

THE FRIONA STAR

Devoted to the interest of Friona and Parmer County

VOLUME 1 NUMBER 47

FRIONA, TEXAS, FRIDAY, JUNE 25, 1926.

\$1.50 PER YEAR

FARMERS TO HARVEST IMMENSE WHEAT CROP

From present appearances it seems that the wheat harvest will be on in full swing by the beginning of next week.

Many farmers thought their crop would be ready for threshing this week, but on closer observation it was found to lack considerable ripening before sufficiently dry for bulk storing, and those whose wheat seemed ripest think the remainder of this week will be required to sufficiently harden it.

L. F. Lillard was the first, so far as the Star has heard, to begin the harvest. F. N. Welch's combine started operations in Mr. Lillard's field Monday afternoon, but after cutting a few rounds it was decided it was entirely too soft. J. W. Parr, who has a large field near town, thinks he will not be safe in starting sooner than next week.

There are a number of good fields of wheat within a radius of two or three miles of Friona, many of which bid fair to make an unusual yield this season. Chas. Hart has eighty acres a mile north of town which when first in full head, from the number and size of heads, which if well filled, gave promise of not less than 25 bushels per acre. Mr. Hart says this field is now almost ready for the combine.

Clyde Goodwine tells us that he has 60 acres on their farm just south of town which is as good or better than any they have ever grown on their farm. The Goodwine farm has produced a yield of 27 bushels per acre, which would mean that this is no bad crop. Clyde very modestly refuses to set an estimation on the yield. D. H. Meade also has a small tract adjoining town, which has been estimated by some at 25 bushels per acre.

J. W. Schultz, whose farm is southwest of town, says his wheat is looking fine, but refuses to put an estimate on the yield, owing to the fact that it is on sod land and that he is an inexperienced wheat grower.

All things considered, wheat prospects for the season are quite satisfactory.

* LAZ-BUDDY NEWS. *
* June 21 *

Laz-Buddy will be attending in Sunday school. Seventy enrolled, and they had a good lesson.

Miss Phillips and Tex Knight were Clovis visitors last Friday.

Mrs. T. C. Reed visited Mrs. Prytz one day last week.

Jewel Treider and Johnnie Williams and Misses Annie, Freda and Alma Dyck attended preaching at Plainview Sunday afternoon.

Clifford and LaVerne Prytz were on the sick list last week.

The dance at Berman Howard's Saturday night was well attended.

Mr. and Mrs. Phillips visited at the Prytz home Sunday evening.

Mr. and Mrs. Prytz were Friona visitors Saturday morning.

Mr. and Mrs. Shaw and Mr. and Mrs. Prytz were guests at the Welch home last Sunday.

Miss Gertrude Prytz was the guest of Miss Ruby Bewley Sunday.

The singing at Laz-Buddy last Sunday was well attended.

Ha! Ha! Judge Knight, Jewel Treider, Johnnie Williams and Misses Annie, Freda and Alma Dyck were visitors at Oklahoma Lane last Sunday night.

The farmers certainly would appreciate a nice rain. The wind is taking quite a little moisture out of the ground.

J. E. Vaughn and Willie Steinbock's cows give so much milk that the neighbors have to help them milk them. They sure must be some milkers.

All of the Steinbock's and Prytz's took dinner at the Dyck home Sunday evening. It was a nice supper and all enjoyed it.

Pretty Brown Eyes.

MRS. C. E. ALLEN NOT IMPROVING

In conversation with Mr. C. E. Allen, of Homeland, who was in town Saturday, he stated that Mrs. Allen seems to get no better.

Mrs. Allen has been in ill health for some time and is now receiving treatment at the Clovis hospital.

Canning Cherries

Mrs. G. L. Livings and son, Donald, spent a part of last week at the home of her daughter, Mrs. Geo. Messenger, on the Messenger farm twelve miles northwest of town.

This is cherry canning time in the Panhandle and Mrs. Livings was out there helping Mrs. Messenger can their cherry crop.

FORMER RESIDENT HERE TUESDAY

S. B. Scoggins of Clarendon, Texas, was a business visitor in Friona and vicinity, Tuesday.

Mr. Scoggins formerly lived on his farm two miles south of town, but sold his farm early in the season and moved with his family to Clarendon, where he is engaged in the mercantile business.

A GOOD WHEAT SAMPLE.

N. B. Morton brought to the Star office Thursday afternoon a handful of threshed wheat which he had taken from the combine as he passed J. H. Key's farm, where Roscoe Parr's machine was in operation.

The sample showed a plump, well-colored berry but, in Mr. Morton's opinion, was not sufficiently hardened for storing in bulk.

INTERESTED IN FRIONA COUNTRY

The Star office received a card Tuesday from W. Z. Dilbeck, who is postmaster at Rocky, Okla., asking that the Star be mailed to him and we have placed his name on our list.

Mr. Dilbeck states that he has purchased a tract of land two and a half miles from Friona and is considerably interested in Friona and vicinity. He expects to visit this locality soon.

FT. WORTH PEOPLE HERE.

Mrs. J. H. Strawn and children, Norma Levern, daughter; and H. J., son; and Mrs. J. W. Write, all of Ft. Worth, Texas, are visiting in the H. P. Eberling home.

Mrs. Strawn and Mrs. Write are sisters of Mrs. Eberling.

READ THE ADS.

Read the ads in the Star this week. Our advertisers each has something of special interest to tell you. Their goods and wares are all first class and their prices as low as you will find anywhere and many of them lower.

Read the classified ad column. You may find just what you have been in need of and at a very reasonable price. If you have something you wish to sell or exchange, advertise it in the Star. Your neighbor wants it. A 25c ad brings home the bacon.

Remember, the only dollar you can ever expect to see again is the one spent in your home town. Read the ads and trade at HOME.

A DOUBLE HEADER.

On Sunday, June 13, the Friona team played the Dimmitt boys on the Dimmitt diamond, the game resulting in a score of 13 to 16 in favor of Dimmitt.

Last week's game was a double-header, played on the Friona diamond in which the Friona boys' first faced the Bellview (N. M.) team in an interesting game, resulting in a score of 11 to 2 in favor of Friona.

At the close of this game the local team crossed with the Bovina team in a third game of the season. The game produced a score of 6 to 0 in favor of Friona.

The game scheduled for next Sunday will be a return game with Portales, N. M., on the local diamond. An unusually good game is anticipated. In the initial game with Portales the score at the eighth inning was a tie of 1 to 1, when a succession of errors on the part of Friona allowed their opponents to make four runs which our boys were unable to overcome.

MORE COMBINES.

The Wilkinson Implement Co. this week received another car load of combines.

These machines were unloaded Monday and Tuesday and workmen are busily engaged setting them up ready for operation.

My Home Town First.

A Creed for the Home Loving Citizen.

I BUY AT HOME—

- because my interests are here.
 - because the community that is good enough for me to live in is good enough for me to buy in.
 - because I believe in transacting business with my friends.
 - because I want to see the goods.
 - because I want to get what I buy when I pay for it.
 - because every dollar I spend at home works for the community in which I live.
 - because the man I buy from stands back of the goods.
 - because I sell what I produce here at home.
 - because the man I buy from pays his part of the town, county and state taxes.
 - because the man I buy from helps support my school, my lodge, my church, my home.
 - because, when ill luck, misfortune or bereavement comes, the man I buy from is here with his kindly greeting, his words of cheer and his pocket-book, if need be.
- From Good Hardware.

Architect Meets With School Board

At a meeting of the school board on Thursday night of last week it was decided to increase the school room capacity by an addition to the present building.

Architect E. F. Rittenberry of Amarillo was present with the board and was able to give comparatively accurate estimates on the cost of the various plans under consideration. According to his plans and estimates it will be possible to secure ten full sized class rooms by addition to the present building at practically the same price that eight would cost in a separate building and for this reason the plan was accepted by the board.

Another meeting will be held on Friday evening of this week to work out the plans more definitely, both as to architecture and costs.

GUESTS AT GOODWINE HOME.

On Thursday of last week Mr. and Mrs. W. A. Costello arrived by rail from Kokomo, Indiana, for a visit at the home of Mrs. Minnie Goodwine and family.

Mrs. Costello is a sister of Mrs. Goodwine and this is their first visit to the Panhandle. They both express themselves as very favorably impressed with the plains country and it is hoped their stay here will be very pleasant.

On Sunday afternoon Mr. and Mrs. Fred Gates also arrived at the Goodwine home by auto, having driven through from Baton Rouge, La. Their home was originally in Kokomo also, but for the past six months have been visiting Mrs. Gates' mother, who is a sister of the late W. E. Goodwine. Mr. and Mrs. Gates will later journey through Oklahoma, Colorado and Kansas and finally to California.

M. D. Scott departed Thursday for a visit to his former home town, Hollis, Oklahoma.

Local Organization Texas Wheat Growers Held Meeting Monday

MR. AND MRS. DUCKNER NOW IN BERKELEY, CALIF.

The Star office is in receipt of a card from Supt. H. J. Buckner, mailed at Burbank, Calif.

This card was mailed June 19 and stated that he and Mrs. Buckner were leaving Burbank that day for Berkeley, where they will be in attendance at the California State University for the next ten weeks.

Mr. Buckner stated that everything there was lovely and asked that the Star be mailed to them at Berkeley, Calif., general delivery, until further notice is received. He asked that they might receive copies of the three editions issued since they left Friona, and the papers went out in Tuesday's mail.

The board of directors of the local organization of the Texas Wheat Growers Association were called together Monday afternoon by the chairman, Charles Schlenker.

The object of the meeting was to provide a place and means of handling the wheat grown by members of the association this season. The proposition was put up to the operators of both the elevators in Friona and offers received from each of them.

The directors were unable to complete the arrangements on that day and Mr. Schlenker was empowered to complete the arrangements and enter into a contract for the handling of the wheat. It is expected that a contract will be made with Gisler & Son to handle the wheat.

Returned From East

Mr. and Mrs. A. W. Henschel, who have been spending the past few weeks touring the eastern states and cities, returned home Tuesday morning.

Among the many places of interest they visited were Washington City, Georgetown, Alexandria, Annapolis, Philadelphia, Atlantic City, West Point and Chicago.

While in Washington they visited many of the government departments among which was the printing department where the government's paper money is printed and counted. They also visited the home of George Washington at Mt. Vernon. Among points of interest visited in Philadelphia were Independence Hall and the Sesqui-Centennial Exposition. While in New York they took a trip up the Hudson river to West Point. In Chicago they visited all the departments of the Marshall Field store and many other places of interest.

B. F. RIDGE HERE MONDAY.

B. F. Ridge of Duncan, Okla., was in Friona on business Monday.

Mr. Ridge is one of the owners of the Friona gin and was here last year during the ginning season superintending the operations of the gin, and is therefore well known to most of our people.

Mr. Ridge stated that he will not be with us this year as he has other employment, he having recently been appointed to a four-year term as postmaster of Duncan, which is a town of about 8,000 people. The Star congratulates Mr. Ridge on his appointment.

FORMER FRIONA BOY VISITING HERE

Vernon (Chunky) Crews of Corpus Christi, Texas, is visiting old friends here now. Chunky formerly lived here and has many friends at this place. He left here about four years ago and finished school at Meltonville, Kansas, then returning to Corpus Christi where his home now is.

Chunky and Reed Brownlee made a very interesting trip to New Mexico Tuesday and Wednesday.

LAZ-BUDDY STUDY CLUB.

The Laz-Buddy Study Club will serve lunch at the school house on Primary Election day. Everybody is cordially invited to bring your pocket full of money.

Don't you all worry, Laz-Buddy will have a club some day and I tell you the Friona club will have to put the gas to their club if they win. We are just started, but never mind, we will get some things done. We are slow about getting started, but we will sure get at it when we get started, you tell them.

HEREFORD BANKER IN FRIONA TUESDAY

G. A. F. Parker, president of the Western National Bank of Hereford, was a business visitor here Tuesday afternoon.

Mr. Parker stated last conditions about Hereford are good and prospects generally are promising for the farms in that locality. He said people are still coming in and gradually settling up the country.

M. E. MISSIONARY SOCIETY.

The M. E. Missionary Society met at the church building Thursday afternoon, June 24, with Mrs. Jones as leader and seven members present.

The second and third chapters of II Peter were read and discussed, after which we had a short business meeting.

Our next lesson will be a lesson in "The Voice," with Mrs. Walker as leader. Everyone be sure to be present next Thursday afternoon at 3:30.

CHURCH OF CHRIST.

Elder Corder, of Tulla, will hold a meeting in Friona, beginning Sunday, July 11, continuing through the week and closing Sunday, July 18th. School auditorium. Everybody invited.

Orval Stevick, accompanied by Reed Brownlee, went on a fishing trip Wednesday at the creek at Hereford.

Postmaster W. A. Wulfman of Farwell, was here a short while Thursday. Mr. Wulfman was accompanied by Mrs. Wulfman and their daughter, Miss Martha.

Parmer County Singing Convention

Bear in mind that the Parmer County Singing Convention will be held in the school auditorium in Friona, Sunday, July 4th.

Lunch will be served on the school ground at the noon hour and all ladies of the district are requested to bring well filled baskets of food.

Everybody come and make this the best convention yet held.

FRIONA PEOPLE VISIT IN NEW MEXICO

Mr. and Mrs. Pete Rhodes and son, L. E., accompanied by Mrs. P. M. Pritchard and daughters, Ola, Ernie, and Evans, left for Roswell, N. M., Tuesday, to spend a week visiting in the home of Mr. and Mrs. Gus Bennett, arriving in Roswell in time for dinner, then to the Bennett home where Mr. Bennett and Misses Mary Emma and Gaynell Blackburn and Porter Blackburn joined the party.

Then all went to the swimming pool after which they took in Brunk's Comedians show, then returned to the Bennett home where they spent the night. All were up early next morning and left for the Bennett ranch, which is sixty miles from Roswell, where Mr. Bennett raises thousands of both cattle and sheep. This country is mostly ranches and we saw but few farms. After looking over the ranch the party started back to Roswell. After about twelve miles from the ranch they spread dinner under some large trees.

After reaching Roswell the party motored out to Lover's Lane, then to the Bottomless Lakes. From there they hurried back to town where supper was awaiting them after which they attended Brunk's Comedians. After the show they motored to Page Park, about 1½ miles from town, to attend the dance. Spent Wednesday night at the Bennett home. They left Roswell Thursday morning about 9:30 o'clock, took dinner at Portales and arrived home at 2:30. While gone they took many interesting pictures of the country traveled over. Had no bad weather and the roads were good. All were tired but declared they had an enjoyable time while gone.

BOVINA ITEMS

* BOVINA ITEMS *

We are having a siege of hot winds. All of the crops need rain.

Miss Margaret Ezell returned Thursday night from a few weeks visit at Ralls.

Frank Stamps of Jacksonville is conducting a singing school here at the present. It will last fifteen days. Everyone has a special invitation to come and hear some real singing.

Miss Gladys Luelling of Tucuman, N. M., who has been visiting here a few weeks, has returned home.

Norman Wilson and family returned home Wednesday from a fishing trip at Hereford.

J. W. Ellison and daughter, Bessie, will leave Friday for Oklahoma. They will be accompanied by Mrs. Fred Carson and children.

Mr. and Mrs. Charley Tremble of Mobeetie are visiting their son, George, at present.

My! But I wonder what the ladies in the east part of this community will do, as their husbands have all gone to the harvest fields, excepting Fred Carson, and his wife has gone. Ladies, you had better watch your husbands.

Miss Margaret Ezell, who was seriously injured, has returned from the hospital and is said to be improving.

Ge! The "old men" of this community surely do make great mistakes. Frank Ayers getting Buck Ellison for a hired hand. The mysterious idea of "him" working out there.

Miss Cleve Lee Denny spent Wednesday night with the Ellison girls.

Messrs. Johnnie Glover and Jimmie Newman, who have been visiting here for a few months, will return to San Benito Saturday.

Mr. and Mrs. J. O. Head of Friona are visiting friends and relatives at Brownwood.

Mrs. Beets, who has been sick for some time, passed away Tuesday, June 22nd.

Miss Lillian (Bug) Oliver of Abilene, Texas, who is visiting her aunt, Mrs. J. H. Martin, of Farwell, visited in the Nat Jones home Saturday.

1—Last tavern on old Santa Fe trail, built 100 years ago at Arrow Rock, now purchased by state of Missouri as national shrine. 2—"The Pioneer Mother," by Proctor, made in bronze and given to Kansas City by Howard Vanderslice. 3—Landing the shore end of world's longest cable, from New York via Newfoundland to Land's End, England.

NEWS REVIEW OF CURRENT EVENTS

Iowa Shows Her Resentment Over Farm Neglect by Retiring Cummins.

By EDWARD W. PICKARD

NOT because of any special liking for Smith Wildman Brookhart nor because of any special animosity toward Senator Albert B. Cummins, but in order to express their resentment against the administration's attitude toward farm relief legislation. That is the generally accepted explanation of the action of the Iowa Republicans, who in the primary last week voted the veteran Cummins back to private life and named the radical Brookhart to succeed him. The fact that Mr. Cummins had broken with the administration so far as to support the measure demanded by the corn belt did not suffice to save him. The unofficial canvass of the vote gives Brookhart a plurality of about 70,000. Running third was Howard J. Clark, who may stand as an independent Republican candidate in November.

At the White House and among the closest friends of the President the defeat of Cummins was considered the result of a factional fight stirred up by the unseating of Brookhart and not a repudiation of the President on the question of farm legislation. Perhaps incidentally, Cummins is another pro-World-court senator to be refused re-nomination.

An analysis of the Iowa vote, compared with usual votes in that state, indicates that a lot of Democrats voted as Republicans for Brookhart, the supposition being that they believed he would be more easily defeated in November than would be Cummins. Most of the rest of the Democrats cast their ballots for Claude Porter, and the party leaders there and in Washington declare he will have an easy victory because, as they assert, many Republicans will vote for him, just as they did for Dan Steck, against Brookhart. That there will be enough defections from Brookhart to affect the result is denied by the Republican managers. However, even if Brookhart is elected, the G. O. P. may be considered virtually to have lost a seat in the senate, for he cannot be counted on in the matter of party regularity.

UNMOVED by the Iowa primary result, the administration is still flatly opposed to the corn belt price stabilization measure, and the prospects for farm relief legislation at this session of congress were decidedly faint last week. The farm bloc leaders submitted their surplus control plan to Secretary of the Treasury Mellon for an opinion of its soundness and hoped that if he looked on it with favor the President might be won over. But the corn belt senators and the cotton states senators could not get together, the Southerners saying they would not support the measure if the equalization fee were to be made applicable to cotton at once. They might fall into line if this application to cotton were deferred two years and made optional then, and if one-half of the proposed \$150,000,000 revolving fund were allocated to the cotton market operations. This, the corn belt men said, was impossible.

Senator Fess of Ohio opposes the McNary-Haugen bill partly because it would, in his opinion, be favorable to British rather than to American interests. He said it would "sovietize the great agricultural industry" in America and assure Great Britain a cheap food supply, transferring that nation's unemployment problem to the United States.

FLORIDA'S primaries, according to unofficial figures, gave re-nomination to Senator Duncan U. Fletcher. More interesting was the apparent defeat of Mrs. Ruth Bryan Owen, daughter of the Comptroller, for the congressional nomination in the Fourth district, which includes Miami. Incomplete returns showed that Congress-

man William J. Sears had been re-nominated, but Mrs. Owen's managers charged irregularities in several counties and said a contest would be made if the returns did not show her the winner.

SENATOR REED'S campaign investigating committee is now at work and already has found that the Pennsylvania Republican primary expenditures were far up in six figures—perhaps as much as a million. Representative Vore and Governor Pinchot both were on hand for the opening of the hearing, and expenditures made on behalf of the latter's candidacy, listed at more than \$100,000, were the first to get into the record, but toward the end of the session \$500,000 was mentioned in connection with the Pepper campaign. Pinchot's campaign treasurer, P. S. Stahlecker, said he had been told by Representative Morin, western Pennsylvania manager for Representative Vore, that an "under-cover man" the Vore forces had in the Pepper headquarters at Pittsburgh had informed him that the budget fixed by the senator's organization amounted to \$500,000.

THOUGH the senate judiciary committee reported that the recent Presidential order authorizing the use of state and city peace officers as federal prohibition officers is valid and legal, Treasury department officials announced that there was no intention of invoking the power at this time. Indeed, they admitted that the plan had been practically abandoned. The majority report of the committee in effect held the order was valid but meaningless. Senators King and Caraway denied its legality.

The Republican steering committee refused to place on the senate program the Goff bill designed to strengthen the Volstead act, and so practically shelved it for this session. Senator Wadsworth of New York, chairman of the committee, announcing this action, issued a statement demanding repeal of the Eighteenth amendment. He defied the dyes who are planning to defeat him next November, with F. W. Cristman, and declared he was wet to the core.

"While I advocate modification," he said, "I do not believe modification of the Volstead act within constitutional limits will solve the problem permanently. I think we must go back to the Eighteenth amendment itself and substitute for it a simple grant of power to congress. That done, I should hope that some system, such as the one now prevailing in Quebec, could be set up in this country."

Illinois dyes, who are fighting Brennan's modification referendum plan, were decidedly pleased with Wadsworth's admission that modification would not solve the question.

MEMBERS of the League of Nations committee on the opium traffic were roused to anger in their meeting in Geneva by Arthur Woods, former police commissioner of New York, when he strongly denounced the committee for not recommending any action to curb the drug traffic. The committee, he declared, had ignored the only solution offered, which is government ownership or control of all factories handling derivatives of opium and coca leaves and the strictest control on the destination of all drugs shipped out with records kept of the names and addresses of the consignees.

Holland is the chief manufacturer of morphine, cocaine and heroin, so it was Herr Van Betton of that country who arose to say: "It is unjustifiable that Mr. Woods comes here for the first time and tries to force all his ideas into the report. I protest energetically against attaching such importance to his statements." Chairman Bourgeois said he would try to get Mr. Woods to tone down his statement, but the New Yorker declared afterward he would not alter his report and the committee could take it or leave it.

WHEN the League of Nations council opened its sessions in Geneva it appeared that the quarrel over permanent seats was to be continued. The Brazilian member was absent, nominally ill, and Spain was represented only by an underling. Next day Senor Franco, the Brazilian,

appeared, however, and announced that his government had decided to withdraw from the council. The Spanish representative's substitute gave notice that Spain would quit the council in September unless it were given a permanent seat. It is believed both will resign from the league. The council arranged a conference of World court members to consider the American reservations.

FRANCE'S cabinet has been engaged in desperate efforts to save the franc, whose value dropped Wednesday to about 33 to the dollar, and after a lot of talk about food rationing and other severe measures, it decided to lift all restrictions on the export of capital, giving freedom of movement to the national currency. The coupon system, calling for the name and address of owners of all stocks, bonds, and other securities to insure taxation, was abandoned. French business will revert to the ordinary bearer paper, which does not disclose the identity of the owner. Further employment of the country's gold reserve to sustain the franc was also abandoned, the government deciding to heard bullion as a guarantee of credits and the eventual creation of a new currency. In adopting this plan the cabinet yielded to the opinion of expert bankers and conciliated the Bank of France. It was certain that a fight in the parliament would result, for the Socialists, radicals and communists consider the coupon system their pet scheme for insuring the taxation of the rich.

CHICAGO is making elaborate preparations to take care of the International Eucharistic congress the week of June 20 and Roman Catholics by the thousands are on their way there from all parts of the world. Every steamship from Europe brings numbers of eminent churchmen and prominent laymen who will take part in the impressive ceremonies in Chicago and in Mundelein, a suburb built by the Catholic church. Chief of the princes of the church there will be Cardinal Bonzano, sent by the pope as his legate. It is expected the congress will attract more than a million visitors to Chicago.

DISPATCHES from Tangier tell of the appearance of a new leader of revolt against Spain and France to take the place of the fallen Abdel-Krim. He is Ouldjar, a brigand chief of the Djeballas, and already his men have captured Chechouen, the sacred city of northern Morocco, and massacred its Rifian garrison. Though the Djeballa tribes are making war on the Riffs, they also hope to drive out the French and Spanish.

SECRETARY MELLON announced that, owing to the volume of revenues coming in to the treasury, the usual June financing in the form of issuing treasury securities would not be necessary. He said there had been increases in most items of receipts, especially in income taxes, and the treasury thereby was enabled to do away with a quarterly fiscal operation for the first time in more than eight years. The treasury will be able to go through to the middle of September without issuing new securities. There were indications at the treasury that the surplus for the fiscal year ending June 30 will approach \$275,000,000, or about \$20,000,000 greater than last year.

BRIEF Items of Interest: Ukrainians of East Galicia, who demand autonomy, have been fighting Polish government troops.

Zaglion Pasha refused the premiership of Egypt and the place was given to Adly Pasha, friend of Great Britain.

Chicago-Minneapolis air mail route was opened; Pilot Elmer Partridge was killed on his first trip.

Admiral C. F. Hughes was appointed commander in chief of the United States fleet.

President Coolidge plans to leave Washington for his vacation in the Adirondacks about July 4 if congress has adjourned by that date. Director of the Budget Lord asked an appropriation of \$325,000 for a new roof for the White House and \$25,000 for the President to pay rent while the repairs are being made, next summer.

GETTING RID OF HOUSEHOLD PESTS

Most Insects Go Where There Is Prepared Food.

(Prepared by the United States Department of Agriculture.)
A flea and a fly once met in a flea. Said the fly, "Let us flea."
Said the flea, "Let us fly."
So they flew through a flaw in the flea.

If not a flaw in the flea, a flaw in housekeeping accounts for a good many household insect pests. Most of them go where they can find their preferred food, and, if unmolested by remedial measures, soon breed in great numbers and become a serious problem. Many of the troublesome household insects feed on crumbs, scraps, and other exposed food. So keep your food supplies in tight metal or glass containers. Clean up promptly any food crumbs that may be scattered about. Don't leave any food uncovered. Keep your garbage pail closed, and have it emptied regularly. Rinse it out and line it with clean paper each time it is emptied.

Special precautions must be taken to get rid of breeding places for some kinds of insects. For instance, house flies breed in decaying vegetable and animal matter. So remove any decaying substances in or near the home. Mosquitoes breed in stagnant water, so cover the rain barrel, and allow no other stagnant water about. Windows and outside doors should be

Keeping Food So Insects Cannot Attack It.

closely screened, particularly against flies and mosquitoes. Fill up any cracks or holes in the floors and walls. Ants are attracted by various food substances, especially fats and sugars. Keep these foods in closed containers, and clean up any crumbs or material spilled on shelves. The most effective way of ridding a house of ants is to find and destroy the nest by treating it with carbon disulfide, benzene, gasoline, or kerosene. If the nest itself cannot be found, oftentimes the ants may be traced to the opening or crack through which they enter. Squirt kerosene into this, or plug it with cotton saturated with the oil. In using this inflammable substance keep all open fires or lights away from them. Try moistening small sponges with the poisoned bait described in Farmers' Bulletin 1101, to attract the ants. They will carry the poison from the sponges back to their nest. This will result in extermination of the colony. Other methods are discussed

in Farmers' Bulletin 1101. Sodium fluoride dusted where the ants are seen will be found effective. Cockroaches or waterbugs come where there is dampness, bits of food, trash of all kinds. Sprinkling borax, pyrethrum, or best of all sodium fluoride freely and persistently day after day wherever cockroaches appear seems to be a fairly successful method of extermination.

BUYING FRESH FRUITS AND VEGETABLES

Curb Market Scene—Buying Fruits and Vegetables.

(Prepared by the United States Department of Agriculture.)

Appearance, condition, size, flavor and correct weight or measure are points to take into consideration when buying fresh fruits and vegetables, suggests the United States Department of Agriculture. Care in grading and preparing for shipment results in the best products and is usually indicated by careful packing in heavy crates that prevent bruising. By a spotless surface, uniform in size in each crate, and often by individual paper wrappings. The appearance of such external parts as tips and leaves is a help in judging freshness in the retail market.

Look for Decay.

Look not only for the beginning of decay but also for maturity and fineness of flavor. A good pineapple, for example, has a fine aroma. Juice is heavier than pith or rind, and the lighter of two similar looking grapefruit or pomelo is to be rejected. A well-filled head of cabbage is heavy. Sometimes it pays to buy a single

GET YOURSELF A BRAND NEW LIVER

HOW DODSON'S LIVER TONE MAKES YOU FEEL THE OLD LIVER IS BORN AGAIN.

Just off the slant of Old Piedmont where it rolls away into the foot-hills of South Georgia, Bud Evans makes a good stand of cotton. A year ago he was too sick to even follow a plow. His right side seemed hard, felt as if his liver had turned to stone; belched gas all the time; couldn't hold up his head for the pain; calomel just turned him inside out. You couldn't imagine anyone sicker than Bud Evans. It just happened that an egg buyer dropped in on him one day and says: "What you need, Bud, is a dose of Dodson's Liver Tone—your liver is baked and full up so it doesn't work."

And so Bud got a bottle of the town drug store for a few cents. The very first night it loosened up so much sour bile and fermenting food that the swelling went down, his whole system righted itself and he was a new man entirely before noon. There is no question but that Dodson's Liver Tone will do more for bilious people than anything else ever known. It works easily and smoothly, without gripe or distress, and cleans out all the sour bile and sickening stuff that gives you headache, nausea, vomiting, bilious fever and all the other distresses due to obstinate constipation.

Get one bottle of Dodson's Liver Tone, and if it doesn't make you feel like you had traded your old, worn-out liver for a new one full of pep, go to the druggist and he will refund the price.

Sophomore's Recovery
A University of Utah sophomore was paid \$30 for damages to his clothes received when freshmen compelled him to clean green paint from the campus flag pole.

He that loves and runs away isn't worth chasing.

ALLEN'S FOOT-EASE

For Tired Feet It Can't Be Beat

At night when your feet are tired, sore and swollen from much walking or dancing, sprinkle two ALLEN'S FOOT-EASE powders in the foot-bath, gently rub the sore and inflamed parts and relief is like magic. Shake Allen's Foot-Ease into your shoes in the morning and walk in comfort. It takes the friction from the shoe. Sold every where. For FREE Sample and a Foot-Ease Walking Doll, address, ALLEN'S FOOT-EASE, Le Roy, N. Y.

What College Students Should Know

Are you familiar with the outstanding figures in the history of the human race? How large is your knowledge of the outstanding facts of present-day civilization?

Here's an opportunity to test yourself on these questions. Following is a questionnaire presented to one hundred students representing four college years in a large American university. About one-third of the number were third or fourth year students. There were seven foreigners in the group. The test was given toward the end of the college year, with the work of the second semester nearing completion.

"It might well have been assumed that the college study in English, history, mathematics, the languages and the sciences, should have refreshed the memory in regard to many of the leading points in the questionnaire," says the originator of the test writing in a special educational number of the New Republic. The article disclosed neither the identity of the writer nor, for reasons which can only be guessed at, the name of the university.

"There were sixty questions in the list originally given," he continues. "The highest grade, 98 per cent, was made by a student of Slavic descent, twenty-two years old. The second rank, 97 per cent, was made by a more mature Russian. The highest grade made by a native American was 80 per cent; the lowest 10 per cent."

"It may be asked what is the purpose of such a questionnaire. Do the answers indicate with any degree of certainty the trend of thought of the modern college student, or justify our drawing any definite conclusions? First, the results seem to emphasize the current belief that a

majority of young people go to college today for a diploma. The memorizing of facts seems important insofar as it brings about this end. They are as quickly forgotten, and leave no lasting impression. In the modern college life there is no time for meditation; no time for assimilation or digestion. Students hurry to their classes and hurry away; the car facilitates their departure. An hour of jazz, a movie, or a whirl to the next town assists in eradicating any impression which may have been received in the classroom.

How many of these questions can you answer? Any good dictionary ought to provide most of the answers against which you can check your replies.

THE QUESTIONNAIRE
PART I

Tell why the following men and women were great. Give their nationality and, if possible, give the century in which they lived. Mention at least whether they are living or dead:

Name	Per Cent Correct Answers	Per Cent Incorrect Answers	No Answer	Examples of Incorrect Answers
1. Plato	5	80	15	A Greek mathematician; a philosopher in the 18th century. (One student only mentioned having read Plato's Republic.)
2. Pericles	16	84	0	To the majority Pericles was a Greek philosopher, a law maker, or an American scientist. An English writer (15 answers); "A Greek." (2)
3. Horace Mann	23	17	60	Two named him as an "Italian painter," living in the 14th or 15th century. Several named him as an American writer.
4. Pestalozzi	15	85	0	He was usually called a "great fighter," a "great general," and "the French Emperor who died for France."
5. Napoleon	100	0	0	Named a number of times as a great writer, an American scientist, a doctor.
6. Edward Jenner	2	14	84	A painter, a musician, a writer, and the "inventor of the law of gravitation."
7. Kepler	15	85	50	A "German commander," a "religious man," a general.
8. Kant	10	17	73	A Greek sculptor (1); one student ventured the information that he "died a few years ago."
9. Michelangelo	95	5	0	"The one who pasteurized milk" (several); a chemist, a physicist, a pastor in a church.
10. Pasteur	26	74	0	A Roman; the Queen of Italy; the Queen of Sheba; the Queen of India; a princess; an Egyptian princess; Anthony's friend; sister of Julius Caesar; a famous vamp; a bad woman lived variously in the 15th, 14th, 13th, and following centuries. To some he is still alive. He was "the inventor of the Nobel prize."
11. Cleopatra	71	29	0	He was also placed as an American orator, an American poet, and a famous American philosopher. A French painter.
12. Alfred Nobel	3	18	80	13 had heard the name but could not remember. To some he was an author; to another the one who made the first steamboat. He was also named as an American inventor. A French doctor; a novelist.
13. Isaac Newton	44	36	0	An "ancient scientist"; a French general; a Jewish king; the inventor of the airplane. One wrote that he must have invented the wireless but she was not sure whether he lived in the 16th or 17th century. Of the 62 giving incorrect answers, all believed him dead.
14. Lee de Forest	1	4	95	A German musician (many); a Greek philosopher.
15. Marconi	28	62	0	42 called him an American writer; 15 called him dead and one wrote "he has just died." One knows him as the author of "Candide."
16. Goethe	30	45	25	He was of four nationalities, Italian, Roman, Greek, Persian. He was a navigator, an astronomer, a writer, a philosopher, and lived before Christ.
17. Bernard Shaw	38	59	3	To many he was an American "noted for his theories." One student wrote that he was an "impious man who told us that we descended from monkeys." He was named frequently as a philosopher, a zoologist, and a botanist.
18. Copernicus	9	21	70	An English author; an American statesman; the inventor of the steamboat.
19. Darwin	72	24	3	An American historian (20).
20. Faraday	14	5	80	A churchman; a dead politician; a preacher; the founder of the English Church; a botanist (Luther Burbank).
21. H. G. Wells	12	20	68	A German musician; a German philosopher; a composer; a rich German industrial man. All those who gave incorrect answers believed him still alive.
22. Martin Luther	56	26	18	Many had heard the name but could not remember who he was. One answered "a Hebrew dancer" (probably had in mind Salome). A "religious man"; an artist; a cynic; an athlete.
23. Steinmetz	22	78	0	
24. Solon	4	44	52	
25. Anatole France	17	18	65	

PART II

Per Cent Correct Answers	Various Answers
29. Name several Russian writers	68 were unable to name any Russian writer. The only Russian writer named was Tolstoy (28 times). False answers were Nietzsche, Conrad, Balzac, Maupassant. 90 "did not know."
30. Who wrote the Inferno?	False answers were Bernard Shaw, Bossuet.
31. Who wrote Paradise Lost?	82 had never "had any French literature." Others thought that Dumas (Pere et Fils), Victor Hugo, Kipling, Montaigne, had contributed.
32. Name five Italian painters	All others gave groups of various nationalities. One of the groupings given included Titian, Rembrandt, Corot, Angelo, Millet.
33. Give the names of several famous sculptors	81 did not know any. 5 named Lorado Taft; 4, Rodin; 1, Pascal; 1, Pericles; 1, Praxiteles.
34. Name a book written by Thomas Carlyle	Most of the students had heard of T. C., but could not name a book. 1 gave him as an American novelist. 7 called him "still alive."
35. What can you tell about Cervantes?	1 had heard him lecture a year ago "at the Woman's Club."
36. Who was Blamark? Is he dead or living?	62 knew that he was a Spaniard. 1 called him the "father of Don Quixote." 1 named him as the discoverer of America.
37. Name the five great men who you think contributed most to our civilization	13 had never heard of him. 1 answered "a sort of doughnut."
38. Which great man do you admire most? Tell why.	100 per cent named Lincoln; 99, Shakespeare; 84, Washington; 56, Napoleon; 22, Roosevelt; 15, Edison; 8, Bell; 3, Marconi; 22, Foch; 19, Pershing; 22, Franklin. Other answers were Cows, Columbus, Wilson, Caesar, Alexander, Jefferson, King Tut.
39. Locate accurately the following famous architectures: (a) The Parthenon	48 gave Lincoln because he was so devoted to his country. Washington, because he saved America from England. Edison, not because he invented the electric light, but because he can "do without sleep."
(b) The Pantheon	Placed variously in France, in Paris, in Jerusalem.
(c) The Eiffel Tower	On Sheridan Road and Wilson Avenue, Chicago (a movie theatre); in Italy, in Athens, in Washington.
(d) The Alhambra	In Versailles, in Italy, in Eiffel (Germany). The majority placed it in Greece, some in Paris.
(e) The Vatican	Florence, Italy, Versailles.
40. Locate the Yosemite	Colorado, North Carolina, and in various other states. One (an American) had never heard of the Yosemite.
41. Locate Madagascar	In Spain, in Persia, in Asia Minor. 65 "did not know."
42. Locate the Luxor	In Greece, in Constantinople, one young woman answered "Luxor is a cosmetic powder, cream and rouge."
43. Have you ever heard of the Barbizon School? What can you say of it?	94 had not heard of this school. The others thought it must be a school for boys in England.
44. Which human race is the most populous?	25 gave the "American race." The remainder (14) gave "Anglo-Saxon."
45. What state has the largest population to the square mile?	75 thought it was New York. Others named Texas and Washington.
46. What recent inventions do you consider the most useful to mankind?	The automobile, the caterpillar, radio, radium, insulin, and the "Marcelle Waves."
47. What is a mausoleum? Can you locate a famous marble mausoleum in India?	Most of the students did not know the meaning of the word.
48. Who applied the elements of Plane Geometry the first time 200 B. C.?	The majority named Pythagoras. Many "did not know."
49. How much money does France owe America? Should she pay her debt?	99 did not know the amount. One thought "a million or so." All except 1 agreed that France should pay her debt. I thought (very generously) that America should cancel it.

ROAD BUILDING WIDE ROAD DRIVE PLEDGED SUPPORT

Advocates of the popular but slow-moving wide-road campaign in the Chicago highway region have received unexpected support from two powerful road-building agencies, and cited Pennsylvania as a precedent in the proposal to use state bond issue funds in doubling the width of pavements on the existing main highways where heavy traffic warrants immediate improvement, writes J. L. Jenkins in the Chicago Tribune.

Following an official traffic survey and study of congestion on state roads corresponding to main arteries leading into Chicago, William H. Connell, engineering executive of the Pennsylvania highway department and former president of the American Road Builders' association, announced that the Lincoln highway pavement will be widened to a minimum of 40 feet entirely across that state as a departmental project.

Another champion of wide roads appeared in the person of Dr. L. I. Hewes, deputy chief engineer of the United States bureau of public roads. He declared that narrow pavements are a constant menace to transportation in the West and that motorists will not long tolerate the congestion on terminal gateway highways. Both authorities made their statements in connection with progress reports to the Lincoln Highway association.

"The present policy of the Pennsylvania department of highways," said Connell, "is to plan and build new work to suit the probable future traffic requirements in each instance. It would be absurd to say that all state roads require the same width of pavement as, for instance, does the Lincoln highway near Philadelphia and Pittsburgh. In 1925 a considerable mileage of 40-foot pavement was laid on this main trunk line west of Philadelphia and 40 feet will be the minimum pavement width of the road entirely across that state."

Making Brick Pavements Noiseless With Filler

Engineering knowledge and experience have developed the modern brick pavement from a common clay brick laid on the natural soil to the vitrified brick with an asphalt filler laid on a concrete foundation with a sand bed between the foundation and brick surface.

This produces a pavement surface which can be made as near free from construction defects as is possible. Every step in the manufacture of the material and placing it into the pavement is subject to correction before the next step is taken and thus insures against defects.

Modern heavy truck traffic has introduced an increased demand on pavements due to the enormous shock which it carries under its wheels. The vitrified brick pavement, made up of small units which are cushioned by the asphalt filler in the joints, absorbs this shock in summer as well as in winter weather. Furthermore, a smooth surface lessens the amount of shock and here again the vitrified brick pavement stands in the foreground, as its method of construction assures a smooth surface. The asphalt filler in the joints and a slight film of it on the surface creates a pavement which is noiseless.

Save Tire Expense

"The concrete highways of the Salt River valley cost close to \$10,000,000, but that amount has been about saved already by auto owners," according to a local tire dealer. "The good roads have about doubled tire life, records of even 20,000 miles not being uncommon," he said, with addition that the tire man's salvation is the individual who will insist on starting and stopping with a jerk.

Good Roads Notes

A movement has been organized in Fort Wayne, Ind., to build a model highway from Limerlost cabin, on Sylva lake, to Luberlost cabin, near Lake Geneva, as a memorial to Mrs. Gene Stratton-Porter.

Rough roads cause considerable damage to the working parts of an automobile. Uneven roads are often unnoticed while driving as the body of the car does not shake with the axles and differential.

All roads are well signposted in France. Each bears a distinctive number preceded by a letter indicating its class—N for the main roads, D and GC for the secondary roads, and IC for the bypaths.

Secretary of Agriculture Jardine announces the apportionment of \$73,125,000 to the various states for use in the construction of federal aid roads.

A total of \$50,000,000 will be expended on highways in Florida in 1929 and the state will soon rank among the first of the Union in good roads.

A federal road to the top of Mount Halekaka, Hawaii, will enable tourists to drive cars to 10,000 feet above sea level to view the famous crater.

NAT JONES
W. D. KNIGHT, (Special 28 47)

FOR COUNTY ATTORNEY
J. D. THOMAS (Re-election)

FARMER COUNTY REPRESENTATIVES

To the Republicans of Farmer County, we wish to announce that there will be a Republican primary held in this county this year.

Up to a few weeks ago this was not been thought of, but a recently enacted election law, making it compulsory with any political party to hold a state-wide primary, or otherwise lose its identity as a party in the State of Texas, has caused the leaders of the Republican party to demand that there be held a regular primary in each county in the state.

For this and other reasons the republicans of the county will hold a regular primary on July 24th, in each voting precinct in the county, and an effort will be made to place a full ticket in the field.

It is not the intention of the organization to compel anyone who does not wish to do so, to vote in a republican primary, and this notice is given that all may be informed of the situation and be prepared to vote in whatever primary he may desire.

The pledge at the top of the primary ballot will be placed on the republican ballot the same as on the democratic ballot; but the republican party has always contended that this pledge is unconstitutional and will not hold its voter bound by it. It

will be placed there, therefore, as a compliance with the law, in order to make it a legal ballot.

Republican County Executive Committee.

Mr. and Mrs. J. C. Wilkison, Mr. and Mrs. J. C. Maurer and Mr. and Mrs. T. J. Crawford spent Tuesday in Amarillo in attendance at the West Texas Chamber of Commerce Convention.

TO THE VOTERS OF FARMER COUNTY

I hereby announce my candidacy for the office of Treasurer of Farmer County; subject to the decision of the voters in the Democratic primary in July.

I feel my ability and worthiness to properly administer the duties of the office to which I aspire and will sincerely appreciate your support

and all favors shown me.

Respectfully,
R. A. HAWKINS.

Frank Canler has just recently returned from a visit to his family in Cottle County, Texas. Mr. Canler says all crops in that part of the state are looking well. Cotton is good, but perhaps a little later than usual.

ADVANTAGES OF A WELL FENCED FARM

(A Prize-Winning Story)
The following story was the winner of a \$500.00 prize and contains many points which may be of interest and value to our farmer readers.

The advantages of a well fenced farm are: Paying propositions from the five standpoints of Economy, Service, Protection, Appearance and Good Citizenship.

Economy. A good fence is a permanent fence; a permanent fence is a paying investment, by increasing the permanent and market value of the farm; helping to insure and increase credit with the town's business men; substantiating the idea that the owner is progressive and successful. A good fence expresses thrift on the part of the owner, by making more money for him; saving time, labor and expense of replacing poor fences; lowering depreciation; saving the greater cost of delayed fencing; standing up, looking better and remaining stock-proof for many years; eliminating possibilities for lawsuits caused by loose animals on highways and neighbors' premises. A good fence is a time-saver because no time is wasted hunting for lost

animals; or notifying a neighbor that his cattle are in your field, or helping him chase them out and repairing the fence. Well planned barnyard fences keep the cows near home at night, saving time in the morning.

Service. A horse-high, bull-strong and pig-tight fence is the best hired man a farmer can have because: It saves time and effort in caring for stock; it is possible to properly rotate crops and pasture and distribute fertilizer evenly over the farm; livestock can utilize what might otherwise be wasted feed in cornfields and meadows in the winter and spring; little pigs need fresh lots so they may not pick up worms and parasites; poultry runs should also be alternated. With good fences corn fields can be hogged-down. Cost of husking, elevating and shelling corn is saved; no time and effort spent each day slopping the hogs. A farm uniformly fenced with distinctive wire and painted posts will give it a trade-mark and business-like appearance.

Protection. A good fence is the farmer's sentinel, always on the job and guards: Valuable females from being bred to scrub males; livestock by lessening danger of contracting contagious abortion, tuberculosis, and cholera; horses from wire cuts and other injuries often received when fighting over old fences with other horses; livestock from wandering into open ditches and water; men and stock from infection due to wire

cuts from rusty wires,—good wire is rust-proof for years. Livestock, if wire is properly grounded, from thunderbolts; poultry from weasels, skunks and other enemies; livestock from overfeeding in green corn fields, clover and other places, resulting in sickness and death; hogs against the habit of eating poultry. The well-kept fence protects the windbreaks, orchards, gardens, berry patches, flowers, lawns and shrubbery from farm animals.

Appearance. A neat, well-built fence is the farmer's show window, advertising: It gives the farm an air of dignity, stability, beauty, and pride. The fields and live stock appear to better advantage. An ornamental lawn fence will dress up the farm home and add a welcome to visitors. Fences give an air of distinction and individuality. An all-steel fence permits burning of weeds along fence lines so snow will not gather and block highways. A good fence is a credit to both farm and highway. It keeps the yard cleaner, in straw, paper or corn stalks cannot blow from place to place. Well defined driveways and paths or walks will prevent unsightly short-cuts across grassy lawns.

Good Citizenship. Safety First. A good fence keeps the vicious bull from breaking out and injuring strangers and children. Prevents loose animals from causing automobile accidents. Keeps home animals off the railroad tracks. Around the barn makes a safe playground for children.

Honesty. A farmer is not honest who deliberately allows his livestock to feed on his neighbor's grain and hay stacks. Good fences do more with expense over ownership of stray animals.

Courtesy. Good fences foster respect for your property among the neighbors. Prevents quarrels and ill feelings among neighbors. Aided by "No Trespassing" signs, keep out the careless hunter.

R. A. HAWKINS FOR TREASURER

R. A. Hawkins of Farwell was a business visitor here Monday. He has announced himself as a candidate for the office of County Treasurer, subject to the decision of the Democratic primary in July; and his announcement will be found in another column of this issue of the Star and we are glad to call the attention of our readers to the same. Mr. Hawkins has been a resident of Parmer County for the past ten years and is well and favorably known in all parts of the county, and especially in the western part of the county where he has lived.

He is a man of considerable business ability, a public-spirited citizen and has always taken an interest in the county's affairs. If elected he will give his most earnest efforts to the interests of the tax payers of the county.

Star Want Ads are fruitful.

LOST TWO GOOD SOWS.

Lon Baysinger was in town Monday from his farm four miles east and reports that he has 170 acres of promising row crops. He says a part of it, the latest planting, is just coming up but is showing a good stand. He says weeds are growing most

luxuriantly also, but hopes by the end of the week to have them overcome and can then keep ahead of them easily.

Mr. Baysinger says he has two fine sows, which would have farrowed shortly; but they wandered out onto the railroad track and about five minutes afterwards the local

freight came along and killed them both. This was a severe loss to him as they would not only have provided the meat for his family, but would have furnished hogs for the market.

Mr. and Mrs. J. C. Wilkison and daughter, Jacqueline, spent Tuesday in Amarillo.

The WATER BEARER By J. ALLAN DUNN AUTHOR OF 'A MAN TO HIS MATE' 'RIMROCK TRAIL'

WILBUR COX Synopsis.—Idly fishing Hermans creek, in California, Caleb Warner, civil engineer, and a New Englander, is witness of the end of a coyote pulled down by two wolfhounds, urged on by a girl rider. Admiring the hounds, he introduces himself, and learns her name is Clinton. With western hospitality she invites him to the ranch to meet her father. At the Clinton home Warner learns his new friend's name is Betty. He is welcomed by her father, Southern Civil war veteran and owner of Hermans valley. Warner tells them something of his ambitions and his feeling that he is destined to be a "Water-Bearer." In the town of Golden Warner shares an apartment with his old Columbia college chum, Ted Baxter, carefree and somewhat dissipated youth, only child of his widowed mother, who controls the family fortune.

CHAPTER III—Continued

"There's Wilbur Cox," he said. "That's a Big Business crowd. Morse, on the right of Cox, is head of the Lumber ring, then comes Towle, president of the Sundown railroad. Marlin's next, he opens up big tracts for colonist development. Lawler is an oil magnate and the last one is Winton, manager of the Golden Light and Power company. They come close to running Golden and a good share of the state as well. I don't know how their bank balances stand, but you can bet that the six of them represent several times that number of million dollars in active circulation with their interests."

Caleb regarded Cox with special attention. He knew that he owned big land holdings, controlled rich mines and was the president and mainspring of the Crystal Springs Water company that supplied Golden with its commercial and civic measure of the vital fluid.

He saw a man who might have been anywhere from fifty to sixty, tall, spare, with close-trimmed hair gray above the ears, clean-shaven, with a fine forehead and a well-shaped skull, a projecting nose, keen gray eyes, a genial mouth and a firm chin. He told many of the stories that met with the greatest laughter, for the group was a care-free one, for the moment at least. Their luncheon was almost over and, when Cox rose at its conclusion, he did so with an ease that spoke of muscles still in prime condition. If Caleb had wanted to sum up the man in one crisp word he would have chosen the adjective "fit."

"No need to hurry," Baxter said. "The old boy's son is coming up this afternoon from Los Angeles and I know Cox has arranged for a dinner here tonight. If you can get in right with Cox, Cal, the going should be easy. I can give you the introduction. After that it's up to you. Cox doesn't take me very seriously."

Leaving the dining room, they met Cox alone, coming from the direction of the club's telephone booths. Baxter seized the moment. "I want a friend of mine to meet you," he said to the older man, speaking with the frank facility that was one of his greatest assets, met by Cox with a sort of half-tolerant geniality. "This is Caleb Warner, one-time classmate of mine at Columbia, civil engineer, following the Star of Empire westward in the hope of hitching his wagon to it. Don't let my friendship with him prejudice you against him. He plays ant to my grasshopper."

Cox smiled as he gripped Caleb's hand cordially enough, giving him a direct glance that, in kindly but determined fashion, seemed to measure him. "Glad to meet you," he said. "Plenty of room out here for civil engineers. Any specialty?"

"Water," Caleb answered promptly. The eyes of Cox seemed to harden a little, to hold a hint of suspicion at the pat answer that might have been calculated to awaken interest.

"Done much at it?" "A factory dam or two. One reservoir for town supply. Back East. The rest of my practical experience has been along other lines for the last two years but I am especially interested in water-engineering and the West seemed to be the place."

"Looking for a job?" Cox fired out the questions briskly, all the while covering Caleb with the battery of his eyes.

"For any real opportunity, Mr. Cox." A servant came up with a salver and presented it to Baxter. He glanced at the filled-in form-message and excused himself.

"You'll pardon me. I'm wanted on the phone. Cox looked after him with a humorous quirk to his mouth. "There goes the grasshopper," he said. "Now then, these last two years

take the hat over on the left and run down to San Jose and back." "Just the two of us?" "Yes, you double-dyed Puritan, just the two of us, all by our lonelies. Are you on?" At three o'clock they were bowling south along an almost perfect road when Baxter grudgingly slowed down in obedience to a signboard that informed them they were approaching the town of Paloma.

"I'm feeling much better," he announced. "Want to take the wheel for a while and let me smoke?" They changed seats.

"I've got to trim down on these," Baxter said, lighting his cigarette. "The pump needs repacking," he went on, tapping himself over the heart.

"And it can't be done. They turned me down for that. Told me I had a banquet heart and that the excitement of sticking a Heine might end it. It's the old C and C. Champagne and cigarettes! Jack Cox got in but I stayed out. Made me feel like a slacker."

"Why don't you cut the stuff, Ted?" "It isn't going to last long enough. At present I prefer the vineyard to the lemon grove. I'm no good at business anyway. I'm a grasshopper and I'll hop till the grass gets too short and things dry up generally."

"This sort of thing you've got on tonight, Ted? Aren't you afraid you'll wind up in some sort of a mess?" "I'm immune. It's good fun. The girls I travel with know how to take care of themselves. It's a two-sided game. If I met the right girl—Oh, what's the use? You see, Cal, the water is chipping off a chunk of her principal every year. She flies high herself. If I outlast her, which is doubtful, there won't be much coming to me. I suppose she's right. I've got to marry money, but the girls with money are either too wise, too businesslike or too homely and stupid. No use preaching to me, Cal. You're born an ant and I'm a cecada, which is Californese for grasshopper."

They reached the apartment house at five o'clock and Caleb proceeded to dress circumspectly for the dinner while his friend laid out more sumptuous raiment.

"You'll be home tonight?" asked Caleb. "I'll be home when the game's over," answered Baxter enigmatically. "This is Saturday night. We may take a little trip to Lake county. Don't bother about me. Off to your business, ant!"

CHAPTER IV Big Business

Jack Cox turned out so close a replica of his father—less weathered, less bitten by Time and Experience—but nevertheless so evident a chip of the old block, that Caleb almost doubted Baxter's description of him as a reformed wastrel. He had been through the furnace of the war and whatever of steel had been in him had been tempered, the baser metals burned to slag and discarded. Caleb had seen others in his own division of the fighting game who had stiffened and found their manhood in like fashion.

Caleb liked him from the outset. The man had qualities that he lacked, the same western broadness that Baxter possessed in more volatile fashion. But, though trolleys and water dams seem far apart to the laity, a mutual profession based both of them. Caleb found the preliminary story of Imperial valley vastly interesting and Jack Cox told it well, albeit he had had no hand in those earlier stages of development. It was the tale of the bringing back of an arid sink, once under cultivation by the Indians, of the harnessing of the mighty Colorado, one terrific fight with flood waters and now—cotton fields, and vineyards, wide acres of cantaloupes, horticulture and agriculture in every branch; order, industry, prosperity. Caleb listened with interest and understanding.

"There is only one Imperial valley, perhaps," said Cox, "but there are other deserts with soil just as fertile, waiting only for the magic touch of water. Your end of it—the water end—is the initial move in the game, mine is the last. You play Alpha to my Omega."

"If I get the chance," said Caleb. "Oh, you'll get it. The chances are everywhere. If a man knows his business, and wants to work at it, there's no trouble about Opportunity. Her knuckles must be raw on the Pacific coast. She knocks unceasingly," laughed Cox.

"The Coxes' father and son, appear to be solid folk, is Caleb Warner's lot to be cast with them?"

(TO BE CONTINUED.)

"Water," Caleb Answered Promptly.

Big Business, I take it, everywhere. They have their rules, of course, but they sometimes slip one over beneath the belt, at that. But they've never told the count over Cox. How did he come to invite you to dinner? Not to mention me? I'd fit in there about as well as a goldfish in a shark-pond—not worth gobbling but, if I glittered enough, they might know I was among those present."

"I don't think he took any sudden fancy to me," Caleb answered. "He warmed up a little when he heard I had been across. Thought his boy might like to meet me."

"Of course. I'm a chump. Jack Cox is the apple of his father's eye, all the more so because Pa Cox had good reasons to suppose said apple was worm-eaten. You think I'm inclined to burn the trail. Man, beside Jack Cox I was as a Ford to a Rolls Royce! He was in more mix-ups with wine, women and song than Don Juan ever dreamed of. Compared to him I'm an amateur. Or was. The war changed all that. Jack's come back a changed leopard. Not a spot on him. Following in his dad's footsteps." He broke off abruptly. "How about a little air this afternoon? I think the breeze would favor my fevered brow. I want to be fit for tonight. We'll

Some Things for Good "Sports" to Remember Sport is sometimes criticized for the unfairness of its participants or the partisanship of its followers. It has a mission besides the development of a healthy body, surely it is in the encouragement of fair-mindedness in the players and on the grandstand. Toward this end, the following Golden Rules were printed recently on the back of a program by the army school of physical training in England, and these rules will well bear repetition elsewhere: Play the game for the sake of the game. Play for your side, and not for yourself. Be a good winner and a good loser

—modest in victory and generous in defeat. Take all decisions without question or argument. Be unselfish and always ready to teach and help others.—Toronto Globe

Antlers of Deer

Deer antlers are shed each year, usually soon after the close of the breeding season, to be renewed the following spring. Sometimes antlers are straight and unbranched, but usually there are branches, called tines or snags, and the number of these increases with age, so that the finest antlers are on fully matured males.

The Kitchen Cabinet

(© 1924, Western Newspaper Union.) Welcome, a thousand times welcome, ye dear and delicate neighbors— Bird and bee and butterfly, and humming bird fairy doe! Proud am I to offer you food for your graceful labors; All the honey and all the seeds are yours in this garden of mine. —Celia Thaxter.

FROZEN DISHES

There is nothing more appealing to the palate on a hot day than the refreshing frozen things.

With a cupful of strawberry juice, raspberry juice, grape juice or in fact almost any good flavored fruit juice, sweetened to taste and frozen with a pint of thin cream and a tablespoonful or two of lemon juice, one may have a delightful frozen dessert.

Water ices are prepared by boiling together sugar and water; cool and add the strained fruit juice and freeze. A tablespoonful or two of lemon is always good to add to any fruit combination as it seems to bring out the other flavors. When a colored juice like grape or raspberry is used, the lemon seems to make the color more striking.

Velvet Sherbet.—This is one of the simplest and most liked of all the frozen desserts: Take two cupfuls of sugar, the juice of three lemons and one quart of rich milk. Mix and freeze as usual. Let stand two hours to ripen. The mixture will curdle when being put together, but will freeze as smooth as velvet.

Strawberry Ice Cream.—Mash a quart of the berries, strain carefully and sweeten with a sugar and water syrup which has been boiled and cooled. Add a quart of rich milk, or milk and cream, or a quart of thin cream, making a richer ice; add a pinch of salt and freeze as usual. Always pack the ice cream after freezing and let stand an hour or two, as it seems to be better flavored so treated.

All frozen dishes stand up better when served, that is, are firmer, if a sugar syrup is used instead of sweetening with sugar.

Peanuts and Lettuce.—If one likes peanuts this will be enjoyed: Sprinkle head lettuce with rolled or coarsely chopped peanuts, serve with a bit of shredded onion, or that may be omitted. Serve with French or a boiled dressing highly seasoned.

Frozen foods and chilled drinks are invaluable in the sickroom, as are the hot soups and broths. All food intended to be served hot should be hot, and all cold foods cold. It is well, when possible, to place the dishes on the tray and pour into them, to avoid spilling.

Chocolate Dainties. Chocolate is such a general favorite that nearly everybody enjoys a recipe of the popular food.

French Chocolate.—Melt two ounces of bitter chocolate, add two tablespoonfuls of sugar and one-half cupful of water, boiling hot. Cook three minutes. Scald three cupfuls of milk with one-fourth of a cupful of finely ground coffee, strain and add the chocolate with one-eighth of a teaspoonful of salt. Beat with a Dover egg beater and serve with whipped cream.

Chocolate Sauce.—Cook two squares of chocolate, a cupful of sugar and one-half cupful of water together with two tablespoonfuls of butter and one-fourth teaspoonful of salt. Cook twelve minutes, add a teaspoonful of vanilla and serve hot. Very nice over vanilla ice cream. Omit the flavoring when serving over ice cream flavored with vanilla.

Chocolate Mousse.—Melt three squares of chocolate, add one and one-half cupfuls of sugar and one cupful of thin cream; boil one minute, cool, add a teaspoonful of vanilla, a pinch of salt and the whip from three cupfuls of heavy cream. A tablespoonful of gelatin mixed with a little cold water is added to the hot mixture. Pour into a mold and let stand packed in ice and salt four hours.

Cocoa Ice Cream.—Take two cupfuls of milk, one cupful of sugar, one tablespoonful of cornstarch or arrowroot, and one-half cupful of cocoa; cook in a double boiler for twenty minutes. Add four egg yolks well beaten, a teaspoonful of vanilla and a little salt. Freeze as usual.

Cocoa Parfait.—Boil one cupful of sugar with one-half cupful of water ten minutes; pour the sirup over four tablespoonfuls of cocoa which has been beaten with four egg yolks, cook over hot water until of the consistency of soft custard. Beat until cold, add two cupfuls of whipped cream flavored with a little vanilla and a pinch of salt added. Turn into a mold and pack in ice and salt; let stand four hours.

Orange Chocolate Sauce.—Melt three tablespoonfuls of grated chocolate in a double boiler, add three tablespoonfuls of butter, stir until well mixed, add three egg yolks one at a time, four tablespoonfuls of sugar and one-fourth of a cupful of rich milk. Cook until thick, add the juice and rind of an orange and serve at once. Chocolate and orange flavors seem to be two that combine well.

Nellie Maxwell

Are you being bored to death?

MOSQUITO torture is quickly ended if you keep a can of Flit handy. Flit spray clears your home in a few minutes of disease-bearing flies and mosquitoes. It is clean, safe and easy to use.

Kills All Household Insects

Flit spray also destroys bed bugs, roaches and ants. It searches out the cracks and crevices where they hide and breed, and destroys insects and their eggs. Spray Flit on your garments. Flit kills moths and their larvae which eat holes. Extensive tests showed that Flit spray did not stain the most delicate fabrics.

Flit is the result of exhaustive research by expert entomologists and chemists. It is harmless to mankind. Flit has replaced the old methods because it kills all the insects—and does it quickly.

Get a Flit can and sprayer today. For sale everywhere.

STANDARD OIL CO. (NEW JERSEY)

He Had Just the Thing The smiling young man had entered the office and inquired if he was addressing Mr. Jones. "No, my name's Williams," said the man at the desk, resuming his work. The young man asked to be pardoned for the intrusion, and departed, leaving the door wide open. "Say," spoke up the man at the desk, "come back and close the door!" Smilingly the young man came back and took from his bag a mechanical device. "Here," he said, "is the best door-closer made. Closes without a bang and is guaranteed for ten years." His Reluctance "Say, Uncle Slabby," called a householder on the Tumlinville road. "Me and wife got into a dispute just now, and we want you to come in and settle it for us." "Now, looky yur, Amzi!" remonstrated old man Slabby, who was driving by, "I hate peace as much as anybody, I reckon, but you can't expect me to go as far as all that and mix in yore family fights."—Kansas City Star. One's greatest task is to make himself interesting to himself at all times.

Children Cry for

Safe Accept only "Bayer" package which contains proven directions. Handy "Bayer" boxes of 12 tablets. Also bottles of 24 and 100—Druggists. Aspirin is the trade mark of Bayer Manufacture of Monacosteinradster at Salzkilchen

Jumper Frocks Are Popular; "Manteau de Voyage" From Paris

PICKING out jumper frocks must stand somewhere near the head of the list of favorite pastimes with the rank and file of women this season. For sports—and near sports—and for all daytime wear, they are promoting the two-piece vogue in their summer wardrobes. The two-piece dress has therefore been developed in numberless pretty, informal varieties and appears even among evening costumes. But for sports and general summer daytime wear it stands at the forefront. There are a good many mediums used for making two-piece dresses, but flannel in white, or high and pastel

check, or with a self-color skirt in crepe—they may be worn everywhere. Somehow "manteau de voyage" seems to convey to the mind something more pleasurable than our plain English "traveling coat" does—something more than mere travel is suggested by the graceful French term. One has visions of comfortable journeys and pleasure trips to picturesque places when the conversation is of manteau de voyage and a hint of elegance is embodied in these two coats sent over by Lelong and O'Rossen for our vacation journeyings. Lelong has given to the coat at the left the smartest of all smart styles

For Sports and Pastimes

colors, in plain or striped patterns, is the favorite. The plain flannels are used for simple, unlined coats, and for severely tailored suits. The coats are sometimes finished with braid or gros-grain ribbon and sometimes with Iceland fox. On white kasha or flannel coats, standing collars and patch pockets, in rose or other colored flannel, are embroidered with white angora wool, and ensembles made up of white flannel coats and silk frocks are among the best of midsummer offerings. Gay, striped flannels find their best field in sports clothes and are exploited there in many ways. The dashing jumper suit pictured has a skirt of red

requisites, and that is appropriateness. There is hardly an emergency of travel that this coat could not meet. It is made of a soft wool goods in dark red and is fastened with metal buttons. Its lines are easy and graceful, it has an ample scarf at the neck and simple but exquisite tailoring in the finishing touches. The O'Rossen coat at the right is a bit more rugged and a bit more dashing, with sleeves in the raglan style, strap decorations at the wrist and pockets and bone buttons. It might be developed in tweed or any plain, soft and substantial wool fabric. Navy-blue twill is one of the most satisfactory materials for traveling

flannel and a jumper in white striped with red, with collar and cuffs of the plain flannel. One of the distinctive touches of this season appears in the band of the striped flannel stitched to the skirt and finished with red buttons. Navy blue flannel jackets of mannish cut make themselves very useful in the summer wardrobe worn with white or pastel colored skirts. The skirts are nearly always plaited with the plaits arranged in groups or at one side. The same jackets extend their usefulness when provided with skirts in navy and white shepherd's

Two Paris Offerings

coats. Very chic models are shown this summer with short detachable capes buttoned to the shoulders or about the neck. Sometimes they are lined with crepe in high contrasting color, as cherry, red or chartreuse green. The detachable cape is convenient for journeys that take one to a variety of climates. Coats of checked materials—as tasha or novelty tweed—cut on mannish lines and three-quarter length fit in with almost every environment.

check, or with a self-color skirt in crepe—they may be worn everywhere. Somehow "manteau de voyage" seems to convey to the mind something more pleasurable than our plain English "traveling coat" does—something more than mere travel is suggested by the graceful French term. JULIA BOTTOMLEY.
(© 1926, Western Newspaper Union.)

ONE PERFECTLY GRAND IDEA

By LOUIS WEADOCK

(© 1926, Western Newspaper Union.)

THE large, white building on the left, the one with the high board fence around it, is the studio of the Starlight Comedy company," announced the blue-coated guide on the seething Los Angeles rubberneck bus. "Nightly we see these bathing beauties of Chatfield Tannen on the screen, but as yet no stranger has ever set foot upon this lot where these pictures are made. We are now approaching the home of—"

The bus rolled on, but the words of the guide lingered in the ears of two men, who for more than an hour had been standing in the sunshine outside the entrance to the Starlight studio. The older, a small-townish little person whose clothes were as old-fashioned as were his steel-rimmed spectacles and his square, gray beard, put a timid hand on the sleeve of his companion. "Even if Lucy's in there, there's no way of getting to her until they get through work tonight," he whined.

"Dad, tonight may be too late," answered the younger curlier. "I don't want any sister of mine in the same town with Chatfield Tannen, let alone in the same studio. He's the worst guy in the moving picture business. I'm going to bust in and tell him so."

"You prize fighters think you can do anything," complained the father of Kid Moore. "If you'd stayed in Lake City instead of gallivanting all over the country fighting prize fights maybe your sister wouldn't have run away from home to go into the 'movies.'"

Kid Moore was not listening. His eyes, which were blue and hard, like agates, were scanning the high board fence. From it they turned with a look of dissatisfaction that deepened into hostility when they fell upon a handsome young man in a green velours hat and a greenish suit, which young man had just emerged from the gateway over which were the words "No Admittance to Visitors. Keep Out. This Means You."

"Hello, Kid," cried the new-comer effusively. "I haven't seen you since the day I win a couple of hundred on you in little old New York."

"Do you belong in there," snapped the pugilist, jerking his thumb toward the fence. The actor laughed mirthlessly.

"I did, but I just walked off the lot," said he grandly. "Tannen's shooting some stuff with a lot of kids, and I didn't like the way he was talking to them. He's—"

"Lemme go," broke in Kid Moore, wriggling from the sudden hold with which his bearded father sought to restrain him. "I'm going to crash the gate—"

"Wait a minute," implored the actor. "I don't know what you want in there, but I know you can't get in. Tannen's seen you fight fifty times. He don't want any prize fighters on his lot."

"I'll tell you why I want to get in," said the fighter fiercely, and when he had finished, he smiled for the first time during the week that he and his father had spent in searching Hollywood for the runaway girl.

The actor who had once won two hundred dollars on him had, as he himself said, "thought up a perfectly grand idea."

About an hour later a taxicab drew up outside Chatfield Tannen's hither-to impregnable fence. Out of the taxicab, in which there were two passengers, stepped a man who wore steel-rimmed spectacles and a square, gray beard. With agility surprising in one so old, this man pulled himself to the top of the fence and dropped lightly to the other side. The taxicab waited.

The trespasser upon Chatfield Tannen's sacred domain found himself in a big lot the center of which was occupied by a square building the walls of which were of glass and canvas. Between this swimming pool and himself was a log platform upon which stood a camera.

No sooner had he dropped to one knee behind this platform and out of sight of a group of indifferent workmen who stood in front of it, than he saw coming toward him from the square building of glass and canvas some twenty or more girls, all in fantastic garb.

Walking ahead of them with the air of a conquering hero was a bulky, pulpy, bald-pated man in riding breeches, white silk shirt, leather puttees and helmet. He carried a megaphone.

Herding the girls together in a semi-circle on that side of the swimming pool which was farthest from the platform behind which crouched the bearded intruder, Chatfield Tannen showed them how he wanted them to stand, lie and sit upon the strip of sand that bounded the pool.

The eyes of the unseen watcher searched the heavily made-up faces of the girls, and the lips of the unseen watcher formed the words: "Stung. She ain't here." He looked over his shoulder toward the fence as if estimating his chances of getting away unobserved. But he glanced back quickly when he heard the bulky man's voice.

"Where's that pretty little thing that I hired this morning," demanded the voice pettishly.

One of the girls giggled, but it was impossible for Chatfield Tannen to know which of his hirelings had been guilty of this sacrilege. For he had walked away from the group, passed around one end of the swimming pool and stopped between the pool and the platform behind which was concealed the man with the steel-rimmed spectacles and the square, gray beard. The fact that the swimming pool now lay between them gave one of the girls enough courage to pipe up: "She says she won't wear that costume you gave her."

"Send her out here!" bawled the dictator. "Guess she's changed her mind," the giggler shrilled across the pool. "Here she comes."

Toward the platform there advanced timidly a girl who was very conscious of her short skirt, her sleeveless bodice and her slim, silk-stockinged legs. Still, the costume was not so brief as the one she had left in the dressing room.

"Harry up!" ordered the masterful Chatfield Tannen.

When she halted in front of him he put his hand on her bare shoulder. "What was the matter with the other costume, dearie?" he asked.

He never found out. For, just as his hand touched the girl's shoulder, a fist, a man's fist that seemed to come from nowhere, was swung against his jaw with such force that he was knocked backward into the swimming pool.

All of the girls, except two, screamed; one giggled; the other began to cry. She was the only one that was close enough to the men to see that the eyes of one of them were hard and blue, like agates.

From the giggler came the exultant exclamation: "What do you think of an old man like that knocking Chatfield for a goal!"

Then, from the water, which was only waist-high, came spluttering and puffing, the angry Chatfield Tannen. "And what do you think of this?" he bellowed, and head down like a maddened bull, rushed upon him of the steel-rimmed spectacles and the square, gray beard.

Kid Moore, in his time, had fought many fights. Never had he lost one in which his opponent had come at him head down. Nor did he lose this one.

When the bulky, pulpy producing director was almost upon him, Kid Moore side-stepped, and with all his body behind the blow, sent an upper cut crashing into the face of his foe. The foe crumpled.

Upon his prostrate form Kid Moore cast a brief, professional glance.

"He's out," was his verdict.

"Three cheers!" cried the giggler. "My Harry was going to do something like that to him this morning, only Harry didn't want to mussy up his new green suit."

"Get your clothes on!" Kid Moore said to the other girl who was clinging to his arm. "I'm going to take you home. Dad's waiting for you."

"Why, those spectacles are dad's!" she exclaimed. "But where did you get those whiskers?"

"Friend of mine named Harry," said Kid Moore gravely. "He said if I'd make-up for dad, this Tannen guy would be sure to try to throw me off the lot. That's one of Harry's perfectly grand ideas that went wrong."

Old Phrases That Now Are Household Words

"To sweep the deck" sounds like a sea term, but it has no connection with ships. It is a gambling phrase, and means to sweep the board of all the stakes—literally, to "clean up" the other fellow. It arises from the fact that a pack of cards piled in order is called a "deck."

There is another phrase that is equally deceptive. We say to some one who is not to be trusted, who may let us down at a critical moment, that he "plays fast and loose." It appears to carry its meaning on the surface, yet it is a saying connected with an old conjuring trick that used to amaze visitors at country fairs.

A conjurer would fold a leather strap, and onlookers would be invited to skewer it to a board—in other words, to pin it fast. The country folk would then be urged to bet the question whether it was "fast or loose." Needless to say, whichever they said proved to be wrong. If they said "fast," it proved "loose," and vice versa. Subsequently the phrase "fast and loose" was applied to any one who was not trustworthy.

How Big Is Art?

How big is art? The dictionary gives a fairly comprehensive definition of the word, but Young America demonstrates its ability to think for itself along lines Webster never dreamed of. Two young girls were viewing the pictures at a recent exhibition at the Art Institute.

"This is my favorite," said one, pausing before a beautiful painting. "Mine, too," responded the other enthusiastically. "It's such a grand size."—Indianapolis News.

Cost of "Finding" America

A Chicago antiquary has ascertained that the famous first voyage of Columbus cost only 36,000 pesetas, or \$7,000 in the terms of our present currency. Isabella did not bear the whole expense. Martin and Vicente Pinzon, who respectively commanded the Pinta and the Nina while Columbus managed the Santa Maria, supplied two vessels and contributed a considerable portion of the funds necessary for their equipment and maintenance.

Eastern Artist in China

Mrs. R. N. MacLeod, sister of Admiral Sir Arthur Leveson and wife of a prominent Shanghai barrister, is the only European artist who has a studio in Shanghai. Mrs. MacLeod has specialized in Chinese sketches and Chinese portraits and has persuaded many prominent Chinese to sit for her. This is rather difficult in the case of old-fashioned Chinese, as they are not especially sympathetic with Western methods of painting. The old-fashioned Chinese thought that all portraits should be painted with a full front view and without shadows indicating the disposition of light.

Even Nuns Must Vote

All citizens of the republic of Czechoslovakia must turn out to vote on election day, or pay a fine. In some cases failure to vote means a short term in jail. Recently 18,500 vote slackers were fined about \$1 each; all these cases were in Bratislava alone. Even the Barnabite nuns of Prague had to vote, although their vows oblige them never to leave their convent, to keep their faces veiled and not to converse.—Chicago Daily News.

Retentive Brain

Hillsborough, N. H., has a near prodigy in Henry Rogers, a young man who can give correctly the license number of any of the more than 800 automobiles owned in the town. He can also tell offhand the batting average of every player in the major league baseball teams.

Cuticura for Pimples Faces.

To remove pimples and blackheads smear them with Cuticura Ointment. Wash off in five minutes with Cuticura Soap and hot water. Once clear keep your skin clear by using them for daily toilet purposes. Don't fail to include Cuticura Talcum. Advertisement.

New Material Welcome

Mrs. Good—That Mrs. Gaddelgh just told me something that I know is made out of whole cloth.

Mrs. Chatterton (eagerly)—Well, let's have it quick; all the gossip in this neighborhood is about worn threadbare.—Boston Transcript.

CALIFORNIA FIG SYRUP IS CHILD'S BEST LAXATIVE

MOTHER! When baby is constipated, has wind-colic, feverish breath, coated-tongue, or diarrhea, a half-teaspoonful of genuine "California Fig Syrup" promptly moves the poisons, gases, bile, souring food and waste right out. Never cramps or overacts. Babies love its delicious taste. Ask your druggist for genuine "California Fig Syrup" which has full directions for infants in arms, and children of all ages, plainly printed on bottle. Always say "California" or you may get an imitation fig syrup.

The marsh wren builds several nests besides the one used as a home, the empty nests being dummies to deceive marauders.

DR. W. B. CALDWELL AT THE AGE OF 83

Most men and women past fifty must give to the bowels some occasional help else they suffer from constipation. One might as well refuse to aid weak eyes with glasses as to neglect a gentle aid to weak bowels.

Is your present laxative, in whatever form, promoting natural bowel "regularity"—or must you purge and "physic" every day or two to avoid sick headache, dizziness, biliousness, colds, or sour, gassy stomach?

Dr. Caldwell's Syrup Pepsin helps to establish natural, regular bowel movement even for those chronically

CHILDREN'S NURSE RESUMES HER DUTIES

Praises Lydia E. Pinkham's Vegetable Compound

"I have taken Lydia E. Pinkham's Vegetable Compound for some time and I would not be without it in the house. As I am a children's nurse, I have to be on my feet a great deal and your medicine has helped me wonderfully. I was hardly able to do my housework when I began taking it, and now I am a strong and well woman, able to do all that and go out nursing besides. I have also used the Sanative Wash and found it beneficial."—Mrs. GRACE L. SHERW. APT. 103 Davis St., Greenfield, Mass.

Valuable for Weakness "I have found Lydia E. Pinkham's Vegetable Compound a valuable medicine for weakness."—Mrs. J. A. PIETSCHE, Box 397, Lancaster, Pa. Hundreds of letters like these are received by the Pinkham Medicine Co., Lynn, Mass. Grateful women from Pennsylvania to Washington, from Texas to Illinois and from Rhode Island to Nebraska say that their health has improved since taking Lydia E. Pinkham's Vegetable Compound.

W. N. U., Oklahoma City, Mo. 25-1926.

The Unknown Rector

A movie magazine has been getting "confessions" from film actors. Lola Wilson is quoted (says a London paper) as confessing that a little book which has been a great inspiration to her is called "Courage" and is the reprint of "an address given by a little-known English Episcopalian rector at St. Andrew's university."

Shades of Barrie who delivered the address on "Courage" when he was Lord Rector of St. Andrew's—W. Orton Tewson, in the New York Evening Post.

Inexcusable

Daniel Guggenheim, who recently gave \$2,500,000 to aeronautics, condemned extravagance at a luncheon in New York.

"But, Mr. Guggenheim," a young woman said, "when a man is very, very rich why shouldn't he spend his money extravagantly?"

"Would you excuse a cook," said Mr. Guggenheim, "for oversalting your dinner because he had a superabundance of salt on hand?"

Latest in Submarines

A new type of English submarine is said to be capable of remaining submerged two and one-half days, and of making a nonstop voyage of 20,000 miles. It is 350 feet long and has a crew of 121 men.

PERSONAL MENTION

Lee Berry of Clovis was seen in Friona Wednesday.

Theodore Hines of Mountain View, Okla., is visiting in Clovis and Friona.

O. F. Lange and Kathryn and Chas. Coneway were seen in Clovis Thursday.

Misses Constance Gischler and Orma White spent Wednesday shopping in Amarillo.

Jack Browder and William Vaughn left the first of the week to work in the harvest fields in Oklahoma.

Sloan Osborne of Hope, Ark., who is a brother of Jesse M. Osborne, of the Friona State Bank, arrived here Wednesday. He comes to assist his brothers through the harvest season.

W. T. Skinner of Nocona, Texas, was here this week and while here purchased a 240-acre tract of plains land. The deal was made through the J. J. Horton Land Co.

W. E. Williams and Charley Gounce, both of Bovina, made arrangements to have the Star visit their homes for another year. The subscriptions were handed in by Miss Anita Murray of Bovina.

Mr. and Mrs. Pete Rhodes and Theodore Hines, who has been visiting his brother, Fred Hines, and old friends here, leave for Mountain View, Okla., Friday.

Mr. Beard of Kansas City is visiting his sister, Mrs. J. T. Burton of this place. Some time ago Mr. Beard was out here and liked the country so well that he returned for an extended visit.

Mr. and Mrs. Bert Lockhart and children, Claudine and Connie, accompanied by Mrs. Stanley and daughters, Tera and Gladys, spent Thursday in Clovis.

Mrs. Gatlin and Mr. and Mrs. Ernest Gatlin and Mrs. Jones were called to Purdon, Texas Tuesday on account of the serious illness of a brother-in-law of that place.

Mr. and Mrs. J. H. Martin and children, accompanied by the Misses Pauline and Lillian Oliver of Farwell, visited friends in Friona Sunday. They were accompanied home by Nada Lee Martin, who visited friends here Saturday and Sunday.

Mr. and Mrs. Chas. H. Locke, agent for the Missouri Pacific at Ozona, Ark., were here visiting in the homes of J. D. Anderson and Jesse M. Osborne. Mr. Locke was well pleased with this country. It was a case of "love at first sight."

Austin Hughes of Okolona, Ark., arrived in Friona Wednesday. He

came to spend the harvest season on the plains. He is a son of Dr. Hughes of Okolona, and a former neighbor of G. D. Anderson, cashier of the Friona State Bank.

Dr. Ligon arrived here Sunday and has been giving a series of lectures each evening during the week at the Methodist church. We are informed that Dr. Ligon was formerly pastor of the Christian church at Clovis.

Clyde Goodwine branded his early calves Tuesday. He was assisted by Roy Vaughn, J. M. Teague and his uncle, W. A. Costello, and his cousin, Fred Gates.

Miss Irene McFarland, who has spent the winter at the Tech at Lubbock, returned home to spend her summer vacation. Miss Irene intends to teach next winter.

HOLLENE HAPPENINGS

Some are getting ready to begin cutting wheat the last of this week or the first of next.

There was a good rain fell in this community Wednesday night.

Rev. A. I. Metcalf and family left Friday for Estelline, Texas, for a few weeks visit at the Sam Jouett home.

A large number of the young folks took dinner at the Sam Campbell home Sunday.

Several from here attended the singing convention at Clovis Sunday.

R. M. Gunn and family and Joe Landers and family of Hereford were visiting in this community Sunday.

Messrs. Frank and Johnnie Foster who have been attending school in Virginia City, Nevada, arrived home Saturday evening.

Those who are on the sick list this week are Messrs. A. P. and Floyd Lofton and Barney Brummett.

The musicale at the Neal Lofton home Friday night was well attended.

John Chandies took his sister, Mrs. Coupland, to Hereford Sunday. Mrs. Coupland has been visiting here the past week.

Miss Goldie Foster spent Saturday night at the J. A. Madole home.

Misses Bertha Smith and Neva Hartley spent the week end with Mrs. L. E. Madole.

Mr. and Mrs. W. H. Foster and Ruby Osborne called at the Benson Smith home Sunday.

Mr. and Mrs. Tom Hartley were seen in this community Thursday.

E. B. Stith and family called on Mr. and Mrs. Claude McDougal Sunday.

Walter Potts and family and Misses Frances Chandler and Gladys Foster spent Sunday evening at the George Sagely home.

R. M. Gunn and family, Mrs. J. H. Foster and sons, Frank and Johnnie, took dinner at the J. A. Madole home Sunday.

L. E. Madole is fixing up his trucks this week for wheat hauling.

Grandma Harmon is spending a week or two with her son Joe and family, at Clovis.

A. P. Lofton is building a new granary.

Blue Eyes.
