

**RUNNINGWATER CONTEMPLATES ORGANIZING MOTHERS' CLUB.**

**Party at Home of George Locke; School Program Planned for Friday Evening.**

RUNNINGWATER, Texas, Feb. 29.—Brother Stegal filled his regular appointment here Sunday.

C. F. Knight and family spent Saturday and Sunday at Abernathy.

Austin Kindred is on the sick list.

The party given by George Locke Thursday night was well attended. Everybody had a good time.

Miss Clara Hunt spent Sunday with Miss Cora Kindred.

The Runningwater ladies are thinking of organizing a "Mothers' Club."

There will be a program given in Mr. Baird's room Friday evening. Gladys Knight and Pauline Wright are on the program committee. Friends are invited to come.

Rev. S. J. Upton will preach here Sunday morning at eleven o'clock and at seven Sunday night. Everybody is invited.

Pupils making ninety or above on daily recitations are exempt from monthly examinations.

The occupation of the men is plowing and that of the women is crocheting.

Mr. and Mrs. H. H. Taylor spent Sunday with Mr. Witt's.

Miss Pauline Wright spent Thursday night with Miss Cora Kindred. Gladys Knight was shopping in Plainview Wednesday.

**BROWN IS IMPROVING HALF SECTION NORTH OF RAMSEY.**

**Correspondent Says Rain Is Needed, but Ground Is Moist Under Surface.**

RAMSEY, Texas, Feb. 27.—All the farmers are busily preparing their land for the 1916 crop. All are in good spirits over the prospects for a big crop for 1916, despite the drouth we are having at present.

Our school is progressing nicely at present, under control of Prof. Corder, from Lockney.

There was a spelling match at our school house Friday evening, in which quite a number of visitors took part.

Last Thursday night quite a number of the young people gathered at the Jones home and enjoyed themselves for three hours. All report a good time.

L. V. Marrow has returned from Tennessee, where he came from two years ago. He went back to visit relatives about a year ago, and now he says there is no place like the "baldies."

The Russell family has moved seven miles east of Lockney, where they intend to live the coming year.

H. C. Randolph was a pleasant caller at the Russell home Sunday week. He came up from the Cedar community, accompanied by Paul McCree, Ocie Clindison and his niece, Miss Woodredge.

Mr. Brown is improving his half section two miles north of Ramsey by building a new house. He already had a well and windmill on it. This is a good place, and we are glad to see it coming to the front.

Alford, Celia and Mary Russell were visitors in Lockney Saturday.

There was a party given at Bill Brown's Saturday night, which was well attended. All report a good time.

We understand that Bob Visage has sold his farm to Jerdon Redmon.

A fine rain would be appreciated very much at present, as everything is getting very dry. However, it seems that there is plenty of moisture deeper down.

We are grieved to hear of the death of Jimmie Devall, who left here about

two weeks ago for Amarillo, where he underwent an operation for appendicitis. Jim had no relatives here. It is not known where his people are.

Mr. Gentry was a pleasant visitor at the Russell home Sunday.

Another family, by the name of Jones, has moved into our community. We are glad to welcome them into our community.

**FELNAGLE'S MOTHER BETTER.**

**Rev. Bates Preached at Midway Sunday—Singing at H. N. Ritchey's.**

MIDWAY, Feb. 28.—Quite a number were out at church Sunday to hear Brother Bates. He preached two good sermons for us, and then everybody went to a singing at H. N. Ritchey's.

Mr. Darden, of Abernathy, was in our neighborhood one day last week.

H. Felnagle has returned from a trip to Kansas, where he was called to the bedside of his mother. We are glad to report that she is improving.

Miss Hilda Richter returned from Abernathy Sunday, where she spent a week recuperating.

Misses Madge Day and Kathleen Beauchamp, of Plainview, were out to spend Sunday afternoon with Erma Felnagle.

**PROVIDENCE SCHOOL IS OPEN.**

**Interesting Items of Personal News from The Herald's Whitfield Correspondent.**

WHITFIELD, Texas, Feb. 28.—Mr. and Mrs. Foster, the Whitfield storekeepers, were pleasant callers at the M. E. Nations home Friday.

Mrs. W. G. Williams, of Prairieview, was called to the deathbed of her mother last week, at Brownwood, Texas.

Mr. and Mrs. J. C. Nations and mother visited at Liberty last Sunday.

Mr. and Mrs. Monroe Smith went to Floydada Saturday to visit and to get a job of farming.

School at Providence was reopened Monday, after a two weeks' vacation.

Miss Rush returned Sunday from Tulla and commenced teaching at Providence.

Little Dorothy Lucile Pullen is well again, after a siege of sickness.

Clifford Nations and mother, also Mr. Parks, went to Silverton last week on business.

Mr. and Mrs. Chas. Moore and Mr. and Mrs. Dameron motored to Plainview Saturday in Mr. Moore's new car.

Mrs. Taylor is gaining nicely, after a siege of pneumonia.

Mr. Real and two sons have moved from Kansas and will build on his farm.

**ABERNATHY SCHOOL PATRONS ORGANIZE MOTHERS' CLUB.**

**Play by Woman's Missionary Society of Methodist Church Was a Success.**

ABERNATHY, Texas, Feb. 29.—V. Stambaugh, J. A. Darden and W. A. Richter were business visitors to Plainview last Wednesday.

Rev. G. I. Brittain filled his appointment here Sunday morning and evening.

Mr. and Mrs. Spivey Barnes have gone to Waco, by auto, for a visit to relatives.

Mr. and Mrs. W. B. Tudor have been visiting Mrs. Tudor's parents, at Plains.

Mr. and Mrs. F. F. Barnes were in Plainview last Saturday.

Wesley Crow has recently finished a new home in South Abernathy.

Rev. A. L. Moore will preach in Abernathy next Sunday night.

E. C. Stout has sold his grocery business to W. W. Caldwell and son, who will continue the business at the same stand. We have not heard of Mr. Stout's future plans, but hope he and his good family will remain in our midst.

Mr. and Mrs. J. C. Arnett opened their home to the members of the Epworth League last Friday night. About 40 of the younger people were present and engaged in many varied games, after which excellent refreshments were served. All enjoyed themselves to the fullest, and we hope we may have many more such functions for the young life of the community.

The Woman's Missionary Society of Abernathy gave a play, "The Face at the Window," at the school house last Saturday night, for the benefit of the parsonage. The play was exceptionally well presented and showed excellent home talent. It was attended by a large crowd, and the applause it brought forth from beginning to end showed that it was appreciated.

A Mothers' Club was organized at this place Monday of last week. Quite a great deal of interest is already manifested, and we hope parents and teachers may get into closer relation and by united effort may accomplish much for our school.

**IS THOROUGHbred STOCK OR COMMON STOCK BETTER?**

**Olton Boys Will Debate Question Friday Afternoon at School House; Other Numbers on Program.**

OLTON, Texas, Feb. 28.—Mr. and Mrs. L. E. Ensign were in Plainview last Thursday.

Misses Jessie and Ruth Ogden, who are attending school in Plainview, spent Saturday and Sunday with their parents, north of Olton.

Mr. and Mrs. Robt. McQuillen were in Plainview last Thursday.

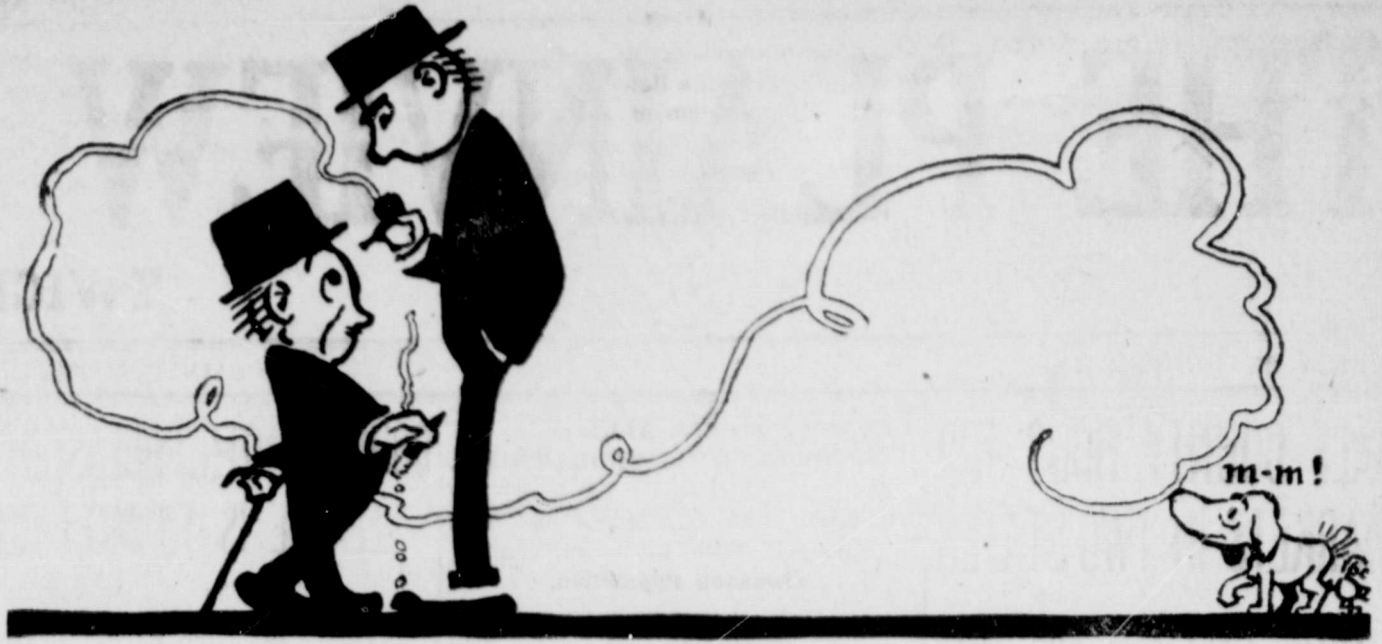

R. T. Branson has a new Buick. The young folks of Olton community were pleasantly entertained at the home of Mr. and Mrs. Walter Ogden Saturday night.

Mr. Barnetson and two sons, lately from Oklahoma, spent Saturday night at the M. Dotson home. They were en route to Spring Lake, where they are thinking of locating.

D. C. Yauger and son, Lester, were in Plainview Friday and Saturday.

A program will be given by the children at the school house Friday afternoon, which will consist of songs and readings and a debate by the boys.

The question to be debated is, "Resolved, that there is more profit in raising thoroughbred than common stock." Parents and friends are especially urged to be present.

**No, Philburt, I am not a-arguing with you. I'm just a-telling you**

—when you want a *real* smoke, get behind a pipeful of Tuxedo and watch all the big and little Worries that have been a-besieging you, evacuate their trenches and make a rushin' advance to the rear. Those fragrant whiffs of "Tux" make them feel too joyful—no self-respecting Worry can stand for that.

**Tuxedo**  
*The Perfect Tobacco for Pipe and Cigarette*

FRITZ KREISLER  
World-famous Violinist  
*"I have certainly found in Tuxedo the one and only tobacco that measures up to all my requirements, rich in fragrance, always cool smoking and so mild that I can smoke pipeful after pipeful at a sitting."*

The combination of the best smoking-tobacco leaf in the world and the best method ever discovered for refining and mellowing tobacco puts Tuxedo in a class by itself.

Kentucky's ripest, mildest Burley leaf, when treated by the original "Tuxedo Process" loses every trace of bite—develops a wonderfully pleasing fragrance and flavor that are not found in any other tobacco.

No other manufacturer knows the "Tuxedo Process"; that's why no imitator ever equals Tuxedo!

**CULTIVATING INDIAN CORN.**

**Study of Methods in Various Portions of the Southwest Results in Valuable Bulletin.**

No specific recommendations are made to farmers in Bulletin No. 320 of the United States Department of Agriculture, but interesting reports of study of methods in the various states of the Southwest are made in that bulletin, which has just been issued by the Department.

Following is a summary of the practices as found by the experts in the Southwestern States:

In the southwestern division, surveys were made in two counties in northern Texas, one in Oklahoma, and one in western Kansas. This region constitutes a comparatively new agricultural section, with tillage methods peculiar to that locality. Most of the corn is listed, as is the case in all the Southern States, but here heavy teams are employed. The land is bedded with 3-horse or 4-horse listers, which accomplish with one furrow what the 1-horse plows of the South Atlantic States do with 4 to 6 furrows. A combined lister and planter is often used, which breaks the land and plants the corn at one operation. Where this implement is used, frequently no other preparation is given the land before the corn is planted.

Using the data obtained in the four surveys made as a basis for calculating the average farm practice in this division, it is found that 12.4 per cent of the farmers plow in the fall to an average depth of 5.9 inches; 71.5 per cent plow in the spring to an average depth of 5.3 inches; and 16.1 per cent of the farmers plow in the fall to an average depth of 6.5 inches and re-break the land in the spring to an average depth of 5.9 inches. The average depth of plowing for all divisions is 6.8 inches in the fall and 6 inches in the spring; and where both fall and spring plowing is done, the fall plowing is to an average depth of 7.9 inches and the spring plowing averages 5.1 inches. An average of one working is given the land after plowing and before planting, and 3.9 inches is the average number of cultivations after planting in the regions surveyed. Corresponding averages for all the areas studied are 2.3 and 4.6. The average normal yield of corn in this division is 26 bushels per acre, as compared with 36.3 bushels for all the regions studied.

**Texas—Rockwall and Grayson Counties:** The tillage practices with corn in these counties were found to be rather unusual. A large part of the land is broken in the fall with a 4-horse lister, or a middle buster, which leaves the land in ridges the width apart the corn rows are to be. After ridging the land in the fall it is allowed to stand until spring without further preparation. Before planting, the ridges are usually harrowed with a spike-tooth harrow. In planting a 2-horse, 1-row planter is used. This planter is equipped with sweeps or a broad shovel which tears down the ridges and makes a furrow where the ridge stood, in which the corn is planted several inches below the surface level. Practically all the corn is planted in drills 3½ feet apart, with one stalk every 20 inches. Some farmers, however, break the land with 4-horse gangs, harrow

with a spike-tooth harrow, and then lay off the rows with a lister, and plant the corn in the bottom of this furrow about 4 inches below the surface level. On some of the bottom lands where drainage is poor, corn is planted on beds. On the higher lands which are inclined to be dry, it is usually the practice to bed the land and plant the corn in the water furrows between the beds.

After the corn is up, a few farmers use a spike-tooth harrow for the first cultivation, and after this practically all the cultivating is done with a 2-horse, 4-shovel cultivator, using either 4-inch shovels or sweeps. For the first workings the shovels are used mostly, especially next to the corn, but sweeps may be used for the middle. At the last cultivation, sweeps are used generally, and are set so that the land is leveled.

The data obtained in the two counties show that the average depth of plowing is 6.4 inches. The average number of workings after plowing and before planting is 1.5, and the average number of cultivations after planting is 3.9. The average normal yield of corn per acre is 33.6 bushels.

**Oklahoma—Oklahoma County:** The methods of cultivating corn in this county are quite variable. A few farmers plow the corn land in the fall and then rebreak in the spring just before planting. The common practice is to break the land level, harrow with a spike-tooth harrow, and lay off the rows with a double moldboard plow, commonly known as a lister, or middle buster. The corn is planted in the bottom of the furrow. Most farmers use the combination planter and lister, which is the shovel plow and planter combined. Frequently corn is planted with this implement without any previous preparation of the land, especially if corn follows corn or cotton. For such work a 3-horse or 4-horse team is used, and the plow employed has a broad shovel which breaks practically all the row. About 90 per cent of the corn is listed and planted in drills 3 to 3½ feet apart, with one stalk every 18 inches in the drill. After planting, a spike-tooth harrow is frequently used just as the corn comes up. For the first cultivation a disk cultivator, especially designed for cultivating listed corn, is used extensively. The 2-horse, 4- and 6-shovel cultivators and disk cultivators are used for the later cultivations, although a few farmers use a 1-horse, 5-shovel cultivator. After the corn gets to high to cultivate, some farmers will, with one horse, drag a mowing-machine wheel between the rows, which destroys nearly all the small weeds and forms a shallow dust mulch.

The average depth of plowing in this county was found to be 5.6 inches. The average number of workings after plowing and before planting is 1.5; the average number of cultivations after planting is 3.9. The average normal yield of corn per acre is 23.9 bushels.

**Kansas—Russell County:** In this region the land is generally harrowed in the spring with a disk harrow, and without plowing or further preparation corn is planted with a 4-horse combination lister and planter. This implement usually runs about 5 inches deep, throwing the soil in both directions, and the corn is planted in the bottom of the furrow. The rows are usually 3½ feet apart, with one stalk every 18 or 20 inches. In this operation, most of the land is broken, but there is a strip directly between the rows which is not plowed, but is afterward broken up during the cultivation. After the corn is up, the first cultivation is given most often with a 4-horse, 2-row disk cultivator, designed for cultivating listed corn. At this cultivation the dirt is thrown away from the corn and the ridges made higher. These ridges are next harrowed with a spike-tooth harrow or a plank drag, and partly torn down. The next cultivation is given with the same implement, with the disks adjusted so as to throw the soil to the corn, tearing down the ridges between the rows. The next and last cultivation usually is done with a 2-horse, 4-shovel or 6-shovel cultivator, leaving the land about level.

The average depth of plowing in this region was found to be 5½ inches. No tillage was given after plowing and before planting. The average number of cultivations after planting is 3.8. The average normal yield of corn per acre is 20.4 bushels.

## In the Flower Garden

It Is Now Time to Plant Annual Flowering Plants in Hotbeds—Government Experts Tell What Kinds to Start Now.

WASHINGTON, D. C., Feb. — Many garden lovers who are envious of their neighbors' earlier blooms fall to realize that they can do many things even in February to give some of their plants an earlier start. Those who own hotbeds of cold frames, the specialists of the U. S. Department of Agriculture say, should see to it that their annual flowering plants are started at once. This applies to those flowers to be used later in beds and to those grown for cut flowers.

Some of the flowers which give particularly good results if started in hotbeds or cold frames are: Agertum, Alyssum, Aster, Calendula or Pot Marigold, Calliopsis, Campanula, Castor Bean, Chrysanthemum, Cockscomb, Cosmos, Four-O'clock, Godetia, Marigold, Petunit, Sweet William, Scotch Pink, Scarlet Sage, and Verbena.

The seed of some of the flowers listed below need not be started in hotbeds, but can be sown later in the season in the open ground and then transplanted to their permanent locations. The seed of these flowers should not be sown until the ground is in condition for making a good seed bed and until there is no longer likelihood of a heavy frost in the locality. A good test to determine whether the garden soil can be worked well is to take up a mass of it in the hand and compact it into a ball. If this ball readily falls apart, the ground is dry enough to be worked. It is particularly important in planting flowers to spade up the ground, fine it thoroughly with hoe and rake and remove the stones and lumps from it. The actual surface should be made very fine and soft. In planting each kind of seed the directions as to depth of planting should be carefully followed. Flowers that can be sown in this way are:

Agertum, Alyssum, Aster, Pot Marigold, Calliopsis, Campanula, Clarkia (shade), Cockscomb, Dahlias (single), Godetia, Gaillardia, Mignonette, Pansy, Pinks, Rudbeckia, Snapdragon, Stocks, and Zinnias.

Most of these may be sown earlier in a hotbed or cold frame and thus be made to bloom earlier.

Certain flowers die or do not do well if they are transplanted. These, therefore, should be sown only in the open ground or beds where the plants are to grow. The varieties which it is

best to sow in a permanent location are:

California Poppy, Candytuft, Corn Flower, Forget-me-not, Lobelia, Nemophilla (shade), Phlox Drummondii, Sunflower, Sweet Peas.

Sweet peas should be in the ground as soon as it is dry enough to work. The soil should be spaded up and well prepared and then a trench should be dug 4 inches deep; in the bottom of this the peas should be planted about 2 inches apart. When the peas are to be grown over chicken wire or brush stuck in the ground, it is customary to sow them in two parallel rows, 6 or 8 inches apart. In this way on the same amount of trellis double the number of plants can be grown with satisfactory results. Sweet peas thrive best in a cool, moist climate. Because of this it is especially desirable to sow very early in the spring.

Poppies may be sown directly on the surface of ground that was prepared last fall. If the bed was not prepared at that time, it should be spaded up as soon as the ground is dry enough, and the poppy seed sown evenly over the surface. The seed should be slightly covered by drawing the back of the rake over the bed. Poppies do not stand transplanting, and must be sown where they are to bloom. Care should be taken to distribute the seed evenly and not in bunches, for if there is much disturbance of the roots at the time of thinning the plants will not do so well as when left undisturbed. The Shirley poppy, a very showy and attractive variety, may be obtained in many colors. The individual blossoms, however, are very short lived, and as compared with many other plants its blooming season is short. The plants are so attractive when in bloom, however, that they are well worth planting. A succession of sowings will prolong the blooming season.

The California poppy should also be sown early, but does not require as

early sowing as the other poppies. It is handsome and will bloom during a longer period than the Shirley poppy. The other plants in the list may be sown in a seed bed and be transplanted from there to the permanent location, but it is usually better to sow the seed in the permanent location.

Balsams or lady's slippers, castor beans and Portulaca also are best sown where they are to grow, but they should not be put in the ground until it is warm enough to grow beans and tomatoes well—that is, about the time corn is coming up or oak leaves are half grown. These plants could be grown in a cold frame previous to this date, but there is little to be gained from this method. Farmer's Bulletin 195 treats fully of these plants.

### COLORADO MAN BELIEVES WE SHOULD INCREASE STOCK.

By A. M. HOVE.

"Changes have been coming fast in our part of the range territory," said George East, of Baca County, Colorado, when in Kansas City a few days ago. Mr. East has ranched in four states the last twenty-five years and knows whereof he speaks.

"A few years ago, when settlers came in and the free range began to disappear, we supposed that no more cattle would be raised. In this belief we were mistaken. Stock farmers seem to be increasing the number of cattle right along, for the reason that they are raising such a great amount of feed to properly care for them, and in that way never suffer any losses. In the free-range days we lost thousands of our cattle."

They are drifting into stock farming in Oklahoma and western Kansas. The stock farmer has made good the last few years. His is the correct diversified farming, and he has something to sell, be the years bad or good. There is always something growing to feed the cow and the pig and the chickens and the turkeys.

Northwest Texas and eastern New Mexico will in time become a great stock-farming section. When it comes to natural advantages, the great southern plains have many. The cli-

mate is mild. The climate is healthful for man and beast. The feed lots are dry. The growing season is long. The forage grains and small grains produce abundantly on virgin land in the newest and best West of today. And rich is the native grass.

And this section is no longer far from everywhere. The new trans-continental route of the Santa Fe across the plains gives direct and quick service to the best live stock and grain markets. The Galveston-San Francisco line runs direct to the Gulf Coast.

All in all, there is everything in favor of increasing the number of cattle, sheep and hogs as new settlers of the right sort extend the farming area in northwest Texas and eastern New Mexico.

## Mules for Sale

I have some 5 year old broke mules for sale at my ranch, 9 miles south of Hale Center, and am now prepared to sell these on time to responsible parties.

CHAS. E. SAIGLING

# PREPAREDNESS!

"Prepare for War in Time of Peace"  
An Old Adage, But How True!

PREPARE to meet your bills when due. If everyone would do this how pleasant it would be to do a credit business but we find from several years' experience, that we are unable to meet our bills when depending upon the public to pay us their bills. Hence on account of our financial weakness, we will be compelled to cut out the credit business, and

Commencing March 1st, We Will  
Sell for Cash Only

This will enable us to make you better prices and give much better service, as we will pay spot cash for all our merchandise, getting all discounts, losing nothing on accounts, etc.

We know we have a list of as fine customers as any one in town and believe we can make it to every one's advantage. We ask all of our old, as well as many new customers to continue trading with us.

You pay me \$5.00 or \$1.00 cash for goods. I will turn this money say twenty times during the month. Every time I turn it I make a little. Thus you see how much it is worth to me to have the money as I go.

To those who want to pay cash in advance I will allow 5 per cent off on the amount paid as well as the low prices we are going to give you on everything in our store. We think this will be much better for all of us and that not a one of our many customers will fail to let us prove to them that we can save them much money.

Let everyone come to our store and get our prices before buying anything in the grocery line.

Mr. A. J. Crager and Mr. Frank Stovall will be with us as usual and they will call on many of you, give you our prices, explain prices and everything to you so you will see how much we can help you as you help us. Use our phones, they are at your command, Nos. 234 and 233. Our deliveries are going to be prompt and our service the best. Let us hear from every lady who buys groceries in Plainview and surrounding country.

Thanking all of our friends for past favors, trusting to merit their esteemed patronage, hoping for a higher and better business, and with best wishes to all, we are  
Yours to serve,

## L. J. Warren Grocery Co.

## The President's Message on Preparedness

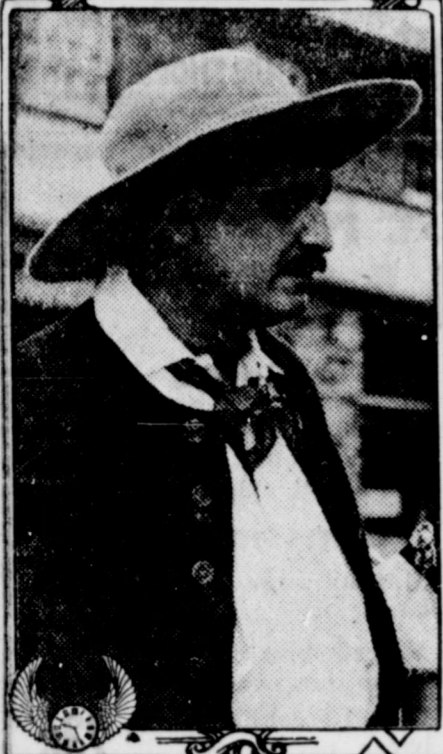

Is of vital importance to every citizen of the United States. It deserves close study and attention. OUR MESSAGE TO YOU, MR. FARMER is of vital importance to you. We urge your complete PREPAREDNESS for the success of your farming. Prepare today to handle your big crops in the best possible manner by making an appropriation for tools of peace—Farm machinery and Implements. No matter what the conditions on your farm you can fight the battles best when you are best prepared. Our standard lines will protect you. DONOHOO-WARE HARDWARE CO.

# The Herald's Review of the Movies

### What the Theatres Offer.

For the convenience of readers of The Herald, we offer below an advance review of the offerings of the motion-picture houses of Plainview for the next three days:

The Mae I. offers "The Patriot and the Spy" tomorrow. This is a four-reel Masterpicture, produced by the Thanouser Company. James Cruze and Marguerite Snow are featured in this drama. Alice Dovey is featured in a one-reel Casino Star Comedy in "The Reformer," on the same program.

ALPHONSE ETHIER in "THE PATRIOT AND THE SPY" FOUR-PART MUTUAL MASTERPICTURE, PRODUCED BY THANOUSER.

Alphonse Ethier in "The Patriot and the Spy," at The Mae I. Wednesday.

Helen Holmes in the serial "The

Girl and the Game" is proving immensely popular. The matinee at The Mae I. this afternoon was unusually well attended, and the picture will be shown tonight again. This is the eighth chapter. "The Race for the Right of Way" is as thrilling as any of the films that have been shown on this subject. Moving a shack to block Storm is one of the interesting devices Seagrue resorts to, and the effect is wonderful. The Mae I. is showing two reels of this all-star-cast picture each week.

"The Reaping," a three-reel drama, will be shown at The Olympic Wednesday, March 1st. The author of this drama has minced matters. His story starts with a seduction and traces the consequences of the woman's sin with remorseless truth until the finish. He then compromises with probability, for the sake of a "happy ending." Lillian Drew, Camille D'Arcy, Richard C. Travers, Frances Wood and De Wess Seewir comprise the cast.

The name would indicate that "Christmas Memories" is retrospective. It's for tomorrow at The Ruby. Put on your overcoat and imagine it is Christmas time when you start Wednesday evening. Although released on December 21, this three-reel Christmas offering, featuring Ella Hall and Robert Leonard, may belie the title and be interesting in March. The story is that of an orphan girl who marries a city man. Later she tires of city life and flies back to the country, where her son is born.

The American has just completed a new \$250,000 plant in Chicago. There are nineteen companies working in American studios. A two-reel Ameri-

can drama is to be shown at The Mae I. Thursday. Vivian Rich is featured in "The Wasp." In addition, this program carries a one-reel Falstaff Comedy and a one-reel Novelty Comedy.

The Olympic offers the third installment of "The Red Circle" Thursday, March 2. Another of the interesting two-part episodes which the serial presents, entitled "Twenty Years Ago." This number tells the story of the origin of June. This is told to her by her nurse, who was with her mother when she was born, and who had cared for her since a child. In this episode, also, the nurse tries to put the detective who is watching June off the track by wearing the black cloak and veil used by this young lady when she robbed the loan shark's safe.

### Hand-Colored Pictures Were Artistic.

Seldom are more beautiful motion pictures seen than the six-reel American production at The Olympic last night. "The Beloved Vagabond" in photoplay is an adaptation of William J. Locke's book of the same name. The pictures were produced in California, and it is said they were shipped to France to be colored. The artistic effect of the soft colors in the film was wonderful. The story is full of humanistic feeling and the play was well acted.

"The Fourth Estate," at The Olympic

are very effective. The Ruby, Thursday, March 2nd.

"Father and the Boys" will be at The Ruby Friday, March 2nd. Concerning this five-reel comedy, The Woman's Home Companion says: "A good George Ade comedy featuring Bibby Bell as the discouraged father who rescues his two gay, foolish sons from the downward path, showing them how it looks when Father does it."

On Friday The Mae I. will show another Mutual Masterpicture, featuring Edith Thornton in "The Fortune Hunters."

The critics say that "Lydia Gilmore" is a strong film. This is The Olympic's offering for Friday, March 3. Miss Pauline Frederick has the name role. In her portrayal of Lydia, the young woman who, out of gratitude to her aunt, and against her strongly defined inclination, accepted the hand of a man she did not love, she brings to bear all her talent for emotional interpretation. As the care-free girl she fascinates by her charm and vivacity. As the older woman, unhappily married, to whose tragedy of soul there is added the tragedy of blood, she is compelling in her strength. The affections of Lydia for Benham, the lawyer, again crops out in the trial for murder of Gilmore, the husband of Lydia, whom Benham, now prosecuting attorney, tries to save from execution in spite of the fact that the prosecutor knows Lydia still loves him. Lydia pleaded not for Gilmore, not for herself, but for her son.

### WEATHER RULES.

1. When the temperature falls suddenly, there is a storm forming south of you.
2. When the temperature rises suddenly there is a storm forming north of you.
3. The wind blows from a region of fair weather toward a region where a storm is forming or is in progress.
4. Cirrus clouds move from a region where a storm is in progress toward a region of fair weather.
5. Cumulus clouds move from a region where a storm is forming.
6. When cirrus clouds are moving rapidly from the north or northeast, there will be rain within twenty-four hours, no matter how cold it is.
7. When cirrus clouds are moving rapidly from the south or southeast, there probably will be a cold rainstorm on the morrow, if it be in the summer, or a snowstorm if it be in the winter.
8. The wind blows in a circle round a storm. When it blows from the north, the heaviest rain is east of you; when it blows from the south, the heaviest rain is west of you; when it blows from the east, the heaviest rain is south.
9. The wind does not blow unless rain or snow is falling within 1,000 miles of you.
10. Heavy white frost is evidence that a storm is forming within 100 miles north or northwest of you.—Youth's Companion.

### MUSIC IS TRANSMITTED BY WIRELESS TELEPHONE.

A young California inventor has designed an apparatus whereby selections played on a phonograph have been transmitted to several neighboring homes which are equipped with special receiving instruments. In some instances the instruments have been installed in the dining room and by this arrangement the neighbors have been entertained at mealtime. A wireless-telephone apparatus upon which the inventor has been working several years is used at his central station. A phonograph, in which the horn is an integral part of the body of the instrument, is used in producing the selections. The slats are removed from the mouth of the horn and within it are placed two ordinary telephone transmitters, from which the sounds are carried by wires to the wireless-telephone outfit which, after serving as an amplifier, sends the waves through a cable to the aerial on the roof, whence they are discharged into the air. The waves are caught by the various receiving stations and conveyed by wires to receivers, each of which is fitted with a small megaphone. In several instances head appliances with a pair of receivers were used. In others a single megaphone was sufficient for a group of persons. Pictures of the apparatus are published in the March Popular Mechanics Magazine.

Mrs. T. D. Webb, of Kress, who has been visiting friends in Plainview, returned home Saturday morning.

We are in the market for Dry and Green Hides in any quantity. RUCKER PRODUCE COMPANY. tf.

PIANO BOX for sale. Phone 416. Adv. tf.

---

**FRIDAY**

Another good Mutual Masterpicture and a Novelty comedy featuring **Edith Thornton** in "The Fortune Hunter"

MATINEE 2:15. EVENING SHOW 7:15  
Admission 5c and 10c

## MAE I. THEATRE

Pauline Frederick, featured in "Lydia Gilmore," at The Olympic, March 3.

Saturday evening, was a splendid five-act newspaper story. The parts were well acted, especially that of the "boss." The photography was good, even if the subjects, machinery in motion in many cases, were difficult to reproduce accurately. The film gives a good insight into the many steps in the production of a modern metropolitan paper. The plant of the Chicago Herald was the setting for these pictures.

"A Bit of Lace.—The situations in this three-reel drama call for quiet, forceful acting, and the demand is met in a highly satisfactory manner by Darwin Karr, Edna Mayo and Sydney Aainsworth. The subject offers strong dramatic possibilities, and has been fashioned into a photoplay without being incumbered by any extraneous characters or incidents. The settings

Robert Alley, of Hale Center, was in Plainview on business yesterday.

WE desire to thank all those who have given us their patronage the past month and to ask a continuance of their trade as well as that of other friends, during the coming month.

(Re-election.)  
R. B. (BOB) TUDOR.

**For City Marshal and Tax Collector:**  
JOHN VAUGHN.  
(Re-election.)

**KANSAS CITY STOCK MARKET IN DETAIL.**

**KANSAS CITY STOCK YARDS, Feb. 25.**—Beef steers sold 25 to 40 cents higher this week, closing today at the high spot. Stockers and feeders gained even more, cows and heifers not quite as much, but all kinds of cattle are selling better than any time since the first of the year previous to this week. No very high-class steers have been here this week, top for the week \$8.65, but the fair to good fed steers are now bringing around \$8.00, anything with a degree of good finish at \$8.35 and upwards. Seven loads of Idaho fed steers came in today, and sold quickly at the highest level of the winter, \$7.70 to \$8.15, for steers weighing 975 to 1,230 pounds. Meal-and-corn-fed Oklahoma steers sold at \$7.90 to \$8.10 early this week, which might sell for 25 cents more now.

Cows and butcher cattle are finding ready outlet, best cows up to \$7.00, heifers up to \$8.50, bulk of the fair to good cows around \$6.00, most of the heifers around \$7.25, one lot of mixed cows, heifers and steers from Nebraska this week reaching \$8.30. Best heavy bulls sold at up to \$6.65, carloads of Westerns at \$6.20 to \$6.40, those at the former price not very choice quality or finish. Best veals bring \$11.00.

Stockers and feeders are having a boom, fancy White Face steers at up to \$8.35, some of them resold at \$8.50 and \$8.60, bulk of the stockers at \$7.00 to \$7.75, feeders \$7.50 to \$7.90. The yards are well cleared of stock stuff, and some very high prices are expected next week, fancy-bred yearlings possibly up to \$9.00, it is predicted. Mild weather and the strength killing cattle are showing have combined to inaugurate the furor about stockers and stock she stuff, and the somewhat milder stimulation of the feeder market.

Hogs reached \$8.40 Wednesday, but have dropped back a little since, top today \$8.35, bulk of sales \$7.90 to \$8.15. No choice heavy hogs are here today, else both top and bulk of sales would have run a nickel higher than they did, nearly everything highly mixed stock. Order buyers are getting more hogs than any time before this year, due to small receipts at Eastern markets. They bought nearly 25 per cent of the supply here this week. Provision trade continues favorable, and receipts of hogs at the markets are slightly less than heretofore, a good combination for sellers.

Sheep and lambs are holding up about steady, but not without opposition from buyers. Prices were stronger today, although quality was lacking, the top, \$10.85, paid for some 86-pound Kansas-fed lambs, indicating that \$11.00 would be the price today for choice medium-weight lambs. Yearlings are worth up to \$10.00, ewes \$7.25 to \$7.75, a few common ewes at

\$6.70 yesterday, feeding lambs this week up to \$10.25. Prospects favor a good run next week, and nothing better than a steady market is expected.

J. A. RICKART,  
Market Correspondent.

**Styles change in Visiting Cards**  
Are yours of the approved size and letter? Our Engraved Cards come from the best copper plate engravers. Call 72. —Adv. 1t.

**Cures Old Sores, Other Remedies Won't Cure.**  
The worst cases, no matter of how long standing, are cured by the wonderful, old reliable Dr. Porter's Antiseptic Healing Oil. It relieves pain and heals at the same time. 25c, 50c, \$1.00.

**EVER SALVATED BY CALOMEL? HORRIBLE!**

Calomel is Quicksilver and Acts Like Dynamite on Your Liver.

Calomel loses you a day! You know what calomel is. It's mercury; quicksilver. Calomel is dangerous. It crashes into sour bile like dynamite, cramping and sickening you. Calomel attacks the bones, and should never be put into your system.

When you feel bilious, sluggish, constipated and all knocked out and believe you need a dose of dangerous calomel, just remember that your druggist sells for 50 cents a large bottle of perfectly harmless and doesn't gripe. Dodson's Liver Tone, which is entirely vegetable and pleasant to take and is a perfect substitute for calomel. It is guaranteed to start your liver without stirring up your inside, and can no salivate.

Don't take calomel! It makes you sick the next day; it loses you a day's work. Dodson's Liver Tone straightens you right up and you feel great. Give it to the children, because it is perfectly harmless and doesn't gripe.

**IMPORTANCE OF HEALTHY KIDNEYS.**

Plainview Readers Should Learn to Keep the Kidneys Well.

The kidneys have a big work to do. All the blood in the body is coursing through the kidneys constantly to be freed of poisonous matter. It is a heavy enough task when the kidneys are well, but a cold, chill, fever or some thoughtless exposure is likely to irritate, inflame and congest the kidneys and interrupt the purifying work. Then the aching frequently begins, and is often accompanied by some irregularity of the urine—too frequent passages, sediment or retention. Thousands testify to the wonderful merit of Doan's Kidney Pills, a rem-

edy for the kidneys only, that has been used for kidney troubles 50 years. You will make no mistake in following this advice. It comes from a resident of this locality:  
Mrs. S. G. Mitchell, Tullia, Texas, says: "One of my family was afflicted with a lame back that made it almost impossible for him to attend to his work. Doan's Kidney Pills cured him, although other medicines had failed."  
Price 50c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Mitchell recommends. Foster-Milburn Co., Props., Buffalo, N. Y. —Adv.

**Invigorating to the Pale and Sickly**  
The Old Standard general strengthening tonic, GROVE'S TASTELESS CHILL TONIC, drives out malaria, enriches the blood, builds up the system. A true Tonic. For adults and children. 50c.

# Public Sale

On Court House Square, Plainview, Texas  
**MONDAY, MARCH 6th**  
Commencing at one o'clock sharp.

1 medium work mule, weight about 1000.	1 Success sulky plow, good condition.
2 large work mules, weight about 2400.	1 3 1-4 Milburn wagon, new.
1 large work horse, weight about 1350.	1 disc harrow.
1 fine mare mule colt.	2 one row go-devils.
3 fresh Jersey cows.	3 cultivators.
3 good Jersey cows to be fresh soon.	1 P. & O. lister.
1 three stroke Admiral hay press.	1 superior grain drill.
2 Deering mowers.	1 section or drag harrow.
1 buck rake.	6 sets work harness.
1 sulky rake, almost new.	1 Milwaukee row binder, almost new.
	1 buggy and harness.
	A big and complete line of good household furniture.

**TERMS:**—All sums of \$10.00 and under, cash. All sums above this amount 8 months time will be given at 10 per cent interest on good bankable paper.

Anyone having anything for sale please bring it in and include it in this sale

**Col. E. J. Christopherson, Auctioneer, of Plainview**

#### When to Prune Ornamental Trees

WASHINGTON, D. C., Feb. 29.—A little early care given to the pruning of ornamental trees and shrubs during the early part of March will do much to control their growing and flowering habits, and enable the home owner to have well former plants and well trained hedges or boundary plantings. The pruning of ornamental trees and shrubs is, in fact, one of the first duties that may profitably be performed in the home garden. The amateur, however, should not make a ruthless assault with shears or pruning knife upon everything in his yard. Flowering trees and shrubs that bloom in the spring or early summer should not receive radical pruning at this time, according to the garden specialists of the United States Department of Agriculture. Of course, if on these plants there are dead or weak branches, these should be taken out, and any crossing limbs that are rubbing and seriously interfering with the growth of the bush should be removed. The tips of the limbs, however, should not be cut off nor should any young wood that does not interfere with the growth of the bush be removed. It must be borne in mind that the blossom buds for this year's flowering were formed last year, and every shoot removed takes off that much of the prospective blossoms.

Trees and shrubs that bear their flowers in midsummer and which were not pruned in the fall may be pruned

at this time. Plants of this sort are the Rose of Sharon and the shrubby hydrangea. Where the largest possible mass effect is desired, these plants should be pruned but little. If the aim is to secure the largest possible trusses or blossom heads, last year's growth should be pruned back to two or three eyes to a stem. Such severe pruning, however, is not conducive to the most attractive development of shrubs.

Climbing roses should not be pruned at this time except for the removal of surplus or interfering branches. Every bit of wood removed now reduces the amount of bloom the plant will bear during the coming season. Roses used in border planting should be treated in exactly the same way as other shrubs, except that many of these species will be improved by having all their old wood cut away once in every five or six years. This would mean cutting all the old canes off within three or four inches of the ground and forcing the bush to throw up entirely new wood.

Roses used for cut flowers, like the hybrid perpetuals, the hybrid teas, and teas, should be severely pruned. The hybrid perpetuals may be cut as soon as freezing weather is past. Pruning of the hybrid teas and teas, however, should be left until the young growth has started. In both cases the plant should be cut to within six inches or one foot of the ground. Four or six eyes to a stem is about the proper amount of wood to leave.

#### "DOC" HENRY, PICTURESQUE U. OF T. CHARACTER, DEAD.

For Twenty Years Negro Faithfully Helped Train Teams for State University.

"Doc" Henry Reeves is no more. Calm and serene to the end—as in life, so in death—he passed into the great beyond Saturday morning at 8:10 o'clock. Faithful and trusting, with that stoicism possessed by only a few of his race, he came to his death couch with the implicit consciousness that all is well so long as the guiding hand of the Great Father foreshadows one's troubled path.

The old negro had been in a stupor for more than four days, and the end had been expected by the attending physicians, even though they held out to the last in the hope that the patient would pull through. The third attack was too severe, and when the old trainer's left side became entirely paralyzed, he was forced to await the end, knowing at on time any of his friends who called to see him in his hour of affliction.

Henry was born at West Harper, near Murfreesboro, Tenn., April 12, 1871. When he was 23 years old he came from Tennessee to Austin and settled here. After several years' work with Austin families, Henry was employed by the Athletic Association of the University of Texas, where he was employed for the past twenty years.

During Henry's service at the University he was absent at but two football games. He accompanied the Longhorns when they invaded the North and were trounced by Vanderbilt and Chicago. He was the greatest enthusiast affiliated with the great team of 1900, and for the past five seasons there has been no more faithful supporter than was Henry.

Henry was a member of the First Baptist Church, a Mason and an Odd Fellow. From each of the latter organizations Henry's wife, he having no children, will receive \$75, in addition to \$500 life insurance. There is \$175 still left in the treasury of the Athletic Association resulting from the collection at the Thanksgiving game, which will be given to Henry's widow. Henry owned his little cottage on Twenty-ninth Street, and Mary, his bereaved helpmeet, will be in no embarrassed condition as a result of her husband's death.

The funeral of the favorite trainer will be held today from the residence, and burial will be made in Bethel Cemetery, east of the city.—Daily Texan.

White Lights Are Satan's Specialty, Walter Williams Declares.

"Christ was a master of the art of advertising. John proved himself a great editor, and there is no better reporter than Luke," said Walter Williams, dean of the School of Journalism of the University of Missouri, when addressing a Sunday School convention in St. Louis recently.

"Even Christ's last words were not for silence, but for Christian publicity," said Dean Williams. "Whenever a church has kept the good news of the Gospel to itself it has died. When it has given this news out it has conquered."

"When Kitchener wanted a million men he advertised in the newspapers. When the church wants a million strong men to aid its cause it rings a bell for five minutes on Sunday."

"Luke, with his vivid phrases, wrote the greatest report in the world—the story of Christ. John proved himself the best editor, for he freely used the blue pencil, stating, 'If I wished I could fill many volumes.'"

"Even the devil advertises," declared Dean Williams, "his specialty being white lights."

#### Planting Crops for the Silo

There are many crops that may be saved by putting them in the silo. But the best silage crops are corn, kafir, milo, feterita and sweet sorghum. The best of these is the crop that produces the largest tonnage of nutrients when ensiled. On some farm this will be corn; on others it will be one of the sorghums.

In the humid region where corn is comparatively safe and where the land produces well corn is the best crop. Because of its heavy yield of stalk and grain, it stands at the head of the list of silage crops. It cures well when cut in the proper stage, contains grain as well as succulent stalk and is relished by livestock. Those who have land that will produce good corn need no better crop for the silo.

Where the rainfall is rather light, winds detrimental, such as certain localities of the West, one of the sorghums—saccharine sorghum, kafir, milo or feterita—will be better than corn to fill the silo. One of these last-mentioned crops would be better in this case because they produce more and are surer.

One thing should be remembered when crops are being considered for the silo. It is not necessary for the crop to reach full maturity in order that it may be ensiled. For instance, there are certain localities where summer droughts may be disastrous to corn when it is grown for grain, but where it could be ripened sufficiently for the silo before the drought rained it. It is a well known fact that two or three weeks make a great difference in corn growing. There are also localities where June corn or late-planted sorghums would be comparatively certain for silage, but which might not have sufficient time to mature grain.

The Illinois station found that thick sowing of corn was better where the crop was to be ensiled than sowing at the usual distance for grain. The conclusion was reached that the crop should be sown thick enough to choke the plants down to where the ears were but about one-half their normal size. This was found under Illinois conditions when there was about 10,000 plants per acre or when the plants were about seven inches apart in three and one-half feet rows. Under such conditions it will require from seven to nine quarts of seed per acre, but it is safer to plant at least 11 quarts, as one cannot afford to plant too sparingly and lose a stand.

Preparation of the land for silage corn is not different from that given corn to be used for grain. Ample plowing and harrowing should not be neglected. A mellow, friable soil will be required for quick germination and rapid growth. Sowing may be done with the ordinary one-row planter or even the two row planter. The ordinary 11-hoe grain drill may be used by closing all but two hoes; this will plant two rows at a time 42 inches apart.

Cultivation should be frequent. The same kind of cultivation that is given the corn for grain will suffice. But silage corn being thicker in the row will

permit the frequent use of the weeder or the harrow across the rows, should weeds be very persistent. The weeds should be kept down and the moisture conserved. Cultivation should be continued till the corn is about ready to harvest. The plants will need moisture and plant food and there is nothing that will take the place of cultivation.

Practical farmers recognize the stage at which corn had best be cut for silage. In the days of "fodder pulling" the best time was as soon as the ears reached the glazed or dented stage or rough stage. This is the stage for silage. The grain is then in excellent condition to cure with little loss in feeding value and the stalks and blades of the corn contain their greatest amount of feeding constituents. If cut a little too green the silage may be sour, acid and lose something in feeding value. Perhaps it would be better to wait a little later to cut than cut too soon, for if the corn should be a little over-ripe there would be less than if cut a little too soon.

The same precaution would apply to the sorghum crop. The grain should be ripe and the stalks mature to avoid sour silage. Usually the sorghums do not "fire" as quickly as corn, consequently there is less danger in cutting too soon.

The same plan of cultivating the land for sorghum grain will apply when the crop is cultivated for silage. Thick planting is also recommended for the sorghums.

One can very well arrive at a conclusion as to the acreage in corn or sorghum needed to fill the silo. The size of the silo will depend upon the number and kind of animals and the length of time they are to be fed. Silo manufacturers have tables giving the dimensions of silos, the number of tons they will hold, the number of animals they will feed for a given time and the number of acres required ordinarily to fill the silo. Corn may be expected to yield from eight to twenty tons of silage per acre. This is rather a wide range. We may safely estimate the yield at from eight to fifteen tons or from ten to twelve under fair conditions of corn growing in the Southwest.

#### FROST PROOF CABBAGE PLANTS

Only 30c per 100 delivered to your postoffice.

C. E. WHITE SEED CO. Plainview, Texas

State of Ohio, City of Toledo, Lucas County, ss. Frank J. Cheney makes oath that he is a partner of the firm of F. J. Cheney & Co., doing business in the City of Toledo, County and State aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every case of Catarrh that cannot be cured by the use of Hall's Catarrh Cure.

FRANK J. CHENEY, Notary Public.

Sworn to before me and subscribed in my presence, this 6th day of December, A. D. 1886.

A. W. GLEASON, Notary Public.

Hall's Catarrh Cure is taken internally and acts directly upon the blood and mucous surfaces of the system. Send for testimonials, free.

F. J. CHENEY & CO., Toledo, O. Sold by all Druggists, 75c. Take Hall's Family Pills for constipation.

#### Mr. Farmer:

Would you be willing to spend one dollar and fifty cents to save five, ten, twenty or even fifty? One dollar and fifty cents, the price of The Herald for one year, will bring into your home twice each week carefully prepared articles by experts on live stock, soils, irrigation, fruit growing, poultry culture and every phase of general farming. Knowledge of these subjects means dollars and cents added to your bank account.

Then don't overlook the fact that each week Plainview merchants will tell you of money saving bargains through the columns of The Herald.

Then too it must make you proud of your home paper to know that it is one of the largest country papers, not a daily, in Texas, Oklahoma or New Mexico and that it is chock full of news. And we will make it better and bigger yet if you will encourage us and tell your neighbor to do so.

Think over the fact that you will get not less than 850 pages for your dollar fifty. Ask us for a sample copy
