Mayor Mack Bainum says that Friona will be sprayed from the air just as soon as weather conditions permit. Residents are advised that doors and windows may be left open, as there are absolutely no ill effects from the spray, Bainum said.

The town will be sprayed regularly, as often as needed.

F. L. Spring calls our attention to a notice appearing in a trade publication, The American Grocer, to the effect that there is no basic sugar shortage at all, and no need of panic buying. We quote:

"The fact of the matter is that we are now experiencing a sugar market controlled almost entirely by fear. This fear is largely concentrated in the minds of the housewives of the nation who increasingly are growing panicky in their mad scramble for sugar hoarding purposes. It is a clear case of what mass hysteria can do!"

"The present tight supply situation on cane refined sugar is due entirely to the inability of refiners to melt, refine, package and ship sugar at a rate high enough to satisfy the hysterical demand for two, six or twelve months supplies being bought by many housewives."

We like this story: Word comes to us that Rex Tines, pharmacist at the Parmer County Community hospital has been quite proficient as a chess player for years and years. It seems that at one time he copped a championship in a statewide tournament and as a prize received a book on "How to Play the Game of Chess."

We guess its all in knowing how. Anyway, fishermen Roy Slagle, Roy Jr., Billy Couter and Jake Lamb fished and fished at Buffalo Lake this week, working their hearts out, and still no luck. On the other hand there's the story of Ramza Boggess crossing Frio Draw on south main street in Friona last week and a large catfish swimming right into his car! We either nominate Jake Lamb as a poor fisherman or Ramza as a champion prevaricator!

Ira Galloway nephew of Ben Galloway, has been visiting in Friona this week. Mrs. Galloway is the daughter of the Lonnie Baxters' Galloway recently gave up his Washington congressional secretary job and ran for County Judge in Coleman county, winning over two opponents without a run-off.

One of the most interesting narrations you will hear anywhere is that of the experiences of Mr. and Mrs. J. T. Gee in their recent trek to the Chicago International Convention of Lions International. Not only did they go Friona and Texas right proud, but they assimilated so much knowledge and saw so many sights brought from the four-corners of the globe, that one can listen spellbound for hours as they tell of the crowded week's program. The Star cannot print the full account this week because of lack of space, but we will try to give a lengthy report in next week's issue.

Quote from Charles Allen, Friona State Bank assistant cashier: "It just isn't so!" Which we take it means that he has NOT been called up for active duty with the air corps, despite reports circulated Wednesday and Thursday.

Bovina Schools Are Being Remodeled; Lawns Are Sodded

Superintendent Willoughby of the Bovina schools reports that extensive improvements are being made in the school plant there during the summer months.

The football field has been seeded in Bermuda which is thriving and will provide an excellent playing field for the coming season.

The front lawn has been reseeded, the school building is being painted on the outside, and a complete re-wiring job will be finished this summer, Willoughby said.

Candidate Clark Sends Note of Thanks to Voters

The following was received in a letter from Mrs. Altavene Clark to the Star this week:

"I am more than grateful to my thousands of friends all over the Panhandle for their wonderful support and vote of confidence which made me the leading candidate for Congress.

"Naturally I am highly pleased and appreciative but I do not find it in my heart to be jubilant. The seriousness of the war concerns me greatly, as it does all of you. The trend of this election indicates that you people of the Panhandle want and feel the importance of experienced representation from your congressman in Washington. I thank you very, very much."

G. Preach Cranfill, Arthur Drake, Pete Braxton and Gabe Anderson, Jr., were among Parmer County grain men attending the Tuesday night meeting of the Eastern New Mexico and West Texas Grain Dealers' association in Clovis.

Other than the electing of officers, the problem of organizing a grain exchange in Clovis was discussed. DIESEL ECONOMY
with CUSHIONED POWER

THE NEW MASSEY-HARRIS "44" DIESEL

A different kind of Diesel farm power, the Massey-Harris 4-cylinder "44" Diesel brings new efficiency... new economy... new pulling power... new money-saving field performance to the Diesel farmer. It's the result of an amazingly simple engine design. A special firing chamber—called a Dyna-Cell—creates a cyclonic rotary turbulence of the burning fuel on every power stroke. Burning fuel swirls the full-length of the stroke exerting equal pressure on the piston during its travel. Fuel burns slower, smoother... delivers a pushing force. It's cushioned power. Dependable power. Greater lugging power because there's full power on every stroke of every piston.

See us soon for complete information... be sure to ask about Cushioned Power and Dyna-Cell design.

Rubber-against-rubber shelling contacts in the ALL-CROP Harvester give a natural shelling action, just as you rub out a head of grain in the palm of your hand.

The crop falls on a wide, rubberized draper and rides straight to the full-width, spiral-bar cylinder in a thin stream just as it grew in the field. Rubber-cushioned cylinder bars rub out the grain or seeds against rubber concaves.

This same gentle handling of over 100 grains, seeds and beans makes the All-Crop what is . . . truly an ALL-CROP Harvester. Stop in and talk to us about an All-Crop for your farm.

This UD-24 International Diesel power unit is furnishing power to an 8in. discharge with a 340 foot pump setting. 520 acres is being irrigated. Mr. Talley owns four UD-24 units, one of them replacing a competitive engine which was burning 15 gallons of butane an hour. This UD-24 now has 4000 hours use in two years, delivering 2200 gallons per minute. About 8 gallons of diesel fuel is used per hour.

Mr. Talley says, "In my opinion the UD-24 is a perfect engine for the deep wells we have down in this country. We own four and will continue to purchase them until we feel a better engine can be made that any other now available. The repairs on all four UD-24's just aren't worth mentioning!"

WHAT TO DO FOR POISONED DOG

Due to their eating and licking habits, dogs are often poisoned accidentally. All cases of suspected or known poisoning warrant a veterinarian's attention, because death can usually be averted by quick use of spec-

ific antidotes and hypodermic injections. If a veterinarian cannot be reached, warm salt water or mustard water can be given by mouth to stimulate vomiting of the poison. Emetics and stimulants are also helpful. A small amount of very strong coffee, warm but not hot, is a good stimulant.

The camp will be constructed on a 504-acre tract of land, three miles from Kerrville, which was donated to the League by the Federal government.

Children at the camp would come from various parts of Texas, selected by local Lions clubs. Occupational therapy will be available for the youngsters, as well as regular school.

Pony carts, horses and burros will be available for treks over the neighboring hills and through the nearby Texas State Park along the Guadalupe river.

Wiech said children will be selected on the basis of their personal need for such rehabilitation, regardless of the financial ability of their parents.

Four naval activities have been named by the Eight Naval District to process and give medical examinations to enlisted Wave reservists who volunteer for active duty.

They are the naval station at New Orleans, naval air stations at Dallas and Corpus Christi and the naval station at Orange, Texas.

Waves belonging to organized or volunteer units were asked to apply for active duty through their commanding officers. Others should apply by letter directly to the district commandant, district headquarters announced.

HEREFORD

It is with great pleasure that I announce to the growers in the Friona area that our company, the Santa Fe Grain Company, has let contract for approximately 200,000 bu. additional concrete grain storage, to be erected immediately.

For 26 years, I have been interested in Friona and its producing area. For 26 years, I have attempted to serve the growers in that section.

With the cooperation of our most capable management, under the direction of Mr. Preach Cranfill, I am happy to have splendid reports on the prices our company has paid, the accuracy of the weights and the grades, plus long hours of service daily.

I have always felt that if one does business in a town, they must serve that town, and must cooperate with the citizenship toward making it a better place in which to live—a happier place for the children of the community. After all, children are future citizens and the future Americans.

I have learned that if one is interested in a city, their business must serve well those whom they attempt to serve.

With this in view, we are adding the additional storage.

Friona has always been recognized as a marketing center. Top prices in the entire Panhandle have been paid at Friona. This is the policy of the Santa Fe Grain Company who has always paid as high prices as could be paid and not try to buy grains as cheaply as we could.

With the world-wide outlets, we have established over a 30-year period, we are in position to serve better than ever, and re-dedicate ourselves to serving the citizens of the Friona community, and surrounding territory.
