. Fill the center with a spoonful of Bar-le-Duc currants or Maraschino cherries and serve without sugar.

Pineapple, Orange and Lemon Cocktail.—Take a tablespoonful each of orange pulp, carefully broken with the membrane removed and cut tender pineapple. Pour over the fruit a sirup made with lemon juice and sugar boiled to a sirup and cooled before adding. Serve with a sprig of mint in the top of the glass.

Melon Cocktail.—Take balls of honey melon scooped out with a french potato cutter into small balls. One may have a few of the ordinary melon with the honey melon for contrast of color, or use the heart of a water-melon. Cover with any desired fruit juice, such as pineapple juice, lemon or orange. A bit of ginger with the sirup is liked by many and is especially good with musk melon.

When Food Sours

Lots of folks who think they have "indigestion" have only an acid condition which could be corrected in five or ten minutes. An effective anti-acid like Phillips Milk of Magnesia soon restores digestion to normal. Phillips does away with all that sourness and gas right after meals. It prevents the distress so apt to occur two hours after eating. What a pleasant preparation to take! And how good it is for the system! Unlike a burning dose of soda—which is but temporary relief at best—Phillips Milk of Magnesia neutralizes many times its volume in acid. Next time a hearty meal, or too rich a diet has brought on the least discomfort, try—

PHILLIPS Milk of Magnesia

Mexico Growing Tea
The common oriental tea of trade is now produced in small but commercial quantities in Mexico, according to the Mexican ministry of industry, commerce of labor, which has some samples of this possibly new agricultural product at Mexico City. This Mexican tea, which is of good quality, is being produced by a private planter who has been experimenting near Culcatlan, Oaxaca, for some years. The fact that Mexico can produce this tea may become of great significance for heretofore all tea-drinking countries have been dependent upon the Orient with its monopoly prices.

Kill Rats Without Poison

A New Extremator that Won't Kill Livestock, Poultry, Dogs, Cats, or even Baby Chicks
K-R-O can be used about the home, barn or poultry yard with absolute safety as it contains no deadly poison. K-R-O is made of Squill, as recommended by U. S. Dept. of Agriculture, under the Connable process which insures maximum strength. Two cans killed 578 rats at Arkansas State Farm. Hundreds of other testimonials. Sold on a Money-Back Guarantee. Insist upon K-R-O, the original Squill exterminator. All druggists, 75c. Large size (four times as much) \$2.00. Direct if dealer cannot supply you. K-R-O Co., Springfield, O.

K-R-O KILLS-RATS-ONLY

Coxey Good-Roads Advocate

When Coxey led his army of the unemployed to Washington, he was worth \$1,000,000 or more. He was particularly interested in good roads, and the "army" had its inception in his belief that the roads should be improved throughout the country as a means of furnishing work for the unemployed. He has lived to see a marvellous change in the highways of the United States.

Be careful. Use Red Cross Liquid Blue. Highly concentrated. Your grocer sells it.—Adv.

Course Was a Loss

To get money for a correspondence course in detective work two lads went out robbing o' nights in St. Louis and were arrested by detectives who had had no advantages in correspondence courses.—St. Louis Globe-Democrat.

HAD TO WORK TOO HARD

Lydia E. Pinkham's Vegetable Compound Gave Her Strength

Mt. Carmel, Pa.—"After my second baby was born I had to work too hard and be on my feet too soon because my husband was ill. After his death I was in such a weakened and run-down condition that nothing seemed to help me. I am starting the fourth bottle of Lydia E. Pinkham's Vegetable Compound and feel a great deal better. I am much stronger and don't get so tired out when I wash or work hard. I do housekeeping and dressmaking and I highly recommend the Vegetable Compound as a tonic. I am willing to answer any letters I receive asking about it."—Mrs. Gertrude Burns, 414 S. Market, Mt. Carmel, Pa.

Felix Doubts the Tonic's Qualities

TIGER'S TALK

"No creature is any wilder than I am," said the Tiger.

"You're not the only fish in the sea," said the Rhinoceros, in the zoo, nearby.

"Have you gone mad, quite completely, utterly mad?" asked the Tiger.

"I'm not a fish, I never was a fish, and I never will be a fish.

"I wouldn't live in the water when I can live in the forests.

"I wouldn't be so foolish and watery-eyed and slippery. Ah no, I wouldn't be anything but a tiger, a wild and wonderful animal with great piercing eyes and a deep roar and a beautiful skin.

"And, too," the Tiger continued, "I don't see why you talk about the sea. I'm not interested in the ocean. I don't care to go in it. I wouldn't be the only fish in the sea for anything.

"Of course I'm not the only fish in the sea, nor would I want to be.

"What in the world, or the zoo, do you mean, Rhinoceros?"

"Only a saying," said the Rhinoceros. "There is an expression that runs like this—"

But the Tiger had interrupted.

"An expression runs? How can an expression run? You are talking very foolishly."

"You are very particular," said the Rhinoceros. "I suppose I should have said that the saying or expression went like this.

"Well, it means that people and animals shouldn't be conceited.

"They shouldn't think they're the only creatures of importance in the world—and so the saying started about not being the only fish in the sea.

"There are always plenty of fish in the sea, there are plenty who can do all sorts of things.

"No one creature should feel above every one else.

"So you mustn't say you're the wild-

"I Will Growl Now for Awhile."

est one. I'm pretty wild myself.

"I don't want you to boast, as may be I'd like to boast myself."

"So that is it," said the Tiger.

"Besides you're really in my class in a way—you're not above it.

"I've heard people say that the rhinoceros and the tiger were the two most dangerous animals—so you see we have been put together."

"Very well," said the Tiger, "but I have been talking enough.

"I will growl now for awhile and look my wildest. Then the visitors will come and look at me and feel how wild I am.

"They may say and know you're dangerous, too, but there is something about my looks to make people believe how very, very, very wild I am.

"Yes, I will now get an audience to admire my wildness."

And the Tiger succeeded!

Game of Captain Kidd

All the players stand in a ring, except one, and he is Captain Kidd.

Now Captain Kidd must go through various exercises, kick his right foot, his left foot, jump, hop, yell, do anything he likes, and he must say before he does each thing: "Do this," or "Do that."

For instance, he may swing his arms round and say, "Do this," then all the players in the circle must follow his lead. Then he will do something else and say, "Do that." But this time the players do not follow his lead. You see, they only copy him when he says, "Do this." When he says, "Do that," they merely stand still. This is where the fun of the game comes in, for some of the players are sure to stand still when they ought to move and others will move when they ought to stand still. And whenever a player does the wrong thing he stands out of the circle. So the game goes on until there is only one player left, then he takes the place of Captain Kidd. The players all form a new circle and the game begins all over again.

What They Would Be

The teacher had been drilling the class of beginners on the pronunciation of words. She wrote the word "man" on the blackboard.

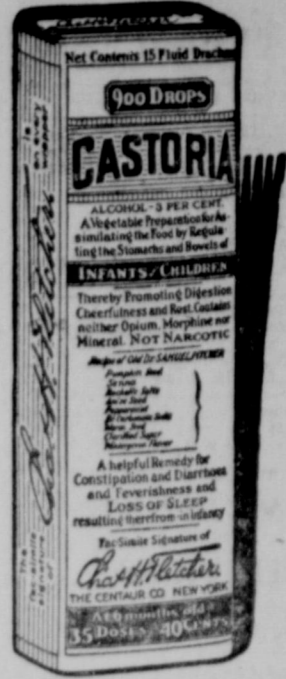

"Now," she asked, "what is this word?"

The little fellows made no reply.

"Well, what will you little boys be when you are grown up?" (Expecting them to say men.)

At last one little boy responded, "Daddies."

When BABIES are upset

Baby ills and ailments seem twice as serious at night. A sudden cry may mean colic. Or a sudden attack of diarrhea—a condition it is always important to check quickly. How would you meet this emergency—tonight? Have you a bottle of Castoria ready? There is nothing that can take the place of this harmless but effective remedy for children; nothing that acts quite the same, or has quite the same comforting effect on them.

For the protection of your wee one—for your own peace of mind—keep this old, reliable prepara-

tion always on hand. But don't keep it just for emergencies; let it be an everyday aid. Its gentle influence will ease and soothe the infant who cannot sleep. Its mild regulation will help an older child whose tongue is coated because of sluggish bowels. All druggists have Castoria; the genuine bears Chas. H. Fletcher's signature on the wrapper.

Finds Gold in City

J. A. Page is not a miner by occupation, but he has been reaping good returns for spare hours on Sundays. Panning for gold in Chico creek, within the city limits of Chico, Calif., Page has obtained three nuggets and a quantity of gold dust. The gold bearing sand is washed down from the mountains by high water, Page says.

Fastidious Burglar

Winchester, Va., has a burglar who insists on having only new money. Some of the smaller paper currency and several old notes were displayed in a jeweler's window. The robber of discriminating taste heaved a padded brick through the window and helped himself to the new, leaving the old and also some attractive silverware.

When a White Collar Man "Goes Army"

Perhaps he doesn't learn a few things!

DON'T envy a man who "only has to work a typewriter." So we were told by Mr. Solon S. Bloom of 3503 Woodbrook Avenue, Baltimore, Md., whose health began to give way because his work gave him no bodily exercise.

"I decided to get away to a military training camp," says Mr. Bloom, "thinking the rough and tumble with the army would do me good for a month. I asked the doctor what to do about my condition. 'I've seen men, I've known men,' he said. 'I know what they eat, drink, and how they live. I know cathartics, physics, and all the ways men try to keep themselves regular—and the only two that go together well are men and Nujol. Nujol soothes and heals the membranes and expels bodily poisons normally, naturally, easily, so that you are regular as clock-work.'"

That was what Mr. Bloom learned when he left his typewriter and went

into the army. If you are like most other people, you too will find that Nujol will make all the difference in the world in the way you feel.

Remember Nujol is not a medicine, for it contains no drugs of any kind. It is simply bodily lubrication that everybody needs.

You can get a bottle of Nujol at any good drug store, in a sealed package, for the price of a couple of good cigars. If you will start today and try it for two weeks you will agree that Nujol is the easy normal way to keep well and make a success out of your life. You will be astonished at the results!

Mothers find it magic for scuffs

One touch of the dauber and scuffs disappear. Smooth, uniform color comes back to faded shoes. More than 40 marvelous shades—10 cents. Colors for black, brown, tan and white shoes—a neutral polish for others.

BARTON'S DYANSHINE SHOE POLISH

Giant Warehouse The largest warehouse in Europe is at Stettin harbor, on the Baltic. It has a capacity of 65,000 long tons and storage space of nearly 48,000 square yards.

Treating Them Rough "The meanest thing ye kin do to an enemy," says Scattered Baines in the American Magazine, "is not to hate him as much as he thinks he ought to be hated."

The Mark of Genuine Aspirin..

BAYER ASPIRIN is like an old friend, tried and true. There can never be a satisfactory substitute for either one. Bayer Aspirin is genuine. It is the accepted antidote for pain. Its relief may always be relied on, whether used for the occasional headache, to head-off a cold, or for the more serious aches and pains from neuralgia, neuritis, rheumatism or other ailments. It's easy to identify Bayer Aspirin by the Bayer Cross on every tablet, by the name Bayer on the box and the word "genuine" always printed in red.

Aspirin is the trade mark of Bayer Manufacturer of Monoaceticester of Salicylicacid

COGITATIONS and APHORISMS of JODOK

I often ponder the fact that it is so hard for us poor weak mortals to please each other, and yet we know we must get along with each other in some manner.

For instance a doctor who cures us with his pills, suffers from us full many ills. The teacher who trains the child at school is often mentioned as a fool. And the patient preacher gets his full share of stuff we could not call a prayer. The merchant charges a way too high for the various things we have to buy, and the banker counts interest cent on cent, while dollar on dollar to get he's bent.

Yes, it's too bad we all seem bent on counting up how much abuse we must suffer at the hands of our fellows, rather than in trying to see how much we can be to him.

But of all the classes or professions it occurs to me that the pastors of the churches have more unjust criticism heaped upon them, more delicate tasks to perform, and receive more heartless ridicule and censure and less financial remuneration and heartfelt sympathy and appreciation than any other individual class of people.

It is my honest opinion, too, that many of these faithful pastors are fully aware of this fact. In justification of this opinion, I hold the fact that one of these most faithful servants of the people has written me the following clipping:

"The preacher has a great time. If his hair is gray he is old. If he is a young man he has not had experience. If he has ten children, he has too many. If he has none, he isn't setting a good example. If his wife sings in the choir, she is presuming. If she does not she is not interested in her husband's work. If a preacher reads from notes he's a bore; if he speaks extemporaneously he is not deep enough. If he stays at home in his study, he does not mix enough with the people; if he is seen around the streets, he ought to be at home getting up a good sermon. If he calls on some poor family, he is playing to the grand stand; if he calls at the home of the wealthy he is an aristocrat. What ever he does, someone would have him do better."

Our little water works election passed off quietly Monday. The election board was composed of two men and two ladies and there were eighty votes cast out of a probable 200 or more.

Some say they had not heard of the election, while others heard of it but had forgotten it and still others were so busy they did not take time to vote, feeling sure the proposition would carry without their vote; but suppose everybody had thought that way, and in that way they excuse their failure to vote. I heard one man say he had known some mighty good elections to be lost in just that way.

Of the eighty votes cast 70 were for the proposition and four opposed, which by most people would be considered an overwhelm-

ing majority, but I have heard just such arguments as this: That was not a representative vote because not half of the people voted. If they had all voted all the others might have voted against it and that would have defeated the proposition."

But the other side of the reasoning is just as fair, and much more probable. They might also have all voted for it as those who did vote. My neighbor feels that evidently four of the voters made a mistake in marking their ballots.

But it occurs to me that was a very nice decision in favor of a municipal water system. It was not such a bad vote for so busy a time and so many out of town, and the fact that it was so nearly unanimous makes me think that it was practically the voice of the whole people of the town, and I hope they get just what they asked for with their franchise.

I heard two of my friends talking recently and one of them said: "I would like to have a chance to get away and go to the fairs and other places of amusement and interest, but I never have time—I always have too much to do."

The other replied that he could go if he only thought so. That he would have to take time off some day and that there would always be work to be done and someone to do it after he had checked out, or words to that effect.

Yes, said number one, someone will step into my place and keep the ball rolling. Then number two told him that the pace he was setting will just make it harder for the other fellow to keep up.

I have never wanted that anything I have done should cause any hardship for those who live after me, and that kind of reasoning helps to set me easy on that score, for it evidently will not be any over exertion for anyone to keep up with the pace I have set.

In speaking of the waterworks election I forgot to mention that some one said late in the day, when exhorting some one else to go in and vote, that the judges had taken off the restrictions and one could vote which ever way he pleased.

When asked what the restrictions were that had been taken off, he was told that early in the day the judges contended that if one voted at all he must vote either for or against the proposition, but that restrictions was removed and now vote any way he wanted to.

"I have heard it sung that "Every ship will find a harbor, every bird a nest," but that is not proving to be the case with those who come to Friona and many of those already here.

Scarcely a day goes by that some homeless fellowbeing asks me where he can get a house to move into, or where he can find a couple of rooms to rent. If you hear of any I wish you would let me know.

Thus it appears that regardless of the fact that there is scarcely a week when there is not from one to four houses under process of construction, there still is not enough houses in Friona.

I have been told that if the city puts in an efficient water system which will not only supply the people with all the water they need and want, but also furnish fire protection that there will be more capital invested in buildings here, both for residences and business places.

Then there are others who say that if they can get gas for fuel they will build more houses. One man is contemplating the construction of two modern homes and asked the mayor what about gas. He wanted to know if we are going to get it. If we are I am going to install the pipes and fixtures as I build.

He was told that the franchise had been granted to the West Texas Gas Co. to build its lines into the city and that the city will have

gas no later than May 1. Rumors are now floating that the gas may be here as early as January or February, but that is only rumor and not authentic.

There is one thing that seems to be meeting with the approval of the public and that is the move the merchants in Friona have taken in regard to early closing. It will mean better times for all concerned. The merchants and their clerks may have time for themselves and families and give their attention and help to the work of the Chamber of Commerce and other community affairs and even the few objectors will soon learn the benefit of the move.

THE NEW JOLLY CLUB

The Sew Jolly Club met with Mrs. Frank Sylvester Tuesday afternoon, when a pleasant afternoon was spent in doing fancy work and visiting together during which time delicious coffee and chocolate fudge were passed by the hostess.

Those present were Misses, Peaberton, Musick, Pierce, R. Gischer, E. Gischer, Taylor and the hostess, Mrs. Sylvester. The club will meet November 12 with Mrs. Edwain Gischer.

SENDS STAR TO BROTHER

E. R. Furlong, one of Friona's foremost contractors and builders, whose farm home is a few miles southwest of town, was in town early Monday morning and called at the Star office to have his own name added to the Star's subscription list. While here he also had the name of his brother, O. F. Furlong of Celeste, Texas, added to the list. Mr. Furlong stated that his brother is interested in the Plains country and was sure he would be interested in reading the Star.

"I FEEL LIKE I HAVE A NEW LIFE BEFORE ME," SAYS LOCAL WOMAN.

Mrs. Taylor Says She Suffered 30 Years, When She Began Taking Orgatone—Now Feels Better In Every Way.

"I am simply feeling so improved as far as my health is concerned that I feel like a new life is before me, since taking Orgatone," said Mrs. E. A. Taylor, residing at 1904 Jackson St., Amarillo, Texas, in her statement to the Orgatone representative.

"Yes, sir, I am feeling like a different woman and I want everybody to know it," she continued. "I have suffered with a badly disordered stomach and constipation for thirty years and one bottle of Orgatone has done me more real genuine good than anything else I have ever tried. I guess I ought to know real medicine when I have tried it, as I certainly have

taken enough of it in my years of illness.

"I had been suffering so many years with a very bad stomach and other troubles and my condition had become wretched. After meals gas would form and bloat me up until I would get so miserable and dizzy at time I could hardly stand on my feet. I lost all desire for food of any kind and the little I would eat caused me constant misery in my stomach and I lost energy and all interest in everything.

"I tried most every kind of medicine and did everything I knew how to do trying to get relief, but I kept getting worse all the time. I tried Orgatone and it has completely changed my life around for me and I just can't find words to express my gratitude for it. I have been relieved of those terrible bloating spells and those sickening bilious attacks have left me, as well as my constipation. My appetite is better now and I can eat as much as I ever could have and I relish my meals. I wish I could have the opportunity to personally thank the maker of Orgatone for placing this wonderful medicine in reach of suffering people."

Genuine Orgatone is manufactured by one of the world's largest laboratories and is not a so-called secret or patent remedy but a new scientific bile treatment and is sold in Friona by the City Drug Store.—Adv.

ANY PLACE ON THE THERMOMETER...

Your car can now start easily—warm up fast—accelerate quickly

The weather never changes for the car that's fueled with Phillips 66. This gasoline makes starting easy on even the coldest nights; its volatility is controlled to fit the season and the climatic conditions of the locality in which you buy it. You'll find it always quick in action. Flexible, too, at all engine speeds—no more stutter or miss when you step on it. You get these results at no extra cost. For best results try a full tank of Phillips 66 or 66 Ethyl.

Phillips 66

CONTROLLED VOLATILITY

WHEN THE THERMOMETER GOES DOWN THE VOLATILITY GOES UP. Gasoline must vaporize before it can be fired in the cylinders of your motor. Volatility refers to the ability of gasoline to vaporize. With volatility controlled, Phillips 66 vaporizes as quickly in cold as in warm weather.

RESPECT FOR RIGHTEFUL AUTHORITY

Mark 12:13-17; Rom. 13:1-7; I Peter 2:15-16

Golden Text: Let every soul be in subjection to the higher powers.

Introduction.

"The very idea of the power and right of the people to establish government presupposes the duty of every individual to obey the established government."

"Let reverence for law become the political religion of the nation. No one can undermine respect for law without being to that extent an enemy to orderly government."

"Free government has no greater menace that disrespect for authority and continued violation of law."

"Loyalty to rulers is to me an essential branch of religion."

Lawlessness.

One of the most alarming features of present-day American life is the widespread lawlessness, which has increased at an appalling rate in recent years. To make the situation worse, a great many prominent men and influential newspapers are encouraging this lawlessness.

Pharisees and Herodians.

"And they sent him certain of the Pharisees and of the Herodians." The Herodians were the royalist party, in favor of the dynasty of Herod the Great as a buffer against Roman authority.

"Tribute to Caesar, Or Not."

"Is it lawful to give tribute unto Caesar or not?" "Caesar" is the

same as the titles "Kaiser" or "Czar"; it was the official title of the Roman Emperor at this time. Tiberius, Tribune was the annual poll tax levied on the people, for the treasury of the Roman Emperor, and collected by the hated publicans. The dilemma in which Christ was placed was very real. It he answered yes, the people would turn against him, for they loathed the tax as a symbol of their subordination to Rome, a condition from which they expected their Messiah to free them.

The Denarius (Penny).

The denarius was the silver coin in which the poll tax was paid. It was worth from fifteen to seventeen cents; and was the day's wage of a common laborer, equal in purchasing power to about two dollars of our money.

A Wise Answer.

"Render unto Caesar the things that are Caesar's, and unto God the things that are God's." No more sound and sagacious reply was ever made. The burden of the decision was thrown back on individual consciences, as is always the case with Christ. If they decided that Caesar has no right to a tribute, they were not to pay the tax; if they concluded that he had such a right, they should pay it.

"The Powers That Be."

It is a commonplace that the Greeks stand for beauty, the Romans for law, and the Hebrews for religion; but in Paul's letter to the Roman Christians is the world's finest characterization of law, and it was written, in Greek, by a Hebrew of the Hebrews.

well to study this masterly passage. "Let every soul be in subjection to the higher powers." That is, to the civil authorities. It was easy for a certain type of mind to argue that, since Jesus and his Messianic kingdom would soon displace all the institutions of the present evil age, the civil government had no legitimate authority.

the liberty of another man to enjoy health and economic and social welfare. Ask the wife of the working man who wants full personal liberty to drink whether this would increase her personal liberty. She will cut out all technicalities and go straight to the main point—that her husband's personal liberty to drink takes away her personal liberty to eat!

The Lord's Second Coming.

Finally, Paul urges upright and law-abiding conduct on the most solemn and impressive of all grounds, the Second coming of the Lord. It is near. With every day it is nearer. The long night of waiting is far spent; the day of the Sun of righteousness is at hand. It is time to cast off the works of darkness, such deeds as the saloon foster, drunkenness, reveling, licentiousness, intemperance of all kinds. It is time to live beautifully, as befits the beautiful day of his appearing, and to put on a Christly character as an armor of light.

THE FRIONA GIN COMPANY

Appreciated the patronage given it last year by the cotton growers of Farmer county and other sections outside of the county, and is doing everything it can to merit their patronage again this season by furnishing the very best of gin facilities than any gin anywhere can give, by interested and courteous treatment of all gin employees, by providing a market second to none on the Plains, as one buyer has instructions to pay just a little less than the market at all times, assuring the cotton grower of as good a price for his cotton as the market will justify.

Two Naval Heroes Named Perry

OLIVER HAZARD PERRY AT THE BATTLE OF LAKE ERIE

PERRY HOMESTEAD AT WAKEFIELD, R.I.

By ELMO SCOTT WATSON

NAVY day (October 27) this year finds an interesting memorial nearing completion, for when the Perry homestead at Wakefield, R. I., is thrown open to visitors as a patriotic shrine, it will be not only a monument to two of our greatest naval heroes but to a family whose record in our naval history is unique. For that family was rich in "a naval heritage," if ever any American family was, and it is not to be wondered at, perhaps, that Oliver Hazard Perry and Matthew Calbraith Perry should distinguish themselves aboard ship.

Although Christopher Perry, the father of the two naval heroes, was only thirteen years old at the outbreak of the Revolution, he immediately enlisted in the Kingston Reds and served in the Continental army. He next served on a privateer, then on board the *Mifflin*, was captured by the British and for three months endured the horrors of the British prison ship, *Jersey*. Escaping from the *Jersey*, Perry enlisted on the *Trumbull* under Capt. James Nicholson and had a part in the brilliant victory over the British privateer, *Watt*, in 1779. Later he was captured again and sent to Newry, Ireland, as a prisoner of war.

There he became acquainted with Sarah Alexander, a pretty Scotch girl, whose grandfather had fled from Scotland to Ireland and who had been left an orphan in her childhood. At the close of the war Christopher shipped as a seaman on a British ship bound for America. Sarah Alexander was a passenger on the same ship and upon her arrival at the home of Dr. Benjamin Rush in Philadelphia, Christopher sought her out and they were married. He took his bride to the Perry homestead in Rhode Island, a house that looked out toward the sea and from which her husband and her sons were to "go down to the sea in ships" and become officers in the navy.

There were five of them—Oliver Hazard, Raymond H. J., Matthew Calbraith, James Alexander and Nathaniel Hazard. As if this contribution to her adopted country's sea forces was not enough, two of her three daughters married naval officers, Capt. George W. Rodgers and Dr. William Butler! The influence of this mother on her sons had much to do with their later fame. She told them stories of her warrior ancestors in Scotland; she closely supervised their education, she "fitted them to command by teaching them to obey" and when, still in their teens, they answered the call of the sea, she sent them forth cheerfully. She lived to see all of them make honorable records in the service of their country and two of them win fame and one of them receive the highest honors which his countrymen could pay him.

He was Oliver Hazard Perry, born August 23, 1785 in the home which is soon to be opened as the Commodore Perry Memorial. He entered the navy as a midshipman at the age of fourteen when war with France seemed inevitable. But it was not until Commodore Preble was sent to subdue the Barbary pirates that he saw his first active service in the war with Tripoli. In 1810 he was commissioned a lieutenant and placed in command of the schooner *Revenge*. The *Revenge* was

wrecked off Watch Hill, near his home, but a naval board of inquiry not only cleared him of all blame for the disaster but highly applauded him.

By the time of the second war with England, Perry was known as one of the best ordnance officers in the navy and early in 1812 he was placed in command of a flotilla of gunboats in Newport Harbor. Then came the chance for him to win fame. The war was going badly for the Americans. The British had captured Detroit and were threatening to conquer the Northwest, which had been won for us by George Rogers Clark during the Revolution. To check them, it was necessary to obtain mastery of Lake Erie and there Perry was ordered to go, build a squadron of ships, defeat the British fleet on Lake Erie, which was manned by some of Nelson's veterans, and co-operate with General Harrison and his land forces.

It seemed like a hopeless task, but Perry never faltered. Making his way through the wilderness in a sleigh in February, 1813, he arrived at Presque Isle (now Erie, Pa.) and with the aid of Sailing Master Daniel Dobbins built five ships, despite a shipwrecking shortage of money, dispirited crews, arms and sailors to man them after they were done. His green timbered squadron was joined later by four ships from Buffalo and with these he was expected to fight six well-manned British ships.

On September 10, 1813, the two fleets met off Put-In-Bay on the Ohio shore of Lake Erie. In less than two hours and a half, the Americans were victorious. They had inflicted a loss on the British of 200 killed and 600 made prisoners. Perry's loss was 27 killed and 96 wounded. Before the smoke of battle had cleared away he sat down and, resting his cap on his knee, used this impromptu desk for penning his immortal dispatch to General Harrison: "We have met the enemy and they are ours. Two ships, two brigs, one schooner and one sloop."

Perry's victory had saved the Northwest again to America. The news of it thrilled the country. Congress gave him a vote of thanks and awarded him a gold medal. He was promoted from master commander to captain. At the close of the war he was placed in command of the *Java*, a first-class frigate, and sailed with Deatur for the Mediterranean. In 1819 he was made a commodore and placed in command of a squadron which was sent to the West Indies to suppress piracy. There he fell ill of the yellow fever and on August 23, 1819, he died in Port Spain, Trinidad. He was buried there, but in 1826 the American government sent a sloop of war to bring his body back to his native state. He was buried at Newport with all the honors due him and today a tall granite

monument marks the last resting place of the "hero of Lake Erie."

Matthew Calbraith Perry was nine years younger than his brother, Oliver Hazard, and served as a midshipman under him on the *Revenge*. While he never attained such distinction by one brilliant feat of arms as had his brother, his life was one of continuous action. It is summarized by a recent biographer as follows:

"He convoyed the first colony of negroes from this country to Africa; his ship regulations for use on the African station were a model long followed in the navy; he fought pirates in the West Indies, voyaged to Mexico, protected commerce from Greek pirates in the Mediterranean, founded the first United States naval apprentice system, commanded the North Carolina, the finest warship in the world, took John Randolph as envoy to the czar in the first American warship to enter Russian waters, was entertained by the founder of the khedival dynasty in Egypt, made a brilliant naval demonstration in the harbor of Naples, served ten years shore duty at Brooklyn navy yard where his work caused him to be called the chief educator of the navy, studied lighthouse illumination and went to Europe on one of the first regular steamships, enforced the Webster-Ashburton treaty in Africa, had oversight of the seam navy in the Mexican war and breached the walls of Vera Cruz with naval guns when Scott's light artillery failed, and visited the waters of Newfoundland to settle the fisheries dispute."

But the thing for which he is most famous is the fact that he organized and commanded an expedition in 1854 which was to have world-wide significance. For centuries Japan had cut herself off from contact with the nations of the Western world and had steadfastly refused to have either trade or diplomatic relations with "foreigners." Under the excuse of making arrangements for protecting American sailors, engaged in the Pacific whaling industry, who might be shipwrecked on the coasts of Japan, Perry proceeded there with four warships. Despite the suspicion and thinly-veiled hostility of the Japanese, the American commander conducted his negotiations so diplomatically, combining firmness with the politeness, so dear to the heart of the Oriental, that on March 31, 1854, Japan signed a treaty of peace, amity and commerce with the United States. From that day dates the end of the "hermit nation" and the rise of modern Japan to a position among the world powers. It was brought about by a Commodore Perry, whose diplomatic victory was no less brilliant than the victory in warfare won by another Commodore Perry 31 years earlier.

mother quite enjoyed the following conversation which she overheard: "No, it's not a cow. It's a Jersey. The man said so when he was talking to Daddy." "No, no, Bessie, you're wrong. Daddy told me. It's a halfer. That means, it's half way between a cow and a calf."

Nearly 60,000 Orangemen took part in the West of Scotland celebrations in connection with the anniversary of the battle of the Boyne recently.

The DAIRY

DAIRYING MUST BE SPEEDED UP MORE

Scientists Facing Several Serious Economic Problems.

(By K. L. HATCH, Agricultural Extension Service, University of Wisconsin.)
Dairying is a business, a big and a serious business, both for the producer and the manufacturer.
The dairy farmer is just awakening to the fact that he is a business man employing both capital and labor on no mean scale. Dairy manufacturers are realizing as never before, that their problem is one of producing an article that will please the trade and stimulate, through quality, its own demand. These are the big and vital problems that the dairy scientists must face—are now facing. They are economic problems and must be faced with facts not now obtainable.

Everywhere in experiment station literature do we find feed costs of milk production, but rarely do we find labor costs, or dry cow costs, or depreciated herd costs, or bull costs, or capital charges, such as interest, taxes, insurance and depreciation which I submit as the principal costs of milk production on the up-to-date dairy farm.

On the manufacturing side we are equally weak. We continue to use small, insanitary and wholly inefficient plants. Neither have we studied the demands of the consumer who makes our market nor have we made much effort to produce what will especially appeal to his tastes.

And yet every other business of national scope, be it ever so small, has done all these things, and for the most part borne its own costs. A great dairy industry with nationally endowed research laboratories should do these same things—must do them for the sake of the industry.

Potato Flavor in Cream Not Caused by Feeding

The common assumption is that potato flavor in cream is caused by feeding the cows potatoes. This antiquated idea has been placed in the discard through experiments conducted by North Dakota Agricultural college. The trials with feeding potatoes to cows indicate that potato flavor in the cream is not caused by feeding the potatoes, but by exposing cream to air heavy with potato odor.
Potatoes were fed in varying amounts and immediately before milking time. The cream or milk that was stored in a cellar where the air was heavy and potato odor prevailed took on a marked potato flavor in a few hours. Once the cream acquired the potato flavor it could not be removed. No ordinary treatment, such as pasteurization, will remove potato flavor from the butterfat.

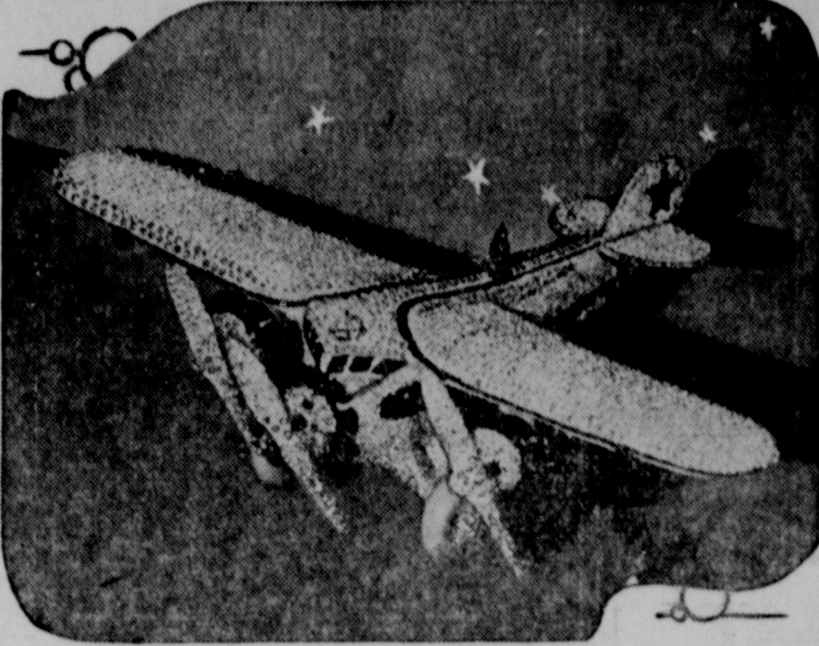

Satisfactory Ration of Roughage and Legume Hay

Heifers should have all the good roughage they will eat. Silage and any one of the legume hays make a very satisfactory combination. In addition to this they should have some grain, the kind and amount depending somewhat on the kind and quality of roughage supplied. If the quality of the legume hay is good, two to four pounds per head daily of a simple mixture, such as equal parts of ground corn, ground oats, and ground barley, is satisfactory. If the hay is not so good add one-half part each of bran and linseed or cottonseed meal. For heifers within three months of calving the grain should be increased to from four to six pounds per head daily depending on condition.

Dairy Hints

- Barley is a good feed for finishing calves. In fact it equals corn for gain.
- Any cream separator that leaves over four-one-hundredths of one per cent of butterfat in the skim milk is stealing money from the farmer who owns it.
- Grass seems to have a stimulating effect on dairy cattle, and it is a matter of common knowledge that cows turned on good pasture increase in production.
- Pasture grass is the natural feed for the cow, and it doubtless is the best feed which the cow receives during the year, but too many dairymen expect too much of pasture grass.
- Any farmer sufficiently interested in dairying to keep 10 milk cows will find a silo profitable.
- Do not forget to provide salt for dry cows and heifers on pasture. There should also be a good wafer supply and extra feed when pasture gets short.
- Grain rations adapted to pasture are relatively low in cost, because they need to carry only a small amount of protein, grass being quite high in this important nutrient.

Plane Made of Ten Thousand Jewels

"The Spirit of Cleveland," the \$400,000 jeweled airplane which was shown at the National Aeronautical exposition in Cleveland. Ten thousand jewels, including diamonds, rubies, topazes and emeralds, were used in the plane, which was built by H. W. Beattie & Sons.

REFUELING IN THE AIR CUTS TIME AND LOAD

Operation Easy at Full Speed, Say Pilots.

New York.—The extent to which refueling in the air may be used in commercial and military aviation is one of the problems in the minds of aeronautical engineers, writes George Gardner in the New York Herald Tribune.

This method was devised for the army plane Question Mark, which established an endurance record of 150 hours, 40 minutes and 15 seconds. That record has been surpassed several times. The St. Louis Robin was kept in the air 420 hours, 21 minutes and 30 seconds by supplying the ship with fuel and oil and food for the pilots from another plane.

It was used also by the Spokane Sun God for a non-stop round trip of 7,200 miles, from Spokane to New York and return, and by the Boeing-Hornet-Shuttle in its transcontinental mail test, which was sponsored by the army and the Boeing company.

The equipment is simple. The supply plane needs only an extra gasoline tank and a hose. The plane which is to receive fuel usually has a receiving tank, but the hose could be connected to the main tank if necessary.
Refueling flights that have interested the newspaper public since the Question Mark flight, however, have been stunt flights for the endurance record, or, in the most recent cases to demonstrate the possibilities of long-distance flights.
The lessons to commercial flying may be applied to increase speed or the distance that may be flown without landing.

Cuts Time for Flights.

For commercial flying, only the first consideration is important. If it is not necessary to make a flight in the shortest possible time, the plane might as well take on its fuel at an airport.
But America demands speed. American business, particularly, demands that its correspondence be delivered with all possible haste, and that its executives make business trips with no delay.

If an airplane can save a half hour or an hour in a long trip by receiving an additional supply of gasoline from another plane in the air, this will be of value when such a saving is essential.
Pilots who have participated in endurance tests are confident that refueling in the air can be done without lessening the speed of the plane.

Dale ("Red") Jackson, one of the pilots of the St. Louis Robin, said that an airplane which refueled in the air could make a long distance flight as rapidly as a plane that flew with a large load of gasoline and did not stop for fuel, and, furthermore, that it could fly farther if that was considered desirable.

"It is not necessary to slacken speed at all," Jackson said. "The St. Louis Robin refueled while traveling 80 to 100 miles an hour. It would be just as easy to refuel at 150 or 200."

"If the pilot of a transport plane gets his gasoline in the air, while he is in flight toward his destination, he can go along without any delay at all. If he has to stop at an airport for gas, he stands a chance of being delayed from fifteen minutes to an hour.
Saves Wear on Equipment.
Then, again, you must consider the wear on equipment. The deterioration of an airplane, aside from the motor, is largely in landing and in taking off. If you eliminate this, you are practicing economy."

Mr. Clarence M. Young, now assistant secretary of commerce for aeronautics, is a champion of the refueling process. "I should think the logical step is to put it to use economically by refueling planes carrying full cargo on non-stop flights across the continent," he said recently.

"Instead of taking on a heavy load of gasoline at the start," he continued, "a plane could take part of its gasoline, be refueled several times en route and save much weight for pay load. For instance, 400 gallons of gasoline, weighing about 2,400 pounds, might be required for a transcontinental trip. Why not take 600 pounds, refuel in the air as necessary and carry 1,800 pounds more cargo?"

Pennsylvania Aviator Has Air-Minded Dog

Lancaster, Pa.—Even the dogs are going "air-minded" here.
"Keystone Bozo," an English setter owned by S. E. Fraim, an aviation enthusiast, has about 15 hours' flying to his credit—all in his master's plane. He has made several long hops, including one of 300 miles, during which he slept in the cockpit.
The dog doesn't care for stunt flying because he is bowled about the ship too much.

CIERVA TELLS ABOUT AUTOGIRO INVENTION

Young Spaniard Explains His Windmill Plane.

Philadelphia.—When a man builds a three-motored plane, only to see it crack-up through some defect, it is time to get disgusted with such machines and cast about for some other method of rising above the earth which will not mean death and disaster.

Thus Senor Juan de la Cierva, friend of the king of Spain, sportsman and erstwhile member of parliament, came to discover the principle of the autogiro—the plane which has auxiliary windmill vanes which rotate in flight—the latest model of which he has been demonstrating in the United States. The advantages of the autogiro are the ability to fly at a stalling speed, to land without a run and to take off in comparatively restricted space.

Cierva is only thirty-three, but has been experimenting with airplanes since he was sixteen.
"I do not remember how old I was when I became interested in flying," he said, his speech heavily tinged with Spanish accent. "But I was very young. I will show you the first airplane I ever made."

He picked up a piece of paper, gave it a few deft twists and produced a miniature paper plane which he tossed into the air. He watched it glide slowly to the floor.

"There," he said, smiling happily. "That was the first. And when I was about fifteen, with my brother I made two gliders. They worked nicely, nearly always. But one day when we were gliding, my brother had a smash. We had to tell my father he fell off his bicycle. My father did not find out until ten years later that my brother had been hurt on the embryo flying machine. After the gliders, I built many planes. In 1911 I built the first Spanish plane. Then, in 1919, I built a three-motored ship. It crashed. I was disgusted. We must have something better, so I thought for a year."

"In 1920 I conceived the giro principle. In 1923 I flew the first of the machines. It was simple and flimsy, but I felt that I had reached a safe footing on the way to develop the giro."
Cierva takes a childlike pride in his pet and always grins happily when the amazing machine brings delighted applause from those who watch its operation.

Chilean Airport Gift of Guggenheim Fund

Santiago, Chile.—A gift of \$500,000 from the Daniel Guggenheim Fund for the Promotion of Aeronautics is making possible the establishment of a civil air field in Chile, Ralph H. Ackerman, commercial attaché here, reports.

The director of aviation of the Chilean war department is studying locations for the field.
The only airfields in Chile at present are those of the army and navy, none of which is open to public use without prior authorization from the government.

Hunt Whales by Plane

Capt. Hjalmar Rilsær-Larsen and Capt. netzow Holm, veterans of the Amundsen-Ellsworth 1926 flight from Spitzbergen in the Norge, have set out to hunt whales by airplane. They accompanied the steamer *Thorshammer* on its annual cruise into Arctic waters.

Yiddish Not Hebrew

Yiddish is spoken by a large number of Jews of German or Polish ancestry, and is not the natural language of the Jewish people, who speak modern Hebrew. The Jews who left Germany in the Middle Ages for the Slavic lands of Bohemia, Poland, Galicia and Lithuania spoke, besides Hebrew, the middle high German. In course of time Hebrew and Aramaic and Slavic words became customary, and a certain modifi-

fication of the sound of the German words also took place, and by the sixteenth century a world-defined dialect, or language, known as Yiddish had become common. It was not adopted as a literary language until the nineteenth century.

Half Way

A family of small children spent this summer on a farm, their first experience. The country life charmed them especially because of the multitude of new things to learn. Their

Speed Limits Are Rapidly Being Abolished by States

Speed limits are slowly, if not surely, catching up to automobiles.

As to actually overtaking them, the possibility seems rather remote for engineering seems rather more speedy than legislation. But there are two things happening to speed laws that are making the lot of the motorist happy and a third that probably would make it happier than the other two.

The first satisfying thing is that speed limits are being liberalized in virtually all quarters of the country. The second is that, elsewhere, they are being removed altogether.

The third eventually, and it is no more than that at present, is that following the abolition of the arbitrary maximum there may come an

arbitrary minimum speed. It is held to be a natural step and there are forward looking officials and motorists in both this country and England who are not so certain these days that the slow driver is not more of a menace than the fast one.

In recent weeks, five states have officially gone on record as favoring higher maximum speeds on their highways. Minnesota has gone from 30 to 35; Mississippi from 30 to 40; New Mexico, Ohio, and Oklahoma from 35 to 45. At the same time, Tennessee and Indiana have gone even further and abolished the maximum law altogether.

In this action, they have followed the course of Connecticut, Michigan and Montana. Anyway it is counted, that makes five states out of the 48 that have gone to higher speeds.

Just 43 states to go and then there will be no arbitrary maximum speed limit! Then, many insist, the next logical step is to establish a minimum limit below which the driver may be arrested as dangerous.

A minimum speed limit law is not a brand new idea. Several years ago, John M. MacCall, then chairman of the Maryland state roads commission, sponsored a measure in the legislature for the establishment of a low speed limit of 20 miles an hour on state highways. The bill failed to pass but it died a gallant, fighting death, and its friends have by no means abandoned hope.

Manager Donie Bush Is Puzzled Over Art Shires

Donie Bush, who has been signed to manage the Chicago White Sox, is in a hurry to go to work on his new task of attempting to boost the club back to its former eminence in

C. Arthur Shires.

the American league. One of the problems confronting Bush is the disposal of the case of C. Arthur "The Great" Shires, cocky first baseman, who is under suspension for engaging in a fist fight with Blackburne at Philadelphia.

Ty Cobb Couldn't Keep Away

KEYSTONE PHOTO

Ty Cobb couldn't resist the temptation and will return to baseball next season after a year's vacation from the game. Home again after a summer in Europe with his family, Ty announced that he had been approached with offers from major league clubs, both executive and managerial. He will never play again.

Japanese Tootle Their Horn and Then Shout "Hi, Hi"

"Rules of the Road and Hints to Motorists" in Tokyo, Japan, are printed in Time, the News magazine, as follows:

"1. At the rise of the hand of policemen stop rapidly. Do not pass or otherwise disrespect him.

"2. When passenger of the foot have in slight, tootle the horn. Trumpet melodiously at first. Then tootle with vigor and express by word of mouth the warning, 'Hi! Hi!'

"3. Beware of the wandering horse that he shall not take fright. Go soothingly by.

"4. Give space to the festive dog that makes sport in the roadway. Avoid entanglement of the dog with your wheel spokes.

"5. Go soothingly on the grease-mud.

as there lurks the skid demon. Press the brake of the foot as you roll round the corners to save the collapse and tie up."

Notre Dame Stadium

The Osborne Engineering Co., a Cleveland firm, announce that it has been awarded the contract to build the new Notre Dame stadium. Work will be started at once and the plant will be completed by September 1, 1930. It will seat 54,000 people, but the stadium will be so built that the seating capacity can be increased to 130,000. The Osborne people have built many famous athletic plants throughout the nation, including the Yankee stadium.

Plan Overhead Roads in Paris for Automobiles

Plans have been placed before the French Ministries of Interior and Transportation of a project linking Paris by an overhead automobile road with Nice, Marseilles, Toulouse, Bordeaux, Brest, Lyons and Geneva. According to the scheme, the roads would be carried on reinforced concrete pillars at a height of about 25 feet, and would consist of two one-way tracks, each about 20 feet wide. A large proportion of the heavy initial expenditure, it was suggested, could be covered by the importation of materials from Germany under the reparations plan and the upkeep could be more than met if motorists paid a special tax of 100 francs a year.

Rosy for the Pest

To begin with, Purdue's ace—"Pest" Welch—seems likely to have that long-awaited big year. The husky Texan is no "Red" Grange, but he'll certainly do until another sherman of the gridiron comes along. And you can take it, that he is in shape.

VIRGINIA TRACK COACH WAS A GREAT SPRINTER

Archie Hahn, head track coach at the University of Virginia, stands out as one of the greatest sprinters of all time, in the opinion of Keene Fitzpatrick, Princeton mentor.

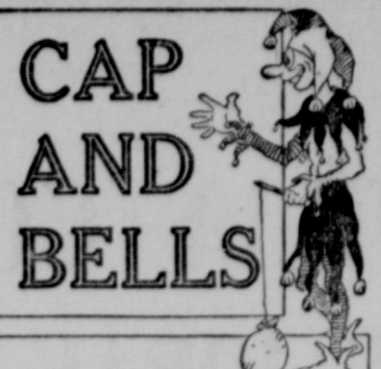

Attention to Automobile During Severe Weather

In cold weather the careful automobile driver will see that his storage battery has plenty of water, that it is fully charged, and that the charging rate of the generator is increased. A storage battery is less efficient in cold weather, more energy is used in starting the engine each time, the drives are shorter, and the lights are used more in winter than in summer.

The ignition should be timed exactly right for the power of the engine is lessened by a late spark. If the consumption of gasoline is high, the engine runs hot, and the car is sluggish, the ignition may be the cause of the trouble. Headlights should be adjusted to protect the driver and to give him the most possible light.

Would Defeat Harvard

Fifteen years is a long time to wait, especially so when it's a little matter of avenging a football defeat. But University of Michigan fans have been waiting patiently over that span of seasons for a maize and blue gridiron team to get another crack at a Johnny Harvard eleven. It'll come to pass this fall when the once chesty Crimson invades picturesque old Ann Arbor to do battle with Harry Kipke's Wolverines. The date scheduled is November 9.

CAP AND BELLS

"I can't do a thing with Parker," said the manager. "I've had him in three departments, and he does all day long." "Put him at the pyjama counter," suggested the proprietor, "and fasten a card on him with these words: 'Our pyjamas are of such superior quality that even the man who sells them cannot keep awake.'"—Tit-Bits

Clay Pipe Joke?

The owner of a cheap watch brought it into the jeweler's shop to see what could be done for it. "The mistake I made, of course," he admitted, "was in dropping it." "Well, I don't suppose you could help that," the jeweler remarked. "The mistake you made was picking it up."—London Opinion.

STEPPING STONES

"Why are you so anxious to have Arthur give you presents of diamonds?" "They're stepping stones to marriage, my dear."

Numerous Enemies

He who has a thousand friends, has not a friend to spare, and he who has one enemy will meet him everywhere.

Forming a Career

"You take a new flat every year?" "Yes," answered Mr. Meekton, "I had thought of persuading Henrietta to go into the movies." "Why not?" "Her natural eloquence is such I thought she'd better wait for the latest developments and take her chances with the talkies."—Washington Star.

Warning

Doctor Pearson (after bringing him to)—How did you happen to take that poison, Rastus? Didn't you read the sign on the bottle? It said "poison." Rastus—Yessah, but ah didn't be heve it. Doctor Pearson—Why not? Rastus—Cause fight underneath it was a sign what said "Lye."

AFTER A REST

"Jones ought to be looking well after being locked up at the police station." "Why?" "Shouldn't a man look well after a rest?"

The Wifely Views

"My dear, you spend too much." "Said pa, who found life tough; My dear," said ma, "you're wrong—You just don't make enough!"

Times Have Changed

Jones—It was I've, wasn't it, who wrote that stuff about a world of happiness and harmony were foretold by those golden wedding bells? Smith—Yeah, but all they foretold now is a lot of business for the divorce lawyers.

Home, Sweet Home

Guest—Great Scot! Who's that couple above you making so much racket with their family scrap? Flat Dweller—Oh, that's the couple who were quietly married last week.

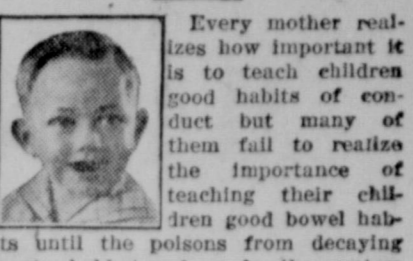

An Office Secret

The New Stenog—I don't see how I'm going to hold this job. I'm sure I can't spell the long technical words in the boss' dictation. The Old-Timer—Sh! Spell 'em by ear. The boss doesn't know how to spell 'em himself.

Newly Engaged

She—Henry, I have something I must confess to you; my teeth are false. He—My dear, I know that. She—But I haven't paid for them yet.

Denver Boy is a Winner

Every mother realizes how important it is to teach children good habits of conduct but many of them fail to realize the importance of teaching their children good bowel habits until the poisons from decaying waste held too long in the system have begun to affect the child's health.

Watch your child and at the first sign of constipation, give him a little California Fig Syrup. Children love its rich, fruity taste and it quickly drives away those distressing ailments, such as headaches, bad breath, coated tongue, biliousness, feverishness, fretfulness, etc. It gives them a hearty appetite, regulates their stomach and bowels and gives tone and strength to these organs so they continue to act normally, of their own accord. For over fifty years, leading physicians have prescribed it for half-sick, bilious, constipated children. More than 4 million bottles used a year shows how mothers depend on it.

Mrs. C. G. Wilcox, 3855 1/2 Woff St., Denver, Colorado, says: "My son, Jackie, is a prize winner for health, now, but we had a lot of trouble with him before we found his trouble was constipation and began giving him California Fig Syrup. It fixed him up quick, gave him a good appetite, made him sleep fine and he's been gaining in weight right along since the first few days, taking it."

To avoid inferior imitations of California Fig Syrup, always look for the word "California" on the carton.

Forty Miles of Water Tunnels

There are sugar plantations on Kauai, Oahu and Maui, in the Pacific, with 40 miles of tunnels and ditches to carry life-giving water, and a famous aqueduct on Oahu taps four valleys and traverses a tunnel 14,445 feet long. One plantation uses more water than the city of San Francisco, says Nature Magazine. Thousands of artesian wells dot the countryside. In 1923, about 770,000 tons of sugar worth \$65,000,000 were raised on the 6,449 square miles that comprise this daisy of water-surrounded land. The pineapple crop brings a revenue of nearly \$34,000,000 annually.

Handy to use Red Cross Liquid Blue.

Large bottle 10c at your grocer's—Adv.

That Silver Lining

The Gossip—I hear your store was robbed last night. Lose much? The Optimist—Some. But it would have been worse if the yeggs had got in the night before. You see, yesterday I just finished marking down everything 20 per cent.

Cause of Pride

A fond mother, relating a recent achievement of her child to her neighbor, who is a lover of dogs, said: "We are proud of Mary." "So are we proud of our new pup," was her envious reply.

Squelched

Haughty Customer—My bill, waitress? Waitress—He's just gone out with another lady, miss.

Railroad Buy Thousands of Miles of New Equipment

A railroad train 5,740 miles long could be made of the equipment retired from service by the Class 1 railways of the United States in the last seven years, while the new locomotives, freight cars and passenger train cars installed in service by these roads in the same period would make a train 7,342 miles in length. These calculations are made from figures of equipment retirements and installations appearing in "Railroad Facts No. 7," the final 1929 edition of the annual railway year-book issued by the Western Railways' Committee on Public Relations.

Included in this 7,342 mile train of new equipment would be 237 miles of locomotives, 6,851 miles of freight cars, and 254 miles of passenger train cars. This entire train would reach, in straight lines from New York to Jacksonville, Florida, then to Los Angeles, to Seattle, to New Orleans and back to Boston. When the first engine reached Boston after covering the above route, the last car would be just leaving New York, and at an average speed of 30 miles an hour, would take 10 days for this entire train to pass a given point.

That this new equipment installed is much larger and more powerful than the old and obsolete equipment retired is shown by the fact that from 1921 to 1928 the power of the average locomotive in service was increased almost 20 per cent, while the carrying capacity of the average freight car was raised almost 8 per cent.

In addition to the foregoing material, the yearbook contains sections on the railway plant, service, rates, earnings, employees, and on the increases in efficiency and the economy of railway operation that have been made in recent years.

DESTROYED DOLLARS

Dollars, represented by property, die when fire destroys. Whether the blaze consumes a great tract of forest or a one-car garage, it means a permanent economic loss. The money invested can never again work to produce profits. It is definitely and literally dead.

This is a direct loss. The indirect loss, in waste of time and unemployment, may be even greater. The tax that would be paid on a destroyed building is reassessed against other citizens. The rates charged by insurance companies are determined by the aggregate average fire loss. Every citizen in the community pay for every fire. Something that contributed its share, large or small, to progress and social or industrial development, has been totally destroyed. Instead of an asset, it becomes an expense.

These are simple matters, but

MONEY TALKS BY YOUR CASH

Life is one constant round of earning money and spending money. To keep your income heavier than your expenses is quite a problem. E. B. Black Company will help you solve this problem, says YOUR CASH.

E. B. BLACK CO.
We Are Satisfied With Small Profits

Our Banker

by A. J. Dunlap

Our banker was a sober man,
At least in banking hours;
He kept the Old Town's ready cash
And wielded fiscal powers.
He had to know an awful lot
About the people's needs --
Such things as mortgages and wills
Sheep dip and garden seeds.

Some people thought him hard as nails,
And they would loudly moan,
When on some cheap collateral
He would not make a loan;
But some folks praised him to the skies
When, on his sane advice,
They sold a thing they did not want,
And got a handsome price.

I've dealt with many banks that boast
Of millions at their back
But, though their marble counters shine
There's something that they lack.
They lack the homely sympathy
The Home town bank possessed;
For ordinary folks like me,
The Old Home bank is best.

they are seldom realized. A few minutes' though must bring home to every citizen the appalling danger of our gigantic annual fire waste. Thrift, industry, saving, hope—fire destroys them in the flickering of an eye. And the bill is charged against the national pocket-book.

Work on the new laundry building is progressing and Dr. McElroy has placed his order for the necessary machinery, and hopes to have the equipment all installed and doing business within the next few weeks.

Better see those stoves at BLACKWELL'S. They're dandies.

Ford Doings

There was no Sunday school nor singing at Ford Sunday because of rain, which was badly needed in this vicinity.

The oyster fry at Ford Friday night was well attended and everyone enjoyed the oysters and boiled ham furnished by the men.

Mrs. Bennett and Miss Brumley, teachers at Ford, are going to have a box and pie supper at the school house Friday night, November 8. The funds will be used for school ground equipment. Everybody is invited to come and bring a box.

Mrs. Barney McCaskey and children were visitors at the Howard Morel home Friday night. Mrs. Morel accompanied them to San Jon, New Mexico, Saturday morning and will spend the week there while Mr. McCaskey is shipping a car of cattle.

Mr. and Mrs. George Remple and children returned from Besse, Oklahoma, Wednesday.

Miss Margaret Roberts, teacher at the Higgins school, spent the week-end with Miss Odessa Goad. Mrs. August Koch returned from Oklahoma Wednesday.
