FACULTIES OF COLLEGE AND PUBLIC SCHOOLS ENTERTAINED

BANQUET GIVEN BY KIWANIS AND ROTARY CLUBS IS HAPPY AFFAIR

One of the largest attended banquets ever held in Plainview was that held in the Wayland dining room Wednesday night, when the Kiwanis and Rotary clubs entertained the members of the faculties and boards of trustees of the public schools and Wayland college. The delegates from Las Vegas and other New Mexico towns, who were en route to the F-F-F highway convention at Floydada were also guests.

Dr. Hubert E. Bullock of the Presbyterian church asked divine blessings.

During the dinner attendance prizes were drawn for the winners being Miss Jessie Fiske, Miss Minnie Hester Watts, W. P. Clemons, Miss Daisy Dean Ramsell, R. R. Devine of Las Vegas, J. M. Malone and B. O. Cloud. W. C. Mathes, Jr., presided as toastmaster, and by his eloquence, humor and poetry and happy manner contributed greatly in making the affair such a success.

Dr. Atwood, president of Wayland college, was called upon to introduce the members of his faculty, which he did, each one standing as he or she was called. Principal R. B. Sparks introduced the high school faculty, Principal Matthews introduced the Central school faculty, and Principal Paul Morgan of Lamar school introduced the members of his faculty. Following the New Mexico visitors were introduced. During the introductions Mrs. A. A. Beery played a violin solo, accompanied by Mrs. Guy Gibbs, and responded to an encore. Prof. B. M. Sims of Wayland also sang and responded to an encore.

Dr. Atwood delivered an interesting and instructive address on the worth of Wayland college to Plainview, stating that he had been at the head of the college for two years. He stated that the property is worth between \$250,000 and \$300,000, and the 300 students bring into Plainview \$100,000 annually. He said that the college is one of the fifteen correlated schools operated under the Baptist general convention of the state, and is a junior school of Class A standing, and hopes soon to be given Class A plus. He dwelt upon the importance of the junior college, which gives the first two years of university work, thus keeping the young student at home and in a college where more consideration is given him. He declared that Wayland college stands for Christian education and Christian citizenship and the best there is in life, and has a strategic position in the Panhandle-Plains country.

Prof. Sparks of the high school spoke on "Public Education," and said Plainview has one of the best schools in Northwest Texas. Plainview high school is like a college and among those enrolled are students from Kansas, New Mexico, Wisconsin and Arkansas. Plainview high sets the pace for the other schools. He stated that the high school enrollment the first day was 360 of which 160 are in the eighth grade. Lamar has an enrollment of 350 and Central will have about 500.

Miss Alba Ray Smith, expression teacher in Wayland college, delighted the audience with two readings.

C. S. Williams, chairman of the public school board of trustees, delivered an address on "Public Schools and Citizenship," and took occasion to plead for a law prohibiting the immigration of any races except the whites of Northern Europe into this country, in order to continue the dominance of a pure white blooded race. He said our public schools should be raised to the proper high standard and all children should be made to attend them regularly. He landed the public schools as teaching democracy to children and said parochial schools should be prohibited as they teach children to be clannish, aristocratic and self-centered. He pleaded for "a public school for every child and every child within the public schools," where they can be taught democracy and Americanism.

Rev. Harlan J. Matthews spoke on "The College as a Town Builder," and said teachers are producers of the things that are worth while—of intellectual and moral worth. He spoke of Wayland college being a town builder and a great asset to the town.

Miss Jaunita Smith of the high school sang two selections, accompanied by Mrs. Ruth Francis, also of the high school.

Mr. Donald Stewart of Las Vegas, spoke in a happy way of the pleasure of being in Plainview and at the banquet, complimented the Plains, the town and its superb citizenship, and commented on the beauty of the Plainview women.

Judge H. C. Randolph was the last to speak, and he said that every body vote for the bond issue, on the following day, to W. F. Onstead, Texas.

HALE COUNTY OIL WELL NOW DOWN 400 FEET

Water Cased Off to Save Caving. Comes Within 30 Feet of Top of Top

The drilling on the Bledsoe oil test well four and a half miles west of Abernathy, continues, and the drill is now about four hundred feet deep. The log of the well seems to be satisfactory to Mr. Bledsoe, and he hopes to find paying oil or gas at not to exceed 1,700 feet.

A great flow of water was encountered this week, and the drill had to be stopped and the well shut down so as to case off the water to keep the well from caving in. The water rose to within thirty feet of the top of the top of the ground, and it looked for awhile like it would flow out the top.

Auditorium Bonds Carry By Vote of 240 to 84

In the election held in Plainview yesterday the proposition to issue \$60,000 in bonds with which to erect a public auditorium, was adopted by the people, the vote being 240 to 84, practically three to one.

The adoption of the proposition by so large a majority is gratifying to the committee from the various clubs of the town, which promoted the election, and means much to the future growth of the city.

The auditorium will be built of brick, concrete, steel and glass, and be modern in every way. It will have a large stage, be well seated and have a heating plant. The location for the structure has not as yet been decided upon, but the committee will urge the city council, under whose direction it will be built, to purchase lots close in. The building will seat more than 2,000 people.

Plainview has long needed such a building, and the need is growing as the town increases in population. There are many conventions, shows, entertainments, and other meetings in the course of a year that more than any building in the town to care for them.

JUDGE RANDOLPH APPOINTED ON APPEALS COMMISSION

GOV. NEFF NAMES PLAINVIEW LAWYER ONE OF SIX MEMBERS

Judge H. C. Randolph this morning received the following telegram from Gov. Neff, appointing him as member of the commission of appeals for the state supreme court:

"Austin, Texas, Sept. 15.—Judge H. C. Randolph, Plainview Texas. On your worth as a man, your attainments as a scholar and your ripe experience as a lawyer, I have to name you as one of the judges of the commission of appeals, and trust you can see your way clear to accept this place of service.—Pat Neff, Governor."

The commission of appeals is made up of six auxiliary judges, whose duties are to assist the supreme court in disposing of the cases on its docket, which is now overcrowded. The commission goes over the cases, hears the arguments, considers the briefs, etc., and makes up its findings, after which the case is submitted to the state supreme court, which after reviewing the same it makes the decision of the court. It is a very high judicial position, and pays \$5,000 salary per year.

Judge Randolph will accept the appointment, and will move to Austin at once, as his duties begin the first Monday in October. His wife and son will go with him, as the son is a second year student in the State University.

He will continue his legal home in Plainview and return here when his term of office expires.

The appointment is especially gratifying to the editor of the News, who has known Judge Randolph for more than twenty-five years. He is a very able lawyer, and stands for right and justice in everything. He has been a member of the first graduating class in the law class in the State University, and among his class-mates were Judge Gregory, Albert Sidney Burleson and other prominent men.

The Judge asks us to express his appreciation to the newspapers of the west Texas for their support of his candidacy for the appointment.

Plainview, and of the good work they are doing in the building of a town here. He declared "The man who is not a local patriot is not a patriot in the full sense of the word." The Judge dwelt upon the importance of Plainview having a municipal auditorium and that everybody vote for the bond issue, on the following day, to W. F. Onstead, Texas.

FALL LIVE STOCK EXPOSITION, AGRICULTURAL FAIR AND FLOWER SHOW

Will Be Held in Plainview Sept. 27th, 28th, 29th—Hogs and Dairy Cattle Featured—Get Premium List

The Fall Livestock Exposition, Agricultural Fair and Flower show to be held in Plainview Sept. 27, 28 and 29, promises to bring together a large number of fine animals, superb farm products and pretty flowers, also it will be attended by large crowds from over the Plains, who will come to attend the shows and amusements.

The catalogues for the exposition and flower show are now ready for distribution, and copies can be had by calling upon or address Capt. Winfield Holbrook, secretary. The entry blanks are also ready for prospective exhibitors.

The headliners will be the district futurity show held under the direction of the National Duroc-Jersey Record association of Peoria, Ill., in which very high premiums are offered. The Poland-China show will also be a notable one. Other breeds will also be exhibited.

There will be an interesting show of dairy cattle, and this show is held to promote the dairying business on the Plains.

NEGRO SHOOTIST GETS TWO YEARS IN PENITENTIARY

INSTRUCTED JURY VERDICT OF NOT GUILTY IN GRIFFIN CASE

Mack Hudson, "a gen'man ob color" will spend two years in the penitentiary of the state for shooting Guy Barnett, another colored citizen, twice with a pistol Saturday afternoon, in a jealous rage when a certain colored lady in which Mack is interested was found with several other negroes in a house in the Slaggs yard, when Mack has forbidden her to associate with the bunch. Mack could get no attorney to defend him, and yesterday in district court, his case was called, his only defense being in his own words, "Yes, sar; Ise guilty, but I done it in self-defense." Another case of attempt to murder is pending against Mack, charging him with having fired two shots at one of the women who were in the house as she ran out of doors for her life.

In the case of L. D. Griffin, county judge of Hale county, charged with embezzlement, the court after hearing evidence ordered the jury to return an instructed verdict of not guilty, which it did. The grand jury several days ago returned an indictment against Judge Griffin, the charge being that, according to an order on the minutes of the county board of education, appropriating \$75 a month for an assistant to help the judge in his office work and caring for the uniform textbooks for the schools of the county, the charge being that instead of paying a young lady employed by him the full \$75 a month, he paid her \$25, and kept the rest. In the trial of the case, so court officials inform us, the members of the county board swore that the \$75 was appropriated to the judge solely for any help he might employ, and the matter of how much he was to pay said assistant was within his discretion solely, just so he handled the business in the proper manner; that the board had no dealings in the matter with anybody except the Judge himself; that he had before the appropriation was ordered for three months been paying out of his own pocket the salary of an assistant and also for drayage and other expenses of receiving, handling and sending out of the books, and the appropriation was to reimburse him for that and future help he should get. The young lady contended that as per the order she should receive the full amount of \$75 a month; the Judge stated that his agreement was to pay her while inexperienced \$25 a month and increase same \$5 a month until she got reasonable salary.

Bur's Floydada Drug Store J. O. Wyckoff of the O. K. Drug Store of this city has bought the stock and business of the Floydada Drug Store in Floydada, and will continue the business there under the name of the O. K. Drug Store.

Prior to the sneaking the Chamber of Commerce held a business meeting with President A. E. Boyd, presiding. A committee composed of Burke Mathes, John Boswell, C. A. Pierce, was appointed to look after matters connected with the installation in Plainview of a business building.

Col. R. F. Smyth was elected as official delegate to the F-F-F highway

In the agricultural department a fine showing of farm, orchard and garden products is promised, and the farmers are urged to save and exhibit their very best products.

A thing of beauty will be the flower show, and the women are urging that the people save their flowers and bring them in on the morning of the 28th, so as to have a very creditable display. Bring them to the Plainview Undertaking building, where the flower show will be held. The dahlia show will be held on the 28th, the second day, and will be under the auspices of the City Federation of Women's clubs. It will be open only to clubs of the county, and not to individuals. The president of clubs will have charge of its display of dahlias. Good prizes are offered for the best displays.

The Santa Fe railroad has granted excursion rates to the fair.

Thomas A. Shattuck of Hastings, Neb., has been engaged to judge the hogs at the show, and will do so on the second day. He is a very eminent hog man, and his services are used at many of the state fairs.

SENATORIAL CANDIDATE SPEAKS IN PLAINVIEW

CONGRESSMAN PARRISH FAVORS REDUCTION OF FREIGHT RATES AND TAXES

Congressman Lucien Parrish of Nevada, candidate for U. S. senator to succeed Senator Chas. Culbertson, spoke to a large crowd that filled the county court room at the meeting of the Chamber of Commerce Tuesday night, and was given liberal applause several times.

Mr. Parrish was introduced by C. S. Williams, who was a fellow-student with him in the State University, and is a supporter of him for senator. Mr. Williams declared Senator Culbertson should be retired, as he was physically incapable of performing the duties of the high position.

Mr. Parrish stated that he favors a reduction of freight rates, as the present high rates are a handicap to commerce and agriculture. He also favors a reduction of taxes, and a general readjustment, as the present taxes were adopted at a time when the country was facing the German armies and had to construct laws to get money with which to wage the war, hence could not be expected to be just in every way. New conditions have since arisen, and the tax laws should now be simplified to bear justly on everybody and promote operation of business. He stated that the great outstanding issue now is the reduction of governmental expenses, and that government be put on an efficient basis. He said that the high rate of American money in foreign exchange is ruining American trade with foreign nations, and must be adjusted at once, in fact a meeting of the nations is soon to be held in Washington to thresh out the matter.

Mr. Parrish declared that the money situation in the East is loosening up and will gradually spread to this section in six or eight months. As there are nearly six million people out of employment in this country now, he favors closing the gates against all immigration. He declared in favor of disarmament, and hopes for something to be done at the coming convention of nations to meet in Washington Nov. 11. At present 92c out of every dollar American pay in federal taxes is used for war purposes.

He lambasted the republicans for their failure to redeem its campaign promises, and do anything for the relief of the country.

Representative Burke Mathes followed him with a few remarks in criticism of the governor and East Texas legislators for the failure of the West Texas A. & M. bill and the appropriation of \$175,000 for the Nacogdoches normal.

Prior to the sneaking the Chamber of Commerce held a business meeting with President A. E. Boyd, presiding. A committee composed of Burke Mathes, John Boswell, C. A. Pierce, was appointed to look after matters connected with the installation in Plainview of a business building.

Col. R. F. Smyth was elected as official delegate to the F-F-F highway

County School Land is Leased for Five Years

The commissioners' court in session the fore part of the week entered into a contract with John L. and E. W. Wilson, whereby it leases to them certain Hale county school lands in Bailey county, 9,741 acres, being leagues of 168 and 169 and the south five labors of league 170, and is for five years.

The county is to receive \$4,950.80 payable \$521.63 in cash; \$487.05 on January 1, 1922, and each six months that amount until the full amount is paid. The Wilsons also contract to kill all the prairie dogs on the land, and to drill a well to water at a cost not to exceed \$100 to the county.

The money derived from the lease goes into the Hale county available school funds, and will be apportioned out to the schools on the per capita basis.

DISTRICT MEDICAL SOCIETY HERE TWO DAYS NEXT WEEK

MANY PROMINENT DOCTORS WILL TAKE PART IN THE DISCUSSIONS

The Panhandle District Medical Society will hold a convention in Plainview Tuesday and Wednesday of next week, and members from all over Northwest Texas will be in attendance also several prominent physicians from elsewhere, including Dr. T. J. Bennett of Austin, president of the State Medical Society.

Tuesday evening at 8 o'clock at the Methodist church an open meeting will be held, to which the public is invited, and Dr. J. J. Terrill of Dallas will deliver an address on "Mental Hygiene." Dr. Bennett will also speak on that occasion.

Tuesday afternoon at 2 o'clock at the Wayland hotel a banquet will be tendered the visitors. There will also be other entertainment extended. The program includes business sessions each day as follows:

Tuesday, Sept. 20, 1921, 10 a. m.: House called to order by President Dr. J. T. Hutchinson of Lubbock. Invocation—Rev. J. W. Israel. Address of Welcome on behalf of Hale County Medical Society by—President Dr. S. J. Underwood, Hale Center. Address of Welcome on Behalf of Citizens of Plainview.—R. A. Underwood.

Secretary—Burke Mathes, Plainview.

Amateur's Address.—Dr. R. E. McDaniel, Quanah.

Secretary—Burke Mathes, Plainview.

WILL MARK, LOG AND ADVERTISE F-F-F HIGHWAY

WILL BE MADE POPULAR ROUTE TO MOUNTAINS AND PACIFIC COAST

The F-F-F highway will be made the best and most popular, as well as shortest, route from Central and North Texas to the mountains of New Mexico and Colorado, and to the Pacific coast. It is already well improved except along a few stretches, and these will be put in first-class condition. It will be logged, mapped, and advertised throughout the entire nation. All of this was decided upon at the convention which was held in Floydada yesterday and today, with more than two hundred delegates present, the following towns being represented: Fort Worth, Weatherford, Mineral Wells, Crowell, Matador, Floydada, Lockney, Plainview, Otton, Clovis, Ft. Sumner, Santa Rosa and Las Vegas. It was also decided to sectionize the highway into three parts, New Mexico, Panhandle and Eastern. Each section handling the affairs within its boundaries and reporting to the general officers.

A contract was made with the Texas Automobile Club to log, map and mark and advertise the entire route from Fort Worth to Las Vegas. The work will begin at once, and it will be so well marked that there will not be a stretch anywhere that a F-F-F sign cannot be seen. It is to put the log in the official guide of every automobile association in the United States, and give much publicity in log books, newspapers and periodicals of many kinds. The Texas Automobile club is patterned after the California club, and is not a money-making organization. Burtis B. Hancock, former chairman of the state highway commission, and H. B. Samman, business manager, represented the club at the convention, and they will personally supervise the logging, etc., of the route.

The following officers were re-elected unanimously for the ensuing year: Ford Shock, Fort Worth, president; E. H. Perry, Plainview, first vice president; R. J. Taupert, second vice president; D. W. Jones, Clovis, secretary and treasurer; and John Boswell, Plainview, publicity director. C. W. Wilson of Mineral Wells and C. J. De Olivera of Santa Rosa, were added to the directory of seven.

The next meeting will be a business meeting and will be held the third Monday and Tuesday in April at Crowell and the next regular annual meeting will be held sometime in July at Las Vegas. Invitations have been extended to the Governor of New Mexico, the Governor of Texas and Capt. Fauntleroy of the Federal Highway Commission to be present at this meeting and everyone along the highway are invited to attend as it will be a get together meeting, as well as for business.

Last night the Chamber of Commerce of Floydada gave a banquet to the visitors, the affair being held in the basement of the handsome new Methodist church, covers being laid for about 250 persons. The women of the church and the Mothers' club prepared and served the dinner, which was well appointed in every way. The basement was decorated with flags, bunting and flowers, and there was a unique menu with a panoramic picture of the town of Floydada. As the dinner proceeded with E. C. Nelson as toastmaster there were addresses by Ford Shock of Fort Worth, C. W. Wilson of Mineral Wells, Mr. Reed of Lockney, R. J. Taupert of Las Vegas, John Boswell of Plainview, Donald Stewart of Las Vegas, R. E. Frye of Floydada, D. W. Jones of Clovis, Curtis P. Hancock and Harry Samman of Dallas, Homer Steen and Judge Her of Floydada, Geo. D. Selman of Childress, Judge Glenn of Matador, E. H. Perry, R. P. Smyth and J. M. Adams of Plainview, Mrs. Jones of Clovis, Superintendent Anton of the Santa Fe railroad, Mr. Trowbridge of Floydada.

Today at noon in the beautiful Blanco canyon, six miles south of Floydada, the Chamber of Commerce of Lockney entertained the delegates with a mutton barbecue, which also included the fixings and feed meats, and Schiffs drinks.

May Metall Jewelry Store

Harris Hill of Sweetwater is here prospecting with a view of opening a jewelry store in Plainview; if he can find suitable quarters, he will do so. He has been with the people having yesterday's musical-auditorium, and says it shows great enterprise.

Central Will Open Monday

COLLEGE OF INDUSTRIAL ARTS
State College for Women
DENTON, TEXAS

The College of Industrial Arts offers the following advantages to Texas girls: (1) a pleasant, healthful, and accessible location in the State of Texas, (2) an unimpeachable moral and religious environment, (3) freedom from distracting internal and external influences which tend to lower the moral of the student body and the value of the work of the college, (4) a standard of living that discourages extravagance, and promotes a democratic spirit in keeping with sound economy and with the best American traditions, (5) courses of study that combine sound culture and accomplishment with preparation for practical, useful living; that chiefly keep in view the needs of the present and the future; and that are flexible enough to allow, within safe limits, conformity with the aptitudes and inclinations of the individual student, (6) a faculty of college and university trained specialists—men and women of maturity, scholarship and demonstrated teaching ability, (7) an administrative system that develops initiative, resourcefulness, and self-control on the part of its students, and fosters the highest ideals of character and conduct.

It is a college of the first-class and gives literary, technical, and vocational training of the best quality, designed to develop mental discipline, social culture, spiritual vision, and efficiency. It confers the degrees of bachelor of arts, bachelor of science, bachelor of music, bachelor of business administration, and bachelor of literary interpretation; awards vocational diplomas and certificates, and issues teachers' state certificates.

The next session of the college opens Tuesday, September 20, 1921. For further information or for the latest catalogue, address F. M. BRALLEY, LL. D., President College of Industrial Arts, Denton, Texas

FILLING THE NATION'S SUGAR BOWL

(By R. P. Crawford)

It's a big job, this filling the great American Sugar Bowl. Year by year America's sweet tooth has been growing bigger and bigger until, just before the war restrictions were imposed, every individual in the United States was eating approximately 84 pounds of sugar a year, or about one-third as much sugar as potatoes or flour. One century ago an individual got along with just about one-tenth as much sugar. Some times, as during the sugar boom of a year or so ago, the far seas are combed for sugar with which to supply out sweet tooth.

It's a great romance, this filling the American Sugar Bowl. There is probably no more enticing business romance anywhere than the story of how in about 25 years America's production of beet sugar increased 50 times. There is scarcely a greater plant romance than the story of the mysterious processes by which the sugar beet plant put carbon dioxide and water together and produce sugar. There is no greater scientific romance than the work of the world's scientists have done in tripling the sugar content of these same beets. There is no greater factory romance than the very complicated means by which these same beets are turned into sugar.

It's full of great possibilities, this filling the American Sugar Bowl. We seem to be still in the very infancy of beet-sugar making, and apparently there is no kind of agriculture that is so filled with great potentialities. Although it was not generally heralded, and although its promoters did not receive war decorations for so doing, the development of sugar beet seed growing in this country was one of the agricultural triumphs of the war. It sounds simple enough, but it is one of the most complicated kinds of seed production in the world.

But since we all eat sugar, let us take a look at this sugar business. I know Mrs. Housewife is going to ask a lot of questions before I get through too. "She has a sort of feeling that she got badly duped in this sugar business a year or so ago, when the price went kiting. Then just as soon as she got her preserving done, down came the price of sugar. Mrs. Housewife informs me that it looked like there was plenty of sugar all along and that the price was simply put up. Well, the speculators got their fingers burned good and plenty, anyway, as we shall see later.

Under normal conditions, the domestic cane and beet fields supply about one-fourth of the sugar used in this country, the planters of Hawaii, Porto Rico, and the Philippines another fourth, while Cuba, together with small amounts contributed by other countries, furnishes approximately one-half. The beet sugar production in this country represents about 15 to 20 per cent of our total sugar consumption. The cane sugar production in this country is of comparatively small consequence, when the refining of imported cane is left out of consideration. Because of the great possibilities and the tremendous strides that it has taken in the last few years, beet sugar forms the subject of this article. From less than 39,000,000 pounds in the early 90's, America's beet sugar production jumped to 2,180,042,000 pounds in 1920.

But to satisfy Mrs. Housewife's question, we do not have to go back very far. On January 1, 1920, the world's estimated production of sugar for 1919-20 was about 15 per cent short of the pre-war year, 1913-14. There was apparently a decrease in the visible domestic supply—in households and stores—and the Cuban crop later gave indications of being smaller than had been first anticipated. Everybody began anticipating a shortage and the result was that everybody began to buy. The more they bought the more the price rose. The more the price rose, the more attractive the American market seemed. Speculators and brokers began searching the world for sugar, and supplies were purchased from Africa, Java, China, Formosa, Japan, India, South America and Central America, in addition to the amounts that could be obtained from the usual sources. In fact, 48 different countries contributed to the sugar supply of the United States. I am told that the thrifty Dutch actually shipped back the sugar they had purchased over here when the price began rising, and made a very handsome profit. Everybody began to sell us sugar.

The president of a great sugar company said: "As soon as the shipping conditions improved, possible shipments to the trade arriving in larger volumes, beet sugar began to arrive in substantial quantities, banking credits became more restricted,

Big Results From A Small Outlay of Money

The News carries the largest volume of Want Ads of any paper in this section. There is a reason for this, for if satisfactory results were not obtained people would not continue to spend their money for Want Ads in this paper.

The News is read by more farmers and other people in Plainview trade territory than any other newspaper, and these people buy lots of things. They sell lots of things. They rent rooms and houses, etc.

A Want Adv. in the News costs only 15c for fifteen words and 1c for each additional word, but it is read by possibly six to eight thousand people. Isn't that very cheap publicity? Can you beat it?

If you have anything to sell or trade, a room or house or farm to rent, there is something you want to buy or trade for, something lost or found, a cow or horse strayed, some notice you wish to give publicity to, you will get results if you use the News Want columns.

Many Plainview Shriners Going
The fall ceremonial of Khiva Temple, Shriners, will take place in Amarillo, September 24, and preparations are being made to entertain 2,000 Shriners with a fried chicken feed.
Many Plainview Shriners, including the drum corps and a number of novices, will attend the ceremonial, and will likely go in a special train or coach.

Prof. Patty's Sister Dead
Supt. W. E. Patty of the Plainview public schools returned this morning from San Antonio, where he attended the funeral of his sister, Mrs. Jackson.
Both going and coming he had to detour to Houston, as the railroad bridges between Temple and San Antonio were washed out by the great floods of last week.

DODSON'S LIVER TONE KILLS CALOMEL SALE

Don't sicken or salivate yourself or paralyze your sensitive liver by taking calomel which is quicksilver. Your dealer sells each bottle of pleasant, harmless "Dodson's Liver Tone" under an iron clad, money-back guarantee that it regulates the liver, stomach and bowels better than calomel without making you sick—15 million bottles sold.

unknown reason these beets are usually deficient in sugar. In Southern California, and in some parts of Arizona and New Mexico, the high summer temperatures may be partly

This is the theoretical sugar beet belt of the country, although there are modifying conditions. In fact, the sugar beet attains its greatest perfection where there is a 70-degree average temperature during June, July and August. It has been found possible to grow sugar beets in warmer climates, but for some

The price of poultry will be lower after this car leaves, so you had better bring in your surplus. L. D. Rucker, telephone 174, Plainview.

CARD OF THANKS—We wish to give expression to our heartfelt thanks for the many acts of kindness, the sympathy and the beautiful floral offerings, extended to us during the obsequies at the reburial of our son and brother, Sgt. Clell Cochell, and assure them that same is as sweet incense to our hearts. May God bless you all.—Mrs. Hettie Cochell and family.

WHAT CIRCLE AND CROSS STANDS FOR The Santa Fe Symbol Has a Meaning in Every Figure and Line

Who knows where the Santa Fe railway got the symbol on its stationery in its advertising, on the depots, box cars and on everything else possessed by the company, and what it stands for?

Miss Emily F. Weekes of Chicago, a large Castro county property owner, has been delving into this mystery with the following results:

"The symbol used by the Santa Fe railroad is an adaptation of a symbol used by astronomers every since the Stone Age of this planet, to indicate the earth. The cross within the circle means the four points of the horizon, north, south, east and west. The students of the Stone Age indicated the sun, moon, earth and other planets by lines traced upon a globe with a mixture of animal fat and iron oxide. This symbol of the cross, often with the circle, occurs again and again in all cultures and arts descended from ancient times, from races whose history and religions were lost in the dimmest ages. But below the strata of objects lost—during the Iron and Bronze Ages—have been found the pebbles with various symbols, besides Astronomical. This cross in the symbol is NOT the symbol of any present religion. This cross, alone, is the symbol of the Greek church, which is not Catholic. Both the Roman and the Celtic Crosses have an extension of the lower point of the cross, often with the circle. The use of this emblem by the Santa Fe is to indicate that this railroad serves the world, north, south, east and west."

BRING RUCKER YOUR POULTRY TUESDAY, SEPT. 20. HIGH PRICES

Ranger Is Very Dull Editor Ben Smith of the Lockney News was here one day last week en route home from a trip to Ranger. He says that town and section is "dull" in a business way. Two "bore" banks in Ranger and one in Eastland have closed their doors. The population of Ranger has decreased from 35,000 to 5,000. Many business houses are vacant, and business is dull in all lines.

In addition to all these troubles the county on account of the bank failures and mismanagement of public officials stands to lose about \$500,000 in money for which road bonds were sold.

Do you know you can roll 50 good cigarettes for 10c from one bag of

PRISONERS AT LUBBOCK TRY TO BREAK JAIL Sheriff Made to Look Down Barrel of Own Automatic by Sam Cates

Lubbock, Sept. 10.—Mere chance prevented a wholesale jail delivery from the Lubbock county jail here Wednesday noon, when Deputy Sheriff John McCullum just happened to drop around to the jail right at noon to speak to Sheriff Halcomb a moment on business.

He found Sheriff Halcomb looking into the face of his own gun, held by Sam Cates, waiting repeal of his recent sentence for murder, while the sheriff's wife was being choked by a prisoner by the name of Smith, waiting trial for forgery.

The sheriff and his wife went upstairs in the jail at noon to feed the prisoners, and after feeding all of them except in one cell, the sheriff unlocked the door to this cell and stepped back for his wife to hand the tray to Sam Cates. Cates reached under his hands for the tray, dodged under it and got the sheriff around the waist and went to the floor with him, assisted by Smith, another prisoner. Calahan, a third prisoner, grabbed the sheriff and began to choke her to prevent an outcry.

In the scramble Cates got the sheriff's gun, a Colt's automatic. Just at this time Deputy Sheriff McCullum appeared on the stairs and took a shot at Cates, who dodged and started to run. The sheriff snatched the gun from his hand, and all three prisoners scurried back into their cells.

This is the second escape said to have been planned by Cates and Smith.

PLACING PLAINVIEW SIGNS FOR DISTANCE 258 MILES
Advertising Tourist Auto Camp Ground on Prominent Highways Leading This Way
Clay Barrow, of the B. & B. sign service, left yesterday morning in his car to put up Plainview auto camp signs as far east as Vernon, 171 miles. He will en route place signs at Matador, 63 miles; Paducah, 97; Estelline, 109; Childress, 129; Quanah 139.
The signs are ten feet high with a cross about a foot from the top. On each sign, which is painted white, is in black letters the distance to "Plainview Free Auto Camp Park. We welcome you, Kiwanis Club."
The Kiwanis Club is paying for these signs, which are put along the four main routes out of Plainview. Last week signs were put at Sweetwater, 187; Post, 97; and Lubbock, 54; also north at Tulia, 24; Canyon, 66; and Amarillo, 87. Signs have been sent west to Texico, 82; Clovis, 93; and Las Vegas, 258, which is the farthest away. Signs are also put up five miles out of Plainview in each direction.
New Mexico Boosters Here
A party of New Mexico business men arrived in Plainview Wednesday afternoon and spent the night and yesterday at noon in our city. They were delegates en route to the F-F-F highway convention in Floydada, and were boosting for Las Vegas and other towns and resorts in New Mexico. They were shown a number of courtesies while here.
The party was composed of R. J. Taupert, wholesale optician; Donald Stewart, wholesale grocer; Richard Devine, banker; David Connay, druggist; F. W. Nichols, steam laundry; J. M. Quienez, banker; C. C. Root, secretary commercial club all of Las Vegas; B. W. De Oliveira, abstractor; F. S. Rockwell, manager of E. P. & S. W. hotel, both of Santa Rosa; S. W. Jones, secretary of Chamber of commerce at Clovis and Mrs. Jones, both of Clovis.

CHURCHES
Eminent Missionary Will Deliver Addresses
Dr. Dye, eminent foreign missionary, will lecture at the First Christian church Sunday afternoon at 4 o'clock and again at 8:15. Mrs. McMasters of Fort Worth, state chairman of the woman's missionary societies, will also be present and take part in the meetings.
Dr. Dye has been in the foreign missionary work many years, both in Africa in the first days of missionary work in that continent, and later in the Philippine Islands.
Social Service Program, Methodist Church, Sept. 19, at 3 P. M.
Leader—Mrs. R. E. Hill.
Scripture reading.
"Which Is Better, Millions for a Navy, or Millions for education and Social Service?"—Mrs. A. B. Miller.
"Four Immoralities of the Church."—Mrs. Phelps.
"Palliation or Prevention of Crime, Which?"—Miss Lula Blair Neal.
"What Can Be Done for the Jobless Men?"—Mrs. O'Keefe.
"How We May Reach and Assist Families, Whose Children are Under-nourished?"—Mrs. O. B. Jackson.
Services at the Baptist Church
There were 474 in Sunday school and a most enthusiastic session was had.
The pastor preached to a very large audience at the morning service following which there were four additions to the church and at night the attendance was remarkably good considering the rain and there was one addition to the church.
Mr. Burnett sang at the morning hour and Miss Mary Ruth Matthey played the organ and at 11 Mr. Dallinger played a cornet and the orchestra gave the offering.
Our congregations are very and very enthusiastic and we are having additions at every service.
All services next Sunday at Sunday school at 9:45 a. m. are expecting 500 in attendance. The pastor will preach at both the morning and special music will be provided. You are cordially invited to all services. Come and bring friends.
HARLAN J. MATTHEWS, Pastor

Forty-two Additions In Revival
The Church of Christ closed one of the most successful meetings its organization in Plainview. Sunday night with forty two additions to church, seventeen by baptism. crowds attended from the beginning to the end and the interest was very best throughout. Elder Busby is one among the best successful preachers of the Church of Christ here.
The church here for half of his long life. The winter months of 1922 are expected to hold a record for membership. August 1923. The church has 140 members now, and is able to build a nice brick house soon.
ANCHOR
Sept. 13.—This community in a fine rain Sunday evening and other Monday, which puts it of fine shape for fall wheat.
Helen Walker left Saturday and Plainview, where she will fall school again.
Mr. and Mrs. W. O. Bannett news this week that their son-in-law who is in the State Institute the tin had been taking it was against hydrophobia as he last week by a dog which is live of that description of disease took.
Rev. Alexander's meeting made Sunday night, Sept. 4th, with the best and very good success collect being thirteen conversions the additions to the church.
Our school failed to open on account of the bit rain, but Tuesday morning with a good amount. Miss Hallie Williams' assistant is our teacher again after. The supper given at our house Saturday night, was not one of a success as only a few were there and it netted us only \$12, and the money was given to the interest of Hale Center library.
Mr. and Mrs. W. O. Bannett are conducting business in Plainview Sunday.
Mrs. Flossie were in Hale Center Wednesday on business.
Quite a number of our community attended our home Saturday night.
Mrs. W. W. White was shopping in the Center yesterday.
Mrs. F. J. Simpson of the society of this community attended at the Center Saturday night.
Mrs. Lauge Lange, age 70, died at the home of her son, Purney Lange, three miles from town, Sunday of ocean. She lived in New Mexico for some time, but was now in Sam Lauge.
Burial was in Plainview Monday afternoon at 5 o'clock.

LONG-TAILED FOWLS PRIZED

birds With Marvelous Feathers Carefully Looked After in Museum at Tokyo, Japan.

In the Uyeno park museum, Tokyo, Japan, there are three fowls with tail feathers from 13 to 15 feet long. Only the cocks have feathers of such startling length. The hens are rather commonplace in appearance.

The long-tailed fowls settled in Japan before the Christian era. They are probably an offshoot of a Korean variety which sprang from the jungle fowl of southern Asia.

Why do the tail feathers grow to such length? Every chicken moults once a year. Chicken growers say that sometimes a part of the chicken skips this moulting season. By a process of painstaking selection and breeding, says the Popular Science Monthly, those fowls in which tail moulting season is suppressed will ultimately give rise to a strain with long tail feathers.

These Japanese cocks are fed, almost stuffed, in a way that would astonish American barnyard chickens. They are not allowed to move about freely; if they did so, the precious tail feathers would break.

A PRESENT WORRY

Man—What are your hopes for the future?
Woman—I have none just now. Tomorrow is my girl's birthday and I'm worrying about the present.

NEW VALUABLE SIRUP.

New extraction process converts even the most intensely bitter of apples into a sweet, which is entirely suitable for flavoring extracts for other purposes. A product of the process is known as calcium "sugar sand" hitherto deemed maple sirup exclusively. It forms the basis of a new sirup, and was valued at \$1.50 a pound, before the war. Now, the only plants employing the process are located in Nova Scotia, as it utilizes a fruit now being allowed to go to the extent of hundreds of tons a year, it is to be hoped that the method will be put into wide general use in the near future.—Popular Science Magazine.

D "CANNED" SPEECH.

Edmund Talbot, wife of the lieutenant of Ireland, probably only woman who has ever talked in a machine in England. When Lord Edmund was a candidate for parliament some time ago, he fell ill and was unable to meet his speaking engagements. He delivered an address into a phonograph, which Lady Edmund, who was touring the Chichester constituency for him, took upon the platform and operated, so that his speech was made in his absence.

FLAW IN EINSTEIN'S THEORY.

Einstein's theory that space may be of infinite extent seems to have obtained indorsement by many eminent physicists. Nevertheless it is now apparent that, if this idea be correct, the cosmos is not to be regarded as alarmingly shrunk. For Einstein's own opinion is that a ray of light traveling 186,000 miles a second would require 100,000,000 years to make a complete circuit of the universe.—Philadelphia Record.

THE FIRST IS YET TO COME.

A Montana man who declines to pay his bachelor tax on the ground that he has not found a woman who will have him is likely to have a lot of letters in the near future.—Boston Transcript.

LINDSAY'S IDEA OF RUSSIA

Peter the Great, According to This, Was Unquestionably a Two-Sided Character.

Muscovy! I know little of Muscovy, except that there once lived Peter the Great, who was Jack the Giant Killer and the Giant in one, writes Vachel Lindsay in the Dial. He had a tremendous black mustache, like the villain in a Laura Jean Libbey novel. Yet he ruled like King Alfred of England. I know that he fought all the tribes of India, China and Japan to a standstill and that, personally, he could whip his weight in wildcats after sitting up all night reading the Bible and eating boiled elephant's foot and drinking like a hole in the sink.

Peter the Great had a church full of the bones of all the saints I never heard of and mass was said there so often that incense poured out of the front door and made the trees on that street bloom in winter, and the central pinnacles of that church stretched up in the form of a great hand that would grab the sun at noonday and squeeze flaming heart's blood from it for the snow to drink. And wherever that cataract touched the snow there sprang up cossacks, cossacks, riding hell-bent, with their loves on their saddlebows or beside them, cossack amazons.

PLENTY OF OPPORTUNITY

Employer—I need a boy about your size and will pay you \$2 a week.

Boy—Will I have a chance to rise?

Employer—Sure. I want you to be here at six o'clock every morning.

FIRE HORSES HONORED.

Sentiment is not entirely a thing of the past, for not long ago, in a city where the fire apparatus, drawn by splendid, daring animals, was to be supplanted by motor service, the event was celebrated in this fashion: The city commissioners and officials of the fire bureau gathered at the station house, in company with hundreds of the animals' friends and admirers, as, with pomp and ceremony, the horses made a final dash before being placed in retirement. There, with bared heads, the crowd watched the five veterans in the service, Dave and Rosy with truck 4, followed closely by Dar, Wink and Hank pulling old Engine 7, as they made their last spectacular runs.—New York Herald.

DIED IN BATTLE LONG AGO.

Fifteen skeletons have been discovered at Wellington Hill, Eastbourne, England, during excavations for road widening. An iron dagger was also found. It is thought the remains are those of warriors buried after the battle of Hastings in 1066. The hill is situated near Pevensey bay, where William the Conqueror landed. Twelve years ago, when similar discoveries were made, daggers were found in ribs and spearheads in skulls.

COST OF TYPHOID FEVER.

The recent epidemic of typhoid fever at Salem, Ohio, in which there were 850 cases and 59 deaths, cost approximately \$450,000, according to the Journal of the American Medical Association. The water supply of the town became contaminated by a broken tile pipe used for transmission of the water. The tile pipe had been used instead of an iron pipe to save \$1,500.

CLEAR

"I hope I make myself clear," said the orator.

"As clear as the Einstein theory," shouted some sarcastic individual in the audience.

STIFF COLLAR IS VANISHING

Possibility That Man Will Be Emancipated From the Slavery of the Starched Abomination.

"White collar men," comprising that class of workers which "dresses up" when it goes to work, seem to have succumbed to the lucrative allurements of washing windows or driving milk wagons or else is becoming too poor to buy 40-cent white stiff collars, according to reports from two highly authoritative sources, says the New York Evening Sun.

A Newark marriage license clerk with a statistical turn of mind says that "white-collar men" apparently have stopped getting married. Haberdashers say that they have become a diminishing race.

Sartorial history shows that the man who seeks to be well dressed has been the slave of the starched white collar ever since ruffles went out of fashion and—with the possible exception of the Elizabethan fluted affair—they have been growing more uncomfortable with each generation.

For the last four or five years the unstarched collar has been becoming more and more familiar. Originally introduced for summer or sporting wear, it has proved itself too comfortable to be cast aside when winter comes. Added to the desire for comfort, dealers say it is much less expensive not only in its purchase price, but in durability. Many modern laundries ruin stiff collars in three or four ironings, while the soft collar may easily be ironed at home or even by a bachelor if necessary.

BEAUCOUP JACK

"Dick Overseas made a terrible break in church last Sunday."

"Well?"

"He woke up to find the collection plate under his nose and said: 'Shoot, you're faded.'"—Home Sector.

DATES NEED MUCH WATER.

The Arabs have a proverb to the effect that the date palm must have its feet in water and its head in the sun, consequently, an essential condition to perfect growth is an abundance of water. Where this has been supplied in the Coahuila and Imperial valleys, excellent dates have been produced, and there is every reason to assume that before many years have elapsed the great Colorado desert will be producing all the dates that the commerce of the United States will demand, with a surplus for export.

OPEN TO CONJECTURE.

"He had been looking for political appointment for some time."

"Well, is he happy now that he has one?"

"I dunno. I hear he has been appointed to something or other in Mexico."—Louisville Courier-Journal.

WHEN THE CAP'N QUAILED.

"You have a fortune sufficient for your needs."

"I have," admitted Cap'n Kidd.

"Then why don't you retire?"

"I am afraid to. This old boat of mine is the only means I have of dodging the income tax collectors."

THE MAIN OBJECT.

"I intend to start on a sea voyage tomorrow."

"Are you going because you want to get a view of reconstructed Europe?"

"No; I am going because I want to get a drink."

NOT HIS HALF OF IT.

He (just been accepted)—I can imagine already the paper talking about "the handsome couple."

She—What an imagination you must have.—Boston Transcript.

STARLING MOST USEFUL BIRD

Investigations Made by Department of Agriculture Show Its Value to the Farmer.

The starling has spread over all the Eastern states and is becoming more numerous every year. To determine whether the bird is useful as a destroyer of noxious insects, the biologists of the Department of Agriculture examined the stomachs of more than 2,000 adult starlings and about 300 nestlings. The adult birds feed virtually all day and eat incredible quantities of insect food.

The young starlings, which remain in the nest from 16 to 20 days after being hatched, are fed by their parents at intervals of three to six minutes throughout the day of 12 hours and obtain more than 2,000 meals before they leave the nest.

During the first four or five days their diet consists principally of caterpillars, the soft larvae of beetles, flies, etc., and of spiders. Later they feed on millipedes, grubs, grasshoppers, crickets and beetles. In the stomach of one young starling the remains of 26 clover-leaf weevils were found.—Popular Science Monthly

TO PROTECT SAFES WITH GAS

New Scheme Evolved Which It is Hoped Will Foil the Enterprising Burglar.

Burglars must soon add a gas mask to their tool kit. A device recently patented by R. C. Roeschel of Harrisburg, Pa., will make the cracking of safes a hazardous job unless the burglars are thoroughly protected by gas masks.

A number of glass containers are so arranged that they will break when the safe is tampered with or when an explosive mixture is set off to force the door open. The escaping gas works rapidly, and a few inhalations of a very small quantity of it will produce unconsciousness.

After being exposed to the fumes of the deadly gases there will be little chance left for the burglar to escape.—Popular Science Monthly.

COURSES IN HOME READING.

Departments of education and state universities of 14 states are cooperating actively with the home-education division of the United States bureau of education in conducting home-reading courses. Upon the completion of any one of the 16 courses offered by the division, the reader receives a certificate signed by the United States commissioner of education and a representative of the extension department of the state university. The courses are given by the state authorities in Georgia, Indiana, Iowa, Kentucky, Louisiana, North Carolina, North Dakota, Oregon, South Carolina, South Dakota, Utah, Virginia, Washington and Wisconsin.

PROFITS GIVEN TO SCIENCE.

Doctors Schamberg, Kolmer and Raizes of the Dermatological Research laboratories, who developed the drug arsphenamine, a substitute for salvarsan, when the latter could no longer be had from Germany, have donated to the laboratories the \$500,000 which was the profit from its sale during the war. In reporting this fact the Scientific American remarks:

"Once more American science has won a chemical victory and the domestic article, which was so sorely needed, was sold for one-third less than the greedy German manufacturers demanded, and now even the profits go to science."

BALLOONS FOR TARGETS.

At the Camp Benning infantry school, somebody recently conceived the idea of using a rubber toy balloon for a target. It is inexpensive and when punctured by a rifle bullet would immediately collapse. It is believed an elastic dummy of this kind could be painted in such a manner as to closely resemble the human head. The infantry board plans to give the balloon a trial.

CARICATURE BULLFIGHT.

Mexico has a new form of entertainment called toros bufos, or in plain United States, comical bullfight, in which buffoons stage a caricature of a bullfight so cleverly that large audiences attend and the real Spanish bullfighting industry is so seriously threatened that the best matadors have appealed for protective legislation.

THREW AWAY PAPER MONEY

History Records Time When Practically All That Kind of French Currency Was Worthless.

There was a time when all the currency of France became valueless and was practically thrown away, the St. Louis Globe-Democrat recalls. It was made of paper, like that of Germany at the present time, with the result that the mark has declined almost to the vanishing point. The French paper money in the revolutionary period, 125 years ago, was nominally secured by public lands, but the supposed safeguard proved to be worthless. Within six years after the French resorted to a paper currency a gold coin worth 24 francs brought 7,200 francs in paper. The government resorted to much legislation and many financial devices to prop up the paper currency, but in vain. Efforts failed to compel producers to sell commodities at fixed prices in paper. If pushed hard producers stopped their operations. One of the troubles with the paper currency was counterfeits, some of which poured in from adjacent countries. At last the French government gave up the fight to bolster up the billions of paper francs and allowed prices to take their own course, free from mandates. Slowly the nation recuperated. Real money reappeared, and the France of today is proof that a country may lose all its currency and yet, without great delay, be restored to financial health.

HER GENTLE SARCASTIC

He (with newspaper)—Here's a prophet who predicts the death of one of our greatest men within the next few weeks.

She—Is your insurance policy all paid up?—Boston Transcript.

WAR INSIGNIA VANISHING.

War badges are vanishing in England. For some months after the fighting was over, almost every man in the street wore some kind of badge. Now they are all disappearing rapidly.

The service insignia which has survived in great numbers is the silver active service badge, but its popularity may be attributed to the fact that it is the most ornate of the lot. Few men now sport their regimental crests or their honorary ribbons in London streets.

Other things sartorial popularized during the war have remained in favor. The officers' "tooth brush" mustache, for instance, continues to be the vogue, and with it generally appears one of the leather-headed swagger canes affected by British subalterns before their demobilization.

SAVED SIMOLEONS.

"I have saved \$8 today."

"That so? How?"

"They had beefsteak on the bill of fare, and I took a ham sandwich and a glass of milk instead."—Detroit Free Press.

JACKS ARE TRUMPS.

An autoist entered a motor accessory store. "What is the best jack on the market?" he asked.

"Raisin jack is not so bad," answered the facetious clerk.—Cartoons Magazine.

THE FIGURES HE SAW.

Wife (cozy before open fire)—Richard, some people say they can see figures in the flames, can you?

Hub—Yes, \$12.50 a ton.—Boston Transcript.

HALF PORTION.

Miss Desse de Mont—When you had them at your mercy did you give quarter to the enemy?

Ex-Captain O'Thelle—Well, I should say not more than an eight.

SOLD HER SASSAFRAS ROOTS

Small Girl Finally Made Sale to Merchant Widely Known as Afflicted With a Grouch.

John, the proprietor of an inn, enjoys the local distinction of being close and crabbed—the latter quality he avers is the result of over-persistence as practiced by salesmen who call on him since selling is again a recognized factor in merchandising.

After having been annoyed for more than an hour by a past master of this species, a little girl less than six years old, entered his establishment to inquire whether he would buy some sassafras roots. "No," he bawled, and she immediately turned for the door and said good-by.

This seemed to touch the tender chord, and he called to inquire the price. She said 5 cents. He asked how many roots a bunch contained and after examination she replied that most bunches had six roots, one contained seven. She declined his offer of 4 cents, explaining that it could not be sold for so little as it was fresh dug root and that she was the only one selling it.

He bought the bunch containing the greatest number of roots and the transaction was closed.—Indianapolis News.

AFTER WINTER'S LONG SLEEP

Author's Exquisite Word Painting of an Early Day in the Beautiful Springtime.

A lovely variant of early spring days; not that perfect thing when sun and wind are on the meridian together, with soft warmth and sailing clouds, but a noon of still air, the sun hot upon the face, so that the little ruffling breeze from the southeast which blows and falls once in a minute is none too cool. In the garden-walks the tortoiseshell butterflies got up under my feet, and hovered by sixes and sevens at once on the white carpet of the arabis, where the bees kept up a steady drone. The sky was cloudless, save where low down in the west streaks and streamers of vapor lay all day. The sunlight was broad and pure; every shadow full of vivid color. The mind, which perhaps has need of this semblance of fixed points in the smooth lapse of being, draws the white chalk score under today, as definitely this year's opening day of spring.—"Idlehurst," by John Halsham.

STOLE CHURCH BELL.

At a time when such a large percentage of French criminals are specializing in thefts of jewelry, pocketbooks and the more easily portable luxuries of life, it is almost refreshing to hear of such originality as was shown by the ruffians who devoted their attention to stealing a church bell weighing one and a half tons. One night recently a considerable force of motor bandits entered the ruins of Essars church, near Lille, and succeeded in hauling out a huge bell and placing it upon their lorry. They were surprised in the act by the night watchman, who made an attempt to resist the removal of the bell, but was bludgeoned by the bandits, who got clean away.—London Times.

FLOWER ODDITIES.

Flower fanciers who cultivate oddities have already given us the black rose, the pink and mauve water-lilies, and the green carnation, and only lately in England a rose-colored violet has been produced. This was the work of women gardeners, who have made a specialty of violets. The Royal Horticultural society's recent show in London had a pink daffodil, in which the color deepened from a white center into a salmon pink with a rosy hue at the edge.

SAM BROWNS SOURCE.

Only two officers so, the United States army now have the right to wear the Sam Brown belt. They are no less personages than General Pershing and his aide. Officers of the Pennsylvania National Guard are hoping the new secretary of war will order the overseas belt as a part of their uniform.

DOLPHIN STEAK A LA Russe.

The use of the flesh of dolphins for human food has proved successful. A Moscow dispatch reports that steps are being taken to establish a dolphin fishing industry.—Scientific American.

A Tonic For Women

"I was hardly able to drag, I was so weakened," writes Mrs. W. F. Ray, of Easley, S. C. "The doctor treated me for about two months, still I didn't get any better. I had a large family and felt I surely must do something to enable me to take care of my little ones. I had heard of

CARDUI

The Woman's Tonic

"I decided to try it," continues Mrs. Ray. "I took eight bottles in all. I regained my strength and have had no more trouble with womanly weakness. I have ten children and am able to do all my housework and a lot of outdoors. I can sure recommend Cardui."

Take Cardui today. It may be just what you need. At all druggists.

ASPIRIN

Name "Bayer" on Genuine

Take Aspirin only as told in each package of genuine Bayer Tablets of Aspirin. Then you will be following the directions and dosage worked out by physicians during 21 years, and proved safe by millions. Take no chances with substitutes. If you see the Bayer Cross on Tablets, you can take them without fear of Colds, Headache, Neuralgia, Rheumatism, Earache, Toothache, Lumbago and for Pain. Handy tin boxes of twelve tablets cost few cents. Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid.

CANT DO THE WORK

It's too much to try to work every day against a constant, dull backache, or sudden darting pain in the small of the back. Be rid of it. Try Doan's Kidney Pills. Your neighbors recommend them. Ask your neighbor.

Mrs. R. L. Doruff, Plainville, says: "When I first began using Doan's Kidney Pills my back and kidneys were in an awful condition. At times I couldn't do my work and couldn't get around for a week or two at the time. There was a steady, bearing down pain through the small of my back and life. Two boxes of Doan's cured me when I stooped over sharp, knife-like pains would catch me in my back, so I could hardly straighten up. I suffered day and night from this trouble and every muscle in my body was sore. I often became so tired, I could hardly stand up and suffered quite a bit of the time form headaches. My kidneys didn't get right at all. I saw Doan's Kidney Pills advertised and bought two boxes at R. A. Long's Drug store. The gave me instant relief of every symptom of kidney trouble." 60c. at all dealers. Foster-Milburn Co., Mfrs., Buffalo, N. Y.

ITCH!

Money back without question if GUARANTEED SKIN DISEASE REMEDIES (Sunt's Balm and Soap), fail in the treatment of Itch, Eczema, Ringworm, Tetter or other itching skin diseases. Try this treatment at once.

McMillan Drug Co.

LUCKY STRIKE CIGARETTE

Its Toasted

Notice this delicious flavor when you smoke Lucky Strike—it's sealed in by the toasting process.

OF MIXED BLOOD

Population of Scotland Made Up of Six Races.

Scotti Tribe, Originally Irish, Gave Their Name to the Country, According to the Historian.

The Scotch reached Scotland from Ireland and are not the descendants of Gaelic Celts who had been pushed north by a later (British) invasion of Britain. The first authentic information on Scotland dates from the time of the Romans, 79 A. D. Roman rule in Britain came to an end in 410, and Britain then ceased to be part of the Roman empire.

The population of Scotland is made up of Pictish, Irish, British, Saxon, Danish and Norman elements, all of them Indo-Celtic, the three first, Celtic, the three last, Germanic peoples. The Picts contributed the bulk of the population, but were overcome by the Scotti (Irish), who had settled in Dalriada, a part of the present county of Argye. The Scotti then became the dominant people.

Brythonic Celts dwelt in Strathclyde; their chief city was Dumbarton (Dun Breton, "Fort of the Britons"). Toward the close of the Eighth century the Danes appeared and ravaged the coast settlements and the isles. The Saxons first appeared in 428 in Britain. In the Eleventh century Norman refugees first crossed the border into Scotland.

The first Irish colonization in Scotland took place toward the end of the second century, but the kingdom of Dalriada was not effected until the close of the fifth. It is these Scotti who have given their name to Scotland. The relations between the two countries were very close and lasted 1,000 years, or at least up to the Reformation, and the early literature and civilization of Scotland belong to Ireland.

According to legend, the name Scotch is derived from Scota, a daughter of one of the Pharaohs. The word is probably related etymologically to the German Schatz, and means "masters, owners." Originally, and therefore in all medieval Latin texts down to the end of the Eleventh century, it meant only Ireland. Since that date it means specifically Scotland. The Scotch Gael never calls himself Scotch, but Gael, or, to indicate his country, Albanach. English-speaking Highlanders, even though Scotchmen, are Saxons in the mind of a Gael. In the Fifteenth century, when English became the predominant speech in the Lowlands, the English and non-Celtic Scotch called Gaelic "Erse." Since the Sixteenth century the name Scotch has been applied to the English spoken in the Lowlands. So, by a strange freak of fortune, Scotch, originally applied to a variety of Celtic, has come to mean Broad Scotch or Quaint English, a language of Germanic origin.

The distinction made between the Highlands and Lowlands of Scotland is correct merely so far as the physical configuration of the country is concerned, but incorrect if a racial significance is read into it. There is a mistaken notion that Scotland is a country of two races, Celtic in the North and Teutonic in the South, and that the latter element has displaced the former. No doubt the Lowland Scotchman is a person of very composite blood, but he is above all a Celt.—From a Paper by Dr. Joseph Dunn before Anthropological Society of Washington, in the Scientific American Supplement.

Would You Like a New Name

How many of us, if we had chance, would change our Christian names?

Lady Kitty Vincent, writing to London Daily Express, declares there should be a law that the names given by our godfathers and our mothers in our baptism should be considered binding. When we are years of discretion, she says, might be allowed to change them, ladyship continues:

"Remember the sad story of the parents who christened their daughter 'Wyde' because their name was 'I' and being artistic people, they thought it made a charming sound picture, she married a man called 'Bull'."

Sawdust Has Value.

Sawdust as a waste product of the past, for it now serves many purposes and has an ever increasing commercial value. Mixed with clay it makes good tiles, bricks, and combined with cement a good flooring material is obtained. It also finds a place in the dye industry for coloring purposes. An excellent both for lighting and lighting purposes can be made from dust. It is believed that particularly in the neighborhood of sawmills the sawdust could be produced in quantities to be supplied for a few cent thousand feet.

Misdirected Zeal.

"Are the traffic laws in this strictly enforced?"

"Sometimes they are."

"Well?"

"An old darkey from the court who was driving a mule colored, hitched to a dilapidated wagon, severely lectured yesterday for violating a traffic ordinance, while some of the \$20,000 worth of automobiles by the grinding occupants whizzed around the negligent motion of the law's eyes on their way.—Birmingham Herald."

KING IN REALM OF BOOKS

Herbert Putnam, Superintendent of the Library of Congress, Has Charge of Wonderful Collection.

Herbert Putnam is the superintendent of the library of congress, an institution which contains more books than any other in the world except the British museum at London and Nationale bibliotheque in Paris. Mr. Putnam belongs to the celebrated Putnam family, publishers of books, the Detroit News states. He tried to be a lawyer and knows the law, but his fondness for books caused him to give up the legal profession and he now presides over one of the greatest institutions in the United States and is a better-known man than 90 per cent of the lawyers in the country.

Mr. Putnam takes as much pride in the collection of music in the library of congress as he does in anything else connected with it. When he became librarian in 1899, 250,000 pieces of music were catalogued. The collection has since grown to 800,000 pieces and there is scarcely anything that was ever written or published in the way of music in any part of the world of which there is not a copy in the library of congress.

WOMAN, 90, WAS ARMY COOK

Mrs. Doyle Proud of Fact That She Saw Service in Mexican War and in the West.

Penniless, but content, Mrs. Elizabeth J. Doyle, 90 years old, sat in the Union station here the other day awaiting a train to take her and her youngest son, a mere child of 32, to Franconia, Mont., where both expect to find work, says a Billings (Mont.) dispatch to the St. Paul Pioneer-Press. The son John is a section hand and a good one, Mrs. Doyle declared. She herself has had some little experience at toil, one of her first jobs being that of cook with the American forces in the Mexican war. She was then 16.

Mrs. Doyle was born in 1830 on the banks of the Illinois river, near Beardstown.

"Grant and Lee and McClellan were lieutenants when I joined the army," she said. "After the war I was transferred to New Orleans on recruiting service. Then I went with the soldiers to California. Next I went to Nebraska, and afterward to Wyoming. I don't take much with this truck of men army cooks. No man can cook as well as a woman. Ask any soldier."

FOR KEEPSAKE.

A Newcastle woman, who is not a bit backward in declaring she is a Democrat, entertained two Civil war veterans during the recent state Grand Army of the Republic encampment, and when it came time for the two to leave for their homes

HAS PAIR OF SHOES COMING

New York Girl Probably of Opinion That Mr. Fastenberg's Middle Name is Gratitude.

Celia Knapper, like Cinderella, needed a new pair of shoes. So she walked into I. Fastenberg's store and got fitted with a No. 4 triple A. "I tell you that shoe will give you satisfaction," Fastenberg said to her. "Wait a minute and I'll wrap 'em up."

Miss Knapper opened the box to show her purchase to an admiring family and found—

Hundreds and hundreds of bank notes, in ones, tens, twenties, fifties and hundreds! When she was sure she wasn't dreaming, she took the package and marched back to the store.

Mr. Fastenberg wore a look of alarm. "What's the matter?" says he. "Don't you like the shoes?"

"This isn't shoes. It's money. Thousands of dollars' worth."

"Ach!" said he, "the money I had ready for the bank! I put it in a shoe box for safekeeping. I wouldn't have missed it for a day or so."

"You shouldn't be so careless. If I weren't honest I could have used all of it. I'm going to be married soon."

"That's fine," said Mr. Fastenberg, tucking the box under his arm. "Leave your name and address. I'll send you a pair of shoes for a wedding present. You shall wear it in good health. Fine day today, ain't it?"—New York Correspondence, Philadelphia Ledger.

MISUNDERSTANDING

Sympathizer—My poor man, life is full of trials.

Tramp—You bet! What was you up fer?

METALLIC CEMENT.

The recipe for metallic cement is as follows: "From 20 to 30 parts of finely divided copper, obtained by the reduction of oxide of copper with hydrogen, or by precipitations from solutions of its sulphate with zinc, are made into a paste with oil of vitriol, and 70 parts of mercury added, the whole being well triturated. When the amalgamation is complete the acid is removed with boiling water, and the compound allowed to cool. In ten or twelve hours it becomes sufficiently hard to receive a brilliant polish, and to scratch the surface of tin or gold. By heat it assumes the consistency of wax, and as it does not contract by cooling, it is recommended by a noted chemist for dentists' use for stopping teeth. This is a splendid cement for attaching anything to the surface of wood, glass, metal and porcelain."

BRONZE-AGE FIND.

One of the most remarkable bronze age hoards recently discovered in Great Britain has been given the Welsh National museum. The hoard was found in Wales. The nature of it, which consists of bronze implements and ornaments, the fact that it includes an iron knife of exactly the same shape as two or three bronze sickles found at it. This is taken to prove that dates from the time of transition from the Bronze to the Iron age, but had evidently been discovered by the metal workers of that day, but not fully acquainted with its properties and therefore modeled its historic sickle on their bronze implements.

HOSTILITY.

In the casual camp at St. Aignan an outfit of negro Yanks were used exclusively in the pick-and-shovel trade. Hence the following conversation at noon:

Man: "What 'd' all dem niggers do?"

Boy: "Ah, hater mah shovel on 'em. Ah dem Yanks dey mah niggers."—American Legion Weekly.

ORANGE TRADE IS IMPROVED

Spanish Growers Looking Forward to Good Days Now That War Conditions Are Gone.

"Gleaming myriads between the hills and the sea." The writer refers to Valencia's orange groves, starting the plain on either side of her. "When the sea horizon reddens on a cloudless morning, they show up wonderfully beneath the pale purple of the rocky, treeless Sierras. The soil is a gorgeous red, and besides the rows of orange trees and occasionally olives, it is dotted with small dark tufts of cypress and tiny snow-white houses." Yet the London Morning Post's correspondent, who speaks thus enchantingly of Valencia and her winter crops, adds that the year is not accounted a good one for oranges. Plenty of oranges, but they are expensive, is the fact of the situation. But for all that, the Valencian orange trade is reviving, the procession of carts carrying their loads of fruit, the yield of the Valencian plain, for exportation from Gras harbor, is not likely to grow less. The war, the lack of transport, the submarines—all untoward conditions of the last five years, are disappearing into the distance, and the Valencian peasant is looking forward to good days, and meanwhile is contented enough under his blue skies.

LIVED UP TO INVITATIONS

Club Announced That Banquet Was to Be Dry, and It Proved to Be the Truth.

A club, which in the "good old days" was known for the "wetness" of its dinners, gave a banquet the other night, and the invitations to it read that it was to be a "dry" program. Thinking that there was a joke in the invitation somewhere, and that probably the arrangements committee had "dug up" liquor for an old-time celebration, the club membership turned out as one man.

But the committee, to show that it was "on the square," served a menu that included the following: Dried beef, dried corn, dried apricots, unbuttered popcorn, salt mackerel, salted peanuts and dry toast. There was nothing "wet" like the members had been thinking about. And the speeches were the "driest" part of the entertainment.

"The least we expected," lamented the closing speaker, "was a dry Martini or a dry Manhattan."

BABEL OF TONGUES.

In the bureau of war risk insurance, Washington, skilled translators are employed to render into English a mass of incoming mail written in foreign languages and to translate into foreign tongues replies as required. Forty-five linguists in the bureau translate and write in 46 different languages. These translations into their own tongues are of great help to the dependents of service men in foreign countries. Letters written in the Italian tongue overwhelmingly predominate in the mail-receiving section. In August last the bureau received 41,000 letters in Italian, 463 in Spanish, 287 in Greek and 280 in French.

AUSTRALIAN BEE INDUSTRY.

The bee industry is an important one in Australia, and, like poultry farming, is ordinarily an adjunct to agricultural or dairying industries. The average annual production of honey in the past five years has been over 5,000,000 pounds, with a production of about 90,000 pounds of beeswax. In the past year or two, however, the production of both honey and beeswax has fallen considerably below the high record of 1913, when over 8,000,000 pounds of honey was produced.

MAKING MUSHROOM EXTRACT.

A few drops of an extract of mushrooms prepared as follows are enough to flavor a stew. Fill an earthenware pot with fresh mushrooms covered with salt. After 24 hours crush the mass, place in a linen cloth and squeeze out the juice by wringing. Heat the juice over a gentle fire, skim and pour into small sterilized bottles, corking tight. This will keep indefinitely.

LAND FIRE INSURANCE.

In his campaign against crickets in Alabama, Justice Battle is using the same old and also a mixture of new and old and black magic. In the Grand Jury's opinion the crickets are the worst pest in the state.

COURTED THEM OFF THEIR FEET

Remarkable Story of Lydia Southard, Said to Have Had Five Husbands.

FOUR MEET SUDDEN DEATHS.

New Woman is Charged With Murder of Number 4 and Will Be Tried in Montana—Present Husband Remains Loyal to His Wife.

San Francisco.—"She swept the men of her choice off their feet—courted them so persistently that they could not escape."

That's the way V. H. Ormsby, a deputy sheriff of Twin Falls, Idaho, describes the romance of Mrs. Lydia Southard, under arrest at Honolulu on a charge of murdering Ed Meyers of Twin Falls, her fourth husband.

Mrs. Southard denies the charges and says she can satisfactorily explain the deaths of her former husbands. She told officials she believed she was a "typhoid carrier," and that this may have been responsible for some of them.

"Take poor Ed Meyers, for example," says Deputy Sheriff Ormsby. "He was the woman's fourth husband. In 1920 he was running a little ranch out near Twin Falls, when Lydia came home after Harlem Lewis, husband No. 3, had died in Montana and she had collected \$5,000 in insurance.

"She rigged herself out to kill, bought a long mink coat and a closed car. Everybody in town was talking about the way she ran around to dances.

"She courted Ed right off his feet. 'Well, in August she and Ed were married after he took out a \$10,000 insurance policy. In September Ed died.

"The townsfolk weren't just satisfied. They started a lot of talk and the insurance company held up payment on the policy.

She Didn't Worry.

"But Lydia didn't seem to be worrying. After Lydia left Twin Falls late in 1920 she met Southard, a petty officer on the U. S. S. Chicago at a dance. Later they were married, and when Southard was transferred from San Francisco to Honolulu he took his bride along. He's still loyal to his wife."

The marital experiences of the one-time Missouri country town girl eclipse even those of fiction. Ten years ago while still in her teens she was living on a farm of her father, William Trueblood, about two miles from Keytesville, Mo.

Following the opening of new irrigated territory in Idaho, Trueblood moved his family to a section near Twin Falls. Robert Dooley, a school-teacher sweetheart of Lydia, and his brother, Edward, followed soon after, and settled near the Trueblood farm.

Married to Dooley.

In 1920 Robert Dooley took Lydia, then twenty, into Twin Falls one day and the two were married. Edward went to live with them.

One day Edward Dooley became ill. Within a few hours he was dead. Lydia explained that he had eaten salmon from a can that had stood open for some time. Lydia and Robert Dooley accompanied the body back to Keytesville for burial and folks in the home town got their first glimpse of baby Laura Marie, daughter of Lydia.

About three weeks after Lydia and her husband returned to Twin Falls, Robert Dooley died. Three weeks later baby Laura was dead.

Mrs. Dooley collected \$4,500 on insurance that had been carried by the brothers and a short time later was married to William McHaffe.

The two went to Montana to live and settled on a ranch. McHaffe took out a \$500 insurance policy and made one payment on it. In a short time he died, but when Lydia went to collect the insurance she found that the policy had lapsed a few days and the company refused to pay it.

In June, 1919 Lydia married Harlem Lewis an automobile salesman, with whom she had become acquainted in Montana. One month later, on July 6, Lewis died from what doctors said was ptomaine poisoning, and Lydia collected \$5,000 in insurance.

Following the death of Lewis, Lydia returned to Twin Falls, where she met and married Myers, husband No. 4.

WOMAN IS MINUS STOMACH

Organ Not Needed, Says Doctor Paschet, French Specialist, if Diet is Properly Regulated.

Paris.—That the stomach is a superfluous organ in the starting mechanism of Dr. Vincent Paschet, reported in the Academy of Medicine.

Admitting that he has successfully removed the stomach from a woman fifty years old who had continued to live happily in perfect health, he declares that the operation also cured her of cancer.

"The stomach's action is purely passive," said Doctor Paschet. "The mechanism for the vital part of the digestion is in the small intestine with the intervention of the pancreatic juice and the bile. Therefore, after having the stomach removed, it is the stomach's action that is removed."
