Cogitations & Aphorisms of Jodok

I have just been listening and reading with considerable interest the preparations that are being made to erect a "Will Rogers" memorial but if the plan and kind of memorial that will be prepared has been decided upon, I have not learned that.

The life and character of Will Rogers and the great amount of good he has done in the world is truly deserving of one of the greatest memorials the minds of his fellow men can devise, and I am heartily in favor of the effort that is being made to establish it.

I do hope, though, that the committee having this work in charge will not decide on some large shaft of marble or granite or sand stone with various inscriptions worked upon it, as a fitting memorial to such a life and character as that of Will Rogers.

From what I have seen and heard of him I feel sure that such a memorial would not meet with his personal approval were he here to give it. I have him estimated correctly, the kind of memorial he would approve would be something that would be something that would be continually turning out help and happiness to the world, since that was what seemed to appeal to him mostly while here in body.

There are too many crooked little limbs and twisted spines and weak chests and bodies among the children of the world and too many rheumatic and forlorn old people to be made well and happy for Will Rogers to acquiesce to the spending of money in his honor for something of no use but to look at.

It occurs to me that Will Rogers would recommend the establishing of a fund that would endow an institution devoted to the cause of straightening the deformed little feet and limbs and spines and strengthening the little bodies and of driving away the decrepitude and lost hope from the limbs and minds of the aged and bringing cheer and gladness to the faces of both the young and old.

But there are those who think that money spent in any plan to bring relief to the aged is money wasted, since there is so little hope of any permanent relief to them on account of their age. I abruptly disagree with any such idea for the decrepitude of age can be relieved and even though it should be but temporary relief, these dear old seed ones, most of whom have spent the greater part of their lives in trying to shed relief to their fellows, are entitled to the best that can be provided while they do still live.

As I sometimes allow myself to roam from my beaten track on Main street to the more remote parts of Friona, I cannot help but take some notice of the efforts of many of our people to beautify their premises, and at the same time, beautify as a whole, by planting trees and flowers and shrubbery about their homes and public buildings. I most heartily recommend and approve of this plan.

I notice also, that the success meted out to these various individuals, is dependent almost entirely on the method of planting. I notice that trees planted where he ground has been tilled so that the native grass has been eliminated, and then given plenty of water during dry seasons, have grown rapidly and luxuriantly, while those that have not been thus cared for are making little or no progress. This seems to apply to flowers as well as to trees.

As examples, I have noticed the trees at the Baptist and Congregational church grounds. Those at the Baptist church are well provided with loosened dirt and well supplied with water, which task is attended to by the pastor, Rev. D. E. Moore, and the trees, though only planted the past spring, have made a nice and substantial growth; while those at the Congregational church have been planted for several years and at one time were making a nice growth, while Rev. Beattie was pastor, and give them plenty of attention and water, although the ground had not been plowed for them. But now many of them have actually died for lack of water, even though the ground was plowed slightly during the past season.

Another illustration is that of the school grounds and the city park. In the former case there has been abundant cultivation and also an abundance of water and it will be hard to find any young trees that

EXPERT FOOTBALL GAME

There will be an expert football game at the Friona Athletic Field this afternoon (Friday) at 4:00 o'clock between the R. A. boys of the Baptist church and the boys of the same age of the Methodist church. This will be one of the most attractive games of the season, and you are very cordially invited to attend this game. Admission free.

We have not as yet agreed on who will call this game. May have to import a specially informed man or woman for this job.

You come and give the boys your support and root for the winners. Committee.

DR. E. B. WILLS MOVED

Dr. E. B. Wills, dentist, who has been in Friona for the past few years, closed his dentist office here and removed with his family to some place near Waco, where he intends to open an office.

have made a more substantial and beautiful growth than these trees have made; While those of the city park have had excellent cultivation and not a weed has been allowed to grow there, they have been cut short on water, and their growth has been not much, and some of them look now as if they are just about dead. The city has always had plenty of water for these trees but it requires time to apply it, and that is what no one seems to have to spare, especially those who are interested in the welfare of the trees.

Marvin Whaley has some of the finest and largest flowers that I have seen within the town. He has a great many varieties of these flowers, but the most attractive are his dahlias, many of which are seven feet in height and the flowers being apparently four or five and may be six inches in diameter, and of almost every imaginable color or hue. The next in attractiveness are the roses, of which he also has a great variety and of practically every color known to the rose family.

Another variety of flower which Mr. Whaley is growing in his yard is the water lily or pond lily, as it is sometimes called. So far as I have been able to learn, Mr. Whaley is the exclusive grower of water lilies in Friona, and he has, at considerable labor and expense, prepared a small pond in his yard for the purpose of growing these beautiful flowers. The small pond is kept full with water from his well, and he feels well repaid for his labor and care by the beautiful flowers which the pond produces.

Other premises that I have noticed where trees, flowers, hedges and grassy swards have been made to grow in great beauty are: R. H. Kinsley, O. F. Lange, M. A. Crum, Nat Jones, M. H. Sylvester, E. F. Sylvester, and Fred White, and the leading varieties of flowers are the dahlias, petunias, chrysanthemum, zinnia, gladiolus, asters and larkspur.

Ruford Taylor, who formerly conducted a cafe in Friona, has also done his bit to beautify his surroundings by planting flowers and trees along the side or in front of the places where he conducted his business. He evidently had a love for green trees and flowers. I am not saying that these are the only people in Friona who have made efforts to add beauty to their surroundings by the growing of trees, flowers and grass, but these are some that have recently come to my notice.

Here is something which I read in the Readers Digest, of the August issue. I think it was:

"And every time you pass on a blind curve, every time you hit it up on a slippery road, every time you step on it harder than your reflexes will safely take, every time you drive with your reaction slowed down by a drink or two, every time you follow the man ahead too closely you are gambling a few seconds against this kind of blood and agony and 'sudden death.'"

"Take a look at yourself as the man in the white jacket shakes his head over you, tells the boys with the stretcher to no bother and turns away to somebody else who isn't quite dead yet. And then take it easy."

I would like to have the time and space to give this entire article which is entitled "And Sudden Death," and may have some time. But I would like still better to be able to write just such material. If I could do that, I think I should devote a large portion of my time to just such writing, for if there is the kind that should have a tendency to cause automobile drivers on our highways to drive more carefully and to think more of the lives and welfare of themselves and of their fellowmen.

"One ship drives east, and another drives west. With the self-same winds that blow, 'Tis the set of the sails, and not the gales Which tell us the way to go."

IN FLANDERS FIELDS

By Lieut.-Col. John McCrae

In Flanders Fields the poppies grow
Between the crosses, row on row,
That mark our place; and in the sky
The larks, still bravely singing, fly
Scarce heard amid the guns below.
We are the dead. Short days ago
We lived, felt dawn, saw sunset glow,
Loved and were loved, and now we lie
In Flanders fields.
Take up our quarrel with the foe;
To you from failing hands we throw
The torch; be yours to hold it high.
If ye break faith with us who die
We shall not sleep, though poppies grow
In Flanders fields.

MAYOR'S PROCLAMATION

Saturday, Nov. 9th, was proclaimed Poppy Day in Friona by a proclamation issued today by Mayor E. W. Reeve. The proclamation urged all citizens to honor the World War dead by wearing the American Legion and Auxiliary memorial poppy on that day, and to aid the war's living victims by contributing to the Legion and Auxiliary welfare funds. The proclamation follows:

"The town of Friona during the great crisis of the World War sent forth its sons in response to the nation's call. They served gallantly in the nation's defense, and of their numbers some were called upon to lay down their lives in that service. The memory of their patriotic sacrifice should always be held dear by the citizens of Friona.

"Others of these brave young men were called upon to sacrifice, not life, but the health and strength which make life worth while. Their sacrifice, these disabled and dependents are still paying the human price of our nation's World War victory.

"From the battle front in France our returning soldiers brought the poppy as the symbol of sacrifice and the memorial flower of the dead. Each year on the Saturday before Memorial Day the men of the American Legion and the women of the American Legion Auxiliary unite to wear this flower in tribute to the nation's fallen defenders and to give in exchange for the flower a contribution to aid the war's living victims.

"Therefore, I, E. W. Reeve, Mayor of Friona, urge all citizens to honor the dead and aid the living by wearing the American Legion and American Legion Auxiliary memorial poppy on Saturday Nov. 9th.

"And to that end, I do hereby proclaim Saturday Nov. 9th, Poppy Day in the town of Friona.
E. W. REEVE, Mayor

PARTY HONORING MR. AND MRS. SMITH

Mrs. J. C. Wilkinson was hostess one night last week to a group of friends and neighbors at a farewell bridge party honoring Mr. and Mrs. Ray Smith.

Following the games of bridge a delicious luncheonette was served by the hostess during which one of the guests, Mr. O. F. Lange, in a short speech of well chosen and well meaning words, presented to the honorees a beautiful "overnight" traveling bag, as a token of high esteem from the guests.

KANSAS PEOPLE HERE

Mr. and Mrs. J. B. Hamm, of Pratt, Kansas, arrived here the middle of last week for a few days visit with relatives. They are visiting in the home of their daughter, Mrs. Ed White, and with their son-in-law, John Key, seven miles southwest of town.

Mr. and Mrs. Hamm formerly lived in Friona for several months and are quite well known here and all their Friona friends are glad to see them again. They are enroute to California where they will spend the winter.

POPPY DAY IN FRIONA

Preparations for Poppy Day, to be observed here Saturday, Nov. 9th, went forward rapidly today, with the arrival of the memorial poppies at American Legion Auxiliary headquarters. The little red flowers, 250 of them, came from Legion, Texas, Hospital where they were made by disabled World War veterans, comrades of the men in whose honor they will be worn.

The poppies are being counted and arranged in readiness for distribution to the Poppy Day workers who will offer them on the streets Nov. 9th to be worn as a tribute to the World War dead. All work in connection with the observance is being carried out by volunteers so that every penny received as Poppy Day contributions can go to into the welfare funds of the Legion and Auxiliary.

"The poppies are paper replicas of the wild European poppies which bloomed along the battle front and in the war cemeteries during the World War." "It was this flower, growing between the rows of wooden crosses above fresh battle graves which inspired Col. John McCrae to write his famous poem, 'In Flanders Fields'. The flower is now recognized throughout the English-speaking world as the symbol of World War sacrifice.

"Each of the little red flowers has been made by hand by some disabled veteran in need of employment. For each poppy the Auxiliary has paid its maker one and a quarter cent, enabling hundreds of veterans to support themselves and families through the winter and spring. Approximately ten million of the poppies have been made this year, placing carnivals in the empty pockets of these disabled veterans.

"In addition to the earnings of the veterans making the poppies, the poppy funds bring aid to thousands of needy families of veterans throughout the year."

WENT TO LUBBOCK FOR X-RAY

Mrs. Blackwell drove Mr. and Mrs. Mulkey Ezell over to Lubbock Tuesday at the suggestion of the local physician, so that Mr. Ezell could have an X-Ray picture taken in order to ascertain the extent and condition of an infection which he has suffered in his face as a result of having his teeth taken out. This infection has continued for several weeks and has so affected Mr. Ezell's health that he has been obliged to lay off from his work for the past several days. He is one of the clerks at Blackwell's Hdw. & Furniture store.

JUNIOR WOMAN'S CLUB

The Junior Woman's Club held their regular meeting Tuesday evening November 5 with Miss Martin McFarland acting as hostess. Fifteen members responded to the roll call. After a short business meeting a very interesting program was given on Early Texas Days by Misses Alice Guger and Edith Galway. After the program delicious refreshments were served by the hostess.

REMEMBER THE VETERAN "BUY A POPPY."

SCHOOL NEWS

The Friona Chiefs are to make their first trip for a football game this Friday. They are to play Claude in the afternoon. This will also be the first game they have played in the afternoon as they have been taking advantage of the floodlights.

Claude is reported to have a very strong team this year. They have been playing teams such as Phillips Groom, White Deer, Dalhart and other strong schools. The team is made up of large boys who have had a lot of football experience.

Last Friday evening the Chiefs took another beating at the hands of Dimmitt to a score of 18-12. This closed the Chiefs' home season, giving them five victories and two defeats.

The fast back with the Dimmitt team was too much for the local boys. Their line also outcharged the Friona line, allowing them to make yardage when they should have been forced to kick.

The P. T. A. carnival on Halowe'en evening was quite successful financially. There was \$124.57 taken in, and with all expenses paid there will be over \$100.00. This amount is not quite as much as was made last year.

The First Lady of the school was Miss Lois Pressley, the Senior candidate. The President was Mr. O. D. McLellan, the Senior candidate, also.

Other classes and their representatives were: First grade, First Lady and President; Miss Bobbie Ruth Clements and Mr. William Stell; Second grade, Miss Doris Ann Lange and Mr. Lou's Welch; Third grade, Miss Shirley Maurer, and Mrs. Billie George Clements; Fourth grade, Miss Carolyn Lange and Mr. Artis Fullwell; Fifth grade, Miss Christine Southall and Mr. Eugene Southall; Sixth grade, Miss Nancy Ruth Shackelford and Mr. Ivan Lans-Chapin and Mr. James Watkins; Freshmen, Miss June Chapin and Mr. George Landrum; Sophomore, Miss Mattie Cole and Mrs. Ralph Baxter; and Junior, Miss Juanita Welch and Mr. Harry Gowers.

The Grade school honor roll for the month of October has been posted. The following students made either A's or B's, in their studies, and A in deportment:

First Grade: Irene Baker, Wynona Carter, Bobbie Ruth Clements, Gertrude Ann Euler, Elda Hart, Camille McSpadden, Geraldine Nelice, Roberts Irene Nolen, Dorothy Jean Rogers, Betty Lou Turner, Yvonne White, J. D. Johnson, Billie Stell, John Smith and David Smith.

Second grade: Euzene Highfill, Junior Renner, W. C. Reid, Louis Welch, Thestas Price, Ruby Ezell, Vera Lee Fry, Doris Ann Lange, Mary Serrano, Ethel Mae Taylor and Norma Lucile Thurston.

Third grade: Nancy Jane Cobb, Mabelle Gischer, Wanda Hart, Hazel Lee Horton, Betty May Massey, Shirley Maurer, Olive Jean Tippens, Billie Gene Whitley, Garret Barker, Dean Blackburn, Billie George Clements, Harbert Johnson, Ralph Porter, Bobbie Lee Roden, Wayne B. Stark, and J. G. White.

Fourth grade: Carolyn Lange, Beulah Southall and Mary Lee Todd.

Fifth grade: Roy Lee Johnson, Mary Jo Anderson, Ann Cobb, Inez Ezell, June Maurer, and Wanda Wood.

Sixth grade: Jacquelyn Wilkinson, Joel Landrum, John Lee Wells, Edna Hall, Geneva Schmitt, Nancy Ruth Shackelford, Betty Ann Taylor, Wynell Thompson, Ruth Evelyn Vestal, Yvonne McFarland, and Keith Blackburn.

Seventh grade: Vernon Weis, Travis White, Florence Baker, Florence Baxter, Geneva Borgess, Jean Chapin, Glenn Jack, Francis Key, and Dorothy York.

IN MEMORIAM

In memory of my dear daughter, Mrs. Ella Floy Crawford, who passed to the Great Beyond, November 5, 1935.

Thou wilt not leave us in the dust!
Thou madest man, he knows not why.
He thinks he was not made to die,
And thou hast made him. Thou are just.

Mother

HOME MAKERS CLASS ENTERTAINED

The Home Makers' Class of the Baptist Sunday School was entertained in the home of Mrs. H. T. Magness, Tuesday evening, October 29th.

Hallowe'en motifs decorated the home. Games were played during the evening and refreshments were served to the following: Mmes. and Messrs. Coy Pope, H. G. Brook, Edgar Siler, Leon Hart, Sloan, Osborn, D. E. Moore, E. L. Price, G. B. Huske, D. O. Robinson, E. R. Day, L. N. Ritter, and Mrs. H. T. Magness.

DRY WEATHER AIDS CROPS

The continued dry weather of this locality has made it one of the best seasons ever experienced here for the ripening and harvesting of all kinds of row crops including cotton.

Not only has the weather remained dry it has been just cool enough to start the crops to ripening in time to mature before really cold weather begins and has been aided by a few very gentle frosts which have hurried the ripening and opening of the cotton bolls, thus bringing it into maturity ready for picking before being seriously damaged by any killing frosts.

Not only has the weather been favorable for the ripening of the crops, but the very pleasant condition of the weather has made it delightful for farmers to work in the fields and they have truly been taking advantage of it.

SUCCESSFUL HUNTING TRIP

L. F. Lillard of the Friona Community and Bill Benton of Amarillo returned the latter part of last week from a pleasant and successful deer hunting trip over in the wilds of New Mexico near Magdalena, each being successful in bagging the limit — one buck each.

Enroute to their hunting grounds they met with Buel Jennings and his brother and their father, who were also enroute to a good location for deer, and were invited to throw in with them, which they did and combined both camping equipments with the result that they had one of the best equipped hunting camps to be found in the region, and which included a negro who was a first class cook, and their sojourn together made it one of the most pleasant occasions they have ever enjoyed.

THANKS FOR THE VENISON

Our good friend, L. F. Lillard, who by the way is one of the best successful deer hunters, never forgets his friends of the Star office when he returns from his annual deer hunt, and for this reason, we of the Star office, were the recipients of a most generous amount of venison steak, which was served for Sunday dinner.

The meat was so tender and juicy that it was pronounced by the entire family to be the best venison we have ever eaten, and the amount was so generous that we were unable to consume it all in one meal. Thanks, Lawrence, for the delicious treat.

HAVE MOVED TO HEREFORD

Mr. and Mrs. Ray Smith and children left here last week and have located temporarily in Hereford where Mrs. Smith and the children will make their home until the first of the coming year, while Mr. Smith will spend the greater part of his time in his farm near Childress.

After the first of the year Mr. Smith will have full possession of the farm, which is now occupied by tenants, and he will then move the family there.

Mr. and Mrs. Smith have been residents of Friona for the past four or five years. He having been employed as mechanic with the Buchanan-Robson implement company. During their residence here they have won the love and esteem of the entire community, and formed a large circle of intimate friends, all of whom are deeply grieved to have them leave Friona.

Mr. Smith has taken an active interest in public affairs and has been serving as chief of the fire department, and also been commander of the American Legion post, and in both capacities he has served faithfully and well. They leave with the best wishes of their best of friends for unbounded success in their new home.

CONGREGATIONAL CHURCH

Sunday school at 10:00 o'clock each Sunday morning.

Worship services immediately following the Sunday school session. Men's Study Class each Sunday morning at 10:00 o'clock at the parsonage.

The congregation was greatly pleased to have Superintendent L. J. Marsh of Oklahoma City with them last Sunday and also at a called informal meeting at the home of Mr. and Mrs. Kinsley Saturday night. Rev. Marsh preached at the morning service and also again in the evening and has kindly consented to return here at a later date and preach each night for a week. This series of sermons, however will not be in the nature of a revival, but merely a modest statement of the facts about religion as presented in a group of six or seven sermons. Rev. Marsh went from here to visit with the people of the church at Spring Lake.

J. D. Kerr of the Kerr Paper Company, of Amarillo, was a business visitor here Tuesday afternoon. Mayor Reeve has a force of men assisting him with hand heading his crop of kaffir corn this week. The heaviest ice of the season was seen here Tuesday morning.

tion to the publisher.
Local reading notices, 2 cents per
word per insertion.

Panhandle Press

Ochiltree County Herald, Perry-
ton: Nearly every member of the
Perryton Lions club was present for
the meeting to hear the address of
District Governor Ralph E. Randel,
Panhandle, and to attend the cub
initiation ceremony held after the
regular meeting. Before being ad-
mitted to the hall, the district gov-
ernor was required to take some of
the "secret works," when it was dis-
covered that he had never been ini-
tiated.

Canadian Record: The naming of
the new stadium was voted at a
meeting of the school board of the
Canadian Independent School Dis-
trict, October 26. The name is in
memoriam of Thomas L. Hoover,
late son of Judge and Mrs. H. E.
Hoover. Tom was an outstanding ath-
lete of Canadian High School and
the Canadian Baptist Academy. Later,
he became an athletic of state
and national fame as captain of the
University of Texas Longhorns.

State Line Tribune, Farwell: Men
who have been working on the high-
way through here say that the most
certain way to get a motorist to
drive over a road under construction
is to put up a strong fence clear
across the road with danger and de-
tour signs all over it. Tourists will
drive over a twenty-foot ditch and
through a fence rather than take
a chance on the detour route.

Canyon News: 5,000,000 boys in
the United States are subject to the
contagious disease of crime. 75 per
cent of the car thefts in this nation
are due to child criminals. Those
who are aware of this tragic condi-
tion in the United States are won-
dering whether or not the efforts of
the nation to change the religious
faith of peoples of other lands could
not be better directed in attempting
to save the youth of this nation. Most
of the so-called heathen had a re-
ligion long before this nation was
established.

Wellington Leader: Exceptional
interest is being manifested over
Collingsworth County this year in
the conservation of feed by the
use of trench silos. At the present

contemplating such constructions.
Extension service leaders have wide-
ly advocated trench silos for this
section, and the intense interest
here followed a demonstration at
the Spur Experiment station several
weeks ago.

Hereford Brand: Numerous news-

Groom News: The members of the
Groom Volunteer Fire Department
attended the meeting of the Lonestar
Fireman's Association held at Mc-
Lean last Thursday night. The As-
sociation is composed of the fire de-
partments of McLean, Groom,
Claude, Panhandle, and White Deer.
Each town has donated five dollars
for the purchase of a \$25.00 water
nozzle which will be given to the
fire department with the best at-
tendance of the Association meet-
ings which are held in one of the
five towns every second month.
Groom had 100 per cent attendance
at the McLean meeting and plans to
cop the prize.

Curry County Times, Clovis: Amer-
ican College of Surgeons have
picked automobile accidents, indus-
trial casualties and cancer as the
three main fronts to be attacked in
lengthening life span. The first nam-
ed is of particular concern in Clovis
and this county.

Groom News: How does business
compare with a year ago? It depends
on where you live—but for the ma-
jority of people it is better.

In all but six states of the union
September business activity was greater
than it was a year before, accord-
ing to the U. S. News. In three
of those states—New York, Virginia,
and Louisiana—it was worse. In the
other three—Nevada, North Carolina
and Texas—it was unchanged.

International Sunday School Lesson

By DR. J. E. NUNN

FOR SUNDAY NOV. 10TH 1935

General Topic:— Ezekiel Teaches
Personal Responsibility.

Scripture Lesson:— Ezek. 33:7-16.

7. So thou, O son of man, I have
set thee a watchman unto the house
of Israel; therefore thou shalt hear
the word at my mouth, and warn
them from me.

8. When I say unto the wicked, O
wicked man, thou shalt surely die;
if thou dost not speak to warn the
wicked from his way, that wicked
man shall die in his iniquity; but his
blood will I require at thine hand.

9. Nevertheless, if thou warn the
wicked of his way to turn from it;
if he do not turn from his way, he
shall die in his iniquity; but thou
hast delivered thy soul.

10. Therefore, O thou son of man,
speak unto the house of Israel; Thus
ye speak, saying, If our transgressions
and our sins be upon us, and we pine
away in them, how should we then
live?

11. Say unto them, As I live, saith
the Lord God, I have no pleasure in
the death of the wicked; but that the
wicked turn away and live; turn ye,
turn ye from your evil ways; for why
will ye die, O house of Israel?

12. Therefore, thou son of man, say
unto the children of thy people: The
righteousness of the righteous shall
not be delivered him in the day of
his transgression; as for the wicked-
ness of the wicked, he shall not fall
thereby in the day that he turneth
from his wickedness; neither shall
the righteous be able to live for his
righteousness in the day that he sin-
neth.

13. When I shall say to the right-
eous, that he shall surely live; if he
trust to his own righteousness, and
commit iniquity, all his right-
eousness shall not be remembered;
but for his iniquity that he hath
committed, he shall for it.

14. Again, when I say unto the
wicked, Thou shalt surely die; if he
turn from his sin, and do that which
is lawful and right.

15. If the wicked restore the pledge
give again that he had robbed, walk
in the statutes of life, without com-
mitting iniquity; he shall surely live,
he shall not die.

16. None of his sins that he hath
committed shall be mentioned unto
him; he hath done that which is law-
ful and right; he shall surely live.

Golden Text: Every one of us
shall give account of himself to
God. Rom. 14:12.

INTRODUCTION

The Book of Ezekiel is one of the
Bible. Lacking the beauties of lan-
guage and figures of Isaiah, Hosea,
and Micah, it is nevertheless clear
and vigorous in style, and well ar-
ranged. The prophecies are in chro-
nological order. There are four divi-
sions:

1. Prophecies delivered before the
destruction of Jerusalem: 1-24

2. Prophecies against foreign na-
tions: 5-32

3. Prophecies of restoration: 33-
39.

4. Visions of restored Israel; tem-
ple, priesthood, sacrifices, etc. 40-48.
He is peculiarly the prophet of the
earlier years of the Babylonian
captivity. He was carried to Babylon
at the time of the first captivity, in

Throughout the country, reports
show that improvement is continu-
ing, and at an accelerating rate, in
almost every industry.

Claude News: Rev. Leslie Moore,
of the First Christian Church, notic-
ed that the money received from the
collections had been gradually dwindle-
ing till it began to look as if it
wouldn't even pay the running ex-
penses of the church. Last Sunday
he thought of a novel way of mak-
ing his appeal for funds. He said:
"Those who are behind with their
payments on autos, groceries or other
necessities are not expected to do-
nate." The result was that the col-
lections totaled several times what
they had been.

Wheeler Times: Realization of a
plan for providing rural pupils of
Wheeler county with first class read-
ing material is nearing its goal, as-
serts a statement issued this week
by B. T. Rucker, county superinten-
dent. This is one of the objectives
included in an ambitious program
adopted by Rucker shortly after tak-
ing over his duties as county super-
intendent.

"Wheeler county is one of the few
counties in this part of the state to
take the lead in providing proper
reading material for the school chil-
dren," declares Rucker. "Much cred-
it," continued the superintendent
"is due the trustees and teachers of
the county for their splendid co-opera-
tion in getting the library started.
Within a few years, it is believed
that Wheeler county boys and girls
will have ready access to an abun-
dance of good literature."

Spearman Reporter: Following a
trail of \$20.00 counterfeit bills, a re-
presentative of the U. S. Secret Ser-
vice department visited Spearman
this week. Three of the bogus bills
were located at Texoma, but none
have appeared in Spearman to date.

Borger Daily Herald: William Mc-
Craw, state attorney general, will be
in Borger for the district convention
of American Legion to be held here
during the first two weeks of De-
cember. A communication received by
O. B. Hunt today stated. The official
will join with other high officials
in making the Borger convention
one of the best gatherings of its
kind.

Governor Alfred also sent a tele-
gram and stated that he would be
unable to attend the meeting.

597, with King Jehoiachin. "Jere-
miah must have been one of the
chief formative influences in the mak-
ing of Ezekiel. In language and in
the general tenor of his messages he
is a follower of that prophet. Prob-
ably as a young man he was his pupil;
as Elisha Elijah's, and Micah
Isaiah's."

THREE FUNDAMENTAL TRUTHS

The three truths of personal re-
ligion are:

1. That sin must be punished.
2. That every one will be pun-
ished for his own sin.
3. That God is ready to welcome
and pardon the penitent.

THE NATION AND THE INDIVIDUAL

The dissolution of the Jewish na-
tion that accompanied the fall of
Jerusalem upset many time-honored
religious political beliefs. The life
of the individual had been absorbed
in the nation. The nation had been
everything, the individual nothing.
In the state's bane and blessing the
individual vitally participated. God's
care was for his people as a whole.
Even immortality was usually in-
terpreted in a nationalistic sense.
But now that their state had gone
to pieces, what was the man to do?
A new stress was now placed upon
the worth as a social and religious
unit. Noot on our modern sense, in-
deed. It remained for Jesus to tell
of the preciousness to God of the
single lost sheep! Jeremiah had
sometimes preached the worth of the
individual; but Ezekiel made it one
of his prominent teachings.

THE OLD JEWISH PROVERB

Ezekiel 18:2 "What mean ye, that
ye use this proverb concerning the
land of Israel, saying, The fathers
have eaten sour grapes, and the
children's teeth are set on edge?"

The Jews answered the call to
repentance with an evil proverb
which asserted that repentance and
conversion were useless because Je-
hovah visits the sins of the fathers
upon the present generation. "In-
stead of the true cause of divine
judgments, a false one is substitu-
ted. The passages in the Pentateuch
contain no such teaching. It is un-
iform teaching of Scripture that no
man is punished but for his own guilt.

THE EVIL SON OF A RIGHTEOUS FATHER. 18:10-13

Ezekiel makes it perfectly clear
that the righteousness of a father
will not avail in the salvation of a
son who is wicked. He is the author
of his own misfortune. He must be
willing to accept the full responsi-
bility, for there is no way for him
to pass any of it back upon his father.
He is not able to make use of any
of his father's righteousness either.
The automatic law is to be enforced
without any discount because of credit
stored away by his father. He is
his own destroyer."

THE GOOD SON OF A WICKED FATHER. Ezek. 18:14-20

On the other hand, a son is not
bound to a life of sin and its pun-
ishment simply because his father is
wicked. The unrighteousness of his
father will not injure him. Judge-
ment will not be visited upon him
because of the evil deeds of a father.
Though the father does eat sour
grapes, if the son refuses to meddle
with them he will not be accounted
guilty. "The soul that sinneth, it
shall die." "The son shall not bear
the iniquity of the father, neither
shall the father bear the iniquity of
the son; the righteousness of the
righteous shall be upon him, and the
wickedness of the wicked shall be
upon him."

PERSONAL ACCOUNTABILITY ILLUSTRATED. Ezek. 18:5-18

1. A man who is good, from both
the sacramental and the moral
standpoint, "shall surely live" (ver.
5-9).

2. The man of opposite character
shall lose his life: "responsible for
his own death" (ver 10-13).

3. The good son of No. 2, of a bad
father, shall live, in spite of his
father's badness; nor shall his son's
goodness profit such a father (ver.
14-18).

A WAY OUT. Ver. 21-24

A word of encouragement and
hopefulness is added: The individual
soul shall not lie under the ban of
its own past. God is fair. Moreover,
he wants his creatures to live and
not die. And they may, no matter
how unready they have been living,
by turning from sin to righteousness.
We seem almost to be in the gospel!
It is a plain, practical statement of
Isaiah's beautiful worded, "though
your sins be as scarlet, they shall be
white as snow." But the converse
of this principle is also stated, with
its stern implications: When the
righteous man turns, and sets his
life definitely in iniquitous ways,
death is the sequence.

SPECIAL LESSONS

Our age stresses more than any
previous age the importance and
value of the individual. Notwith-
standing, it sadly needs this word
of Ezekiel's about personal respon-
sibility and accountability. We are
hearing widely quoted, in modern
forms, that same old proverb of the
sour grapes. On every hand men are
excusing their shortcomings and
transgressions on the ground of heredi-
tary, instinct, "complexes", "expres-
sion of suppressed", "racial trend,
defective glands, involvement, wrong
training, and many other findings of
new science and psychology.

But so long as reason, ethics, and
religion exists, the everlasting propo-
sition of the moral freedom of the
will to do right or to do wrong, and
its corollary principle of the individ-
ual soul's responsibility before God
and accountability to God, will stand
fast.

An Odd Law

Incredible as it sounds, there are
states in this country in which a father
can not only will away the guardian-
ship of his children—without consent
of their mother—but also will away
the future custody of an unborn child.
—Bessie Lowery, Presidio, Texas, in
Collier's Weekly.

Trade in Panhandle

Falconing in Old Days

In the days of chivalry falconing
was developed as a sport. The ar-
mored knight rode forth with his fal-
con on his arm, his jesses on his hand
and a hood on the head of the bird.
The jesses are short leather thongs
held in the hand to hold the falcon.
The hood is placed over the bird's
head to keep it quiet while being
transported.

Largest Rattles on Snakes

The largest rattle on any rattles-
nake found had 34 segments. The
segments do not indicate the age of
the snake because a new rattle is ad-
ded each time the skin is shed, which
may occur three or four times a year.
The older and larger snakes frequen-
tly lose terminal rattles which are broken
off.

"Barber-Shop Tune"

According to an authority, in ancient
days men who were temporarily de-
duced of their ruffles and choker
stocks sat around in barber shops. In
those days instead of being provided
with magazines to pass the time, they
were given musical instruments which
naturally led to a vocal accompaniment.

Has Highest Death Rate

Highest death rate in the world is
in China, according to a survey com-
pleted by the national health adminis-
tration at Nanking. Six million per-
sons die annually in China, their aver-
age age being ten. The population of
the country is estimated to be 450,-
000,000.

High Price for Manuscript

Seventy-five thousand dollars was
paid for the manuscript of "Alice in
Wonderland."

The Mohammedan Year

The Mohammedan year is a lunar
one, about 11 days shorter than the
Christian.

Island Called "Rum"

The largest of the islands of the In-
ner Hebrides, Scotland, is called Rum.

Scene of Bloody Battle

Jalapa, a small hamlet in Grant
county, Indiana, was the scene of one
of the bloodiest battles in the War of
1812.

Hippopotamus Holds Record

The hippopotamus is the largest liv-
ing non-ruminating even-toed mam-
mal.

Jokes for Cheer

Jud Tunkins says he tries to keep
on makin' jokes on hopes of findin'
something to cheer himself up with.

Liver Said to Be Too Big

The liver in a human body is about
seven times as large as necessary for
the work the organ does.

Most Famous Mushroom Center

The most famous mushroom center
in the world lies in subterranean pas-
sages under the city of Paris.

Use of Word "Anesthetics"

The word "anesthetics" was first em-
ployed by Dr. Oliver Wendell Holmes.

William Tell Story Liked

Whether the accounts of the heroic
deeds of William Tell be based on ac-
tual facts or mere tradition, it is a
story which is still read and retold
with enthusiasm in every Swiss school
and every Swiss home. A dignified
monument to the gallant archer of
Burglen near Aldorf stands in the
latter village, but the most beautiful
of all tributes to this pioneer cham-
pion of Swiss liberty is to be found
at Tels-Platte, between Brunnen and
Fluelen, on the spot where Tell leaped
ashore from the boat in which he was
being carried off as a prisoner, by
Gessler.

Postmaster General Cabinet Man

From the organization of the fed-
eral government down to the year
1829, the postmasters general were not
recognized as members of the cabinet.
The first postmaster general under the
present Constitution was Samuel Os-
good of Massachusetts, appointed by
President Washington, September 23,
1780. He was regarded as the head of
a bureau. When Andrew Jackson be-
came President, he nominated William
T. Barry of Kentucky to the office of
postmaster general, and invited him to
a seat in the cabinet. Since then the
head of the Post Office department has
been considered a member of the cab-
inet.

Alkaline and Acid Soils

Alkaline countries are Australia,
North and South Africa and the Pa-
cific slope of North and South Amer-
ica (also Mexico, Central America)
and a few other spots, as in this
country west of the Missouri river.
All other countries have neutral or
acid soils. All tea countries, China,
Japan, Formosa, India and all places
of heavy "acid" have acid soils.

Dog Similar to Human Beings

The dog is a bundle of inhibitions,
stimulations and complexes exactly as
human beings, being subject to the
same phobias and mental nervous dis-
orders as man. Apart from the fam-
iliar traits of jealousy, affection,
shame and fear, the dog matches all
of man's emotional peculiarities and
moods.

An Odd Law

Incredible as it sounds, there are
states in this country in which a father
can not only will away the guardian-
ship of his children—without consent
of their mother—but also will away
the future custody of an unborn child.

Collier's Weekly.

MIR. POTISHMAN WRITES STAR

Leo, Potishman of the Transit
Grain and Commission Co., of Fort
Worth, who is a subscriber of the
Friona Star, writes the Star compli-
menting it upon its issue reviewing
the business firms of this territory,
stating also that he enjoys reading
it and that we have many good firms
in this section, all of whom are de-
serving of support. Mr. Potishman
adds in closing - "I hope you get
some rain so we can all do a lot of
business."

Mr. Potishman holds a large in-
terest in the Santa Fe Grain Com-
pany, of this place and is well known
and liked by all of our people who
know him.

Mr. and Mrs. Roy B. Ezell of
Farwell visited their son, Mulkey
Ezell and family Sunday.

Mrs. J. R. Roden and Stub Jones
returned the first of the week from
Sherman, where they were called to
the bedside of their brother who
was very ill but is reported better
at this time.

Mrs. Neva Raybon is visiting
friends in Portales and Clovis this
week.

Ray Landrum spent last week end
in Lubbock.

Chester Sheets made a business
trip to Lubbock Monday.

Mr. Bud Maffett is driving a new
Chevrolet coupe.

Mr. and Mrs. O. F. Lange visited
with friends in Hereford Monday
evening.

Ivan the Terrible
Ivan the Terrible was crowned the
first Tsar of Russia in 1547, soon after
marrying a girl from the family later
known as the Romanovs. In 1552 he
wrested Kazan and two years later
Astrakhan from the savage Tartars
and in 1584 conquered western Siberia.
He did much for the commercial ad-
vancement of Russia but was an un-
balanced and dissolute man capable
of terrible cruelty, as the secret torture
chamber attests. And it is for his at-
rocious acts, rather than the good he
did, that Ivan is remembered with ter-
ror to this day by the people of Russia.

FOR SALE—58 white pullets,
\$1.00 each. Mrs. W. R. Scheibgen,
Hereford, Texas, Hereford and Clovis
Highway. 1tp

MEN WANTED—For Rawleigh
Routes of 800 families in Deaf
Smith, Castro and North Randall
Counties. Reliable hustler should
start earning \$25 weekly and in-
crease rapidly. Write today. Raw-
leigh, Dept. TXK-273-S, Memphis,
Tennessee. 4tp

John Dennon of Farwell visited
with Mr. and Mrs. G. Cranfill and
family Sunday.

Mrs. Jerry Blackwell, Mr. and Mrs.
Mulkey Ezell went to Lubbock Mon-
day where Mr. Ezell went through
the clinic.

Buy your Christmas presents at
the Bazaar, Congregational Church,
November 14th. Eat Chicken Dinner
there too.

CHICKEN DINNER AND BAZAAR

Next Thursday
The members of the Ladies Aid of
the Congregational Church, will hold
their annual chicken dinner and ba-
zaar at the church basement on
Thursday of next week, November
14th.

The ladies propose to live up to
their reputation of setting a good
and bountiful dinner, beginning at
the noon hour and continuing until
all are fed.

In addition to their chicken din-
ner, they will have on display a
large assortment of hand made arti-
cles of needle craft and other arti-
cles that will be very suitable for
Christmas presents, or for immediate
use in the homes. They extend a
cordial invitation to all to visit them.

Good Chicken Dinner and lots of
nice things at Bazaar, Congregational
Church Basement, Nov. 14th,
Thursday next week.

Fred H. O. Oberthier Jr., of Here-
ford, local manager for the Texas
Utilities Company, was a business
visitor here Wednesday afternoon
of last week.

In spite of the dry season there
appears to be quite a goodly amount
of cotton copping in to the Friona Gin.
THE NEXT FRIONA TRADES DAY
WILL BE HELD ON THURSDAY,
NOVEMBER 21st.

Chicken Dinner at Noon. Bazaar
all afternoon, Congregational Church
basement Thursday, November 14.

Mr. and Mrs. Bob Clements and
children visited relatives in Skelly-
town Sunday.

Miss Yora Mae McFarland return-
ed to her school Sunday at Little-
field after a two weeks vacation for
cotton picking.

Mr. and Mrs. Rube Kinsley went
to Clovis Wednesday on business.

J. B. Vasey of Bovina was a
business visitor in Friona Friday
afternoon.

E. Smith, the Ford salesman of
Farwell was a business visitor in
Friona and Rhea Monday.

Joe Hall of Farwell attended to
business in Friona Monday morning.

J. F. Zilmertooth of Bovina was in
Friona Tuesday on business.

John Dennon of Farwell visited
with Mr. and Mrs. G. Cranfill and
family Sunday.

Mrs. Jerry Blackwell, Mr. and Mrs.
Mulkey Ezell went to Lubbock Mon-
day where Mr. Ezell went through
the clinic.

Date Back Centuries
"Millstone" coins or those with holes in the middle rank with knife and spade coins as the oldest in existence from ancient Chinese times. The oldest known money from China dates from the Seventh century before Christ, the same date set for the oldest existing Greek money. Chinese writers, however, refer to money as far back as 2000 B. C.

Use "Courtesy Titles"
The custom is for the eldest son of a peer, or the rank of duke, marquis, earl, or viscount, to use, as a "courtesy title," one of his father's inferior titles. In the case of a duke, second and other sons are also known by their courtesy title of "Lord," followed by their Christian name and surname. "Courtesy titles" are not hereditary.

More "Mad" Dogs in Winter
More cases of canine madness—known as hydrophobia or rabies—have occurred during the cold months of January and February than during the so-called "dog days" of July and August, according to authoritative records of health departments of large cities.

Sloping Smokestacks
According to one authority, smokestacks were sloped backward to eliminate draft because of the theory that there was less likelihood of air pressure from the top of the stacks; however, marine engineers have found vertical stacks to be just as efficient.

Use of the Great Seal
After the Constitution was adopted one of the first acts of congress was to ratify the Great Seal. Although the secretary of state is official custodian of the seal he cannot place it on any paper unless that paper bears the signature of the President.

Nine Points of the Law
Nine points of the law have been given as: (1) A good deal of money, (2) a good deal of patience, (3) a good cause, (4) a good lawyer, (5) a good counsel, (6) good witnesses, (7) a good jury, (8) a good judge and (9) good luck.

Nome, Alaska, "Anvil City"
Nome, Alaska, was first called Anvil City. The name Nome is derived from Cape Nome, first so called on a chart dated 1849, and said to have been a draughtsman's mistake for the query, name, on the original chart.

Moravians Landed in 1734
The Moravians came to the North American continent in 1734 and settled in Georgia, but sought sanctuary in Pennsylvania when attempts were made to force them to bear arms against the Spanish.

Result or Temperature Drop
A drop in temperature of the air at 100 per cent humidity will cause the air to precipitate excess moisture as haze, fog, drizzle, rain or cloud-burst.

Man at Greatest Efficiency
Man is at his greatest efficiency between 10 in the morning and midnight, the time depending on the individual, according to findings of a European scientist.

Some Fish Hibernate
Fish hibernate in cold weather, but some fish like carp descend into the mud during a prolonged frost and remain there until the thaw sets in.

Nicknames
Jerry is a nickname for Gerald. Usually it is a nickname for Jeremiah, and when used as a nickname for Gerald, it is spelled Gerry.

Insist on Honesty
"An honest man," said Uncle Eben, "ain't gineter git along very well unless he has de courage to insist on folks he deals with bein' de same way."

Britain's Last Sailing Ship
The last sailing ship built in Great Britain was the Archibald Russell, which was built in Glasgow in 1906.

Invented Wall Paper Block
The invention of the block for printing wall paper is attributed to Jean Papillon a French engraver, in 1688.

Habits of the Sheldrake
The sheldrake, an Old world salt water duck, has underground as well as underwater habits.

NOTICE SHERIFF'S SALE

THE STATE OF TEXAS, COUNTY OF PARMER
By virtue of an Order of Sale, issued out of the Honorable District Court of Parmer County, on 17 day of October A. D. 1935, by the Clerk thereof, in the case of the Friona Independent School District versus J. E. Duffenbough, No. 1100, and to me, as Sheriff, directed and delivered, I will proceed to sell for cash, within the hours prescribed by law for Sheriff's Sales, on the First Tuesday in December A. D. 1935, it being the 3 day of said month, before the Court House door of said Parmer County, in the town of Farwell, Texas the following described property, to-wit:
The Southeast Quarter (SE 1-4) of Section Thirty-One (Sec. 31), Township Two North (T. 2 North), Range Four East (Range 4 East), in League 448, in the Friona Independent School District, in Parmer County, Texas, as shown by map or plat thereof of record in the deed records of Parmer County, Texas, to which reference is here made for more specific and definite description.
leaved on as the property of J. E. Duffenbough, this the 19 day of October 1935 to satisfy a judgment amounting to \$239.76 in favor of the Friona Independent School District and costs of suit.

GIVEN UNDER MY HAND, this 19th day of October A. D. 1935.
EARL BOOTH, Sheriff
Parmer County, Texas

NOTICE SHERIFF'S SALE

THE STATE OF TEXAS, COUNTY OF PARMER
By virtue of an Order of Sale, issued out of the Honorable District Court of Parmer County, on 17th day of October A. D. 1935, by the Clerk thereof, in the case of The Friona Independent School District versus Lizzie M. Bigelow, No. 1102, and to me, as Sheriff, directed and delivered, I will proceed to sell for cash, within the hours prescribed by law for Sheriff's Sales, on the First Tuesday in December A. D. 1935, it being the 3 day of said month, before the Court House door of said Parmer County, in the town of Farwell, Texas the following described property, to-wit:
The Southwest Quarter (SW 1-4) of Section Twelve (Section 12),

Foolishness and Wickedness
Jud Tunkins says if you let foolishness have its way long enough there won't be so much difference between it and plain wickedness.

Diameter of Galaxy of Stars
The diameter of our galaxy of stars is estimated at about 200,000 light years. (A light year is 6,000,000,000,000 miles.)

First Guarantee Required
A just system of law and its impartial administration is the first ordinary guarantee of any decent government.

India Once Used Square Coins
Indian rajahs issued occasional square pieces of money before Britain took over management of currency in India.

Our "Funny Bone"
The name "funny bone" is given to the ulnar nerve. It is so slightly protected by the internal condyle of the humerus that it is easily affected by blows on that part.

First Against Slavery
The Mennonites were the first group to advocate the abolition of slavery in the colonies, making their first recommendations in this matter as early as 1688.

1936 Master De Luxe and Standard Chevrolets are Replete with New Features

New Master De Luxe and Standard Chevrolets for 1936 show marked advances in appearance and in engineering. Perfected hydraulic brakes, high-compression engines with full-length water jackets, and balanced carburetion are among the mechanical improvements. The solid steel Turret Top Fisher body is now used on the Standard as well as the Master De Luxe models. Either Knee-Action or conventional springing may be had in the Master models. The illustrations show: Top left, the Master De Luxe sport sedan, with built-in trunk; top right, the re-styled, deeply moulded radiator grille, used on all models; lower left, the simple arrangement of Chevrolet's perfected hydraulic brakes, all models; and, lower right, a Standard sedan.

THE NEW CHEVROLET FOR 1936

The only complete low-priced car

DEALER ADVERTISEMENT

NEW PERFECTED HYDRAULIC BRAKES
the safest and smoothest ever developed

IMPROVED GLIDING KNEE-ACTION RIDE*
the smoothest, safest ride of all

SOLID STEEL one-piece TURRET TOP
a crown of beauty, a fortress of safety

THE Chevrolet Motor Company climaxes a quarter-century of quality manufacture by presenting Chevrolet for 1936—the only complete low-priced car.

This new Chevrolet is the only car that brings you all these good things at lowest cost. The only lower-priced car with New Perfected Hydraulic Brakes. The only lower-priced car with the Improved Gliding Knee-Action Ride.* The only lower-priced car with beautiful new Body by Fisher—new high-compression valve-in-head engine—solid steel Turret Top, and many other improvements which give smarter, smoother, safer and more economical motoring.

See and ride in the only complete low-priced car—today! CHEVROLET MOTOR COMPANY, DETROIT, MICHIGAN. Compare Chevrolet's low delivered prices and the new greatly reduced G.M.A.C. 6 per cent time payment plan—the lowest financing cost in G.M.A.C. history—General Motors Value.

NO DRAFT VENTILATION ON NEW BODIES BY FISHER
the most beautiful and comfortable bodies ever created for a low-priced car

HIGH-COMPRESSION VALVE-IN-HEAD ENGINE
giving even better performance with even less gas and oil

SHOCKPROOF STEERING*
making driving easier and safer than ever before

ALL THESE FEATURES AT **\$495** CHEVROLET'S LOW PRICES

AND UP: List price of New Standard Coupe at Flint, Michigan, with bumpers, spare tire and tire lock, the list price is \$20 additional. *Knee-Action on Master Models only, \$20 additional. Prices quoted in this advertisement are list at Flint, Michigan, and subject to change without notice.

Blackwell's Hdw. & Furn.
"Your Home Store"

PECULIAR FOODS

Baking Cassava Cakes in Haiti.

Prepared by the National Geographic Society, Washington, D. C.—WNU Service.

SOUTH AFRICAN exporters are bringing a new food to the world's dining table which is already replete with a generous cross section of the living things found on the earth and in the sea.

Grasshopper ragout the new article is called. For many years the Chinese and Arabs have relished grasshoppers, which were once destroyed as they attempted ruination of South African crops. Now great masses of the insects are captured, carefully cleaned, conserved, and shipped to the Orient and Asia Minor ready to be eaten.

Strange foods are to be found on the markets of all continents. In fact, one part of the world is rather ignorant of what satisfies the hunger or tickles the palate of the other part.

"He who would enjoy his food, should not look over the kitchen wall," the Korean proverb warns; but there is much of interest to be found by looking over the geographical wall of space and regarding the food habits of other people. Rats and dog steaks in China have regular market prices, and thoroughly ripened eggs are delicacies. Our food is often looked upon as queer and heathenish by these same people. The Turk regards oysters as we do some African and West Indian dishes. But "all human history attests that happiness for man,—the hungry sinner!—since Eve ate apples, much depends on dinner."

Russian borscht is probably one of the best known soups. The large quantity of meat floating in a sea of cabbage and sour cream is a meal in itself, heavy and filling. Chinese fish soups are known the world over for their delicate flavor, as is Swedish bouillabaisse, made of all kinds of birds with elk's meat as the piece de resistance of the soup.

In a Swedish home, the Christmas porridge is an affair of great importance, made in a gigantic copper wash tub, being stirred by several women, who take turns stirring two at a time for no less than ten hours on end. In this same home, cooks are pensioned to prevent family recipes from being given away.

Some Queer Sea Foods.

By Andorrans and Polynesians, landlubbers and seafaring folk, seafood is held in high regard. In Siberia owing to climatic conditions, frozen sliced fish is the epicurean's delight. Kukson, the local fish of the salmon family, nearly takes the place of bread. Frozen, the skin removed, sliced, and eaten with salt, it is a savory treat.

But the South Sea Islanders, far from the freezing point, hunt their treasured palatos by the light of the moon. The tiny worms which come to the surface of the water once each year are eaten raw "on location" or taken home in pails. In Spain, little, white, transparent eels two inches long, called anguinas, are attracted and caught with the aid of oil lamps, fried in batches in popping olive oil, and served hot.

Australians hunt dugong (manow), like a whale, but owing to the thickness of the hide, their spears are often turned aside or broken. The flesh of this mammal has a flavor akin to both beef and pork, the meat being used like bacon. A good sized specimen may reach 12 feet in length and weigh 600 pounds.

The river-dwellers of Brazil and other tropical South American countries have remarkably large fish in the jacarotanga, from which large steaks are taken. Fried alligator tail is also to be had there, as well as the beardlike iguana. The flesh of the female iguana is supposed to be as delicate as a young chicken, although occasionally experience has proved it to be as tough as an old hen. Iguanas are sold alive, tails tied together to prevent escape.

Liberia Likes Dumpty.

Dumpty, the national dish of Liberia, is prepared principally from a sweet, non-poisonous cassava root—called cassada in Liberia. The roots are peeled, boiled, and the fibers from the center removed before the process of pounding in a mortar with a pestle is begun. This process calls for considerable skill and experience because the cassava sticks to any dry thing. The pestle must be kept moist, but not so moist as to make the mass soggy. Dried and fried dumpty becomes so hard that it is used as shot in rifles.

To the north of Liberia, in Africa, is found another standard, meal-in-itself dish, couscous. Mutton or fowl, various vegetables, cooked separately before mixing, and served with steamed wheat dumplings make a highly seasoned Arab version of an Irish stew.

Without counting calories, Bolivia supplies a novel way of preparing the ubiquitous potato. To make chuno, potatoes are frozen, trampled free of water, trampled again and again, un-

til they are little balls of pure starch. The countries of the Amazon basin, however, cling to manioc or mandioca root. This root is poisonous, but the natives know how to pull its fangs by shredding, washing, and squeezing until the remainder can be ground into sawdust and eaten without harm.

For green vegetables, the Pacific islands present taro leaves, a sort of spinach, which is cultivated in swampy ground by the women of the islands. The roots may also be eaten like potatoes, or cooked like popo. Chill's greens come from the sea. Cuchayuyu, or cocha yuyu to the Incas, means "garden truck of the sea" and is a species of sea weed.

Sarmale Pleases the Rumanian.

The Rumanian variety of a New England boiled dinner is sarmale. Soured cabbage leaves, a more delicate sauerkraut, rolled around a meat ball, is served with coarse cornmeal mush called mamaliga, a highly spiced sauce, and often thick sour cream. Mamaliga is also served with eggs and other combinations. Practically the same dish is to be found in Sweden—mince-meat of elk wrapped in cabbage leaves.

As we like dumplings and fritters with our meals, so in Khoresm doughnuts stuffed with rice and eggs, known as pirochki, and in China crullers of coarse flour fried in vegetable oils, fill that place on the menu.

Bread in Afghanistan is more than mere bread; it is food, napkin, and tablecloth, all in one. It derives its shape and uses from the use of quick burning fuel and a varying demand. From flour to loaf is a matter of only a few minutes. An oven is heated by use as a furnace for a short time with brushwood fire. For hours on end the baker may have only a scant supply on hand, yet a sudden demand is quickly met, while the customer's wait. Some Russian bread is baked in the shape of a balloon tire.

In Cuba, one may reach for a sweet and find it in the barquillo, possibly the grandfather of the ice cream cone in a plate, white loaves made of egg white and sugar, which may be eaten separately but more often "dunked" in milk and dissolved; or in the mango, a reddish gold fruit. Even lollipops, congealed and wrapped in paper on a stick, are to be found everywhere. Afghanistan keeps step with our "snow balls." A plate is first filled with snow over which a tiny ladle of syrup is poured. Then a handful of sweet paste cut into strips like noodles is added, over which tiny ladles of cream are poured before the whole confection is completed with a dash of rose water. This is an Afghan sundae. Suggesting the taste of good ice cream is the raw, frozen marrow of reindeer bones popular in Siberia. China prefers solid cream for its dessert, but Khorasan, in southern Russia, prepares pig, a pie filled with mashed raisins.

Delicacies in Chile.

In Chile, the miel de palma, honey of the palm, is extracted from the felled tree, and served as a syrup with "patipapas," delicious, large and yellow, some weighing 11 pounds, are grown in Chile, and in Darfur are one of the staffs of life. There the melons are broken open and scooped out inside, the rind thrown into the sand. When all the pulp has been extracted, it is squeezed to break up the fiber. In one vessel, it is placed on top of another vessel and the liquid in the under one percolates through straws into the upper. The rind is then broken up and pounded in a vessel fashioned out of a tree trunk. All possible moisture is withdrawn and the residue becomes food and drink for donkey, goat, and fowl.

Liquid refreshment varies as much in foreign lands as does the solid food. Tea, of one kind and another, is the predominating drink. Tea, of course, in China, strained watermelon juice tea in Darfur, orange tea brewed from the wild orange tree in Tahiti, tea seasoned with cardamom ginger in Afghanistan, and unappetizing butter tea of southern China. This last strange tea is boiled, coarse Chinese tea, strained into a churn, with a lump of stale butter and a handful of salt. This mixture is churned into an emulsion. As the tea is drunk, the butter on top is blown back until the tea is nearly finished. Into this, hot tsamba—parched barley meal—is poured to be kneaded by the fingers into lumps and eaten. In some parts, far from the barley growing valleys, fresh milk is poured into the unwashed churn, the liquid immediately curdling. This is churned and the butter extracted. The rest of the milk is boiled in a large iron pot to a thick stryp, poured onto a thin sheet and allowed to dry, broken into small pieces and stored. It becomes hard and dry. To eat it dry is out of the question, but it is substituted for tsamba, soaked in butter tea, softened a little and chewed.

A Holding Company

A government official defined the holding company as follows: "The holding company may be defined as any company which, by virtue of its ownership of securities, is in a position to control or substantially influence the management of one or more other companies; that is, a holding company is different from a mere investment company. An investment company buys securities as an investor would do and without any purpose of determining the policy of the management. But when a company by virtue of its ownership of securities is in a position to control or substantially influence the management of another company it is properly classified as a holding company."

Supreme Court Judges for Life

United States Supreme court judges can be removed only for improper conduct in office, such as treason, bribery and other high crimes and misdemeanors. The only method of removal prescribed by the Constitution is impeachment by the house of representatives and trial by the senate. It never has been necessary to impeach a United States Supreme court judge.

The Redstart

The male Redstart is white low on the abdomen. The upper parts are black, with orange patches on each side of the breast, and near the center of each wing. The outer tail feathers are also orange, tipped with black. The orange of the breast is more fiery red in tone. The female is grayish, green-brown instead of black, and she is yellow where the male is orange.

Trim Zoo Animals' Toenails

Animals of zoo exhibits have to have their toenails cut, the reason being that they do not get enough exercise to keep the nails sufficiently worn down, and if the nail or claw were allowed to grow it would in time turn inward and lacerate the flesh. This operation is rarely an easy task for the keepers, but it is part of their daily work and must be done.

First Use of Name "Velocipede"

The name "velocipede" was first given to the contrivance of the Frenchmen Blanchard and Mazurier, introduced in 1770. It consisted of two wheels placed tandem and connected by a horizontal bar upon which the rider sat astride, propelling the machine by a motion of the legs as in walking, but pushing forcibly backward upon the ground.

The Barb Horse

The Barb belongs to the barbary breed of horses introduced by the Moors into Spain, and of great speed, endurance and docility. This breed is said to be a variety of the Arabian, and most of the progenitors of the present thoroughbred were of the same strain.

Atouts

They are the 22 emblematic cards, numbered from 1 to 21 and including one unnumbered card, used in the ancient game of tarochino, or tarots. Atout is also the regular modern French word for trump at auction or contract bridge.

Loneliest Village

The loneliest village in North Lincolnshire is Stalton-in-Vale, near Market Haslem. The village has no public house, policeman, bus service, school, or unemployment problems. Villagers speak their own dialect, and they have their own agricultural interests.

"Canned" Indian Languages

Northwest Indian languages will be preserved even after the natives who understood them have disappeared. Phonographic recordings of the tongues, as spoken by tribes patriarchs, have been preserved.

London Street Names Duplicated

London's streets provide thousands of cases of duplication of names. "Church" occurs 86 times, Victoria 74 times, Park 62 times, Queen or Queen's 61 times, and King or King's 36 times.

Ravine Nicknamed "Wall Street"

Bryce Canyon, Utah, a huge ravine of sheer cliff built by Nature, is nicknamed "Wall Street," because of its resemblance to the famous New York thoroughfare.

Heard God Speaking

To the prophets and saints the wonders of earth and air and sky and sea were a really intelligible language in which they heard Almighty God speaking to them.

Cone-Bearing Trees Oldest

Conifers, or cone-bearing trees, originated on earth much earlier in geologic time than any others of our present day forest trees.

Quarrel of Youth and Age

The quarrel of youth and age dates at least from the time of Noah and his sons, and probably a good deal earlier.

Ethiopia's Independence

Ethiopia became independent towards the Eleventh century, having been an Egyptian province before that.

Horse Trainers' Companions

A competent horse trainer averages 25 horses in his stable. Some care for as many as 60.

President Free Agent

There is no law requiring the President to be of any particular religious faith.

The Buffalo Bug

The buffalo bug or buffalo moth is the larva of a species of carpet beetle which was imported from Europe, probably in shipments of carpets, about 60 years ago. The beetle itself is a small black and white one, with a red line down the middle of its back. The eggs are laid among the fibers of the material on which the larva will feed, whether carpet, woollens, furs or cotton. Carpets placed permanently on the floor and allowed to remain undisturbed for a year furnish ideal conditions for the pest. Polished floors and rugs that are easily and often removed will tend to eliminate it.

A Strange Parasite

One of mankind's strangest parasites is the flaria, a microscopic eel-like worm of tropical and subtropical countries which gets into the body through drinking water or the bite of an infected mosquito and frequently causes elephantiasis, writes B. H. Brinton, New York City, in Collier's Weekly. These worms swarm in the victim's blood during the night and completely disappear during the day.

Beard as Mark of Slavery

That Warsaw is the beardless city of Europe is the result of its defiant challenge of the past. Russian rulers tried to introduce the vogue of the beard and so make Warsaw appear authentically an appanage of Moscow. Hence shaven cheeks are regarded as the hallmark of patriotism and are commended in all walks of life.

The Book of Sports

The Book of Sports was a popular name for the proclamation issued in 1618 by James I, and ordered to be read in all churches, wherein it was declared that dancing, archery, May games, morrice-dances, leaping, vaulting and other such games were lawful on Sunday, but prohibiting bear-baiting, bowling and interludes.

"Ethiopia" From Greek

The name Ethiopia is from the Greek, meaning land of the burnt-face people. From earliest times it was used by classical Greek writers to refer to all lands inhabited by dark-skinned people. Abyssinia is derived from the Arabic word "Habasha," meaning confusion and has come to connote mongrel.

The Lay-Reader

A lay-reader in the Protestant Episcopal and Anglican churches is a layman licensed to take part in public worship. The incumbent can permit anyone to read the lessons, but for authority to read prayers a license from the bishop is required.

Smallest Person Ever Born

The smallest person ever born was Lucia Zarate. She was born in New York in 1863, and when fully grown did not stand more than 20 inches in her stockings feet. The most famous dwarf, Tom Thumb, was 31 inches in height.

Habits of Bloodhounds

Bloodhounds do not always track down a person with their noses directly over his trail. When a strong wind is blowing across it, they will often follow the scent as far as 150 feet to leeward.—Collier's Weekly.

The Coffin Spoon

A coffin spoon was called a funeral spoon in England made in the shape of a coffin lid. It was the custom to give two to the friends helping at the time of burial. Hence they are usually found in pairs.

Dictionary Once Banned

Once upon a time Webster's dictionary was banned by the state of Arkansas because the fundamentalists discovered that it contained a definition of the word evolution.—Collier's Weekly.

Old Map of U. S. Coast

A map of what is now the Alabama and Mississippi coast, which American Vesputius drafted in 1501, hangs in the museum at Modena, Italy.

Real "Blue-Bloods"

The real "blue-bloods" of the world are the blond, blue-eyed beauties of Brunet Seville in Spain, who are the descendants of the Visi-Goths.

X-Rays in a Star

The X-rays in a star are the same as the X-rays experimented on in a laboratory, but they are enormously more abundant in a star.

Land of Gennesaret

The Land of Gennesaret was a small plain on the western shore of the Sea of Galilee. It was exceeding fertile.

Most Valuable Island in U. S.

The most valuable island in the world is located in a river mouth in the United States. It is Manhattan island.

Trouble With Wisdom Teeth

Men have much less trouble with their wisdom teeth than women do, says one anthropologist.

Water Reaching Greatest Density

Forty degrees Fahrenheit is the point at which ordinary water reaches its greatest density.

Prosperity and Happiness

Prosperity and happiness in life result from being born "under a lucky star."

Bullfrog Slow Grower

A bullfrog tadpole does not mature for at least two years.

Still Live in Caves

Visitors to the Touraine region of France to see the palatial chateaux which dot the district find people living in caves. At various places along the Loire notably near the ruins of the Cinq-Mars-la-Pile, at Chinon and Langeais, are the homes of these Twentieth century troglodytes, whose chambers are cut out of limestone rock. Many of the caves apparently are occupied by people in comfortable circumstances, for the rooms are ornamented and embellished. There are several miles of such homes, where people burrow into hills like moles and pride themselves on their residence.

The Arapahoes

The Arapahoes are one of the typical Plains Indian tribes, belonging to the same language family as the Algonquians. Before the coming of the white man, they appear to have migrated southwest across the Missouri river from the region of the Red River valley of northern Minnesota where, according to their traditions, they lived a quiet agricultural life, in contrast to their nomadic existence in historic times.—Washington Post.

Gamma Rays

Gamma rays are high frequency vibrations, similar to those produced by an X-ray tube, though of shorter length. No other known ray approaches them in this particular. They have the speed of light, 180,000 miles a second, and they alone, of the three kinds of radium rays, are used medically. They are effective 6,000 inches from their source.

Origination of Sweet Corn

Sweet corn is thought to have been cultivated in the United States in the first half of the Nineteenth century. It is apparently an offshoot of field corn, whose accidental sweet grains the Indians did not trouble to propagate. Only the white man noticed the delicate difference and grew sweet corn for his own use, leaving the field corn for animals.

Amber Is Fossil Resin

Amber is a fossil resin from trees of the pine family and is dug up from the shores of the Baltic sea, the North sea, etc. It is one of the most important and valuable of these resins, used in making mouthpieces for pipes and cigarette holders, for beads and ornaments and in varnish making.

Discovery of Electric Light

It is uncertain when electric light was first produced by artificial agencies. The first successful display occurred in 1810, when Sir Humphrey Davy with a battery of 2,000 elements entertained the Royal Institution by producing an electric light with an arc 3 inches long between carbon points.

To Tell Mahogany

Genuine mahogany may be recognized by pores which look like tiny pin holes in the end grain of the wood, such as are found at the end of a leg or arm of a chair, or at the edge of a table.

Hogs Growing Heavier

There have been reports in the last few years of hogs weighing from 1,550 to 1,500 pounds, which are unusual. It is not uncommon for mature animals to weigh 1,000 to 1,200 pounds.

Scales Tell Age of Fish

Scientists have found that the age of fish may be calculated by the rings on the scales, something as a tree's age is figured. A powerful microscope shows these rings clearly.

City of Leontopolis

The city of Leontopolis was an ancient city in the Delta of Egypt. The name is also a later designation for Nicaopolis, a fortified town of Mesopotamia, on the Euphrates.

Five Vice Presidents Re-Elected

Five Vice Presidents of the United States were elected to second terms—John Adams, Daniel Tompkins, George Clinton, John Calhoun and Thomas Marshall.

Tides in Okhotsk Sea

The tides in the Okhotsk sea, Russia, which occur only once in 24 hours, reach a height of 37 feet, according to Russian investigators.

The Intellectual Leaders

The intellectual leaders of men are the men of vision, with the power of seeing more than others see, for seeing ahead of one's fellows.

Foreigners in England

Among the foreigners living in England, the greatest number are Poles, followed by Americans and Russians.

Oldest Breed of Dog

The Ivisene dog, a greyhound of the Balearic islands, has been called the oldest breed of dog living.

Known in Egypt

The electric catfish was well-known to the ancient Egyptians, who depicted it on their mural paintings.

Stevenson Wrote Jekyll-Hyde

The story of "Dr. Jekyll and Mr. Hyde" was written by Robert Louis Stevenson.

Diameter of Arcturus

The diameter of Arcturus is approximately 30 times that of the sun.

Ulster, in North Ireland

Ulster is a province in the north of Ireland.

Humidity Makes Grain Moisture

Heat Not Alone Responsible for Content of Crops, Government Says.

Supplied by the United States Department of Agriculture.—WNU Service.

It's not so much the temperature of air as it is the humidity which governs the change in moisture content of grain in storage on farms and of grain on the standing stalk.

Under controlled air conditions in the Arlington (Va.) laboratory, engineers of the bureau made tests of samples, in bulk and in flat pans, of cereal grain, flax seed, soy beans and seed cotton. They also tested chopped hay.

They found that relative humidity of the atmosphere in which the moisture content of individual samples reached a point sufficiently low for safe storage varied somewhat with the different kinds of commodities but ranged from approximately 65 to 80 per cent. Cereal grain, when exposed to air at a relative humidity of 75 per cent, absorbed or gave off moisture until the final moisture content was approximately the maximum recommended for safe storage. At a relative humidity of 65 per cent the moisture content of the grain was lower and a relative humidity of 85 per cent higher than that recommended for safe storage.

A moisture content of 14 per cent for cereal grain, 16 per cent for soy beans, and 11 per cent for flax seed is usually low enough for safe storage under ordinary storage conditions.

The rate of change in moisture content of the samples at any given humidity and temperature depended largely upon the degree of exposure. When the commodities were exposed in such manner that each kernel or particle was in contact with moving air, the moisture content increased or decreased in some cases as much as 2 per cent in a few hours; when exposed in bulk, in layers only 4 inches thick, it took from five to seven days for a similar change to occur.

Variations in temperatures from 60 to 75 degrees F. at a constant humidity had little effect on the moisture content of the commodities. Considerable variation in moisture content of individual commodities existed especially at 85 per cent relative humidity, ranging from slightly more than 13 per cent for flax to about 33 per cent for hay. As the relative humidities increased from 65 per cent on, many of the commodities showed practically the same change in moisture content. This condition was particularly true of wheat, corn, sorghum, rice, oats and cotton.

In the case of soy beans, at relative humidity of 65 per cent the moisture content was lower than that of any of the other commodities, except flax seed. Stepping up relative humidity to 75 and to 85 per cent increased the moisture content of soy beans similar to that of hay. When the two oil-bearing seeds, soy beans and flax seed were exposed to high humidities, a much greater percentage of moisture was absorbed by the beans which contain a higher percentage of oil.

Summer Alfalfa Seeding Found to Be Successful

Alfalfa, most useful legume crop, can be seeded successfully in summer months if care is taken in preparing the seedbed and putting in the seed, says a writer in the Prairie Farmer. The ground should be plowed at least a month before seeding and should be disked several times to kill weeds. The soil should be firm under the seed, and the seed should be covered shallow and uniformly. Use about 10 to 12 pounds of good, hardy seed per acre. Do not seed with a nurse crop. Fields to be seeded to alfalfa should be tested for soil acidity, and if needed, ground limestone should be applied well in advance of seeding. A good method of seeding is to cultivate the soil, sow the seed broadcast and cover with a weeder or light harrow. Even though the summer-seeded alfalfa makes a good growth in the fall, it is not advisable to cut or pasture the crop the first fall.

Train Colts Early

The training of a colt should begin at an early age. Colts that are handled and broken when young take the presence of man as a matter of course and are easily approached in the pasture and stall. In fact, according to the Missouri Farmer, horsemen who do not handle their colts until they are three years old marvel at the gentleness of colts that have received thorough early training. The first lesson may consist of fitting a leather halter on the foal. The next day tie the colt up in the same stall with its mother for about half an hour. Watch it to see that it does not become tangled in the halter rope or injure itself in any way. Repeat this lesson until the colt stands quietly; then it is ready for leading.

Weeds Steal Water

Shortage of moisture is probably one of the greatest factors in limiting corn yields, says the Iowa State college crop experts. They point out that it takes 368 pounds of water—measuring only the water that passes through the plant—to produce a pound of corn. A pound of oats requires 327 pounds of water, clover 797, and alfalfa 831. To produce a pound of rawseed it requires 948 pounds of water, a pound of cocklebur takes 432 pounds, lambquarter 801 pounds.
