To the People of the 18th District: CRITICAL MATERIALS

On several occasions I have referred to the practices in this country of advertising our insufficiencies as well as over-advertising our sufficiencies. It has been my opinion that much of the information concerning the welfare and safety of this nation should not be divulged. The American people are all primarily concerned with the facts, but they all realize that when this information is broadcast it falls on the waiting ears of our potential enemies. Recently a report was issued on a study of the accessibility of critical materials to the United States in time of war. The report pointed out that that expert testimony made it crystal clear that there were more known commercial reserves of critical materials in the United States than ever before in the history of this nation. That the conclusion heretofore reached that the known reserves of petroleum, tungsten, manganese, zinc, lead and other

under the guns of potential enemies or were in a class of timid neutrals.

The report was issued concerning 77 raw materials declared by the Secretary of Defense as essential and indispensable in waging modern warfare, which raw materials had heretofore been acquired by imports from abroad. It was the general context of the report that the Western Hemisphere can become completely sufficient in the production of necessary critical materials in time of war, and that this nation could materially increase its own economic production of strategic and critical materials by strengthening its laws regulating foreign trade. It was pointed out that expert testimony made it crystal clear that there were more known commercial reserves of critical materials in the United States than ever before in the history of this nation. That the conclusion heretofore reached that the known reserves of petroleum, tungsten, manganese, zinc, lead and other

minerals would be virtually depleted within twelve years, was a fallacy and a mistake. I sincerely hope that the information contained in this report is exactly correct; however, I doubt the advisability of giving information of this sort to those enemies of this country who are so anxious to get information of this kind. I want the stock-piles of critical materials to be wholly sufficient to meet our needs whatever they might be. I would also prefer that information concerning them be so confined that the best interest of this country would be served.

TODAY'S Meditation

from The Upper Room

THE WORLD'S MOST WIDELY USED DEVOTIONAL GUIDE

Read Acts 27:33-44

In every thing give thanks: for this is the will of God in Christ Jesus concerning you. (1 Thessalonians 5:18).

After seven days of continuous rain, the sun appeared, radiating light and warmth. I hurried to hang out a large batch of wet clothes in that sunshine. My neighbor did the same. Soon all the yards were full of clothes hung out to dry.

Then I began to meditate on the great things of the universe for the good of humanity: the sunshine, the air, the trees which produce tasty fruit, and many other things too numerous to name.

God gives us our blessings. Besides, He sent us a more wonderful blessing—His only begotten Son to die on the cross for our sins. Also, God sends the Holy Spirit to guide us in this world. He gives us peace of mind that we may not fear the morrow; joy in living, even in the midst of tribulations.

Life is all the richer for us if we give thanks, without ceasing, to our Creator, Redeemer, Father, and Comforter for all mercies.

Prayer

Lord God, our Father, we praise Thee and thank Thee for the manifestations of Thy love, for material food for our bodies and spiritual food for our souls. We ask Thy pardon for our failure to recognize Thy loving care in the daily blessings we receive. In Jesus' name. Amen.

Thought for the Day

It is the will of God that we be thankful.

Arabela P. Schultz (Brazil)

Legal Precautions - REAL ESTATE TITLE PROCEDURES OUTLINED

How may a purchaser determine whether the title he is receiving in a real estate transaction is good, bad or indifferent? Although at first glance there may appear to be more than one alternative method, purchasers usually find that all roads of complete title security lead to a lawyer chosen by the prospective buyer to represent his interests.

In a previous column it was said that the Contract of Sale should state the QUALITY OF TITLE to be conveyed to the purchaser. If the contract does not so state, then the seller may be obligated to sell—and the purchaser bound to buy—only whatever title the seller happens to possess, which may actually be quite defective. This may be true in spite of the fact that the seller is in possession, has a deed to the property, has been paying taxes, etc.

A real estate title is a claim of ownership or right to land and to the improvements, such as houses and other structures, located thereon. It may be partial or complete, as determined by the numerous facts in each case. If it is complete and superior to any other person's claim—if you can prove your right thereto against all the world, it is a GOOD TITLE. If, in addition, the evidence of your claim of ownership is contained in the proper public records, it is a GOOD RECORD TITLE. Ordinarily, only a GOOD RECORD TITLE is considered salable, being sometimes referred to as a GOOD MARKETABLE TITLE.

When you buy a house, you want a title which is good, so that you and your heirs will not be troubled while enjoying the use of the premises. You also want that title to be marketable, in order that it can be sold when you are ready to sell—without the expense of perfecting title before your buyer will complete his purchase.

Having made certain that your contract of sale indicates the exact nature of the title to be conveyed to you by the seller, how do you go about assuring yourself that you will receive the specified quality of title? People have varied ideas about this matter.

Some consider themselves safe when they gain possession of an Abstract of Title or a General Warranty Deed. But an Abstract is merely an outline of public records on the tract of land—a history of the title—which anyone may purchase, regardless of ownership. A General Warranty Deed from

WASHINGTON AND SMALL BUSINESS

The Department of Commerce makes interesting discovery.

This government agency has surveyed some 400 of nation's biggest business enterprises on what inducement would encourage them to risk capital in foreign ventures.

The replies are very interesting. Usually the term welfare state is used to indicate a desire for government pledged security for the low-income groups. However, replies indicated that the greatest tub thumpers for a welfare state are the nation's biggest corporations.

It is also interesting Dept. of Commerce confined survey to 400 firms out of more than 4 million establishments in the nation.

It is also interesting to reflect that undoubtedly some of these firms included the leading tub thumpers for abolition of U. S. protective tariffs with the cry that no matter how cheap foreign labor is, American "know how" can overcome that, and besides, if unlimited cheap imports hurt some domestic firms that's just the risk of doing business.

But Big Business made it clear to Commerce Dept., it wants to take no risk.

For example, there seemed to be a lack of belief that their sales methods could be successful in selling to pent up demands of the billions outside U. S. Therefore, before taking any "risk" they want tariffs reduced so they can sell their foreign labor produced goods in U. S.

They want special low income taxes on any money they

make on foreign "risk" ventures.

They also want government to guarantee they will suffer no losses on foreign "risk" ventures.

They also want the government to relieve them on anti trust laws, presumably so they can join foreign monopolies in their "risk" ventures.

In fact, they expressed themselves as perfectly willing and eager to enter into "risk" ventures in foreign lands.

But the risk must be shouldered by the U. S. taxpayer, and the profits of such "risk" ventures must accrue to them.

Yet many of these same corporations employ high pressure men to persuade independent retailers and wholesalers to risk capital in heavy inventories—with no guarantee.

Thus, once again, evidence appears there are two definitions of free enterprise. One small but affluent group, feels free enterprise is where government gives them a free hand backed up with free insurance.

But independent businessmen, generally, consider free enterprise as a system whereby a man is free to go broke, as well as make a fortune.

Yet thousands are willing to risk their savings, their homes, furniture, and futures in having a go at free enterprise as they understand it. And all they ask from government is that they be given at least an even break to succeed. Yet government policies on cheap imports, lax anti-trust law enforcement, inequitable tax programs, make that risk more riskier every year. But interestingly enough, Commerce Department has yet to make a thorough investigation of the needs of independent business.

Other Editors Say:

THE CANYON NEWS: NEGROES, WHITES MAKING MESS OF SEGREGATION

As we view the situation, both whites and negroes are making themselves ridiculous in the demand for immediate relaxation of segregation in Texas. Here we have the University of Texas. A negro was at first granted freshman admission, and now he is rejected on the ground that there are two negro institutions in Texas giving the work which the negro wished to take. This may be true, but it is likewise true that the negro schools in Texas are not equal to those provided for the whites.

Now comes the case of Dallas where 100 grade negro children are demanding admission to white schools on the grounds that their school was opened during the summer and closed as cotton picking time hit Texas. Members of the school board in Dallas declare that this arrangement was made upon application of negro parents who wished to provide work for their children in the cotton fields.

Negro parents say that the situation was started a few years back by white farmers who wanted more help during cotton picking time.

Thank goodness Canyon has no negroes to furnish us headaches now or any other time of the year.

We are sure that neither the white or blacks, if we had any blacks in Canyon, would be any more agreeable to mix and mingle than they are in other parts of the state.

COMMUNISM MUST BE DESTROYED

The more we read and hear of Red propaganda, the firmer we are convinced that Communism and the Free World cannot live side by side peacefully.

The Reds are determined to make slaves out of all free people of the world. They are not satisfied to rule by remote control, as they have carried on their wars, but must dictate from Moscow what each nation which is overrun by the Reds shall do or think.

The Canyon News is not proposing World War II, which would be the war to finish civilization. But we cannot see how we can continue much longer to give the Reds their own way, and at the same time continue to live peacefully with them.

The Reds have won every battle in which the two nations have been engaged. They are the crazy, cocky nation which promises to sweep everything before it. A lot of folks are convinced that the Reds are not as bad as they have been pictured, but just let them once get the upper hand and such people will find out what confronts him.

Using an expression which J. C. Phillips of The Borger News has long used: "The Communists must be destroyed." He stops right there, and did not stutter when he first used this expression, and certainly has not stuttered during the months which he has used this expression in print.

LEASING PUBLIC LANDS IN ALASKA

I have been receiving a number of communications concerning public lands in Alaska. For the information of everyone who might be interested, there are grazing leases being issued in Alaska now. The information as to which lands are available can not be obtained in Washington. These lands are under the jurisdiction of the Area Administrator at Anchorage. The information about the land and also the forms for making the applications can be obtained from:

Mr. Lowell M. Puckett
Area Administrator

One Den Mother Still Needed; Cubs

A planning session for the Cub Scout organization was held Thursday night at the home of the Cub Scoutmaster, Judge Barker.

Programs for the monthly pack meetings were outlined and discussion of the weekly den meetings was held.

The pack meetings will be the first Thursday night of each month, with the meeting place to be selected and announced soon.

The Cubs are still in need of one den mother and an assistant den mother. Anyone interested should contact Scoutmaster Barker.

Present for the Thursday night meeting were Mrs. J. T. Gee, Mr. and Mrs. George Grant, Mrs. Benitha Beene, Mrs. Clyde Fields and Mr. and Mrs. Barker.

SCHOOLS — CONTINUED FROM PAGE 1

burn was installation chairman with Don Lewis and Marie White as assistants. Mr. Caffey installed Mickey Ready as president, and Harold Taylor as vice-president. Then Mickey gave the oath of office to the following delegates: Senior—Gordon Wright, Denise Magness, and alternate, Dudley Bainum; Junior—Ann McKee, Jerry Houlette, and Phyllis Fairchild as alternate; Sophomore—Patsy Anthony, Don Reeve, Phyllis Treider, Doris McFarland, and alternate, Barbara Deaton; Freshmen—Phila Mae Buske, Ruby Grubbs, Denise Bender and Larry Fairchild.

The sponsor-delegates are Mrs. McClain, Mr. Childers, Mr. Watkins and Mrs. White. A challenge speech was then given by Mr. Caffey. A presentation of the school colors was made by the installation committee.

This Friday afternoon at 3:00 p. m. the first Southern Assembly will be held. It stars David Mylan. He is a make-up and costume artist presenting a wide range of characterizations by means of make-up and costume. I sure hope I can find 25 cents.

I'll see you at the ball game Friday night.

Love,
Big Minnie.

Markets -

By TED GOULDY

CATTLE PRICES BETTER AS MARKETING SLOWED

FORT WORTH. — The receipts of cattle and calves at Fort Worth were curtailed on the opening of the week Monday by rains in some sections of the territory which in some cases hindered movement and in others gave promise of some grazing and put out some stock water.

The prices were very mixed in the highly uneven trade with some

sales fully steady to strong, and some spots 50 cents to \$1 higher. Cows, slaughter calves and stockers had the better of the stronger prices, while bulls and fat steers and yearlings were fully steady to strong.

Stocker demand for cows was considerably better and some of the better kinds of plain stocker cows were up sharply compared with last week. Whether this was entirely due to firm orders, or represented some hopeful buying in view of the prospects for winter grain field

grazing development could not be ascertained immediately.

High quality stocker calves and yearlings were moving readily at stronger prices, some spots \$1 up. Slaughter buyers were also pressed to get their share of the offerings and with their current killing operations geared to high levels were in need of numbers even at higher prices.

Consumer demand was apparently still at high levels despite the increased competition for beef from cheaper broilers and turkeys, as well as the swelling tide of butcher hogs that were moving into Cornbelt points.

Good and choice fat steers and yearlings cashed at \$19 to \$24, and common and medium sorts bulked at \$10 to \$18, with a few rannihan yearlings below \$10 still.

Fat cows cleared at \$8.50 to \$11, with a few smooth high yielders to \$12. Canners and cutters sold largely at \$5 to \$8.50, some high yielders to \$9, and still some emaciated canners of light weights below \$5. Bulls cashed at \$8 to \$13.

SHEEP AND LAMBS OPEN FULLY STEADY

Trade was active and prices were steady on sheep and lambs at Fort Worth, Monday, as the first week of October livestock trade got underway. The run was made up largely of old ewes, with some 75 per cent of the offering of this class.

Slaughter ewes sold mostly from \$4 to \$5.50 and some solid mouthed ewes went back to the country at \$6 to \$8, with some stocker yearling ewes to \$10 and better.

Fat shorn lambs sold at \$17 to \$18, when good and choice, and the cull, common and medium varieties of lambs sold from \$8 to \$16. Stocker and feeder lambs sold from \$11 to \$14. Old wethers cashed at \$6 to \$10, and slaughter yearlings cashed at \$8 to \$12.50. Old bucks drew \$3 to \$4, a few higher for stocker purposes.

HOG PRICES WEAK TOP MONDAY \$19.50 - \$20.00

Top hogs were weaker at Fort Worth, Monday with the top \$19.50 to \$20, and the weaker market was attributed to an increase in the offerings of hogs at Cornbelt points.

Chicago reports a hog top of \$19.25 to \$19.35, and Kansas City had a top of \$19 to \$19.25 with a part load \$19.50.

Fort Worth sows sold steady at \$14 to \$18. Less attractive butcher hogs here sold for \$17 to \$19.25.

Friona State Bank

Lawn Care Is Most Important in October

COLLEGE STATION, Oct. 6.—Lawns of Bermuda and St. Augustine grass will enter the winter in a more vigorous condition if fertilized now. This added vigor will keep lawns green longer into the fall and winter and will lead to faster, earlier grow-off next spring.

Apply a complete fertilizer with a 2-1-1 or 1-1-1 ratio at the rate of two pounds of actual nitrogen for each 1,000 square feet of lawn area, says E. M. Trew, extension pasture specialist. This is the quantity of nitrogen in 20 pounds of 10-5-5 or 10-10-10, or in 25 pounds of 8-8-8.

To assure even distribution, the specialist recommends dividing the fertilizer into two equal lots. Broadcast one and then spread the remaining portion in a second application, but at right angles to the first.

"Grass can't use fertilizer without water," Trew adds. In most areas yards will need a "good soaking" after the plant food has been added. Soak the soil to a depth of six inches or more. This allows the fertilizer to go into solution and become available for plant use.

To bring out need for timely application, he says plant food should be added one month prior to the first expected hard freeze. When the summer grasses are pushed into lush growth by late treatment, some may be lost because of freeze-

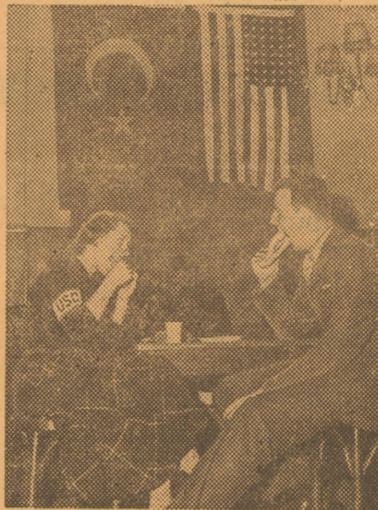

ing temperatures.

Ryegrass, sometimes overseeded on Bermuda for winter lawn, is not recommended for established lawns of other grasses. Its value in Bermuda is doubtful, says Trew, since

SCD Newsletter

How can it be true that 40 percent of the population in the United States suffers from mal-nutrition since we produce more food than any other nation in the world? The majority of the people get enough to eat so evidently the food eaten does not have enough of the right minerals and vitamins in it to keep them healthy. What causes food to lack these necessary elements? Investigators have found that food is no richer in minerals than the soil from which it comes. Depleted soils will not produce healthy and nutritious plants. Plants suffering from mineral deficiencies will not nourish healthy animals. Mineral deficient plants and undernourished animals will not support our people in health. Poor soils perpetuate poor people physically, mentally and financially.

It is said that armies march on their stomachs. It might be added that stomachs march according to the fertility of the soil. Health belts exist in the United States and vary in general according to the fertility of the soil. Seven out of every ten men examined in Colorado where the soils are predominantly fertile were physically fit for military service; while in some of the southern states where the soils are predominantly poor and depleted only three out of every ten were physically fit.

Unfortunately many of this nation's soils are deficient in one or more of the necessary elements for proper plant and animal life. This is especially true of the Southern states where most of the soils in addition to being inherently low in fertility have suffered erosion and depletion through cropping.

Investigators have demonstrated that the quantitative variations of such inorganic elements as calcium, phosphorus, iodine, copper, cobalt and iron in foods and feed are very important factors in human and animal health. It is known that when soils of an area lack iodine

the people living in that area do not receive enough in the locally grown food and therefore suffer a high incidence of goiter. It was found in certain districts in Florida where the predominant soils were classed as deficient in iron, copper and cobalt that from 2 to 96 percent of the children were anemic, but in the districts where the predominant soils were found to contain sufficient amounts of these elements that less than 25 percent were anemic. Dietary deficiencies are rarely single and specific in effect as in the case of goiter and anemia; but cover a wide range of disturbed body functions that we ordinarily overlook and do not think of as being caused by the mineral deficiencies of our soils.

Calcium and phosphorus deficiencies rarely show up in livestock. In some localities animals born in the early winter develop rickets by late winter or early spring because of mineral deficiencies. In the southwestern part of Louisiana cows suffer with what farmers commonly call the "hollow horn" disease. Cows suffering this deficiency cannot get sufficient minerals from their grazing grasses to develop their bones. In the development of their offspring they have to draw so heavily on the minerals of their own bodies that the bones in their horns and tails are almost completely used up. Recent experiments have proven

that tonnage or bushel yields do not necessarily mean as much as originally believed. Tomatoes grown on soil of high fertility were found to have a nutrient content several times higher than the same variety of tomatoes grown on poor soils. Cows fed a good grade of alfalfa with five times as much vitamin A as the same cows when fed ordinary hay. It is possible to vary the calcium content of lettuce as much as 60 fold by varying the calcium content of the soil in which it is grown. The calcium content of cabbage, one of the most commonly used protective foods of the vegetable class, has been found to vary from .4 per cent to 1.6 per cent of its dry weight.

Crop juggling is not permanent substitutes for soil deficiencies. New plants that will produce growth on mineral-deficient soil can be brought in, but the analysis of these plants show that they are deficient in the same minerals as the soil on which they are grown. Grains are more stable nutrient composition than forage plants and they reflect declining soil fertility by declining yields in bushels per acre. Most forage plants tolerate extreme ranges in soil fertility and will make a fair growth on poor soils; therefore there is a natural tendency for farmers to go with the illusion that their feed and soil problems are being solved.

The battle to conserve soil is at the present still being lost as only 460,000,000 acres of cultivatable land remain and much of it is being washed and blown away each season. Estimates show that 90 per cent of the conservation job lies ahead; that is conserving the soil in its present state and building it back or improving it to its original condition. The job of correcting the mineral shortages of the soil to a point where national health will be assured, also lies ahead. Soil fertility is the place where this nation can undergird rather than undermine its national health. The soils of this nation are its greatest natural resources and if used wisely its value, its strength, and its productivity are ageless. We must maintain and improve soil fertility to remain strong physically, mentally, and financially.

Attendance Averaged 20 At Credit School

Mrs. Lucy Jones, manager of the Friona Retail Credit Bureau, reported fairly good attendance for the Retail Credit Institute, which was held from Monday through Thursday night of last week, at the Friona High School.

Mr. Heinz Ulrich, Jr., Retail Credit Specialist from the University of Texas, conducted the Institute.

There were twenty businessmen and employees enrolled for the school on Monday night and about that many in attendance each night. The utilities companies also had representatives present for the school.

Eighteen certificates were issued on Thursday night, at the conclusion of the course.

Boy Scouts Vacationed In N. Mexico Mountains

Ten Boy Scouts of the Friona Scout Troop and the Scoutmasters, Steve Bavousett and Jay Sanders, spent the week-end in the mountains of New Mexico.

The group left Friday afternoon immediately after school and returned home Sunday night. Some of the boys fished while there, and all reported a good time.

Making the trip were Jimmy Patton, Ted Sanders, Butch Barker, Dale Panzer, George Terry, Randy Williams, Johnnie Miller, Robert Neelley, Robbie Osborn, Wayne Rhodes and the Scoutmasters.

Personals

Pat Deaton, who is stationed in the navy at Long Beach, Calif., is home visiting his parents, Mr. and Mrs. K. E. Deaton.

Mr. and Mrs. Lannie Rhyne of Oklahoma visited over the week-end with her brother and family, Mr. and Mrs. Bill Cogdill.

Marvin Lawson visited relatives in Oklahoma the first of the week.

Mrs. Jimmie Baxter took her children to Hobbs, Wednesday, for a visit with their grandparents. Mr. and Mrs. Baxter will leave Friday for Dallas to attend the Oklahoma University-Texas University football game in the Cotton Bowl on Saturday.

Mr. Raymond Cook went to Lawton, Friday night, to bring his wife home. She has been ill and has been staying with her parents there. His mother from Abilene also returned to Friona with the Cooks to take care of the family until Mrs. Cook is improved.
