What do you suppose the odds are that two men named W.L. Ellis would have an appointment with the same doctor at the same office, within 15 minutes of each other on the same Monday morning in February? That's kinda what we wanted to know.

We had a nice visit with the we had a nice visit with the other Mr. Ellis. It turns out that he is retired after a career with A, T & T in Colorado. The other Ellis couple drove about 230 miles oneway for their appointment with the same specialist that I have been visiting. I asked Wilbur Ellis if he had

Combest Says "We Need To Pass The Farm Bill'

by CAROL & BILL ELLIS

"The folks from the urban areas just don't understand how the farming business works," Congressman Larry Combest told us when he stopped by our office for an hour's chat one day this past

He was referring to the fact that no new farm legislation, or "Farm Bill" has been passed by the Congress as yet. Representatives from the big cities don't realize that farmers need to know what they're facing so as

to know what they're facing, so as to get their financing in place, work the land properly, fertilize, and the 100 and one other things that goes into farming, the legislator said.

"We need to get something in place by the first couple of weeks in March. Hopefully we can take up the farm legislation when we return to Washington on February 26 or 27." Combined and 27," Combest said.

The U.S. Senate passed its version of the Farm Bill the week of February 8. After a bill is passed by the House of Representatives, where Combest is a member, there will have to be conference committees appointed to sort out a document that both houses of

government can agree on. And even then, there is no assurance that Clinton won't veto the bill.

"Clinton has done more to raise taxes and increase government regulations than any president in recent history. He vetoed the biggest tax reform bill that the legislature ever passed. He talks about all that he has accomplished, but Representative Bob Cary, himself a Democrat, called Clinton the biggest liar he's ever seen,

Combest commented. "It is becoming much more difficult to make a living farming in today's world," Combest stated, referring to the obscenely-high price

of tractors and other machinery, as well as land.

"It's virtually impossible for a young man to go into farming, unless he takes over his family's farming enterprise," he said. Combest himself was raised in a farming and ranching environment.

Tarming and ranching environment. "Half of the guys I grew up with are no longer in farming," the legislator stated, decrying the fact that the family farm is quickly becoming a thing of the past. Concerning the presidential race, Combest told us that it's hard for him to find a cardidate thet is

him to find a candidate that is trustworthy. He said that he trusted Gramm, but was concerned about his electability (this was before Gramm's withdrawal this week).

"The person I'd sort of like to see get into the race is Colin Powell. I could support Powell because I feel I can trust him. I think that's what most people want in courd differ " he article to the second difference of the second term of the second difference of the second difference of the second difference of the second difference of the second second difference of the second difference of the second second difference of the second difference of the second second difference of the second difference of the second second difference of the second difference of the second difference of the second second difference of the second difference in a candidate," he stated.

Combest said that the Republicans in congress would have as their main goal between now and November drawing a distinction between the Republican

officials have in the past. "The Washington press corps have said to them more than once-You guys are serious about all of this, aren't you," Combest said.

"The heart and soul of our goal in congress is to control spending. A child born today, in Parmer County or in Seattle, will have to pay \$187,000 during his lifetime, on the interest alone on the national debt. If we don't draw the line in congress at this time, it'll never happen," concluded. congressman the

While waiting for his flight, a stranger approached and said, "Excuse me, but you wouldn't happen to be from Friona, Texas, would you?'

Amazed, he replied, "Sure am, but how did you know?" "Well, because there is only one barber in Texas that cuts hair like that. That's Lee Gibson in

year He went to West Texas Barber College in Amarillo, then came back and took the second chair in

Jack's barbershop. When Mr. Anderson died in when Mr. Anderson drea in 1967, Lee bought the shop, and then the little building that it is in. For 33 years now, Lee has been dispensing rumors, jokes, and sage advice just like Orville, and so

many other hometown barbers. In 1963, haircuts were \$1.00. Later they went to \$1.25, and for the last 7 or 8 years, they have been

\$5. He said in 1963 there were three shops and five barbers in town. Of course today there are places like Shara's, Socorro's, Suds places like Shara's, Socorro's, Suds 'N Scissors, and Clipper Cuts, but

Lee is the only male barber in the bunch and he doesn't care to cut women's hair. I imagine the local

women are glad about that. He has seen all the fads too. Burrs, flattops, chili bowls, and

long hair. "Man, we almost starved to death back when they had that long hair', he chuckles. "I don't know why boys today want it buzzed on the sides and flopping on the top. Next year it will be something due." else.

Today, men and boys come from all over Parmer County to get five bucks worth of trimmin' and jawin' at Lee's. He says that some come from Hereford and as far away as Clovis.

There are two barber chairs in the little shop, but the second one is only used for little boys and old

men to sit in while they wait. There are some magazines in a rack in a corner but nobody ever seems to read them. The TV up in the corner is usually on but the sound is turned off.

It is talk that comes first at Lee's. It must be difficult to cut hair and talk and tell jokes and take guff off of three or four guys at one time. Barbering sure don't seem

easy. My six-year-old Zach has already learned the importance of a barbershop to his future. Just like barbershop to instruct. Just like me and Orville, Zach and Lee are buddies. Zach would get his hair cut twice a week if 1'd let him. Sometimes when we drive by, Zach asks to go in and see Lee.

He likes to sit in that second barber chair, hang his cap on one of the hooks, and try to talk Lee out of another stick of gum.

Lee's original barber chair from 33 years ago is at home in his garage. Chances are, he'll never be able to nort with it

able to part with it. My next big thrill as a daddy will be when Zach is old enough to go to Lee's all by himself and sit tall as his buddy Lee cuts his hair and fills his ears with advice. Just like me and Orville used

to do.

BARBERSHOP EDUCATION.....To a little boy, the many trips to the barbershop are an important part of growing up. Lee Gibson and one of his "little buddies", Corey Davis, are shown during a recent good hair day. For more barbershop lore, see this week's Out Here column.

The Squaws managed to hit only three of 25 shots from the field in the first half, 12 per cent, and just 13 of 55 for the game, 24 per cent. Misses Cass and White scored nine points each to pace the Squaws

in scoring. With the loss, the Squaws still finished first in district with an 8-2 record, and a 23-7 season record. * * * *

hurt the Squaws throughout the game. Officials let the Lady Cats gang up on the smaller Friona girls who had the ball, and would call a "tie ball" all night long, and never a foul.

Miss White was Friona's only player in double figures with 13 points. Mary Cass added nine. Friona's usually good free throw shooting deserted them. The team hit only three of 11 tries, and five of the misses were front-ends of 1-1 situations.

Miss Carthel fouled out of the game with 3:49 left to play, and that hurt the team. Both Miss Cass and Miss Stokes finished with four fouls.

River Road now goes to the area round, and faces the winner of Decatur-Bridgeport next Tuesday. The next time Friona meets the

Lady Wildcats, it may well be in district play, since the two schools are in the same district beginning in 1996-97. * * * *

ARTIST OF MONTH....Friona Art Association has invited award-winning Lubbock photographer Stan Ellis to be guest Artist of the Month for February. He started taking photos at about age ten and worked as the *Friona Star* photographer from 1975 until he graduated from FHS in 1982. Since then, photography has remained his number one hobby and he has won awards at exhibitions at the South Plains Fair and the Caprock Photographers annual exhibit. His photographs will hang in the lobby at Prairie Acres this month for the public to view his work.

New Shopping Tool For Mutual Fund Investors

Shopping is an American national pastime. For some, it's an art; others have it down to a science. Some shoppers are professionals and others are amateurs, but they all choose from a variety of locations in which to practice their favorite hobby: department stores, specialty shops, mega-stores, discount outlets and warehouse clubs, to name a few.

warehouse clubs, to name a few. At one end of the spectrum are catalogs. Catalog-shopping is quick and easy--yet impersonal and a bit risky. It's important to know exactly what you want from a catalog, because there's no one there to help you. At the other end of the spectrum is the neighborhood retail

At the other end of the spectrum is the neighborhood retail outlet, such as the local hardware store. These are typically meccas of helpful assistance. The clerks usually know their products and are anxious to share their knowledge. Customers typically leave confident that they have found just what they need, and knowing that they can return and be assisted by the same ballful the typical they can helpful person.

Mutual fund shopping used to be like shopping at the local hardware store. A knowledgeable representative listened to the investor's needs, understood his or

investor's needs, understood his or her objectives and only then recommended the proper funds. As the number of mutual funds has exploded--reaching almost 5,000 today--catalog shopping for funds has become more popular. If you know exactly what you need, understand each fund's risks and are able to analyze management and performance, "catalog shopping"--

buying no-load funds--may be for you. However, the costs of no-load funds (advertising costs and other fees) are typically comparable to the costs of load funds purchased from a full-service investment repre-sentative. With a dedicated professional working in your best interests, you obviously get more for your money with "hardware-store" shopping than you do by catalog shopping. Toemphasize the value using a

financial professional, 24 leading brokerage firms and mutual fund companies have formed a new organization called Mutual Fund Forum. Their motto says it all: "Investment Professionals Helping Investors." The key word is "help." The organization's objectives are to help investors use financing professionals effectively and to help financial professionals provide the highest level of service to

investors. Mutual Fund Forum's specific goals are to: *build consumer confidence in

the skill, training and value offered by qualified financial professionals. *highlight the role of financial professionals; and

*work to strengthen the professionalism of financial professionals, particularly regarding their training and ongoing education.

Mutual Fund Forum advocates what smart investors have known what smart investors have known: all along: When shopping for mutual funds, there's no reason to go it alone. For about the same price as a "catalog fund," a qualified professional can help you sort through the nuts and bolts of mutual fund shopping.

YOUR EYES

More Eye Tests

Your optometrist's complete visual examination covers far more than the standard screening. Refraction measures the acuity of your eyes, their ability to see clearly. The examination includes:

*Coordination tests to check that both eyes are working together properly. Do they point and focus at the same place? *Stereopsis tests to determine depth perception, the ability to judge distances and space relationships properly. *Periphersal vision--or field of vision--tests to measure your ability to see out of the sides of your eyes. *Eye health tests like the glaucoma test that measures the pressure inside your eyes and others for cataracts, macular degeneration, tumors, lesions and retinal tears. The eye doctor makes sure your eyes are free of disease and other abnormalities. sure your eyes are free of disease and other abnormalities. The optometrist's professional judgment uses the result of all the tests to come up with a personalized eye care "prescription." Brought to you as a community service by:
