Santa Fe Farm Demonstration Train Here Saturday; Large Number Parmer County Farmers Hear A. & M. Speakers

The Santa Fe Farm and Home Special, operated by the railway company in cooperation with the Texas A. & M. College, arrived here for the third stop of the day Saturday, March 28, at 7:30 p. m. The train carried four cars of exhibits stressing improved methods of farming and livestock production, with more profit and better living as the keynote of the display. A large crowd of Friona and Parmer county people, many of them traveling a long distance, in spite of the blustery weather, were present.

Due to the brisk cold wind blowing when the train pulled in, the speaking program was not held on the flat-car speaking platform carried by the train. Instead, those who had gathered at the railway station, where the train was parked during its stay here, were invited aboard without delay, and visitors continued to arrive for some time after the crowd began entering the train.

Operated by the railway company and carrying speakers and exhibits supplied by the A. & M. College, the train arrived here at the close of its sixth week in a tour of all Santa Fe lines in Texas. Previous stops during the day were at Canyon and Hereford. From here the train went to Clovis, New Mexico, for the week-end. It began the final leg of its tour Monday at Farwell. The final stop will be at Snyder, April 6.

Two representatives of the W. T. S. T. C. Canyon, Prof. T. M. Moore of the agriculture department, and Mrs. T. V. Reeve, assisting with the exhibits of special interest to women and girls, were aboard the train on its arrival here. The Canyon institution cooperated on the tour of the train in this section.

J. D. Tinsley, general agriculture agent of the P. & S. F., of Amarillo, had charge of program arrangements here. John R. Edmonds, extension district agent, was in charge of the group of specialists aboard. In the A. & M. College group were Miss Minnie Mae Grubbs, district home demonstration agent; Paul A. Cunyus, assistant poultry specialist, and S. D. Snyder, who had charge of the farm electrification exhibit.

Santa Fe representatives aboard included J. F. Jarrell, manager agriculture department, Topeka, Kansas; J. D. Tinsley, general agriculture agent, Amarillo; A. M. Hove, special representative of The Earth, Amarillo, and R. W. Prentice, trainmaster, Amarillo.

The special carried one car of livestock exhibits, stressing care and feeding, with emphasis on the self-feeder for hogs and creep feeding of calves; one car of farm electrification exhibits, demonstrating the use of various appliances and equipment for lightning tasks on the farm and in the farm home, and two cars of farm and home exhibits. Operation of the electrical appliances was with power furnished here by the Texas Utilities Company.

The varied exhibits aboard dealt with the benefits of improved farming methods, a live at home and how life on the farm and ranch may be made more comfortable, happier and of greater profit. The program as a whole featured such general objects as agronomy, beef cattle, dairy cattle, poultry, hogs, sheep and goats, farm electrification, feeding and clothing the family, 4-H club work, yard beautification, rug making and home industries. In the exhibits displayed, visitors to the train found illustrations of the points stressed by the specialists.

The Santa Fe operated agricultural train in Texas in 1923, 1924 and 1928. The 1932 farm and home special is the 47th such train run by the Santa Fe system in cooperation with the agricultural colleges in the 12 states in which it operates.

Check of the visitors to the train in Panhandle and Santa Fe territory showed that nearly 30,000 had viewed the exhibits up to and including the stop here. Prior to beginning the P. & S. F. schedule, the train had been visited by nearly 60,000 people at stops on the G. C. & S. F.

During the stop here the Star representative had the pleasure of meeting individually many of the fine people who were in charge of the train and the exhibits, and especially that of meeting Mr. Curtis Vinson, publicity manager of the A. & M. College, who invited him to meet him in his office in the rear car of the train. In

Plains Wheat Looks Good, Says Howard G. Morris

Mr. and Mrs. Howard G. Morris, local manager of the Buchanan & Rosson Company, drove to Happy Sunday and spent the day with his parents and other relatives and friends.

Mr. Morris reports that wheat along practically the whole route he traveled is looking in prime condition and that with ordinary weather conditions between this and harvest there should be at least an average yield.

Mr. Morris also stated that there was one part of the country where farmers had not produced enough feed last year to meet the demand of feeding their livestock through the winter and some of them were renting wheat pasture where the wheat is in good condition for farming.

Grain Novelties.

Dr. A. P. McElroy, who is always desirous of introducing some new crop or breed of fowl that will add profit to the efforts of the farmers of this locality, has received some seed of two new varieties of grain for this country.

The new grains are the bald or beardless barley, from Colorado, and the hullless oats, which seed he secured from Indiana, and he has enough of each of these varieties to plant at least four acres.

The doctor hopes that these varieties will prove profitable in this locality, and the fact that each is a perfectly hullless grain, he thinks will add materially to the value of the product.

Home From Valley.

F. W. Reeve and F. N. Welch who left Monday of last week for Webb county, returned to Friona Friday night. They report a pleasant and enjoyable trip and that farming conditions throughout most of the territory through which they passed looked promising. One exception was that in one locality farmers were busy plowing wheat under, it having been killed by the recent cold weather.

Roads, they say, were good all the way and they had the pleasure of observing some of the quaint and queer customs of our neighbors across the Rio Grande.

A Texas Centennial.

A patriotic move has been inaugurated to celebrate the independence of Texas in a state-wide centennial exposition to be held at Austin in 1936, and an association has been organized to reformulate and maturing plans for its promotion and successful termination. Much publicity will be given this move in the next few years in which the Star expects to join, and our people will be kept posted as to the progress of plans made.

Our conversation with these people they expressed their appreciation of the interest taken by the Friona visitors in the various exhibits as was manifested by the many questions asked concerning the application of the various methods that were demonstrated by the said exhibits. They also expressed their appreciation of the large number who were present regardless of the disagreeably high and chilling wind that blew during the entire stay of the train. They also proved by their words and actions that they were masters of the situation and truly knew their business in this particular job.

S. F. Warren, one of the leading and most progressive poultry breeders of the Friona territory, also had the especial pleasure and benefit of a personal meeting and interview with Mr. Cunyus, the poultry expert in charge of the poultry exhibit, and also of meeting Mr. Venson in his office, who extended him an urgent invitation to enter some of his flock in the laying contest at the college.

All things considered, the visit of this train to Friona was of great interest and benefit to our people in bringing them to a realization of the fact that there are yet many ways of increasing profit and comfort to those who till the soil and tend the flocks and herds of the country, and the railway company and agricultural college have the thanks and appreciation of our people in their efforts to bring these things to us.

City Politics Simmering; Boiling Hot by Tuesday

As was stated in last week's issue of the Star, city politics is gradually coming to life and bids fair to become a thoroughly "quickened" corpse by the dawning of election day which is Tuesday of next week.

At this writing three petitions for nomination have been filed and ordered placed on the official ballot for the decision of the voters. One of these petitions contains the name of M. A. Crum for mayor and D. H. Meade and J. A. Blackwell for commissioners. Another contains the name of F. L. Spring for Mayor and the names of E. V. Rushing and F. W. Reeve for commissioners, and the third contains the name of S. Mitchell for mayor and E. B. McLellan and L. Dilger for commissioners.

This list shows three candidates for mayor and six for commissioner, with only one mayor and two commissioners to be elected, therefore vote for only one mayor and two only for commissioner, but each individual voter is allowed the privilege of making his selections from the list that will be printed on the ballots, and since this list presents men of a variety of ideas concerning the city's government, each voter should be able to find therein men for these offices who represent ideas which he can conscientiously champion.

Lubbock Athletic Mecca.

According to circular letters sent out by the Lubbock chamber of commerce, Lubbock will again be the mecca of athletic spots when high and rural schools, individual athletes and track teams will gather there from all over West Texas and Eastern New Mexico for the second annual Texas Tech high school relays on April 9.

Four hundred dollars worth of prizes and attractive trophies will be given away to winners in the contests by the Lubbock chamber of commerce and merchants of the city.

Deadline for sending entries to D. H. Smith and the college has been set for April 5, and drawing for places will be held at 9:00 a. m., April 9. Smith has announced.

Baptist Church Notes.

There was a fair attendance at all services. At about 3:30 in the afternoon the baptizing was held at a tank about eight miles west of town. At the evening service the congregation enjoyed a solo by Miss Wayne New and a reading by Mrs. Applewhite. The reading was a portion of an article in the March issue of the Ladies Home Journal written by Albert Peyson Terhune, which article is here recommended by this writer as being of considerable worth.

Beginning next Lord's day the classes of our Sunday school as well as those of other churches which follow the International Uniform Lesson series, begin the study of the book of Genesis, the book of beginnings. This book, which tells of the creation of the earth, the origin of man, his fall through sin, and God's promise of the Redeemer, seems to be most hated by satan of all the books of the Bible, for it has been most fiercely assailed by his emissaries, the so-called higher critics and pseudo scientists. But it has the approval of Jesus Christ as to its divine origin, hence to reject the book is to reject Him of whom it testifies, and to reject Him is to reject life eternal and to choose eternal condemnation. No one can have an intelligent understanding of the Bible and be ignorant of the Book of Genesis, and no person can be truly educated without a knowledge of the Bible. Hence, all who have not been in the habit of attending Sunday school are urged to begin next Sunday and take up the study of the Bible at its beginning.

REPORTER.

Announces Farm Sale.

Otis Cook announces a public farm sale for Tuesday, April 5, at his farm home two miles south and five miles east and one-half miles south of Earth. The entire farm equipment consisting of mules, horses, cattle, poultry and farm machinery will be put up for auction.

Mr. and Mrs. J. G. Weir of Hereford spent Sunday with relatives and friends here.

Boys At Black Organize Ball Team; Want Games

Chas. Bennett and Bud Barnett of the Black community, were in Friona Monday and reported that boys of their locality have organized a baseball club in their community with a membership of 18, thus making two full teams.

The boys are prepared to enter games at any time throughout the ball season and will take on a game with any other club, no matter where or when. They are anxious to play ball and expect to have some really thrilling games during the season.

To date they have played Summerfield and Westway, winning in each game, defeating Summerfield on the 27th to the score of 11-4, and Westway on the 25th, 8-2.

Ben F. Ridge Here; New Gin Will Be Put Up

Mr. and Mrs. Ben F. Ridge of Duncan, Oklahoma, departed for their home on Tuesday, after a stay of several days here in the interest of the Friona gin of which they are owners.

Mr. Ridge expressed himself as very well pleased with the settlement given him by the insurance company for the loss of the gin by fire on March 18. It is his present plans to rebuild the gin during the summer and thus give Friona a bigger and more efficient gin than before.

Friona Woman's Club Report.

The Friona Woman's Club met at the home of Mrs. H. G. Morris Wednesday afternoon, March 24, with a large number present. The following program was given:

Response: Favorite Short Story and Arthur.

"The Return of the Tide," by Kathleen Norris; Mrs. Ray Smith, Selected Short Story; Mrs. H. W. Wright.

After the program dainty refreshments were served by the hostesses, Meses, L. G. Symson and H. G. Morris.

The next meeting, which is Guest Day, will be held in the Congregational church basement. Each guest will be asked to respond to roll call by naming her native state and some interesting fact about it.

MRS. J. R. RODEN, Reporter.

Community Singers Here Sunday; Dandy Program

The community singing convention held here in the Capitol theatre building Sunday afternoon drew one of the largest crowds of people ever assembled here for a similar occasion.

Manager O. G. Turner of the theatre stated that there were at least 600 people in the building at one time, the largest congregation that had ever assembled there. Of those who were seated in the large auditorium some were almost constantly leaving the room and others taking their places, so that it is estimated that about 1000 different people occupied the building during the afternoon.

A large number of singers from various localities occupied seats just in front of the stage and did the major part of the singing, being led at different times by some leading singer of the territory.

In addition to the choir and congregational singing there were a number of special features presenting a number of special selections. Among these were E-hols Stramps Melody Boys of Miami, Florida, these two singing groups being the most prominent attractions from a distance, and all of their numbers were greeted with ringing applause from the audience, all of which seemed to be fully in accord with the music.

Everybody present seemed to enjoy the occasion to the fullest extent and departed in the best of spirits. Just where the next convention will be held has not been learned.

Biggest Movie Theatre.

Amarillo expects to be the center of attraction so far as the "movie world" is concerned when she opens her big 1700 seating capacity Thursday, April 12. It is said it will be a regular Hollywood opening, and many notables of the film and theatre world are expected to be present. The building of this great structure, which is 90 by 180 feet, was done to banish depression and unemployment in Amarillo since its average daily payroll carried 128 names. It required 50 tons of steel, 8 carloads of terracotta, 1,000,000 bricks, miles of wire and conduits, 50 carloads of sand and gravel, 4,000 sacks of cement, 1400 yards of carpet and 8 carloads of miscellaneous equipment.

Pentecostal Church Notes.

We are glad to announce the coming of Bro. S. C. McLain of El Paso into our midst to conduct a revival meeting. Bro. McLain comes to us well recommended as a soul winner, having had good success in places where he has labored. He is now in Albuquerque, New Mexico, conducting a revival meeting, and many are getting through to God.

His knowledge of the Bible is deep, he having conducted Bible schools in the past. His ability as a preacher is to bring the message to the people is wonderful. His wife is also an able preacher and will probably assist here.

The Methodist congregation has gladly agreed to let us use their building for these meetings, so remember the place, the Methodist church, and April 5 as opening date.

Last Sunday we hurried through our services as two candidates were to be baptised. A number went with us to a pool of water near Hereford where the candidates were buried for the remission of their sins.

W. H. Warren and J. C. Wilkins were business visitors in Farwell Tuesday, the former going to have some abstract work done.

Rev. O. B. Annis Points Out Why All People Should Be Interested In Welfare of Friona Boy Scout Organization

School Board Members Elected Here Saturday

School election here Saturday of this week with the following candidates: A. H. Boatman, E. B. McLellan, E. S. White, F. W. Reeve, David Mosley, J. B. McFarland.

Do your duty, citizens, by going to the polls and voting for the men of your choice.

The city election will be held Tuesday, April 5. Candidates for mayor, M. A. Crum, F. W. Reeve and S. Mitchell. Candidates for commissioner are E. V. Rushing, F. L. Spring, D. H. Meade, E. B. McLellan and L. R. Dilger. Vote for your choice, one for mayor, two for commissioner, but vote.

Wheat Growers Meeting.

F. W. Reeve, local member of the board of directors of the Texas wheat growers association, received an urgent call to attend a meeting of that board in Amarillo Tuesday afternoon.

Mr. Reeve stated to friends here before departure that he was unacquainted with the nature of the business to be taken up, except that one of the higher officials of the Farmers National Grain Corporation from Chicago would be in Amarillo and the organization would probably go over some plans for the more effective working of the association during the coming wheat season.

Up With His Farm Work.

J. L. Richardson, one of our progressive farmers living at the southwest corner of Friona, is sure among those who are keeping up with their farm work.

Mr. Richardson reported while in town one day recently that he has his spring listing done and all ready for the planting season, he having listed in the neighborhood of 200 acres during the latter part of the winter.

Mr. Richardson intends to plant 100 acres, or maybe 150 acres of this land in cotton. The remainder will go to the ordinary row feed crops, and having his ground bedded at this time will have enough moisture stored therein to bring his crops through the ground when the warm planting season arrives.

Hereford People Here Sunday.

Mr. and Mrs. J. G. Weir and their niece, Miss Virginia Lillard, of Hereford, spent Sunday here visiting relatives and friends and attending the Easter program given by the primary department of the Congregational Sunday school.

Mr. and Mrs. Weir are former residents of Friona and have a host of friends here who are always pleased to have them return to Friona. Miss Lillard is the daughter of Mrs. J. C. Hill and has spent her school days here, graduating from the Friona high school last year and is now assisting her uncle in his store in Hereford. Her friends here were truly pleased to have her with them again.

Congregational Church Notes.

The usual interest was taken in the Sunday school service last Sunday with a somewhat larger attendance than has been present for the past few weeks.

Many more came in for the Easter day program by the primary department, which took place of the regular worship service, and proved of great interest to all present.

The committee having the program in charge truly did its work well and received the hearty commendations of the audience for the matter in which the little tots had been trained to perform their parts.

A new program committee has been appointed for the month of April, and a good program may be expected each Sunday morning.

Ladies Aid Meeting.

The Congregational Ladies Aid will meet Thursday afternoon of next week with Mrs. J. A. Guyer.

It has been said that when children first learn anything they think people generally do not know it and they therefore set out to inform the world of the newly acquired knowledge. It may be that some of us adults are more or less childish in this respect. At any rate, I have recently learned that there is a great deal to learn about the Boy Scout work and I have also learned that there are others who know as little as I did about it; and, furthermore, I have found the work to be founded on so great a basis and to stand for such high and worthwhile things that I just naturally want my neighbors to find out these facts also. For that reason I am dropping this line to you.

In the first place, the Boy Scouts movement is international in scope there being scout organizations in most of the leading civilized lands of the world. Next may we call attention to the fact that there is absolutely no connection or relationship between the Boy Scouts of America and the Girl Scouts of America. The fact that they are absolutely disassociated and unrelated in organization renders it somewhat unfortunate that they have so nearly the same name. This fact is somewhat confusing. In the third place, the local Boy Scout troop must be sponsored by some worthy and reliable local organization. It is not independent and cannot be led or directed by any individual who sees fit to do some work with the boys. Fourth, there is absolutely no relationship between the Boy Scouts work and the army or navy. The Scouts uniform and their salute are somewhat, in a general way, similar to those of the army, but they are similar in no other respect. Boy Scouts are at no time trained in military work at all.

With these few facts in mind, let us proceed with the work of our own Boy Scout troop. The Friona chamber of commerce is the sponsoring organization of our work here, the work of the troop is therefore as non-sectarian as is the chamber of commerce itself. This sponsoring organization names a committee of men who supervise and direct the work in every respect. Our local committee visited with the troop on last meeting night and seemed to be pleased with the progress that is being made with the boys.

We have a group of splendid fellows, about 13 years of age, and are contemplating some interesting work as soon as we can get ourselves thoroughly organized and regulated. At present we have only about half a full troop, but we are not seeking to add others until we master the work in hand. When we have learned well the Tenderfoot work and have passed this stage and have become Second Class Scouts, then we shall be prepared to accept some new members for the Tenderfoot work.

Watch next week's Star. Perhaps some of the boys themselves will have a word about the work for you.

O. B. ANNIS, Scoutmaster.

Drove to East Texas.

Ervin Johnson and F. S. Truitt left here Saturday for a few days visit at Nocona and Gainesville, respectively. Mr. Johnson went to Nocona to bring his wife and daughter, Miss Jewel, home with him, after they had spent a week visiting relatives there, and Mr. Truitt accompanied him as far as Gainesville, where he will spend the intervening time with Mrs. Truitt and their children, Frank and Miss Mary Lou.

Confidence In Advertising.

There are those who do not believe in advertising, and there are those who have great confidence in it. Here are a few words from one of the latter:

"If northwestern merchants would spend more money for newspaper advertising, they could break the 'buyer's strike' and bring millions of dollars out of hiding." P. A. Egelund, of St. Paul, told more than 1000 retailers during Twin City Market Week.

CAN YOUR COMMUNITY BE BETTER THAN YOUR LOYALTY

Four things come not back—the spoken word, the sped arrow, time past, and the dollar you spend in or send to some other man's city.

Summerfield

BY MRS. L. JOHNSON

W. M. S. met Wednesday with Mrs. B. C. Roberson in charge of program. Mrs. A. Lookingbill gave special songs. Mrs. B. Roberson piano numbers. Eight members and three visitors attended. Leatrus Walsler and Geraldine Kendall were in Dimmitt Friday.

Miss Christine Fincher, Hereford spent the week end with Miss Mary Lee Curry.

Mrs. Guy Easley and daughter of Crowell are visiting her parents, Mrs. and Mrs. A. J. Blakehome.

Mrs. Geo. Story was sick last week. Jas. Smith has returned from a visit with his parents at Gainesville.

Misses Martin, Wolfe, Hostetter of Hereford attended the club party at Mrs. Lee Curry's home Friday night.

Louie Huckert, Amarillo, spent the week end here.

Messrs. and Mmes. Denison Hill and Walter Hawkins of Ford, and Bill Knox of Hereford spent Sunday in the B. A. Atchley home.

Mmes. W. Huntley and M. Abbott were in Amarillo Thursday attending a Baptist meeting.

The H. M. S. club entertained their husbands Friday night with a party at the Lee Curry home. Forty-two and bridge were followed by refreshments. Eighty attended.

Jake Roberson and family of Canyon visited the Britt Clark

and Geo. Story homes last week end.

Forbus Blakemore was in Dimmitt last week.

Mr. and Mrs. M. Madden entertained with a party Saturday night. Games and refreshments were enjoyed by about 25 guests.

Miss Frances Reems of Canyon visited the Waiser home Sunday.

A. J. Blakemore and family, Mmes. Ed Peacock, Amarillo, and Guy Easley and daughter of Crowell visited the E. Blakehome home at Progressive Friday night.

G. F. Morgan and family, Vega visited the M. Madden home last week end.

Mrs. E. Peacock, Dimmitt, visited the parental A. J. Blakemore home last week.

Louie Huckert and family visited the J. Helsing home in Vega last week end.

Miss Fannie Manning visited her parents in Plainville Sunday.

Mrs. W. A. Davis and son returned to their home in Clarendon last Thursday.

Belle and Densil Long, Texico, visited friends here Sunday.

B. A. Atchley and J. A. Noland have returned from Hot Springs, New Mexico.

Mrs. Alva Wilson and children of Hereford visited Mrs. Beulah Roberson Sunday.

J. T. Cronin and wife, Hereford, spent Sunday in the W. Huntley home here.

Geo. Scheuburger, Iowa, visited his sister, Mrs. E. W. Murdock, last week.

Miss Ruth Smith, Hereford, spent Sunday in the B. C. Roberson home.

Joe Kendall and family, C. R. Waiser and family, Frances Reems and Mildred Fullwood took dinner in the J. C. Lance home in Hereford Sunday, celebrating the wedding anniversary of Mr. and Mrs. Kendall and birthdays of C. R. Waiser and Betty Joe Kendall.

Black defeated the Summerfield baseball team Sunday.

W. M. S. made over \$11 in their bake sale at Hereford Saturday.

M. E. Murdock and wife and Geo. Schlenberger were in Springlake visiting relatives Sunday.

Pupils of Rance school, Miss Leatrus Walsler, teacher, enjoyed an egg hunt Friday afternoon.

C. Carr and wife and Mr. Southern attended services at Black Sunday.

P. T. A. met Wednesday night. Third grade pupils gave the program. A social hour was enjoyed.

Mrs. L. Johnson is seriously ill this week.

John and Walter Kouch of Gatesville are visiting W. H. Shultz.

D. J. Neill was in Canyon last week.

Trees are being put out around the school house, and flowers will be planted. A fence is being put around the yard by teachers and pupils.

Visited In Tulla.

Mrs. Minnie Goodwine and her children, Clyde V. and Miss Floy, went to Tulla Saturday afternoon and spent the night and Sunday visiting in the home of Mr. and Mrs. K. G. Glennin.

Mr. and Mrs. Glennin were formerly residents of Friona. Mr. Glennin being engaged in the grain business while here.

Notice, Methodists.

In view of the fact that we have been interrupted in our regular services for the past three Sunday, we are desirous of having a good all-around service next Sunday. Let's have a full house and a really worth while hour of worship.

O. B. ANNIS, Pastor.

Locals

Jesse M. Osborn of Muleshoe was a business visitor in Friona Thursday. Jesse is foreman of the Muleshoe bank.

Mrs. Kay Farha spent last Friday with relatives at Portales, New Mexico.

J. R. Honchen of Clovis, New Mexico, was a business visitor in Friona last Friday.

Mrs. Jim Taylor and children Miss Zella Taylor and Bob Burnette were shopping in Hereford last Thursday.

Mr. and Mrs. Homer T. Walker spent last Thursday in Amarillo.

Mr. and Mrs. E. W. Denney were business callers in Hereford last Saturday.

Mr. and Mrs. H. Habbinga and daughter, Miss Lessie, of Abernathy, spent the week end in the home of their son, Mr. and Mrs. D. E. Habbinga.

Taylor Oglesby of Hereford called on friends here Wednesday.

Irwin Johnson and B. F. Trullitt spent part of last week in Nocona and Gainesville. They returned home Monday and were accompanied by Mrs. Johnson and Mrs. H. C. Wells, who have been visiting there the past two weeks.

David Helmer and daughter, Miss Freda, of Woodward, Oklahoma, spent last week end here in the home of his children, Mr. and Mrs. Joe Helmer.

F. S. Trullitt returned Tuesday night from a few days visit with his family at Gainesville.

A year's subscription to the Friona Star will keep you posted as to what is transpiring in your home town and community. Only \$1.50.

Miss Rena Habbinga and friend of Amarillo visited friends and relatives here Sunday.

Mr. and Mrs. Wicks of Clovis, New Mexico, visited in the home of Mr. and Mrs. Jennings one day recently.

Turkey Luck Is Management.

Many women of the Friona territory raise turkeys each year, many others try to raise them but do not succeed, at least for profit. The following may help all in their efforts:

Prevention of worm infestations and good feeding throughout the season equalled 917 Texas turkey demonstrators last year to market 85 per cent of their birds as No. 1's and to make average profits of \$2.04 per turkey, says Paul Cunyus, assistant poultry husbandman in the extension service of Texas A. & M. College; and the U. S. department of agriculture. Demonstration flocks supervised by county and home demonstration agents numbered 71,371 birds of which 60,614 were sold for \$204,730. The cost of raising and marketing was \$58,996.

Turkey raisers are coming to the conclusion that feeding a flock of turkeys is important in keeping the flock healthy, securing good market weights, and producing birds without crooked breast bones or other drawbacks that keep them out of the No. 1 grade, declares Mr. Cunyus. From the first of the season a dry laying mash should be kept in front of the breeders at all times. Any good chicken laying mash will do. A good formula used by many demonstrators who mix their own consists of 200 pounds gray shorts or

finely ground wheat, 150 pounds yellow corn meal or milo meal, 100 pounds meat and bone scrap, 25 pounds alfalfa leaf meal, ten pounds fine oyster shell and five pounds salt. Enough whole grain is fed at night to keep the birds in good condition without fattening.

Young poulters are fed much the same as young chicks but in two or three weeks may be given a mixture of 45 pounds yellow corn meal, 20 pounds shorts or ground wheat, 10 pounds alfalfa leaf meal, 5 pounds meat scrap, 5 lbs. bone meal, 3 pounds oyster shell and 1 pound salt where plenty of skim milk is available. The bone meal and oyster shell prevent the crooked breasts.

To prevent worms keep turkeys and chickens separate at all times, treat the breeders for worms at the start of the season and avoid having dirty, sloppy places about the premises, says Mr. Cunyus. Green feed builds up resistance to worms, and is needed throughout the turkey's life. Lack of it causes much of the summer rump. If worms appear in spite of these precautions birds should be treated every 60 days by one of the common and successful worming treatments demonstrators are using.

FEDERAL LAND BANK WAIVES ALL LIENS ON CROP LOAN PAPER

(From the Hereford Branch) Advice reaching Owen W. Sherrill, regional manager of the farmers' seed loan office of the Reconstruction Finance Corporation, Dallas, from President M. H. Gossett, are to the effect that the Federal Land Bank of Houston will waive all prior liens it holds on the crops of its borrower, in order that needy farmers may take full advantage of the crop-production credit made available in Texas through the U. S. department of agriculture. Several days ago Judge Gossett wired that the lien of the Federal Land Bank would be waived. He stated in a letter to Mr. Sherrill, in no uncertain terms, the Federal Land Bank's decision. "We advised the agricultural department at Washington, through the farm loan board, Saturday, 19th, of our policy in line with our telegram to you. I suggest that you advise all local county committees approving loans to Texas farmers of the attitude of the Federal Land Bank of Houston, that it is not necessary to send such crop mortgages to Houston for release of first lien. This action on our part may be treated as a blanket waiver in favor of the government's loans," writes Judge Gossett.

This step on the part of the Federal Land Bank is of the greatest significance at this time to Texas farmers requiring immediate assistance in order that they may make their arrangements for the credit that they need so badly to finance the crops which must be planted within the next few weeks. This action has already made it possible for hundreds of farmers in Texas to complete their loans through the farmer's seed loan office at Dallas.

A number of the more important life insurance companies who hold mortgages against the 1922 crops of Texas farmers, have also expressed their willingness to waive their liens with result that a much larger volume of crop production credit will be made use of in Texas than could possibly have been used without their cooperation.

CUTTING HOG FEEDING COSTS MAINTAINS PROFITS

College Station—Texas farmers and club boys who fed and managed hogs in 1931 by demonstration methods outlined by county farm agents succeeded in keeping their profits up to previous standards by reducing their feed costs to less than one-half those of the

CLASSIFIED

FOR SALE: 120 bushels of good cotton seed. C. R. Owens' crop. 60c a bushel. Ralph Tedford, Friona. 34-4p

ATTENTION, BREEDERS: I will stand my well bred jack during the season beginning April 1, at my farm 3 miles north and 3 1/2 miles west of Friona. Service fee will be \$7.00 to insure with foal. I will not be liable for accidents should any occur. M. C. Osborn. 37-5c

FOR SALE: Recleaned Grohoma seed. Cross between kafir and Japanese ribbon cane. Farmers Elevator, L. M. Ware. 37-1c

BABY CHICKS: April prices, \$8 per 100; 300 for \$22.50. Buy quality chicks while chicks and feed prices are low. Next hatch available April 11. S. F. Warren. 37-4c

FOR SALE: The very best Rhode Island Red baby chicks and eggs. Chicks \$6.50 a hundred, eggs \$2.00 a 100. From State Accredited Flocks. R. L. Chiles, Friona. 34-4f

FOR SALE: Mastodon Ever-bearing strawberry plant, \$1.00 per hundred. O. E. Stevick, Friona, Texas. 36-4c

the Texas Potash Company not later than May 1, in Ector and Midland counties.

An organization of progressive young farmers of Batavia, New York, are now shipping all their potatoes in cotton bags instead of burlap bags as heretofore. The material for burlap bags comes from India, while that for cotton bags is grown in the U. S. A., and the process is about the same for each. This will help, at least a little, to stabilize the cotton market.

Dimmitt now has a nine-hole golf course almost completed south of town, according to the Castro County News.

At an all day meeting in the circuit court room on Friday of last week, the city commission of the city of Dimmitt heard arguments for and against the street paving proposition. Eleven pro-

tests were filed by parties owning property on the streets that are to be paved. Four parties made talks in favor of the paving, according to the Castro County News.

A gas explosion in which three buildings were wrecked and four persons were injured occurred at Panhandle about 10:30 a. m. of Wednesday, March 16.

Twice as much sudan grass for hay and pasture will be planted in Ochiltree county this season than last because of demonstrations showing it to be the most economical temporary pasture than can be raised in this section, according to Guy R. Shields, county agent. Last year more than 50,000 pounds of seed was planted in spite of its high price.

You can buy some mighty nice bond paper in letterhead size at very attractive prices at the Star office.

All Kinds of
Garden Seeds, Irish Cobbler and Triumph Seed Potatoes
Lee Overalls, in 220 and 8 Ounce Weights—made to fit and fit to wear.

F. L. SPRING

SPRING TIME IS WORK TIME!

On farm and in garden—with teams and implements. HARNESS? Yes, we have the makings for the cheapest, most satisfactory and most serviceable harness yet devised. See us about it. Leather collars, cloth collars, bridles, halters and all, for the new. Straps, buckles, reins, snaps, hooks, everything to repair your old.

Garden Seeds, Plows, Cultivators, Rakes, Hoes, Hose, Sprays, Nozzles.

April 3.

GOD IN CREATION

Gen. 1:1-5; 2631-

Gen. 1:1. In the beginning God created the heavens and the earth.

2. And the earth was waste and void; and darkness was upon the face of the deep; and the spirit of God moved upon the face of the waters.

3. And God said, Let there be light; and there was light.

4. And God saw the light, that it was good; and God divided the light from the darkness.

5. And God called the light Day, and the darkness he called Night. And there was evening and there was morning, one day.

26. And God said, Let us make man in our image, after our likeness; and let them have dominion over the fish of the sea, and over the birds of the heavens, and over the cattle, and over all the earth, and over every creeping thing that creepeth upon the earth.

27. And God created man in his own image, in the image of God created he him; male and female created he them.

Golden Text: In the beginning God created the heavens and the earth.—Gen. 1:1.

Time: Geologists and astronomers vary by many millions of years as to the age of the world, and the data available are slight and precarious. Moses dates it as definitely as possible, "In the beginning."

Place: Many facts point to Western Asia as the primitive home of the human race, probably Babylonia; but here also we are met by many conflicting theories.

Introduction.

We now start on a most interesting and valuable course of study. "Having completed the study of the greatest Book of the Bible, the Gospel of John, the Book of Spiritual Beginnings, we turn to the fundamental Book of the Bible, which is the Book of Physical and Historical Beginnings. That is the meaning of its name, for 'Genesis' is the Greek for 'origin'. We are to study the origin of the universe and the world, the origin of man, the origin of the races, and in particular the origin of the great Jewish race which gave us our Bible and from which Christianity sprang."

The Book of Genesis.

Genesis is the first Book of the Pentateuch, which means "The Five Books." These first five Books of the Bible are called "The Law," "The Law of God," or "The Law of Moses." In numerous places through the Pentateuch Moses is expressly stated to be the writer.

The history opens with an introductory section (Gen. 1:1-2:3) which declares how God in the beginning created the heavens and the earth as the theatre upon which it was to be transacted. This is followed by ten sections of unequal length, which make up the rest of the Book of Genesis, and are introduced by titles of a uniform pattern: "These are the generations of—" etc. The genealogies contained in the Book are not merely incidental and subordinate, but essential, and the real basis of the whole. They exhibit at once the kinship of Israel to all nations of the earth, all being of one blood and sprung from one common stock, and their separation from the rest of mankind for a special divine purpose. God's gracious choice of them to be his peculiar people until the time should arrive for spreading the

blessing of Abraham over all the earth.—Prof. William Henry Green.

In the Beginning, God.

"In the beginning, God created the heavens and the earth." "By these few simple words the 'gods many' of the heathen mythologies are swept away, the extravagant ancient cosmogonies are brushed aside; the degradation of material things, the degradation of the God-head, and the fabulous divine origin of mankind—everything, in short, that distinguishes the pagan systems—is contradicted, and the world and the human race are set in a new and brighter light."

—Prof. James Robertson. Note that the wonderful account goes back to the very beginning. Note also, in regard to this first chapter, "its brevity, absolutely unparalleled; the history of many millions of years, according to the scientists, told in thirty verses; the merest outline sketch. It is like compressing the map of a continent into less than a single inch."

—President S. C. Bartlett. "The heavens and the earth had a beginning; and as they had a beginning, therefore they must necessarily have had a cause. God made the heavens! They had a cause, and that cause was not anything unintelligent, not any accident, but a Divine, a forecasting, foreplanting, all-ordering, all-designing mind; and we infer this from the infinite signs and tokens of design that there are all round us, and that we know without ourselves."—Bishop W. C. Magee. "When did the creation occur? How long ago? All that we can gather from the record itself is that the creation occurred 'in the beginning'; a beginning that was indefinitely long ago. And that is precisely what science affirms about it."—Rev. D. J. Burrell, D. D.

A Name Growing In the Garden.

Dr. Louis Albert Banks illustrates this verse with the story of the father who drew his sours name in the garden mold and planted seed in the furrow. When the boy saw his name growing up in the garden and was greatly excited about it, his father at first pretended that it came about through change. But the boy would not

believe it, some one must have contrived it; and from that start the wise father showed the lad some of the many evidences of design in nature and in his own frame, and led him on to a belief in a personal Creator of the universe.

"And the earth was waste and void." "When the material elements of the universe were first brought into existence, they were diffused and formless; that is, they were not collected to form the suns and planets and satellites which now in such majestic circles wheel around each other in space. The nebular hypothesis is already a doctrine of science."—Prof. G. Frederick Wright, F. G. S. A.

God Said, Let There Be Light.

"God said, let there be light; and there was light." "The gospel of Genesis is that the creation is God's word."—Rev. W. S. Rainesford, D. D. "God's 'word' is the one medium or link between him and creation."—Horatius Bonar. "In the beginning was the Word, and the Word was with God, and the Word was God."—John 1:1. Jesus Christ was this Word incarnated. What more majestic description of God's power could there be than these eleven words, all of one syllable? They signify the setting in motion of the dull and stagnant mass of nebulous matter, and the beginning of that vast revolution which was not only to flash into light, but to come together into form. Fiat Lux. "Let there be light," was the motto of the first great English printer, William Caxton, and light, not only physical, but mental and spiritual, is ever the creation of God.

The Order of Creation.

The first chapter of Genesis goes on to picture the creation of the firmament (that is, the separation of the sky from the earth); (2) the grass and trees; (3) sun, moon and stars; (4) the birds and fishes, and (5) the cattle and other beasts. "The record in the Bible is, therefore, profoundly philosophical in the scheme of creation which it presents. It is both true and divine."—James D. Dana, professor of Geology, Yale University. While Genesis is not and does

not pretend to be a textbook of science, yet its correspondence with the order of creation of the plants and animals, as shown by geology and with the history of the formation of the stellar universe as shown by astronomy is so exact as to be far beyond the wisdom of Egypt imbibed by Moses. By itself, with nothing added from the remainder of the massive collection of 66 Books, it would suffice to prove the inspiration of the Bible.

"And God said, Let us make man in our own image, after our likeness." "Man's chief distinction lay in his likeness to God: (1) a 'living or immortal soul'; (2) an intelligent being; (3) with a conscience; (4) with a personal-ity; (5) with a will; (6) with moral righteousness; (7) with affections—with all these qualifications he was made ruler of all the earth."—Prof. Ira M. Price. The theory of evolution traces the stages of creation from the lowest organisms up to man, with steady progression according to a definite plan, but stops short of that which makes man what he is, his soul. "Why have the lower animals no poets, no painters, no prophets, no apostles, no literature, no churches, no worship? Simply because they are not created in the image of God in the special sense in which man is."—Prof. John Stuart Blackie. "Man is God's masterpiece—the diapason closes full in man. Man only was created in God's image; he only could have fellowship with God."—Rev. George H. Morrison, D. D.

Let Them Have Dominion.

"And let them have dominion over the fish of the sea, and over the birds of the heavens, and over the cattle, and over all the earth, and over every creeping thing that creepeth upon the earth." "Man shows his power to govern in his treatment of the wild animals. As he increases in civilization, those he does not need he destroys. Man exercises the same power over the vegetable world. He carries wheat and corn and potatoes and coffee from land to land, and develops and transforms plants by cultivation in the most marvellous manner. How wonderfully he has

entered into dominion over the mechanical, chemical, and electrified forces of nature! Man was made to have dominion over his physical body—the house in which he lives. Man has power over his own moral nature—the power of choice, of decision. Man may draw to his aid the power that holds the planets in their orbits."—Rev. Louis Albert Banks, D. D. Since the above words were written man has extended his mastery of nature by the submarine, the airship, the X-ray, and radio, and has penetrated to both poles.

Man, In the Image of God.

"And God created man in his own image, in the image of God created he him." "God made man with an intellectual, moral and spiritual nature like his own nature, as a simple bucket of seawater is like the ocean."—Rev. Edson L. Clark. "God is a spirit, and it is in the spirit of man that we must seek his likeness to God."—Rev. J. H. Worcester, Jr., D. D. "God made the animals to follow their natures, and to do each what it liked, without sin. But he made man to do more than what he likes; namely, to do what he ought."—Charles Kingsley. "Man was created with such powers and such possibilities, and held such a position with relation to the universe, that the eternal Son of God could become man, and, under the conditions of a

POLITICAL ANNOUNCEMENTS PARMER COUNTY, TEXAS

The Star is authorized to announce the following candidates for the offices under which their names are listed, subject to the action of the Democratic Primaries on July 23, 1932:

For County Judge and Ex-Officio County School Superintendent: CLYDE V. GOODWINE DAVID W. RAY

TIME SAVERS

—The great American instinct is to save time—a lot of time—and then some more time. In the big affairs and the little things of life, time is the most valuable thing at our command.

—Limited trains, automatic telephones, special editions of newspapers, sixty-miles-an-hour automobiles, airplanes still faster—we have these things in answer to our demand for speed. And an equally important time saver in the lives of people today is advertising. Just as surely as any other modern service, the advertisements bridge hours and days for people who have wants to be filled.

—Readers of advertisements are the same people who demand the utmost efficiency in communications, in business, in their daily life.

They know that a few minutes' reading of the advertisements will tell them more about products, values and the intelligent spending of their money than they could discover in days by any other method.

—And, like the other great time-savers, advertisements save money and energy, as well. The reading of them is a genuine human economy.
